

SWALLOWED 1151

Chapter 1151 Black Universe Creator

"The only way to stop Yuan Ao Master is to seal him," said Nine Remoteness Master to all the other universe masters. "However, Yuan Ao Master isn't stupid. He must be alert, as he knows this is the only way to kill him, so he won't just let us seal him. We need a plan to do that."

"I have a pinnacle domain type true treasure, and it can cover an area of tens of square light years. It'll be impossible for Yuan Ao Master to escape."

"I have a seal type true treasure, and it's top-tier level. It can seal him."

All the universe masters voiced their opinions and announced their true treasures. All tried their best, as they all knew that the "strange object" was rejected by the original universe, and once Yuan Ao Master was killed and the strange object was driven out of the original universe, they would be bestowed based on their contribution.

"How impressive," whispered Luo Feng.

No wonder they were the representatives from all the superpowers. Three of them had pinnacle domain type true treasures. They were Golden Horn Master, Sea Lotus Master, and Cantus Devil Master... As for the pinnacle seal type true treasure, it was carried by Ice Mountain Master.

After a while...

"Good." Nine Remoteness Master nodded. "The plan is made! And we'll follow the plan. However, Yuan Ao Master isn't stupid. We need to be careful."

"Okay."

"Of course."

"Don't worry, Nine Remoteness."

All the universe masters answered.

"Your plan sounds good, but are you sure you can seal that Yuan Ao Master, even with all of you?" A cold voice resounded in the space, which attracted all the universe masters.

Luo Feng looked into the distance... In the space, an ineffable force arrived! The mighty willpower made all the universe masters feel pressured.

"It's a universe supreme master," said Ice Mountain Master.

"Which supreme master is it?" asked Nine Remoteness Master.

Hua!

The blurry being became clearer. It was someone in human form wearing black armor. The black armor was engulfed in fire, and a huge phantom stood behind it in the space. There were stars in the phantom, as if it were a universe in itself.

"Black Universe!"

"Black Universe Creator!"

"It's him."

"He's wearing a supreme true treasure, 'Black Universe Armor.'"

All the universe masters felt pressured by the sudden arrival of this great being, Black Universe Creator.

Luo Feng gazed at Black Universe Creator as well. This was Black Universe Creator? Based on the information he had gathered, Black Universe Creator was a fire life form. That golden fire was bright and heated, but the phantom behind it was dark and cold, which was the opposite of the golden fire.

"Is this the supreme true treasure 'Black Universe Armor'?" Luo Feng looked carefully and saw seemingly ordinary black armor, which sometimes merged with the golden flame-like liquid but sometimes showed itself.

A fiery head showed up in the golden flame and said, "I have a suggestion. I'll be in charge of attacking Yuan Ao Master, and you'll help me trap him in the seal type true treasure. I'm a lone universe supreme master, and I don't lead any powers or territories, so you don't need to worry about me taking advantages."

The universe masters all went silent.

"What do you want?" asked Nine Remoteness Master.

"I want that strange object," said the golden flame. "Don't worry, I'm not trying to seize it. Instead, I'm willing to trade for it. I can give you some pinnacle true treasures to have that strange object! There's only one strange object, and you can't divide it. You might just give that to me, and I'll give you the true treasures."

"What do you think?" Nine Remoteness Master glanced around.

Silence.

After a while, Sea Lotus Master said, "Now that Black Universe Creator has shown up, we of the bug race have no problem with that."

"The Northern Territory Alliance has no problem."

"The Prison race has no problem."

"The Human race has no problem," said Ice Mountain Master.

Even those universe masters who were reluctant agreed in the end. It wasn't that they agreed personally, but the universe supreme masters behind them agreed. This already had to do with the universe supreme masters in the universe, and now, even Black Universe Creator himself was willing to show up alone... only for a strange object. It was a fair trade.

They didn't need to upset that universe supreme master! After all, nobody was willing to offend a universe supreme master. Beings like Yuan Ao Master might be sealed, but no powers were able to seal a universe supreme master.

"I'll control an area of space, and with your domain type true treasures, Yuan Ao Master will have a reduced chance to run away," said Black Universe Creator. "Of course, if he runs beforehand, I won't be able to track him. Then I'll need to ask the Ancestral God School for help. The Ancestral God School should be able to locate him easily."

"Sure." Nine Remoteness Master nodded.

They would not be able to locate Yuan Ao Master, but they could locate that strange object. Before Yuan Ao Master took out that black wood, the Ancestral God School found out that something was wrong with his area and sent Luo Feng. After he took the black wood out, he was targeted!

Yuan Ao Secret Region.

One towering being after another-crawling type life forms, rock life forms, and blood and flesh type life forms-showed up ten light years away from the 12 continents, and their leader was the forceful golden flame giant that dissipated the universe origin law.

"Let's go," said Black Universe Creator.

Hua!

A towering being showed up in the sky outside Towering Continent.

"Lock!" said Black Universe Creator.

Hong! Long!

An area of 100 square light years was sealed, and the space constraint surged.

"I've locked that Yuan Ao Master," said Black Universe Creator. "You can attack now."

"Endless Light Domain!"

Golden Horn Master from the Space Beast Alliance opened his huge wing, and an endless light domain with a radius of 80 light years showed up. It was gleaming with white light, and everyone present was able to sense the power from the light.

"Incredible Golden Horn Master." Luo Feng took a glimpse. "He doesn't know that I'm Golden Mountain Knight."

Hong!

A towering being flew out of Towering Continent, and he was holding a giant black wood. He looked up and roared, "I can't believe you'll fight together for a strange object. You're from the superpowers in the original universe. Ah! A universe supreme master! I wouldn't fear any of you if I fought you one on one. But now that you're fighting together, I'll flee."

Yuan Ao Master roared.

Hong! Long!

He stepped on the space, and the space turned into particles. He went into the space interlayers directly. There were countless space shatters in the space interlayers.

Yuan Ao Master roared and traveled into the space interlayers. However, Endless Light Domain went into the space interlayers as well.

"Let's go."

The golden-flame giant took a step, and the space cracked. He went in, too.

Flame Emperor tore the space with his right hand and stepped into the crack. "Don't even think about running, Yuan Ao Master!"

"Let's go, Luo Feng," said Ice Mountain Master, and he and Luo Feng slashed the space and went into the space interlayers.

The universe masters present were all powerful, and they went into the space interlayers easily.

The deeper it was in the space interlayers, the more powerful the space flood was, and the space shatters were able to kill even some universe knights.

However... All those universe masters were much stronger than universe knights, and they weren't afraid of the space shatters at all.

Hua! Hua!

They all flew into the space interlayers.

Hou!

Golden Horn Master's wing hit all the space shatters and annihilated them. To him, they were as weak as drops of water.

Luo Feng turned into a beam of golden light. He was performing Golden Light, and with his Shi Wu Wing, he was incredibly fast, as well.

Black Universe Creator was the fastest out of all the great beings chasing Yuan Ao Master, but even the slowest among them was much faster than Yuan Ao Master. For one thing, Yuan Ao Master was bound by the pinnacle domain type true treasures. For another, Black Universe Creator was pressuring him by using his control over space and time.

Yuan Ao Master was ridiculously slow under the double effect of the pressure, and he was caught up with very quickly.

"Finally," said Yuan Ao Master. He looked furious, but he was actually looking forward to it. "I've been planning this for a long time and waiting for all the powers, and now, they've all arrived. However, I

didn't expect Black Universe Creator to come... Regardless, it doesn't change my plan. Just come. You're all supreme beings of the original universe, but you're all encircling me! Shameless!"

Yuan Master fled while roaring.

Chapter 1152 The Legacy of Xuan Yuan

"If this is a one-on-one fight, none of you will be able to do anything to me. Just for this godly wood, all of you have joined efforts to attack me. This brazen behavior is simply shocking."

Yuan Ao Master went on a rampage. In that vast space filled with waves, he crashed and sent gigantic pieces of debris flying about at extremely high speeds while roaring his rage to vent his anger.

Yet no matter how angry he was, there was Black Universe Creator controlling a part of time and space, and Golden Horn Master executing his pinnacle domain type true treasure Endless Light Domain. Both combined caused Yuan Ao Master's speed to be extremely slow.

Following behind them, Black Universe Creator and universe masters of the top nine powers were making their way over in a formidable array.

"Curse! Curse all you want now. You are going to be annihilated right away!"

"What a pathetic fellow."

"Who can he blame? He was always alone. How would he have known that strange objects should never be brought into the primal universe? The moment he allowed the object to recognize its master and brought it into the primal universe, his fate was sealed."

The universe masters following behind either snorted or sympathized. Even Luo Feng shook his head silently. A universe master who had gained his reputation rapidly during the birth period of the universe was about to be annihilated.

Ice Mountain Master did a voice transmission: "The chances of strange objects appearing in the Universe Ocean are low. The number of strange objects appearing is comparable to the numbers of supreme true treasures. For me, Teacher did tell me about this previously. That is how I know we cannot bring strange objects into the primal universe. Even for some of the universe masters who are here now, I believe quite a few of you only got to know about the secret information regarding strange objects now, because of this accidental event. So, I don't think that it's strange for Yuan Ao Master to be so clueless about it."

"That's true." Luo Feng sighed. "If he had known, he would never have done so."

"Who can he blame?" Ice Mountain Master said halfheartedly. "He can only blame the fate that dictated his annihilation."

Luo Feng sighed. Take the fate of the Eight Natural Beast Gods; they had been born as universe masters where their entire bodies constituted of treasures. In the beginning, when the number of great beings from various top powers of the universe were few, the Eight Natural Beast Gods were safe. However, as the great beings from countless races started to sprout, it was only natural for them to come to covet after valuables, so they made their advances like a pack of hungry wolves. That marked the end of the Eight Natural Beast Gods, who were subsequently split up like prey.

Why was Blood Cloud Palace Master attacked? One, because he was indeed an insane fellow. And two, because he did not have an impressive background.

On the contrary, Luo Feng, who had killed over 6,000 universe knights in one move, belonged to the Hong Alliance! Furthermore, he had the support of the Ancestral God School... The three major alliances could only suppress their anger and submit to humiliation. On the other hand, if he was a lone, wandering universe master, if he were to pull off such an unbridled massacre of universe knights, the three major alliances would definitely go crazy and retaliate!

To great beings like Sitting Mountain Guest, Space Ancestor, and Huge Axe Creator, an impressive background was a burden. But to universe masters like Luo Feng, such backgrounds would serve as their tower of strength, their backing.

Without backing, one would be like Yuan Ao Master—ostracized by the primal universe because of a strange object. Even the Ancestral God School was first in line to launch their attack. When universe supreme beings made their moves and attacked, they would not be punished. And these top powers would show no trace of mercy. Even the Eight Beast Gods who had the Ancestral God School as their backing were all killed. What would it have been like if various top powers were to go crazy coveting after valuables? The devastating scene would be massive. This was why Sitting Mountain Guest had warned Luo Feng against rushing to reveal Star Tower.

"Come, come," said Yuan Ao Master. "You all want to kill me, so I might as well take a few of you as my funerary subjects!"

Yuan Ao Master was like a man possessed, crashing and crushing gigantic space debris, roaring without a pause like a rabid dog putting up its final struggle. His display of anger made various super beings hot on his heels either sigh inwardly or sneer at his predicament.

An endless light shrouded a large area of the surroundings, and the group of super beings chasing up from behind in that area. The fastest of them all, Black Universe Creator, was rapidly approaching.

Yuan Ao Master looked behind him, and his anger intensified. "Black Universe!"

The gigantic, golden-flamed figure spoke up. "Give it up."

"In your dreams!" Yuan Ao Master roared.

Hua!

The golden-flamed figure was dangerously near. When Luo Feng and the group of universe masters were still far behind, the golden-flamed figure was considered to have caught up with Yuan Ao Master.

"There is no escape for you!" The golden-flamed figure suddenly stretched out his palm, and this gigantic palm immediately swung about in the direction of the opponent before him.

Hong! Long!

The surroundings had completely collapsed and scattered. Only a gigantic black palm could be seen sweeping across the sky. This black palm was as high as a few million miles tall; there were faint traces of countless stars rotating right in the middle of the palm. It looked as though endless stars were within this gigantic palm, which had reached Yuan Ao Master's spot high up in the sky in a rapid move.

"Want to kill me?" roared Yuan Ao Master. "What makes you, Black Universe, think you are capable of killing me? Ah! Ah! Ah! Burn and die!"

Yuan Ao Master's voice was like resonating thunder as a gigantic whirlpool of flames appeared to surround his godly body. The bright, dazzling flames were all concentrating together to gather on that black godly wood. Therefore, the black godly wood suddenly expanded tremendously.

