

I'm A Quadrillionaire Chapter 1099

Chapter 1099 David could not believe his eyes when he looked at the prices given by the system panel!

'How many zeros are there?'

He counted carefully. 'One, ten, hundred, thousand, ten thousand...

Eight t-trillion?'

David stared dumbfounded at the data given by the system. A total of eight trillion Galaxy Dollars! Once the deal was done, he would get 80 thousand lavish points! Not only could he break through partial Infinity Rank, but he could also even go a step further and raise his body and mind power to Infinity level 10. With the infinity level double limit, David's combat power would surpass peak Infinity Rank and reach another level.

As for what that level was, David still had no idea.

It was definitely the highest power in the Milky Way. After all, the giants of the Milky Way were only at Infinity Rank. At that time, who would dare to target Earth? He could destroy families like the Tuffin or Callisto families at will.

David stared at the system. His eyes lit up, and his whole body trembled with excitement.

Meanwhile, Oren Underwood, the middle-aged man sitting opposite him, was a little confused when he saw how excited David was.

He could not see David's system.

Therefore, he could only see David staring at him with inexplicable excitement. At that moment, David looked as if he wanted to eat Oren.

Oren was shocked. 'Is Master David interested in me?'

'Impossible! Impossible!'

Oren shook his head in his heart. 'Master David has Dance Fairy, one of the four fairies, following him around. Princess Astrid also likes him, so how could he be that kind of person?'

'However, what's with that look in his eyes?'

'If Master David doesn't fancy men, why is he looking at me like he wants to eat me?

'If I am right, won't Dance Fairy and Princess Astrid be too pitiful?

'Two of the four fairies in the Milky Way fell for a man who doesn't like women.

"How ironic.

'Who knows how many men in the Milky Way are going crazy for the four fairies? And two of them fell for a man like this.

'If word got out, this would be the biggest news in the Milky Way. It is enough to make so many people dumbfounded.

But, if so, why would Master David like me?

'Is it because of my sexy stubble?' 2. When Oren thought about this, he touched the stubble that had just grown back after he shaved a few days ago. Even though it felt prickly, it was indeed pretty sexy. He recalled being called the lady killer when he was young. So many young women fell for him. However, he did not bother to look at them. He thought these women were too shallow. Unfortunately, he suffered a reversal of fortune and was forced to make a living by becoming a bounty hunter.

The ladies he loved all left him.

When he thought about this, he felt a pain in his heart.

He did not think that he would become a man killer now that he was older.

'Pah! What was I thinking? 'Even if it's Master David, I will not accept, and I will not compromise. 'You can kill me, but you can't humiliate me. I, Oren Underwood, am a normal man.' David was still feeling excited as he stared at the number on the screen. He had no idea what Oren was thinking. If not, he would have slapped Oren across the face. Aside from the number, David also noticed some words under the system.

It was the introduction to that precious item.

(This is a Nine Turning Star Iron, and it's not easy to produce it. After certain-sized stars collide, a new planet will form after extreme high-temperature tempering. Then, it will wait for the next collision and extreme high-temperature tempering to continue forming new planets. After repeating the same process nine times, the iron will be formed. It won't succeed with even one step missing. It could be described as a precious item after multiple catastrophes. It's also one of the precious treasures in the universe. [The Nine Turning Star Iron is very useful, and it has a lot of uses. It can be melted into any metal. If it's added to any attack-type weapons, defense weapons, or flying vessels, the item will be upgraded by a few levels. They will all get upgraded more

than ten folds. (At the same time, the Nine Turning Star Iron is also the main ingredient for the Evil Splitting Sword. If it's used to make an Evil-Splitting Sword, combined with a top combat skill

like Evil-Splitting Sword Technique, it will not only conquer every obstacle, but it will also be able to slash through anything in the world, it can even stop all evils and become the nemesis to all evil. (This Nine Turning Star Iron is the perfect size for a standard Evil-Splitting Sword. If the host is ready to make it, the system can be of assistance. If not, a level 3 civilization can't smelt and successfully make it.) That was the end of the description.

I'm A Quadrillionaire Chapter 1100

Chapter 1100 The light in David's eyes became brighter.

The corners of his lips were slightly upturned, and he displayed an understanding smile.

