

The Supreme God

Chapter 131 Celestial Energy Ginseng

After talking to Austin for a while, the girl wasn't as timid and shy as before. It seemed she was no longer scared of him. In her eyes, Austin didn't seem so serious now, either.

She stared at him, her eyes round like two saucers as she gnashed her teeth together. "You are awful! Why did you force me to stop just now? Do you know how dangerous it was? If I had died, my ghost would have followed you every day and everywhere, just to annoy you to death!"

Austin watched the girl carefully, his face turning grim.

"You cried out when things got dangerous. I know you didn't mean to kill anyone. But if I were a person without so much power, what would have happened? You wouldn't have been so lucky to find yourself safe and sound. Likely you would have been dismembered into small pieces by a sword."

Listening to Austin's dreary words, the girl grew frightened, her face turning red. She had no words to defend herself.

A moment later, she complained in a low voice, "But you shouldn't be so heartless either! People often say that we should help others when they're in trouble. You are so powerful that nothing can harm you, so even if I took advantage of it, you wouldn't get injured."

Austin was stunned, realizing that it would be difficult to win this argument.

The girl sniggered. "Okay, it doesn't matter now. I forgive you. Since we have both made mistakes, we can forgive each other. We're

innocent. Let's go back to the start. I didn't introduce myself. My name is Fanny."

'Innocent? I have saved your life!' Austin thought furiously.

He frowned. He was not convinced at all, but he didn't want to talk to this girl anymore.

"Well, I'm busy. I have to go now," he said, and then turned around to leave.

"Hey, are you going to fight for the celestial energy ginseng? Take me please!"

Austin ignored what she said and kept moving forward.

"Hey, you can't just go and leave me alone on this desolate mountain. If a cruel beast attacked me and ate me up, wouldn't you feel guilty?"

Seeing that Austin didn't stop to wait for her, Fanny shuffled behind Austin.

"Hey! I'm just a weak girl. I need someone to take care of me. You are so strong, but why are you being so mean? Are you so unwilling to protect me? What if the gang that attacked me came back?"

.....

day later, Austin arrived at the site where the celestial energy ginseng grew.

"So it is true! The celestial energy ginseng can absorb the life energy around it! It's no wonder the land around it is barren. There's no blade of grass in sight."

Hearing Fanny's words, Austin narrowed his eyes in curiosity.

"Do you mean to say there isn't grass on the land because the celestial energy ginseng has sucked out the life vitality around it? Is that why the land is so infertile?"

"Yes, of course! Where the celestial energy ginseng grows, the land is barren. It's like a wasteland, no other life exists on it. You didn't know that? How ignorant of you!"

Fanny raised her delicate face, her voice lilting as she replied smugly.

"The most valuable of nature's gifts are always so breathtaking and mysterious," Austin mumbled in awe.

"This celestial energy ginseng is seven hundred years old. After its ninth circle of light gathers, it will have unpredictable efficacy. The warriors of the Mysterious Realm can make great breakthroughs in their martial arts practice and get to higher levels of power if they consume the celestial energy ginseng."

Warriors of the Mysterious Realm were some of the most powerful people in the Violet Orchid Empire.

That was to say, if the warriors of the Mysterious Realm had knowledge about the celestial energy ginseng, they would surely come to fight for it.

However, outside of the Grand Desolation Mountain, these warriors weren't seen generally.

In the valley, the air filled up with a sweet fragrance that tickled the nostrils pleasantly.

It was a fruity aroma that rejuvenated those who smelled it. Something strange was contained in it that left a person wonderstruck, urging them to muse on it.

But none of the warriors around had the heart to think right now. They stared at the center of the valley with yearning in their eyes, their gazes unmoving as the celestial energy ginseng gathered its ninth circle of light.

The fruity fragrance alone lightened their spirits. Its efficacy was obvious. What would happen if someone finally got their hands on it? How lucky he or she would be!

As Austin inhaled the smell, tranquility dispersed through him from head to toe. "The celestial energy ginseng is inconceivably valuable," he muttered.

The heartening fragrance in the air was proof of how precious the ginseng was.

'What if I could get it?' he wondered, having set his heart on it.

His eyes were two burning flames of desire.

The Supreme God

Chapter 132 When The Strong Gather (Part One)

There were several hills of varying heights on all four sides of the valley where the celestial energy ginseng grew. And as far as the eye could see, there would be at least twenty hills standing around it.

News that the celestial energy ginseng was about to be fully ripe quickly spread to all the sects. As a result, about half of the hills were already occupied by those drawn to this mystical plant. Each person who had claimed a range set up camp and brought his people there to make that a temporary haven.

Every person there had the same objective: obtain the celestial energy ginseng. All the fighters on each hill looked at it with full attention for fear that the moment they took their eyes off it, they would lose their chance. It was now a waiting game for the time that it would ripen and open up. The fighters' eyes glowed hot with passion and yearning as bright as the celestial energy ginseng condensing its ninth aura.

It was an exciting thing to watch the ripening process of such a precious plant. The dazzling celestial energy ginseng captured the fancy of every person present.

So when Austin arrived, there was no warm reception for him. Instead, many people were alert and showed their disgust for him. The more the fighters, the more severe the competition, and the lesser the opportunities. No one wanted to give way to another when fighting for something precious. Some people even grumbled to show their loathing as they saw more and more people gathering around.

Everyone knew it would not be easy to defeat so many competitors to get that prized celestial energy ginseng. The odds of winning were low. But as much as it was quite unrealistic, they couldn't help being attracted by it and having a deep desire to earn it.

