

SWALLOWED 1111

Chapter 1111: The Power of One Blade Attack

Zha Wei Horde Leader, Thousand Shadow Knight, Sky Flower Knight, and Luo Feng had surrounded that godly hammer with their godly power. When that blue hammer showed up, all of them wanted to penetrate their godly power to make it recognize them as its master. However, none of them succeeded because of what happened with Seal Star. The sealing life imprint could not be disturbed.

"Another asshole!" Sky Flower Knight roared. "Scram!"

"Don't think about it!" said Thousand Shadow Knight and moved all his 1,000 phantoms toward Sky Flower Knight, trying to stop him.

"Break!"

Sky Flower Knight waved his godly hammer and smashed all the phantoms. Those phantoms were actually flying blades with engravings on all of them. Law threads started to connect with each other, and the 1,000 blades became one. Although each of the flying blades was only a treasure, all of them combined made a senior true treasure!

Hua!

Luo Feng duplicated himself as well. One of them was a fiery towering being transformed from Moshu body while the other was the real Luo Feng, who broke out of a world ring. Luo Feng had 10,000 world rings like that; after all, world energies were useless when it came to actual fighting, and the best way to show up was to break out of a world ring. To Luo Feng, breaking out of a world ring could smash the sky and land.

Hong! Long! Long!

Golden waves began tumbling and covered the vast forest. Zha Wei Horde Leader, Thousand Shadow Knight, and Sky Flower Knight were all affected by the resistance from the golden river, which sharply slowed them down. The nine strange beasts were surrounding the godly hammer in the boundless golden river.

All was silent! Sky Flower Knight, Zha Wei Horde Leader, and Thousand Shadow Knight all stopped. The 30 universe knights of other races were all looking down, dazed. They thought the four great beings might fight each other to the death, but they hadn't expected one of them to have a domain type true treasure.

"That is..."

"Nine Tiger River!"

"It's Nine Tiger River! Luo Feng's Nine Tiger River!"

"The domain type true treasure, Nine Tiger River! Luo Feng's here!"

All the universe knights of other races were shocked.

A silver-armored and silver-winged youngster was walking on the golden waves. It was the human, Luo Feng!

"Luo Feng!"

"It's Luo Feng!"

Sky Flower Knight, Zha Wei Horde Leader, and Thousand Shadow Knight were all dazed. They never would have expected the legendary Luo Feng to come and take advantage in the end.

The waves were churning. The nine strange beasts surrounded the godly hammer and delivered it to Luo Feng. He took the godly hammer, and Mosha body went back to the world ring.

"You fought so hard, but sorry," said Luo Feng. "I'll take the true treasure."

Luo Feng's godly body isolated himself from all the godly power outside and easily made the godly hammer recognize him as its master.

"Quick, let's go!"

"Let's go!"

"It's Luo Feng. We'll die if we don't leave soon enough!"

All the great beings of other races started to flee.

Even Thousand Shadow Knight and Zha Wei Horde Leader exchanged panic-stricken eye contact. Luo Feng was too famous, and he had killed universe overlords before! Several universe overlords had died at his hands. Lives always came first. They both broke out of the waves and flew away.

The moment Luo Feng showed himself, all the universe knights, including the two universe overlords, flew away. And only that top-tier universe overlord Sky Flower Knight was still glaring at Luo Feng in the waves.

"Human Luo Feng!" Sky Flower Knight roared. "You dare to show up on the original stars!"

"Why not?" Luo Feng chuckled in the waves. He knew that Sky Flower knight and other races would report to the powers behind them once he showed up. However, it was all part of his plan. "Wonderful."

Sky Flower bent, and the sole red eye under the snowy hair looked madder. "Perhaps they're afraid of you, but I'm not! You're a joke to me!"

Indeed, he didn't fear Luo Feng at all. He had a life gene level of 2,000 times. And also... he had a much larger godly body than Luo Feng and a great advantage even if they were at a stalemate.

"A joke?" Luo Feng grabbed the handle of the Blood Ghost Blade on his back. He strolled over with the blade. "I've killed universe overlords before, but I've never killed a top-tier universe overlord! I heard that even universe masters find it difficult to kill top-tier universe overlords. I want to try."

"You want to kill me?" Sky Flower Knight's eye went wide, as if he just heard the greatest joke in his life.

Luo Feng nodded, and his voice resounded. "Yes, I want to kill you."

The universe knights of other races who had flown out of Nine Tiger River were all watching from a distance. They didn't need to be afraid of Luo Feng as long as they were far enough from him. They wouldn't miss a fight between two top-tier universe overlords.

All of them were startled when they heard what Luo Feng said.

"Haha! What a joke!" roared Sky Flower Knight. "Even universe masters can't guarantee to kill me, let alone you! Luo Feng! I'll let show you how powerful a top-tier universe overlord actually is!"

Sky Flower Knight dashed at Luo Feng with a godly hammer in each of his hands.

Luo Feng held the Blood Ghost Blade and smiled.

All the universe knights of other races were watching the fight closely. They got close to each other quickly. 60,000 miles, 30,000 miles...

He!

Suddenly, Luo Feng stopped smiling. Instead, his eyes started to glint ferociously like an actual beast god. He shot forward like lightning. He lost his calmness and exploded like a volcano. He was much more forceful than his opposition!

The godly hammer and Blood Ghost Blade hit one another.

Hong! Long!

Luo Feng backed down three steps, while Sky Flower Knight bounced away, yet he turned around in the sky and stopped.

"No wonder you were able to kill a universe overlord," said Sky Flower Knight. "You're indeed more powerful than me! But not by much! You can't even completely suppress me!"

Sky Flower Knight had expected Luo Feng to be a bit more powerful than him. After all, Luo Feng could easily kill a universe overlord, which was something he found difficult to do. Yet Sky Flower Knight now determined that Luo Feng was only slightly stronger than him.

"Really?" said Luo Feng.

He held the Blood Ghost Blade in his hand and walked toward Sky Flower Knight on the waves. He had only performed the ultimate technique of a universe overlord, "Level Mountain," and it was as powerful as the technique Sky Flower Knight had.

"Haha! I'll see how long your godly body can last!" Sky Flower Knight took large steps forward, and the space was trembling.

Luo Feng's eyes glinted coldly. He was just warming himself up, trying to test the power of Sky Flower Knight. He concluded that he wouldn't be able to kill Sky Flower Knight in short time if he used Golden Mountain and Golden River. He had to perform the ultimate technique of universe masters: Golden Light!

All the universe knights were watching the fight.

Zha Wei Horde Leader said, "Top-tier universe overlords are not only skilled; they have strong godly bodies too. Luo Feng can only be at a slight advantage. If they keep fighting, the human Luo Feng might actually..."

Suddenly, he was dazed.

All the 30-something universe knights who were talking quietly were dazed. Below them, a golden light shone—a gleaming golden glow! Sharp and cold!

Peng!

The godly hammer Sky Flower knight was wielding fell on his own body under the attack from the blade. The force from the blade's attack hit the senior true treasure armor and reached the limit of the armor. Sky Flower Knight could hear the humming from the armor.

"How...?" Sky Flower Knight's eyes glinted with shock and fear.

Hong! Long! Long!

Sky Flower Knight bounced back. He was powerless under that shock wave.

"11 percent gone?" he gasped. "How? Is he a universe master? Is he a universe master already?"

Sky Flower Knight was shocked to his very core. His godly body was almost 60,000 miles tall! Yet one attack took away 11 percent of his godly body. This was something that could only be accomplished by universe masters!

Luo Feng had needed two attacks to kill Para-chopper Knight. Sky Flower Knight had a senior true treasure armor, but his godly power he was 20 times more powerful than Para-chopper Knight's!

However, Luo Feng's godly power had become 100 times more powerful after becoming a universe knight! And the weapon he used had changed from Cutting Pearl Blade to a top-tier true treasure weapon, Blood Ghost Blade. Hence, a senior true treasure armor was significantly weaker.

One attack consumed 11 percent of his godly body.

Meanwhile, all the universe knights could sense that the force of Sky Flower Knight had weakened by at least by 10 percent!

"One attack consumed 10 percent of a top-tier universe overlord's body?"

They were all stupefied. This was something only universe masters were capable of doing!

Chapter 1112: When the Wind Blows

When two beings of comparable powers were pitted against one another, the rebound force during a head-on confrontation would normally cause Luo Feng to reduce speed or fall backward. Yet, at that very moment, the difference was extreme!

Luo Feng was using his ultimate technique of a universe master level as though he was truly a universe master. After one strike, he was hot on Sky Flower Knight's heels right away, dealing another strike to the godly body of his opponent, which was already thrown a distance away!

Not good, thought Sky Flower Knight. One strike after the another, in nine strikes, I will be completely annihilated.

Sky Flower Knight no longer had the time to feel shocked over the fact that Luo Feng had become a universe master. To him, the utmost concern at the moment was escaping for dear life.

"White needle!"

Right behind Sky Flower Knight, a huge, white, shuttle-shaped object suddenly appeared. It was approximately 600 miles long, all white, and was extremely shiny and smooth. It took the shape of a shuttle, and once it appeared, it flew straight toward Sky Flower Knight, who happened to accelerate in the direction of the shuttle-shaped object upon receiving a second strike from Luo Feng. He immediately aimed for the entrance and inserted himself into the white shuttle-shaped object. After entering the flying shuttle, Sky Flower Knight heaved a sigh of relief.

"I was almost killed by Luo Feng," he said. Sky Flower Knight's blood-red eye behind his snow-white hair was filled with trepidation. "Too powerful! When Luo Feng first started using his power, it was only a fragment of his full power. He is holding back on what he truly is capable of! Thereafter, that explosive display of power... It was totally on the level of a universe master!"

"Scheming!" continued Sky Flower Knight. "He is so scheming! That one strike... It was so fast I didn't have time to dodge, so strong I didn't have the power to ward off, and so mysterious that it was unfathomable. I shall never be able to comprehend it. This is the technique of a universe master, and I'm afraid it might be the ultimate technique of a universe master. Only a universe master will be capable of creating such a technique, and only a universe master is capable of injuring me! This Luo Feng must have become a universe master and kept it under wraps!"

Sky Flower Knight was anxious yet getting emotional.

"Luckily, when I was contributing valuables to the race, I chose 'White Needle' during the exchange of true treasure and not the top-tier true treasure armor."

Sky Flower Knight sighed to himself. As a top-tier universe knight, his wealth was far more sizable than an ordinary universe overlord after countless years of accumulation; furthermore, he had wandered about the Universe Ocean for a long time. There were many kinds of treasures, and during the opening of the Original Star this time, he naturally wanted to exchange with his race to earn an important true treasure for self-protection. At that time, he'd had two choices, one was to exchange for a top-tier true treasure armor (in the human race, 100 true treasure points would suffice); or two, to change for a senior flying-palace type true treasure (in the human race, the minimum amount for this would be around 200 true treasure points).

Obviously, a flying-palace type true treasure was more expensive! But he had gritted his teeth and made the decision to pay the price for that flying-palace type true treasure.

"I made the right choice," he said. "If I had chosen the top-tier true treasure armor, my defense may have been strong, but Luo Feng's attacks were scary. Even with a top-tier true treasure armor, one strike would be able to injure me by at least a fraction of 1,000th. This Luo Feng had me backed into a corner. Should I have been strike 1,000 times, I would have had no chance of escaping annihilation."

Sky Flower Knight heaved a sigh of relief as he hid in his flying-palace type true treasure. Here, he was safe and did not need to feel scared.