If no one else was in the room, he would have thrown his head back and laughed.

This thing was the legendary Nine Turning Star Iron. When David was dealing with the Meteor Chamber, they asked for Nine Turning Star Iron. Moreover, they said they could do anything for David if he could give them the Nine Turning Star Iron.

From this, one could tell that the Nine Turning Star Iron was extremely rare.

David did not think he would get a Nine Turning Star Iron randomly. He was so surprised.

If he turned this Nine Turning Star Iron into an Evil-Splitting Sword as the system said, he could slash through everything in the world and ward off evil in combination with the Evil Splitting Sword Technique he just learned. 2

'Wow, slash through everything.

'Which means there's nothing in the universe I can't slash after I have the sword.

'How bad*ss!

If others said this, David might think they were lying.

However, David would believe anything the system said unconditionally.

After all, it gave David too many surprises.

Oren saw David's smile, and he shuddered.

Oren wanted to slap himself.

'Master David said he doesn't want it anymore, but I insisted on sending this to him.

'Great, I've walked right into his trap.'

If Oren did not hear from other bounty hunters that David would pay according to the item's value as compensation and his money was not tight, he would not have offered David this stupid rock

More than a year ago, his bounty hunter group had a near-death experience on an unknown planet.

Less than ten people survived among the team of more than a hundred people. This was a huge loss.

This impacted them heavily, and they did not dare to go on adventures anymore.

Moreover, they lost so many people, and in the end, they only brought back this stupid hard rock

They thought this might be some precious ore, and they could sell it so that they could send the money to family members of their dead teammates.

At least, they thought it could relieve the burden of the ones with children and raise their dead teammates' children.

In the end, no one knew what this was even after they brought it for multiple appraisals. Only one person was willing to buy it for research. However, Oren refused to sell because the price was too low. After all, he got this in exchange for lives of a nearly a hundred of his teammates.

The price the buyer named was barely enough to be shared among the widows. Let alone allow them to live without worries. It was not even enough to buy some proper clothes for the families. In the end, Oren kept the rock. He would still have hope if he kept it. Once he sold it at a low price, all his hopes would be crushed. Besides, Oren figured this would be worth more since he took it from such a dangerous place. It must be because that person was not knowledgeable enough. However, a child of one of his teammates fell severely ill recently.

Even if it was not terminal, the child needed a lot of money for treatment.

Plus, they had not gone on any missions or adventures in the past year.

How would they get the money?

Therefore, when they heard David would pay according to the item's value as compensation, Oren came with the rock. He hoped David was knowledgeable enough to give him an acceptable price so that he could settle his dead teammates' widows and soothe this sore spot of his. If not, he would not be at ease for his entire life.

After all, David had a relationship with Princess Astrid, and he might become the princess' husband in the future.

However, Oren did not think that David was someone like this!

I'm A Quadrillionaire Chapter 1101

Chapter 1101 Of course, David was more than happy to let the system turn the Nine Turning Star Iron into an Evil-Splitting Sword.

However, this was not the time.

He should only decide after he bought the iron.

After comparing the Nine Turning Star Iron and lavish points, David felt that lavish points were more important.

Even if the Nine Turning Star Iron was precious, it was just an item.

He could use lavish points to upgrade his strength.

Between the two, David would not hesitate to choose the latter.

After he turned the system off, David looked at the middle-aged man in front of him and asked, "Sir, may I know what your name is? Where did you get this Nine... I mean, rock?" 1

David's words also brought Oren back to his senses.

"Master David, my name is Oren Underwood. You don't have to call me Sir, just call me Oren. When my bounty hunter group went exploring, we found this rock on a foreign planet. That planet was very dangerous. We lost 90% of our teammates all to bring this rock back," Oren said in a low voice.

That trip would be his sore spot forever.

His brothers, whom he would eat and drink together, had all died there.

Whenever he looked at that stupid rock, Oren would remember his dead brothers.

He wanted to throw it away many times but was reluctant to. This stupid rock was the only chance to compensate his dead brothers' families. 1

"I'm sorry I reminded you of your sad memories. Can you still find this planet? If you can, I hope you can take me there. I can compensate you," David asked.

The Nine Turning Star Iron was a very precious item in the universe, so of course, it would be better to have more of them.

