

## Chapter 1181: Race Contribution

A supreme true treasure was a guarding treasure of a race. Lots of supreme beings felt insecure, as the human race never had a supreme true treasure. However, Huge Axe Founder had gotten a supreme true treasure, and it was something that thrilled all the great beings of the human race.

In the virtual universe, all the supreme beings of the human race gathered.

“Since Teacher Origin was suppressed, we humans have been low-key. Now that Huge Axe Founder has a supreme true treasure, our status in the original universe will be stabilized.”

“I was shocked by the news.”

“Since Teacher Origin was suppressed, the demon race, bug race, and automaton race all try to overpower us—especially the demon race! Now that Huge Axe has a supreme true treasure, the two demon ancestors won’t be reckless.”

There were dishes and wine on the long bench. Huge Axe Founder and the 19 universe masters were talking in excitement.

“Keep it a secret first,” said Huge Axe Founder. “I’m still in the inner area of Tilted Peak Sector, and it’ll take me some time to get back. No one else knows that I got a supreme true treasure, so we must keep it a secret. I’ll reveal it when the time comes.”

“Yes.”

“Okay.”

The universe masters all nodded. The news would be made known. After all, one couldn’t hide a supreme true treasure forever.

Huge Axe Founder wasn’t like Luo Feng. Luo Feng was only a universe knight, and even though he accomplished much on the engraving picture, he wasn’t a top-tier universe master even with Star Tower. He was, at most, good at surviving. Huge Axe Founder was completely different.

It was a fiesta, as this news was worth celebrating by the entire human race, showing another milestone of the power of the human race.

“Luo Feng.”

Primal Chaos City Leader walked toward Luo Feng with a black wine cup.

“Luo Feng.”

“So happy today. Huge Axe is best at axe techniques, and he became universe supreme master with an axe,” said Primal Chaos City Leader. “He got an axe supreme true treasure, and with that, Huge Axe will become much more powerful.”

Luo Feng nodded. He was right. Supreme true treasures needed to be suitable. An axe was much better than a sword to someone who used an axe. Of course, that axe type supreme true treasure had lots of other functions.

“Luo Feng, you asked me for the information on Universe Boat.” Primal Chaos City Leader smiled. “I gave you a piece before. I just talked to Huge Axe, and he had something more detailed. I’ll send it to you now.”

“Thank you, Teacher.” Luo Feng was overjoyed.

Huge Axe Founder had the map? The more detailed the information was, the better. After all, the Pulling Traces Diagram left by Jie Fanzi only recorded a tiny area of Universe Boat. No one had the full map of the Lands of Extremis.

“Teacher, I have a map of Universe Boat,” said Luo Feng. “I got it by luck in Tilted Peak Sector. I’ll send it to you now.”

“Which? Which power?” The smile on Primal Chaos City Leader’s face froze.

He gazed at Luo Feng in amazement. “Good. It’s a record of the inner area of Universe Boat? The maps we humans have can barely rival the one you have. Did you get it from the great beings of the first universe era?”

“Normally, great beings will burn the maps after reading it.” Primal Chaos City Leader looked at Luo Feng. “Just like we told you to burn the map last time. Only those who are extremely confident dare to carry the maps. Like me, Huge Axe, other universe masters who are good at surviving, and other universe supreme masters.”

Luo Feng nodded. Maps of the Lands of Extremis were secrets of a race, and only the top seniors in a race could read them.

Huge Axe Founder would give it to other universe masters when he got one, and Luo Feng would surely give it to the race. It was contribution within the race, and the human race wouldn’t trade it with other races under almost all circumstances. Trades could only happen after a discussion among the seniors or if Huge Axe Founder did it himself.

“I’m not able to kill those who dare to carry maps.” Luo Feng shook his head. “I got the Pulling Traces Diagram in the water area of Tilted Peak Sector by luck.”

“Pulling Traces Diagram?” said Primal Chaos City Leader. “How luxurious. It should be left by a universe supreme master. Lots of universe supreme masters died during the incarnations, and lots of their valuables or maps are left in the Lands of Extremis.”

The universe masters were talking.

“Come here.”

“More good news!” Huge Axe Founder yelled.

Some universe masters immediately sat back down in their chairs with their eyes gleaming. Some shouted, “What?”

“Did someone get another supreme true treasure?”

“Do you really think it’s that easy to get a supreme true treasure, Peng Gong?”

Huge Axe Founder looked at Luo Feng and said, “Luo Feng found a Pulling Traces Diagram of Universe Boat in Tilted Peak Sector.”

Hua!

“Pulling Traces Diagram?”

“Of Universe Boat?”

“How large is the area?”

“Usually, it’s a large area for a Pulling Traces Diagram.”

All the universe masters were thrilled.

Huge Axe Founder nodded. “We now know twice as much as we knew about Universe Boat now, and some core areas are recorded.”

Lots of universe masters went to congratulate or thank Luo Feng... Luo Feng could feel the unity within the human race. Everyone wanted the best for the race.

“Luo Feng.” Huge Axe walked to Luo Feng.

“Huge Axe Founder,” said Luo Feng.

“You contributed the map of the Land of Extremis,” Huge Axe said. “It’s a great contribution. The race needs contributions from great beings. I should give you more than 10,000 true treasure points for that map.”

“However, there are only a limited number of valuables.”

“If your contribution is too large, the race can’t give something equivalent back.” Huge Axe looked at Luo Feng.

Luo Feng smiled. He understood that there were only a limited number of valuables, and they were mainly contributed by Huge Axe Founder. Huge Axe Founder put lots of valuables in the race without asking anything back. He gave the maps to the race, and he nurtured the race like a father.

“I can only give you 5,000 true treasure points,” said Huge Axe Founder.

“You give them for free...” said Luo Feng.

“You need to be powerful.” Huge Axe Founder glanced at Luo Feng. “No need to say no. 5,000 true treasures it is. You need to have it. Become a universe master as soon as possible.”

Luo Feng nodded. He felt that the human race depended on the 20 people. 19 universe masters and Huge Axe Founder! And, of course, Teacher Origin. Huge Axe and Primal Chaos City Leader were the leaders.

I’ll make more contributions, Luo Feng thought.

\*\*\*\*\*

Based on the information he got about Universe Boat and the map he got...

“Please.”

Luo Feng sat in a restaurant close to his home. The light poured on his body, and Luo Feng frowned.

“Based on the information, the keepsakes have different levels. From lower to higher, black, green, and silver. Only powerful universe masters can get the keepsakes. The green keepsakes are in the hands of universe supreme masters. As for silver keepsakes, only the great beings from the holy lands have them.”

Luo Feng frowned. Green keepsakes were in the inner area of Universe Boat and bordered the core area. It was extremely dangerous. Only universe supreme masters could get the green keepsakes.

“Oh, Jie Fanzi. Why did you have to keep the valuables somewhere so dangerous? Even my Primal Chaos City Leader teacher can’t guarantee to get there. And me?” Luo Feng exclaimed.

\*\*\*\*\*

Within three months after he went back to Earth, Luo Feng left the original universe and left for Universe Ocean. He was going to Universe Boat this time!

### **Chapter 1182: The Black-Striped Stone Pillar**

In the vast Universe Ocean, endless chaotic airflow filled the atmosphere.

Shua! Shua! Shua!

A black-haired man with silver wings left scattered streaks of shadows as he teleported repeatedly across vast distances within the Universe Ocean... This was Luo Feng, who was just leaving the primal universe and making his way toward Universe Boat all by himself.

This was different from the first time he went to Tilted Peak Sector. Although it took only slightly more than 1,000 years, after absorbing a large amount of energy from the origin during the time spent in the space of the wings, the once heavily damaged Shi Wu Wings were able to restore their original form to become almost perfect again. Once the hazy golden light spread to fill the surroundings, the force was so powerful that even Luo Feng was breathless with wonder. Sometimes, an unknown occurrence could bring a bigger surprise than all the other known ones combined!

Other great beings could be strong in attack, defense, godly body, techniques, and much more...

For him, regardless of how many flaws or how lacking he was, merely by relying on the combination of the perfect Shi Wu Wings, Flame Sand Cup, and Miniature Universe, he could at least wipe out all the other pinnacle domain true treasures! He could fight if he wanted to or leave if he needed to; he was in total control of what would be done.

“I’m so looking forward to it. I will make use of this journey to hone my willpower to the level of a universe supreme master. Then I will go back to Tilted Peak Sector and claim that pair of white wings.”

Luo Feng was filled with anticipation. On the one hand, he allowed his mind to run wild with its thoughts. On the other hand, he maintained a high frequency of long-distance teleportation.

Hua.

Suddenly, he stopped.

“A natural wormhole.”

Luo Feng looked far into the distance at the gigantic, distorted space whirlpool. He revealed a trace of a smile. It had been a pretty dull journey rushing about Universe Ocean. There were chaotic airflows everywhere. At times, he would make a single teleportation that would last over a span of one to two days; other times, he would maintain a high or almost maximum frequency of repeated teleportation. Everywhere he passed, there was no direction to speak of. The only constant was that chaotic airflow...

Indeed, how dull it was. So when he saw that natural wormhole, it was like seeing a ray of hope amidst helplessness.

“My trip to Universe Boat this time will probably take a long, long time,” Luo Feng commented lightly.

Prior to setting off, he had looked up a large quantity of information on Universe Boat so that he would be clear on where he should go to hone his willpower. The Universe Boat was massive, and its internal domain was fraught with dangers with many places where he would never dare to teleport. The destination he had set his sights on was none other than the land for honing willpower.

Universe Boat, one of the three most dangerous lands, was fraught with danger. Based on ready information found within the human race’s databank, there were quite a few lands for honing willpower within the internal domain, and every single one had a different environment. Within one of these environments, the “Black-Striped Stone Pillar” could be found—or, according to what Luo Feng and the humans called it, the “Celestial Magic Pillar.” It was one of the countless strange objects found within Universe Boat.

