

Super Son-In-Law Chapter 271 -

Alex had not found anything unusual, but he knew that it was groundless and that Big Ken would not make such a joke.

He knew what the storm was without even asking Big Ken.

Although Alex had many enemies, they had dealt with a lot of them. Among the remaining enemies, the one who could attract the attention of Big Ken must be a great threat. There was only one, which was Jing Kun. When he was chatting with Xiao Hang, he had already analyzed this question.

At this moment, Alex was curious. This was the first time that he had seen his Big Ken look so serious. He couldn't help but be curious and asked, "Brother Big Ken, did you find something serious? Otherwise, even if Jing Kun really came here in person, you wouldn't be so nervous, would you?"

Big Ken ponders for a while then shakes his head and says: "I hope my guess is wrong. But if it's true, then the problem will be serious."

"No... Brother Big Ken, the more you say about it, the more curious I am..."

While they were talking, Wendy, who had finished chatting with Bai Fan and Bai Ling, also got in the car. She pointed to the door of the hotel and said seriously, "Young Master, Big Ken, I just saw two suspicious people at the door. Although they disguised themselves well, I still saw something strange..."

Alex's curiosity was aroused again, and he became more anxious. "What's going on?"

Big Ken started the car and said while driving, "Young Master, I remember telling you before that someone has developed a drug that can make people's physical quality break through the limit. The two super fighters under Tang Qingsong should be the beneficiaries to making medicine."

"Oh? Brother Big Ken, Sister Wendy, did you see such a master just now?"

"An expert is definitely an expert, but there's a certain difference between them and those two super fighters. Young master, you probably don't know that there's another way to make a person's combat strength break through the limit, apart from using special drugs to stimulate the potential of the body, right?"

"What method?"

After a meal of relief, plus what he said now was very important, the embarrassment of Big Ken had almost been resolved. Through the rearview mirror, he looked at Wendy,

who was sitting in the back row, and said, "Wendy, you should know more about this than I do. Why don't you introduce it to the young master?"

"Sure..."

Wendy nodded. She frowned slightly and thought for a moment, and then slowly said, "Young master, in this world, apart from ordinary people, there are actually other different species that exist, only, most people don't know about them. For example, the one who uses drugs to stimulate the potential of his body is one of the different species. This type of person is equivalent to an abnormal evolution based on the current human genes, which is why it is called an evolution. Almost all of the evolutions are super experts. Meanwhile, apart from an evolution, there is another type of abnormal individual with exceptional combat strength, called a mutated one..."

"What? A... mutant? No way!"

When Alex heard this, he subconsciously thought of two series of science fiction movies, biological danger and vampires! When he thought that there might really be a mutant like Werewolves in the real world, his arms were instantly full of goosebumps.

It should be known that the mutant in the movie was a killing machine for ordinary people!

Ordinary people had no power to fight against mutant fighters. They could only wait for death!

"It's not true, it's not true..."

The more Alex thought about it, the more nervous he became. He quickly hinted to himself to calm himself down.

However, Wendy nodded again, and then continued, "When I heard this type of saying back then, I was also a bit skeptical, acting even more exaggerated than you. However, later on, I learned that it wasn't a scare, nor was it a movie script, but rather a fact! Young master, you seem to be able to accept the existence of an evolution, so you should also be able to understand the mutants..."

"Why do you say that?"

"It is because mutation and evolution are the same, and they are also produced by medicine. Of course, calling the thing that produces mutation a medicine is a bit more suitable. Apart from this, there is also a great difference between the two. Even though evolution is beyond the category of ordinary people, in essence, they are still humans, only, their potential is a bit greater than ordinary people's. Meanwhile, under the effects of special medications, mutated people change from genes, no longer pure humans. All mutated individuals have a few animal attributes."

“Hiss... Sister Wendy, don't tell me that the Werewolves in the movie have come to the real world!”

“It can be said that the mutant with the attributes of wolves does exist. However, the appearance of the Werewolves in the movie, which can help people and wolves communicate with each other, is the artistic processing process of the science fiction movie. There is no scientific basis. To put it bluntly, it is made up of nonsense. In reality, the Werewolves maintain the appearance before they turn into Werewolves, but there will be some slight changes. The variation requires the inside of the body, which belongs to the category of genes and can't be seen directly...”

When Wendy talked about this, it was as ordinary as family affairs.

However, when Alex heard this, he was stupefied, feeling like his brain wasn't enough. There was nothing he could do, regardless of whether it was an evolution or a mutant, they were all far beyond what he originally knew. When he first heard of this type of thing, he was extremely shocked, as well as exceptionally shocked, always feeling like these were all illusions.

However, judging from the expressions of Big Ken and Wendy, they didn't seem to be making up a story.

Moreover, his vague and illusory intuition told him that these were all true!

As he thought about it, Alex's thoughts floated and he began to fantasize about the mutant's image and ability.

According to Wendy, a mutant would only use drugs to let people have the attributes of animals. He couldn't help but think about what kind of people with the characteristics of wolves' blood, leopard's speed, tiger's ferocity, gorilla's mobility, and so on would become.

Alex still didn't know what a mutant was like. The only thing he could think of was two words: monster!

Ordinary people did not have the halo unique to the protagonist of science fiction movies, nor did they have the golden finger to play the monster in fantasy novels. If they fought against the mutant, the consequences would be unimaginable.

Suddenly, Alex thought of a terrible thing. His heart and liver trembled violently and he quickly asked, “Brother Big Ken, you said that you saw an expert who was not an evolution at the entrance of the hotel. Could it be... could it be that you saw a mutant?”

Big Ken nodded and then shook his head. “To be exact, he is suspected to be a mutant. I'm not sure yet.”

“Who’s more powerful than that mutant and evolution?”

Wendy continued, “The mutants are similar to ordinary people, but there are also differences between strong and weak. Compared to the two at the same level... each has its own length and length. Based on the overall judgment, they should be evenly matched. The mutant’s combat strength is a bit higher, but because of the change in genes, his mind will decline to a certain extent. Generally speaking, his brain isn’t as good as ordinary people’s. Meanwhile, an evolution, even though it isn’t as berserk as a mutant, his mind won’t degenerate.”

“I see!”

Alex nodded thoughtfully. Suddenly, he thought of another question. “Sister Wendy, you don’t seem to be very old. How can you know so clearly about the evolution and variation? As an ordinary person, I’ve lived for more than 20 years. Today is the first time I’ve heard of it!”

“Because just like Big Ken, I am an evolution. And before I came here, my job was to deal with a mutant.”

“What?”

Alex was stunned.

Big Ken and Wendy were both evolutions. Alex could barely accept it, and he had already guessed it.

However, it was far beyond Alex’s expectation and imagination to let a woman like Wendy deal with a mutant.

Through further research and development, Alex learned more unimaginable stories...

As it turned out, due to the fact that evolutions and mutants were different from ordinary people, the National Security Agency had recruited and trained some evolutions in order to maintain a high standard. They had also built a secret group called the Special Operations Group, which was called the Special Operations Group. It was specifically used to deal with those who had extraordinary abilities but did bad things. Its main purpose was to deal with the mutant. Because the mutant’s mind had declined and his temperament had changed greatly, it was difficult to control. There was almost no possibility of obeying management and serving the country. Basically, they would be wiped out one by one.

Before Wendy came here, she was a member of the Special Operations Group...

Super Son-In-Law Chapter 272 -

When Alex understood this, he couldn't help but be respectful to Wendy.

Those who liked science fiction movies must have known about the movies of the super-hero series, and the members of the special industry like Wendy were the super-heros in reality. Unfortunately, the special organization was a secret organization, and the identities of all the members could not be revealed. Therefore, they were destined to be unknown heroes.

However, no one knew, but it did not mean that they could ignore their contributions to the country and society.

Once again, Alex got goosebumps. With heartfelt respect, he stared at Wendy with great interest and said excitedly, "Sister Wendy, I'm really proud of you and proud of my family for being a top talent like you and Brother Big Ken!"

Wendy waved his hand and said, "Young master, you're too serious. I'm ashamed to accept it! All the credit belongs to your family. Like the ordinary public, we are also beneficiaries. Because your family cultivated us and gave us the ability and platform to realize the value of life."

"No, no, your contribution can't be ignored or replaced. By the way, Sister Wendy, aren't you trained by our family? How did you join the Special Operations Group?"

"Because your family is the cradle for delivering members to the Special Operations Group. As far as I know, more than half of the evolutions that the Special Action Group has absorbed are cultivated by your family. The medicine used by the Special Action Group to train the evolutions on its own, as well as an exclusive purchase from your family. It is no exaggeration to say that if your family didn't make a series of great contributions, the Special Action Group wouldn't exist at all."

When Wendy mentioned the family where Alex was, not only her words, but also her eyes were full of respect.

Big Ken was the same. He nodded and added, "Young Master, you once asked me why your father could enjoy so many privileges. At that time, I just told you that it was because your father had made a major contribution to the country and did not make any contributions. Now you should already know that in addition to the pharmaceutical field, it was another contribution your family made to the country to send the Special Operations Group members and special drugs."

"I see!"

The question in Alex's heart was finally solved. It turned out that his family's privilege and all the connections were not out of thin air, but in exchange for one contribution after another. Normally, his family should be well-known in the country and should have a very high reputation, and even become the first big family in the country. In this way,

he could avoid a lot of trouble. Those who were a little smart would not find fault with him.

