

## The Return of the God of War [The Protector] Chapter 2991

The so-called safe island is to find some specific places, and then build a fort with special materials.

Once the island is opened, it will be completely sealed.

Isolate the inside from the outside world!

Cut off from the world!

This is the role of the safety island!

The key is that the materials for construction are carefully selected and can hold everything.

It was originally to prevent Leviathan from being attacked by giant creatures like Leviathan.

Just use it now.

As long as the energy impact of the super spiritual vein can be blocked, the people inside can survive.

Otherwise, it will definitely die!

At this time, many people began to ask Daxia for help, begging to help them.

But at this time, Da Xia could barely take care of herself.

Can you worry about other people?

There are also some powerful races who think this is the last gift!

I feel that I should not avoid it, but face it!

Among them is the powerful existence of the War Bear Kingdom!

They did not join forces with Daxia because of the island!

So at this kind of moment, they choose to face it!

...

At the moment, the other side.

The Kingdom of God's future technology kingdom has also been activated, with many people and equipment hiding in it.

And the future science and technology kingdom is also activated, and a shield is formed to protect the entire science and technology kingdom in it.

This can be regarded as a super large island.

Countless people from other countries fled around the future technological country in an attempt to enter it.

However, the Galaxy Guardian Alliance is very unfeeling, and is determined not to open the future science and technology city.

So that outside the future science and technology city, there are people everywhere, three circles inside and three circles outside, densely packed, like a locust outbreak...

In the Science and Technology City, many people are holding red wine glasses and watching all this indifferently!

The other major forces of the Galaxy Guard Alliance, at this moment, all hid in the territory of the Eagle Nation.

The most shocking scene appeared!

There are devices on the border of the Eagle Nation!

It was the device used to get rid of the laboratory of the gods!

Pieces of devices rose from the ground, covering the entire Warhawk Nation!

Then the device started...

All devices started to work with each other.

There seems to be no change.

In fact, there is a force field covering the entire area.

It is equivalent to adding an invisible protective cover out of thin air.

Covered tightly from the inside to the outside.

Until this moment.

Many people understand.

It turns out that the Galaxy Guardian Alliance is also taking defensive measures.

Originally, they thought that the Galaxy Guardian Alliance was unprepared and unprepared.

After all, there is no large-scale personnel transfer.

Especially compared with Daxia's side, the gap is too big.

There is almost no action at all.

Therefore, many spectators think that the Galaxy Guardian Alliance has no actions.

As a result, they were preparing very early.

Now, so many devices are taken out at once.

Protect the entire Warhawk Nation!

shocked!

The spectators are completely dumbfounded!

Now it is too late to enter the Warhawk Nation!

It's too late to talk about following things!

However, many people still came, but they were crushed by invisible power and died from a distance.

It turned out that this special device of the War Eagle Nation actually had external forces aimed at the outside.

Anyone who gets close to the range will be strangled!

It turned out that this device was already defending from a long distance.

It is equivalent to a double guarantee on the War Eagle Nation!

In the future, the country of science and technology can still be approached.

Now the area around the Eagle Nation has become a life restricted zone.

Anyone who gets close will have to die!