There was a total of 16 Celestial Magic Pillars (black-striped stone pillars)! These 16 Celestial Magic Pillars all stood at a towering height of more than 1,000 light years and were all extremely powerful. No attack was strong enough to cause damage or take them away. They were the supporting pillars of a certain strange space. Within that strange space were numerous gigantic secret chambers. Within each secret chamber, there was an isolated space, and each one had a corresponding black token. Anyone who wanted to enter the isolated space of this secret chamber would have to possess the corresponding black token.

What Jie Fanzi had left behind was a green token that was of a higher grade. Similarly, the green token corresponded to one of the secret chambers with an isolated space that was even deeper within the internal domain. It was so deep that it could be the end of the internal domain, where the edge of the core region was. Even universe supreme masters were extremely cautious when they were located there. Great beings like Primal Chaos City Leader would not even dare venture so far in...

The Celestial Magic Pillars were located in a space that was not so deep in. Thus, the difficulty level was much lower, so great beings like Primal Chaos City Leader, Star River Master, Ice Mountain Master, and An Yong Master would at least dare to take a shot at entering the region. Spending a couple hundred or

1,000 years within the internal domain ought to have been more than enough to reach the space with the Celestial Magic Pillars.

These Celestial Magic Pillars were magical and exerted the impact of endless willpower. The closer they were, the more intimidating the impact of their willpower could get. And the closer to these Celestial Magic Pillars, the faster the time velocity was! Time velocity could reach a ratio of 100 to 1. Or even 1000 to 1.

This time velocity was the reason why Luo Feng decided to head to this space with the Celestial Magic Pillars! After all, just by venturing deeper and deeper into the internal region to arrive at a land for honing willpower was a long process that could take a couple hundred or 1,000 years. The process of traveling back and forth would take an extremely long time.

One also had to consider the time spent on attaining the willpower of a universe supreme master... If going to the space with the Celestial Magic Pillars was more time-saving, then naturally, it would be Luo Feng's first choice.

"The largest hidden treasure within Original Star was within the Disambiguation Temple; so within the Disambiguation Temple, there must be various components of a pinnacle domain type true treasure."

Luo Feng had to make a choice. He had already obtained one Disambiguation Mirror Stone, so he was qualified to enter the temple. Yet he might not be able to make it on time. After all, once all 36 Disambiguation Mirror Stones had been born, Disambiguation Temple would open. Those with the Disambiguation Mirror Stones would be granted entry.

Suppose the Disambiguation Temple opened, but he was over at where the Celestial Magic Pillars were. By the time he made it back, a couple hundred or 1,000 years would have passed. Then the fight for treasures at the Disambiguation Temple would have ended!

"The Disambiguation Mirror Stones. I have left them in God Country. Should Disambiguation Temple open, I would be able to rush back within the shortest time possible—that is, if I made the trip personally. Otherwise, I could hand the stones over to Teacher and company. Then at least the Disambiguation Mirror Stones will not go to waste."

Luo Feng valued this Disambiguation Mirror Stones, but upon consideration, he valued the pair of damaged white wings more than he did the stones.

Hua!

Luo Feng transformed into a beam of light, flew into the natural wormhole, and soon, was transmitted an extremely far distance away.

\*\*\*\*\*

Time passed.

After using up almost 12 days within the vast Universe Ocean, Luo Feng finally arrived at one of the three most dangerous lands, Universe Boat.

"That, ahead of us, is Universe Boat."

Luo Feng continued to teleport repeatedly for a few minutes.

Suddenly, the scenery before him changed. Chaotic airflow suddenly thinned out substantially. From afar, a more astounding scene unfolded.

“This, this...”

Luo Feng stood in void space as he looked at the unbelievable scene billions of light years away. Even though he had witnessed this scene before when he was going through the information he'd found, this was the first time he had laid eyes on the true Universe Boat, and he felt an overwhelming shock.

The immeasurable towering Universe Boat... was a damaged, incomparably gigantic naval vessel. It was as tall as several tens of millions of light years, and as long as billions of light years. It was a complex mix of deep black and bewildering purple, and its body... even from a couple billion light years away, Luo Feng could see the dense spots of damaged areas that were full of cracks and holes.

It was like a naval vessel that had been shot by a barrage of lasers, then hacked by many gigantic blades... It was utterly damaged!

Hong! Long! Long!

An overpowering gravitational force was released from within the Universe Boat, swallowing the surrounding chaotic airflow in a frantic manner, causing the chaotic airflow in its surroundings to always be maintained at a thinned condition.

Upon swallowing the chaotic airflow, the entire Universe Boat was able to maintain a constant release of its endless power. A circular, gigantic river of flames surrounded the Universe Boat while the vast Cold Sea enshrouded it with cold air. Amidst the cold air, one could vaguely see glittering and translucent icebergs that resembled mirrors... At the same time, a huge wind whirlpool was raging in the surroundings.

Pi! Pa!

A gigantic electric snake that was several tens of thousands light years long was raging and roaring. Streaks of resplendent light rays of various colors dazzled Luo Feng. Huge, lush green vines climbed and twined around the surface of the vessel, appearing to be so quiet.

Flames, cold air, wind, electricity, vines, rays...

In the outermost boundary, a large number of broken segments were constantly circulating the bulk of Universe Boat while flying at high speed; these were likely segments that had broken off the body of Universe Boat, and they were constantly flying around at high speeds.

Luo Feng did not find all these most shocking at all. What shocked him most was that at the lower region of the Universe Boat, there was a thick chaotic air mass. He could see a faint array of colorful electric lights flashing; there were colors like gold, red, blue, and green. And within that chaotic airflow, there was a huge, damaged miniature universe!

A miniature universe!

“Swallowed a miniature universe... it has actually swallowed a miniature universe.” Luo Feng was truly taken aback. “The top half of the miniature universe is gone. Could it be because it was partially swallowed?”

The miniature universe by itself was as long as billions of light years. It was damaged, but it still had a diameter of billions of light years. If its height was taken into consideration, the size of the miniature universe would have been even bigger.

I really wonder what the background of the Universe Boat is. Luo Feng could not help the thoughts that were thronging his mind. Directly swallowing the chaotic airflow is not something that just any great being would be capable of. Only a miniature universe would be able to absorb and transform this chaotic airflow into energy of universe laws. However—not only can Universe Boat constantly swallow the chaotic airflow, but it can even swallow the whole miniature universe. And it can transform everything it has absorbed into gold, wood, water, fire, earth, wind, thunder and lightning, light rays, time, space, and various kinds of energy. Within the Universe Boat, not only are there secret chambers that contain isolated spaces aplenty, but there are also quite a handful of places with strange time velocity.

To be able to achieve all of the above, it is practically comparable to the universe laws of a miniature universe. This Universe Boat. How was it made in the first place? And how did it get so severely damaged?

“It’s just that, according to the legends of the three most dangerous lands... we have already lost count of the number of reincarnation eras that have passed,” Luo Feng said to himself.

Countless great beings often discovered items left behind by some universe supreme masters known from history. They often discovered some information, yet regardless of which reincarnation era these were from, all seemed to involve records of the three most dangerous lands. The eternal nature of the three most dangerous lands was comparable to the endless generations of reincarnations of the primal universe. No one knew how the three most dangerous lands had been born.

Luo Feng was quite appalled when he actually saw Universe Boat with his own eyes; he had spent quite some time teleporting before he finally arrived at the region of the Universe Boat where a great number of broken segments were flying at high speeds. There were countless broken segments. The small ones were as big as tens of billions of kilometers, and the big ones were as big as a couple hundreds of light years.

Sou!

Luo Feng teleported himself to land on a piece of a broken segment of the Universe Boat. This segment’s largest diameter was around 0.6 light years. Other than some patterns that were purple, the rest of it was all a deep black color, resulting in the entire broken segment exuding an oppressive force that made Luo Feng’s heart tremble... And this broken segment shared a vague connection to the Universe Boat that was quite a distance away.

Since time immemorial, countless great beings had tried, but none had been able to take away a single piece of Universe Boat’s broken segments. Even if they were to attack a Universe Boat broken segment

at full force, they would still not be able to throw the broken segment into chaos. It was as though an invisible rope tied the broken segment and Universe Boat together.

“I have arrived on Universe Boat,” Luo Feng said to himself. “I shall head over to the gathering place of my fellow human race first.”

With that, a human figure could be seen flashing about in the void space.

After spending about five minutes, Luo Feng teleported and appeared on a fast-flying, distorted piece of Universe Boat broken segment. This was the gathering place for humans from the primal universe.

On the three most dangerous lands—be it Tilted Peak Sector, Universe Boat, or Flowing Countless Mountains—the human race would always designate a gathering place. As the exploration process required constant vigilance and caution, if one felt tired after spending a long time exploring dangerous lands, they could return to these designated gathering places to rest.

### **Chapter 1183: Huan Jie Emperor**

The fragments of Universe Boat were close to the wind whirlpool. Even though it was only a small part of the wind, it hit Luo Feng everywhere, crashing into him like blades. But to Luo Feng, they were like a light breeze.

A being showed up. “Luo Feng!”

“Uncle.” Luo Feng looked at Ice Mountain Master in surprise. “Why are you here?”

After the fight with Yuan Ao Master, Ice Mountain Master was very close to Luo Feng as they tried to get the Pulling Traces Diagram and defended themselves against the enemies together.

“Why can’t I come here?” said Ice Mountain Master.

“That’s not what I meant,” said Luo Feng. “I thought the human race was in Tilted Peak Sector. I thought you were in Tilted Peak Sector.”