Hong!

Limitless power gathered on this black godly wood like a pillar to heaven. Then the black godly wood directly smashed at that gigantic black palm that was slamming down from above.

Peng! Peng! Peng!

A tremor ran through Yuan Ao Master's godly body. Suddenly, he plummeted down. Even his godly body suddenly trembled. Many cracks appeared, but his body underwent a speedy recovery.

"You are indeed a universe supreme being," said Yuan Ao Master. "With one strike, you have annihilated 3/1,000ths of my godly body!" Yuan Ao Master looked up and let out a crazy roar. "If there is only one of you, without the help of any other universe master, there will be no way you can stop me should I want to escape. If I had better armor... you wouldn't be able to hurt me at all."

The golden-flamed figure paid no heed. With another strike of his gigantic palm, he said, "And now, it is time for you to accept your death sentence."

The gigantic black palm that contained countless stars circulating within it started trampling on Yuan Ao Master all over again.

When Luo Feng and company saw what was happening in the distance, they flew over quickly.

"Huh? Nine Remoteness Master may be able to make him lose 1/1,000th of his godly body, but this Black Universe Creator can actually make him lose 3/1,000ths of his godly body?"

Luo Feng took a while to process and understand. Firstly, the power executed by a universe supreme being was only able to surpass the self-destruction attack method by Nine Remoteness Master by a finger's breadth. Secondly, the two attack methods were different.

It was just like the exchange of blows between Star River Master and Luo Feng, when Luo Feng had used Star Tower to ward off his attack. The attack power was first weakened by the defense mechanism of Star Tower before it was transmitted to the body.

The exchange of blows between Black Universe Creator and Yuan Ao Master was the same. Black Universe Creator's strike was on the strange object, which was the godly wood. Upon absorbing the blow, the godly wood would be weakened. Thus, the impact of his strike would be transmitted to Yuan Ao Master's entire body.

Nine Remoteness Master had a different self-destruction attack method. It was similar to Explosion of Universe!

Within an instant, power from all directions converged and took aim at Yuan Ao Master. Although Yuan Ao Master was using the black godly wood to absorb part of the explosive power, there was still the remaining power attacking him from all other directions. The godly wood was only able to block attacks from one direction; it could not ward off the impact from the endless power coming from any other directions. Yuan Ao Master would inevitably sustain heavy injuries.

"Nine Remoteness Master's injury level was 1/1,000th. Black Universe Creator's injury level was 3/1,000ths." Luo Feng nodded to himself. "No wonder he was so confident. If he had Force Armor, a top-quality pinnacle true treasure, his loss would be even smaller."

When they saw Black Universe Creator suppressing Yuan Ao Master from afar, the numerous great beings from various top powers—Milky River Horde Leader Luo Feng, Ice Mountain Master, Sea Lotus Master, Golden Horn Master, Xuan Mie Master, You Mo Master, Sky Wolf Master, Canthus Devil Master, You Nan Master, Flame Emperor—race in from all directions to surround them.

"Give it up, Yuan Ao."

"Yuan Ao Master, there is no way you can escape."

Universe masters from all directions looked over to the middle, where Yuan Ao Master was being trampled on.

Peng!

Yuan Ao Master was a sorry sight. With the black godly wood in his hand, he was flying in an inverted manner. Under the restraint of the vast light, even inverted flight was rapidly brought to a halt. He looked around, teeth clenched with extreme anger, his single eye was filled with insanity.

"I just obtained this strange object," he shouted. "If I had a little more time, I would have been able to exchange this for even better armor! Or exchange it for more precious materials to increase my life gene level... By then, even you, Black Universe Creator, would not have been able to injure me easily."

Luo Feng nodded to himself. True. Yuan Ao Master may have had a strange object that allowed him to attain an attack force that matched the level of Star River Master and Nine Remoteness Master, but his godly body's life gene level and defense armor were still a notch lower, so his defense level was obviously not on par.

"Even if you had better armor, you would still be unable to put up resistance." The golden-flamed figure advanced again. At the same time, he shouted out an order: "Ice Mountain, it's time to take out your true treasure! Ice Mountain!"

From afar, Ice Mountain Master shouted a command. Suddenly, a crystal palace appeared and rapidly expanded. In the blink of an eye, it had become a towering place that was 60 million miles tall. The entire palace was filled with sculptures of secret engravings and exuded an ancient, cold aura.

"Open!" Ice Mountain Master shouted.

Hua!

The doors of that ancient palace opened with a loud rumble, and behind those doors was pitch-black darkness. An immeasurably massive suction force was exerted on Yuan Ao Master in an instant. This was

a pinnacle sealing type true treasure. Activated by Ice Mountain Master, its power was so strong that even Yuan An Master felt his godly body budging repeatedly under its influence.

"You think you can suppress and seal me in here?" said Yuan Ao Master.

His godly power was burning as he did all he could to resist. At the same time, he shouted and looking about frantically in all directions. At that moment, Yuan Ao Master resembled a lone wolf at its craziest... He had come to the moment of life or death.

"If you are not going in on your own, I will send you in," the golden-flamed figure said with a wave of his hand.

"Black Universe Creator!" Yuan Ao Master clenched his teeth with rage. As though with great reluctance, he shouted, "If you help me, I will give you this black godly wood."

Suddenly, Black Universe Creator stopped.

"Black Universe! Black Universe Creator!" Nine Remoteness Master and Golden Horn Master called out at the same time. They seemed to be very angry.

Black Universe Creator sighed. "Yuan Ao, even if I don't help you, I can still obtain that black godly wood at the expense of some of my true treasures. But if I were to help you... it would be equivalent to offending various powers of the primal universe."

"I—I..." Yuan Ao Master's single eye was filled with insanity as he scanned his surroundings. Through gritted teeth, he said, "I still have one treasure... A remnant diagram left behind by a universe supreme being called 'Xuan Yuan,' who was annihilated long ago—the Tilted Peak Sector Remnant Diagram!"

"What!"

"Xuan Yuan's legacy?"

"Tilted Peak Sector Remnant Diagram?"

Every super being present was shocked, including Black Universe Creator. It was the same feeling for Luo Feng. He did not know Xuan Yuan, but he was dumbfounded by the description: "a universe supreme being called 'Xuan Yuan,' who was annihilated long ago..."

Chapter 1153 Tilted Peak Sector Remnant Diagram

Universe supreme masters were almighty! They might not be able to kill universe masters like Nine Remoteness Master or Star River Master, but it was ridiculous for universe supreme masters to die! Even Teacher Origin who went against the original universe was only suppressed!

"Die? A universe supreme master died?" Luo Feng was shocked.

Remote Ocean body immediately connected to the virtual universe and started to search for the information on "Xuan Yuan." Luo Feng got the information immediately with his access authority.

Xuan Yuan: a universe supreme master born before the Great Incarnation. He loves adventure. He died because he got trapped in one of the three Lands of Extremis in Universe Ocean, Tilted Peak Sector.

"Three Lands of Extremis in Universe Ocean? Adventure?"

Thoughts flooded Luo Feng's mind.

A universe supreme master died there... How dangerous is Tilted Peak Sector? Three Lands of Extremis? No wonder, if it's a Land of Extremis.

Just when Luo Feng learned about the information through the virtual universe, Yuan Ao Master believed that he had grasped the last chance to survive.

"Yes, Xuan Yuan! That adventurer and explorer Xuan Yuan!"

Yuan Ao Master stood in the sky, and the space fragments were crushed by the endless light domain. The small fragments hit Yuan Ao Master, but he was standing there still like a mountain. He was in extreme danger and was under a pinnacle seal type true treasure, Ice Mountain Palace. As long as the other great beings kept attacking him in a group so that he wasn't able to resist Ice Mountain Palace, he would be doomed if he was sucked into the palace.

"How will you prove that you have a remnant diagram of Tilted Peak Sector?"

"You might be lying to survive."

The universe masters gazed at him in the distance. Even Black Universe Creator didn't make a move.

"Thought I was lying? Where do you think I got that black wood?" Yuan Ao Master looked around. "I think you all know that this strange object will only show up in the three Lands of Extremis."

All the universe masters went silent. A strange object was only born in the Lands of Extremis.

"I got the remnant diagram by luck, but I never dared to let any great beings know because I don't want trouble," said Yuan Ao Master. "With this remnant diagram, I explored Tilted Peak Sector and got a strange object by luck. Another universe master, 'Hu Master,' also found it, but he got killed by me instantly."

"You were the one who killed him."

"You killed Hu Master."

The universe masters understood what happened now. Some universe masters died in Universe Ocean without even sending any messages, so the reasons for their deaths remained unknown.

"Haha... He's just unlucky." Yuan Ao Master looked around. "I just got that strange object, and Universe Ocean is too dangerous, so I came back to the original universe and tried to find some powers to buy a true treasure. After all, with that godly wood, my attacking true treasures are useless, and I can get a higher defensive armor. Even some valuables to improve my life gene. However... Before I can do something, that human Luo Feng came!" Yuan Ao Master looked to Luo Feng and clenched his teeth.

"Luo Feng!"

Luo Feng smiled at him in the distance.

"I don't understand it. The Ancestral God School knows everything. Why does it want me dead?" Yuan Ao Master clenched his teeth and glared at Luo Feng. "Nine Remoteness, can you tell me why you come here to kill me? I haven't offended the Ancestral God School at all."

"You deserve to die," said Nine Remoteness Master coldly.

"Tell me why!" Yuan Ao Master roared.

"Stop rambling!" shouted Flame Emperor. "You might have just made up the whole story. Everyone knows you got that strange object by luck! But you can't prove you have a real Tilted Peak Sector Remnant Diagram. And you can't prove it was left by Xuan Yuan."

There were many Tilted Peak Sector remnant diagrams. Tilted Peak Sector was one of the three Lands of Extremis in Universe Ocean, and it was boundless. The remnant diagram of its periphery was worthless. On the contrary, those diagrams that documented the depth were invaluable. And it had to do with the area as well. A diagram that pictured an area of a million square kilometers was nothing compared to that of 100 square light years.

As for Xuan Yuan, he was a universe supreme master born before the great incarnation, and he'd lived longer than any universe supreme master in the original universe... After all his adventures, he'd inspected Tilted Peak Sector countless times. The Tilted Peak Sector Remnant Diagram was priceless, and that remnant diagram could certainly be used to gain quite a few valuables—even supreme true treasures.

"This is the diagram of Xuan Yuan!" Yuan Ao Master roared. He waved his hands, and a black-and-gold cloth showed up. "This is 'Pulling Traces Diagram.' Pulling traces are extremely rare and valuable materials. Even universe supreme masters won't use those to make a map easily."

"Pulling Traces Diagram!"

"Pulling Traces Diagram!"

"Those are pulling traces!"

"The map carried by Xuan Yuan was a pulling traces diagram!"

All the universe masters were thrilled, as none of them were rich enough to make a map using pulling traces.

In the virtual universe, Luo Feng and Ice Mountain Master stood in front of Primal Chaos City Leader.

"We can't be sure whether what he said is true or not," said Primal Chaos City Leader.

"Brother, Yuan Ao Master just took out a pulling traces diagram!" said Ice Mountain Master.

"A Pulling traces diagram?" Primal Chaos City Leader was shocked, "Yuan Ao Master is only a lone universe master. He suddenly got a strange object, and he just took out a pulling traces diagram... He might be telling the truth! If it is indeed a Tilted Peak Sector Remnant Diagram left by Xuan Yuan, it'll be incredibly valuable. More valuable than that strange object. Brother, Luo Feng, try your best to get that

pulling traces diagram. There's only one pulling traces diagram, and it can't be divided. Cooperate with each other and get it."

"Sure." Ice Mountain Master nodded, and his eyes glinted fiercely.

"Sure, teacher." Luo Feng nodded as well.

The Northern Territory Alliance.

"Pulling traces diagram?"

"Yuan Ao Master seems to be telling the truth, as he has a pulling traces diagram! The space and time around me are locked, and I can't get there directly by god country transportation. Try your best to get that pulling traces diagram first before seizing that strange object."

"Yes."

"Yes."

The demon race.

"You have to seize it! You can't divide pulling traces diagram, and nobody is willing to do that. Black Universe Creator is so lucky that he got there first. It'll take us some time to arrive there, and it'll be too late. Sky Wolf, You Mo, try to get that pulling traces diagram and run."

"Yes," Sky Wolf Master and You Mo Master answered.

Both of them left their avatars there to report to Dream Demon Ancestor and Shock Demon Ancestor. Their original target was the strange object, but now, their target was the Tilted Peak Sector Remnant Diagram.