The best description of the condition was through the idiom, 'Bird dies in pursuit of food, and a man dies in his greediness for wealth.' The value of the celestial energy ginseng was so high that it could make any living soul on the Grand Desolation Mountain faint over it.

It went without saying that the news of the celestial energy ginseng would inevitably draw all fighters from everywhere to come and fight for it with all their might.

Frankly speaking, except for vigilance and disgust, every man felt nothing towards each other. Seeing Austin come and find his footing behind a big stone, the fighters who arrived ahead of him just glanced at him coldly before pulling their gazes back to the celestial energy ginseng.

use his spiritual sense, Austin studied all the fighters gathered in the area, and it hit him what challenges he

was not the only person concocting a plan to succeed. But win or not,

he saw there were quite a few fighters from level five or six of the Energy Gathering Realm who were on the hills surrounding the valley. These people were relatively inferior in strength, and all wished to win the celestial energy

you also want to take part in the fight for that celestial

Austin absently after seeing his gloomy expression.

"Are you kidding me? If not for that, why else would I be here?"

He was beginning to sulk because after his careful evaluation of the competition, he realized that compared to the other fighters, he didn't seem so exceptional.

Suddenly Fanny shrieked in terror, "Damn it!

Those bullies are here again." Quickly, she stepped behind Austin to keep herself from being seen.

A little shocked by Fanny's behavior, Austin looked ahead and saw a group of more than twenty people walking in his direction. But as they neared the valley, they stopped. After scouring the premises momentarily, they chose one of the smaller hills that remained

unoccupied and settled down. Like everyone else, they were there for the celestial energy ginseng and had no interest in Fanny.

A young man of sixteen, or perhaps seventeen, dressed in expensive luxurious clothes led this group.

His clothes were all purple and made of some pricey silky fabric that Austin had never tried on himself before. On his sleeves were etched five-claw golden dragons playing with fireballs. In some way, this was a manifestation of the man's superior social ranking. It was not only his clothes but also his movements and demeanor that gave the impression that he was likely a descendant of royal bloodline.

Besides, the people around him looked very subservient, thus making it apparent that he was the one in command, and they were all his men.

Without expectation, Austin recognized several of the men in the group, including the ones who chased after and bullied Fanny, and was scared away by Austin before.

Fortunately for Fanny and himself, they were standing in a relatively solitary spot with half of their bodies concealed by a huge stone, so it would not be easy for those men to catch sight of him. Besides, after those men's arrival, their attention had been on the celestial energy ginseng in the middle of the valley, so they hardly averted their sight from that.

The Supreme God

Chapter 133 When The Strong Gather (Part Two)

Three burly men of middle age stood next to the young leader. Austin noted that ever since he laid eyes on them, the three had stayed close to the young man. They were never too far from him, and their eyes

were on him at all times. While the rest of the men stood apart from the leader, these three were most likely his bodyguards.

Figuring out which realm these men were in wasn't all that hard after close observation. And it was quite surprising that all three men appeared to have the cultivation base above the vital energy Earth Realm.

Considering the young man had three exceptional bodyguards of the vital energy Earth Realm to protect him, Austin assumed he couldn't be someone just wealthy, but he probably had considerably strong backers to support him.

Austin thought that this young man must be holding a lot of grudges against himself as he killed some of his men although that never was his intent.

It was all about Fanny. Austin killed his men to protect the woman from danger. He never intended to offend anyone with his wealth and power and to get himself into trouble.

But it happened, and there was no way out of it. He had added a new name to his enemy list and got another person he had to pay attention to in case of danger.

Sighing helplessly, Austin glanced at Fanny, who had again brought a new form of danger to him.

Then his attention was diverted by a group of people standing on a rather big hill.

This hill, unlike all others, was filled with some strange, cold, and dark fog. The gray air loomed everywhere, making it impossible for outsiders to distinctly see what those people looked like and how they dressed.

But what was even more peculiar was Austin felt that he could not perceive the vitality of these people in the same way he previously sensed the others' in the surrounding hills. Unlike regular people, each

one seemed to have been smothered by corruption and death. They were like a walking corpse that had been manipulated by some unusual kind of force. Perhaps, it was because of fear, that no one went near them, and everyone kept them at arm's length.

fighters' strength, except for this group. They seemed to have developed some unique and dark cultivation methods, ones that Austin had never seen before, and which was

my way!" A gruff voice echoed in the valley.

attention. It took away Austin's concentration from the spooky men and had him turned around to check out

from the opposite direction. In the lead was a young man, probably about twenty years old. His body was muscular, his eyes sharp and arrogant, and he was quite rude. A huge blade hung from his waist, and it glowed like gold

aside from some weak and incompetent disciples, were capable fighters as well. They all perished challenging the mysterious group of people in the dark fog. They climbed the hill, attempted to take down

After several failed attempts, no one seemed to dare sneak up on that hill again. And the fog that encompassed the hill thickened further.

Nearly two hours had elapsed before the competition for the advantageous spot was finally over.

At this point, strength determined the fighter positions. The circle that enclosed the celestial energy ginseng was for the strongest warriors. Occupying the second circle was the less powerful fighters. Finally, those who were considered weak formed the outer circle.

Since Austin and Fanny stood quite a distance from the celestial energy ginseng, a not so ideal place, their position did not arouse much interest among the other fighters.

With the spot being so inferior, they hardly expected anyone would want to take over the position except for the two guys from level six of the Energy Gathering Realm.

They came to check if they stood any chance of occupying Austin and Fanny's spot. But as soon as they saw that Austin's vital energy force was level seven of the Energy Gathering Realm, they realized their inferiority and went off.