“That’s true,” said Ice Mountain Master. “You just contributed a huge map of Universe Boat, so we can get more the first time. Lots of great beings of the human race will come here. Besides, Huge Axe Founder wanted a supreme true treasure, which is why he came here. It’ll take him around 100 years to arrive here.”

Luo Feng flew side by side with Ice Mountain Master. “He’s not in Tilted Peak Sector anymore?”

“He might still go in the future,” Ice Mountain Master explained. “We got some pictures of the inner area, but Huge Axe Founder never arrived there. He was lucky enough to find a special place and got a supreme true treasure there.”

“In the inner area?” Luo Feng was shocked.

Supreme true treasures were usually in the core areas. Of course, there were exceptions, just like those white wings.

“It’s in the inner area, so he came out fast,” said Ice Mountain Master. “The concentration of the human race in Universe Boat. As for Tilted Peak Sector, we’ll leave that for later.”

Luo Feng understood. The map he contributed was much larger. After all, he only got several pieces from Yuan Ao Master, and none of them showed the path to the core area.

\*\*\*\*\*

After a short while...

On a fragment of Universe Boat, a white godly palace was located on a great canyon.

Ice Mountain Master walked to the white godly palace. “We need to venture into the inner areas of Universe Boat. The top beings of the human race will come here one by one. There are three of us here. Me, Void Gold Master, and Zhen Ma Master. Four if we count you.”

“Zhen Ma Master?” Luo Feng was surprised.

“The Hong Alliance is an alliance, after all,” said Ice Mountain Master. “We’ll give a part of our map to them. But remember, they are other races, so we can’t share everything even if we’re in the same alliance. These secrets are all obtained by us humans.”

Luo Feng nodded. Some other races would trade something under temptations, and they couldn’t be tracked as long as they kept it clean. Some beings left the Hong Alliance and joined other alliances, like Flame Emperor.

Luo Feng and Ice Mountain Master transmitted their voices using godly power.

“Luo Feng, Ice Mountain.”

“Milky Way Horde Leader, Ice Mountain Master.”

Two beings showed up in front of the godly palace and greeted Luo Feng and Ice Mountain Master.

“Void Gold Master, Zhen Ma Master!” Luo Feng shouted.

Luo Feng didn’t rush it, as Ice Mountain Master and Void Gold Master were waiting outside. Time flew, and great beings came one after another, such as Peng Gong Master and Huang Jian Master.

One day, Luo Feng and Void Gold Master stood beside the cliff.

Void Gold Master lowered his eyebrows. “Do you have something to say to me?”

“Void Gold Master,” said Luo Feng. “Three of us came from Earth. Hong is the big brother while I’m the third brother. My big brother went to you after. I could still get in contact with big brother before, but I can’t anymore. How is he doing now?”

“You mean Hong?” Void Gold Master smiled. “He’s your big brother, after all, and he is a genius. He didn’t make much improvement at the start. However, he’s a special one. Normally, great beings make less improvement later, but he is exactly the opposite. He didn’t improve quickly at the beginning but keeps making breakthrough later.”

Shi Huo Knight was a disciple of Void Gold Master, and Shi Huo Master improved really fast. Comparatively, Hong indeed didn't improve quickly enough.

"He's really mediocre aside from willpower and illusions, and he was the worst at the beginning," said Void Gold Master. "However, he's already been able to catch up with the average level of my disciples. Tens of thousands of years ago, he went to Star Prison. He became undying there and became an emperor called Huan Jie Emperor... He was then taught by Huge Axe, and after that, I lost track of him. You can go ask Huge Axe."

"In the universe of Huge Axe?" Luo Feng nodded. "No wonder I can't get in contact."

There were two small universes. One of them was the primal universe and the other was Huge Axe universe. Teacher Universe performed the supreme technique "Virtual Universe" that could cover the entire original universe! But it couldn't get to the Universe Ocean... It couldn't get to other miniature universes as well. As for the original universe, it was an exception. After all, the primal universe belonged to Teacher Origin.

The virtual universe could only cover the original universe and primal universe. Hong was in the universe of Huge Axe, so he couldn't contact him.

"He can't compare with you." Void Gold Master looked at Luo Feng. "You became a universe master after only a short while."

Luo Feng smiled.

"Perhaps Universe Boat isn't the best place for you," said Void Gold Master. "You're adventuring in the outer area of Tilted Peak Sector, and even Primal Chaos City Leader won't go too deep in the inner area of Tilted Peak Sector. He'll go and rescue you if you run into danger. However, this is a new map, and many great beings will inspect the inner area. If you run into dangers in the outer area, they won't even be able to make it to rescue you."

"No worries," said Luo Feng.

"I know you have the wings that can control the space and time." Void Gold Master shook his head. "However, if you run into an enemy that has a pinnacle domain type true treasure, you'll be dangerous. Though you have multiple bodies, your true treasures will be seized. I won't say much. After all, they're your true treasures, and you should be responsible for them."

Shua!

Void Gold Master dove, and Luo Feng stood beside the cliff, speechless.

\*\*\*\*\*

After a month, 16 universe masters of the Hong Alliance gathered, and they took off. Some of them ventured in the outer area. Some of them entered the inner area.

"The inner area is extremely dangerous. Even I can be killed if I'm not careful enough." Great beings flew out of the godly palace, and Primal Chaos City Leader alerted Luo Feng. "You need to be at least as powerful as Ice Mountain and Void Gold if you want to go to the inner area. Unless you have super surviving skills, don't go."

Luo Feng was speechless. He needed to go to the heavenly pillars to sharpen his willpower. He didn't even say that he would go to the green keepsake area. Primal Chaos City Leader would be furious if he said he was going there.

"Chaos, Luo Feng isn't stupid," said Void Gold Master. "He runs into dangers in the outer area sometimes. For the inner area, he will die if he goes. He knows what to do."

Primal Chaos City Leader frowned. "He's my disciple."

Void Gold Master smiled. "He's one of us humans, and I want the best for him as well."

"Let's go!" said Peng Gong Master.

Shua! Shua! Shua!

They teleported and left. Primal Chaos City Leader took a look at Luo Feng and left.

Void Gold Master said, "Be careful. Your teacher and I are in the inner area. We won't be able to help you." Then he left.

\*\*\*\*\*

Some called Luo Feng to come with them.

"No, I'll act alone."

Luo Feng teleported and left.

It took him 20 minutes to get to the surface. Based on the maps left by Jie Fanzi and the human race, there were 100 ways to get to the inner area. The great beings of the human race separated, and Luo Feng's destination was the heavenly demon pillar. He would certainly choose a route with fewer dangers.

"There are 892 dangerous areas in total."

"Some safe places allow teleportation, and some only allow slow flying. It might take me 500 to 600 years to get to the pillar.

"Move!"

Luo Feng flew to a crack down there. It was a huge crack 280,000 light years long and 92 light years wide. There were vines around it, and lots of ice crystals, too. Luo Feng went into the huge crack.

### **Chapter 1184: God-Destroying Valley**

He just flew in, and at one glance, all he could see was endless, cold darkness. There were only faint traces of refracted rays caused by the ice crystals.

"So cold," said Luo Feng.

He shot up into the sky and flew at high speed while putting his Golden Kingdom into play.

Hazy golden light spread out instantly, enveloping an area with a radius of 80 light years. However, some areas deep among the ice crystals were impenetrable and thus inexplorable. The 80 light years contained thousands of regions, yet certain regions were anomalous, so the golden light was unable to probe into them. Only the more ordinary regions could be explored more thoroughly. Of course, Luo Feng restrained the amount of power exerted by Golden Kingdom; he only needed enough to maintain its exploratory function.

After flying for a while...

Rip! Pull!

A blade of ice sliced through the void from afar without warning. It swept its way over and seemed as though it would extend to Luo Feng's location.

"Humph!" Luo Feng put his mind to work, and the original restraint power of Golden Kingdom erupted in an instant.

Hong! Long!

The erupted power crashed into that ice blade, which immediately changed its direction upon receiving such a strong impact. It quickly flew past Luo Feng, sailing above him.

Luo Feng was already traveling at high speed—90 times the speed of light. The deeper he ventured, the more soundless ice blades he came across. As the number increased, the more trouble Luo Feng felt was brewing.

"Blazing Flames Ocean!" Luo Feng put his mind to work to activate Flame Sand Cup.

Hong! Long!

Dazzling golden flames spread out instantly, but the power of Blazing Flames Ocean was a far cry from that of Golden Kingdom! Even as a supplementation, it did not bring about much improvement in Luo Feng's situation.

Hua! Hua! Hua!

Countless ice blades sliced across the length of the sky, colliding with one another, shattering into countless small ice blades and sweeping directly into Luo Feng's vicinity. Even if Blazing Flame Ocean and Golden Kingdom were to join forces, the most they could do would be to cause this dense pack of countless ice blades to encounter a slight change in direction. The area covered was too vast, so even a slight change in direction would still affect Luo Feng.

Luo Feng frowned as he put his mind to work.

"Blazing Flames, form my blade."

Hua!

The core power of the endless flame gathered rapidly. In the blink of an eye, everything had converged into a golden blade that was as long as 100 million kilometers! The golden blade was surrounded by blazing flames... This was certainly one of the ways the blade could be utilized, just like how many

domain type true treasures could gather power to restrain and attack enemies. Nine Tiger River was one such example. So was the top-tier domain type true treasure Blade River Luo, which converged its power to form a blade that was comparable to a pinnacle true treasure weapon.

Flame Sand Cup was not good in this aspect, but it was, nonetheless, a top-tier domain type true treasure. Thus, when its power converged, it could still form a top-quality weapon with the power of a top-tier true treasure.

“Break!”

Luo Feng started manipulating the flaming golden blade that was 100 million kilometers long while executing his ultimate technique Golden Light. He manipulated this gigantic blade with his godly power, which was controlled by his powerful willpower and consciousness. After over 1,000 years of honing and sharpening within the space of the wings, Luo Feng’s willpower was now much stronger than when he’d first entered Universe Ocean.