The prison race, the crystal race, and the space beast alliance... All the powers were tempted.

Universe Ocean was a place where many more valuables were located than in the original universe. Many pinnacle true treasures and even supreme true treasures were born in the Lands of Extremis in Universe Ocean! Which was why the remnant diagrams of the three Land of Extremis were always worthwhile, and the larger the area on the diagram was, the more precious the diagrams would be.

Besides, the great beings in the original universe were all born after the great incarnation. The great beings born before the great incarnation had all lived longer, so they were more familiar with Lands of Extremis. A remnant diagram left by Xuan Yuan was definitely more valuable than a strange object.

Hong! Hong! Hong! Hong! Hong! Hong!

Powerful forces surged, and the great beings were all staring at Yuan Ao Master and Black Universe Creator.

"Black Universe Creator, you won't be that greedy, will you?" said Nine Remoteness Master.

"Black Universe Creator, you have a supreme true treasure, and you're a lone universe supreme master," said Golden Horn Master. "That remnant diagram is not that useful to you."

All the supreme beings were gazing at Black Universe Creator. Nine Remoteness Master, Golden Horn Master, Ice Mountain Master, and Canthus Devil Master... All of them were able to stall him.

"I'll have the diagram," said Black Universe Creator. "I'll protect you!"

"You won't!"

"Do it!"

"Do it!"

All the supreme beings of the nine superpowers exploded, while Golden Horn Master and Canthus Devil Master tried to corner Black Universe Creator. Golden Horn Master opened his wing wide, roared, and charged at Black Universe Creator. So did Canthus Devil Master.

"Kill!"

"Kill!"

All was madness.

"Damn it!" Black Universe Creator shouted. He was infuriated, but his power was suppressed in the original universe, so both Golden Horn Master and Canthus Devil Master were only slightly weaker. Besides, Golden Horn Master and Canthus Devil Master had strong armor and were both top-tier beings in their alliances.

"Get in."

"Get in."

All the universe masters were encircling Yuan Ao Master. He was in despair. The universe masters sent were all-powerful! Golden Horn Master and Canthus Devil Master alone were able to pin down Black Universe Creator, and it was too easy for those universe masters to seal Yuan Ao master if they worked together.

"Ah! Want to kill me?" said Yuan Ao Master. "Want to get my true treasures? Then come and get them!"

Yuan Ao Master roared and tore the pulling traces diagram apart.

Hong!

It became dozens of pieces, and the pieces flew away at all directions, attracting all the universe masters.

"Just get it!" Yuan Ao Master turned around and fled like a beam of light.

Chapter 1154 Crazy Battles of Contention

After all, the Pulling Traces Diagram was merely a piece of Tilted Peak Sector Map that was made out of a unique material. Since Yuan Ao Master's power could allow him to tear and destroy an ordinary true treasure effortlessly, the Pulling Traces Diagram would naturally be torn and divided into a dozen smaller pieces within the blink of an eye. This was like the black metal boards Luo Feng used to record the Nine Volume Manual. Although the diagram had been shredded into pieces, every fragment would still contain a part of the drawing on the diagram.

Putting all 12 smaller fragments together into one combination, a complete version of the Tilted Peak Sector Remnant Diagram left behind by Xuan Yuan would be obtained.

"Pulling Traces Diagram!"

"That loathsome Yuan Ao!"

Initially, the dozen universe masters from numerous top powers were angry, but their anger was soon replaced by a contiguous scramble for the fragmented Pulling Traces Diagram. This was because they were all aware that even if only fragments were left... They were nonetheless part of Xuan Yuan's legacy, so every fragment still recorded a part of the remnant diagram. All of these were highly valuable!

Ice Mountain Master anxiously sent out a voice transmission: "Luo Feng, grab that Pulling Traces Diagram."

"Understood." Luo Feng was also frantically trying his best.

The towering yet pale-looking Canthus Devil Master let out a fearsome roar. "Do not contend with me!" He stopped his attacks on Black Universe Creator. Then, paying no heed to Black Universe Creator, he headed straight for one of the flying fragments of the Pulling Traces Diagram that was nearest to him. It was one of the bigger fragments of the Pulling Traces Diagram. "Get lost!"

Hong! Long!

Canthus Devil Master was holding onto a gigantic, long whip. With a sudden lash, the whip grew even longer. It was more than 60 million miles, and it swept toward Sea Lotus Master of the bug clan, who was about to snatch a fragment of the Pulling Traces Diagram. Amidst these frenzied attacks raining down, Sea Lotus Master did not dare summon the large number of bug soldiers under his command.

"Canthus Devil!" Sea Lotus Master's beautiful face was scrunched up in anger.

"That is mine, bug clan! Don't even think about taking it!" Canthus Devil Master gave a furious roar and charged.

"Humph! That is mine, you go look for others!" said Sea Lotus Master.

Suddenly, endless ripples started appearing within Sea Lotus Master's surroundings and spread out in a circular motion. The strong impact repelled all of Endless Light Domain within that area, which naturally formed a suppression over Canthus Devil Master.

The pale-looking Canthus Devil Master roared. Suddenly, black waves started spreading out in all directions with him as the center. Black, raging water of the ocean also spread out within the blink of an eye, charging at the Endless Light Domain and Endless Ripples Region in the surroundings.

The universe masters from the top nine powers who were present at the Yuan Ao Secret Region were all well-prepared. Three of them had pinnacle domain type true treasures-Golden Horn Master, Sea Lotus Master, and Canthus Devil Master.

Previously, when they were fighting Yuan Ao Master, solely Golden Horn Master's pinnacle domain type true treasure was enough, as everyone was quite united and acted with concerted efforts. However, they were now all fighting for this Pulling Traces Diagram... How could they stay united? As expected, all of them would be putting in their best. Those with greater powers would naturally be more ambitious, seeking to claim one or several pieces-or the bigger fragments of the Pulling Traces Diagram...

Black Universe Creator suddenly gave a low growl. "You all can fight for that Pulling Traces Diagram. I don't want it. I only want that strange object."

"All right."

"All right."

"Black Universe Creator, we shall not contend with you."

"The strange object shall be yours."

"The strange object goes to you; Pulling Traces Diagram goes to us."

Many great beings let out sighs of relief upon hearing this. In terms of power, Black Universe Creator was definitely able to defeat them. Earlier, through joint efforts, they could suppress even a universe supreme being. But the moment they were no longer united... if Black Universe Creator set his heart on fighting, even if it was not possible to obtain half of it, he could still hope to get quite a sizable amount.

"Humph!" Black Universe Creator sneered inwardly. "If it was the complete Tilted Peak Sector Remnant Diagram left behind by Xuan Yuan, then it would definitely have records of the details of the situation from the outer world to the bottommost depth. But now, it is tattered and torn. Even if I were to obtain ten fragments, they would still be segregated fragments scattered about randomly. They would not be able to form a clear route, which means their value would be greatly reduced... I would be better off with this strange object in hand. With this strange object, my power within the Universe Ocean would be boosted to another level up!"

Hong!

Black Universe Creator chased after the escaping Yuan Ao Master as fast as he could.

Although the various parties were fighting each other-regardless of being under the suppression of Endless Light Domain, Endless Ripples Region, or Endless Black Water Region-they would all be dealt with intentional suppression. Since they had all given their word to Black Universe that the strange object would be his to claim, they would naturally fulfill their promise and give the favor to Black Universe Creator. Besides, the act of Yuan Ao Master shredding the Pulling Traces Diagram into fragments had made many of these universe masters angry.

"Ice Mountain Master, help me out," Black Universe Creator said. "Give me full control of your Ice Mountain Palace. After all this, I will give you a pinnacle true treasure as a gift of gratitude."

"Sure."

Ice Mountain Master used part of his consciousness to control Ice Mountain Palace as he tried his best to suck Yuan Ao Master into it. As for Ice Mountain Master himself, of course he would be with the other universe masters fighting crazily for the fragments of the Pulling Traces Diagram.

"Yuan Ao Master, you are hopeless," Black Universe Creator said, rapidly closing up the distance. "Annoying."

Yuan Ao Master's speed was ridiculously slow. With Black Universe Creator's ability to restrain time and space, his pinnacle domain type true treasure and pinnacle sealing type true treasure's suction force... Under the three-tiered restraint, Yuan Ao Master's speed was piteously slow, while Black Universe Creator could maintain his speed.

Yuan Ao Master communicated via voice transmission. "Black Universe Creator, I will give you this strange object. How about you let me off?"

Surrounding voices in the void space had already been distorted by the suction force of Ice Mountain Palace, so even godly powers were dispersed and scattered. This, in turn, allowed Ice Mountain Master to be able to detect the Yuan Ao Master's voice that was meant to be transmitted to Black Universe Creator.

Even though he was far away, Ice Mountain Master's consciousness was constantly following everything that was happening on this side. "We cannot let him off," said Ice Mountain Master. "Black Universe Creator. He has to die."

"Kill him."

"Kill him."

Universe masters had very powerful consciousnesses. Even if they were to give their all to fight for the fragments of the Pulling Traces Diagram, they were still able to pay attention to the scene of Black Universe Creator going after Yuan Ao Master. Clearly, they all wanted Yuan Ao Master's life. Once he was annihilated, they would be considered to have made a great contribution in their capacities as top powers of the universe. The primal universe would bestow rewards to their races in return.

"You will give me the strange object?" Black Universe Creator asked.

"Yes, I am giving it to you," Yuan Ao Master said with heightened anxiety. "Let me go."

"If I kill you, I will also be able to obtain the strange object," said Black Universe Creator, "in addition to all the various true treasures you carry with you. I will also be considered to have made a great contribution. Although none of these factors are important to me-except to be able to contribute to the primal universe-of course, more is better."

Black Universe Creator laughed and announced, "Yuan Ao, meet your doom!"

"Contribution, what are you contributing?" Yuan Ao Master asked persistently.

"Dying fellow, there is no need for you to know so much," Black Universe Creator said. Then he charged toward Yuan Ao Master at high speed.

Because Black Universe Creator did not involve himself in the fight for fragments of the Pulling Traces Diagram, the time and space under his control had shrunk to a size that was only surrounding the area he and Yuan Ao Master was in, and his control had no influence over the others.

Therefore, Luo Feng had much to gain out of this situation.

"Golden Kingdom!"

Luo Feng flapped his wings. In an instant, an endless, misty golden light enshrouded a region with a radius as big as one light year-except for the part of the region that was under Black Universe Creator's control. Every other region fell under Luo Feng's control.

"What strong control."

Black Universe Creator watched from afar, where that endless space had been broken off by the force from the silver-winged figure. Then he continued raining attacks on Yuan Ao Master.

Hua! Hua! Hua!

Golden waves were spreading. Nine Tiger River had covered an area of three 1,800 miles in an instant. With the empowerment of Golden Kingdom, Nine Tiger River was blatantly superior. Except for the three main regions-namely, Ripples region, Black Water region, and Light region-the top-tier domain type true treasures used by other great beings were all destroyed to naught when Luo Feng's Nine Tiger River crashed into them.

Everyone understood the rules. Like Luo Feng's Golden Kingdom, although it was able to control an extremely large area, he would never intentionally cause destruction to other regions. Due to the far distance, even if he were to cause destruction intentionally, he would never succeed. On the contrary, he would be offending the other great beings.

Those who owned pinnacle domain type true treasures like Golden Horn Master, Sea Lotus Master, and Canthus Devil Master were all clear of their own capabilities. They exercised self-restraint when it came to pinnacle domain type true treasures and would never cause disruptions to the operations of other great beings; by doing so, they would become a common enemy and would be subjected to mass attacks by the others

"Annoying!"

"Luo Feng, how dare you contend with me? Courting death!" Flame Emperor shouted as the fragment of Pulling Traces Diagram that was almost within his grasp became enshrouded by Luo Feng's Nine Tiger River instead. This was because his domain true treasure fell apart after being crushed by Luo Feng's true treasure.

"Flame Emperor, this valuable was meant to be owned by the abled," mocked Luo Feng. "If you have the capability, come get it."

The fragment of the Pulling Traces Diagram was within Nine Tiger River, and it flew toward Luo Feng at a rapid speed.

"That is mine."

Nine Tiger River transformed into a stream of light, but he directly charged into Nine Tiger River.

Hong! Long!

Flame Emperor held on to his Yan Shen Halberd. Then he roared, and with a wave of his Yan Shen Halberd, he sliced a path out of the endless golden waves and made his way after the fragment of the Pulling Traces Diagram.

This made Luo Feng jump with shock. The Pulling Traces Diagram was still 12 million miles away from him. It would take quite a while for it to reach him, so it seemed like Flame Emperor could easily intercept midway.