Nine Tiger River was mighty and majestic. Luo Feng stood on its golden waves and looked afar at the white, flying shuttle that was hovering in mid-air. His expression changed involuntarily. "A flying-palace type true treasure!"

"Haha! Luo Feng!" a voice said, transmitted from the white flying shuttle. "I admire you. You are absolutely a genius, and out of all the billions of races in this vast universe, you are indeed the cream of the crop. Within such a short period of time, when other great beings have thought of you as a top-tier universe overlord, they would never have suspected that you had already become a universe master! If not for this flying-palace type true treasure, I think today would have been my last. Hahaha...! But now, I think it is just your luck!"

"Just my luck?" Luo Feng said, glaring at that white flying shuttle.

"Furious? Very angry?" Sky Flower Knight's shrill voice mocked, transmitted over from that white flying shuttle. "But what can you do to me when I am in this flying palace? Even if you were tens or hundreds of times stronger, the most you could do would be to stare helplessly."

Luo Feng did feel that he had made a blunder! He had made elaborate preparations for the "Battle to Fame" this time. He had devised counteractions for various possible unforeseen circumstances. He might have proven his capabilities, as witnessed by the numerous great beings watching the fight from afar—and Sky Flower Knight did admit that Luo Feng was indeed powerful—but after all this, one of the worst possible situations he had calculated had happened. Sky Flower Knight owned a flying-palace type true treasure.

In summation, there was no way he could make a clean kill and get rid of Sky Flower Knight! This battle would not end conclusively!

As for the question of whether he could force open the white flying shuttle? Luo Feng had no intentions of trying. A flying-palace type true treasure was the sturdiest type out of all treasures of the same level. Such treasures were the best at warding off material attacks! An ordinary flying-palace type true treasure, in terms of its degree of sturdiness, was comparable to that of a senior true treasure armor. A senior flying-palace type true treasure was thus comparable to a top-tier true treasure armor!

Like Sky Wolf Master's Sky Wolf Palace, which was also a senior flying-palace type true treasure, it belonged to the minority of top-notch treasures, which, by the human race's exchange rates, was worth about 800 to 900 true treasure points. With it, Sky Wolf Master was able to run rampant about the

universe. Even Primal Chaos City Leader and Nine Remoteness Master were unable to force Sky Wolf Palace apart.

This flying shuttle was only slightly inferior to Sky Wolf Palace, but it was enough to run rampant in the universe. The majority of universe masters would not be able to do anything to it.

Sky Flower Knight, who owned such a flying-palace type true treasure, usually could only depend on soul attacks! But Luo Feng was not skilled in launching soul attacks.

"Humph!"

Sou!

Luo Feng put Nine Tiger River right away, transformed into light, and accelerated into space.

"Trying to escape?" said Sky Flower Knight.

The white flying shuttle followed closely and quickly.

Luo Feng and the white flying shuttle dashed through the sky, one after the other, while knights of different races watched from afar, dumbfounded.

"He actually had a flying-palace type true treasure."

"Sky Flower Knight said that Luo Feng is a universe master!"

"Of course he is a universe master! How strong he is! If he is not a universe master, what else can he be? Even a top-tier universe overlord lost 10 percent of his godly body with just one strike from Luo Feng. Other than a universe master, who could be that powerful?"

"Sky Flower Knight, are you sure you want to shadow me like this?" Luo Feng said, looking behind him.

"Yes," said the voice from the white flying shuttle. "I have you under my watchful eye. There is no escape for you."

Luo Feng swept one look at the gigantic white flying shuttle behind him, which was really something that he could not tackle. He was aware that the automaton race, bug soldiers, and demons had always been looking for information about his movements, so Sky Flower Knight would naturally be tracking down his exact coordinates and promptly informing the higher-ups of his demon clan everything he knew about Luo Feng.

Playing big? thought Luo Feng. I'm afraid it is time to depend on the ninth volume now.

Luo Feng's eyes flashed with traces of murderous intention.

At the territory of demon clan, in the Dream Ancestors secret region.

The body that Sky Flower Knight left within his race was rapidly brought back to the Dream Ancestors secret region by a servant of god country transportation. Upon arriving at Dream Ancestor's secret region, he immediately connected to "virtual space" with his consciousness.

Like the automaton race, the demon clan also created a virtual world of their own. Even for Earth, a simple virtual space, "palace of war gods," was previously created, and it was merely based on a simple thought. To achieve the far-reaching influence that spread throughout the universe like the virtual universe, where all the laws were adhered to was a difficult feat. Yet if the area of virtual space was small and solely used for communication of information, that was much simpler and more achievable.

The demon clan had such a virtual space. It was an area that enveloped the Dream Ancestors secret region.

Within the virtual space of the demon clan, amidst the clouds and mist, a group of towering white palaces were in continuous sequence. These were the residences of the Dream Ancestors.

Among the clouds and mist, a long table was occupied by nine figures; above eight of them was a large silvery-white snake that was coiled up into a pan-shaped position. The snake's body was stretched outward into the distance, and amidst all the clouds and mist, it was hovering between being visible and remaining hidden. It was, nonetheless, a looming and massive figure. The other eight figures were also comprised of an array of forms and looks. Obviously, these were all noble beings of the demon clan.

"Teacher." Sky Flower Knight appeared out of nowhere—a body cloaked with snow-white hair. He bowed with unmatched reverence.

The head of the silvery white snake looked over. "You said you discovered Luo Feng and even mentioned that he was a universe master?"

"Yes." Sky Flower Knight replied.

At that point in time, most of the other eight universe masters seated around the table started voicing their thoughts loudly.

"Liar!"

"That human Luo Feng cannot possibly have become a universe master so quickly."

"Impossible!"

Sky Flower Knight continued. "This is the truth. I have seen and tested him myself. If not for my flying-palace type true treasure, 'White Needle,' which I earlier exchanged for with the race, I'm afraid I would have been annihilated by him."

"Impossible."

"To kill you, he must definitely have the power of a universe master. How long has he been cultivating himself? It seems impossible."

The universe masters were still unwilling to believe what they had just heard. Only Dream Demon Ancestor remained silent as he observed their reactions.

Sky Flower Knight immediately said, "Words alone are useless. I shall let you all see the situation at that time. Then you all will clearly believe my words."

With that, Sky Flower Knight looked toward the sky and recalled everything that he had undergone. The scenes reenacted in his memory and were replayed as a simulation of the actual event from the beginning to end. From the start of his fight against Zha Wei Horde Leader and Thousand Shadow Knight...

Silence.

All the universe masters watched with undivided attention. Billions of years of common knowledge told them that it was impossible to become a universe master in such a short cultivation period. Otherwise, one would be impossibly powerful.

The simulation ended. All the universe masters remained silent for a moment. They all could tell the truth from the blows exchanged between Luo Feng and Sky Flower Knight. For the first strike, the difference between the power of the two was not obvious. However, when Luo Feng served up his second attack, he brought forth such an immediate upsurge of power so strong that it caused Sky Flower Knight to lose 10 percent of his godly body right away. The only missing detail that they could not see from the simulated scenes was how the incredible yet mysterious strike was dealt. Sky Flower Knight did not know how Luo Feng had done it, so naturally, he was unable to replicate the exact nature of the move.

One strike that could cause a split straightaway! Just by posture alone, it was impossible to create a 100 percent simulation. That would be totally pointless. The true essence lay with the beast god path—the path that could stir up and actuate countless law engravings! This was a scene from memory that could not be simulated.

"Luckily, I hid in my flying-palace," Sky Flower Knight said solemnly. "If not, I would have been annihilated."

"Not necessarily," Dream Demon Ancestor said, finally speaking up. "Luo Feng may not necessarily be a universe master. When he was only an undying, he fought and killed Bark Mirror Emperor; when he was a universe knight, his godly body must already have been stronger than yours. With such a strong godly body, he must have chanced upon a unique opportunity or even been bestowed with a talent technique! Or he could have obtained a talent technique that was comparable to an ultimate technique of a universe master."

The other universe masters nodded.

"Have you ever seen him controlling a part of time and space?" Dream Demon Ancestor asked.

"No." Sky Flower Knight shook his head.

"Just one stance of a powerful technique," said Dream Demon Ancestor. "That may be a talent technique. Unless he is able to display two techniques, then one of them must be his own creation." Dream Demon Ancestor shook his head. "Furthermore, you are still not powerful enough to make a correct identification. Only through a battle with him would a universe master will be able to clearly judge whether or not he is a universe master. Are you tracking him now?"

"Yes." Sky Flower Knight immediately added, "He will not be able to escape. I am tracking him down, for sure."

The silvery-white snake went on to say, "I will contact the automaton race and bug soldiers. This time around, with the joint efforts of the three races, we must eradicate Luo Feng."

Chapter 1113: Encirclement

Three beings arrived in the sky. They were the three universe supreme masters from three pinnacle races.

The silver snake head said, "Luo Feng showed up on the original stars, and he has the power of a universe master!"

"I've got the report as well," said the phantom. "Sky Flower Knight of your demon race fought Luo Feng, and he's no match at all. He survived because of his flying-palace type true treasure."

"I have the information, too," said the breathtaking being.

"Good," said the silver snake head. "It's a great opportunity. We can cooperate with each other and kill him now."

"Of course we have too, but is he actually a universe master?" the breathtaking being said.

"I want to know, too," said the phantom.

Although none of them believed Luo Feng could have become a universe master in such a short time, they all knew that the universe was constantly changing, and miracles were possible.

The silver snake said, "I'm not sure! Of course, I hope he's a universe master!"

The universe supreme masters from the automaton race and the bug race wished the same thing, as Luo Feng was already too powerful, and it would be better if he actually was a universe master. If he was already a universe master, it meant Luo Feng wouldn't be too powerful later.

"I think he has an incredible inherited technique, and that was how he hurt my disciple," said the silver snake head. "If he's a universe knight, we need to kill him! Even if he's a universe master, we can still eradicate him. What do you think? My demon race alone might not succeed, but we have a much greater chance if we cooperate."

Father God of Automaton race and Empress of Bug Race both went silent.

"I agree!"

"I'm on board!"

They both answered.

"Nobody can stop us if we cooperate," the silver snake said with a smile. "I think we send three universe masters each, and nine universe masters go to that original star at the same time to encircle them."

"Nine universe masters?"

"You're overestimating Luo Feng."

The Empress and Father God were reluctant, as there weren't enough universe masters within their races.

"We can't give him any chance if we want to kill him," said the silver snake head. "Otherwise, he'll get away and be stronger. If it weren't for that man being so crazy, our races would be suppressed by the human race! Don't underestimate the humans. They have great potential! I see that crazy man on Luo Feng."

"No..."

"How is it possible?"

All of them were terrified, thinking of the crazy man who was annihilated.

"Think about how long Luo Feng has practiced," said the silver snake head.

"I'll send three," said the breathtaking being.

"I'll send three as well," said the phantom.

All the universe supreme masters reached a consensus. Together, they would send nine universe masters, along with a great number of universe knights, to kill Luo Feng! And the other powers would make sure the Hong Alliance didn't meddle!

Luo Feng was flying on Original Star Number 02933, and a white shuttle was following him.

"Still following me?" Luo Feng looked behind him. "All the three races have got the information, and they might have made a plan already. Fortunately, they don't know my trump card. It'll be a wonderful fight."

Hua! Hua! Hua!

Boundless golden waves showed up, and the white shuttle was covered by the waves, which slowed it down.