Hua!

Quick like lightning, a beautiful, golden blade-ray was formed with full empowerment of Golden Kingdom. It was certainly comparable to a strike from a top-tier universe master. The gigantic blade-ray hacked into the middle of the sea of countless ice-blades where a violent shock caused the blades in the middle to shatter. Many ice-blades within the region of the explosion collided into one another and shattered into even smaller fragments. Thereafter, they were tossed in random directions. At the core of this entire ice-blade storm, a large cavity of about 10 million kilometers appeared.

Sou!

Luo Feng went through this hole, and in a flash, he had made it through the region of the explosion.

“This is only the first region on my route,” Luo Feng whispered, “and it stretches over a span of 2,100 light years. The only trouble was the ice-blades. The nearer I get to the core, the more ice-blades there are. Every ice-blade was comparable to a full-force strike by an ordinary universe master. If I were to be surrounded and attacked by a large number of ice-blades, I would definitely be in danger of sustaining heavy injuries. And yet, this was not even considered to be a dangerous land.”

There were 892 extremely dangerous lands on his route. Based on a simple categorization of normal, dangerous, and extremely dangerous, he had just entered a region considered to be normal. Firstly, its natural power was not intimidating enough; secondly, Luo Feng could probe into this territory to understand the situation within and could teleport away to avoid any possible danger.

\*\*\*\*\*

After flying about for three days for a brief experience, Luo Feng started to advance with high efficiency. 罗峰飞了三天,体验了一番后,而后便开始高效率前进.

Where he could teleport, he would; if there was a need to use his blazing flame blade over an extremely long distance to create a path for advancing, he would. Even when he needed Star Tower to overcome a problematic situation, he would.

His journey was fraught with danger! Within Luo Feng's world ring, his Golden Horned Beast body was constantly standing guard within Star Tower. Even if Luo Feng were to suddenly meet with danger and original earthling body was instantly annihilated, at least Golden Horned Beast hiding within Star Tower would be able to pull through the dangerous situation and thus be able to reclaim Luo Feng's true treasures like his Shi Wu Wings.

In the blink of an eye, 21 years had passed.

Throughout those 21 years, Luo Feng considered himself to have experienced how terrifying the internal domain could truly be. Comparing it with some of the extremely terrifying and dangerous regions, the ice-blades region at the entrance to the internal domain was like a vacation zone. The various dangerous lands thereafter were inescapable. Techniques such as Golden Kingdom and Blazing Flames Blade proved useless when he tried to use them to save himself. He was forced to use Star Tower—which he did—in more than a couple dozen occasions to defend himself against the terrifying dangers.

Wandering about the internal domain, having a palace true treasure was a must, Luo Feng thought. Even to the extent of a top-tier palace type true treasure.

When it came to top-tier palace type true treasures, even universe supreme masters would not be able to cause damage to them. Palace type true treasures of this level were sturdy enough to tide through many kinds of dangers.

Hua! Hua! Hua!

Huge, jade green ropes could be seen flying out of that endless black ocean toward Luo Feng. This black ocean was a nightmarish area, but Luo Feng was extremely at ease. Relying on Golden Kingdom, he could accurately locate certain safe grounds and teleport instantly when needed. Within this black ocean, he had teleported repeatedly like flashes of lightning, occasionally depending on Golden Kingdom to suppress those huge ropes...

At the border of the black ocean was a vast, black, rocky land. The sky above this land was filled with molten lava. This suspended lava ocean often fell. At the same time, a large quantity of strange, huge, blazing rocks would rain from the lava ocean and crash onto the land beneath.

"The black ocean zone ahead is a breeze. But such relaxing days are hard to come by... The land beneath is the real trouble."

Luo Feng stood at the edge of the vast black rocky land, then raised his head to look at the endless lava ocean suspended high up above. This region was named "God-Destroying Valley." Along the route he had chosen, there were 892 extremely dangerous lands. Their danger levels rated near the top, and the danger level of this valley was enough to be ranked among the top three!

God-Destroying Valley was divided into two parts. The top consisted of the endless lava ocean, and the bottom consisted of the vast, black, rocky land. To break through, one had to proceed between the two. The entire journey was fraught with various dangers.

Whatever danger it was, did not really matter to Luo Feng, as he believed that Golden Kingdom, Blazing Flames Blade, and Star Tower combined could see him through any danger along the way. Yet, the scariest part of God-Destroying Valley was none other than... Molten Lava Devil God!

Molten Lava Devil God was a lofty figure tens of billions of kilometers in height. Its entire body was composed of sturdy rocks and limitless lava, and it had four gigantic arms. It had three eyes and a hideous fang sticking out of its mouth. Its level of intelligence was extremely low. It might even be considered to have no intelligence at all. But its power was incomparably terrifying...

Molten Lava Devil God merely used that massive body of his. He fought the battle with his fists and legs. But his punches and kicks were unbelievably marvelous. When he started to fight and attack, even universe supreme masters who possessed supreme true treasures would have to bow to his superiority and concede defeat! Its body suffered no damage. Up to that very day, no one had been able to injure Molten Lava Devil God.

Once engaged in battle, even a universe supreme master would barely escape from it, and universe masters and others exchanging blows with it were bound for annihilation! Information that Jie Fanzi and the human race had left behind provided introductions about God-Destroying Valley, of which, Jie Fanzi's information was more detailed. Nonetheless, both had a common consensus—it didn't matter who it was if Molten Lava Devil God got its hands on them!

If the other party was not a universe supreme master, it would be game over.

Even if I hide inside Star Tower, so long as Molten Lava Devil God has its grasp on me, no matter how Star Tower attempts to take flight, it will not be able to fly away, thought Luo Feng. Star Tower will fall into an eternal predicament... and history has provided evidence that even for great beings hiding in pinnacle palace true treasures, once caught, would soon be annihilated.

Luo Feng sighed inwardly.

How had Molten Lava Devil God been born? No one knew. Many great beings had even guessed that Molten Lava Devil God might be formed from the corpses of an early group of users of the Universe Boat. Was this why, no matter how many universe supreme masters attacked, it was not the least bit damaged? However, everything was purely speculative. The only concrete fact was that Molten Lava Devil God was practically witless but extremely powerful.

Fortunately, it was faithfully territorial, so it would never leave God-Destroying Valley.

Within God-Destroying Valley, there were a total of nine Molten Lava Devil Gods!

A Molten Lava Devil God is tens of billions of kilometers tall, Luo Feng thought, and its reflexes are extremely fast. The moment I fall within ten billion kilometers of it, Star Tower will no longer be able to escape. Even Huge Axe Creator has to hide from it. Nine Molten Lava Devil Gods... I hope I am lucky enough and can hide from them.

God-Destroying Valley occupied an area of tens of thousands of light years. There was a portion of it where space and time seemed to be completely frozen, without even a trace of ripple. There were very few regions that allowed teleportation, and there were many places that were unable to be probed by Golden Light.

"Advance."

Luo Feng flapped his wings, giving rise to a hazy, golden light that spread its rays over a radius of 80 light years. Thereafter, he flew straight into God-Destroying Valley.

The burning temperature brought a slight frown to Luo Feng's face. This was enough to annihilate a universe knight.

Hua! Hua! Hua!

From time to time, a large amount of lava would fall from a great height and come crashing to earth. Luo Feng had to be careful when dodging and avoiding the falling lava. It was a common occurrence, and the danger it posed was quite small. The most dangerous obstacles were the huge rocks within the lava ocean that were not melted. These huge rocks fell at high speeds, and the impact they produced when they landed onto solid earth was enough to crush a universe master to death. Yet the fortunate thing about these rocks was that they were, after all, lifeless objects, so avoiding them was possible.

“Break!”

Occupying an area of at least hundreds of millions of kilometers, the golden Blazing Flames Blade suddenly hacked into a falling, gigantic rock that was tens of thousands of kilometers wide, causing the huge rock to fly to one side.

Falling lava and also the occasional falling of large celestial rocks... Luo Feng had to be extremely careful as he advanced.

\*\*\*\*\*

On the eleventh day after Luo Feng entered God-Destroying Valley, in a certain corner of a territory that he was unable to explore, a head popped out from one of the caves of the black, rocky land. It had sparse, messy, and fiery-red hair. A single roving eye looked at the rapidly advancing silver-winged figure in the air.

“Huh? Someone has the guts to break into God-Destroying Valley? Eh? isn't that the new universe master from the human race of the primal universe—Silver Wings Horde Leader?”

The face on that head registered a slight frown as it muttered to itself. The human race had announced publicly that Luo Feng would be named “Milky Way Horde Leader,” but in Tilted Peak Sector, Luo Feng had earned his reputation by his silver wings. Thus, the other races had preferred to call him Silver Wings Horde Leader.

“Young fellow, you just became a universe master not too long ago. You have silver wings that can control time and space and are so full of yourself that you dare to try your hand at breaking through the internal region? Especially at God-Destroying Valley? Hehe! Seems like your silver wings will fall into my possession very soon.”

A fiery red figure that looked like a human child flew straight out of the cave in one swift movement.

## **Chapter 1185: Yin Tuo**

It was the eleventh day after Luo Feng had entered God-Destroying Valley, and Luo Feng had become more careful. It was definitely the most dangerous place in Universe Boat, even without that Molten Lava Devil God. He couldn't afford to be careless in the slightest in God-Destroying Valley.

Hong! Hong! Hong!

Lava sometimes dropped from the sky, which made God-Destroying Valley incredibly hot, and the space was twisted. Occasionally, huge rocks also fell from the sky.

“Huh?” Luo Feng frowned. His golden country detected a great being behind him. “Is... is he Yin Tuo from the first universe incarnation era?”

