The conference began when Colton arrived. Aside from him and Nicole, people from the research center were also present. Then, all of them looked at the man.

After some time, the man said in a low voice, "The vaccine isn't the cause of my sister's death." Although it was raining, his words could still be heard.

When the reporters heard the man's words, they were curious. He caused a stir at the vaccine conference, yet he's explaining it now. Is the truth about to be revealed? they thought.