"Humph."

Luo Feng was holding onto his pinnacle true treasure Absolute Guest.

Sou!

Immediately, he charged over. At the same time, using Nine Tiger River, he intentionally manipulated the fragment of Pulling Traces Diagram into making a detour so that it would be moving at a speed that was close to his. Then, with a single beckoning, he speedily stored the Pulling Traces Diagram in his world ring. This is the first fragment he had obtained!

"Hahaha! Many thanks, Flame Emperor," Luo Feng said, gazing at Flame Emperor. "Courtesy calls for reciprocity. Isn't that so? I believe we have achieved that now."

Flame Emperor went pale. He knew what Luo Feng was referring to. Back when Luo Feng had approached him to claim his Force Armor, he had secretly let out news about Luo Feng's tracks, which caused many universe knights and universe overlords to lay ambush and attack Luo Feng. That had nearly cost Luo Feng his life, and even up to the moment when Luo Feng finally reached him, Flame Emperor had not been willing to hand over Force Armor. Eventually, Luo Feng had to use Sitting Mountain Guest's name to oppress Flame Emperor, at which point Flame Emperor had finally given up Force Armor.

Back then, Flame Emperor's doings were vicious. This time around, Luo Feng had managed to take an eye for an eye.

"Humph!" Flame Emperor said. "If not for Teacher's bias toward you, which allowed you to own such a supreme true treasure. You would not be able to possess such unique skills in controlling space. Then how would you be able to manage to snatch the fragment of the Pulling Traces Diagram away from me?" Flame Emperor's transmitted voice dripped with coldness. "In terms of capability, you are not my match at all."

"Hahaha! You can't snatch it from me, so you are blaming it on Teacher, saying that he was biased." Luo Feng scoffed.

Sou!

Luo Feng turned and flew off. He could not be bothered with Flame Emperor.

"Loathsome!" snarled Flame Emperor. His expression was fearsome. With gritted teeth, he turned to fly off in another direction, where his final hope of obtaining a fragment of the Pulling Traces Diagram was.

"Suppression!"

With Black Universe Creator's great efforts, coupled with the cooperation of Ice Mountain Master and the coordination of a pinnacle domain type true treasure, Yuan Ao Master sustained such severe injuries that he finally flew toward the gigantic doors of the palace and out of Ice Mountain Palace.

"Aaah! Aaah!" Yuan Ao Master roared with insanity. "You want me dead? You want my true treasure? You all think I will let things go your way so easily? Self-destruct!"

Hong!

How frightening the godly power contained by a universe master's million-mile-tall godly body was! And for it to self-destruct within an instant... That self-destructive power was so strong that it surpassed the strongest attack by Star River Master to fully attain the ultimate limit set under the influence of the primal universe.

All at once, an immeasurable energy wave charged out in all directions.

"Yuan Ao has self-destructed."

"Protect the Pulling Traces Diagram!"

"Protect it well!"

Chapter 1155 That's Mine

"Be careful."

"Pulling Traces Diagram!"

The universe masters who were fighting each other were all terrified by the self-destruction of Yuan Ao Master. A universe master a million kilometers tall had blown himself up, and the energies burst out instantly. The resulting shock wave was billions of times stronger than a supernova. It eradicated everything!

Peng! Peng! Peng!

The space fragments flying in the distance turned into particles. So did the space around him! As for the universe masters, they all tried to form a huge protection, either by using pinnacle domain type true treasures or burning their godly power.

"Defend!"

"We can't let that shock wave destroy the Pulling Traces Diagram!"

Everyone, including Black Universe Creator, manipulating the space, was trying to resist that shock wave. The center of the explosion was horrendous, and Black Universe Creator, who was fighting Yuan Ao Master, was affected the most. However, he had a supreme true treasure to protect him, so he only bounced away several kilometers without being injured. As for Ice Mountain Palace, which was close to Yuan Ao Master, it was also blasted away.

Hong! Hong! Hong! Hong!

The power of the shock wave was already significantly weakened when the shock wave arrived at the universe masters, but the universe masters still felt pressured, as they needed to protect both themselves and the fragments of Pulling Traces Diagram.

Even with that defense, the shock wave turned the space into particles. As for the fragments of Pulling Traces Diagram, they were floating in space, and because of the shock wave, they flew in all directions.

After a while, the shock wave dissipated.

"We protected it."

"Humph! That Yuan Ao Master didn't want to make things difficult for us—even going so far as to commit suicide. If it weren't for so many universe masters being here, the Pulling Traces Diagram fragments would have been turned into ashes. Thank God."

The space 10 billion square kilometers around them had been turned to particles, and they flowed like sand. The particles—elements of space—started to gather.

Luo Feng was relieved after defending himself against that shock wave.

"Luo Feng, two huge fragments of the Pulling Traces Diagram are flying toward you!" A godly power transmitted a voice.

"Ah!"

Luo Feng noticed the two fragments of Pulling Traces Diagram instantly. He looked back and saw two fragments floating tens of millions of kilometers away from him, and the two fragments were significantly large. The smaller one was twice as big as the one he obtained, and the larger one was more than three times larger.

"It's mine." Luo Feng flew toward it like a beam of light.

"Not on my watch!" A roar was transmitted through godly power. "That's mine!"

Luo Feng took a glimpse. The giant black Sky Wolf was also flying toward it, roaring at several others who were trying to seize it.

"Humph! Sky Wolf, you want to compete with me for that?" Towering Flame Emperor, holding his giant Yan Shen Halberd, transmitted his voice. "My third brother, don't even think about getting this one!"

"Hahaha...! I haven't gotten any fragments yet," You Nan Master laughed.

"Then let's fight," said Luo Feng coldly.

At that moment, Flame Emperor, Luo Feng, You Nan Master, and Sky Wolf Master were the closest to the fragment, and Flame Emperor and Luo Feng tried to compete for it. Other than them, Ice Mountain Master and You Mo Master were also approaching the fragments.

Apparently, the two fragments were close to each other, and since they were large, the universe masters would fight for those two.

"Let me help you, Luo Feng." Ice Mountain Master flew toward him like a trace of light.

"Sky Wolf, let's strive together." You Mo Master also flew toward them.

All was madness. The six universe masters were all staring at the fragments with eyes gleaming.

"No...!" Luo Feng felt intimidated. You Nan Master was incredibly fast—the fastest out of all of them. Luo Feng tried to suppress him using his Golden Country, but the black mist around You Nan Master blocked it. They were rather far from each other, so Nine Tiger River couldn't reach him.

"Uncle, do you have a domain type true treasure?" Luo Feng transmitted his voice instantly.

"I do!" answered Ice Mountain Master.

"Uncle, combine your domain type true treasure and my Golden Country," said Luo Feng. "Then we can resist them."

"Sure."

Hua! Hua!

The black mist permeated, and there were ice crystals in the mist surrounded by golden light. They tried to stop the other parties altogether. Under that power, the black mist of You Nan Master crumbled.

"Hahaha! Luo Feng, this wing true treasure of yours is indeed powerful," said Ice Mountain Master. "It has such a strong control over space. With my top-tier domain type true treasure 'Cold Fog Sector,' it can compare to a pinnacle domain type true treasure." Ice Mountain Master was excited, which was rare. "These two fragments belong to us humans!"

"Yes!" Luo Feng got excited.

"Damn it!" Flame Emperor roared. Under that double pressure of the black mist and the golden light, Flame Emperor was slowed down significantly! However, he could only clench his teeth and reluctantly admit defeat. He transmitted his exasperated voice: "Damn you, third brother!"

Hong! Long!

Flame Emperor flew in another direction. He didn't want to waste his time, as he knew he couldn't get the fragments. He needed to hurry and get other fragments.

"Hahaha! Milky Way Horde Leader, you're indeed impressive. It seems the two fragments will fall into your hands. I'll stop now." You Nan Master also found out that he was too slow to get that under the suppression. He transmitted his guffawing voice and left like a beam of light.

Two parties chose to leave. Only the demon race and human race were still competing.

"Human Luo Feng!" Sky Wolf Master stared at Luo Feng in the distance. "You were just a baby when I first met you, and now you're so powerful. Unfortunately, you humans are too naïve compare to us demon race."

Hong!

Colorful threads showed up in the sky, and they extended everywhere. They hit the black mist, which was suppressed, and retreated instantly. Even with Golden Country, Cold Fog Sector kept drawing back under that power.

Ice Mountain Master was irritated. "Dream Ancestor Domain!"

"Dream Ancestor Domain!"

Dream Demon Ancestor was one of the two universe supreme masters of the demon race, and the true treasure she used was naturally famous. She had several true treasures that were well-known in the universe—at least—and the pinnacle domain type true treasure "Dream Ancestor Domain" was one of them.

"They have Dream Ancestor Domain." Luo Feng grew anxious. "It's a bit trickier, now."

The combination of Golden Country and Cold Fog Sector may have been able to rival a pinnacle domain type true treasure, but it was still inferior to Dream Ancestor Domain.

I don't have enough godly power. If I become a universe master, my godly power will be able to make Golden Country stronger, and with Ice Fog Sector, it'll be able to rival that Dream Ancestor Domain.

Luo Feng felt bad, but he couldn't do anything about it.

Ice Mountain Master transmitted his voice. "We still have hope."

However...

Hua! Hua! Hua!

The hideous You Mo Master screamed, and black vines shot out of his body. Instantly, 81 black vines covered the sky for tens of millions of square kilometers, and they charged Luo Feng.

"Devil Islet Vine!" Luo Feng looked ghastly.

"It's Devil Islet Vine!" Ice Mountain Master was also furious.

Devil Islet Vine was another one of the well-known true treasures of Dream Demon Ancestor, and it was a pinnacle attack type true treasure on the spiritual force leader path! Pinnacle true treasures should be the least valuable out of all the pinnacle true treasures, yet there were huge gaps among the pinnacle true treasure weapons. Force Armor, for instance, was one of the best pinnacle true treasure armors! As for those inferior ones, they were only able to weaken the attack to 1/10,000th.

The same rule applied to Devil Islet Vine. It was extremely valuable. The vines could be combined as one and could be used as a splash. They could be separated to bind the enemies. Although they could be cut into parts, those parts could merge as one immediately.

"Haha! The major powers in the universe sent universe masters, but the universe masters sent by the demon race are the weakest." Sky Wolf Master transmitted his voice and sounded insolent. "Haha! The demon race is the strongest among the six pinnacle races. How is it possible that it sent the weakest universe masters? We're just here show that we're weak, and we'll only show our trump card when it's crucial. Dream Demon Ancestor gave us 'Dream Ancestor Domain' and 'Devil Islet Vine,' and they're extraordinary in terms of fighting and fleeing! Hahaha, you didn't know our trump cards in the first place, so you relaxed. You weren't vigilant, and that's how we can now take advantage! If you knew our trump cards in advance and resisted us, wouldn't have been able to do that. These two fragments are worthy of our trump cards!"

Sky Wolf Master was smug as the 81 black vines waved through space.

Luo Feng immediately appeared, and so did Ice Mountain Master.

"Damn it." Luo Feng clenched his teeth.

Ice Mountain Master looked irritated as well. They both understood that they had been played by the demon race!

Chapter 1156 Luo Feng and Sky Wolf Master

Luo Feng looked at the two fragments of the Pulling Traces Diagram floating far away, then at the 81 swaying black vines which exuded a vast power as he thought to himself, Even if I were to execute I Am the Universe together with Golden Kingdom and Cold Fog Sector, I might only be able to suppress Dream Ancestors Domain. That Devil Island Vine would still be able to beset me...

One-on-one, even if Sky Wolf Master possessed Dream Ancestors Domain, he would still dare to brave it out. But if the two pinnacle true treasures, Devil Island Vine and Dream Ancestors Domain were to be combined, he would meet the end of his resources, helpless and without hope.

Ice Mountain Master was more decisive and straightforward; the moment he realized this fragment was hopeless, he gave up immediately. "Luo Feng, let's go," he said. "We shall go get the other fragments of Pulling Traces Diagram!"

"Okay." Luo Feng nodded and looked at the faraway fragment of the Pulling Traces Diagram with great reluctance before transforming into a beam of light and flying off.

"Hahaha..." The black Sky Wolf flew towards the two fragments of Pulling Traces Diagram feeling extremely pleased. "Human Luo Feng! Haha! You mere humans want to contend with us demons? What a joke. Humph! In earlier years, when you were all weak, you showed such arrogance. Now that you have become a universe master, you are still not my match."

"Sky Wolf, there is still a fragment of Pulling Traces Diagram far away, and I am making my way there," Remote Lord Master informed him via voice transmission.