He immediately matched the aura and look of the great being with the database he had.

Yin Tuo: A great being from the Ancestral God School in the first incarnation era. He is a special life form that looks like a child. He is a special life form who wasn't born in the universe era Luo Feng lives in. He is extremely powerful.

Also, he followed the path of golden beast god. He was proficient in close combat and spiritual force weapons, too. The spiritual force weapon he used was a pinnacle true treasure known as “Golden Sulphure Armor”! He was a top-tier universe master who could rival Ice Mountain Master and Void Gold Master. He was a special life form with a unique godly body, and it was almost impossible to kill him.

The Ancestral God School represented the origin law of the original universe. After one incarnation, the Ancestral God School from the first universe era escaped, and they couldn't get back to the original universe. Without the help of the universe origin, the advantages the Ancestral God School had were gone. It became a loose alliance. However, Yin Tuo himself was a handful—worse than An Yong Master.

“It's him?” Luo Feng frowned. “Even Void Gold Master is easier to deal with than him. It's impossible to kill him.”

Yin Tuo tried to get the control over space and time, yet he was rejected by the dim golden light. Luo Feng's control over space and time had already surpassed that of universe masters even before going to the wing space, not to mention now.

“Hahaha! Human!” a squeaky voice said. “How dare you come to God-Destroying Valley. This silver true treasure of yours is indeed special, and that golden domain is indeed powerful. I'll spare your life if you give me those silver wings. Deal?”

Luo Feng sneered. “In your dreams, Yin Tuo!”

Hong!

Through his golden country, a huge rock dropped from the lava ocean behind him. The rock had a diameter of more than 300 million kilometers. It plummeted at a terrifically high speed. That rock could have killed most universe masters if it had a diameter of more than 100 million kilometers, and with Golden Country, the power of the rock surged. It flew toward Yin Tuo.

Hong! Long! Long!

The rock twisted the space, and it plummeted like a streak of light.

“Humph.”

Yin Tuo yelled, and golden fragments burst out of his body. Billions of golden fragments showed up in the sky and surrounded him as if the fragments were connected. Many law threads connected them immediately, and the golden fragments started to merge with each other.

Ka-cha! Chi! Hua!

A ferocious, single-horned golden lizard 100 thousand kilometers long appeared. It was a golden beast god. The single-horned lizard was forceful just like a beast god, and Yin Tuo was staying in the body of the lizard.

“How impressive the technique is!” Luo Feng couldn’t help exclaiming. It was just like a rebirth of a beast god. He couldn’t do that yet.

Hou!

The golden lizard roared, and it raced toward that rock. It didn’t dodge it; instead, it hit the rock like a freight train.

Peng!

The moment they collided, the golden lizard changed its shape, and its tail slashed the rock. The rock was derailed and kept plummeting. The power from the rock also burst outward when it hit the tail.

Hong!

The golden lizard changed its direction and flew toward Luo Feng.

“It borrowed the energy?” Luo Feng was shocked. “No wonder Yin Tuo is unkillable!”

“Human, you’ve angered me!” the golden lizard said.

“Haha! Then you’ll soon be infuriated,” said Luo Feng.

He looked back. The golden lizard lashed his tail and changed its direction easily. It dodged the lava, and it was fully utilizing the power of golden beast god. Luo Feng was thrilled, as it was like watching the rebirth of a beast god.

A joyful thought went across Luo Feng’s mind. I can’t believe I get to fight a beast god now.

Suddenly, a whirlpool was formed in the lava ocean in the distance.

“Lava whirlpool?”

Luo Feng felt intimidated, as lava whirlpools represented one of the most terrifying threats in God-Destroying Valley—one of the seven most terrifying threats under Molten Lava Devil God. The records in the human race were rare. However, Jie Fanzi had detailed records, including some of the circumstances when individuals had been trapped by lava whirlpools. Apparently, Jie Fanzi had adventured in on such whirlpool before.

Hong! Hong! Hong!

Horrendous wind was formed, and some of the giant rocks on the ground flew out and started to spin in the sky. They spun faster and faster.

“A lava whirlpool right in front of you!” a voice from the golden lizard said. “It’ll get larger and larger as time passes. It’ll definitely expand faster than you can run away. The space around us was already clotted, and there are no space ripples. Haha! You dare come here! I’ve adventured in this place for hundreds of eras, and it’s like my home. You dare fight me here? Haha...”

“Like your home?” said Luo Feng. “Do you think Molten Lava Devil God will show mercy to you?”

Luo Feng rendered that golden lizard speechless for a while.

“You won’t be able to talk later.”

The lava whirlpool kept spinning, and the whirlpool kept getting larger. It reached Luo Feng instantly.

Hong!

The wind was almighty. If someone was trapped in that wind, it would be like being hit by an elementary universe master every 0.01 seconds! Although attacks from an elementary universe master weren’t that strong, the frequency would be able to at least severely injure a universe masters who didn’t have good defending abilities.

Luo Feng was able to resist it, but it sharply slowed him down.

“Hahaha...” laughed the golden lizard. “I’ve been here for hundreds of eras. Human, you’re dead.”

The golden lizard moved in the wind and kept spinning. At the same time, his tail was lashing, making him move easily in the wind.

Hua!

The golden lizard flew to the surface of the rock.

Ka-cha! Ka-cha!

He extended his hoofs and stuck them into the rock. Then he infused his godly power into it... The rock flew toward Luo Feng. It flew in curves and was suppressed by Luo Feng’s Golden Country, but it was still much faster than Luo Feng.

Hong!

The celestial rock got quicker and quicker, and it was impossible to slow it down. It dashed toward Luo Feng.

Luo Feng shook his wing and flew toward another rock. He landed on a rock with a diameter of 300 million kilometers.

“You know how to hide!”

The golden lizard controlled the rock. Luo Feng was on a slightly smaller rock.

Hong!

Hong!

It was billions of times stronger than Mars hitting Earth.

Hong! Hong! Hong!

Under that wind, and rocks hit each other, and they all broke down into a multitude of shards. Luo Feng still trembled.

Hua!

A giant golden hoof slashed toward Luo Feng.

### **Chapter 1186: Unearthed**

Shattered rocks were scattered all over in random directions, distorting the surrounding space. That golden hoof drove through many scattered rocks to appear before Luo Feng in a flash.

“Get lost!” Luo Feng’s body made a slight movement.

Hua!

Dazzling silver blade-rays flashed instantly. The four silver wings on Luo Feng’s back expanded suddenly, and the edges of his wings became incredibly sharp... Right away, he executed his blade technique, “Golden Light,” striking hard against the scales of the golden hoof. He was going head-on and confronting the golden hoof with a toughness that matched its own!

Pa!

Silver blades collided with the scales! A loud crash resounded. The golden horned lizard only swayed a tiny bit to the side but was thrown into the air upon colliding with the flying rocks. It was forced to retreat, but it was the same case for Luo Feng, who also retreated due to the impact of collision.

The golden horned lizard roared before it charged towards Luo Feng again. “Good wings! They can be so powerful when used as a blade!”

Luo Feng merely gave an indifferent smile. What a joke.

Since the spirit of his Shi Wu Wings had been born, through the snippets of memories that it had, Luo Feng had gotten to know the true colors of his Shi Wu Wings. Although they had various functions, the most important function was that once used to fight, it was like a battle blade... The other five pairs of wings were only to support the back of the blade; the topmost pair of wings was the blade itself.

That damaged pair of white wings was the blade! Of course, one would be the edge of the blade while the other would be the hilt. But that was not to say that the other wings of Shi Wu were inferior. In terms of tenacity, Shi Wu Wings had an advantage. The pair of white wings was stronger due to its sharpness, but after going through a battle, while the other wings were unharmed, this pair of white wings was damaged.

This sharpness was why the white wings were so important. The edges of Shi Wu Wings were sharp, too, but they were nothing compared to the white wings. Upon transformation by the origin, then undergoing the penetration of the cutting-edge power of the white wings, the resulting power was

intense. And if the pair of white wings were to strike a blow alone, the force would be even more intimidating.

Shi Wu Wings were not as powerful. Yet they were still a part of the original wing type true treasure and had absorbed energy from the origin to facilitate its self-restoration process. Therefore, they had also attained the level of a unique object. When used as a standalone blade during battles, it was comparable to a pinnacle true treasure blade!

Clang!

Luo Feng pulled out his blade from behind instantly.

“Yin Tuo, you think I am afraid of you? You are merely an undying fighter. Trampling on you is easy.”

Luo Feng held Absolute Guest Blade. In an instant, he had become a beam of light and was coursing through the countless, shattered rocks flying about haphazardly. Then, with both legs, he stomped hard onto a 10,000-kilometer shattered rock flying about randomly.

Sou!

And he charged directly toward the golden horned lizard.

“What arrogance!” said the golden horned lizard, flying into a fury. Lowering its head, it directed its horn at Luo Feng and charged toward him. Yet he was first greeted by a burning, endless flame...

Blazing Flames Ocean and Golden Kingdom had superimposed!

Hu!

The golden blade-ray lit up. A silver light shone!

Luo Feng’s Absolute Guest and the edge of his left wing executed the Golden Light technique simultaneously. Together with the double empowerment of Blazing Flames Ocean and Golden Kingdom, he rained attacks on the golden horned lizard’s hardy skull; wherever the hits landed, faint cracks of black spaces would appear. The golden horned lizard and Luo Feng were both tossed away by the shocking impact. Along the way, they might even be hit by the shattered rocks flying all over the place at 100 times the speed of light.

“You have to use time and space,” the golden horned lizard roared, “as well as the double empowerment of your domain true treasures before you can break even with me! Obviously, your godly body and techniques are still very weak. I don’t believe you cannot be killed here at God-Destroying Valley!”