"Nine Tiger River?" Sky Flower Knight lowered his head, and his eye glinted disdainfully. "Want to get away? Don't count on it."

His godly power permeated.

Hong!

"Useless! I'm in the Nine Tiger River, and you're controlling it. If you're a bit farther than me and I get out of it, I can keep following you."

Sky Flower Knight was confident.

Time flew. Nine Tiger River moved forward, and Sky Flower Knight was in Nine Tiger River. After a while...

"Why is he squandering his godly power by using Nine Tiger River?" Sky Flower Knight smirked, but then he was dazed. "Wait! Space law domain!"

Sky Flower Knight performed law domain.

Hong! Long!

Two law domains clashed with each other, and Sky Flower Knight felt something wrong from the clash. Why did Luo Feng keep stopping him from inspection?

Sky Flower Knight heard a laugh, and the golden river disappeared.

"Hahaha! Sky Flower Knight. How stupid are you!"

A towering Golden Horned Beast with six horns was standing in the sky.

A head with snowy hair showed up from the shuttle and said, "Where's Luo Feng?"

The Golden Horned Beast smiled. "He's not here anymore."

"Damn Golden Horned Beast! How are you controlling the Nine Tiger River?" Sky Flower Knight was anxious and infuriated.

"We're best friends, and I've been adventuring through the original stars with him," said the Golden Horned Beast. "I've been hiding in his world ring. He's already put Nine Tiger River back into the world ring and taken back his life imprint. That's how I use it." Golden Horned Beast smiled. "As for Luo Feng? He's flown far away."

"Damn it..." said Sky Flower Knight.

He clenched his teeth. He remembered that Luo Feng won the name of top-tier universe overlord because he had slaughtered a great many universe knights of other races, and many of them claimed to have been killed by a black, strange beast—or a Golden Horned Beast!

"How could I forget about the Golden Horned Beast!" Sky Flower Knight said, irritated.

"Haha! Perhaps you can still catch Luo Feng now." Golden Horned Beast smiled, waved his wings, and flew away.

Sky Flower Knight was angry with himself. He had been tricked!

Inside the virtual space of the demon race, Sky Flower Knight had to report to his teacher, Dream Demon Ancestor.

"Teacher," he said. "I lost Luo Feng."

Lost him!

All the races were irritated, but they couldn't do anything but change the plan immediately. They had to order the great beings from the demon race alliance, the bug race alliance, and the automaton race

alliance to search for Luo Feng on Original Star Number 02933. They sent nine universe masters to that original star.

"Coming after me?"

Luo Feng flew through the sky to where he meant to meet Golden Horned Beast.

"That Sky Flower Knight was underestimating me. He was so easily tricked."

Luo Feng was smiling when suddenly...

Hong!

Everything went silent!

The first universe master of the nine universe masters sent arrived at the original star, following the boundless energy. All the universe knights went quiet. They all knew that a universe master had arrived!

"You're dead, Luo Feng!" a deep voice said, trembling the ground.

Luo Feng smiled. "Which universe master is it?"

"Bug race alliance, Master of Banff!" came the answer.

"You, want to kill me?" Luo Feng chuckled. Luo Feng laughed louder and louder without caring about the space constraint around him. He kept flying.

"These are Luo Feng's coordinates."

"Go there!"

"Encircle him."

The alliances quickly gave the order, and a great many universe knights on that original star went toward those coordinates, and even great beings of the three alliances on other original stars flew there.

Hong Alliance got the information immediately and quickly made arrangements.

Hong!

On Original Star Number 02933, where Master of Banff stayed, another universe master had arrived. However, the space and time were in disorder because of the fight to control space and time, and neither of them was able to control the space and time.

"It's a universe master from the Hong Alliance," Luo Feng realized.

At the same time, Luo Feng got an email from his teacher, Primal Chaos City Leader. It read: "Luo Feng, Long Yan Master has already arrived at your original star! This time, all the three pinnacle races will try their best to kill you, and our alliance can only stall them. Even if I go there, I'll be constrained. I heard that you have the power of a universe master now? Can you guarantee you will survive that? Self-destruct if you can't. Understand?"

The Hong Alliance wasn't worried. They'd given Luo Feng the soul type true treasure Afterimage. They knew that Luo Feng had the clone technique, and the worst he would suffer would be the loss of some true treasures.

"Of course, I can," Luo Feng replied.

"This is getting more and more interesting," he said to himself. "Time will tell. I don't know how this fight will end..."

Luo Feng beamed.

Chapter 1114: Kill!

Three universe knights of the demon race alliance were flying several hundred million miles away from Luo Feng. Though they were not of the demon race, they followed the order from Dream Demon Ancestor.

"We're not far from that human Luo Feng," said a short man with a bloody beard. "According to the information from the demon race alliance, we can find that human any time. Jin Ya and Pu Ya, we must be careful now. Once we find that human Luo Feng, we need to keep following him. The reward from the alliances is huge."

"We understand," the other two short men said. They were all from a powerful race, but they all belonged to the demon race alliance.

"Big brother, we're much weaker than Luo Feng, and we'll definitely die if we're trapped in his Nine Tiger River."

"Which is why we need to be careful and don't get too close to him. We need to be at least 19 million miles away from the ground! And by doing that, we can see more than a 300-million-square-foot area! Besides, the information is clear that there are not many universe knights from other races. If the universe knight we see is not on the information, chances are, it's the human Luo Feng!"

"I understand."

The three alliances were extremely careful. When Master of Banff arrived, he immediately controlled the entire original star, and he knew every great being on the original star. He recorded all the universe knights of other races near Luo Feng and passed the information to all the members from the alliances.

As long as it was not a universe knight in the information, it could be disguised by Luo Feng. The members needed to identify the stranger universe knights! And they would rather make wrong killings than let Luo Feng go! After all, it didn't mean anything to kill some universe knights. However, Luo Feng couldn't get away.

Hu!

Three traces of light were flying in the sky.

"Look!"

The three men slowed down and saw a silver-armored and silver-winged man. Luo Feng wasn't camouflaging himself. Instead, he showed his true identity.

"It's the human Luo Feng!"

"We found Luo Feng!"

"It's him!"

They were all excited and anxious. They hadn't expected to find Luo Feng so quickly.

"Jin Ya, Pu Ya, this is a great opportunity!" The bloody-beard guy transmitted his voice. "Stay away from him and he can do nothing. Even if we get killed, the alliances will revive us."

"Okay."

The other two nodded. There was a promise from the alliances that if someone was killed, they would be resurrected, and the true treasures and treasures lost would be returned. And the more one contributed, the more he would be rewarded, which was why all the great beings devoted all their efforts.

"Stay 30 million miles away from him."

"We can go in three directions."

"We can't let him get away, and we need to make great contributions and get great rewards," the bloody-beard one sad.

The other two also nodded. They separated and tried to approach Luo Feng.

All the bodies of the universe knights from the bloody-beard being's race gathered in a small universe secret region. They had a virtual space where they could pass the information back to their race immediately. And then, the seniors within his race would pass the information to the seniors in demon race alliance!

"We've confirmed Luo Feng's coordinates, and there are three universe knights following him. Other universe knights are approaching him as well."

The three alliances immediately passed the information on to the great beings of the races under them.

All the universe knights, universe overlords, and even universe masters approached the new coordinates as quickly as possible.

Hong! Long!

The golden waves were churning, covering 90 million square feet, but the three universe knights of the Bu Han clan kept their distance.

Luo Feng stepped on the waves and yelled, "Back off and I'll spare your lives."

"Hahaha! Human Luo Feng, are you kidding me? We don't need you to spare our lives! We're six million miles away from Nine Tiger River! What can you do about us?"

"You're indeed powerful, but we're millions of miles away from you."

"Human Luo Feng, this is your doom! All the great beings of our alliances are racing toward you. It won't help no matter how you're trying to disguise yourself. Stop running!"

All of them laughed and looked confident.

Luo Feng frowned. If he kept being watched, his route would be exposed, and the three alliances would easily know where he was, which was not good for his plan.

I have to use it, thought Luo Feng. I need to show my skill.

Luo Feng stood still and stared at the three universe knights of other races in the distance. "I didn't want to kill you," he said. "Don't blame me. You kept following me."

Luo Feng stood still, which confused those three. Why wasn't Luo Feng running?

"Not our concern. We're more relaxed if he doesn't run."

Just when the three bearded guys transmitted their voices to speak to one another—

Hua!

A being shone at the edge of golden waves and disappeared, then reappeared in a flash 6,000 miles away again.

Shua! Shua! Shua! Shua!

Hundreds of shadows shone and approached those three universe knights, which terrified them.

"Teleportation?"

"Nobody can do teleportation on the original stars! Not even universe masters."

"It's an inherited technique, it must be!"

They were all in panic.

What they did not know, however, was that Luo Feng was not teleporting. Moshu's body was performing his inherited technique, "Domain," and with his godly power, mind, and willpower, he was able to teleport himself over 100 times in one second. He could travel millions of miles a second!

After only three seconds, Moshu's body arrived at where the black-bearded man was, and his blade became a shining, golden light. The golden light was sharp and cold—and fast!

"Ah!"

The black-bearded man waved his hammer and shield, trying to defend himself.

Peng!

Although Mosha body was weaker than the Golden Horned Beast body and the original earthling body, it was still a universe knight with a life gene level 100 times. And he was performing the ultimate technique of universe masters: "Golden Light."

Mosha body was as powerful as the Golden Horned Beast and the original earthling body before they became universe knights. One attack, and...

Hong!

The black-bearded man's godly body trembled and was annihilated.

"No!"

"How is it possible!"

The other two universe knights were terrified after seeing their friend killed in one attack.

The bloody-bearded being started to report the information and said, "He's able to perform a skill like teleportation! A skill that can only be performed by special life forms like Mosha clan, and it's really powerful! One attack can kill a senior universe knight!"

Shua! Shua! Shua! Shua! Shua! Shua!

After two seconds, another universe knight was killed. After four seconds, the last universe knight was killed. The fight was finished.

Three universe knights had been killed in ten seconds. Nobody could even put up a fight.

Mosha body was as powerful as Purple Rain Knight! And the original earthling body could rival a universe master! Mosha body could fight the most powerful World Tree! Even Flourishing Light Horde Leader, wearing an ordinary true treasure armor, was killed by one attack—not to mention those senior universe knights without any true treasures protecting them.

Luo Feng took the treasures and put away Nine Tiger River.

"An alliance of three races..." Luo Feng's eyes glinted fiercely.

The three races alliances got the information from the three universe knights who had just died. There was recorded footage showing Luo Feng's black, godly body breathing fire. This led the demon race, automaton race, and bug race to conclude that Luo Feng had the clone technique. That body was a Mosha body!

"He can perform the inherited technique 'Domain.' And he has the inherited technique 'Duplicate'! However, the Mosha race is good at hiding and fleeing, but they're not good at fighting! He killed a senior universe knight with one attack? Did he actually become a universe master?"

The seniors from the three races were all shocked.

Chapter 1115: The Black Ocean

On Original Star Number 02933, the top three powers consisting of the Demon Alliance, the Automaton Race Alliance, and the Bug Clan Alliance had joined efforts in their desire to hunt and kill Luo Feng. News of such a major movement would naturally spread to the other forces like the Northern Territory Alliance and Nine Territory Alliance, all of which had temporarily moved out of the source region of the looming storm.

At that very moment, there was a total of 2,102 universe knights from the Bug Clan Alliance on this Original Star and 1,906 universe knights from the Automaton Race Alliance. The Demon Alliance had the greatest number in the first place, and with a large base and the total number of universe knights present was 5,230.