"Look! Here comes Frank of the Flaming Sun Valley," Fanny suddenly cried out, pointing to the sky.

As Austin glanced up, he saw three men gliding over the hill where he stood. One of them was good-looking, with a well-built figure. He hovered in between the two others and stared down the hill filled with fighters.

The Flaming Sun Valley was the second strongest sect in the entire Violet Orchid Empire.

And Frank was the famous and talented disciple among all disciples of the Flaming Sun Valley.

He was said to be quite powerful and experienced enough to confront Caden.

The Supreme God

Chapter 134 The Soul Collection Array

Frank was a talented disciple from the Flaming Sun Valley. On his arrival, the first thing he did was to occupy the nearest hill. Of course,

there was no resistance to the occupation. The cultivators on the hill hardly matched up to him and obediently left on his instructions.

When the hill was quiet, a melodious bell rang in the air, announcing the arrival of two mysterious figures that flew down as light and fast as swallows.

When they stepped down, you could make out a young man and a young woman. There was definitely something otherworldly about them. If you stared into their eyes, you would say they were neither old nor young but eternal.

The man was tall and handsome, and a long sword hung from his waist. His face bore no expression but was neither hard nor mean. It was tranquil like stream water. You could sense he was thinking something but on the surface, everything was peaceful.

The young woman's snow-white skin and long black hair marked her from the crowd. Such gorgeous looks enhanced by bright sparkling eyes, somewhat like the phoenix's, made the rest think of her as a princess.

There was an inexplicable aura to them. No one had to ever ask, all knew in their hearts, that the pair was different.

"They are Leo and Cynthia from the Peripatetic Sect. Their coming too, to the Grand Desolation Mountain is most unexpected," said someone.

The Peripatetic Sect was the most superior sect in the whole of Violet Orchid Empire. Its power outdistanced that of all other sects'.

Even the royal family of the Violet Orchid Empire showed respect to this sect.

For this reason, the Peripatetic Sect's disciples were highly regarded by the common folk.

Leo was not only the disciple of the Peripatetic Sect, but the best of the lot. It was said that his cultivation base had reached the medium stage of Earth Realm and he ranked seventh among the young generation of the Violet Orchid Empire.

Leo and Cynthia went directly to one of the hills near the celestial energy ginseng. There were several cultivators there and they had just conquered a place from the others through a battle. And now, looking at Leo and Cynthia coming over, they felt both angry and frustrated.

Glaring at the pair, their leader hesitated for a moment. He very well knew how strong these two people were. Finally, he gritted his teeth and withdrew with his gang.

They had better go away and find another place.

Soon, they took over another hill with violence. Their conquest was a little farther away from the one they had recently left.

This was exactly 'the big fish eat small fish and the small fish eat shrimps' world.

Austin was impressed by the celestial energy ginseng attracting so many cultivators.

It was norm for disciples of the five major sects of the Violet Orchid Empire to come here.

However, it seemed that Sun Sect and Joy Gang had no elite disciples present at the moment.

Marvin, Billy and Austin were from Sun Sect and in fact, ordinary. The strongest among them was only at level eight of the Energy Gathering Realm. There wasn't even a single man who had reached the Earth Realm of vital energy present.

The disciples of Joy Gang too were only at the Energy Gathering Realm as well. None of the core disciples had showed up this time.

But, there were many elites from the other three sects, i.e. the Peripatetic Sect, the Flaming Sun Valley and the Bloody Hero Gang. . .

"Look! The celestial energy ginseng is about to ripen," said one of the cultivators.

At once, everyone's eyes fixed on the celestial energy ginseng which was rooted at the center of the valley.

And like a shot, a strong colorful light sparkled from the celestial energy ginseng bathing the whole valley in its hypnotic luminous light. And with that, a thick fruity aroma wafted in the air.

Shaking her head, Fanny asserted.

"Are you serious? There are so many strong cultivators here. Can an
array stop all of us?"

Austin still didn't believe her.

"You are really a person of narrow view! Have you ever seen the world?"

Fanny taunted him annoyed.

"An excellent array has infinite power. With my own eyes, I once saw a villain who was at the medium stage of the Mysterious Realm trapped and killed by my grandpa's big array. Let alone the cultivators here. They are nothing in the face of such a strong array," she pouted.

She was angry at Austin for looking down upon her.

"Even a medium stage cultivator at the Mysterious Realm was trapped? It's incredible!"

Mouth agape with incredulity, Austin looked at Fanny in dismay.

The Mysterious Realm cultivator was very strong. So, could one imagine how powerful the big array should be?

And Fanny's grandfather was an expert if he could deploy such a skillful array.

In fact, Austin didn't doubt the authenticity of Fanny's words. He just felt that Fanny was childlike in her behavior.

'If this so-called Soul Collection Array is that powerful, when it is effected, even I can't run away from it.'

He felt nervous thinking this.

Somewhat unexpectedly, Fanny was calm. "Since you've said that all cultivators here and even you can't break this array, why aren't you worried?" wondered Austin. "As soon as the array starts, I'm afraid even you can't escape," he added.

When Fanny heard this, she immediately raised her beautiful face triumphantly.

"I can't break the array, but it also can't trap me. Are you afraid that you can't escape? Take it easy! I'll be kind enough to take you out," Fanny giggled.

"Can you really run away from the array?"

Looking at her delicate body, Austin was still worried. She was a weak girl anyway, how was she supposed to rescue him?

"You can rest assured that I will keep my promises. Leave that to me!"

Fanny patted herself expansively on the chest like a man.

Austin cast his eyes unconsciously at her chest.

He noticed that despite the girl being very young, her body was a woman's.

"What are you looking at? You pervert! You're peeping at places people shouldn't see."

