

## The Return of the God of War [The Protector] Chapter 2974

Just unheard of.

Still want to destroy the whole world from the inside out?

impossible!

indeed!

Except for the leaders of Daxia, no one knew about the super spiritual veins.

Even the Black Hawk agents of the Sky Shield Bureau didn't know this.

I have never heard of it before, let alone understand it.

Now some people suddenly say that this thing can destroy the whole world.

How and how...

How does this make everyone believe?

Let alone prepare! Don't talk about them.

Levi Garrison didn't even believe it at first.

I think this power is too exaggerated.

If it weren't for Xiao Liejun, they said the reason for the termination of the Atlantis plan.

Levi Garrison would not believe that either.

Levi Garrison didn't believe it.

Not to mention other people.

Even most people in Daxia who are moving to the safe island find it a bit absurd.

However, the reason they still went is that they would rather believe what they have, not trust them without.

And I believe these decision makers are right.

Even if you don't believe it...

They are all dedicated to the people and will not let them suffer.

But others are different.

They couldn't believe it more and more.

Many people think that this is Daxia's trick to divert the things that brought the Dark Doctor.

Just want to swallow all the secrets of the Gods Lab!

What super spiritual vein?

Can it be so powerful?

It's so funny!

Since there is such a strong super spirit vein, why can he still lose to the Galactic Guardian Alliance?

I lost so badly!

With this trick, why did you go early?

And Weili described it too much.

Can destroy the world inside and out.

Do not believe!

So all parties are hesitating!

Even if some forces believe in Daxia's release meeting, there is no way.

They have no idea.

There are no safe islands.

There is no hiding place.

The emergency response will not respond much.