“Humph!” Luo Feng took one look at the golden horned lizard. Having fought until then, he had yet to reveal his trump card. Under his control, Golden Kingdom had been consistent with its degree of power outburst within Universe Ocean since entering the region, yet he had never really propelled it to reveal its current limit, which was a truly high degree of power outburst.

Golden Kingdom and Blazing Flames Ocean put together were enough to suppress An Yong Master’s top-tier domain type true treasure. Under normal circumstances, maintaining it at such a level should suffice.

As for its limit, Golden Kingdom—once pushed to its limit—would reach the level of a unique object. Golden Kingdom alone, even if Luo Feng’s godly power was lacking, would still be comparable to a pinnacle domain type true treasure used by a universe master, and it was not just any other universe master of subpar ability like Sky Wolf Master but universe masters of absolute top-tier presences like Primal Chaos City Leader and Star River Master.

If I pushed Golden Kingdom to execute its maximum power, given how strong Shi Wu Wings are, news will spread further, and more great beings will covet it even more, Luo Feng thought. So long as there is no need to, I shall not use this trump card of mine.

Luo Feng was not afraid of revealing it. So what if he needed to do so? Who would be able to snatch it away from him? It was just that one Yin Tuo was not enough to force him to show his ace in the hole.

“Yin Tuo, with that little capability of yours... exchanging blows with you once is enough,” said Luo Feng. “I cannot be bothered wasting my time here with you.”

Luo Feng stood afar, suspended in midair. Then, with one focused look, a gigantic blazing blade of flames emerged from the endless Blazing Flames Ocean. The blazing blade wasted no time in executing its technique and charged toward the golden horned lizard. Luo Feng, on the other hand, turned around and flew away at high speed. He only left behind a part of his consciousness to control the blazing blade in its fight against the golden horned lizard.

Peng! Peng!

Blazing Flames Blade was comparable to a top-tier true treasure. Furthermore, it had the empowerment of Golden Kingdom, putting aside the fact that it was relatively weaker when it came to killing prowess, which was only the level of a third-grade universe master. It might not have been able to destroy the golden horned lizard, but it could, at the very least, create obstruct the golden-horn lizard’s way.

“You human, don’t you dare escape!” the golden horned lizard roared.

Sou!

Luo Feng continued flying off at lightning speed. Behind him, the golden horned lizard was exchanging blows with the blazing flames blade, though it persevered in its relentless chase after him.

“You know you will never be able to catch up with me,” said Luo Feng. “Nor will you be able to do anything to me at all, yet you are still so persistent?”

Luo Feng’s brows furrowed as he gave a slight frown. Looking far ahead, the power of the lava whirlpool was terrifying. The black, rocky land was breaking apart, and many gigantic rocks were revolving at high speed in midair, looking as though they were dancing to a very fast rhythm.

Luo Feng looked on and laughed, “This old fellow! He wanted to bully me, as he thought that I did not know the true secret of the lava whirlpool. He wanted to see me falter there.”

No matter how many times the blazing flames blade struck, the golden horned lizard persevered, relentlessly giving chase.

“Yin Tuo, did you think that... I would not have known about the dangers of the middle region of that lava whirlpool—the Annihilation Whirlwind?” Luo Feng’s voice resonated in the surroundings of the golden horned lizard.

The golden horned lizard was taken aback and became motionless for some time.

How did he know? He—he... impossible! That Annihilation Whirlwind is invisible, and it was at the core of the lava whirlpool, so exploring it is impossible. Ordinary great beings would run and hide from this central region of the lava sea. They would not be so silly as to try breaking through the core. Such highly confidential information! Even the current reincarnation era of my Ancestral God School just learned of it.

Yin Tuo was truly shocked. Originally, I intended to execute my technique right at the moment he when he made a detour about the central core region; then I would stimulate the core of the Annihilation Whirlwind and let it spread its influence over him! Humph! My godly body is massive with a unique gift, and I was barely able to evade that Annihilation Whirlwind; a large portion of universe masters, once they have fallen into that Annihilation Whirlwind, would instantly be strangled to annihilation. There was no escape at all. Yet he—

Since Luo Feng knew, naturally he would not fall for Yin Tuo’s ploy. Besides, Luo Feng controlled the domain; there was no chance for Yin Tuo to execute his technique to stimulate the Annihilation Whirlwind.

How did he know? This, this... Even among various figures of top powers from the second reincarnation era, very few know of it. And the top power figures from the primal universe do not really explore much of the three most dangerous lands. This classified information... How...?

Yin Tuo was in rage and fury.

It was common knowledge that although universe masters would fight against one another, it was hard to kill one another. However, within the three most dangerous lands, if one’s survival ability was stronger, and if he had more understanding about the lurking dangers, he could make use of the terrifying dangers to arrange the death of his opponent.

“Hahaha...”

Luo Feng was bowling over with laughter. Then he transformed into a streak of light and flew off into the distance.

At this juncture—

A large number of rocks from the middle region of the vast black rocky land, brought about by the lava whirlpool, had been shattered and scattered off in all directions. A deep blue planet ship previously concealed by the many black rocks was revealed. This deep blue planet ship was severely damaged. At that moment, with a fierce and forceful wind blowing, the ship gradually started to take off from the ground. It slowly began to emerge from the vast, rocky land.

“True treasure!” golden horned lizard cried, dashing over right away.

“It is a true treasure!” said Luo Feng.

Even Luo Feng was slightly taken aback and quickly dashed over too. The three most dangerous lands were originally the birthplaces of many true treasures. Even Huge Axe Creator had been able to obtain a supreme true treasure when he was in the Tilted Peak Sector. For Luo Feng, however, although he had been in the Universe Boat for so many years, it was his first time seeing a true treasure.

Although it is a damaged true treasure, its aura is still very powerful, thought Luo Feng. The harsh environment of God-Destroying Valley is filled with a variety of dangerous conditions. True treasures that are less powerful have already been shattered; as for this damaged true treasure, judging by its aura, it has to be a top-tier palace type true treasure.

Luo Feng made a speedy judgement. It doesn't matter if there are slight damages. Sitting Mountain Guest Teacher would be able to restore the damaged parts easily. Even if I allowed it to be swallowed by the white wings to help it in their self-restoration in the future, that would be good, too.

An ordinary true treasure and senior true treasure would never be able to exist within the environment of God-Destroying Valley.

"It's mine!" Yin Tuo roared.

"Haha! You think it's yours just because you say so?" Luo Feng said with a sneer. He was the closest to the core region, and he was in control of the domain.

Hua!

The moment the gigantic, deep blue planet ship had been unearthed, a hazy golden light quickly bound it and sent it flying to Luo Feng. Closely following was a trace of godly power that speedily penetrated the deep blue planet ship.

Yin Tuo saw everything that happened and gritted his teeth in anger. "Bastard!"

He was full of hatred. Why had he stayed in God-Destroying Valley for so long? Because this place was one of the most dangerous lands, and the more dangerous a land, the stronger the true treasures that would appear! He was not strong enough to make it into the core region, so he had stayed in God-Destroying Valley for a long time... awaiting his chance. He was also aware that once the lava whirlpool wreaked havoc within God-Destroying Valley, a true treasure would appear, but he had not expected it to be so coincidental—to be born at this moment.

"Hahaha... A top-tier flying type true treasure!" said Luo Feng. "Although damaged, it is still rewarding enough. What an accidental surprise. This Yin Tuo must really be my lucky star."

Luo Feng manipulated the deep blue planet ship, bringing it to himself.

On the other side of the lava whirlpool, two other figures suddenly came out of a deep cave, transformed into two streaks of light, and speedily flew toward the lava whirlpool. They were a pair from the Divine Eye clan.

"The lava whirlpool has appeared and is stirring up countless shattered rocks," said the first one. "There may be true treasures appearing. Look! That deep blue planet ship is a true treasure!"

"Five Chaos Master, look! There is a golden horned lizard... Oh, it must be Yin Tuo. Just Yin Tuo... Not much of a threat to Five Chaos."

“Huh? There is someone else?”

These two great beings of the Divine Eye clan had also stayed in God-Destroying Valley for a long time, so when they had sensed that the lava whirlpool was emerging, they too, had arrived shortly; they also quickly realized that closest one to the deep blue planet ship was a living soul—a human.

“Golden light? Silver wings? That must be Silver Wings Horde Leader!”

### **Chapter 1187: Nobody Can Go!**

“Yes, it’s Silver Wings Horde Leader.”

“Five Chaos Master, that Silver Wings Horde Leader is extremely weak, and the only edge he has is that wing true treasure. How dare he come to God-Destroying Valley?”

“He’s walking to his own death, so he can’t blame anyone.”

The great beings of the Divine Eye clan immediately identified that famous human being from the original universe. They were powerful enough to be in God-Destroying Valley. Besides, the Divine Eye clan was the most powerful pinnacle race in the first universe era, which made them much stronger than the loosely knit Ancestral God School.

Luo Feng also identified the two great beings of Divine Eye clan. Who were they? It was Five Chaos Master and Ultimate Arrow Master.

Ultimate Arrow Master was at Ice Mountain Master’s level, and he had a pinnacle domain type true treasure. He was proficient in arrows, which was rare even in Universe Ocean. As for Five Chaos Master, he was at a completely different level. He could rival Primal Chaos City Leader, and he had pinnacle domain type and pinnacle palace type true treasure.

I have met another two great beings of the Divine Eye clan, thought Luo Feng. I can deal with that Ultimate Arrow Master as he’s at the same level with Yin Tuo. That Five Chaos Master is a handful. Luo Feng’s expressions changed. Besides, I heard that he follows five beast god paths, space and gold, space and wood, space and water, space and fire, and space and mud. He can even rival my teacher. Damn it, why am I so unlucky? I have met three universe masters in Universe Boat, Five Chaos Master included.

