

## The Return of the God of War [The Protector] Chapter 2998

Such earth-shaking changes have taken place in the world these days.

The Guardian of the Galaxy Alliance is in sight.

Especially they saw beams of light from the transparent dome.

Everyone is curious.

Even the high level of the Eagle Nation is no exception.

The world has changed a lot.

However, they dared not open the device's shield, for fear that it would still be dangerous.

"The energy outside is still exploding! Our instrument is in a malfunctioning state! It can't be detected at all!"

"But it seems that the energy is getting weaker!"

...

The various ministries of the Warhawk Nation are still observing the situation outside.

Not letting go of a single detail.

They looked more closely at the outside than the space station.

Especially when you look outside at the desert border, it's a big change.

The desert has become an oasis!

The environment is beautiful to the extreme!

Even the mainland of Warhawk Nation does not have such a good environment.

All of them were dumbfounded.

It's still desert here.

Is there an oasis over there?

This has changed too much before and after, right?

It makes people feel unrealistic!

"The energy in this super spiritual vein is too strong? You can transform the desert into an oasis casually? You can't create such an oasis without spending a lot of money?"

"You said, did we miss something?"

Some people began to doubt.

The defense before, actually blocked the great opportunity.

“Would you like to open it and take a look outside?”

Someone even suggested.

“No! In case of danger, trouble!”

“And this device is one piece! In order to withstand the energy storm, the whole device is one piece! There is no regional problem! Opening a corner means that all the devices covering the War Eagle Nation have failed!”

...

In the end, this idea was rejected.

“And look! Although the world has undergone earth-shaking changes outside! Is there anyone? Are there animals? There are none? It means that the outside is still dangerous!”

Someone raised a terrible question.

indeed.

Although everyone has witnessed a series of changes outside.

Especially the changes in vegetation.

But people and animals have never been seen before.

And look quiet outside.

It's weird.

As a result, everyone is even more afraid to go out.

Can only continue to wait.

As for the details, they still need to wait and see!

The brain of God was also dumbfounded by the changes outside.

Judging from the vision of the Gods Laboratory, this is destroying the world!

How can there be a transformation? ? ?

why is that?

Can't figure it out!

Is the world a blessing in disguise?

the other side.

In Daxia Security Island, the concept of recovery time was finally restored.

But for the changes that have taken place in the outside world.

They still don't know anything.

After all, the islands are all sealed.

"Let's wait! Wait ten days to see!"

Daxia chose to continue to wait.

Time passed slowly.

The beam of light in the sky gradually weakened and darkened.

The world's energy has weakened slightly, but it has been lingering.

But all the abnormalities gradually disappeared.

In the blink of an eye.