The problem was that his family could only hide in the dark, just like the special forces.

Fortunately, his family had many privileges, which could be used to deal with ignorant people who provoked them...

As Wendy finished the basic science for Alex, Big Ken continued, "Young master, if we are really targeted by the mutant, then we will be in great trouble. If the evolutions fight against the mutant one-on-one, and their level is close, the chances of victory will be fifty to fifty. Both sides don't have full confidence in winning. That is to say, compared to facing an ordinary opponent, our side no longer has the innate advantage in combat strength, so we can only fight head on."

Alex nodded thoughtfully. Suddenly, he raised his head and asked, "Brother Big Ken, according to what you all said, the mutant was cultivated with a special medicine, not automatically changed. Then where did the mutant come from? Or, who provided the special medicine to make them change?"

"Some of them were created by someone with ulterior motives. The mutants exist in many countries in the world. Our country's control in this area is very strict and good, but there are also some people who secretly study mutant medicine. Of course, most of them are directly bought at a high price from abroad. Just like Poison Owl, some people specialize in this business, and some are made up of mutant materials. The special operations group is built up by these people and organizations."

"Isn't the task of the Special Operations Group very busy? Are you busy?"

"The task is indeed a lot of work. Although there are not many mutants in the country, they can appear at any time and place. The task of the Special Operations Group is to find and deal with them in time. If it is handled late, not only will it cause serious problems, but it will also cause panic. The National Security Bureau set up subordinate teams of the Special Operations Group in many cities to better deal with mutant people. Unfortunately, the manpower of the Special Operations Group is limited, and it can't cover all the cities. The task of keeping an eye on the mutant group is assigned to the special police team or the city bureau. There are subordinate teams in Qingyun, nominally belonging to the special police team, and occasionally they will carry out tasks together. In fact, they are not under the jurisdiction of the special police team, and they only listen to the command of the special police team."

"No wonder the special police team is willing to cooperate with me to save people, and they are willing to send a helicopter to pick me up..."

Only then did Alex know that there were people from the special police team inside.

When it came to the special police team, Big Ken suddenly thought of something. If they were really targeted by the mutant this time, then Xie Si and Group Leader Pang couldn't help them at all. The only one who could help them was the Special Operations Group. Without hesitation, he immediately said to Wendy, "Get in touch with the subordinate team of Qingyun Group as soon as possible. If something unexpected happens, we need their help."

"Even if we don't ask for help, our subordinate team will spare no effort to deal with the mutant."

Although Wendy said so, in fact, she still took out her mobile phone immediately and explained the situation to Qingyun's subordinate group with the secret method and signal...

The next day, like Big Ken, Wendy gave up her vacation and officially went to work.

Bai Fan gave Bai Ling a Ford E350, which was a recreational vehicle, which was also a high-level M possibly. Since the interior space of a M possibly was large, it could meet the requirements for stars to cook, make-up, change clothes, and shape. It could be provided with necessary necessities for stars like a nanny, so it was also called a nanny car, which basically belonged to the standard of stars.

However, not many people who had not officially started their career could afford a million yuan worth of nanny cars.

As Bai Ling's private coach and bodyguard, Wendy would often ride or even drive this car in the future.

After waiting for so many years, Big Ken finally got the opportunity to continue to cultivate feelings with Wendy. Unfortunately, it was a very special time period. In order to ensure the safety of Alex, he had to let go of his affection and devoted himself to his work.

The life of Alex continued, waiting patiently for Ning Haohan's reply.

Three days later, Ning Haohan finally made an appointment with Alex.

In the military hospital, Director Deng personally conducted a detailed examination. As for the results of the examination, according to Alex's idea, he made a treatment plan and suggested that he should be hospitalized. However, when he learned that he could not be hospitalized, he did not stay in the hospital and continued to work while recovering.

He was not a person who would not repay a debt of gratitude, especially when the one who owed Alex might be saving his life, so he paid more attention to it.

He knew that Alex had an idea about Grand Express Corporation. The best way to repay Alex was to agree to cooperate and try to help Alex get Grand Express Corporation. In order to prevent their secret cooperation from being known in advance, they met in a very secluded place and communicated in the car.

In the past few days, although Ning Haohan spent most of his time in the hospital, he had always been in control of Grand Express Corporation's activity and had been doing all kinds of analysis. This time, he not only agreed to the cooperation proposal proposed by Alex, but also gave a preliminary cooperation plan.

If Alex wanted to get the shares of Grand Express Corporation, they could only spend money to buy them. However, they couldn't buy them directly. They had to transfer the money once and let Ning Haohan do it on behalf of them. With Ning Haohan's position in Grand Express Corporation, as the situation in Grand Express Corporation declined day by day, the success rate of buying shares from the shareholders who didn't belong to Gerald's camp was very high.

However, there was also a problem. After all, Grand Express Corporation was the family business of the Xavier family. In addition to Gerald holding more than 30% of the shares alone, there were also nearly 30% of the shares in total. They were all from Gerald's camp.

Even if he bought all the shares scattered in the hands of others, it was still far from the goal of Alex...

Super Son-In-Law Chapter 273 -

In the end, Ning Haohan concluded, "President Cohen, if you want to become the legal representative of Grand Express Corporation, you have to snatch shares from Gerald. I have calculated that you have to get at least 15% of the shares. Moreover, I can't make any mistakes. I have to take most of the shares scattered in the hands of others."

Alex frowned slightly. "It's not easy. Even if I don't show up, I'm afraid that from the relationship between you and Gerald, those people in his camp won't hand it over to you. This means that the conventional means are not enough to support me to take down Grand Express Corporation."

"Yes, we need to think of a good way, but don't worry too much. With Liang Heng's strength and personality, it's a miracle that he doesn't make the current situation of Grand Express Corporation worse. I dare to conclude that he can't help Grand Express Corporation out. Under such circumstances, the shareholders will be more and more worried, and the idea of transferring shares will become more and more serious. In other words, the more serious the situation of Grand Express Corporation is, the greater the chance of us successfully receiving shares."

“Then I can add fuel to the fire and make those who still have hope for Grand Express Corporation even more disappointed.”

“It may be possible, but... it is very likely that Grand Express Corporation will be under your name in the future, so you have to think about it carefully. You’d better not be too cruel. Otherwise, what you will get at that time will be a mess, or it will be caused by yourself. Then the loss outweighs the gain.”

“I understand! Vice President Ning, then I’ll transfer five billion yuan to you to buy shares.”

Ning Haohan was stunned for a moment, and then he smiled bitterly. “I thought I was not short of money. People like Gerald are rich. But compared with you, we are nothing. You offered five billion yuan, which sounds as casual as we offered fifty thousand yuan... Alas, it’s really annoying to compare with others. Fortunately, you are just a special case. Not all young people are as rich as you, otherwise, I would definitely have no face...”

“Haha, Vice President Ning must be joking.”

Alex gave a perfunctory smile and didn’t talk too much about this topic. Immediately, Big Ken used the special means, which other people couldn’t find of money to transfer five billion yuan to Ning Haohan’s bank account. From this, it could be seen that he had absolute trust in Ning Haohan and didn’t ask for any receipt.

The reason why Big Ken did not remind him was that he was not worried about any problems.

If Ning Haohan dared to flee with his money, he could use unconventional means to help Alex get the money back.

What’s more, Ning Haohan was not such a person. He took the initiative to sign an agreement with Alex. He had considered that the sum of money involved in the secret cooperation with Alex was too big. It was better to do business according to the rules, so as not to cause unnecessary trouble in the future.

Alex did not refuse and signed the agreement. After watching Ning Haohan leave, he immediately discussed it with Big Ken.

There were many ways to make the current situation of Grand Express Corporation worse. However, there were not many feasible ways to make the current situation worse. Just like fighting, it was a technical task to make the opponent temporarily lose the ability to resist.

After careful consideration, Alex finally decided to start from the business of Grand Express Corporation.

What they had to do was to make use of their connections and relationships to force Grand Express Corporation to not have any business to continue.

Grand Express Corporation had lost their backbone and was already in trouble. If they lost money again, they could only take the old capital. The so-called old capital was the money of investors and shareholders. The scale of Grand Express Corporation was very large, and the daily expenses were not small. Even if the shareholders were willing to spend time, they would not be able to hold on for long. The best way to avoid losses was to draw in the investment center and try to control the ratio of the loss and loss.

If they really couldn't get business done, they could only withdraw and ask for the second priority, which was to transfer shares...

On the other side, after receiving the huge sum of money, Ning Haohan also began to move quickly, wandering between the shareholders of Grand Express Corporation.

A few days later, Ning Haohan's hard work came true.

However, when Ning Haohan requested a vote at the board of directors, he heard a piece of bad news.

After the meeting, Ning Haohan asked Alex to meet him at the old place as soon as possible. After getting in the car, he said to Alex, "Mr. Cohen, there's good news and bad news. Which one do you want to hear first?"

Alex became nervous. "Bad news? Vice President Ning, don't scare me... My psychological endurance seems to be very ordinary. I'd better get some good news to calm down."