Fanny folded her hands over her chest and her eyes filled with tears at once.

Austin looked away embarrassed. His expression was of extreme guilt, quite like a sugar daddy when caught by others when flirting with a young girl.

Fanny glared at his awkward look and snorted, "Just as my aunt used to say, all men are lecherous."

Austin was thunderstruck by her conclusion. 'How come little girls nowadays are so mature in their thoughts? She seems to know all things that she shouldn't know.'

The Supreme God

Chapter 135 Brawl

Austin and Fanny turned their eyes on the suspicious men in black when a light suddenly exploded from the ginseng plant and started to radiate all over the place.

The light shined so bright like the sun peaking its brightest at noon. In a blink of an eye, its rays scattered throughout the whole valley, making the cultivators avert their gaze from the intense and vivid radiance.

The beaming light separated the sky and the earth, creating a dream-like touch of heaven in between. Among the mountains were the shadows of living things. It was a scenario to behold, an otherworldly view that only lasted for a little while. In a matter of seconds, the luminous light vanished in thin air, leaving without a trace.

It took a while for everyone to react. When they were finally able to make sense of what happened, they quickly searched around and found a celestial energy ginseng at the heart of the valley, spangling under the sun. Its leaves and stem were coated with a pure ray of light that screamed divine.

It had now fully grown!

After a long silence, one of the cultivators let out a loud cry. All of them looked at the glistening plant with disbelief and excitement at the same time.

After a while, a long lasso appeared somewhere from the hill. It stretched long enough to cover the entire precious ginseng.

A devious cultivator controlled the rope that towered over the ginseng. He had planned for this in advance. He was ahead of the others, trying to take the crop before anyone else.

"How dare you!" the flock angrily shouted.

Just when the lasso was about to wrap the ginseng, a sword clicked and was followed by numerous attacks.

Unable to dodge a considerable amount of hits, the lasso was cut into dozens of segments with its pieces lying torn on the ground.

This attack came from a very skilled swordsman, Leo, who had mastered level-three sword intent.

He was strikingly adept, yes, but highly ambitious, just like that vicious cultivator. No one could lay a hand on the ginseng except him.

He did not stop attacking even when the rope was chopped to pieces. A strong surge of energy rushed from the edge of his blade and formed a huge sword, discharging towards the cultivator. The woeful cultivator was severely wounded with his blood spilling on the ground. He lay dead with his body fully tormented.

The others were shocked and dared not to move a single bit, afraid that they might be the next target.

With everyone shut and completely stunned, Leo and Cynthia advanced to the celestial energy ginseng.

Even with the great fright of the swordsman, the cultivators could not resist the temptation of the ginseng. In an uproar, they swarmed around the ginseng and mobbed it.

out of the array once it has been activated. Even

Austin recognized that the celestial energy ginseng was such a rare treasure, and he was sure as hell that he would not give it up to anyone.

Moreover, he had always overcome difficulties and advanced courageously. It is against his creed to run away from dangers.

'Damn it! Opportunities come with dangers! I don't think Fanny would risk her own life when she said she could get me out from the array. She must have meant it! Alright, let's do this then!'

Gritting between his teeth, Austin made up his mind.

He then turned to Fanny, and ordered, "Fanny, stay here and wait for me. Don't move an inch until I'm back!"

Fanny was filled with fear. The sight of blood and dead bodies scattered around the valley frightened her. She nodded to Austin and hid under a big stone.

Austin saw her frightened face and couldn't help but to smile at her. This girl was so timid. She should never run away from home alone. He needed to talk to her after this and persuade her to go home.

He then activated his Wind-commanding Skill and rushed to the center of the melee. For each step he took, he further distanced from Fanny and neared the fight.

'Violet, at my order, prepare to attack. And, whether it succeeds or not, as soon as I withdraw, you must follow me out.' Austin communicated with Violet in his mind.

'Yes, Master, '

Violet replied.

Austin's movement was fast and secretive. While all the people were in a brawl, he had waded his way into the fray.

He swiftly merged in the battle, pretending to make an attack.

In truth, he was discreet, step by step, advancing to the ginseng.

Two meters. One meter and a half. One meter...

In just seconds, he was only one meter away from the ginseng. Austin abruptly stopped moving to avoid any suspicions.

Ingeniously, he turned his back on the ginseng, still pretending to attack the other cultivators with an angry face.

With his front on the fight, his right hand was clasped behind his back. As his face formed a smirk, excited for his success, a ray of purple light illuminated from the tip of his finger towards the celestial energy ginseng.

With a blast of green smoke and a dim pink shadow, the purple light transformed into a small fox appearing over the ginseng.

It wrapped its paws around the celestial energy ginseng and held it tight.

The Supreme God

Chapter 136 The Red Blood Magical Python

Violet materialized from the Illusion Bead and pulled out the celestial energy ginseng. She got it in her hand.

"Damn! A fox took away the celestial energy ginseng!"

A warrior cried out in surprise as he saw the precious ginseng missing.

All warriors stopped the fight simultaneously. They looked at Violet who was in the center, still holding the celestial energy ginseng. A sudden deathly stillness arrested the place and no one dared even exhale.

A demonic beast!

In the Grand Desolation Mountain range, the warriors fought with demonic and diabolic beasts every day. They knew everything there was to know about them. Just by the breath, they could tell which beast it was. So of course, they all knew what she was as soon as they saw Violet for the first time.

Seeing a demonic beast among them wasn't a shock at all. They were now within the mountain range of the Grand Desolation Mountain where most demonic and diabolic beasts lived.