Altogether, the total number of universe knights exceeded 9,000! And this was only the beginning amount. At that moment, there were still other universe knights rushing to this original star, which was merely one out of the 10,081 original stars. The number was still increasing continuously, and for now, at least one-fifth of the total number of universe knights from these three alliances, scattered all over the 10,081 original stars, were present on this original star.

"Could there be a force as great as that of a universe master? Would there be the Moshu body?"

A great being from the automaton race, flying in midair, shook his head and sneered. "So, for all those present in the danger zone who are not members of any of the three alliances, all shall be killed? What a joke that just one human, Luo Feng, could create such a great commotion. But the response makes sense, since only a handful of those left in the danger zone are not members of any of the three alliances."

The "danger zone" referred to an area with a radius of three billion miles—with Luo Feng as its center. The number of universe knights from the three alliances within this danger zone was gradually increasing. Every great being had the ability to see things at a distance as far as hundreds of millions of kilometers away. This greatly increased the chances of Luo Feng being discovered, which could happen at any moment.

Diving Sail Knight, a great being from the automaton race, was leisurely cruising in midair as he commented, "The three alliances, from the start of the hunt until now, have seen the annihilation of countless universe knights. Fortunately, the higher-ups of the three alliances have committed to a promise that they would reverse time and space to resurrect those who have died and to return the treasures registered under those who have died and underwent resurrection. Otherwise, out of the numerous universe knights, who would be willing to risk the danger of losing their lives? Without the numerous universe knights willing to take the risk, this hunting plan would never be carried out."

Diving Sail Knight was a universe overlord and had been roaming about the original star as a lone wanderer. Leisurely he flew, but his eyes were constantly scanning his surroundings, observing every trace of life from the flowers and the grass to the lake waters. Given the speed of calculation of his consciousness, he could easily discover any suspicious spots. Within the entire original star, every living being, from flowers to grass to earth and land, existed as though they were one; even if one were damaged, it would be able to recover rapidly. If a Moshu body transformed into a stone and tried to hide in that guise... by meticulous sensing, one would easily be able to tell that this stone looked out of place with everything else on the original star.

After flying around for some time—

"En?"

Diving Sail Knight's eyes lit up as he saw a silver light that was far away, almost 60 million miles away. Amidst that silver light was a black-haired man with silver armor and silver wings.

"The human, Luo Feng!"

Diving Sail Knight closed the distance between them right away but was prepared to maintain a fair amount of distance between them. After all, the two were far from each other right now. The moment Luo Feng charged into the forest, with all the weeds in the deserted plains, he would be more difficult to spot.

"I have found Luo Feng, his latest coordinates are..." Diving Sail Knight immediately reported to his race!

Suddenly, at the main command ground of the three alliances, upon receiving the latest coordinates of Luo Feng's whereabouts, a new spot was added on to the diagram showing the route of Luo Feng's movement! The higher-ups sent out orders immediately to get over 9,000 universe knights to move toward the coordinates of Luo Feng's latest whereabouts.

Around half an hour later...

Hua!

A sharp and cold golden light sliced through the air. Although Diving Sail Knight was doing his best to ward off the attacks, he was still like a tiny ant facing a speeding truck.

Hong! Long!

The cold blade brought about a bone-piercing chill that sliced right through his armor. The terrifying impact immediately reached the maximum limit of this senior true treasure.

Weng!

A godly body that was almost 30 feet tall felt a great jolt, then faced complete annihilation.

I have a senior true treasure armor, but I was still unable to ward off one strike from his Mosha body? Is he really a universe master? Luckily, I have stored my most important true treasure back in god country.

Such thoughts flashed through Diving Sail Knight's mind as he felt his entire godly body disintegrating. Then his consciousness fell into a limitless darkness.

Mosha body kept the true treasure suspended in midair and said softly, "Diving Sail Knight did not bring his most acclaimed true treasure, 'Diving Sail Wings,' with him."

From killing Diving Sail Knight, he only managed to obtain a piece of senior true treasure armor, an ordinary true treasure weapon, and a world ring. The legendary Diving Sail Wings was nowhere to be found.

"Even so... I have still earned quite a fair bit," said Mosha body. "Killing one universe overlord, I can earn much more than killing ten senior universe knights."

Luo Feng stood on the water surface of Nine Tiger River while he waited for Mosha body to return. Then, with a single thought in mind, he summoned Mosha body back into his world ring. At the same time, he put away the ghost blade that Mosha body had taken earlier to carry out his mission.

Ghost blade was a top-tier true treasure! It was mighty and extremely powerful. Luo Feng had to contribute many of his treasures and a handful of treasures from the Blood Cloud treasure vault to his race to be able to exchange for this ghost blade.

Previously, Luo Feng had needed to deal two strikes before he could slice through Para-chopper Knight's senior true treasure armor to kill him! Diving Sail Knight also wore senior true treasure armor, and his godly body was almost 30 feet tall, which was even more massive! If Mosha body had used Bo He sword, then whether it was ten strikes or a hundred strikes, the number would not matter. Mosha body could rely on the ghost blade to bring out a sudden upsurge of power, causing his opponent's senior true treasure armor's defense level to fall by a great deal...

That was when he could achieve a clean kill with a single strike!

And this was only a top-tier true treasure! Luo Feng thought to himself. If this was a pinnacle true treasure or a supreme true treasure... what power would that be?

Top-tier true treasures were usually used by universe masters. Even if a universe knight might own one... usually, top-tier universe overlords only owned about one to two such treasures.

"Hmm. The 16th universe knight and the first universe overlord," Luo Feng said to himself as he stored Nine Tiger River and started another round of rapid escape.

During the escape, he interchanged between his original earthling body and Mosha body. When he was in the form of Mosha body, he would use his talent technique Domain to rapidly change position, trying his best to increase the difficulty for the three alliances trying to surround him! Every universe knight from these three alliances that he met along his way, he had killed without a trace of mercy, then claimed the loots of his victory!

There were a dozen higher-ups in the main command ground of the three alliances, and they were all in rage.

"The number of universe knights from the three alliances that have been killed by Luo Feng has reached 115, of which there are three universe overlords!"

"That annoying fellow! Let him gloat all he wants, let him go crazy! Now that the danger zone is shrinking, the chances of finding him are greatly increased. Besides, Master of Banff is rushing here as quickly as he can. It won't be long before Master of Banff arrives."

"The area where he can escape is getting smaller. Let him enjoy his last crazy moments."

Luo Feng was too ruthless, and his success rate in killing was much too high. The responsibility of resurrecting these universe knights ultimately fell back on them—the universe masters within the alliances.

On the original star, the number of universe knights coming from the three alliances had exceeded 10,000, and there were many who had entered the danger zone, causing a sharp increase in the number of universe knights from the three alliances within the danger zone.

It was getting more troublesome for Luo Feng to hide his tracks, and his disguises had become pointless. Transforming into a stone? He would be out of place on this original star and would be detected and discovered in no time. Transforming into a knight of some other race? He would be courting his own doom in a place where killing without mercy was the rule rather than the except! Transforming into dead members of the three alliances? Everyone knew that senior universe knights moved about in groups, so the only disguise he could take was one of a universe overlord. But how many universe overlords had he killed in total? Besides, the three alliances would know right away how many universe overlords had died at Luo Feng's hands, so it would not be difficult to recognize him that way.

As for transforming into the universe overlords of the three alliances who were alive? Luo Feng had never set eyes on any of them before, so there was no way he could replicate their form or aura. Furthermore, the coordinates of every universe overlord were in the records of the main command grounds, which had been keeping close tabs. Luo Feng would be most easily seen through.

In conclusion, there was nowhere he could escape to!

Just as he had changed his direction, he met three universe knights of the three alliances. Upon killing them, he found himself facing another universe knight soon enough.

"The chances of discovering my tracks are getting higher!" said Luo Feng. "These universe knights maintain a far distance from one another, and it would put a toll on my Moshu body if I were to go after them. Previously, when I fought with four universe knights, I only managed to kill three. One escaped."

Luo Feng's eyes flashed traces of red. "However... since all of you are so crazy as to leave me no other options, then bring it on. Let's go for a kill..."

The more he killed, the more murderous and bloodthirsty Luo Feng became.

160... 180... 200...

240... 280... 320...

Luo Feng had gone crazy in his killing spree. As the chances of running into the universe knights from the three alliances multiplied, the speed at which Luo Feng killed them likewise increased. With every kill he made, Luo Feng made sure to take away all spoils of his victory!

The higher-ups of the three alliances were growing increasingly furious. "Human Luo Feng...! After killing you, all that you have taken shall be ours again!"

"Banff, how long more to reach Luo Feng?"

"He has been changing his whereabouts, but not too long. Just let him struggle a little more for now."

Master of Banff was rushing in Luo Feng's direction at the fastest he could. He was now the universe master closet to Luo Feng.

In the whole of this original star, there were four universe masters from these three alliances that had arrived. However, Long Yan Master's interference hindered them from expanding the area of time and space under their control.

In the vast sky of the original star, a gigantic whirlpool tunnel hovered in midair.

Hua!

With an overwhelmingly towering height of over half a million miles, a gigantic figure stepped out of the tunnel and appeared in midair. It had a huge mountain of a body with eight hooves that resembled heavenly pillars, and four long, thick arms. Right in the middle of its mountainous body was a humongous eyeball. He was an incomparably powerful presence whom the Demon Alliance had courted with an extremely generous offer of countless benefits—Tong Ling Master!

Tong Ling Master was a special life form that had been born at the birth of the universe. Special life forms may have been powerful, but once a special life-form had cultivated itself to reach the level of a universe master... that was the true show of power! Of course, many top powers would be vying to invite him to join their race. When he was still at the level of a universe knight, he had finally made a decision and joined the Demon Alliance.

"Hahahaha..."

Tong Ling Master's booming laughter brought tremors to the limitless and vast ocean waters.

Hong!

The unending black waters spread out in an instant to enshroud the ocean, forests, deserts, swamps, and deserted plains... It was almost as though within a split moment, it had completely enshrouded the entire original star! The entire original star was then enveloped by a vast black ocean containing a fearsome restraining force that was simply unbelievable.

All the great beings, including Luo Feng, were completely engulfed by the black waters.

Chapter 1116: Blood Light

He had a towering body with a huge dragon tail extending from the base of his spine. He looked up at the black ocean, and under his burning godly power, the entire black ocean was suppressed; it couldn't get close to him.

"Floating Mountain Ocean?" Long Yan Master whispered. "Tong Ling Master is here, too." His eyes glinted with concern. "They sent Tong Ling Master. He is quite a handful. All the universe masters sent by the three alliances are extraordinary, and it seems that they really want Luo Feng's life."

"Our alliance can't do anything!" Long Yan Master exclaimed. "Even if the Hong Alliance put all our efforts and sent Huge Axe Creator to come here, the three alliances can also send a universe supreme master to constrain Huge Axe Creator, and it might be bloodier later."

The Hong Alliance wasn't afraid of any one-to-one combat. However, it could only disturb the cooperation of three alliances.

"Luo Feng's power has surged too fast. His progress intimidates the three alliances, and the three alliances who've been fighting each other have set aside their feud and formed a single alliance." Long Yan Master shook his head and looked at the dangerous area. "Luo Feng, you're on your own, now. The best we can do is to stall them."

Nobody knew how Luo Feng's current situation. The three-race alliance didn't know it, and neither did Hong Alliance.

"Hahaha... Everyone who has tried to stop me has died! Die! Nobody can survive."