"The good news is that I have convinced a small shareholder and completed the acquisition of shares. I have passed the board of directors' approval. However, it is a little small, only 2%. However, this is just the beginning. Most of the shareholders I have met are waiting to see what will happen. They won't decisively refuse my proposal. As long as there is no accident, they will transfer their shares to me one after another."

"Okay! Let's not talk about the number. This is a good beginning! Vice President Ning, what about the bad news?"

"The bad news is that you seem to have competitors."

"What's going on?"

"I just got the news that a mysterious big boss appeared out of nowhere. He seemed to be very rich and was more generous than you. He directly found Liang Heng and wanted to buy the shares in Gerald's hands! You should know that all the shares in

Gerald's hands were originally worth nearly 10 billion yuan. Although it has shrunk to a certain extent now, it is still an astronomical figure for most people!"

"Is there such a thing?"

Alex's eyebrows froze, and his mind suddenly became active. He was full of curiosity about the identity of the mysterious big boss.

At present, they did not know who the mysterious big boss was, but they were almost sure that he was not a local. On the one hand, only a handful of people in the whole Quill Territory could take out ten billion yuan in cash, and they all knew him. On the other hand, the local big boss must know something about Grand Express Corporation, and he could also analyze that Grand Express Corporation's future was worrying, so he would not easily spend so much money on Grand Express Corporation at this critical moment.

He often said that there must be something wrong with things.

The more abnormal the mysterious boss's actions were, the greater the potential problems would be.

There was a possibility that Alex was targeted by an unknown enemy this time. Before Gerald was incited by Pei Chong, he wanted to participate in the stock auction of Qingyun Media mainly not for money, but to stop Alex. Maybe that would happen again this time.

Alex's heart was hanging. After thinking for a long time, he said to Ning Haohan, "Vice President Ning, our plan will not change. You should continue to think of ways to buy shares. At the same time, you should pay more attention to find out the identity of the mysterious big boss."

Ning Haohan nodded and slowly analyzed, "Grand Express Corporation is the foundation of the Xavier family. Gerald should be guarding the shares and will not easily transfer them. Therefore, I also think that the mysterious big boss will most likely return empty-handed. We should continue our plan and not be affected by him."

"That's right. That's what I'm thinking."

Alex and Ning Haohan thought about it together.

As a result, the next day, they were slapped in the face.

Alex and Ning Haohan had arranged for special people to investigate the identity of the mysterious big boss who had suddenly appeared. Before they could find out the identity of the mysterious big boss, Ning Haohan had received a very explosive piece of

information, which was that as the agent of Gerald, Liang Heng had actually agreed to the proposal of the mysterious big boss to buy shares.

Although they had just reached the initial agreement of cooperation and had just entered the stage of bargaining, this abnormal situation was enough to make people stunned.

Alex was quick to think. After hearing the news, he was shocked and immediately thought that maybe Liang Heng had betrayed Gerald and wanted to take the opportunity to sell the shares and leave with money when Gerald was caught. But then he thought that in the name of Gerald, Liang Heng only had the right to manage the shares for him and had no right to sell them.

Ning Haohan also attached great importance to this situation. He even gave up the job of purchasing shares and went to inquire about the situation in person. Soon, he learned a more shocking rumor, which made him start to doubt his life...

Super Son-In-Law Chapter 274 -

In Grand Express Corporation, a director, who was in Gerald camp but was loyal to Ning Haohan, inadvertently heard the communication between Liang Heng and the mysterious big boss and realized that the problem was serious. He called Ning Haohan to a secluded place in time and reported the information he had secretly heard.

After hearing this, Ning Haohan's eyeballs almost rolled out. He asked in astonishment, "You mean, it was Liang Heng who took the initiative to find the mysterious big boss, not the mysterious big boss who found Liang Heng and wanted to buy the shares?"

"Yes!" The director nodded and said, "I heard it in person. The mysterious big boss said to Liang Heng, 'You took the initiative to find me, so you should show your sincerity first... This is the original statement! Liang Heng did not refute this statement, which means that the mysterious big boss is telling the truth. After thinking for a moment, Liang Heng agreed to transfer all the shares of Gerald to the mysterious big boss.'"

"It's really strange... What's going on?"

"What's even more puzzling is that it's still behind. Vice President Ning, you definitely can't guess the price of transferring shares..."

"Oh? How much?"

"100 million."

"What? That's a share worth nearly 10 billion yuan. The mysterious big boss only offered 100 million yuan. What's the difference between that and directly asking Liang

Heng to give all the shares to him? He's not buying it at all. It's obviously a robbery! I think he thinks Liang Heng is a fool."

"No, no... Vice President Ning, you're mistaken. A hundred million yuan is not the price of the mysterious boss, but Liang Heng's. It's also the deal price they reached through communication."

"Deal... deal price? Impossible, absolutely impossible. You must have misheard! Even if Liang Heng is a fool, Gerald is a shrewd person. Liang Heng's offer must have been ordered by Gerald. How could it be so low? Even if he jumped off the building and sold it, it would not be less than five billion yuan!"

"I don't think it's possible either. Maybe..." The director thought it was incredible. After listening to Ning Haohan's analysis, he was even more uncertain. He shook his head helplessly and said, "Maybe I heard something wrong, or they didn't talk about the shares that Gerald owned."

"Well, let's not talk about this anymore. Do you know the identity of the mysterious big boss?"

"I secretly took a photo from a distance, but I don't know..." The director took out his mobile phone and took out a photo. He pointed to a man in his thirties standing next to Liang Heng and said to Ning Haohan, "It's this person, Vice President Ning. Do you know him?"

"Hiss... I seem to have seen him before. He looks a little familiar!"

Ning Haohan stared at the photo carefully, but he still didn't remember who the mysterious big boss was.

However, it was not difficult to confirm his identity through photos.

For the police station and the law enforcement department, this was just a matter of typing on the keyboard.

Ning Haohan immediately found a connection to confirm the identity of the mysterious big boss, and then contacted Alex urgently again...

In the old place, they met in the car.

Alex had guessed that there was something important to say for Ning Haohan, so he was in high spirits from the beginning. "Vice President Ning, did something happen again?"

Ning Haohan nodded heavily and shared the conversation between Liang Heng and the mysterious big boss from the director to Alex. Then he added, "Liang Heng sold Gerald

at a price of 100 million yuan. I haven't confirmed it yet. I guess it's fake. I don't think about it now. I'm looking for you today to tell you the identity information of the mysterious big boss. His name is Yu Zhijie. Have you ever heard of him?"

"Yu?" Alex suddenly frowned. "I don't remember the name Yu Zhijie at all. It should be the first time I've heard of him. However, I know Yu Zhe, and I also know that Yu Zhe's father is Yu Zhaoxiang. I don't know many people. I only know these two names."

"Then I have to tell you that Yu Zhijie's father is Yu Zhaohong."

"What? What a coincidence! Vice President Ning, don't tell me that Yu Zhijie you're talking about is Yu Zhaoxiang's nephew and Yu Zhe's cousin?"

Ning Haohan gave a wry smile and said, "Mr. Cohen, unfortunately, your judgment is right. I don't know Yu Zhijie, but I have seen his photos in a piece of news on some media, so I have a little impression of him. I can confirm that the mysterious big boss who contacts Liang Heng is Yu Zhijie!"

"No wonder he's so generous. It turns out that Zhaolong Pharmaceutical Group was the one who made the medicine!"

"No... President Cohen, as far as I know, Yu Zhaohong and Yu Zhijie are not working in Zhaolong Pharmaceutical Group."

"Then what kind of industry are they in?"

"Yu Zhaohong is the agent dealer of Zhaolong Pharmaceutical Group. To put it simply, one of them is a pharmaceutical company and the other is selling medicine. However, Yu Zhaohong's Yongji Pharmaceutical Distribution Co., Ltd. is run by himself, not a subordinate company of Zhaolong Pharmaceutical Group. It has nothing to do with Yu Zhaoxiang. What the company sells is not only the medicine produced by Zhao Long's pharmaceutical company, but also other families and imported medicines. It is a large-scale pharmaceutical pin company. In the same kind of company, Yongji Company is a top company all over the country. Ordinary people may not know much about it, but at least the employees in the pharmaceutical industry have heard of this company."

"Isn't the Yongji Company going to collapse too much this time? Yu Zhijie, a medicine seller, is going to get involved in the real estate industry. What does he think?"

"Who knows?"

Like Alex, Ning Haohan was full of doubts.

While they were talking, Ning Vastan's cell phone rang. It was a call from the director. "Vice President Ning, Liang Heng just issued a notice to hold a board meeting. He said

that he wanted to vote for the transfer of funds to Gerald! It's very likely that what we think is impossible will really happen!"

Ning Haohan's phone almost slipped out of his hand. He asked in a daze, "How could this be?"

"I don't know what's going on either. Maybe the truth will be revealed when the board meeting is held!"

"Alright, keep an eye on it!"

Ning Haohan gave the director an order and hung up the phone.

When Alex saw how distracted Ning Haohan was, he quickly asked, "Vice President Ning, what's wrong?"

"Alas..."

Ning Haohan sighed, shook his head, and said, "President Cohen, regardless of the motive and purpose of Yu Zhijie's acquisition of the shares of Gerald, this matter itself has seriously affected your plan. I have been busy for several days to buy 2% of the shares. And he took more than 30% of the shares as soon as he took action. And, this matter is full of doubts..."