Till yesterday, rumor had it that the celestial energy ginseng was guarded by a level-four red blood magical python.

But since they came to this valley, most warriors hadn't seen a shadow of either beast.

So naturally they took it as a rumor and soon forgot all about it.

But now suddenly with a demonic fox popping out, everyone was stupefied. Wasn't it a level four red blood magical python that guarded the celestial energy ginseng? How come what they saw was a level three demonic fox? It seemed that someone had spread wrong information.

The strength of the level three demonic fox resembled the Earth Realm's power at its preliminary stage in the human world. She hadn't materialized until everyone was engaged in fighting. She fished in troubled waters and took away the celestial energy ginseng. Going by the legends, foxes were tricky in nature. And this one was no different.

After a short moment of silence, all the warriors regained composure and started fighting to the best of their abilities.

"Kill this demonic fox!"

its sinuous body,

level four red blood magical python!" someone

a level four red blood magical python guarding the celestial energy
ginseng.

The python had been there all the time, lying in wait until now.

It was said that the red blood magical python was not only horrible, the blood of sacred beasts of the ancient times coursed through its veins. This gave it almost magical powers. The python could evolve and even break through to the next level. When the right time came, it could even turn into a flood dragon, flying over clouds and controlling the very forces of nature. It was said that when it flew at the speed of thousands of miles in a jiffy, both heaven and earth trembled by the force.

If you considered strength, the level four red blood magical python's strength was equivalent to the human's medium stage of the Earth Realm. With its many physical advantages, a level four red blood magical python could even compete with a human at the premium stage of the Earth Realm.

This was why when the red blood magical python appeared, all warriors were dumbstruck. But now knowing what they faced, they gathered all their vital energy to readily defend themselves with complete strength.

The red blood magical python stared at the human warriors around it. Its huge pupils dilated with rage. It became thirsty to drink the warriors' blood. The truth was that it had been hiding underground right beneath the celestial energy ginseng before the warriors came. When the celestial energy ginseng made the breakthrough, spiritual energy from heaven and earth would be attracted to it. As they would gather around the celestial energy ginseng, the red blood magical python would take advantage to gain insights to advance like never before.

This time after the red blood magical python gained some insights through mediation, it woke up to discover droves of human warriors fighting each other and scrambling for the celestial energy ginseng. And at last the celestial energy ginseng was taken away by someone else.

The red blood magical python had been guarding the celestial energy ginseng when all of this happened. It had already taken the plant as its own. So, how could it let anyone steal it?

The red blood magical python rushed out, ready to take the celestial energy ginseng back.

After devouring the two warriors, the red blood magical python focused its enormous bloody red eyes firmly on the celestial energy ginseng and saw Violet holding it to her chest. This made the python angrier. It flicked its tongue in and out rapidly, hissing in fury.

A big bang rang through the earth and the heavens, making all birds flee to escape. An ominous tremble shook the ground with great force again.

Dirt flew in all directions and rocks collided as the two hundred feet long body of the red blood magical python soared up in the air. In mid-air, it opened its bloody mouth and the colossal body came crashing down at Violet.

The huge body of the python was blood-red all over, as if it had just bathed in the Sura blood sea. There were red scales densely scattered on the surface of its skin, reflecting cold blood-red light. The sinister light tingled the spines of all the warriors.

Seeing that the target of the red blood magical python was the demonic fox who had just taken away the celestial energy ginseng, the warriors retreated to the sides and fixed their eyes on the two beasts and the fight they would get embroiled in. They secretly hoped that both the beasts when weakened by the fight would give them the perfect opportunity to ravage the spoils of victory without lifting as much as a finger.

To their surprise, the demonic fox just stood there, her right claw grasping the celestial energy ginseng that was emitting nine halos in the color of the rainbow. She just stared at the huge mouth that was

coming down to gobble her, but Violet didn't seem to react at all. She stood still, as if frozen.

Was the demonic fox stupefied by the momentum of the red blood magical python?

However, an elegant smile came on Austin's lips. He managed to hold the smile back and put his Wind-commanding Skill to use. Then he quietly left the site as quickly as he could.

The Supreme God

Chapter 137 The Obtaining of Celestial Energy Ginseng

In a blink of an eye, the red blood magical python widened its gigantic mouth and headed to the demon fox that was holding the celestial energy ginseng. The wind howled and a mass of rocks were tossed as it rushed towards the demon fox.

Everyone stopped, and watched the little demon fox that seemed paralyzed as it was not making any move.

The red blood magical python drove itself in front of the demon fox. Compared to its monstrous head, the demon fox looked nothing and as if the python could swallow it in just a second.

Quickly, the python stuck out its fork-like tongue and swiftly hit the demon fox.

Then a low explosive sound was heard.

Everyone saw the body of the demon fox burst like a bubble and scatter as violet specks of dust. They soared around, like innumerable fireflies rejoicing in the air.

The cultivators didn't see any internal organ nor witness even a slight bleeding as if the demon fox was not composed of blood and flesh.

"Illusion!"

The demon fox is not real! What we saw is just an illusion image!"

The Earth Realm cultivators screamed in surprise. Being experienced as they were, they knew that the fox was not made of blood and flesh.

As it missed its target, the red blood magical python seemed to know that it was tricked on. It raised its big head high above the ground, opened its big and diamond-shaped eyes while looking for the demon fox, but all it found was just the cultivators.

Everyone was in chaos when they realized that the demon fox had run away.

It was for the celestial energy ginseng that they fought for so long and suddenly, the ginseng just had been taken away by the demon fox that disappeared and left an illusion.

The cultivators could not accept what they had just witnessed.

