

Rise 144

Chapter 144

One day after another passed. Soon, Paige had started working in Junlin Group for a week. During this period of time, she also had a preliminary understanding of the entire Junlin Group. However, as she became more and more familiar with the company, she was more and more amazed. Because the incomparably large Junlin Group was like a moving giant ship that was moving forward at a high speed every day.

For example, Junlin Group had new business opportunities almost every day. The executives of Junlin Group were extremely busy every day. The mission of the company was not to surpass other Usmit companies in certain aspects, instead they wanted to strive in all directions and become the best of all in the entire Usmit City.

For example, the Chaoge technology by Leng Yijun and Yin Chaoge could only focus on the chips, Paige used to think that with the presence of the female genius Yin Chaoge, Chaoge Technology would be the best in Usmit City. But after she joined the company, she found that she was extremely wrong. The project had already been on board since five years ago. Moreover, the company had been carrying out extensive research and development for the past five years. Of course, it was previously an abroad project. But now, with the return of the legendary founder of the Junlin Group, this project had been transferred back to Usmit!

What made Paige extremely shocked was that she thought Chaoge Technology became successful was due to the return of the female genius, Yin Chaoge. However, the Junlin Group's AI system as well as the chip technology was the key of attractive various top talents from all over the world. Paige couldn't imagine how the Junlin Group did it, because the talent that the Junlin Group had attracted from foreign countries was comparable to that of Yin Chaoge. So Paige was shocked. What was more, there was still a fact that Paige actually overlooked, all the news she had heard by accident was actually deliberately leaked to her by Bethany.

After Bethany met Paige that day, she also understood that Paige was here to take over the Junlin Group.

In the past two weeks, Paige had thought that she was coming over for an internship, but it wasn't. Almost all of the top ten vice directors of Junlin Group were having meetings every day. They were making the most meticulous plans for Paige's growth in the company, they were trying hard to present all projects to Paige within the following two weeks, in order to prepare her for the taking over process.

Therefore, Paige was actually living a shocking life after joining the company. She had no time to rest even on weekeneds, because the company seemed to not have the idea of having days off. All the employees could get some rest at anytime if they liked to, and if they did not want to rest, they could go to the company to work overtime, and they would be paid triple during their overtime! Moreover, the Junlin Group would cover all expenses in terms of food, housing, and transportation for all their employees. As long as the employees came to work, the idea of the founder of the Junlin Group was that all employees would not need to worry about anything else except for work. The company would provide maximum support for their employees to solve their personal issues if there were any.

As a result, Paige was even more shocked. Junlin Group was far superior than Chaoge Technology in terms of technology. Corporation wise, it was also far better than Usmit Corporation of the Shangguan family. After all, she had worked in Usmit Industries for a period of time, so she knew the second largest corporation in Usmit City very well. However, after she joined Junlin Group as an employee, only she felt the huge gap between them. It could be said that if it was not for the fact that Junlin Group deliberately left a certain market share for the Shangguan family and the Yin family, the two companies would have died a long time ago. Well, the truth was indeed brutal.

“Junlin Group is indeed the top corporation in Usmit City! It is worthy of being one of the top dozens of big companies in the world!”

After a week at work, Paige was extremely confident with this statement.

It was true. She had never imagined that the week of her working in Junlin Group would cause her such a great shock. As she got in touch with more and more people, she felt more and more the ambition and confidence of Junlin Group. She also felt more and more the ambition and confidence of the founder of the company. Although he had disappeared for five years, before he disappeared, he had left a magnificent plan for the development of Junlin Group. The remaining executives only needed to execute the plan accordingly. They would not be confused when there was clear directions on what to do.

And now, Paige knew that the legend had taken back the Junlin Group after five years. Two months ago, the Junlin Group had begun a comprehensive integration, and had gained the support of the mysterious but extremely powerful corporation overseas. Therefore, the present Junlin Group had once again soared to the top. Today's Junlin Group was advancing crazily every day. Its business went straight up, and the price of its stock was even higher. And it's estimated that its share value had doubled again.

Therefore, in the current Junlin Group, a company was equivalent to the total value of the second to tenth most powerful companies in Usmit City, or even double the total value. It was not difficult to imagine how powerful the current Junlin Group was in order to welcome their master that was once a legend.

Similarly, her one week working experience has also greatly widened her vision. In Junlin Group, every day, there were top talents from all over the country or even the world that would be present at the company for various meetings. The company had undergone complete globalization and she could see some elites from the Outer Region walking around at any time. These were the top talents serving the Junlin Group.