"What do you mean?"

"Mr. Cohen, you won't believe me if I tell you. I also find it hard to understand. The transaction price of Yu Zhijie's acquisition of Gerald's shares seems to be 100 million yuan! If that's the case, then there must be something behind their cooperation that we haven't known yet."

"A hundred million?" Alex was stunned. After a long while, he came to his senses and said slowly, "If Gerald gave Yu Zhijie a favor price, then this favor is too big! Vice President Ning, is Gerald and Yu Zhijie old acquaintances, or is there any relative relationship between them?"

"They have no relatives. As far as I know, they didn't know each other before!"

"Hiss..."

Alex took a deep breath and thought quickly. Suddenly, his eyes lit up. "Vice President Ning, I think of a possibility!"

Ning Haohan's curiosity was aroused. "President Cohen, tell me about it."

“You know, if Gerald wants to use all the strength of Grand Express Corporation to deal with me, he has to spare no effort. Now that he has been arrested and has lost his freedom, he can only ask someone for help. Is it possible that he has invited Yu Zhijie to deal with me? The reward is his compensation for collecting 100 million yuan symbolically just to cover up people’s ears?”

Pa!

Ning Haohan slapped his thigh and suddenly realized something. “It’s possible, it’s very possible! President Cohen, no matter what, we must be on guard against Yu Zhijie, especially you. If he really takes advantage of Gerald to deal with you, he will be your mortal enemy!”

After that, Ning Haohan sent the photo taken by the director secretly to Alex, reminding him to be more careful if he saw Yu Zhijie.

Alex just nodded and did not pay much attention to it.

After staring at the photo, Big Ken’s eyes suddenly bulged...

Super Son-In-Law Chapter 275 -

Alex noticed that there was something wrong with Big Ken’s eyes and asked curiously, “Brother Big Ken, what’s wrong?”

“Ah... I’m fine, I’m fine!”

Big Ken said that he was fine, but the dark clouds on his face did not disperse. He took Alex’s mobile phone and reposted the photo that had just been sent to him. Then he immediately reposted the photo and added, “Help me confirm the identity of the person on the left in the photo.”

Alex guessed that Big Ken had made some major discoveries, but he had some scruples, so he didn’t ask any more questions. After talking with Ning Haohan and watching him leave, he said to Big Ken, “Brother Big Ken, have you seen Yu Zhijie before?”

Big Ken shook his head. “No.”

“Then why did you have such a big reaction when you saw this photo?”

“What attracted my attention was not Yu Zhijie, but another person in the photo.”

“Oh?” Alex quickly took out the photo on his mobile phone and looked at it carefully. “In this photo, there are only three people who can see the face. Vice President Ning said

that the one in the middle is Yu Zhijie, and the one on the right is Liang Heng. The one on the left... I don't know him. He should be Yu Zhijie's assistant, right?"

"He doesn't have the ability to be Yu Zhijie's assistant. He should be a bodyguard."

"No... Brother Big Ken, according to your words, do you know Yu Zhijie's bodyguard?"

"If I'm not mistaken, this person's surname should be Yang. His name seems to be Yang *hao, so let's call him Yang *hao for the time being. Of course, his name isn't the point I'm going to talk about, so there's no need to pay attention to it. What I have to pay attention to is that he's an evolution!"

"Hiss... Brother Big Ken, how did you know?"

"Well... it's a long story. It has something to do with the Special Operations Group!"

Big Ken hesitated for a few seconds and decided to share a secret with Alex.

From the very beginning, the Special Operations Group was established precisely to deal with those abnormal human beings who couldn't be defended against by ordinary law enforcement officers. Apart from the main target of all mutated people, all of the evolved ones that had been discovered but not yet collected were potential targets.

Under the premise of obtaining relevant authorization and permission, the Special Operations Group came up with a detailed response to the evolution.

Every time the Special Operations Group discovered a new evolution, they would strictly carry out the process. The first step was to maximize the fighting, hoping that the evolution would enter a regular organization, which was to accept the collection, and use extraordinary abilities to serve the country. If the evolution party agreed, then they would receive training and assessment from all sides.

If the evolutions didn't agree, they wouldn't immediately be dealt with. The special operations group would give them a very serious reminder, or rather a warning, nothing more than reminding them not to act recklessly. At the same time, they would make a detailed registration, including their names, gender, age, blood type, fingerprints, and photos.

If this type of evolution didn't commit a crime, then there wouldn't be any problems. They could live as normal as ordinary people and wouldn't receive the special care of the Special Operations Group. Once they did something out of line, they would become the target of the Special Operations Group, just like all mutated people.

From this, it could be seen that the Special Operations Group had a title list of "Unformed evolutioners".

This flower list was one of the top secret documents of the Special Operations Group. In principle, it could not be passed on to outsiders without internal reference. The family of Wayne had made a lot of great contributions to the Special Operations Group and even to the country, so they made an exception and got a flower list.

For the Larson family, getting this flower list was of great significance.

This could show the extremely high prestige of the family. In addition to its face, it also had an important meaning, which could better protect the members of the family. For example, before Big Ken came to serve as the bodyguard of Alex, he had worked overtime to read the complete list of flowers. He had a certain impression of all the alchemists recorded in the records.

In this way, Big Ken would be able to recognize those who had evolved in time if they met. If they were right, they would be able to make preparations of a corresponding level in advance. If they didn't confirm the other party's identity in time and treat him like an ordinary person, they might suffer a great loss.

After all, the means used to deal with ordinary people were absolutely not enough to deal with them.

Originally, he had the power to fight. If he was defeated because he underestimated the enemy or failed because of the wrong countermeasures, it would be a great loss.

But now, the advantages of Big Ken's viewing the list of evolutionary flowers showed up directly...

When Big Ken told Alex about the situation, he received a reply and confirmed the identity of the person in the photo. It was Yang Changhao, who had been discovered by the special operations group three years ago. According to the record, this person was eccentric and silent. There were no obvious signs of doing evil, but he was competitive and competitive. The reason why he refused to accept the special operations group at that time was that he liked freedom by nature and could not accept the life of a "civil servant".

Yang Changhao was still alive and well. There were only two possibilities. One was that he had not done bad things over the years, and the other was that he had done bad things but had not been discovered by the special operations group. The special operations group preferred the first one. But according to the current situation of Big Ken, the second one was more likely.

According to the judgment, Yang Changhao had followed Yu Zhijie.

As the saying goes, rare things are precious, and people are the same.

Evolutions were all powerful individuals with exceptional combat strength, and their numbers were extremely small.

For most people, evolutions were rare and rare resources. If Yu Zhijie only asked Yang Changhao to be a full-time bodyguard, it would be like using a knife to kill chickens. It was very likely that Yu Zhijie would arrange him to carry out some tasks that ordinary people could not do, so that he could make full use of Yang Changhao's specialty.

Tang Qingsong had roped in two low-level evolutions. They all knew how to make money by doing underground fighting, let alone a shrewd businessman like Yu Zhijie.

Alex understood this and said subconsciously, "Brother Big Ken, could it be that Yu Zhijie wants Yang Changhao to deal with me and help Gerald get revenge?"

Big Ken nodded gently. "This possibility can't be solved."

"Then his thinking is too simple!"

"That's right! An evolution can kill an ordinary person in seconds, and he will definitely win. But it's a bit whimsical for an evolution to deal with you alone. If Yu Zhijie doesn't have any other support, and only Yang Changhao can be used, I don't need to find anyone to help me. I can deal with it alone! But... I don't know if he has any other masters under him. We'd better be careful."

"Brother Big Ken, don't worry. I won't underestimate the enemy!"

After chatting with Big Ken, Alex came to Big Ken together and found Isla and Felix.

After Isla was discharged from the hospital, she returned to her original position and continued to take charge of Golden Stone Company with Felix. Today, Alex came to see them to tell them that there might be another strong enemy coming, reminding them to be more careful in the near future. Originally, Hunter was arranged to protect Isla, but now that Hunter had applied for a change of position, he let Xiong Er take up the position, while Xiong Da guarded the military yard.

As for Felix and Quinn, Cheng Hengchao continued to protect them.

Just as Alex was about to leave Gold Stone, Quinn suddenly ran in. "President Cohen, someone surnamed Yu is looking for you."

"His surname is Yu?"

Alex subconsciously thought of Yu Zhijie and looked at Big Ken who also thought of this. The two of them stepped forward at the same time and walked quickly to the reception room of the company. At a glance, they recognized that the person they were talking about was Yang Changhao.

At this time, Yang Changhao was standing. On the sofa next to him sat a tall and handsome man.

Alex walked straight over and went straight to the point. "Who are you? What can I do for you?"

The handsome man looked up at Alex and pointed to the sofa opposite him, indicating for Alex to sit down.

Judging from his posture, he seemed to regard himself as the owner of this place, and it seemed that he wanted to take over the place. He continued to stare at Alex up and down, and then answered calmly, "I am Yu Zhijie. You should not know me, but you must still remember my cousin, Yu Zhe."

Alex was not suppressed by Yu Zhijie's power. He sat down and answered casually, "What? Yu Zhe asked you to avenge him?"

Yu Zhijie shook his head. "He's too embarrassed to ask me for help, and I don't care about revenge for a good-for-nothing..."

