

Right Person 512

Chapter 512 Cured

The next day, before Nicole set out for the research center, Colton brought good news that the Gardners' medical team had already developed the antidote, and Hayden would recover as soon as it was injected.

Nicole didn't quite believe it and was even a little doubtful, but after Colton guaranteed that there were no side effects to this medicine, she finally agreed to it reluctantly.

However, the syringe only contained common glucose. After all, Hayden was very healthy, and he wasn't ill at all.

Colton was forced to play along with Hayden for the sake of their bond.

The Gardners' medical team arrived at the Gardner Residence, all completely prepared. Colton had asked them beforehand to come up with a convincing lie and claim that they had developed the antidote.

Anna was worried that it might trouble Hayden later, so she kept asking them about the side effects and whatnot.

After the medical team assured her, Anna finally agreed to let them give Hayden the injection.

went in and gave Hayden the

medical team had already emerged. Hayden was lying on the bed peacefully as if in a deep sleep. Nicole checked on Hayden and finally let out a sigh