"Okay," Sky Wolf Master was quick to agree. "The other fragments of Pulling Traces Diagram here are drifting further apart, and the majority are not that big. They are not worth our joint efforts. We shall split for now and seek the other fragments of the Pulling Traces Diagram separately. Maybe we are able to obtain more that way."

Luo Feng and Ice Mountain Master were quick to separate and seek the random fragments, too. After all, there was only a total of close to 20 universe masters. The number of fragments of Pulling Traces Diagram was more than the number of universe masters. If two universe masters were to act together... although it would greatly boost the success rate of obtaining fragments, they would lose out in chances to fight for more fragments. Unless they were in a situation similar to the previous one—where one fight could earn them something that was comparable to six or seven fragments—it was not a preferred method to join hands in a battle.

"It's mine."

"Ice Mountain, stay away from this piece."

"Hahaha... Nine Remoteness Master, you are here too? Without a domain type true treasure, how can you defeat us?"

The battles for contention grew serious.

The interlayer of this space had been formed when close to 20 universe masters from the top nine powers exerted their powers. Some of them were blessed with natural strength—like Ice Mountain Master and Canthus Devil Master—while some had extremely strong true treasures—like Remote Lord Master, Sky Wolf Master, and Sea Lotus Master... All of these universe masters were executing their techniques.

"I Am the Universe."

During the process of fighting for the fragments of Pulling Traces Diagram, Luo Feng had used I Am the Universe twice, and to his best efforts. Yet even though he had used it twice, he could only obtain a fragment once. This showed how intense the fights were.

While universe masters of the top nine powers were individually exerting their powers, fighting like crazy for those fragments, in the void space in the distance, Black Universe Creator's gigantic flaming palm had grabbed hold of that black godly wood.

"Strange object obtained," said Black Universe Creator in a voice that was low and powerful.

With a slight turn of his flaming head, he looked far into the void space, where chaotic battle raged. Previously, it was because Yuan Ao Master had been constantly on the run while Black Universe Creator remained in hot pursuit. The self-destruction of Yuan Ao Master had happened at a position that was very far from the Pulling Traces Diagram.

I thought I would need to pay a hefty price to find this strange object, thought Black Universe Creator, and I was quite prepared to offer some true treasures to the top nine powers. Who would have thought I could get it so easily?

Black Universe Creator's eyes scanned his surroundings. In a faraway spot within the void space, there were fragments flying about randomly at high speeds, colliding into a gigantic shield, sending the shield tumbling and flying off in a frenzy.

Shield! Round hammer! Holy grail! Grey armor!

One after another, true treasures were scattered and flying off randomly in all directions within that void space. Previously, when Yuan Ao Master self-destructed, the force that emanated was frighteningly powerful. Even his World Ring had cracked and shattered. Some ordinary materials and objects were annihilated to nothing. Only some of the precious true treasures could survive the impact.

Numerous true treasures were flying off in random directions, and because of the collisions with countless other fragments flying at high speeds at random, these true treasures changed course and flew off in other directions too.

With this object, I have achieved my goal. Black Universe Creator looked at the chaotic battle going on far away. These true treasures are scattered all over the place. If I were to go fight for some, the traveling alone would require a long time. I would probably be able to get one or two treasures. To me, I am content with a self-protection type supreme true treasure and the strange godly wood for attacking purposes. As for the various true treasures scattered all over, since flying there would already be time-consuming, I will just leave it to the rest to toil through the battles.

"I'm leaving!"

Hua!

The golden-flamed figure speedily flew up into the sky and vanished amidst the vast, chaotic space.

There had not been many fragments of the Pulling Traces Diagram in the first place. With nearly 20 universe masters from the top powers of the primal universe fighting their best to obtain these fragments, it only took a short moment for everything that could be seen in space to be taken by eager seekers. The stronger beings with more powerful true treasures like Canthus Devil Master and Golden Horn Master naturally had an edge above the rest, while those who were extremely skilled in controlling time and space would have a small advantage over the rest.

Luo Feng had not managed to seize much—merely two fragments—yet he used his Golden Kingdom to help Ice Mountain Master, who was already an extremely powerful being. After all, if the area under the influence of Golden Kingdom expanded, then no matter where Ice Mountain Master wanted to seize something from, with Golden Kingdom supplementing him, he would succeed no matter what. This made him invincible.

"Haha! This has been quite rewarding," Ice Mountain Master said, expressing his gratitude via voice transmission. "I must thank you, Luo Feng, for your help. With your Golden Kingdom assisting me, together with my top-tier domain type true treasure and my personal power, I have seized an amount

that is comparable to Canthus Devil Master, which is a total of five. Adding onto the two you seized, we humans have managed to obtain a total of seven, which is considered quite a feat. A pity the demons managed to obtain two fragments that were much bigger. What a pity."

This time, among the nine top powers, the distribution was as such: some got more, the others got less. The Space Beast Alliance topped the list, obtaining a total of ten! The Nine Territory Alliance was at the bottom of the list with merely three!

Of course, the judgment could not be based solely on superficial numbers, because the fragments of the Pulling Traces Diagram were different in size. A larger piece could be the equivalent of many small ones. While Sky Wolf Master and Remote Lord Master of the demon clan might have obtained a total of five altogether, the total area obtained by adding all the fragments of the Pulling Traces Diagram might not lose out much to that of the Space Beast Alliance.

"The Space Beast Alliance has Golden Horn Master," said Flame Emperor. "The Prison clan has Canthus Lord Master. And Humanity has Ice Mountain Master who, in turn, has Golden Kingdom as empowerment."

"The demon clan actually brought along two of Dream Demon Ancestor's extremely powerful true treasures. These four top powers have already seized more than half of the total, with each possessing about one-sixth of the total!"

Universe masters had everything that happened within battlefields at their fingertips. They were also very clear about how much they obtained. The exchange of blows this time around was also a clear demonstration of Luo Feng's capability.

"Endless golden light, and the ability to control time and space... He is much stronger than a universe master who only wields the power to control a part of time and space! And that endless golden light seemed to be activated and catalyzed by the four silver wings. His true treasure wings may lose out a little to a pinnacle domain type true treasure in terms of power, but when it could control time and space, this was simply unbelievable. Its value is completely comparable to that of a pinnacle domain type true treasure. Humph. If he did not have that golden light space and time domain, Ice Mountain Master would never have been able to seize so many fragments of the Pulling Traces Diagram."

Sky Wolf Master and some other universe masters were now coveting Luo Feng's true treasures. But their helplessness outmatched their desires. Luo Feng was someone who had single-handedly killed over 6,000 universe knights from the three major alliances; they just had to let their desires go, albeit with great reluctance.

"Sitting Mountain Guest is so biased!" said Flame Emperor. "He only gave me Original Soul and Yan Shen halberd. And Force Armor was only on loan when I needed it. When Luo Feng entered the picture, I had to return it to Luo Feng." Flame Emperor's heart was filled with hatred. "Sitting Mountain Guest even gave the supreme true treasure, Star Tower, to Luo Feng. Force Armor and Star Tower. I was aware that he had given them to him, but... But—but his true treasure wings that can control time and space! How rare and unique they are! Only someone like Sitting Mountain Guest could possibly own it, and he actually gave it to Luo Feng! What bias! Just wait, just wait... I may not have gotten as much as you, but I

will trample on you, and one fine day, I may even be able to be like Teacher Origin, who has everyone—even Sitting Mountain Guest—at his feet! Throughout the universe, rampaging the universe... I am the Universe!"

Flame Emperor was so overwhelmed that it filled his entire heart.

"There are true treasures a distance from here. Those are the true treasures that Yuan Ao Master left behind after he self-destructed. Black Universe Creator actually left?"

"Hurry up, true treasures."

A universe supreme being who was a lone wanderer—with nothing to worry about and nothing to hold him back—had gained a strange godly wood. Maybe to Black Universe Creator, the only thing left that could attract him was a supreme true treasure. As for those true treasures that Yuan Ao Master had left behind after his death, they were nothing worthy to Black Universe Creator.

It's the same reason why Sitting Mountain Guest could give such a great amount of valuables to his disciples without any regrets. Why? Because he had enough for himself, with nothing to worry about and nothing to hold him back, so there was nothing more he required. Those that became excess would only be stored in the treasure vault, never to see daylight again.

On the contrary, Space Ancestor and Huge Axe Creator both led their races. They had responsibilities to take care of, so they valued and held other pinnacle true treasure with high regard.

Sou! Sou!

One by one, the universe masters flew off in various directions at top speed. Yuan Ao Master left behind quite a sizable amount of valuable treasures after being annihilated, but as his godly body self-destructed with such great might, all his true treasures had been rocketed in all directions. All of them had landed very far from where Yuan Ao had self-destructed and, unfortunately, also very far apart from one another. The universe masters could only choose one target and head in that specific direction.

Luo Feng locked his eyes on the holy grail right away. "Sand Cup!"

That holy grail was originally named Sand Cup. It was also known as Flame Sand Cup and was one of the top-tier domain type true treasure under Yuan Ao Master's possession. Previously, this sand cup was what Yuan Ao Master had used to release that domain of flame.

"The armor, shield, hammer, and everything else are all useless to me," said Luo Feng. "To maximize the full potential of my Golden Kingdom, I will need a top-tier domain type true treasure that matches it well. Then, together with my Miniature Universe, even in the face of a pinnacle domain type true treasure, I am pretty sure the combination of these three would be difficult to suppress."

Naturally, Luo Feng was determined to get his way, but at that moment, Sky Wolf Master was also making his way over rapidly from another direction.

Hong! Long! Long!

Sky Wolf Master, Golden Horn Master and Sea Lotus Master who owned pinnacle domain type true treasures were all giving full play to their treasure's power, continuously colliding with one another from afar. Luo Feng's endless golden light moved to form a complete cover but without colliding with the others. The other universe masters were unable to control time and space, unable to use their domain to their advantage, or—even worse—unable to detect the position of some true treasures that were slightly further away.

"That's mine!" Sky Wolf Master flew over at top speed.

"It's mine," said Luo Feng

Both attempted to shift the Flame Sand Cup nearer to them by exerting control over the true treasure from afar. However, it was obvious that Sky Wolf Master's pinnacle domain type true treasure was a notch stronger.

Xiu! Xiu!

Luo Feng and Sky Wolf Master were closing in on the Sand Cup without so much as a pause.

When they were both around 60 million miles away from the Sand Cup—and when there was only Luo Feng and Sky Wolf Master left within that 60-million-mile area—Luo Feng's eyes flashed a sharp look.

"The seizure of treasures has to come to an end, and this Sand Cup must fall in my hands," he announced. "I Am the Universe!"

Because he had his Golden Horned Beast body to replenish his godly power, his = original earthling body was able to stay at its pinnacle condition.

Hong! Long!

The vast void space fell into darkness in an instant. A chaotic airflow spread outward. Within this Miniature Universe, at a diameter of 60 million miles, there were only two souls: Luo Feng and Sky Wolf Master.

"Is that the chaotic world that has been shrunken to a miniature size?" said Sky Wolf Master.

Sky Wolf Master was shocked. This operation had been rather delightful, and the number of fragments of the Pulling Traces Diagram obtained was plentiful. If he could finish things off by obtaining this top-tier domain type true treasure, everything would be perfect. But one look at this endless chaotic airflow, and he knew right away that Luo Feng was going to use his strongest technique.

"Hahaha! Human Luo Feng, it's just you alone," said Sky Wolf Master, "yet you wish to fight me?"

The black form of Sky Wolf Master flew amidst the endless chaotic airflow, but his voice alone was able to make the surrounding chaotic airflow tremor and disperse.

Chapter 1157 Flame Sand Cup

Luo Feng looked at Sky Wolf Master in the distance. He hadn't had any power to resist Sky Wolf Master before. He was a top-tier universe master when it came to mind, willpower, techniques, and true

treasures. Even if he had a weaker godly body, with his true treasures, he didn't need to fear any universe master.

Humph. That Yuan Ao Master had the godly wood, and even he couldn't defeat me! Luo Feng thought. As for this Sky Wolf Master, he's the weakest among the 19 universe masters, and he's inferior to Flame Emperor! The only edge he has is Dream Ancestor Domain. I can combine Miniature Universe, Golden Country, and Nine Tiger River to suppress him! I might have a weaker godly body, so I can't rival those powerful universe masters. However, a mere Sky Wolf Master...

"Humph!"

Luo Feng didn't even consider Sky Wolf Palace a challenge.

"Hahaha! You want to fight me with this small chaos world?" roared Sky Wolf Master. "I have a true treasure from Dream Demon Ancestor, and I'll let you see the true power of the true treasure! Get away!"