Super Son-In-Law Chapter 276 -

Alex was a little surprised and asked curiously, "Yu Zhijie, no matter what, Yu Zhe is still your cousin. Is it really good for you to say that he is a good-for-nothing? Others' evaluation of him may not be important, but what would he think if he knew that you said that behind his back?"

"I'm just telling the truth. Is there anything wrong?"

Yu Zhijie didn't take it seriously at all. He curled his lips and replied, "Let's not talk about it behind his back. Even in front of him, I often say that he is a good-for-nothing. He doesn't want to work hard, nor does he care about his own business. He is a real good-for-nothing. How can he allow others to talk about it? He knows what he looks like in my heart. This is also the reason why he is too embarrassed to ask me to avenge him."

"Then I'm a little confused. Since you're not here to avenge him, could it be that... you came all the way here to criticize him?"

"Humph! I disdain to avenge Yu Zhe, but the Yu family is not easy to bully."

"You've been making trouble for a long time, but you still come to make trouble for me? Why do you have to make such a big detour? Can't you just say it directly?"

"Cohen, don't confuse the concept! It was you who bullied our family first. I came passively to seek justice, not to take the initiative to cause trouble! This matter has

nothing to do with Yu Zhe. Even if you didn't bully him, if it was someone else, even if you only bullied a dog of our family, you must give me a satisfactory explanation!"

"Yu Zhijie, I thought you were a person with great wisdom when I heard your high-sounding words just now. Now it seems that it's an illusion. After listening to your words, I know that you're like Yu Zhe, a muddled bug who can't distinguish right from wrong. You said he's a good-for-nothing, but I don't think you're much better than him."

"You're not qualified to judge what kind of person I am. Cohen, I've said what I should say. It depends on your performance next. I'll stay in Quill City for about half a month this time. This is also the time limit I give you. You'd better hurry up and deal with it. If you don't give me a satisfactory explanation within half a month, I'll deal with your conflict with our family in my way!"

"It won't take half a month. I can give you a clear answer now. If you can provide solid evidence to prove that I did bully Yu Zhe, then I can apologize to you and compensate you. But if you can't provide evidence, you can stop fooling around here!"

"If you always have this attitude, then I can guarantee that you will regret it in half a month! I'll leave you a phone number. If you think about it, you can contact me at any time. Finally, I'll remind you that you'd better think it through and do the right thing. Otherwise, you will pay a heavy price for your stupidity!"

Without waiting for Alex's reply, Yu Zhijie threw a business card casually and got up to go outside.

In the end, Yang Changhao stared at Big Ken with great interest and followed him.

Alex shook his head helplessly. Without looking at the business card, he threw it directly into the trash can.

Big Ken walked to the door of the company and watched Yu Zhijie and Yang Changhao enter the elevator. He quickly returned to the lounge and sat down in front of Alex. He frowned and asked, "Young master, Yu Zhijie came here in person just to set a deadline for you inexplicably? Is there something wrong with his brain? Is he really a good-for-nothing like Yu Zhe?"

"In fact, that's not the case." Alex shook his head and calmly analyzed, "Through today's meeting, I can feel that Yu Zhijie is a smart person."

"Oh? Why?"

"He came to me today to talk so much nonsense. He seemed brainless, but in fact, there should be some deep meanings. I think that he took in the benefits of Gerald to deal with me. This can be confirmed, and then it will be easy to understand. First of all, he asked me to give him an explanation for Yu Zhe's matter in half a month, so that I

can divert my attention and relax my vigilance to him. In addition, he pretended to be very stupid. Maybe he wanted me to look down on him on purpose, which is to make me look down on him. In other words, he came here today to trample on me and to find out the bottom. Only by having a certain degree of direct understanding of me can he come up with a more suitable plan to deal with me.”

“Hiss... Young Master, if your analysis is correct, then Yu Zhijie is not simple. He is very scheming and shrewd.”

“Yu Zhijie must be smarter than Yu Zhe... Let’s not talk about him first. Brother Big Ken, you saw Yang Changhao with your own eyes. What do you think of him with first impression?”

“It’s about the same as I thought. He’s a master with a cold personality and a proud heart. He’s not half a bucket of water wandering around, but he has the capital to be proud of. However... from his empty eyes, I feel that he’s still too young, or rather, he’s experienced too little. As an evolution, he’s indeed invincible in the circle of ordinary people, but there are people beyond the heavens.”

“When he suffers a few losses, he will learn his lesson... Brother Big Ken, maybe you will get the chance to teach him soon.”

“If he dares to act recklessly, the members of the special forces are more willing to give him lessons... By the way, young master, in addition to Yu Zhijie and Yang Changhao, the suspected mutant who appeared at the entrance of the restaurant a few days ago is also your potential opponent, and you also need to pay attention to it. It is very likely that you are targeted by two groups at the same time, and they are all masters. But it is also possible that the two groups are in the same group.”

“At first, I thought that the mutant you saw was arranged by Jing Kun. Now, it seems that it may also be Yu Zhijie’s people. Maybe Yu Zhijie has already begun to contact Gerald or Liang Heng and reached the intention of cooperation, but we just found out recently. Otherwise, with the little grudge between Yu Zhe and me that has not reached the family level at all, it is not enough for Yu Zhijie to deal with me...”

Alex and Big Ken held a heated discussion about Yu Zhijie and Yang Changhao.

However, because their current intelligence was really limited, based on the known intelligence, some of them were correct, while others were one-sided.

For example, they did not consider that Yu Zhijie and Jing Kun were actually old acquaintances and had cooperated for a long time...

Yu Zhijie’s family was in the pharmaceutical business. In addition to frequently transporting medicines in different countries, they often needed to imported medicines

from all over the world. Of course, they also had some imported medicines. As time went by, their family had a mature transportation system.

Just in time, Yu Zhijie was mainly responsible for purchasing and transferring in his family.

As for Jing Kun's business, through secret means, he would transport the goods from abroad to the country and then distribute them to the public. He also had his own security system, but the scale was relatively low. Most of the time, it would be difficult to transport because of various reasons. Once there was something wrong with the transportation, the profit would be damaged.

In order to minimize the losses as much as possible, Jing Kun was recommended and met Yu Zhijie and reached a very secret cooperation.

Yu Zhijie took advantage of his family's security system to help Jingkun transport goods. According to the amount of transportation, he made it. Although this cooperation could not be regarded as his main business, the profit was not much worse than his main business. More importantly, the money earned from this secret cooperation was external and did not need to be shared with anyone.

After Yu Zhijie tasted the sweetness, he became bolder and bolder, and his cooperation with Jing Kun became closer and more frequent.

In the beginning, only the two of them knew the cooperation between Yu Zhijie and Jing Kun.

As Yu Zhijie's father and boss, Yu Zhaohong knew nothing about it.

However, there was no impenetrable wall in the world. Yu Zhaohong finally knew that. He scolded Yu Zhijie severely and ordered him to immediately terminate the cooperation with Jing Kun and cut off contact with him. Otherwise, all his duties would be canceled and he would not be allowed to enter his family's company again.

But at that time, Yu Zhijie had been deeply attracted by the great benefits, and he himself had become a deep client of Jing Kun, so he could not leave the goods of Jing Kun and other goods. So, on the surface, Yu Zhijie promised Yu Zhaohong, but in fact, he did not change his mind. He just made the cooperation with Jing Kun more secret, and even Yu Zhaohong could not find it.

Later, Yu Zhijie and Jing Kun gained high trust in each other, and even expanded and cooperated with each other, which greatly improved their cooperation...

Super Son-In-Law Chapter 277 -

Yu Zhijie left Gold Stone and returned to his exclusive car. He signaled the driver to drive, then took out a cigarette and threw it to Yang Changhao. He asked, "We have seen Alex with our own eyes. From today's contact, how do you feel about him?"

Yang Changhao took out the ZIPPO lighter and lit a cigarette for Yu Zhijie. He took a deep breath and said slowly, "Alex seems to be very powerful and fearless, as if he doesn't take anyone seriously. In fact, he is just an ordinary person. I guess that his unscrupulous confidence should come from his bodyguard!"

"Is that Big Ken?"

"Correct. If I am not mistaken, Big Ken should be an evolution!"

"What? A Big Ken is also an evolution?"

Yu Zhijie was quite surprised by this. He touched his chin and his eyes suddenly lit up. "I was wondering why Alex, a young boy in his early twenties, was so bold. Not only did he make the business of Quill City a mess, but he also made a lot of enemies by himself. With him, he has an evolution to back him up!"

"If this really is the case, then Alex is still too young. Even though the evolutions are powerful, can they never leave Big Ken behind? Taking a step back, even if Big Ken is willing to follow him, if he encounters more than one person who is as powerful as Big Ken, wouldn't he still die? If he thinks that if he can rope in an evolution, then he can rest easy, then he will be too stupid, and he will soon suffer a great loss!"

"Now that we don't know much about Alex, we'd better not rush to draw a conclusion. Otherwise, we'll make the wrong assessment of his strength first..." A look of disdain flashed in Yu Zhijie's eyes. There was another sentence that was about to jump to his mouth, but he couldn't help saying, "Yang Changhao, it's you who are stupid!"

Yu Zhijie's observation and analysis of Alex were much more detailed and accurate than Yang Changhao's.

