

Still Loving You Nonetheless Chapter 1477

"I didn't. I never did that, okay?"

"If you never did that, why would Cooper know about it?"

"Didn't you say it yourself?" Cooper's really smart, and he guessed it himself.

"How could he figure it out if he had no clue? why didn't he guess it was Josiah?"

Ivy could not argue back, so she remained quiet. As for Liam, it was his first time winning an argument against a woman, but he did not feel ashamed at all. Instead, he was very happy.

Knowing that Ivy liked him even better than knowing that he had made hundreds of millions!

"Siena, let's ignore him and continue eating fruits," Ivy said to Siena.

Siena smiled and replied, "Why are you angry, Aunt V? I can tell Uncle Liam also likes you very much."

me?" Liam asked

Ivy thought about it and pointed to a guest bedroom on the second floor, saying, "You can sleep in that room. No one has ever lived in this room."

"You're letting me sleep in the guest room?"

"I also slept in the guest room." Ivy pointed to another guest room and added, "I lived in this guest room before."

This was the Shelby family's property, and Mrs. Shelby used to live downstairs. Although she stayed on the second floor for more than ten years, she never considered occupying the master bedroom.

Liam was implying that they should sleep together, but with Siena here, he still held back. Nevermind...he might as well just think about it when they returned to Jehovah City.

Ivy found Cooper's clothes for Siena and took her to the shower.

At night, the two were lying on the bed like mother and daughter. Finally, Siena turned around and hugged Ivy, saying, "Aunt V, I like to sleep with you the most."

When Mrs. Shelby was around, she did not agree with Siena staying over. Hence, Siena had never slept with Ivy before, and she was very happy to be able to sleep with Ivy this time.

"I also like to sleep with Siena." Ivy hugged Siena and stroked her soft hair, feeling extremely happy. It was like the little girl in her arms was her long-lost daughter.