Luo Feng looked peaceful, but his eyes were glinting ferociously. Actually, the spiritual-force crystal in his head had been giving Luo Feng a headache while he was on the earth. And that crystal made him innately mad, during which he looked forward to life-or-death combat. When he was cornered by Li Wei, he slaughtered all those who cornered him.

Such madness was only mild until he did soul transfer on Golden Horned Beast! The Golden Horned Beast was naturally bloodthirsty, and that bloodthirstiness affected Luo Feng, which made Luo Feng more and more fearsome. Fortunately, Luo Feng had an extremely strong mind and willpower, with which he was able to control it well.

It had been a long time since he'd slaughtered like this after becoming undying. Even after he had fully comprehended Beast God Heart, he hadn't slaughter like this. This was the first time after he had fully comprehended Beast God Heart that he killed out of madness. The more he killed, the faster he killed.

100... 200... 400... 800...

Luo Feng was completely absorbed in the Beast God Heart! And he killed every life form in his sight!

The killing bordered on insanity. One supreme being after another died, and no one could resist him. Besides, those universe knights find it difficult to get away from Mosha body's inherited technique Domain.

Hong!

Boundless black ocean submerged the plain and sky, and the constraining power was so large that Luo Feng's mind was clear from killing.

"Clear!"

Luo Feng looked around the boundless ocean. It looked like water, but it was an area made by special energies of high density like that of Nine Tiger River.

Strong power, thought Luo Feng. Wielded in combat, it might be 100 times stronger than an attack using all the power of my Moshu body, and it might rival the Thousand Treasures River of my teacher. It must be Tong Ling master's Floating Mountain Ocean!

Luo Feng had gathered enough information; he had the access authority of a top-tier universe overlord in the virtual universe, allowing him to read some information of the universe masters of the bug race, the demon race, and the automation race. The more he read about them, the more he realized how terrific universe masters were. However, Luo Feng was still confident that he could achieve his goal in this fight.

"Human, Luo Feng!" A vigorous voice went into Luo Feng's ears.

"Tong Ling Master from the demon race alliance?" Luo Feng smiled.

"You're still smiling?" said the vigorous voice. "Hahaha... How bold you are! Just so you know, Master of Banoff will be here soon."

Luo Feng smiled even broader, turned around, and kept flying in one direction. He broke the black ocean water, moving quicker and quicker.

"You still dare to fly in my Floating Mountain Ocean?"

The vigorous voice became angry, and the power within that ocean surged. The drops of water began hitting Luo Feng like neutrons, but Luo Feng kept flying without being affected.

"Hmm," said the voice. "I thought my Floating Mountain Ocean might kill you if I fully utilized it, but now, it seems you indeed have some abilities to be proud of."

The power from the black ocean kept surging. It could have easily killed a top-tier universe overlord. However, Luo Feng easily broke through the water and flew into the distance, which startled Tong Ling Master at the other side of the original star.

"Did that Luo Feng really become a universe master?" he wondered aloud.

I have a pinnacle true treasure Force Armor on me! thought Luo Feng. And it can weaken attacks to 1/100,000th! My godly body is more than 55,000 miles tall. Even the pinnacle universe masters might need to use all their power if they want to kill me. Only a domain type true treasure? It can't hope to affect me!

Luo Feng knew his power clearly. True treasure armor—from ordinary true treasures, senior true treasures, top-tier true treasures to pinnacle true treasures—most of them could weaken attacks to 1/10,000th, yet they had different limits. Only the most exceptional pinnacle true treasures were able to weaken attacks to 1/100,000th.

Force Armor was able to weaken attacks to 1/100,000th, which meant Force Armor was an exceptional pinnacle true treasure! Besides, Force Armor had an incredibly high limit! Attacks from universe masters were unlikely to reach the limit, which meant Force Armor was able to weaken the attacks from universe masters to 1/100,000th!

Flame Emperor had the Force Armor to protect his godly body, and the Original Soul to protect his soul! He didn't need to be afraid of anything! And, of course, Sitting Mountain Guest had a supreme true treasure!

"Luo Feng was able to easily resist the attack from my Floating Mountain Ocean, even when I fully utilized it," reported Tong Ling Master.

All the universe masters were startled when Tong Ling Master passed the news back the three alliances. There were two possibilities. One: Luo Feng had become a universe master, and he had a supreme godly body. Two: Luo Feng had an incredible true treasure to protect his godly body.

"Did Luo Feng become a universe master?"

"Humph! Perhaps he got an incredible true treasure by luck."

"It's not that easy to get a true treasure. Real true treasures all have strong backgrounds, and you can't just get one by luck, unless the seniors give it to you. Several universe masters are using top-tier true treasure armors. How could Luo Feng also be given one?"

"Master of Banoff will fight him, and we'll know the truth soon."

The bug race, the automaton race, and the demon race all found that Luo Feng had a great many mysteries, and some great beings started to wonder whether he had become a universe master.

Luo Feng broke the black water and flew freely.

Mosha body was in one of his world rings.

"It felt so good to kill them all."

Luo Feng had killed more than 800 universe knights, which gave him a satisfaction he had never felt before. Besides, he also had the craving to create techniques! The desire to kill in his heart! He wanted to combine that with his blade technique. He was indeed incredible when performing Golden Light, but he didn't feel the madness.

Hua! Hua!

Mosha body looked up and saw the godly power being triggered. Complex engraving pictures kept showing up. Luo Feng could sense that urge.

No, he thought. It doesn't feel like that. No.

Luo Feng knew that he was able to create universe-overlord level techniques using only his rations! However, it would require inspiration and emotion for him to create techniques of universe masters, just as when he had created Golden Light when he had just fully comprehended Beast God Heart.

"No... Yes! That's it."

Luo Feng looked to the gigantic engraving picture in the sky, and under the control of his mind, the engraving picture became increasingly complex. He gained more and more inspiration, and the desire to kill was completely injected into the engraving picture. In the end, the engraving picture was completed.

Hong!

A gigantic, complete engraving picture floated in the sky, emanating endless force and faint aggression.

"Done."

Luo Feng's eyes gleamed. He pointed to the sky, and another giant engraving picture showed up, which was the engraving picture of Golden Light. The two engravings were floating side by side in the sky. Both permeated boundless power; the one on the left looked bloodthirsty, and the one on the right looked indifferent.

"Finally, I've created the second ultimate technique of universe masters," Luo Feng said.

He smiled. It had been a long time, and he'd already started the sixth level of the beast god path. Under the strain and excessive killings, he'd created the second technique!

"I'll name it 'Blood Light.'"

Suddenly, a towering being raced toward Luo Feng from among the black ocean.

A voice resounded in the sky.

"Luo Feng!"

Luo Feng turned back, and knew immediately...

Master of Banoff was here!

Chapter 1117: Fighting a Universe Master

Master of Banff had an upper body that resembled a human—fair-skinned with a shiny mass of long golden hair—but a lower body that took the form of a reptile. His look was heartwarming, just like how the sun provided warmth, and his smile was as amiable as a loving mother. He had the ability to make one unconsciously fall into a state of euphoria.

Master of Banff observed this human in the distance and saw a youth dressed in silver armor and sporting a pair of silver wings—one who could remain unaffected even under the oppression of the vast ocean waters of the Floating Mountain Ocean.

"He is the one who the three pinnacle races are after," he said. "The human, Luo Feng!"

He recalled what the Bug Clan Queen had ordered him to do before he arrived here: "Banff, you shall be tasked with killing Luo Feng. Out of everyone in my Bug Clan Alliance, the Demon Alliance, and the Automaton Race Alliance, your skills in creating illusions are said to be the best. Luo Feng has risen far too quickly, and his growth is appalling. If we allow him to continue progressing, he will become a major source of trouble for my Bug Clan Alliance! If he continues to hide in places like the primal universe, there is nothing we can do, but luckily, he has now made an appearance in the original stars!"

From the bugs soldiers and demons to the automaton race, everyone knew that the moment Luo Feng chose to self-destruct, at the very best, they would gain some true treasures. Yet all their hard work would be in vain.

However, even if there was a possibility where their hard work would be in vain, it was something they might be able to avoid if they tried! If Luo Feng hid in the primal universe, the three pinnacle races would have no chance of eradicating him at all! Now that he had appeared on the original star, it was the chance of a lifetime. They had to grab it!

"This Luo Feng," the Bug Clan Queen had said. "He has risen so rapidly that he must be full of self-confidence! It is impossible that he would self-destruct without even putting up a fight. If that was the case, why would he have bothered coming into the original star? We have to make good use of his pride and his confidence! Get rid of him!"

"Bear this in mind..." she continued. "The first goal is that we have to use soul control! If you can control his soul, this human genius is as good as gone, or he could even become a tool for my Bug Clan Alliance. This is the greatest success possible! If this can't be achieved... then we shall have to penetrate his soul to eradicate him. That is the only way we can kill all his various bodies at one go. He is only a human, yet he has the potential to be incredibly strong, especially if he can mature so quickly. He must have a unique talent that is extremely powerful. There are some kinds of special talents that, upon reversing time and space to bring about a resurrection, the resurrected being will no longer be able to possess it again."

The Bug Clan Queen was very aware of the secrets of the universe. Some of these unique things were just as she claimed. Like the memory of the Nine Volume Manual, which could only be handed on to one person. Once the master of it had been annihilated, even if time and space were reversed for a resurrection to take place, the memory of the Nine Volume Manual could never be restored.

For a universe master, annihilation was for eternity. There was no room for resurrection. Likewise, for some unique talents that were extremely powerful, once death occurred, even reversing time and space would not be able to restore anything.

"First goal, soul control," the Bug Clan Queen had instructed. "If this cannot be achieved, then we shall move on to the second goal: to penetrate his soul and eradicate everything. If we still cannot achieve that, it means we have failed. There is still a third goal: to destroy this body of his and take all the treasures this body is carrying. Maybe there is a treasure within these that holds the secret to how he can make such tremendous progress up to now."

Bug Clan Queen had listed three choices. Obviously, she was still hoping that they could use the most direct method of soul control when tackling Luo Feng.

In the void space that enveloped the Dream Demon secret region.

A couple of figures sat at a long table. The silvery-white snake head was in the central seat while the other demons were divided into two factions, one was the Dream Demon Ancestor, and the other was Shock Demon Ancestor. Usually, those gathered here would be members of the demon clan, but today, even Tong Ling Master was present.

"Master of Banff has already met with Luo Feng," Tong Ling Master announced.

"We shall wait for Master of Banff to send us the good news," the silvery-white snake head said in a booming voice.

The numerous universe masters nodded. Trouble had to be eradicated early.

One being with the power of Primal Chaos City Leader was enough to bring much trouble to the enemies of the human race; there were many times where the presence of Huge Axe Creator was not required at all, as Primal Chaos City Leader alone could settle everything. If there was another being as powerful as Primal Chaos City Leader, that would be scarier than three or four ordinary universe masters put together!

Master of Banff looked at Luo Feng from afar and sneered. His voice was low and deep, like the tremors of an earthquake as he said, "To think you can actually shake free from the influence of my power. Your willpower must be getting pretty strong."

"Compared to Master of Banff, I still have much room for improvement," Luo Feng said from afar.

"How humble you are," Master of Banff said, in no rush to attack. "Within a short time, more than 800 universe masters of the three alliances have been annihilated by you. Your methods are appalling, but a power like yours, why would you want to kill those who are much weaker than you?"