"Let's go and look for it! Damn it! I'll chop that demon fox into pieces once I find it!" someone shouted.

As the crowd buzzing in anger, high rank cultivators such as Leo of Peripatetic Sect and Frank of Flaming Sun Valley joined them to chase the demon fox too.

All of a sudden, the red blood magical python roared loudly in anger.

battle between the python and the cultivators, Austin suddenly appeared to her

"Why are you back so quickly? I thought you were looking for the little demon fox. Don't you want the celestial energy ginseng?" Fanny asked.

Fanny had been paying attention to what was going on, so she knew that the demon fox had got the celestial energy ginseng.

But she never thought that the demon fox was staying in Austin's space ring.

"Leave it alone. It's dangerous here. Come on!"

He took Fanny by the arm and together, they left immediately.

"Hey! What are you doing? Let go of me! Don't you know it's improper to touch a girl's body?"

Fanny shouted angrily.

Austin did not seem to listen and took a few more strides. They finally reached the outskirts of the valley.

.....

In the outermost ring of the valley, scattered more than twenty people in black. Two men who seemed to be leaders of them stood side by side while looking at the center of the valley, where the battle between the cultivators and the python taking place.

"Tomb owner No. 30, when do you think we should start the Soul Collection Array?"

one of them asked.

"Let's wait for a little longer. The red blood magical python is powerful. Although it's no match for the cultivators, it will consume a lot of their energy in the battle. When the cultivators were exhausted, it will be the best time for us to start the array," the other man said slowly.

"That makes sense," he responded.

"Being able to take the celestial energy ginseng away under the gaze of the crowd, that demon fox is really no ordinary! However, since we have been guarding around the valley and arranged the array for such a long time, why haven't we seen the demon fox so far? Normally, if the demon fox had escaped, we should have found it," the other man said.

"I guess the demon fox is still in the valley. It's impossible for it to easily break through the Soul Collection Array. Fox is good at hiding. Maybe it is hiding somewhere in the valley and waiting for a chance to escape. Once we initiate the Soul Collection Array, there will be no

place for it to hide. Soon, we will get the celestial energy ginseng," he answered.

Hearing that, the man nodded in agreement.

Suddenly, a man in black rushed over.

"Your graces, two cultivators are heading toward us!"

The Supreme God

Chapter 138 Soul Chasing Sticks

The two tomb owners who were on guard on the outermost part of the valley immediately noticed Austin dashing out as their men reported to them that two cultivators were rushing towards the valley.

"Look at how fast he moves! He's like a lightning bolt spearing to the ground."

one of the tomb owners gasped.

"Hmm, look how his vital energy dissipates around him. It is obvious that this guy has only reached the seventh level of Energy Gathering Realm. But it's such a rare sight that someone of his level can travel at such high speed."

"Go and ask two or three men to take his soul."

"Yes, sir!"

A man in black replied. As soon as he responded, he immediately rushed towards Austin with three men on his heels.

Although both tomb owners were amazed by Austin's swiftness, he was still only a seventh level fighter of Energy Gathering Realm. They

arrogantly believed that three or four men were enough to take care of him.

... ..

Carrying Fanny in his arms, Austin effortlessly glided as he was flying, rushing towards the outside of the valley.

His arms were strong enough to carry even a half ton heavy object. Since Fanny was so thin, carrying her was a breeze for him.

Fanny was stunned as well by Austin's capability to move so swiftly. She was still able to follow Austin closely as they made their way to this Valley of celestial energy ginseng. She was secretly gloating with the fact that Austin didn't have the ability to throw her off even if he wanted to.

Now, she could still feel Austin's swift pace. It suddenly dawned on her that Austin hadn't moved fast last time. Rather, he had intentionally slowed down so that she could easily follow him all the way to this valley.

Fanny had finally realized that it would be totally impossible for her to catch up with Austin when he started moving in full speed.

This news had Fanny gritting her teeth. She felt upset, but was definitely convinced by Austin's strength.

But what annoyed her was the fact that Austin deliberately slowed down his pace just for her. She had even felt complacent and proud the entire time because she was able to follow closely behind Austin.

On the other hand, she was impressed with Austin's amazing fighting power. Based on the dispersion of Austin's vital energy, she could clearly identify that he was at the same level as her, a seventh level fighter of the Energy Gathering Realm. However, Austin was capable of slaying cultivators at the sixth, seventh, and even eighth level of the Energy Gathering Realm easily like killing dogs and chickens.

Austin had also mastered multiple bodily movement skills. 'What kind of monster was this guy?' Fanny thought.

While Austin was still running, four men in black emerged out of the blue and converged towards him. Apparently, those men were about to stop him from his path.

'Who the hell were these mysterious men? They even deployed a large array in order to kill cultivators and collect their souls.'

himself, a hint of sarcasm was reflected as a twitch appeared in the
corner of his mouth.

An idea suddenly popped up in his mind. He then used his spiritual
sense flying needle, which

instantly attacked the brain of the man in black who stood on the left.
The man immediately felt unimaginable pain shot through his brain,
causing him to scream out loud in pain.

When he came to his senses, he only saw a streak of red light flashing
in front of him before his head was severed from his body. Blood shot
out of his body.

The man on the right was overwhelmed by grief and terror as he saw
Austin executing his remaining companion with one strike.

"This is not happening! How is it possible that you are not suppressed
by our soul chasing sticks at all?"

The last man exclaimed in astonishment.

Soul chasing sticks?

Austin found out that their weapons were actually soul chasing sticks.

The big array deployed by these men was called Soul Collection Array and the weapons these men used for soul collection were known as soul chasing sticks. The men in black even planned to collect cultivators' souls. So these men were skilled in soul collecting.