Although they had just met today, Yu Zhijie had clearly noticed that Alex was not simple. He was definitely not as stupid as Yang Changhao thought. This could be seen from the fact that Big Ken, as an evolution, was willing to bend down to Alex, an ordinary person.

All evolutions possessed extraordinary strength. Most of them were proud and arrogant people. They were definitely not someone that could be subdued by just anyone.

No matter how powerful Big Ken was, it could only ensure the safety of Alex and could not provide him with the capital to stir up the business world. This also showed that the support of Big Ken was not the only one which made him become so powerful. In addition, he must have other support.

One more thing was that evolutions were not something that could be easily cultivated.

For those with money, they might not necessarily be able to find a way to purchase an evolutionaryist's medicine. For those with related channels, they might not necessarily be able to find someone suitable for training. Not all people had the potential to become an evolutionaryist. The stimulation of the medicine that could help them evolve was extremely great, ordinary people unable to endure it at all. Only those with excellent physiques and strong resistance would have a chance of successfully becoming an evolutionaryist after taking the medicine.

If people who were not satisfied with the conditions took the medicine, they would be counterattacked by the medicine, just like the Qigong Deviation performed in martial arts dramas. The lighter it was, the body would be hurt, and the heavier it was, the fatal one. This was also the reason why it was more and more easy to buy the medicine for the evolution, but the evolution was still a rare resource.

Most of the evolutions were trained by wealthy and powerful families or organizations.

In this way, he could guess that Alex might not only get the support of Big Ken, but also the master who cultivates a evolution like Big Ken. If he wanted to deal with Alex, he would offend the person he relied on. This was also the reason why Yu Zhijie was not in a hurry to attack him. With the principle of "Knowing oneself well and knowing the enemy well", he had to have some understanding of him and his support before making plans.

Otherwise, it was very likely that he would get into big trouble without making proper preparations.

If he was caught off guard and lost the whole game, he would suffer a great loss...

Thinking of this, Yu Zhijie said to Yang Changhao, "Continue to send people to deal with Alex. There is no need to investigate the known and open intelligence. I want to know who he has contacts with secretly. Also, as far as I know, he used to be an unknown small character. A few months ago, he suddenly became powerful. Then he can't be just an ordinary country bumpkin. We need to find out his real identity."

Yang Changhao didn't take it seriously. "Young Master Yu, are you being too cautious? I think he's just an upstart who doesn't know the immensity of heaven and earth. Just send someone to kill him. Anyway, I'm not afraid of him, including the support you mentioned. Just take it as the so-called support. If he dares to show up, I'll deal with him together."

"Be careful of the 10,000-year-old ship!"

Yu Zhijie held back his anger and patiently explained to Yang Changhao, "You know what kind of business Jing Kun does, don't you? Those who do the same business as

him have already lost a lot of money. And he can earn so much money, and he is still alive and well. It's not only because he is more powerful than others, but also because he is low-key and cautious enough! Otherwise, he would have turned over a car long ago! And I, if I were as high-profile as Yu Zhe, how could I have successfully made it to this height?"

"Alright... Childe Yu, I'll do as you say!"

Yang Changhao was not convinced.

There was no other way. People had to bow their heads under the eaves.

While they were chatting, Liang Heng called Yu Zhijie and reported anxiously, "Young Master Yu, do you still remember the man named Ning Haohan I mentioned last time? He is the vice president of our group, the person who is buying shares. Originally, I thought that he was not willing to take that little salary and wanted to buy some shares to retire. But I just learned that he has contact with at least five small shareholders. If he wants to buy all the shares of those shareholders, the investment will far exceed his personal financial resources. I think that he may have got the secret support of a rich person, so it is necessary to investigate..."

"Really?"

Yu Zhijie pondered for a moment and said slowly, "Liang Heng, I will investigate this matter, so you don't have to worry about it. What you need to do is to hold a board meeting as soon as possible and officially transfer the shares of Gerald to my name. When I really feel your sincerity, I will definitely show my sincerity..."

On the other side, Alex heard that Xiao Hang was officially discharged from the hospital today, so he wanted to treat him to a meal.

Xiao Hang did not refuse, but said that he would arrange the meal, so Alex did not refuse.

At seven o'clock in the evening, Alex took Big Ken to the restaurant that Xiao Hang had agreed on and found that Group Leader Pang was also there. Xiao Hang immediately came up to him and took the initiative to explain, "Mr. Cohen, today's meal is secondary to celebrate my discharge from the hospital, mainly because I want to thank you and Group Leader Pang. I heard from Director Deng that it's all your credit that I can recover so quickly and so well. During my stay in the hospital, Group Leader Pang took a lot of responsibilities that should have been handed over to me. You two are old acquaintances, don't you mind, Mr. Cohen?"

Alex waved his hand and said, "How could it be? I was planning to ask Group Leader Pang about something recently!"

“That’s great! Don’t stand at the door. Please come in. The private rooms have been arranged.”

“Okay! Captain Xiao, Group Leader Pang, please!”

The four of them entered the private room and sat down. After ordering the dishes, Group Leader Pang said to Alex, “Mr. Cohen, do you want to ask me about the progress of the case in Gerald?”

Alex nodded and said, “Group Leader Pang, to be honest, I’m very interested in Grand Express Corporation. I want to know if Gerald has any chance of turning over this time.”

“Almost no more. But... this case has been handed over to someone else, and I won’t be in charge of it in the future.”

“Oh? You’re not in charge of such a big case?”

“I do think so. But there are more tricky cases. The leader clearly said that I should be responsible for them, and I have to deal with them in a hurry.”

“Group Leader Pang, the more I listen, the more curious I am. What kind of case is it?”

“Well...” Captain Pang hesitated for a few seconds and suddenly smiled bitterly. “I’ve told you that you may not believe it. There seems to be a master of martial arts in the city! Last night, a suspect who was suspected of deliberately hurting someone escaped under the nose of the police officer. The process of escape can only be described in four words, which is to fly over eaves and vault over walls!”

Super Son-In-Law Chapter 278 -

“What’s going on?”

Xiao Hang suddenly became interested and asked curiously, “Group Leader Pang, do you mean that someone knows Lightness Skill?”

In the past, when Alex heard about this kind of thing, he would definitely be shocked. However, at this moment, he only subconsciously exchanged a look with Big Ken. After all, he was now someone who could accept the existence of an evolutionaryist and a mutant. If he wasn’t an ordinary person, then he could be regarded as a true martial arts expert.

As for team leader Pang, he didn’t know much about evolutions and mutants. He frowned and said to Xiao Hang, “From the live video brought back by the police officer, although it is not as exaggerated as Qing Gong, the ability shown by the suspect is still far beyond my original understanding of human beings.”

“Well... Group Leader Pang, according to what you said, flying eaves and vaulting walls are not Qing Gong. Could it be that he's a sports maniac? I don't know much about running cool, but after watching some videos, I see that those people's bodies are very flexible. It's easy for them to climb four or five meters high with bare hands!”

“I've also seen the video you mentioned. However, I feel that the suspect's ability is above that of a cool lover. I can't explain it clearly. You can see it yourself...”

After saying that, Group Leader Pang took out his mobile phone and clicked on a video. As soon as he handed the phone out, he quickly put it away and said seriously, “Let me explain one thing first. This is the internal information of our criminal investigation team. In principle, you can't show it to others without the permission of your superiors. There are no outsiders here. I can show them to you, but you can't tell others.”

“Don't worry, Captain Pang!” Xiao Hang nodded. “Just like you, I've also learned how to keep it a secret.”

Alex and Big Ken also said that they would not spread the news.

Only then did Group Leader Pang put his phone on the wheel on the dining table.

Xiao Hang quickly turned the phone over and picked it up. He began to watch it with Alex and Big Ken.

The video showed that a police team ran at a speed of 100 meters. In a dark alley, they tried their best to catch up with a middle-sized young man with a beard. The police officers were not slow, but the bearded man was faster and agile. When they encountered a car blocking the way, they directly collapsed like crossing a railing.

More importantly, after the bearded man crossed a car, he could still jump on the second car like the Spider Man, tap on the wall with both his hands and feet, and cross another car next to him without landing. If he was a sports maniac, in that case, he would usually jump on the second car and land on the ground with a cool somersault. He would definitely be able to slide on the wall.

Soon, the bearded man ran to the end of the alley, which was a dead end.

When the police officers saw the bearded man stop, they must have thought that the bearded man had no way to escape. They also stopped and were ready to catch him. But the next second, the bearded man suddenly rushed forward a few steps and used his hands and feet again. He hit the walls on both sides of the corner several times in a row and climbed to the wall in the blink of an eye.

It was estimated that the wall was at least four meters high. The wall was vertical to the ground, and there was cement on it. It was bare, with no foothold or junction.

However, the process of climbing the bearded man looked very easy. He was like a gecko in one go!

The police officers reacted very quickly. They pulled out their guns and aimed at the bearded man, shouting for him to come down.

The bearded man did not jump down, nor did he respond. He just looked back at the police officers with a cold smile, and then jumped down. When the police officers took a detour to the other side of the wall, there was no trace of the bearded man. The arrest operation failed.

After watching the video, Xiao Hang looked at Alex and Big Ken with a dull face. Then he returned the phone to Group Leader Pang and said in a daze, "If you didn't say that it was the arrest scene of your criminal group, I would definitely think that it was a movie! In my opinion, no one can do such a thing without being hanged. Even a cool master can't do it! I'm surprised. How could there be such a magical person in the world?"

