

She is a ceo Chapter 247

Not that Spencer didn't want to chase, but...

Not long after Lucia and Eduard left, the door behind Spencer opened. Jacob stuck his head out, looked around and asked Spencer,

"Spencer, who was talking just now?"

"The waiter went to the wrong room. I told her a few words," Spencer turned around, lied casually, and went back to the room with Jacob, saying as they walked,

"Let's keep drinking."

Jacob had no doubts about him, and certainly didn't expect that the person who appeared here just now would be Lucia.

Pulled forward by Lucia forcibly, Eduard finally can hardly retain his composure. He stopped and restrained Lucia's pace and asked,

"Lucia, what did Spencer mean?"

Something was wrong. Eduard's gut told him.

Lucia stood there and stared blankly for a long time with her eyes lowered. When she raised her head again, there seemed to be a flash of clarity in her eyes, but it quickly disappeared. She replied lightly,

"It means nothing. Let's go back."

After speaking, she broke away from Eduard and walked towards the door. Eduard chased her and asked, "Do Spencer's words mean nothing, or staying here means nothing? Lucia, make it clear."

Unfortunately, all the way back to Jardín de Nieve, Lucia did not give Eduard an answer. Downstairs, Eduard repeatedly confirmed that Lucia could go upstairs herself before saying goodbye to her, and waited downstairs to see her apartment lights on before letting the driver drive away. The doubts became more and more serious.

What exactly happened between Lucia and Spencer?

Back home, the room was silent. Lucia didn't turn on the light, but walked to the sofa and sat down following her memory.

The rest of his life?

Ridiculous!

At 9 o'clock in the morning the next day, Arthur received a news from the forensic laboratory just after breakfast. They got the result of the paternity test. They asked them to check the results in person. Arthur thanked them politely and immediately informed Juliana who was stunned and looked at Arthur in a daze.

"Julia," Arthur covered Juliana's arm and pressed it lightly, as if to transmit his power to her, "They got the result. For the sake of your parents and the baby, be brave."

Juliana took a deep breath after listening to Arthur's words, and nodded.

Arthur was right. This road must always be walked by her!

Without any hesitation, Juliana personally went to invite her parents downstairs. Arthur informed Sophie. In order to avoid affecting the baby's rest and Juliana's mood, the baby was temporarily taken care of by Peter, and the five people went to the judicial laboratory together.

At 10 o'clock, they appeared at the entrance of the judicial laboratory, and the person in charge came out to receive them and brought them to his office.

In the office, the atmosphere was solemn. The person in charge solemnly informed Arthur and the others of the test result. The baby did not match his genes, and the baby's biological father was someone else!

Although Kayla and Robert knew this result, they were still shocked when they heard it in person. Sophie couldn't tell what it was like in her heart. On the other hand, Juliana was much calmer, because she knew that the child was not Arthur's. What she cared about now was who the biological father of the child was !

"Mr. Stevens, has the baby's biological father been found?" Juliana asked calmly amid the shocked eyes of her parents.

Kayla and Robert were shocked. Julia didn't know who the biological father of the child was?!

What happened to their daughter? !

Kayla's feet were numb at the thought, and if Robert and Sophie hadn't held her up, she'd be slumped on the ground.

"I compared the city's gene bank this morning and found a person who match the child's gene." The person in charge replied after Juliana asked the question.

“Who is it?!” Juliana said sharply, pointing to the truth.

“It’s a man named Kane Fletcher. His gene is 99.8 percent similar to the child’s, and can be confirmed as the biological father of the child from a biological point of view.” The person in charge told Juliana the result.

As soon as the person in charge said Kane’s name, the air in the room seemed to be frozen. And it was deadly silent.

Arthur had an amazing memory, and as soon as he heard Kane’s name, he remembered that this was Poppy’s personal lawyer that Lucia had mentioned? The last time when she mentioned this person to him, she was reminding him that Juliana had a relationship with Kane. At that time, he blindly denied and thought she must be wrong. Could it be that Julia had something to do with Kane?

Arthur thought of this and turned to look at Juliana, and the look on Juliana’s face now was giving him the answer.

How can it be?

Juliana’s face was pale, and she repeated “how can it be?” in her mind.

How could it be Kane?! Impossible, the people who raped her were obviously those hooligans. How could it be Kane? He was also knocked unconscious at the time. Could it be the time when they had a sex? But she was pregnant by then...

One by one, Juliana asked and answered her own questions, but no one could explain why the baby’s biological father was him!

Juliana, who was ready to face reality and find the rapist, was beaten by reality and was powerless to fight back.

No, there must be something wrong!

“Mr. Stevens, do you know who this Kane is? Where does he live and what is his occupation?” Juliana quickly asked the questions after being surprised. At this moment, she would rather this Kane than her own Kane.

The person in charge frowned in embarrassment. It was his promise to Arthur outside of work to help trace the gene bank, but it would be against professional ethics to reveal the information of the gene owner.

Arthur saw that he was in dilemma, and immediately came forward and said,

“Mr. Stevens, please be sure to tell us. The child can’t find his biological father now, and we also feel it very awkward. Please help us. I will never leak this. It is on top of my promise last night. I promise to buy another set of the latest equipment for your studio, and an additional donation of 20 million dollar.”

Money may not be omnipotent, but at critical moments, it did show infinite power.

The person in charge was tempted. Their laboratory had always been short of funds. With Arthur’s donation, they could indeed do a lot of research. After thinking for a long time, the person in charge revealed the information after Kayla and Robert’s pleas.

“Kane’s gene collection came from the public welfare activities of a law firm in the city. That’s all I can say.”

The person in charge didn’t reveal much, but for those who knew Kane well, that was enough.

The answer was right in front of them. It was really Kane!