Soul, namely the spiritual soul left after one's death, was a type of relatively peculiar energy in the universe. It could preserve all of one's existence such as memories and emotions after his or her death. In other words, it was another form of existence after one's death.

Souls, simply put, are ghosts, which is a more common interpretation of people.

However, they couldn't be preserved for ever in the universe, because they were not supported by bodies. Their energy would gradually grow weaker as time passed by. Eventually, the souls fully dissipated and left the universe.

Austin had no idea why these men were collecting souls.

But instead of pondering over this revelation, Austin released another spiritual sense flying needle, which intruded the man's brain. He then wielded his Negative Shadow Blade, finally putting an end to the man's life.

While he was fighting with men in black, Austin left Fanny somewhere away from the fighting. After he finished them off, Austin went to Fanny and pulled her closer to him.

Fanny was only 16 years old. Apart from her grandfather, no other man had ever dared to touch her body while she grew up.

But so far, Austin had touched her over and over again. The thought annoyed and embarrassed Fanny, turning her cheeks pink.

However, under the current situation, it was better if she didn't make any fuss.

"Fanny, have these men successfully deployed the array?"

Fanny replied after thinking for a few moments, "Yes, the energy within the valley has been more or less controlled. They have successfully deployed the array."

"Then, how do we escape from the array?"

"Hmm, this array is rather impressive. But there is a weak point in the northeast side. We can easily escape through that side."

Austin adopted his bodily movement skill as soon as he heard what Fanny had deduced and flew towards the northeast side with rocket-like speed.

The Supreme God

Chapter 139 Start To Break Through The Array

Austin rushed to the northeast part of the array with Fanny.

A few minutes later, Fanny warned Austin, "Slow down, we are at the boundary point of the array now. One more step forward and we will be under attack."

Fanny's warning made Austin stop him in his tracks.

Sensing his surroundings through his superior spiritual abilities, Austin became aware of some differences. Something was certainly odd around them.

So Austin began to survey his environment. There were some stones and trees out in the front, nothing out of the ordinary that looked suspicious.

"Look there, there is something waving and twisting. That is the form of the array's energy."

Austin looked to where Fanny pointed. As Fanny had said, right in front of them, towards the left hand corner, something was contorted as waves came out of it. 'Thank god for Fanny, or else I wouldn't have noticed this in the slightest, ' thought Austin, 'Arrays were awe-inspiring just to look at.'

"How should we break through it?"

Austin straight away asked the most direct question possible. He didn't want to waste the limited time they had.

"Look at that row of trees, surrounded by the thorn bush. There are six trees in the center of the grassy patch, but none of them are real. Actually, they are the base of the array.

Once we successfully cut down these trees, we could break through the array."

Austin didn't tarry and he summoned his Twin Shadow Blades to strike the six trees down in a trice. As their trunks were just as thick as a large bowl in width, this shouldn't take too long.

But before the Twin Shadow Blades could hit the trees, something in the array got disturbed.

All at once, the sky was as dark as the night. Overcast with innumerable clouds, it was as if a black blanket had been thrown over them.

As Austin and Fanny glanced at the mysterious twisted contortion, thick black fog clouded their eyes and in fact, the whole area. Though none could see, but balls that burst into smog were tossed high into air.

It was as if a land of haze had appeared mysteriously that was getting faintly lit up. The light's source was illusory souls with red eyes who poured in from the skies and land and screeched sadly and shrilly, giving goosebumps to anyone who could hear.

The souls cried in a low droning voice and lunged at the Twin Shadow Blades to stop it in its flight path and prevent the falling of the six important trees.

turned into a

The vital energy had the desired effect.

Austin felt triumphant on the inside.

Austin had been thinking how to deal with these souls and then it struck him that they were fundamentally evil.

While learning the Golden Sun Scripture in the last few days, in fact in the introduction to the Scripture on the very first page itself, it said that the Golden Sun Scripture was masculine.

Logically, anything masculine could suppress most evil things. Going by that logic, Austin summoned the vital energy and tasted success!

Austin began to gather more vital energy in the palms of his hands and attacked the souls by his left hand and right hand alternately. Just like before, the souls howled in pain and disappeared.

At the same time, the Twin Shadow Blades continued to cut the six trees. Since they were the most superior spiritual weapon there ever was, they were regarded formidable.

Austin was just at the seventh grade of the Energy Gathering Realm now, which is why he didn't put the Twin Shadow Blades in full force.

Regardless, the Twin Shadow Blades were slicing the enormously thick trees in a brief time.

When the two trees were cut down, two small black flags appeared in their place.

Seeing this, Fanny, who followed Austin closely, got quite excited. She rushed to pick them up, jubilant as if they had hit the jackpot.

The two tomb owners immediately knew what had happened when the two trees were cut down and the black flags were picked up. After all, they were the arrangers of the Soul Collection Array. Glancing in the direction of the trees, they saw Austin as the source of this distress.

"We are in a bad way now. It was those two warriors. The four men we sent have turned out to be completely useless. How could they fail to defeat these two warriors who are just at the seventh grade of the Energy Gathering Realm?"

The two tomb owners had arranged four of their subordinates to intercept Austin and Fanny. As Austin's and Fanny's cultivation bases

were weak, the two tomb owners believed that their four subordinates should have definitely captured the duo and collected the souls.

This was also why the tomb owners hadn't paid much attention to the array.

Instead, they had focused their energies on the center of the valley, where the red blood magical python was fighting with many warriors.

Scads of warriors had managed to bring the red blood magical python at the gate of death. It was about to be dismembered.