If David could find the source, he wanted to go there and look for more.

If there were no living creatures on the planet, he would not mind smashing the planet to see if there were more Nine Turning Star Irons.

"I'm sorry, Master David. I'm afraid we can't find it anymore. That's an area that's never been explored, and when we were there, that planet was constantly moving very fast. Now that a year has passed, I don't know where it has moved to," Oren answered. "I see. Do you know what this is? Have you shown it to others before? Did no one else name you a price for it?" David continued asking.

David was not disappointed that he could not identify the source. It was enough to turn this iron into an Evil-Splitting Sword.

To David, the more important thing was the amount of lavish points he could get this time.

"I have no idea. I showed this to a lot of people, but they had no idea what it was. I think it's a rare ore. After all, it's very hard. I tried a lot of techniques, but I still can't damage it. Some people wanted to buy it for research, but their price was too low, so I didn't sell them. Master David, do you know what this is? Can you tell me? After all, more than a hundred of my teammates died for this stupid rock. I need to at least ensure my brothers die without any worries."

Oren asked expectantly after hearing David's answer. When David heard that, he thought to himself, 'Indeed. No one knows what this is.' As for Oren saying he could not damage it no matter what he did, that was obvious. The system said no one in this level 3 civilization could melt this Nine Turning Star Iron, let alone David

3

This was a very precious treasure. Oren was just a bounty ranker at partial Cosmos Rank, so of course, he could not damage the Nine Turning Star Iron.

“Oren, to be honest, I do know what this is. However, you can’t take it back even after I tell you. I promise I will pay enough to compensate you. What do you think?”

I’m A Quadrillionaire Chapter 1102

Chapter 1102 “Of course, Master David! Since I brought it here, I don’t plan on bringing it back,” Oren answered quickly.

“Very good! Haha! Oren, you’re my friend now. From now on, you can come and find me if you need anything or encounter any problems. You don’t have to be polite to me. As long as you’re in the right, I promise you, no one in the entire Milky Way will dare to bully you,” David said as he guffawed.

He was thrilled.

This time, not only could he get something as precious as the Nine Turning Star Iron, he could even spend eight trillion and earn eighty thousand lavish points. He could immediately upgrade his combat power to break the glass ceiling of the Milky Way.

He was killing two birds with one stone. “Thank you, Master David,” Oren put his hands together and said.

At this moment, he was not too excited.

After all, he still thought David liked men and was just saying that to get close to Oren in the future.

Oren did not want to give David this chance.

He had decided.

After this deal, he would never come back to see David anymore.

Oren still had no idea what David’s promise meant.

Once this deal was done, David would spend eight trillion and get eighty thousand lavish points. Then, he would upgrade his strength to partial Eternal Realm.

That would be the top combat power in the Milky Way, and David would be on the same level as Emperor Nimbus.

Without exaggeration, anyone with a promise from someone with the same combat power as the emperor could do anything they wanted in the Milky Way.

At least, no one would dare to openly bully him.

Even Emperor Nimbus would not dare to do this without careful consideration.

David would be even more powerful than the royal family of the Milky Way Empire.

Right now, Oren was still thinking about never seeing David again.

Of course, he had no idea of the truth.

If not, even a fool would not think that way.

“You don’t have to thank me. You’re too polite, Oren. I should be the one thanking you. You have helped me solve a huge problem. You’re my savior,” David looked at Oren and said courteously, his eyes full of smiles. Oren could not stand David’s gaze. So, he quickly changed the topic and asked, “Master David,

what is this stupid rock?”

“This stupid rock is called the Nine Turning Star Iron,” David answered. “Nine Turning Star Iron? What’s that? What uses does it have?”

“Hmm, how should I say this? To put it simply, it’s a very precious metal. There are a lot of uses for it. You can increase the attack and defense for your weapon if you incorporate the iron into it.”

“That’s all?”

Oren was wondering how powerful it was.

At the end of the day, it was just a supplementary tool.

Oren could not understand how precious the Nine Turning Star Iron was.

His knowledge and experience showed how ignorant he was. However, this was normal.

After all, not many people in the Milky Way knew what it was. David would also think it was just a piece of stupid hard rock if not for the system.