Luo Feng shook his head. "Not going to provoke me? I do not mind showing some sympathy and mercy, but to provoke me one after the other, you all are really asking for it! Haha! enjoy your just deserts."

Master of Banff laughed. "Makes sense!"

Luo Feng was taken aback and looked at Master of Banff with a baffled look.

Master of Banff smiled. "Luo Feng, do you know which race I represent?"

"Bug Clan Alliance." Luo Feng answered immediately. He was still maintaining vigilance, as he could not grasp the intention of this Master of Banff.

"Wrong answer. I am from the Northern Territory Alliance." Master of Banff shook his head and said, "I just left Bug Clan Alliance some time ago, albeit secretly, and have joined Northern Territory Alliance. My true purpose in coming here today is to invite you to bring your fellow earthlings from your home planet and join me in the Northern Territory Alliance. I know... Earth is a mysterious life planet, and it is impregnated with your kind, but the human race has forcibly occupied your home planet as their own. If you are willing to, the Northern Territory Alliance is willing to reclaim Earth for you..."

Having said this, Master of Banff stopped and looked silently at the faraway Luo Feng. At this point in time, Luo Feng's eyes started to lose their glow.

However, a split second later—

"Get lost!"

Luo Feng let out a deep growl through gritted teeth all of a sudden.

Hong! Long! Long!

Tremors produced as ripples on the surrounding black ocean waters. An invisible, blurry godly power was exerted.

"Great! Great! Great! You indeed deserve my admiration!" Luo Feng said, staring at Master of Banff. Through his gritted teeth, he snarled, "Well-deserving of the title of Master of Banff! You are indeed well-versed in the art of using illusions for attacks. While leading me into a conversation, you gradually brought me into an illusion as I unconsciously took the bait. I can now consider myself to have seen and tested the skill of the most top-notch, top-tier illusionist for myself."

That was fast, thought Master of Banff. Even when I am tackling a true universe master, I am able to exert my influence for a while, but the speed at which he broke free from my influence was too fast. This spells trouble.

Master of Banff concealed his shock. He had just managed to penetrate through—had just led Luo Feng into an illusion—but Luo Feng had managed to detect it and speedily broke free, hence dismissing his godly power.

"Truly worth the admiration," said Luo Feng. He grasped the handle of his ghost blade slung across his back and drew his sword out in an instant. With eyes staring, he gave his challenge. "Master of Banff, let me show you what I am capable of."

Luo Feng moved in a split second. His speed was extremely fast.

Hua! Hua! Hua!

The black ocean water that was surrounding them was rolling and tumbling. Layer after layer of waves suppressed Luo Feng, and even with the help of his Shi Wu Wings, his speed was still greatly limited. Master of Banff, on the other hand, managed to retreat at the speed of lightning; so while Luo Feng was under suppression within the domain of the Floating Mountain Ocean, Master of Banff was, on the contrary, benefitting from it.

Master of Banff reported the information immediately. "Queen, soul control failed. His willpower and consciousness were too strong—comparable to those of an ordinary universe master. He is extremely determined, and I suspect he still has a soul type true treasure."

He was reporting the information as required when Master of Banff also came to realize that... he had failed to achieve the first goal. He could only rely on the second goal.

"Meet your doom!"

Master of Banff stayed far away and looked at Luo Feng. His eyes were a dazzling shade of sparkling cyan—beautiful enough to pull on one's heartstrings. But suddenly, his eyes seemed to turn into two blue crystals, and an invisible soul seemed to charge rapidly into Luo Feng's mind. In his mind, two gigantic blue whirlpools revolved at mind-numbing speed.

Peng!

The two blue whirlpools collided. Pieces of blue crystals formed, which headed toward where Luo Feng's godly power was and penetrated it.

Chi! Chi! Chi!

Within the life imprints of his godly power, Luo Feng felt as though acid had been splashed onto his skin. The pain was so intense that it bore through his very soul. Yet Luo Feng remained expressionless. He had made it through life and death inheritance. How could he bow down so easily?

Luo Feng growled a command deep in his heart. "Afterimage! Stand guard!"

The amethyst-like triangular crystal that was hanging in the middle of his chest immediately spurted countless law threads, connecting every inch of godly power on his body, bringing about a layer of life imprints over him that seemed to act like a layer of armor. At the same time, the strange sounds of beastly roaring could be heard coming out of the triangular crystal. The roars were transmitted throughout his entire being, rapidly easing the pain he suffered from. He also managed to control his own godly power quickly. He charged at the two gigantic blue whirlpools with unrestrained craze. He wanted to banish them entirely, to the extent of complete annihilation.

"Destroy! Destroy! Destroy!"

Master of Banff's gaze was fixated on Luo Feng from afar. The blue crystals in his eyes were in continuous revolution, which in turn, issued a continuous transmission of an intangible but impactful energy at Luo Feng.

"The first goal has failed, but I refuse to believe that I am unable to kill him by penetrating his soul," said Master of Banff. "I will see to your demise!"

Master of Banff was giving it his all. Killing a soul was a completely different story from a material kill. Once a soul was killed, only the life imprints would completely disappear. Luo Feng's godly body would still look the same; the only difference would be that he had fallen. Just like the Soaring Sky Master.

Hong!

Luo Feng heard a resonating roar before him. He stared at Master of Banff and said, "You have failed."

He had Force Armor and Afterimage as a double defense mechanism, yet it was still a laborious and strenuous fight. The Demon Alliance, the Automaton Race Alliance, and the Bug Clan Alliance had specifically sent Master of Banff, who was indeed extremely powerful in areas of illusion and soul attacks. A pity he was still so far from the mark, especially if he had intended to use soul-killing on Luo Feng.

"You..." Master of Banff was in disbelief, but he knew he could only report to Bug Clan Queen: "The second goal failed! Luo Feng may have an extremely powerful soul type true treasure. His speed of defense is much too quick. My guess is he may possibly own a top-tier soul type true treasure!"

When universe supreme masters from the bug race, the automaton race, and the demon race heard the news, they felt angry and discontented.

But getting angry was pointless. Whether they tried soul control or soul killing, everything so far had failed!

"Banff, move on to the third goal," Bug Clan Queen commanded. "Simply kill Luo Feng! Take back everything he has. All the valuables that he took away from universe knights. And also, take the true treasures that he has on him. Take everything back. If we can just obtain some top-tier soul type true treasures and various other true treasures, this operation will still be worth the while."

"Yes," replied Master of Banff.

Chapter 1118: He Laughed Longest

Master of Banff stepped on the black water. He held a cyan spear ten times longer than his godly body. There were bloodstains on the spike, and it looked ancient and bloody.

"Luo Feng, even if you are already a universe master, you'll die today!" Master of Banff roared, and his hoofs stepped on the water.

He dashed toward Luo Feng with his spear point toward him. The entire space trembled because of that. It was a technique that contained the path of space and time!

"Hahaha, come!" Luo Feng waved his wing, and his body instantly blurred, and the space and time beside him went into disorder. He charged forward like a trace of light, but under the suppression of the domain of Floating Mountain Ocean, he couldn't fly too fast.

Hu! La!

Master of Banff stabbed at Luo Feng with the spear! The attack didn't seem all that powerful, but Luo Feng felt that the entire universe was being pierced by the spear. A visible linear crack appeared in the space on the original star.

A golden light shone! It was sharp and cold!

"Dang!"

Blood Ghost Blade hit the tip of the spear. The power contained within the two weapons collided. Silently, the black ocean of a 60-square-mile area was cleared, and the plain around them also vanished. And then the rumbling sound spread.

Luo Feng bounced away like a car hit by a truck while Master of Banff took a couple of steps back.

"An ultimate technique of universe masters?" Master of Banff stared in disbelief at Luo Feng in the distance. "Why's your life gene level still 100 times if you're able to create an ultimate technique of universe masters? The human race should have helped improve your life gene level instead."

"Why do you ask so many questions?" Luo Feng said as he regained his balance in the sky.

He knew why Master of Banff was asking him this. Ordinary life forms like the human race, the demon race, the bug race, the space beasts, and Mosha bodies were only able to increase their life gene level to 100 times, and that was the limit! Many universe overlords had reached that level. However, universe masters were creatures outside of space and time; they became the masters over space and time, which was why they were called "universe masters."

To sector lords, undying fighters, and universe knights, the limits of life gene level was 100 times. However, universe masters—creatures who lived outside space and time—could surpass the limit of 100 times and improve their life gene levels, thus strengthening their godly bodies. The size of their bodies might be larger as well.

The constraint of size and life gene level was nothing to universe masters. They were able to approach the perfect life gene level of 10,081 times, but it was extremely difficult. Normally, universe masters were able to improve their life gene level to 1,000 times, and it was almost impossible to increase it to 5,000 times. As for the perfect life gene level, it only existed in legends!

"If you are indeed a universe master, you should've increased your life gene level before creating any techniques," Master of Banff snorted. "Or you're just a universe knight with a life gene level of 10,000 times, and the attacking technique you just performed is a bestowed inherited technique!"

"You'll know whether or not I'm a universe master very soon!" said Luo Feng, and he dashed toward Master of Banff with his Blood Ghost Blade held high.

"Come," said Master of Banff. "No matter who you are, an exceptional universe knight or a young universe master, I can kill you—even if I follow the path of illusion!"

Master of Banff stepped on the ocean water, and the space around him trembled. He raced toward Luo Feng again.

Hong! Hong! Hong!

They both went mad. Sometimes, Master of Banff used soul attack to affect Luo Feng, and sometimes, he used illusion to affect him. He had a life gene level of almost 2,000 times, and the quality of his godly power was 20 times better than Luo Feng's... Together with that illusion, within the domain of Floating Mountain Ocean, Luo Feng was being completely suppressed!

Peng!

Luo Feng bounced away and rolled in the water, then quickly charged again. They both used all their power and skills, each trying to kill the other!

Master of Banff was at an advantage within Floating Mountain Ocean, especially with his illusion abilities and far greater godly power! However, Luo Feng had an exceptional pinnacle true treasure, Force Armor, which could weaken any attack to 1/100,000th.

Besides, the godly body of Master of Banff was only 60 miles tall, but Luo Feng's godly body was more than 55,000 miles tall...!

This was a typical fight between universe masters. Both of them had enormous godly bodies and strong defensive skills, which meant there wasn't any significant difference between their power. This was why it was extremely difficult for a universe master to die... Unless they put all their efforts! Which was precisely what Luo Feng and Master of Banff were doing! They were burning their godly power!

"I have much higher-quality godly power!" said Master of Banff. "I have a true treasure armor! And my godly body is more than 60 miles tall! I'll consume you to death!"

It sounded ridiculous, but it was exactly why it was difficult for universe masters to die.

"Master of Banff," Luo Feng said. He bounced away again and floated in the black water. Then he roared, "Tell that Tong Ling Master to take back Floating Mountain Ocean! Two to one! Not fair!"

Master of Banff smirked. "It's not a competition! We're trying to kill you!"

"Damn it..." said Luo Feng. He could distinctively feel his disadvantage against Master of Banff, which was the quality of godly power! They had the same level of techniques, though.

Hong! Long! Long!

An indistinct sound reached Luo Feng and Master of Banff. All the universe knights and universe masters on the original star heard the sound, too.

Long Yan Master, on the other side of the original star, smiled. "Chaos. Finally, you're here."

"Thousand Treasures River!" Luo Feng was glad.

Hua! Hua!

The river covered the entire original star.

Peng! Peng! Peng!