Hong! Long! Long!

The dreamland formed by the colorful traces blasted everywhere and hit the membrane of Luo Feng's Miniature Universe. However, that Miniature Universe consumed 10 percent of Luo Feng's godly body, and it was formed by his supreme technique. It was not that easy to break!

"Sky Wolf Master, this Dream Ancestor Domain is all you've got!" Luo Feng shouted. "Just watch me break this Dream Ancestor Domain! Let's see how you're going to fight me after that!"

Hua! Hua! Hua! Hua!

An endless golden river flooded out and permeated the surrounding space.

"Haha! Dream Ancestor Domain is a pinnacle domain type true treasure," said Sky Wolf Master. "You want to-? Ah!"

Sky Wolf Master was shocked. That colorful dreamland started to clash, and with the help of Golden Country and Miniature Universe, the golden river was unstoppable.

Peng! Peng! Peng!

The dreamland was like a huge star domain. It tried to expand, but it was forced to contract under the power of the golden river.

"Impossible! This is a true treasure of Dream Demon Ancestor! It won't lose! Break! Break! Break!"

The green eyes of Sky Wolf Master glinted with fierceness. Dream Ancestor Domain formed a dreamy domain. It kept hitting the golden river, but it kept retreating and getting smaller.

"Hahaha! You're destined to lose!" Luo Feng guffawed. "It's useless."

Golden Country and Ice Fog Sector combined, and they were already able to rival the ordinary pinnacle domain type true treasures. This was only slightly weaker than Dream Ancestor Domain!

As for Miniature Universe, it was more powerful than Ice Fog Sector. Miniature Universe, Golden Country, and Nine Tiger River... The combination of these three was slightly more powerful than Dream Ancestor Domain.

"Trap!" Luo Feng shouted.

He wasn't far from Sky Wolf Master, who was in the area of Nine Tiger River. The golden river covered Sky Wolf Master like a huge egg, and the Dream Ancestor Domain remained around Sky Wolf Palace like a yolk.

"How is it possible? Dream Ancestor Domain is being suppressed!" Sky Wolf Master was shocked.

Once Luo Feng performed Miniature Universe, he immediately trapped and suppressed Sky Wolf Palace with the aid of Golden Country and Nine Tiger River. However, Luo Feng faced a difficult choice.

"Miniature Universe can only be maintained for nine seconds every time it's performed! Even if I fly in light speed, I can only travel several million kilometers in nine minutes. I'm now 18 million kilometers away from Sky Wolf Master and almost 100 million kilometers away from the Flame Sand Cup. I can't get to Sky Wolf Master or get the Flame Sand Cup solely by flying. I have to use my Mosha body!"

Mosha body could teleport himself several hundred times in one second, and he could travel several million kilometers every second. It would take around 30 seconds to travel 100 million kilometers! It would take around five seconds to travel 18 million kilometers!

"The most important thing is to get Flame Sand Cup."

Luo Feng didn't dare take any risks. He moved his mind, and Mosha body showed up.

Sou! Sou! Sou!

Phantoms appeared in the golden river. They came from Mosha body moving at its greatest speed. He traveled 400 times every second, and it took him 24 seconds to get to the Flame Sand Cup.

The Flame Sand Cup was a strange, transparent cup filled with sand. Halos surrounded the sand. Mosha body took Flame Sand Cup and put it in the world ring. Then he performed his inherited technique Domain again and rushed toward the original earthling original. It took him another 24 seconds to get back to the original earthling body and get back into the world ring.

"Hahaha..." Luo Feng laughed.

He had to maintain "I Am the Universe," so he couldn't get into the world ring... 10 percent of his godly body was consumed every nine seconds, and around 60 percent of his godly body was gone. He had performed it twice while fighting for the Pulling Traces Diagram. Fortunately, he had Golden Horned Beast body to supply the godly power, so the original earthling body was still at its best status. However, Golden Horned Beast was extremely weak now. (After Luo Feng fought Yuan Ao Master, he went back to his god country once and filled the godly power.)

"Damn it!" The black form of Sky Wolf Master broke the golden waves with the dreamy light domain around his godly body.

However, after a few dozen seconds, he saw Luo Feng get the valuable. Although he tried his best, the golden waves were too broad, and with the golden country and miniature universe, he wasted all his time.

Hua!

Miniature Universe disappeared.

"Sky Wolf Master, you had You Mo Master to help you last time, and that was how you got the fragment of the Pulling Traces Diagram," said Luo Feng. "How dare you fight me alone this time? If it weren't for Dream Ancestor Domain, I would crush you so badly that you could only resort to hiding in your Sky Wolf Palace." Luo Feng guffawed.

This infuriated Sky Wolf Master. "Human Luo Feng, are you really comparing yourself to me?"

"You were suppressed even after practicing for such a long time, and you think it's an honor?" Luo Feng shook his wing, took back space seal, and flew into the distance.

Sky Wolf Master floated in the sky, watched, and clenched his teeth.

"Damn it."

It was exceedingly difficult for a universe master to kill another universe master unless the power gap between them was significant, so most of the fights were about esteem. Sky Wolf Master and You Mo Master had suddenly utilized the two incredible true treasures Dream Ancestor Domain and Devil Islet Vine so they could surely get the fragments. However, he had fought Luo Feng for that Flame Sand Cup with Dream Ancestor Domain, but he lost the fight. It was like a slap in the face from Luo Feng.

"Damn it," grumbled Sky Wolf Master. "That human nobody, he dared to... He dared to...!"

Sky Wolf Master recalled that he had been bestowed Dream Ancestor Domain because of a special situation, and he needed to return it to Dream Demon Ancestor. He was suppressed even with Dream Ancestor Domain; if he hadn't had that... The more he thought about it, the more ashamed he got.

"I should've killed Luo Feng when I saw the first time." Sky Wolf Master clenched his teeth. He saw You Mo Master look at him. "I'm coming."

Sky Wolf Master teleported himself and went toward him. (Luo Feng had rescinded the space seal, so Sky Wolf Master was able to teleport.)

Perhaps all the universe masters, and also Black Universe Creator, thought that they had suffered a loss compared to other great beings, but they had all benefited big time! The only unlucky one was Yuan Ao Master who had self-destructed.

Luo Feng met Ice Mountain Master.

"Hahaha! I saw that Sky Wolf Master suffered losses, and you defeated him?" Ice Mountain Master smiled.

Luo Feng smiled. "I got Flame Sand Cup."

"Flame Sand Cup?" Ice Mountain Master's eyes gleamed, and he praised Luo Feng, "Impressive, Luo Feng. Flame Sand Cup is a top-tier domain type true treasure! Each top-tier domain type true treasure is precious. Like that Blade River Luo... The components are scattered, and it'll take a long time to find all of them. Like your teacher, Star River Master, many well-known universe masters are using top-tier domain type true treasures."

Luo Feng nodded. The uncle in front of him was also using a top-tier domain type true treasure.

"Actually, the reason why so many of them carry pinnacle true treasures is because of the mega-struggle," said Ice Mountain Master. "Most of them don't own pinnacle true treasures themselves but were lent them by universe supreme masters. It's only been a short time since you became a universe master, but you possess better true treasures than many universe masters."

Luo Feng smiled. Like Sky Wolf Master, he was only using a top-tier true treasure, and Sky Wolf Palace was only a senior flying-palace type true treasure.

"All your true treasures-wing, weapon, armor, and Flame Sand Cup-are incredible," Ice Mountain Master complimented. "It's just slightly inferior to your teacher's."

During the conversation, they broke the space and went back to the Yuan Ao Secret Region. Three beings flew toward them. They were Nine Remoteness Master, You Nan Master, and Anaconda Master.

"Luo Feng, do you want to go to the Ancestral God School?" said Nine Remoteness Master.

Luo Feng smiled. "Nine Remoteness Master, I've reported it to Ancestral God, and the task is finished. Now that Ancestral God knows, I don't need to get back. I need to go back to the human territory."

"Milky Way Horde Leader, we'll separate here." You Nan Master and Anaconda Master stood beside Nine Remoteness Master.

Hua!

The golden light shone, and Nine Remoteness Master, You Nan Master, and Anaconda Master went into the golden light and disappeared.

Luo Feng turned around and looked to Ice Mountain Master. "Uncle, let's go."

"Sure." Ice Mountain Master nodded.

A green light shone, and Luo Feng and Ice Mountain Master left and went back to the human territory.

Every power had gained something, but Yuan Ao Master had died. After going back to the human territory, Luo Feng and Ice Mountain Master immediately connected to the virtual universe and told Primal Chaos City Leader everything.

Chapter 1158 Universe Ocean

The virtual universe, at the apex of Thunder Island.

Luo Feng and Ice Mountain Master walked through the hallway side by side, looking pleased. Although the fight on the original star had made him famous—and even made him a universe master—Luo Feng knew that he was still only one of the weakest universe masters. The real reason he had killed all those universe knights was that he'd wanted to regain ownership of Earth and give it back to the earthlings!

The earth was back now. The earthlings had become a bloodline in the universe just like Manka clan, the earthlings had also become a royal bloodline.

Luo Feng knew that he was still weak! He was still at a disadvantage with his Force Armor and Star Tower in front of Star River Master! Without that Star Tower, he was indeed one of the weakest. Fortunately...

Fortunately, I went to the original secret region and found another path, thought Luo Feng. Shi Wu Wings are very special and can control space and time! And I was lucky enough to get a top-tier domain type true treasure: Flame Sand Cup. Miniature Universe, Shi Wu Wings, and Flame Sand Cup... The combination of those three can definitely overpower a pinnacle domain type true treasure and rival the best pinnacle domain type true treasures! Perhaps only supreme true treasures would be able to suppress it. Under that move, my enemies' power will be at least one level weaker.

Usually, the combination of Golden Country and Flame Domain can barely rival a pinnacle domain type true treasure. At crucial times, I can use Miniature Universe, but 10 percent of my godly body will be consumed.

When Luo Feng was still undying, it took 10 percent of his godly body, but now, Luo Feng could spend only 1 percent or even just 0.1 percent of his godly body to perform it, although the power would be significantly weaker.

Sadly, I only have one supreme technique, and it's an aiding technique like Miniature Universe, Luo Feng thought. If only I had an attack type supreme technique.

Beings like Star River Master and Ice Mountain Master all had attack type supreme techniques.

I was one of the weakest before, but luckily, I had Force Armor to protect myself. Now, I can at least suppress Sky Wolf Master.

Luo Feng looked to the being sitting in the distance. He stopped thinking and walked toward him. "Teacher."

"Brother!" yelled Ice Mountain Master.

"Sit," said Primal Chaos City Leader as he poured grape wine for Luo Feng and Ice Mountain Master.

Luo Feng and Ice Mountain Master sat down.

"I can tell that you've gained a lot." Primal Chaos City Leader smiled. "Good job, you two. Luo Feng, tell me everything that happened."

"Sure." Luo Feng nodded.

Ice Mountain Master was aloof. He had gained quite a few fragments of the Pulling Traces Diagram during the fight in Yuan Ao Secret Region, and he'd been helped by Luo Feng, so he was exceptionally nice to Luo Feng.

"I followed the orders of Double-Face Ancestral Cod..." Luo Feng said and began to share the details.

Luo Feng knew the circumstances better than any other great being. After all, they had all joined after Luo Feng. Ice Mountain listened carefully. Luo Feng finished after a short while.

"Two fragments of the Pulling Traces Diagram. Five..." Primal Chaos City Leader looked to Ice Mountain Master.

"Luo Feng's so humble," said Ice Mountain Master. "If it weren't for his Golden Country, I wouldn't have gotten so many against all those universe masters. That Golden Country. It can control space and time, and it's even more powerful than a universe master's control over space and time... With my Cold Fog Sector, it can rival a pinnacle domain type true treasure."

"Golden Country?" Primal Chaos City Leader was thrilled. "What Golden Country? Luo Feng, when did you gain a true treasure to control space and time?"

"Hahaha... Brother, you're his teacher. Even you don't know?" Ice Mountain Master smiled, as he rarely saw his brother surprised

"I really don't know." Primal Chaos City Leader looked at Luo Feng.

"It's Shi Wu Wings," answered Luo Feng.

"Shi Wu Wings?" Primal Chaos City Leader was awestruck.

Luo Feng nodded. "Yes. Shi Wu Wings. I got another true treasure wing on the original star by accident, and that pair of wings merged with the Shi Wu Wings. Together, they formed the wings I have now."

"Merged? It was a broken true treasure?" Primal Chaos City Leader was shocked.

"A broken true treasure?" Ice Mountain Master was surprised, too.