The two tomb owners still ordered some subordinates to pay attention to what was going on in the valley. They were waiting for the red blood magical python to get killed, so that they could immediately set the Soul Collection Array in motion.

This was why no one noticed Austin killing the four black men who wanted to stop him and Fanny. Then, Austin went north and started to break through the array. The black men's hubris lied in looking down upon Austin and not knowing his strengths fully.

The Supreme God

Chapter 140 Breaking The Array

That punk is breaking the array! How did he know where the weakness of the array was?

one of the tomb owners hollered in disbelief.

Austin's Twin Shadow Blades struck a tree, and it created a loud smack. As soon as the tree was cut in half, it turned into a little black flag. Fanny, who was waiting for this moment, jumped towards the flag and grabbed it.

"How about we activate the array and attack that rascal now?"

"No need for that. He has just reached level seven of the Energy Gathering Realm. You take in charge of this array. Activate the array when the red blood magical python dies," explained a tomb owner. He rushed to the northeast corner, followed by five men in black.

"Austin! Those men in black found out we were breaking the array. They want to stop us," Fanny anxiously reminded.

Austin turned his gaze around the area, and saw the tomb owner approaching him with five men in black. He had seen this tomb owner with his spiritual sense before.

Taking the lead was the tomb owner, nearing as quick as a flash of lightning. Austin guessed he had reached the Earth Realm at least when he saw how calm and collected he was when approaching.

The foundation of the array consisted of six trees, three of which had been cut off. Austin planned to cut off the remaining trees to break the array, and he knew it would not be an easy task.

He needed to seize every minute and second, as the tomb owner would arrive at any minute.

Worse, the souls which had been attacking Austin and Fanny seemed to have found out that Austin's pale golden vital energy could harm them. They decided to stop attacking the two.

They changed their target and began to attack the Twin Shadow Blades, which were pouring their all in destroying the remaining trees of the array. Affected by the countless souls, the Twin Shadow Blades were encased by black spider webs, unable to cause damage to the trees anymore.

Austin was filled with rage at the sight of this. Frowning and with no choice left, he recalled the Twin Shadow Blades and strode towards the trees. He threw a punch on the trunk, and the tree rocked in agitation. But to Austin's dismay, it did not break.

He didn't expect the foundation of the array to be this sturdy and stable. He could lift 1,000 pounds with one hand, yet he was unable to break the tree with his fist. 'This array is truly remarkable!' he exulted in admiration.

No wonder it took the Twin Shadow Blades, a high-grade spiritual weapon, a while to cut off three trees. Austin admitted that he was not able to maximize its power due to the little cultivation base of vital energy he acquired. But then again, no one must belittle the power of the weapon exerted by a martial artist at level seven of the Energy Gathering Realm.

If it were any ordinary tree, Austin could have smashed it into pieces with only one punch.

Since a mere punch had evidently no effect, Austin threw more punches on the trunk one after another. After four blows, the tree finally broke. As the dark mist exploded, the tree turned into a black stick.

souls disregarded Austin's pale golden vital energy, and flung themselves at him with bared fangs, like a pack of wolves hungry

raucous cries would have made anyone perplexed in aggravation. Their throat would, without a doubt, swell with those shrills. Indeed, the howls

just arrived, and could only helplessly watch Austin escape

of breaking the Soul Collection Array. He couldn't believe that a mere brat who was at level seven of

such a short

began to magnify all his vital energy force. Instantly,

and the ghost claw was one

was called the

giant black ghost claw came down from the sky and went after Austin.

Austin could sense the tremendous force of the ghost claw, and knew he had to take it seriously. Immediately, he summoned forth the Twin Shadow Blades, which flew at the ghost claw.

Actually, Austin had a martial arts skill which he thought could fight with the ghost claw.

It was the Grand Pagoda Summoning Skill. Although it was a powerful skill that could defeat the claw, it would take time to fully form the Grand Pagoda.

What was more, 70 percent of his vital energy must be extracted to use it. He wouldn't use the Grand Pagoda Summoning Skill unless he was in the gravest danger. He must not utilize this ultimate skill right now.

The Twin Shadow Blades controlled by his mind was already a sufficient attacking mode which was hard to deal with. And using it would not require much of his vital energy.

The Twin Shadow Blades would always be his first choice in dealing with enemies.

In midair, the Twin Shadow Blades and the ghost claw fiercely clashed, creating shock waves that spread around.

Apparently, the Twin Shadow Blades were no match for the ghost claw. The two sides had been deadlocked for a while, and then the Twin Shadow Blades sprang back. Austin immediately retrieved them back into his body.

Meanwhile, the ghost claw faded and became more and more transparent. It flew towards Austin and after a short distance, disappeared. It was apparent that the tomb owner's vital energy to support the ghost claw had been used up.

After taking back the Twin Shadow Blades, Austin wasted no time and ran away as quickly as he could.

"It's a high-grade spiritual weapon!"

the tomb owner exclaimed in surprise.

He had been stuck at the preliminary stage of Earth Realm for several years. In his peak condition, he was about to make a breakthrough and reach the medium stage of Earth Realm.

The brat was only at level seven of Energy Gathering Realm, yet he managed to survive from his martial arts skill attack with his high-grade spiritual weapon.

It said a lot about how powerful a high-grade spiritual weapon could be.

The tomb owner himself only had a low-grade spiritual weapon which was certainly no match for Austin's.

At this thought, greed began to surface on his face as he made up his mind to kill the brat and steal his weapon.

"Ha! You won't be able to get away. Spiritual Chain!"

The tomb owner snorted as he watched Austin's receding figure. His eyes were painted with a dark and dangerous glow.