Thousand Treasures River and Floating Mountain Ocean hit each other on the original star. It was just like when the two domain type treasures of Luo Feng and Tian Yang Knight hit each other. Thousand Treasures River and Floating Mountain Ocean were both top-tier domain type true treasures, and they hit each other relentlessly; each occupied half of the original star, and the center was where Luo Feng and Master of Banff were fighting.

Laughter spread along Thousand Treasures River to Floating Mountain Ocean. "Haha! Tong Ling Master, you and Master of Banff are bullying my disciple together. Don't you think that's shameful?"

The voice of Tong Ling Master spread to Thousand Treasures River. "Primal Chaos City Leader, this is an action taken by all the three races. Do you really think this is all we've got? Do you really think you can save your disciple? Haha... Just so you know, your disciple is dead even if I don't do anything."

Luo Feng glared at Master of Banff, clenching his teeth. Green light glimmered around him.

"E Luo Sector!" Luo Feng clenched his teeth. "It's E Luo Sector of Bi Long Master!"

Just when the two domain type true treasures from Primal Chaos City Leader and Tong Ling Master hit each other, Master of Banff took out E Luo Sector. He was carrying a domain type true treasure as well!

Heng.

Master of Banff looked at Luo Feng, grinning gleefully. "I'm supposed to kill you in this action! Do you think I wouldn't come prepared? I was ordered to do soul attack on you first, which is why I haven't used this until now. With this top-tier domain type true treasure, you'll die much sooner, as you're weaker than I am."

"Great!" Luo Feng smirked. "Fantastic. Hahaha...!"

Master of Banff sensed something wrong. "Why are you laughing?" he demanded.

"Master of Banff," said Luo Feng, "now I'll let you know the most powerful technique I've created since I became a universe master! I've been waiting for this moment for so long, and it's now time. I bet many of the universe knights of the three races have entered the danger zone." Luo Feng smirked.

"What're you saying?" Master of Banff looked a bit intimidated, but then he snorted. "Do whatever you what!"

"Hahaha...!" Luo Feng pointed at the cyan light, and following his laughter, the sky and land turned dark. Boundless dark air started to flow as if they had entered another realm—a realm of chaos filled with chaotic airflow!

It was the supreme inherited technique, "I Am the Universe!" Once I Am the Universe was performed, the diameter could reach 6 billion miles, forming an oval-shaped miniature universe.

"Why is it dark?" wondered one of the universe knights spectating from far away.

"It was all black ocean before, followed by boundless water, and then cyan light. Now, the sky has turned completely dark!"

"Is it the chaos airflow?"

Inside the danger zone gathered a great many universe knights and universe overlords from the three alliances, and they all looked up at the cyan light being surrounded by boundless chaos airflow. The force of the airflow made them stop breathing. Each of them felt that the chaos airflow could annihilate them easily...

Luo Feng stood in the sky, maintaining the miniature universe with a diameter of 6 billion miles. He was the master of the miniature universe.

"How mighty," Luo Feng said, closing his eyes to enjoy it.

He was only undying when he killed Tian Yang Knight, so the miniature universe he had performed then wasn't all that powerful. He had needed lots of chaos airflow to kill Devil Fog Knight. However, his godly power had improved 100 times since then, and the miniature universe was 100 times stronger! A little bit of the air could crush a senior universe knight easily.

Luo Feng had a godly body more than 55,000 miles tall, and not even one 1/10,000th of it was consumed. However, I Am the Universe consumed 10 percent of his godly body, and it could only last for nine seconds at a time! How powerful the miniature universe was—that it required such a great amount of godly power!

Chapter 1119: Finishing Everyone Off with a Single Blow

As compared to the previous killing of Tian Yang Knight, Luo Feng's miniature universe was a full two notches higher in power level. It could completely envelop all the universe knights of the three pinnacle alliances that were within it and wipe them all out at one go. This control over the fate of countless thousands of universe knights gave Luo Feng an unprecedented feeling of liberation and excitement.

"This is the moment I have been waiting for." At this moment, Luo Feng was carefree. He was entirely without inhibitions—mad with rage.

When Virtual-Real Devil Master had barged his way onto Redbud Island to kill him, Luo Feng had been incredibly angry! However, it did not take him long to realize that this was the law of strength and weakness of the universe. Since he had demonstrated how awfully fearsome the strength of his power was, it was understandable that the three pinnacle races would want to get rid of him. His only worry was that they would continue to bother him. The only solution was to make the three pinnacle races unwilling to provoke him, just like how the three pinnacle races were unwilling to aggravate Primal Chaos City Leader! The question was, how?

Earlier on, Luo Feng had made many kinds of plans to carry out his "Battle to Fame." The first plan was to achieve a clean kill of the top-tier universe overlord Sky Flower Knight and let the trillions of races in the universe know that Luo Feng had the combat power of a universe master! If the three pinnacle races would henceforth retreat, that would be good; Luo Feng did not want to blow the matter out of proportion. With their retreat, he would also have gained enough fame within the universe to earn a reputation for himself.

However, if the three pinnacle races wanted to blow things out of proportion... Luo Feng had also devised subsequent counteractions as backup plans.

While Luo Feng had been carrying out his initial plan, a terrible development had occurred. Sky Flower Knight had unexpectedly possessed a flying-palace type true treasure, "White Needle," and had managed to escape from Luo Feng. To make matter worse, he had turned the tables by following Luo Feng instead!

As Luo Feng had not managed to kill Sky Flower Knight, he naturally felt he had not made the impactful statement he'd hoped. On the contrary, Sky Flower Knight was now hot on his heels... which had led to the three pinnacle races choosing to ride the waves and take the opportunity to eradicate Luo Feng!

With the power of Luo Feng's Moshu body, he had easily shaken Sky Flower Knight off; he could have taken advantage of the time when the three pinnacle races still lacked concrete plans on how to attack him. During that time, he could have made a speedy escape into the nearest whirlpool tunnel and sneak away immediately.

However—Luo Feng had not done so!

He had let Sky Flower Knight follow him about, and after some time, when Luo Feng felt that the three pinnacle races had reached a consensus after negotiations and were starting to deploy forces, he proceeded to shake Sky Flower Knight off his tail! Even when Sky Flower Knight was no longer able to keep up with him, Luo Feng still did not try his make to escape...

In the beginning, he only relied on his original earthling body to fly around and hide about. He was aware that the three alliances would surely deploy numerous universe masters because the ones who had weaker powers were not his match. He was also aware that when they did so, the Hong Alliance would inevitably send universe masters to intervene. Therefore, he could depend on the fact that a large number of universe knights would try to encircle and trap him to determine his whereabouts.

In the beginning, he had not made use of Moshu's body to use "Domain," as he had been worried that the three alliances would not take the bait and carry out their plan. However, numerous universe knights started surrounding him, and Luo Feng also started to kill... Moshu's body was able to make use of Domain and move at such an alarming speed that the other universe knights had no chance to escape.

The results revealed that he was indeed quite ruthless, having killed more than 800 universe knights! Of course, this was only for starters!

When the universe master that the three alliances had sent, Master of Banff, finally arrived, Luo Feng met his advances without a trace of fear. Luo Feng had always wanted to challenge a universe master to test his true power and see where he really stood. With Force Armor and Afterimage, and with Golden Horned Beast holding on to Star Tower, even a universe supreme being would not be a life-threatening risk to him, much less a universe master! Luo Feng was confident of staying alive.

The battle with Master of Banff was just a means for him to test his true power and see where he really stood; it was just a way for him to prove his capability. What truly caused the three alliances to feel heartache and regret was his strongest technique: "I Am the Universe."

Previously, I Am the Universe had a diameter of 60 million miles, and in the original star, those who wanted to encircle and trap him were already within this area. Now, I Am the Universe was ridiculously powerful, and its diameter was 6 billion miles. Out of all the techniques, perhaps only Star Tower could surpass it. Killing these universe knights could be done within the blink of an eye.

Upon achieving this stage of planning, Luo Feng finally managed to reach the climax.

The prominent Long Yan Master stood in midair as he kept trying his best to gain control of a part of time and space to interfere with the other universe masters' efforts to do likewise. Although he was not very successful, he could still indistinctly feel that in a certain direction from afar, there was an immeasurable and fearsome aura. This aura was shocking.

"Primal Chaos City Leader, what is happening? What has happened?" Long Yan Master shot out a series of questions out of anxiety. "Could this be some special techniques the three races are using?"

He did not know the situation. On the other hand, Primal Chaos City Leader, who was controlling Thousand Treasures River, was crystal clear on what was happening because his Thousand Treasures River had touched that gigantic miniature universe.

"This... this is..." Primal Chaos City Leader was very much taken aback. "There is already a hint of the mystique of a primal universe! This technique is already considered to be at a level of the most powerful technique of a universe master. Who could be using such a technique? Could it be that fellow, Banff? Has he already comprehended the most powerful technique of a universe master?"

Primal Chaos City Leader was indeed shocked. Whatever this technique was, it would be categorized as being at the pinnacle or ultimate level. However, the ultimate techniques created by a universe master would be further graded as high- or low-performing. Some might have barely made it past the threshold to be considered an ultimate technique, while the others might have attained the "limit" of an ultimate

technique. These would be the so-called "strongest techniques of a universe master"! They represented the limit a universe master could achieve!

The universe masters capable of creating techniques of such a standard were all well-renowned in the universe. For instance, Primal Chaos City Leader and Nine Remoteness Master...

On the surface, it was impossible to tell who was the creator of this miniature universe.

"If Master of Banff can achieve this, then... Then this is bad news," said Primal Chaos City Leader, beginning to feel frustrated.

...

"What...?" gasped Tong Ling Master. He shared the same amount of shock. His Floating Mountain Ocean also touched this miniature universe and felt the limitless power it contained. "The strongest technique of a universe master?"

Tong Ling Master could differentiate in an instant. It was simple. If one stance of this technique could transform a godly power into its most original form of chaotic airflow, then this must be the limit of a universe master! And probably only the technique of a universe supreme being would be able to surpass such a technique.

"Who could have created it?" wondered Tong Ling Master. "Luo Feng? Impossible! Banff? Right, his accomplishment of soul abilities is said to be on the top level of all universe masters. I shouldn't be surprised that he can create this miniature universe." Tong Ling Master sighed to himself. "To think that Banff is one step ahead of me and managed to create a technique of such standard when I have yet to succeed."

Creating an ultimate technique posed no difficulty to a universe master. It was all about whether there was enough time spent achieving it. But as for the limit of an ultimate... According to legends, the strongest technique of a universe master was something the majority of universe masters could not create.

On Original Star Number 02933, a miniature universe suddenly appeared. Outside of it was Primal Chaos City Leader, Long Yan Master, Tong Ling Master, and a few other universe masters, all of whom were clueless of its true creator; there were many who were inclined to believe that it was the creation of Master of Banff.

But in that miniature universe...

"Banff, you could actually create a strongest technique?" A towering beast with six thick, strong, clawed hoofs and a very long nose had just detected the limitless chaotic airflow in the surroundings and was momentarily shocked. He was quick to let out a sound that echoed in the cyan light of Master of Banff's "Oro Boundary."

"Hahaha, congratulations, Banff," and another universe master. This one was in a different kind of human form with a black-scaled helmet and three eyes with a dark red glow.

This time, the three races sent out nine universe masters. The other six universe masters were dispersed in all directions. While Master of Banff was battling Luo Feng, there were two other universe masters rushing to get into the area within the danger zone.

Suddenly, a voice filled with rage resonated through the area the two universe masters were in. "This technique was not used by me!" said the voice. "It's Luo Feng! The human Luo Feng!"