Luo Feng knew that there were many caves under the black, rocky ground, and there were endless mazes. It was much safer within the mazes, as teleportation was allowed in that labyrinth. As long as one could find a safe route, he could change directions easily and dodge Molten Lava Devil God.

The Divine Eye clan and the Ancestral God School from the first universe incarnation era both devoted plenty of time and energy to studying the mazes, so they knew some safe routes. However, the map left by Jie Fanzi didn’t include the safe routes. After all, Jie Fanzi was a lone universe supreme master. For one thing, he was so powerful that he didn’t want to go into the mazes, and he also didn’t have the time or energy for that. Jie Fanzi spent more time in the core area, as the inner area didn’t deserve his time and energy.

“Hahaha... Isn’t this Yin Tuo?” Ultimate Arrow Master laughed. “Yin Tuo, you’re a famous great being in our first universe era, and you failed to seize a true treasure from this human nobody? I think you might as well just die.”

“Useless,” Five Chaos Master snorted.

Water ripples appeared, extinguishing the flames from Luo Feng. Churning water ripples were formed centered around Five Chaos Master, and their voices were transmitted through the water ripples.

The golden horned lizard grew infuriated. “Ultimate Arrow, Five Chaos, then prove that you’re strong by seizing true treasures from that human. Get nothing and be defeated instead.”

“We’re not as incapable as you,” Ultimate Arrow Master said with a sneer.

Luo Feng looked at everything. The great beings from the first incarnation eras were all mad because they were facing true death, and there were lots of inter-power struggles in the first years.

As for Luo Feng, he concentrated on Five Chaos Master, as he was a handful.

Only the original universe could breed small universes and universe supreme masters. Once an incarnation was over, those universe masters from the previous incarnation eras could never become universe supreme masters, which was why universe masters like Five Chaos Master could never make a breakthrough.

He has a pinnacle domain type true treasure “Water Ripple Prison,” thought Luo Feng. However, it’s only a mediocre pinnacle domain type true treasure.

Even though Water Ripple Prison was only mediocre, Five Chaos Master was able to make the best use of it. He wouldn’t be able to resist it unless he fully utilized Golden Country.

Sou!

That broken spaceship shrank to the size of a fist and flew to Luo Feng’s palm.

“Brat, give me the spaceship true treasure and your wing true treasure, and I’ll spare your life,” yelled Ultimate Arrow Master. “We’re not Yin Tuo, and we both have pinnacle domain type true treasures. Either one of us is able to suppress the time and space controlled by your wing true treasure. Without the help of space and time, you might die today.”

“Just give us the true treasures so you won’t suffer greater losses,” Five Chaos Master said, staring at Luo Feng indifferently.

“Hahaha...” Luo Feng guffawed. “Like what Yin Tuo said, everyone can bluff. But nobody knows what will happen in the end.”

“Humph!” Five Chaos Master snorted.

Hong! Long!

The endless Water Ripple Prison started to move, and the energies became gigantic heavenly pillars. Suddenly, a giant palm appeared. There were five fingers on the palm. The palm was 10 billion

kilometers long, and the five fingers were golden, turquoise, blue, red, and yellow, respectively; five beast god paths were contained in them.

“Then die!” Five Chaos Master said indifferently.

The palm slapped toward Luo Feng.

Luo Feng looked up.

Gosh...!

That gigantic palm 10 billion kilometers tall... It blocked everything above, and the five fingers were like heavenly pillars. That palm was more terrifying than those rocks, and the move made Luo Feng realize how terrifying the beings at Primal Chaos City Leader’s level were. If it weren’t for Golden Country, Five Chaos Master could kill him with one move.

“Hehe.” Ultimate Arrow Master smirked. “We’ve given him a chance. Sadly, he didn’t treasure it.”

“Without that golden light, this Luo Feng is just weak.” The golden horned lizard shook his head. “He’s helpless now. Even if he hides in a palace type true treasure, he will be caught by Five Chaos, and he’ll still be miserable.”

Weng!

Suddenly, Water Ripple Prison trembled, and traces of gold tore the ripples apart, driving out all the ripples. An area of tens of square light years was engulfed in Golden Country, and Water Ripple Prison completely disappeared.

The palm completely disappeared immediately following Water Ripple Prison.

“What!” The golden horned lizard was shocked.

“Impossible!” Ultimate Arrow Master couldn’t help shouting.

Though Water Ripple Prison wasn’t one of the best pinnacle domain type true treasures, it was still a pinnacle one—and it was used by Five Chaos Master!

Five Chaos Master squinted the first time, and he gazed at the wing of Luo Feng with greed. “Great wing!” the voice of Five Chaos Master rumbled. “Give me the wing. This is your last chance.”

Luo Feng’s eyes turned red completely. “Just fight.”

Damn it. He didn’t want too much trouble, which was why he didn’t fully utilize Shi Wu Wing even though Shi Wu Wing had completely changed. However, he was facing the terrifying Five Chaos Master, so he had no choice! Perhaps he would attract lots of other great beings, but he wasn’t afraid of anyone. He just didn’t want any trouble.

“Young one, you’re indeed confident,” Five Chaos Master’s voice rumbled. “Sadly, the consequence is to die earlier.”

Five Chaos Master dashed at Luo Feng almost 100 times faster than light. After a short conversation, he was less than three billion kilometers away from Luo Feng, and that single-eye phantom became larger.

Weng!

The single-eyed phantom started to gleam. The sky and land abruptly changed.

Hong! Long!

The world changed. Luo Feng and the golden horned lizard were trapped in a whole new world, and the giant eye floating in the sky looked down upon the land. In this new world, there were five different colors, including gold and turquoise.

As for Luo Feng, he was maintaining Golden Country, and he triggered the flame ocean.

“Five Chaos Sector! Water Ripple Prison! Destroy!”

The noise resounded in that world, and the five-colored light and the water ripples merged together.

Hong! Long! Long!

Golden Country was annihilated, and the five-colored light was combined, forming five giant fingers that grabbed for Luo Feng.

“No...”

Luo Feng was intimidated. His godly power was weak, so Golden Country was only slightly more powerful than Water Ripple Prison. Water Ripple Prison and this world combined had routed Golden Country.

Luo Feng clenched his teeth. “Up!”

The endless chaos airflow permeated the world, and the micro-universe membrane was attached to the limit of the world. It was a great feat to perform Miniature Universe in Universe Ocean, and with Golden Country, the power surged.

Peng!

The five fingers dissipated again.

“Hit, hit, hit!” Luo Feng manipulated Miniature Universe and Golden Country to hit the world, which consumed the energies in Miniature Universe much more quickly. At the same time, the world was hit by the lava whirlpool.

Hong! Hong! Hong!

The world crumbled! And at the same time, Miniature Universe withered away.

“What a great wing. It can resist both of my moves.” Five Chaos Master stared at Luo Feng in the distance, and suddenly, strange black scales appeared on his body. His right hand became gold. “I’ve fought your teacher with all my power before. I can’t believe I need to use all my power to fight you.”

“All your power?” Luo Feng suddenly smiled weirdly.

“Hmm?” The facial expression of Five Chaos Master changed, and he looked to the sky as if he’d just noticed something.

Suddenly, an incredibly giant arm showed up in the sky. The towering Molten Lava Devil God emerged from the lava ocean.

The golden lizard started to run first. “Molten Lava Devil God!”

“Molten Lava Devil God!” Ultimate Arrow Master grew anxious as well.

“Let’s go!” Five Chaos Master started to run.

It was the horrifying Molten Lava Devil God!

Chi! Chi! Chi!

Endless golden light and flames trapped Five Chaos Master, Ultimate Arrow Master, and the golden horned lizard.

“Go?” Madness flashed in Luo Feng’s eyes. “Nobody is going anywhere!”

### **Chapter 1188: Extreme Anxiety**

Five Chaos Master looked at Molten Lava Devil God—who had appeared from the lava ocean high in the sky—and felt something amiss. He was shocked inwardly, as he knew that trouble was brewing, yet he maintained a calm composure. He knew that based on the distance between Molten Lava Devil God and himself, given his ability, he would have enough time to escape to the tangency point deep within that underground maze to teleport himself away.

The surrounding space was frozen, thus disabling teleportation. Likewise, at the entrance of the underground maze, teleportation was impossible. Only at the deepest area of the cave, waves were gradually showing. One had to reach a tangent position before escape was possible.

“How lucky that human was,” said Five Chaos Master. “If Molten Lava Devil God had not appeared, I would give him a taste of my Five Beasts Great Extermination.”

Five Chaos Master set his standards high. Out of all the new generation universe masters of the primal universe, only the top-notch ones had fought against him. To him, even Star River Master was no threat. Star River Master, a weird, unique life-form, was barely comparable to him in battle.

Only Primal Chaos City Leader was able to earn some of his respect. Primal Chaos City Leader’s human godly body was comparatively smaller, but he was able to go head-on with Five Chaos Master’s Five Beast Great Extermination!

Five Beast Great Extermination was a fusion technique composed of the most powerful techniques of the Five Beast Gods Path! Executed together with his precious and rare true treasure... the power was so great that it was unbelievable. He had spent more one reincarnation era to bring this technique to completion, yet Primal Chaos City Leader was able to fight him all the same. To him, the only one from the primal universe who could hope to become a universe supreme master was none other than Primal Chaos City Leader.

Chi! Chi! Chi!

A few thoughts flashed through his mind. Five Chaos Master was about to turn and make a rapid escape when he suddenly felt an endless, golden, blazing flame in his surroundings, suppressing and squashing him relentlessly. He felt as if countless ropes were binding and tying him up.

“What!” Five Chaos Master turned his head in disbelief as he looked at Luo Feng behind him.

If there were no obstructions, he could escape. Yet with this terrifying obstruction, he had no time at all.

From his Golden Kingdom, Luo Feng’s voice resonated in the ears of Five Chaos Master, Yin Tuo, and Ultimate Arrow Master. “No one leaves!”