It was true. It was too powerful. The founder of Junlin Group was indeed a real legend. Maybe only such a legend could build such a powerful company. The founder was also surnamed Ye, just like Joseph. He would be seen next week. Well, then maybe Joseph could come and see the founder of Junlin Group. Maybe they could become good friends. After all, they were all legends.

On Friday, Paige stood at the foot of Junlin Group. Looking at the towering Junlin Group in front of her, she sighed with emotion.

As for whether the founder of Junlin Group was Joseph, this Paige had never thought about it. No matter how powerful her husband was, he couldn't be so strong in all aspects, could he?

Moreover, as she became more and more familiar with Junlin Group, she also knew one thing, that was, the legendary founder of Junlin Group could be as important as a Divine King level commander of Frogua. He was the top genius of Frogua, and even the company was spreading rumors that the founder of Junlin Group would probably become the richest person in Frogua next year! Yes, the richest person! After all, the Junlin Group was now qualified to be the first in all the companies in Frogua! It was also a real leading enterprise in terms of information technology.

Even the security department of the Junlin Group consists of several five-star experts. There were also many Semi God of War levels that had been recruited from the Outer Region. Wang Tianhai's Usmait military also had a special subway route that could reach the Junlin Group in no seconds in order to protect the safety of the company. It was true that the Usmait military had moved to the edge of the Junlin Group in recent years.

Therefore, even if Wang Tianhai knew that there was a big problem with Fu Junlin, he had to protect him! At that time, not only Wang Tianhai, but also Lu Tianxun and Si Tianzheng had to protect Junlin Group. Junlin Group was a big tree in all walks of life in Usmait City. It could not bear to fall. If it really fell, all walks of life would suffer.

Therefore, from a certain point of view, the founder of Junlin Group was currently ranked in the top five on the list of the richest people in the Frogua. In the future, he would most probably be the richest person in the Frogua. By then, his identity was really comparable to that of a Divine King.

Paige suddenly became very excited. She was thinking about what would happen when the founder of Junlin Group met her husband. They were almost the same age, but everyone had made great achievements in their own fields. No matter how hard normal people tried, one would never be able to surpass or make comparable achievements as them both. What would happen when the both of them meet?

And she felt that her husband was very good, but he was too lonely. He had brothers, but he had almost no friends of the same level as him.

"Paige, what are you thinking about? You've been staring at the Junlin Group's building for ten minutes." At this time, Bethany, who was next to Paige, asked her.

Paige elegantly smiled and said, "Bethany, who do you think is stronger between our Joseph and the founder of Junlin Group?"

Do you think they can become friends?

Hearing her words, Bethany suddenly felt bad. She stared at her with her round eyes and asked, "Paige, are you serious?"

She looked at Bethany in confusion and asked, "What do you mean by am I being serious?"

The corner of Bethany's mouth twitched again and she asked, "Tell me, you are comparing your husband with the President of Junlin Group. Are you serious?"

Paige nodded her head seriously and said, "Yes, yes, I've also gotten a brief understanding these few days. Also, didn't you say that the legendary founder of Junlin Group is also comparable to a Divine King

commander? My husband is the same, so who do you think will be stronger? How great would it be if they became friends?

“But, I still have something to do. You can think about it by yourself. I can’t help you with this. I’ll go first.” Bethany doesn’t want to stay with Paige anymore. What was she supposed to say? Wasn’t it heart wrenching? “Sister, I know that your husband is very excellent and outstanding. But you don’t have to be so heart-wrenching, do you?”

“So that they can become friends? To compare them both? How can you compare? How am I supposed to make that comparison? The founder of Junlin Group also disappeared for five years, and then returned two months ago! Don’t forget that on the night of the incident in Junlin Group two months ago, your husband was in Usmit City? Why didn’t you think that they were the same person?”

Bethany cursed in her heart, but at the same time, she was stunned when she thought about it. If she didn’t know in advance that there was something wrong with Joseph, if she hadn’t suddenly seen her father Logan, Dennis, and Ernie at the entrance of the Junlin Group on the news, would she doubt it? After all, the founder of the Junlin Group was also a real legend. He was less than 30 years old, but he was about to become the richest man in Frogua. Would she suspect that the founder of the Junlin Group was the same person as Joseph?

Bethany was stunned for a while, because if she put aside those assumptions, she really wouldn’t doubt it.

She would not doubt that these two people were actually the same person.

“Hehe, Paige, yes, I’m looking forward to it. Tell your husband to let him meet the founder of Junlin Group. I would really love to see what would happen. Hey, you silly girl, did you save the Milky Way in your last life?”

“If not, how could you find such a powerful husband in this life?” Bethany, who had gone far away, suddenly turned back and looked at the Paige behind her. Looking at the Paige who was still in a daze, she couldn’t help smiling.
