

The Return of the God of War [The Protector] Chapter 2970

Daxia has opened the safe island, and transferred people and some necessary items to the safe island as much as possible.

It is to fight for the last time.

Keep as much as you can.

soon.

Several countries that have good relations with Daxia have also launched safe islands. After all, the safe island project that we all assisted each other in the past was just completed.

It's all available now.

Upon hearing this.

All parties immediately started using it.

The number of safe islands is also sufficient to be used by Daxia and the parties involved in the construction.

As for other people, they can only figure out their own solutions.

I can still remind you for now.

“It is estimated that there are less than ten hours left for the full outbreak of the catastrophe! This is a conservative estimate! If the outbreak is fast and severe, then only six hours!”

Yan Longwei directly stated the remaining time in the meeting and asked everyone to prepare.

This is actually to see how big a hole the two aircraft can open the super soul vein.

If it is smaller, it is estimated that it will take ten hours to spread from the Antarctic glacier.

If it's big, it doesn't have to be. It will explode in an all-round way, and it will soon spread to the whole world.

That's six hours.

Anyway, Yan Longwei is calling on the whole world to face this catastrophe together. Since we can't avoid it, then hurry up. What can we save? What can I leave behind?

This live broadcast of Yan Longwei facing the world will be released as soon as it is released.

The whole world is in chaos.

...

And at the moment.

Levi Garrison on the Golden Eagle fighter suddenly noticed something abnormal.

"Boom!!!"

A light arrow actually shot towards here.

“Boom!”

Levi Garrison directly exploded a terrifying force in the air.

Shatter this light arrow!

“Who the hell! Come to harass this time!”

Levi Garrison was really going to explode.

If it's usually okay.

But now.

Hurry!