"What's more amazing is that!" Captain Pang said with a wry smile, "You have all seen that the video was taken at night. The light was not good, and it was shaking violently. The picture was not very clear, so you couldn't see the face of the suspect clearly. You only knew that it was a man with whiskers. The colleagues of the technical group used excellent technology to look at the last scene of the suspect and the police officers. They dealt with it overnight and restored the real face of the suspect... That's it."

As he spoke, Group Leader Pang opened his phone again and took out a photo.

Alex's curiosity was completely aroused. He couldn't wait to turn the wheel, so he got up and took the phone. When he took a closer look, his eyes almost rolled out. The suspect was not a bearded man. Most of his face was covered with fluff, and only his mouth, nose, and eyes were exposed.

The appearance of the suspect was not much different from that of Sun Wukong in Journey to the West!

Xiao Hang looked at the photo and was stunned again on the spot. "Well... I dare to conclude that if it was not a monkey, it must have worn a monkey head mask. Anyway, it can't be just a bearded man. Hiss... maybe he is really a monkey in clothes, because only a monkey can complete those incredible movements!"

"It's not Monkey!" Captain Pang said with certainty, "The colleagues of the technical group used the technology department to wipe off the beard on the suspect's face... or rather, the fluff. They further restored his face and got a normal face... sliding, and the next photo will be taken."

"Really?" Xiao Hang quickly took out a photo and saw a normal person's face. After a few seconds of shock, his eyes suddenly lit up and he said eagerly, "Group Leader

Pang, since the face of the suspect has been restored to this point, we can introduce it to the system for comparison!”

“After comparison, we’ve already found out who this person is. That is to say, we can confirm that the suspect is a man and a registered normal person! But now he looks abnormal. I only hope that the fluff on his face is a prank and stuck to it. If it grows naturally, then the problem may be serious.”

“It grows naturally? No way...”

“It’s hard to tell exactly what’s going on right now. There’s one more important thing to pay attention to. According to the information, the suspect is a missing person. When he was in his second year of high school, he disappeared mysteriously on the way home more than six years ago. During this period, no news about him was sent out, as if he had evaporated from the world.”

Xiao Hang was even more confused. “Why do I feel like I’m listening to a horrible story? A young man disappeared for no reason. Six years later, he suddenly appeared like a half-human half-monkey...”

“That’s why I think this case is very tricky!”

When team leader Pang and Xiao Hang were talking, he noticed that there was something wrong with the faces of Alex and Big Ken. He asked curiously, “Boss Cohen, brother Big Ken, I don’t think you are very surprised about this situation. Do you know something?”

“Well...” Alex hesitated and looked at Big Ken. “What do you think?”

Big Ken was also a little hesitant. After thinking for a while, he said to Group Leader Pang, “This case... To be exact, this suspect is beyond the jurisdiction of your City Public Security Bureau. Group Leader Pang, I suggest that you immediately send this situation to the special police team and listen to what they say first before making the next plan.”

“No...” Captain Pang waved his hand and said, “The special police team doesn’t handle cases. They only carry out special tasks!”

“The special police team really doesn’t handle cases, but... this suspect can only be dealt with by some people in the special police team. Maybe they don’t need your feedback, because they have already understood the situation. Group Leader Pang, I know you are very curious and may be very confused, but I can only say so much. You will know the other things when the time comes.”

Captain Pang and Xiao Hang stared at each other in confusion.

When Alex heard this, he knew that Big Ken was thinking about same thing with him.

That suspect was most likely not a normal person, but a mutant!

Super Son-In-Law Chapter 279 -

In addition to this man with long hair on his face, the last time Big Ken saw a mutant at the entrance of the restaurant, plus Yang Changhao, there might be some mutant or evolution who had not been discovered for the time being. In other words, it was very likely that a group of super masters would rush into the territory of Quill City at the same time!

Normally, not a single one of them would come, but now that so many came at once, something major was destined to happen in the near future!

How big was it?

It could be seen from Xiao Hang and Group Leader Pang's confused faces that they couldn't even control the city bureau!

When Alex analyzed all this, he suddenly became nervous. He always felt that the surging undercurrents had something to do with him...

Group Leader Pang was already very curious. After hearing what Big Ken had said, it was as if a cat's paw was scratching his heart, and his heart was itching even more. He realized that Big Ken didn't want to say anything because of some unknown reasons, so he knew that it was not appropriate to break the pot and ask. However, he couldn't resist his curiosity, and for a moment, he even blushed.

Captain Pang gritted his teeth and made up his mind. Just as he was about to shamelessly "reciting" Big Ken to answer his questions, his phone rang. When he saw that it was a call from his direct leader, the superior, he quickly got up and went to the window to pick it up. "Director Feng, do you have any instructions?"

A magnetic male voice came from the receiver. "From tomorrow on, you will continue to be responsible for the previous work. You don't have to worry about the case I handed over to you this morning!"

"What... what's going on? Director Feng, did I do something wrong?"

"If you make a mistake, how can I let you continue to be responsible for the previous work? This has nothing to do with you. Don't think too much about it. Do what you should do. Don't ask questions that you shouldn't ask. When it's time for you to know, someone will tell you. All right, let it go!"

"Please wait a minute!"

Group Leader Pang didn't have the habit of talking too much, but the situation this time was too special. He couldn't help glancing at Alex and Big Ken, and then he continued to say to the mobile phone, "Director Feng, was the case taken over by the special police team?"

"Hiss... how did you know?"

"I... I heard from a friend."

"Pang Shaohua, don't dawdle. Tell me the truth. Who told you that?"

"Director Feng, I..."

Captain Pang didn't expect Director Feng's reaction to be so big, and he suddenly regretted it. If he had known earlier, he wouldn't have mentioned it. He didn't know what was going on, and he was worried that Big Ken would get into trouble if he told the truth. He wasn't the one who betrayed his friends, let alone let them get into trouble because of him.

But in the face of the serious questioning of the leaders, it was not convenient to lie.

Just as Group Leader Pang was racking his brains to come up with a solution, Big Ken got up and walked over.

At this moment, Big Ken was listening to what Group Leader Pang had said. Big Ken didn't hear what Director Feng had said clearly, but his tone was heavy and his voice was loud. Big Ken heard it clearly. He guessed that Group Leader Pang was in a dilemma, so he pointed to the mobile phone next to Group Leader Pang's ear and immediately hooked his hand back. "Let me tell him."

"Ah?"

Group Leader Pang was a little confused, but he soon reacted. In the past, he only knew Big Ken under the recommendation of Director Feng. When he thought that the private relationship between Big Ken and Director Feng seemed to be very unusual, he immediately breathed a sigh of relief and quickly handed over the phone.

Big Ken didn't answer the phone. He just reached out his hand and pressed the speaker. Then he smiled and said to the phone, "Director Feng, long time no see. I'm Big Ken. Sorry, I didn't stop talking. I seemed to have said something I shouldn't have said to Group Leader Pang just now. Don't blame him. It's all my fault. I drank some wine today, and I didn't close the door..."

"So it's Brother Big Ken?"

On the other side, Director Feng's tone instantly softened. "I thought some secrets had been known by outsiders. If you said it, then there is no problem. The situation this time is a little special. Even if you don't say it, I will find a suitable opportunity to tell him. Because this time, it is very likely that the special police team and our city bureau will cooperate to handle the case. As the leader of the heavy case, if he doesn't know it at all, he can't participate in it."

"That's good, that's good... Director Feng, you can continue to talk. I won't waste your time talking about work."

"Okay! When I'm done with my work, let's drink together."

"No problem!"

Big Ken readily agreed and returned to his seat.

Captain Pang's "trouble" had been resolved and he had learned his lesson. He forcibly suppressed his curiosity and did not say much to Director Feng. After hanging up the phone, he did not force Big Ken. Anyway, according to Director Feng's words, his psychological doubts would soon be solved.

After dinner, the four of them came to the door of the restaurant and said goodbye to each other.

At the entrance of an alley dozens of meters away, someone was hiding in the dark, holding a high definition night camera and crazily pressing the shutter on their side...

Five minutes later, in a three-story building near an inconspicuous village in the suburbs, Yu Zhijie sat under the osmanthus tree in the yard, holding a cigarette in one hand and a mobile phone in the other. He looked at the photos of Alex, Xiao Hang, and Group Leader Pang saying goodbye to each other, with a cold smile on his face.

Sitting next to him, Yang Changhao took the mobile phone and enlarged several photos one by one. He looked at them carefully and suddenly his eyes lit up. "No wonder Alex is so arrogant. Not only did he offend so many businessmen, but he even dared to kill Jing Kun's men. It turns out that he has this kind of relationship! By the way, Big Ken must have attached himself to him because he took a fancy to his relationship. To put it bluntly, he and Big Ken are protecting each other and taking advantage of each other. However, is he too confident? Now he is so strict. Even if they are friends in private, they dare not provide him with protection, right?"

"You're wrong. For example, if you buy a house, no matter whether you can't live in it, others will know that you have a house. It's the same with connections. What's more, for a young man like Alex who has just graduated, it's already very good to have connections of this level. You should know that their identities are quite special. Not everyone can get along with them!"