The two universe masters were dumbfounded.

"What...?"

How was that possible?

"Quick, we need to join efforts to break this technique!" Master of Banff urged with great anxiety. "The power of this technique is extremely strong! My top-tier domain type true treasure is unable to break it open at all!"

"Okay."

"Together!"

There was no time to waste feeling shocked by Luo Feng using such a technique. The other two universe masters were quick to understand the severity of the trouble they were facing. Such a large miniature universe must have enveloped a great many universe knights within it. If all of them were killed, reversing time and space to resurrect such a large number might not be possible even if all the universe masters of the three alliances were to try until they were gravely injured!

When Luo Feng's miniature universe had just started to take form, Master of Banff knew right away that something was not right. He tried to manipulate his top-tier domain type true treasure, "Oro Boundary," to create an impact on the entire miniature universe. However, the miniature universe was constructed after the godly power of Luo Feng's gigantic godly body had internalized the complicated miniature universe picture of secret engravings. His stability was unbelievable.

"Luo Feng! Luo Feng! Don't mess around!" Master of Banff said, transmitting his voice over to Luo Feng who was far away while he struck the miniature universe with an impact. "There are as many as 6,000 universe knights here! These are universe knights from the three great alliances—not just the Bug Clan Alliance! The number of races implicated is even higher. If you kill them all, you are making yourself the enemy of all those many races! The godly bodies of these 6,000 universe knights would consume an immeasurable amount of godly power. To resurrect them would be a great price to pay. If you kill them all, there will be dire consequences! The three great alliances will go crazy!"

Master of Banff was going mad with anxiety. The valuables of over 6,000 universe knights were important, but their lives were also very important! These were all senior universe knights, and there were even some universe overlords! Resurrecting a universe overlord, a universe supreme being required excessive power... Even resurrecting one to two senior universe knights would be a tough feat for an ordinary universe master; if there were tens or hundreds of them, then only an extremely powerful universe master was able to resurrect them. But resurrecting more than 6,000 of them? Overwhelming!

If universe supreme beings and universe masters of the three alliances were all deployed into action, and all were heavily injured, it would be impossible to resurrect them all. If the task of slowly reversing time and space to resurrect more than 6,000 dead bodies fell on the universe masters—who had to recover their powers on their own prior to resurrecting the rest—how long would that take? If there was a huge price to pay to allow a universe master to continuously recover its power so that he could continue resurrecting, what a ridiculously exorbitant amount would that be!

Compared to the price required for resurrection, the majority of these senior universe knights would use their series of treasures. There were also a few true treasures. But when everything was added together, the accumulated amount might be the value of a pinnacle domain type true treasure! It was still a far cry from the imposing price required for resurrection!

"Offend the three major alliances?" said Luo Feng. "Make them go crazy? Hahaha! Time and again, every one of you has attempted to kill me, destroy my soul, and see to it that I can never be resurrected. And now, you want to negotiate with me?" Suspended in midair, Luo Feng's eyes flashed with a trace of coldness and insanity, and at the same time, both hands pushed downward in a sudden motion as he shouted, "All of you shall die!"

Hong! Long! Long!

The unlimited chaotic airflow of the entire miniature universe was like a gigantic metal board beyond measure. It moved downward, suppressing everything beneath it! Those countless cyan lights were simply irresistible.

"Ah!"

"No!"

Over 6,000 universe knights from the Bug Clan Alliance, the Demon Alliance, and the Automaton Race Alliance looked up at the sky and let out cries of shock. Then a thunderous bang sounded, and the entire miniature universe seemed to shake under the impact; it was as though the gigantic metal board was crushing thousands of houseflies, making mincemeat out of all of them. All the universe knights were annihilated one after the other. Even their treasures were crushed and shattered...

Chapter 1120: You Are a Universe Master

Just when the other two universe masters tried to fly to the end of the miniature universe to destroy it, the chaos airflow crushed all of the 6,000 universe knights!

"This... This...!"

Both of the universe masters were terrified, as they knew it was a huge issue now.

Master of Banff glared at Luo Feng. "Reckless!"

"Of course I am reckless!" Luo Feng shouted. "You're all trying to kill me, so why should I show any mercy? I killed them, and now, I'm killing you!"

The endless chaos airflow flooded toward Luo Feng in the miniature universe.

Hua! Hua! Hua!

Luo Feng's godly body became more than 600 miles tall, and the Blood Ghost Blade became several hundred miles long. The chaos airflow infused the Blood Ghost Blade, and there was a blurry shadow around the blade.

"Take this!" Luo Feng roared.

"Kill me? How arrogant you are!" Master of Banff dashed toward Luo Feng with his spear.

The attack Master of Banff had was affecting space and time with the help of E Luo Sector. As for the attack from Luo Feng, it had the power of the miniature universe and was backed by the ultimate technique Golden Light.

Hong!

When they hit each other, the power turned everything around them hollow; the chaos airflow, the green light from E Luo Sector, and the particles were all blocked outside.

Master of Banff almost bounced away while Luo Feng only took two steps back.

"Hahaha...!" Luo Feng laughed and raced forward again.

"What...?" Master of Banff had his eyes wide open. He hadn't expected to be at a disadvantage.

Hong! Hong! Hong!

At the level of Master of Banff, the moves were extremely quick, and they hit each the other dozens of times in only three seconds. Master of Banff was at a disadvantage every time... When they hit each other for the final time, the miniature universe was completely gone, followed by the chaos airflow.

"Haha!" laughed Luo Feng. "Master of Banff, I can't kill you, so there's no pointing fighting you. I'll leave first."

Luo Feng shook his wing and flew into the distance like a streak of light. His voice was resounding.

"Don't run!" Master of Banff roared and chased Luo Feng like a streak of light.

E Luo Sector tried to stop Luo Feng as well. However, Luo Feng's Shi Wu Wings broke the resistance from the E Luo Sector, and he kept flying faster and faster. Though he didn't have fast acceleration, he reached light speed when Master of Banff was around 6,000 miles away from him.

They continued flying, remaining 6,000 miles away from each other. Luo Feng used the miniature universe this time. He manipulated the chaos airflow and killed more than 6,000 universe knights. It only took him six seconds to finish the entire process, and he was talking to Master of Banff during that...

When the miniature universe lasted for nine seconds, Luo Feng stopped the godly power, and the miniature universe dissipated. 10 percent of Luo Feng's godly body was gone because of that.

"Unfortunately, they're too far from me, and I can't take their true treasures and treasures," Luo Feng whispered while flying, and he was smug.

Of course he was smug! It would be an incident that would never be forgotten in the universe! He had killed more than 6,000 universe knights (the weakest being senior universe knights) at once. Such an event was extremely rare, even in the entire long history of wars in the universe.

More than 6,000 universe knights attempted to encircle Luo Feng, yet he had killed them all at once. This was something that had never happened before. In the history of the universe, the powers would fight each other, and a supreme being would race to their enemies' homes and be slaughtered.

Luo Feng looked back and transmitted his voice. "Master of Banff, you can't do anything. Why're you still chasing me?"

"Damn it!" Master of Banff refused to give up.

It was a major issue now. This wasn't a war related to the survival of races. This was just an attempt to kill Luo Feng, and yet the three pinnacle races had suffered such losses! Master of Banff was infuriated.

"Thousand Treasures River!"

Luo Feng kept flying to Thousand Treasures River, and Thousand Treasures River and Floating Mountain Ocean continued colliding with each other.

Finally, Luo Feng flew into the domain of Thousand Treasures River.

"Haha..." Luo Feng looked back at Master of Banff. "Why aren't you chasing me anymore?"

"Don't be smug, Luo Feng!" Master of Banff spat angrily in a hoarse voice. "I do admire your power. It's indeed incredible that you created a supreme technique! However, it's not going to end this way. You killed more than 6,000 universe knights of the three races. Do you really think they're going to let this go?"

"I guess I'll wait and see." Luo Feng grinned.

Master of Banff glared at Luo Feng. "You won't be able to handle it."

"Really?" Luo Feng smiled and flew toward the center of Thousand Treasures River.

Heng!

Master of Banff turned around and flew away. Since he controlled E Luo Sector, the valuables left by the dead 6,000 universe knights flew toward him. However, the valuables were only able to move at less than 180,000 miles per second. It would take a long time for all the valuables to reach him.

Primal Chaos City Leader sensed something wrong when he saw the miniature universe. "Did Master of Banff create supreme technique?" he wondered aloud. "Luo Feng's in deep trouble this time. It seems that soul control and soul penetration both have failed, and if the body of Luo Feng dies, the true treasures will be lost."

"Huh? He went out?"

Primal Chaos City Leader saw that the universe dissipated, and was Luo Feng flying toward him. However, Thousand Treasures River wasn't able to detect the valuables left by the dead universe knights because of the resistance from E Luo Sector. However, what Master of Banff said spread to Thousand Treasures River.

Master of Banff said, "I do admire your power. It's indeed incredible that you created a supreme technique! However, it's not going to end this way. You killed more than 6,000 universe knights of the three races. Do you really think they're going to let this go?"

Primal Chaos City Leader was truly amazed.

Luo Feng heard a voice from Thousand Treasures River. "Luo Feng."

"Teacher," said Luo Feng.

"Did you perform that supreme technique of universe masters?"

"Yes, I did," Luo Feng admitted.

"You killed all those universe knights?"

"Yes, I did. None of them survived," answered Luo Feng.

Primal Chaos City Leader went silent.

Luo Feng had been able to perform a supreme technique! He had killed more than 6,000 universe knights with one strike! Even Primal Chaos City Leader was dazed by such a piece of news. It was a miracle!

"Anything can happen in the universe..." Primal Chaos City Leader whispered, and then he transmitted his voice. "Luo Feng, from now on, you're a universe master."

"I am actually not a universe master yet," said Luo Feng.

Luo Feng needed to hide the truth from the other races. However, he didn't need to hide it from his teacher, and his teacher would be able to tell the difference.

"You're a universe master now," said Primal Chaos City Leader. "What do you think the difference is between you and a real universe masters? Even if you become one in the future, you're just going to get a stronger godly body and gain control over space and time! It won't have a huge impact on your amplification even if you become a universe master."

Luo Feng understood what his teacher was talking about. When other great beings became universe masters, they would have stronger godly bodies and better law comprehension, and thus, they were able to create more powerful techniques, which made them much stronger than universe overlords.

However, the case was different for Luo Feng. Luo Feng's technique was already a supreme technique of universe masters, and even if he became a universe master, he would just have purer godly power. And control over space and time didn't help anything in combat between universe masters.

Though Master of Banff found it really puzzling, he still told Bug Empress the news.

"Empress, Luo Feng just performed a supreme technique of universe masters, and the power was so strong that it formed a gigantic world with a diameter of 6 billion miles. All the universe knights within that range died."

Actually, he hadn't needed to pass the news at all. When all the universe knights disappeared at the same time, the races within the three alliances were already furious and shouting.

The universe masters of the three alliances roared. "Do you really think our alliances can still walk around the universe if Luo Feng stays alive? It's a disgrace! A disgrace to our alliances!"

"We need to kill Luo Feng! Kill him now!"

"How? Do you think the Hong Alliance are fools?"

The universe masters kept debating. They all agreed that it was a disgrace. Other powers would see them as jokes, and Luo Feng would gain his fame by using the three alliances as stepping stones, which could not be tolerated by the universe masters from the three alliances.

Dream Demon Ancestor, Bug Empress, and Father God met each other again and started to discuss what to do.