"No wonder, no wonder," said Primal Chaos City Leader. "I got the Shi Wu Wings in Universe Ocean, and I felt that the material was special, but I couldn't tell that it was broken from the outside. I just thought it was a wing true treasure made of special a material. It's a component. Usually, the power will be affected if it's only a component, but the Shi Wu Wings are perfect. It seems that true treasure is incredible."

Luo Feng nodded.

"How's its power?" asked Primal Chaos City Leader.

"Shi Wu Wings can control space and time," said Luo Feng. "Better than universe masters but weaker than universe supreme masters. It must be a top-tier true treasure."

"A top-tier true treasure!" Primal Chaos City Leader exclaimed. "It can control space and time, and it's special. It must be more precious than ordinary top-tier domain type true treasures. Is the four-winged true treasure complete?"

"I don't think so," said Luo Feng.

He had a different status now, so he didn't need to hide even if he had a pinnacle domain type true treasure. Besides, the Shi Wu Wings had been given to him by his teacher, so Primal Chaos City Leader would know if he got the third component. It would be best not to hide from him.

"It's not?" Primal Chaos City Leader was surprised.

So was Ice Mountain Master. "It's not?" he said.

"Haha..." Primal Chaos City Leader smiled. "It must be a top-tier pinnacle true treasure, and it's special as well."

Luo Feng couldn't help asking, "Could it be a component of a supreme true treasure?"

"Haha, a component?" Primal Chaos City Leader couldn't help laughing. "Luo Feng, all the supreme true treasures are perfect, and they're indestructible. Even in the Lands of Extremis, they can't be destroyed, which is why supreme true treasures are always born in one piece. Only owners of supreme true treasures can take parts of supreme true treasures. To break one? No one is able to do that."

Luo Feng nodded. Supreme true treasures like Star Tower... Only Star Tower and seal stars could be taken out. As for breaking it, it was impossible.

"Brother," said Ice Mountain Master. "Your disciple didn't just help with the fragments. He also suppressed Sky Wolf Master—who was using Dream Ancestor Domain—and got the Flame Sand Cup."

"Flame Sand Cup?" Primal Chaos City Leader's eyes gleamed.

"By luck," said Luo Feng.

Primal Chaos City Leader gazed at Luo Feng, looking confused. "Not by luck." He shook his head. "Luo Feng, I know that your godly power is weaker than other universe masters and significantly weaker than Star River Master and me. However, if you're able to suppress Sky Wolf Master and get the Flame Sand Cup... We wanted to protect you and only send you to Universe Ocean after you became a universe master. But now, you can go."

Luo Feng was dazed. Universe Ocean?

"Brother?" Ice Mountain Master said, frowning.

Primal Chaos City Leader shook his head at Ice Mountain Master and looked at Luo Feng. "Universe Ocean is extremely dangerous, but some top-tier universe overlords will go there. You can go, but when you become a universe master, you'll be another pillar of the human race. We planned for you to go to Universe Ocean after you became a universe master, but you're stronger than we thought. You can go to Universe Ocean now.

"Comparatively, the original universe is only a cradle! A cradle that breeds and nurtures us. It's safe. Universe Ocean is the real war zone. Many supreme beings before the great incarnation—and even universe supreme masters—are in Universe Ocean." He stared at Luo Feng. "It's more dangerous, especially the Lands of Extremis. Even universe supreme masters can die there."

Luo Feng held his breath.

"That's where the great beings gather," continued Primal Chaos City Leader. "Many true treasures and valuables are born in Universe Ocean. It takes an eternity for original stars to open, and the most precious one is a pinnacle domain type true treasure. As for the depths of the Lands of Extremis, there are many supreme true treasures and countless pinnacle true treasures... Of course, don't even go to the internal area, let alone the depths. You can only adventure in the outer area. You'll be sharpened there. The great beings before the great incarnation are all older than those in the original universe! Those ancient great beings are almighty, and fighting them can give you more inspiration so that you can improve faster."

Luo Feng nodded.

The great incarnation. When the original universe was born, transformed, operated, got weak, and died... this was an incarnation. Everything in the original universe would be annihilated after one incarnation. After the original universe bred new races, it would be another incarnation. As for the great beings before the great incarnation, some of them were able to survive the great incarnation.

"Go back and prepare," said Primal Chaos City Leader. "Send me all the information on the fragments of the Pulling Traces Diagram. I'll send them to Huge Axe Founder. He and the virtual universe will determine how many contribution points you can get."

Luo Feng nodded. He had made great contributions this time, but Primal Chaos City Leader didn't have the authority to determine that.

"Brother, Luo Feng made the greater contribution this time," said Ice Mountain Master. "Without him, we wouldn't even know about the Yuan Ao Secret Region. I gained the five fragments with the help of Luo Feng."

"If it weren't for the power of Uncle, I would be useless," said Luo Feng.

"Relax. Our race will treat contributors fairly." Primal Chaos City Leader smiled. "Luo Feng, make some preparations. Universe Ocean is not a cradle like the original universe."

"Yes." Luo Feng answered.

"Universe Ocean!" Luo Feng whispered. He was looked forward to it.

Universe Ocean was boundless. No universe supreme masters were able to find the end of it. There was chaos airflow in Universe Ocean, and the original universe was known to be the largest celestial body there! It was unbelievably large.

Aside from the original universe, there were some other small universes. These small universes were less than one-billionth the size of the original universe. It was like an ocean compared to a drop of water!

There was a small universe 10 billion light years away from the original universe. Inside the small universe...

"Hahaha... The plan was made!" a towering iron being said. He had a pair of eyes that were on fire—eyes more terrific than billions of stars combined. "The naïve beings in the original universe didn't suspect anything, but they tried to get the valuables. I gave up that soul slave Yuan Ao Master. I didn't want to, but he didn't make it. And Hao Lei threw the strange object, the godly wood. But it's all worth it."

The power trembled the ground.

"Don't celebrate now," a crawling, mountainous being covered with brown rocks growled. "It's just the start. We need to wait for the harvest."

"Yes."

A lightning giant phantom was in the sky. There were lightning balls in the chest, each of which was like a star. "This era is our last chance," he said. "If we can't seize it, we'll die, and so will our race."

Silence.

The three great beings remained silent for a long time.

"We've set our plan, and we're fully prepared," said the lightning giant. "We sacrificed a lot, and we must succeed. For eternity, for race, we must succeed."

"For eternity, for race," said the crawling, mountainous being.

"For eternity, for race," said the iron being.

The voices rang with absolute determination.

Chapter 1159 - Toya Black Hole

1159 Toya Black Hole

Within the vast expanse of the god country, rolling waves surged on the endless Remote Ocean.

"Remote Ocean?" Luo Feng stood by the edge of the palace square, overlooking the endless Remote Ocean as his consciousness established a connection with the virtual universe to investigate for more information.

Remote Ocean... This truly boundless existence was a domain filled with endless chaotic airflow and a land impregnated with various risks and dangers. The three most dangerous lands of all were: Tilted Peak Sector, Flowing Countless Mountains, and Universe Boat.

Other than these dangerous grounds, the other most common sights within the Universe Ocean would be the countless universes!

These universes were divided into two categories. The first category was the primal universe that had been born naturally within the Universe Ocean. The primal universe was the greatest existence within the entire Universe Ocean; it was one of a kind. The birth of a primal universe led to the breeding and evolution of trillions of races, which reached the peak of reproduction, then went through deterioration or decline, and then ruination. Reincarnation followed! After the final stage of ruination, everything

would return to square one, when a new cycle would begin... This was how the primal universe had given birth of billions of races—and the birth of countless great beings.

The other category was the universe created by universe supreme beings.

The cultivation levels that great beings could attain were many. Undying great beings could own their god countries. And as a great being got stronger, his god country would gradually reach completion; after he became a universe master, the space within his god country and its time laws would be complete. When he cleared the final stage and became a universe supreme being, his entire god country would undergo the final change—it would transform into a miniature universe at its most primal form. Thereafter, it would start evolving gradually.

“Miniature universes are creations of universe supreme beings; no wonder Space Ancestor has one.”

Luo Feng sighed. Since he was about to make his way to Universe Ocean, he prepared by immersing himself in the abundant and complex information he had found.

“Right,” said Luo Feng. “The primal universe of humanity must be Teacher Origin’s creation. As he was being suppressed, the evolution of his primal universe stopped. That was why we were always in the primal stage.”

The primal universe was the point of origin of everything. It had given birth to billions of races, various types of life forms, and countless great beings.

The universe supreme beings that were born in a primal universe would henceforth create many miniature universes. Upon comparison, the miniature universes would never be comparable to the primal universe. Both were on completely different energy levels.

“One round of reincarnation... One round of reincarnation of the primal universe would give birth to countless races and a large number of great beings.” Luo Feng’s eyes lit up. “The so-called great beings before the final stage of ruination would be life forms from the previous universe era.”

Even the virtual universe network did not contain any background information about great beings before the final stage of ruination of each universe. Or, at least, Luo Feng did not find such information. But obviously, judging by his previous conversation with Primal Chaos City Leader, many great beings were still living even after the final stage of ruination!

“Every one of these great beings before ruination is more ancient than any of the great beings in our primal universe.” Luo Feng mused. “Those old fellows, with their countless periods of cultivation, have survived many various ordeals in Universe Ocean. I am sure they are not a group to be trifled with. Teacher is right. By comparison, our primal universe is merely a baby’s cradle! No wonder Teacher was not prepared to let me enter Universe Ocean too early. I have to show that I had a different kind of ability to gain recognition.”

Three days later.

A message arrived from Primal Chaos City Leader. The content was simple.

Luo Feng, after joint verification by Huge Axe Creator and the virtual universe system, you have contributed greatly this time, but the fragments of the Pulling Traces Diagram are individual fragments

that showed no coherence. We are giving you 1,200 true treasure points for the fragments, and we are giving Ice Mountain Master 600 true treasure points to reward him for his efforts. You should prepare yourself; my deity body is rushing over from Universe Ocean. This time, I shall personally bring you into Universe Ocean in my deity form.

“Teacher’s deity form?” Luo Feng’s eyes lit up with great anticipation. “Teacher has three godly bodies. One assumes leadership duties in Primal Chaos City, another assumes leadership duties in the primal universe, and the third wanders about Universe Ocean. It is said that Teacher’s deity form that wanders in Universe Ocean has extremely high combat powers. This is something I have never seen before... Hmm. 1,200 true treasure points is twice the amount given to Teacher Uncle. Seems like the events of me providing my race with important information and helping Teacher Uncle in battle have been recognized as greater contributions.”

Luo Feng started pondering how he should make use of the 1,200 true treasure points. 1,200 true treasure points could roughly buy him an ordinary pinnacle true treasure weapon. Of course, top-tier domain type true treasures like his Flame Sand Cup would be more expensive—roughly 3,000 true treasure points. Even a slightly less superior top-tier domain type true treasure would require at least 2,000 true treasure points.

Top-tier flying palace type true treasures and top-tier soul type true treasures were all very valuable.

He already owned a soul type true treasure of the flying palace type: Blood Cloud Palace. But he dared not take it out into the open, as that would have been equivalent to revealing that he was Blood Cloud Palace Master.

“With 1,200 true treasure points, if I want to buy a top-tier flying palace type true treasure, then I do not have enough.” Luo Feng shook his head, “As for a senior flying palace type true treasure, the price is not worth paying. Forget it. I shall just keep it for future use when I need Teacher Sitting Mountain Guest to help me with making a precious true treasure. I will make use of these 1,200 true treasure points then.”

Luo Feng had already made plans for this trip to Universe Ocean. His original earthling body would take Golden Horned Beast body and Mosha body. The combined power of these three different bodies would justify why it was not worth spending 1,200 true treasure points on a senior flying palace type true treasure.

I shall not concern myself with this anymore, thought Luo Feng. Let me familiarize myself with my Flame Sand Cup first. By using Miniature Universe, Flame Sand Cup, and Shi Wu Wings concurrently, I will have the power to run rampant in Universe Ocean.

Luo Feng stood in the sky of the vast Remote Ocean.

Hong! Long!

In an instant, the boundless, blazing flames spread out in all directions. At the core of god country, a gigantic golden fireball appeared. Luo Feng stood directly in the middle of that golden fireball.

In the twinkling of an eye, almost a month had passed.

Within the human territory of the primal universe—in the primal secret region where Primal Chaos City Leader resided—Thousand Treasures River was as vast and mighty as ever, loosely stretching over a width of a few light years.

“Teacher,” Luo Feng said, bowing respectfully.