“If other Alex’s opponents knew that he had this relationship, they might re-examine their conflict with him. But I know that this situation definitely can’t scare Young Master Yu. Now that we know what he’s relying on, in order to prevent too many things from happening, we should take action, right?”

“It’s indeed time to do something! If we continue to drag on, those idiots may make more trouble...”

Compared with Yu Zhe and Jared, Yu Zhijie was smarter. He would not seal himself and would not belittle his opponent. Instead, he would recognize and face his opponent’s strengths. However, although he was not a fool, he was not as smart as a crane standing among chickens. He knew little about Alexs, so he still made a mistake of “underestimating the enemy”.

Taking Alex as an ordinary businessman was the beginning of the mistake.

That was to say, from the very beginning, Yu Zhijie was the first to put the wrong label on Alex.

There was no possibility of corrected such a fundamental mistake unless there was a major discovery...

On the other side, Alex and Big Ken had returned to the car.

Big Ken started the car and said to Alex, “Young master, your situation is even more dangerous. The known mutants and evolutions may come for you. However, there is also good news. The mutant who was regarded as a master of martial arts by Group Leader Pang last night has already attracted the attention of the Special Operations Group.”

“I also thought of this possibility.” Alex nodded gently and said, “Brother Big Ken, do you think those mutants were sent by Jing Kun? There are many people who have a deep hatred for me, but few have the ability to find the mutant to help. Among them, the most likely one is Jing Kun!”

“It’s very likely! I just don’t know who is leading the team...”

“There are mutants now. It doesn’t matter who leads the team, does it?”

“It just so happens that it’s the opposite! They’re going to find a powerful character to lead the team because we’ve sent out a mutant. As for the reason... Young Master, you should be able to think of it, right?”

“Yes...”

Alex touched his chin and started to think. Suddenly, he patted his thigh and said, "I know! Although the mutant is powerful and should be able to finish the task easily in the eyes of Jing Kun, but... the mutant's brain is not easy to deal with, and they're very difficult to manage. So, the mutant must lead the team!"

Super Son-In-Law Chapter 280 -

Big Ken nodded with satisfaction. "Young master, your analysis is quite correct. A mutant is much more ferocious than a wild beast, and the degree of mutation is directly proportional to the decline of IQ and human nature. In short, the more powerful a mutant is, the harder it is to control his brain."

"I see!"

Alex's analysis obtained Big Ken's approval. He couldn't help but feel a bit complacent, and his thoughts immediately became cheerful. "Logically speaking, mutants should be hiding in the dark. Even if the mutant couldn't think of this, the leader would definitely know. Last night, the mutant leader should have been careless, neglecting his control, and only then did he come out and commit a crime, yet in the end, it immediately drew the attention of the Special Unit. It is no exaggeration to say that the Special Unit is the natural enemy of the mutant!"

"Yes. The mutant is an expert. Those who can control the mutant must be even more powerful. Because there is no way to reason with the mutant, the best way to control it is not to talk about the law and morality, but to subdue it! However... as far as I know, there is another way to control the mutant, which is to give the mutant a special medicine similar to a 'Calmer'. When you don't need it, lock it up and release it when you need it."

"He doesn't treat the mutant as a human! But then again, the mutant is indeed not a normal human."

"That's right! A mutation looks like a type of evolution as well, because their combat strength has clearly increased. However, in general, mutation is actually opposite to normal reproduction and evolution of humans. It can be said that it's precisely abnormal development or decline. There are people who have specialized in variation, believing that once a mutant underwent a high enough mutation, it would completely lose its human nature and intelligence. What's the difference between that and a wild beast and a monster? If it wasn't for this reason, the special operations group wouldn't have dealt with a single mutant, the creator, or the seller of mutated drugs."

Alex gently shook his head and sighed with emotion again. "Unfortunately, some people with evil intentions took a fancy to the abnormal fighting strength of the mutant. They secretly cultivated and roped in the mutant, controlled the deformed mutant in a deformed way, and used the abnormal ability of the mutant to earn deformed money! By the way, are those people sick? They don't care about anything for money?"

“Young master, if everyone has the correct values, then there is no need for police officers and law in this world! Just like what was said in a movie with a great fire, it is a luxury to keep everyone rational forever. It can be predicted that the struggle between an evolution organization like the Special Action Group and the mutant that shouldn't have appeared will last for a long time, until all of the mutant agents completely disappear from the earth. Perhaps, this is also a kind of extravagant hope...”

“It's understandable!”

As Alex spoke, he glanced at Big Ken intentionally or unintentionally.

The main reason was that he didn't expect that a rough man like Big Ken would have such a deep and delicate thought.

Just like Wendy, Big Ken could not help but be admired from the bottom of his heart, which made Alex a little anxious. He was in a hurry to unlock his potential so that he could have a good skill. Otherwise, he would be inferior to the bodyguards in all aspects. Even if no one laughed at him, he would feel embarrassed.

When Alex heard about this from Big Ken, he was full of expectation and curiosity.

But now, he couldn't wait any longer. Subconsciously, he turned his head and asked, “Brother Big Ken, you once said that when the time comes, I will find that I don't need to take medicine at all to become stronger. You also said that I am smarter than ordinary people? How long will it take?”

Big Ken shook his head. “I don't know. The general meaning that Master told me at that time is that the treasure house in your body is not designed in advance, but a very mysterious thing. It will not automatically open at the right time, but will only open when the opportunity comes.”

“An opportunity? What kind of opportunity?”

“I'm sorry, young master. I don't know about this either. According to my understanding, you should need to trigger some switch. Of course, the switch that can't be heard is also a very mysterious thing. Well... in other words, you can only open the treasury after you are stimulated to a certain extent.”

“Oh...”

Alex was a little disappointed when he got the mysterious answer from Big Ken.

Big Ken quickly comforted him, “Young master, there is no fixed amount of opportunities. It can only be found by chance. Don't worry. It's useless to worry about things that can't be interfered by others. After all, even the old master doesn't know how to open your treasure house, so he can only let nature take its course...”

“Okay, I see.”

Alex was very helpless. In order not to affect his mood, he wanted to force himself not to think about this matter.

However, the more powerful he was, the more anxious he became. He could only use another way—to divert his attention, such as playing with his mobile phone. He accidentally clicked on the call record. When he saw Ning Haohan’s number, he dialed it and learned about the progress of Ning Haohan’s acquisition of the shares of Grand Express Corporation.

Although Ning Haohan had only known Alex for a short time, his attitude toward Alex was very good.

In public, Alex was a cooperation partner. In private, Alex was the savior. Ning Haohan didn’t ignore these basic etiquettes because he was older than Alex. After reporting the progress of the progress to Alex truthfully, he talked about a private matter related to the plan. “President Cohen, today, Yu Zhijie came to find me under the recommendation of Liang Heng...”

“What?” Alex suddenly became nervous. “Why is Yu Zhijie looking for you? Is he looking for trouble with you?”

“Not yet, but it may happen in the future... Yu Zhijie knew that I was also buying shares of Grand Express Corporation and competing with him. He came to remind me and asked me to stop immediately. He said that if I stop now, the shares I have bought will be mine. If I continue, he will stop me and think of a way to take away the shares I have already bought. His attitude is very firm. He is not here to discuss it with me, but to give orders.”

“I see. Vice President Ning, what do you think?”

“It can be seen from my attitude that I have to stay in Grand Express Corporation even if I hide my illness from you. If I don’t get my share back, I won’t let it go easily. No matter who tries to stop me, it won’t work. Besides, I have reached a cooperation with you now. Even if I don’t do it for myself, I will do my best to do what I promised you. It’s not my character to give up halfway.”

“Vice president Ning, I’m very grateful and very touched that you can say that. However, Yu Zhijie is not an easy person to deal with. If you offend him, you will get into trouble. If you are hurt because of me, then I will have a big sin. How about... you rest for a while and continue after the limelight is over.”

“There’s no need for that, Mr. Cohen. I’ve been in the business world for decades and have experienced a lot. It’s not like I haven’t experienced this kind of situation. If a

young man could scare me with just a few words, I wouldn't need Gerald and Liang Heng to change their attitude. I wouldn't be able to bear it and give up."

"I see... Vice President Ning, let's do as you say. However, we still have to pay more attention and be careful."

At first, Alex wanted to find a way to solve Yu Zhijie's problem and remove the obstacles. Then, he could continue to buy shares, so as not to put Ning Haohan in danger. But he had made it clear that if he forcibly suspended the plan, he might think that he had underestimated him.

He knew that Ning Haohan was a man with strong principles, and he would not easily compromise when he made up his mind.

In order to take care of Ning Haohan's feelings, Alex did not say much. But in addition to reminding him to be more careful, he then called Xie Si and asked him to arrange a few brothers to secretly protect him. After the arrangement was done, he put this matter aside.

A few days passed in a flash, and Ning Haohan reached a deal with several small shareholders one after another.

It just so happened that Liang Heng had organized the board of directors, so Ning Haohan planned to carry out the joint management project at the meeting.

Yu Zhijie, who was also here for negotiation, was in no mood to hold a meeting when he learned that Ning Haohan had bought nearly 10% of the shares. He asked Yang Changhao to drag him to the lounge, closed the door, and asked with a gloomy face, "Ning, do you take my words seriously? Will you cry until you see the coffin?"