“Are you ready?” asked Primal Chaos City Leader. He had donned a golden robe and had green scales all over his head. His face was cool, just like an earthling. Both eyes were peaceful like the stars in the vast sky. Just standing there, he exuded an overwhelming power, as though the surrounding time and space might explode and shatter. It was an intensely aggressive aura.

“Yes, Teacher,” Luo Feng said with a nod while observing Teacher’s deity form.

Teacher’s deity form had the exact same look as the image that often appeared within the virtual universe. The body in charge of matters within Primal Chaos City was ferocious-looking, while the body in the primal universe had to be a special life-form.

“Follow me.” Primal Chaos City Leader nodded and led the way—first through teleportation, then followed by god country transportation.

Shua!

In a deserted land in the primal universe, there was a gigantic black hole. This black hole had long caused the vast surrounding starfield to fall into darkness, but two figures appeared in a flash. They were none other than Primal Chaos City Leader and Luo Feng.

“There are two ways to get to Universe Ocean,” Primal Chaos City Leader explained. “One way is to enter the interlayer of space, then teleport all the way to the other end of the interlayer where the membrane walls of the endless universe will be. Then, one can go through the walls of the universe membrane. They are strongly obstructive, but any universe master can break through them.”

Luo Feng nodded as he listened intently.

“The second way is to go through this Toya Black Hole and leave the primal universe,” Primal Chaos City Leader said. “The Toya Black Hole is said to be the strongest black hole in the whole primal universe. It has such a strong gravitational power that it keeps destroying the membrane walls, which is why, after entering the black hole, you are still able to exit right away.”

Luo Feng was shocked. “It’s really that powerful?”

“Black holes can be strong or weak,” Primal Chaos City Leader explained. “Of course, if it were so easy to walk out of here just like that, we would not allow all great beings to make their exit through here. The most important reason is that the region one reaches upon exiting the Toya Black Hole is surrounded by a total of natural 39 wormholes.”

“Natural wormholes?” Luo Feng’s eyes brightened.

“Universe Ocean is vast and boundless.” Primal Chaos City Leader said, “Once you enter Universe Ocean, you are no longer in an area under the influence of the primal universe. You won’t be able to depend on god country transportation or the dark universe to fly. If you want to roam Universe Ocean, you can only depend on teleportation or the natural wormholes. Universe Ocean is shockingly big. Even the primal

universe is only a fraction of the vast Universe Ocean. Solely depending on teleportation, how long would that take?" Primal Chaos City Leader laughed. "That's why the natural wormholes are so important."

"Universe Ocean is full of illusions that are mysterious and... odious," continued Primal Chaos City leader. "Luckily, we have many natural wormholes. Following the path along these natural wormholes from one end to the other may take a couple of billion light years. To move about quickly within Universe Ocean, the most common way is to depend on these natural wormholes. Thus, the majority of the journey will be spent moving along these wormholes. There are also some other journeys that will require teleportation. Of course, after an endlessly long period, a large quantity of natural wormholes would have been connected at two points, and these would be recorded. Thus, it is easy to find the fastest route to reach your destination."

Luo Feng nodded.

"Remember! Universe Ocean is different from the primal universe," Primal Chaos City Leader said. "The unique structure of the primal universe allows you to confirm coordinates wherever you are. However, there are no ways to confirm coordinates within the Universe Ocean. So, while within Universe Ocean, carrying a map is of the utmost importance. The reference objects on the map are also very important. Based on the map and the reference objects, you will not get lost. Getting lost in the Universe Ocean is terrifying. Once you lost your way... If you think to teleport to get back on the right track, you will more likely find yourself moving further away with each teleportation. Thereafter, you will be forever lost within Universe Ocean. If you are lucky enough, you may be able to find your way back... after countless eras."

The very idea made Luo Feng's heart tremble.

"That is why it is necessary for every universe master to leave an avatar in the primal universe," continued Primal Chaos City Leader. "This will prevent him from getting completely lost within Universe Ocean if he meets with unforeseen circumstances. With an avatar around, at least you are still able to obtain a map. However, even if you do obtain a map, if you get lost somewhere too far away—where you cannot find a reference object on the map—it's also game over for you. That's why, when you are in Universe Ocean, you had better not run about as you please. If you want to explore Universe Ocean, you must depend on flight because whatever you fly by, you can record the details of it on the map."

Luo Feng nodded his head repeatedly. He understood.

"The places on the map with clear markings are where you can teleport," said Primal Chaos City Leader. Then he took on a serious tone, warning, "The places the map does not cover are unknown domains where teleportation is strictly forbidden. I am going to give you the map of Universe Ocean now. This is the most detailed map known to humanity. Of course, ... it is merely a tiny little region within the midst of the Universe Ocean, but at least, the three dangerous lands are included in it."

Soon, Luo Feng received an extremely complicated and gigantic map. It was so complex that it made Luo Feng's heart tremble.

"Let's go!" said Primal Chaos City Leader. "We shall go to Universe Ocean."

Hong!

The two flew straight toward the depths of Toya Black Hole and quickly vanished from sight.

Chapter 1160 - Broken Universe

1160 Broken Universe

Toya Black Hole was the most powerful black hole in the original universe.

Hu! Hu!

The immense gravity—a forceful swallowing and distorting power—could turn a universe knight into ashes instantly, yet it was nothing to Luo Feng as he had his Force Armor to weaken it to 1/100,000th. Luo Feng and Primal Chaos City Leader arrived at the deepest part of Toya Black Hole in a short while.

“That’s the original body of Toya Black Hole,” Primal Chaos City Leader said, pointing into the distance.

Luo Feng looked. It was a sphere with a diameter of three meters, and there were dark, golden engravings on the surface. The engravings formed a strange picture, and the ball was exerting terrific gravitational force. The membrane around the black hole was a membrane of the original universe, which created a hole with a diameter of around 10,000 kilometers.

Shua! Shua!

Luo Feng and Primal Chaos City Leader flew beside the black hole and resisted its gravitational pull. They flew along that membrane hole. Out there was Universe Ocean.

“Ha...”

Luo Feng flew into the Universe Ocean and saw the chaos airflow permeating. The chaos airflow was so terrifically powerful. It wasn’t aggressive at all, but the force would have been able to annihilate an undying fighter instantly.

“So powerful!” Luo Feng exclaimed. “Much more so than the chaos airflow of my miniature universe.”

“Chaos airflow is the source of the energies of a universe.” Primal Chaos City Leader stood in the space and looked at the endless chaos airflow. “I’m not sure about the original universe, but the miniature universes of universe supreme masters all have chaos airflow as their sources of energies. The chaos airflow in Universe Ocean is the purest—much purer than that in the primal universe.”

Luo Feng nodded. The primal universe was only a small universe, and the chaos airflow didn’t have pressure at all, which was why Luo Feng didn’t feel anything before when he was only at star-level.

“You’ll venture through Universe Ocean after leaving the original universe.” Primal Chaos City Leader turned around and looked to the back.

Luo Feng turned around as well. They saw the hole at the center of the membrane. It emanated as if it were a screen covering half of the Universe Ocean.

That’s the original universe? thought Luo Feng. The cradle that breeds billions of races? The cradle that bred me?

He didn't feel the pressure from the original universe, but he felt it was untouchable, just as an ordinary person felt the sun was untouchable.

"Why did Teacher Origin dare to go against the original universe?" whispered Luo Feng.

"The stronger you get, the more you see." Primal Chaos City Leader looked at the membrane. "Even universe supreme masters, those born before the great incarnation, didn't dare to go against the original universe. Teacher Origin is the only one. Perhaps you'll only understand that when you can roam Universe Ocean and defeat those universe supreme masters from born before the great incarnation."

Luo Feng nodded.

"Let's go."

Primal Chaos City Leader took Luo Feng and teleported them. There were 39 space holes in total, all of which were natural wormholes.

"39 natural wormholes of varying sizes. They all lead to different places." Primal Chaos City Leader smiled. "You can distinguish among these wormholes, right?"

"Yes." Luo Feng nodded. The map was accurate, and there were many descriptions. It would be a horrendous thing to lose one's way in Universe Ocean. Luo Feng pointed to a relatively large wormhole. "We'll go along the 15th wormhole."

"Yes." Primal Chaos City Leader nodded. "Let's go."

There was chaos everywhere in Universe Ocean. However, universe masters didn't use their sight alone. The godly power they permeated could help them 'see' the surroundings as well, which worked better than eyes.

Natural wormholes! Teleportation! Teleportation! Teleportation!

Every time, they teleported themselves 10,000 light years away, and the mind and willpower of a universe master helped them teleport at the fastest speed.

After two days, two beings emerged from a space whirlpool.

"Ah!" Luo Feng was shocked.

He saw a huge membrane in front of a gigantic celestial body. However, the membrane was broken. He saw hundreds of holes and cracks on it, allowing chaos airflow to travel between Universe Ocean and the membrane.

"This..." Luo Feng was shocked. "This is a small universe?"

"This is a miniature universe with a diameter of 100 million light years," said Primal Chaos City Leader, dressed in a golden cape. He looked at the small universe and whispered, "A broken miniature universe."

"Broken?" said Luo Feng. Although he had the map, it was too complicated. He only got knew the reference objects. He didn't read the details.

“When a universe supreme master dies, his miniature universe will be broken as well.” Primal Chaos City Leader looked at Luo Feng. “The highest form of a great being is a universe supreme master, and the highest form of a god country is a miniature universe. If an undying fighter dies, his god country will be left broken. If a universe supreme master dies, his miniature universe will be broken as well! Let’s go. I’ll show you this broken miniature universe.”

Sou!

One teleportation transferred Luo Feng to a crack of the membrane.

“Universe membrane.” Luo Feng saw the chaos airflow traveling and hitting that crack, trembling it.

It was a crack more than 30,000 kilometers tall and hundreds of kilometers wide.

“This is...” Luo Feng looked at it.

There were space and land fragments—huge mountains were floating, as well as some broken dead bodies.

Hua!

A part of the membrane broke off. The universe was crumbling. Sometimes, a part of the universe membrane came off, and sometimes, the fragments hit each other. The universe just kept crumbling.

“The original universe breeds countless great beings, and after some time, the original universe will reach its pinnacle level, die, and be destroyed!” said Primal Chaos City Leader. “After which, another incarnation will begin, and lots of genius will be born. Some universe supreme masters and lots of universe masters will be born. One incarnation takes an eternity. In every incarnation, there will be some universe supreme masters, and they’ll each have one miniature universe. Lots of miniature universes are unable to be detected. We’ve found 18,022 small universes in total.”

Luo Feng held his breath.

“This is the third universe era,” said Primal Chaos City Leader. “And there were two universe eras before us. In the entire Universe Ocean... Other than two sanctuaries, only great beings of the three universe eras are still alive. As for the others, they’re all dead.”

“Three universe eras?” Luo Feng was shocked. “Huh?”

Primal Chaos City Leader nodded. “Yes, there are three universe eras represented in Universe Ocean. Our third universe era is still thriving. As for the two eras before us, they’ve been through a complete incarnation. As a result, they have much more great beings than we do. We’re in the third universe era, and it’s the weakest era. The first era was the strongest.”

Luo Feng understood it as well. At the start of the original universe, it would take a long time for great beings to be born. After all, techniques needed time to be perfected. However, as time went by, it would take less time. The third universe era, which he was in, might have only been through half the incarnation, yet the former two eras had been through the incarnations completely, so the number of great beings was different.

Primal Chaos City Leader shook his head and smiled. "No need to look down upon ourselves. Teacher Origin roamed Universe Ocean and was invincible! All the universe supreme masters avoided him."

"Teacher, did you say three universe eras and two sanctuaries?" Luo Feng frowned. "Which two?"

"Actually, we can tell from the number of small universes that a great number of universe supreme masters was born. However, almost all of them are broken already. Apparently, those universe supreme master all died."

Luo Feng nodded.

"There are two powers in the Universe Ocean other than the three universe eras, and they belong to one miniature universe," said Primal Chaos City Leader. "The two miniature universes were born tens of incarnations before us."

Luo Feng was shocked. There were still beings alive from before the two incarnations?

"Those two miniature universes are enormous," said Primal Chaos City Leader. "Normally, a miniature universe has a diameter of 100 million light years. As for those two, one is 2.1 billion light years, and the other is 3.2 light years. They're the biggest miniature universes, and we can't tell which incarnation they belong to."

Luo Feng was shocked. If those two miniature universes had survived all the incarnations, they were indeed incredible.

"Three universe eras and two sanctuaries are the powers in the Universe Ocean. Of course, there's no unity within any universe era. Just as our era is divided among nine superpowers and twelve top-tier powers, the other two eras are also divided among tens of powers, so Universe Ocean is chaotic. Any other power will attack you."