“Human Silver Wings Horde Leader, are you out of your mind?” Ultimate Arrow Master had been calm about killing Luo Feng but was now on tenterhooks. It was not worth it—not at the expense of his life. He was not willing to die.

“Silver Wings Horde Leader, I have already given up going after your life!” the golden horned lizard shouted in anxiety. “You should not stop me further. They want to kill you, not me.”

Five Chaos Leader was staring coldly. Apparently, he was extremely furious. “Silver Wings Horde Leader, are you thinking of perishing together?”

“Perishing together?” Luo Feng said. He was flying at lightning speed. “The obstacles you all are facing now are helpful boosters to me. This is my territory. Haha, of course you are the ones to die while I live! Five Chaos Master... I heard you have another body, but I’m afraid even your strongest body would go crazy if you lose this precious and rare true treasure that you have painstakingly spent three reincarnation eras to gather to completion.”

“We die, and you live?” Five Chaos Master’s voice was transmitted to Golden Kingdom. “What arrogance. Once I execute Five Chaos Sector, together with my Water Ripple Prison, I would be able to bring you under complete suppression, unless you execute your Miniature Universe... But even if you did, Five Chaos Sector and Miniature Universe would perish together. Thereafter, I would be sure to execute it again. You and I will be in a standoff; by then, no one will be able to escape. I have lived for close to three reincarnation eras. It is nothing having to see my end, but it’s different for you. How long have you lived so far? Life’s too short, and perishing with me now is simply not worth it.”

“Silver Wings Horde Leader, it is now more important to escape for dear life,” Ultimate Arrow Master added.

“Yes, yes, yes, making it out alive is more important!” said Yin Tuo, filled with anxiety.

“Haha! You have another body, and so do I,” said Luo Feng. “A standoff it shall be. At most... we die together!”

Luo Feng continued to fly at lightning speed.

While description might take some time, when it came to communication with powers at their level, the speed of interactive transmission via godly power was so incredibly fast that it was intimidating. And the speed of Molten Lava Devil God was equally intimidating! Its power had attained an unbelievable level. Even universe supreme masters with supreme true treasures would become flustered and run away the moment they saw him. This was enough to know his might. He was even referred to as a human form

supreme true treasure as he had reached the level of “force against technique.” All kinds of laws were meaningless to it, and its speed had reached a limit that far exceeded 100 times light speed. Its speed had exceeded thousands and millions of times the light speed.

Just as he was emerging from within the lava ocean—

Hong!

Both legs landed on the endless, black, rocky land. One stomp of this lofty Molten Lava Devil Monster—a towering figure of 10 million kilometers—was mightier than any other celestial rock by thousands and millions of times.

Hong! Hong! Hong!

Endless black rocks from the large surrounding domains were bashed to pieces in an instant.

Pa! Pa! Pa!

A large gully cracked open a distance away. At the same time, a surrounding area of a few billion kilometers meters of the black rocky land had completely sunken down by a few million kilometers. The impact of his single step was so strong that many caves and tunnels of the underground mazes deep beneath the affected land gave way and collapsed.

One, single step... It was as though he had trampled on the hearts and souls of Five Chaos Master, Yin Tuo, and Ultimate Arrow Master. All of them were filled with anxiety!

“Human, you really want to perish together?” Five Chaos Master demanded. His eyes looked murderous. This was his master body for battles, and he had brought along with him various precious true treasures, just like how Luo Feng had Star Tower and Shi Wu Wings with him. It was the same for Five Chaos Master. It would drive him crazy to be annihilated.

“Human, hurry, hurry, hurry!” Ultimate Arrow Master was mad with worry.

Yin Tuo was truly worried. “Silver Wings Horde Leader, I have given up trying to kill you. Why are you insisting of dragging me to doomsday with you?”

Although they were all crazy, the idea of dying at the hands of Molten Lava Devil God was too great an injustice for them.

Instead of heeding their words, Luo Feng jested, “If we all die together, we will have forged a friendship of life and death.”

Five Chaos Master gazed at Molten Lava Devil God in the distance. Actually, Molten Lava Devil God was still very far away. Due to his massive godly body, he could clearly be seen even extremely far away. The distance might have been very far, but with his ability to use “force against technique,” and that speed of his, which exceeded 100 times light speed by thousands and millions of times, Five Chaos Master was burning with anxiety.

Five Chaos Master’s face grew distorted, and his eyes flashed murderous intentions. Through gritted teeth, he said, “Silver Wings Horde Leader, if you continue to fight, we will all perish. And I swear... I,

Five Chaos, will come after you and hunt every single body of yours to death. Every body of yours that I see, I will hack to death!”

“I welcome your attacks,” Luo Feng taunted. “The pressure you give me will be a good way for me to hone my skills. With such honing, I will be able to trample on you in the future, and I shall enter the hall of universe supreme masters.”

Ultimate Arrow Master appeared conflicted. This annoying human was still in the mood for jokes in this life-and-death situation! But he was also aware that... for him to be joking at this moment—to even be able to laugh—it meant Luo Feng must have made his decision and would not change his mind further.

“I—I—I do not...” Yin Tuo stammered anxiously.

“You wanted to kill me for my treasure not long ago, isn’t that so?” said Luo Feng. “At this point, you’re still thinking of escaping, but it’s too late.”

Luo Feng threw a glance at the golden horned lizard behind him, and at the same time, he saw the immeasurably towering, gigantic Molten Lava Devil God. It was very far away, yet Luo Feng could still feel a pressure exerted by its towering figure.

“Ah! Ah! Aah!” Five Chaos Master wailed, burning with rage. Oh, how angry and furious he was! This young fellow, whom he had no trouble killing before now, was thinking of dragging him to hell’s gate. He did not want to meet his downfall at the hands of this young upstart, so he had to tolerate him!

“Silver Wings Horde Leader, we should escape together,” he said. “Release the domain’s suppression over me. I swear I will not pursue you, and I will give you a pinnacle true treasure.”

Five Chaos Master was really trying to compromise because time was of the essence. In the distance, Molten Lava Devil God was approaching at lightning speed. Its huge legs were stepping on the endless, black, rocky land, and every step was a step of destruction; his attack was more terrifying than any other universe supreme master.

Hong! Hong! Hong! Hong! Hong! Hong!

Gallop, trample—the endless rocky land was trembling.

“Silver Wings Horde Leader!” Five Chaos Master stared at Luo Feng. At this moment, his eyes inevitably betrayed the hint of a plea. For someone so arrogant like him to lower himself... this was not easy for him at all. Yet he was unwilling to give up everything precious that he had spent three reincarnation eras accumulating.

“Hurry! We do not have time to waste!” Ultimate Arrow Master was pleading anxiously. “Silver Wings Horde Leader! Silver Wings Horde Leader!”

“Why didn’t I hurry off earlier when I still could?” lamented Yin Tuo. “I should never have stayed behind to watch the crossfire between Luo Feng and Five Chaos Master. Being a busybody, now I have to pay with my life.”

“Hahaha...” laughed Luo Feng. Earlier, he had been joking and teasing; suddenly, his eyes burned with murderous intent. His face became dark and frightening. “The almighty Five Chaos Master is actually

begging. How interesting. Dream on. Previously, I allowed you to trample on me in any way you liked, but did the thought of just letting me go ever occur to you? Now you want to leave? Too late!”

“We did give you chances previously!” Ultimate Arrow Master quickly protested.

“Chances? Those were chances? You told me to leave my palace true treasure and wings true treasure. Then you would spare my life?” Luo Feng sneered. “Very well, Five Chaos Master... You shall hand over ‘Forbidden Temple’ and ‘Extermination Godly Armor.’ Then I will let you go! As for you, Ultimate Arrow Master, you shall hand over ‘Core of Blade Sector,’ and I will let you go. Yin Tuo, you shall hand over ‘Golden Sulphur Armor’! I will spare your life!”

Five Chaos Master, Ultimate Arrow Master, and Yin Tuo went silent—especially Five Chaos Master. Water Ripple Prison was a pinnacle domain true treasure while Forbidden Temple was a pinnacle palace true treasure. Extermination Godly Armor was his life... It was more precious that Water Ripple Prison and Forbidden Temple put together; it was comparable to a unique object.

“Didn’t you all say you gave me chances?” said Luo Feng. “I am now giving you all chances, too. Your chances are here. Take them.” His eyes were filled with jest and indifference.

Hong! Hong! Hong! Hong! Hong! Hong!

Molten Lava Devil God’s footwork was extremely fast. Every step could cover at least 10 billion kilometers. He was within eyesight now.

Molten Lava Devil God was becoming bigger and bigger, which made Five Chaos Leader increasingly anxious—so anxious that he was losing his sanity. He wished he could devour Luo Feng bite by bite. He wanted to bite off mouthfuls of Luo Feng’s flesh and bones and suck his blood dry!

This loathsome Luo Feng! Five Chaos Master was raging in his heart.

“Don’t you think of going out of here alive!” Five Chaos Master suddenly roared.

Behind him, a single-eyed shadow released an endless light, inducing a change between the heavens and the earth, which transformed into a world of Five Chaos Sector within an instant. Water Ripple Prison was executed once again. Together with Five Chaos Sector, Luo Feng’s Golden Kingdom and Blazing Flames Ocean were annihilated in an instant. Yet Luo Feng maintained his sickening smile and executed Miniature Universe.

An endless chaotic airflow spread out. On the one hand, there was Five Chaos Sector and Water Ripple Prison. On the other hand, there was Golden Kingdom, Miniature Universe, and Blazing Flames Ocean.

The two were crazily entangled, with Miniature Universe and Five Chaos Sector constantly colliding against one another.

Peng!

Both were shattered into shards and pieces. However, they had been fighting for only a split second. Molten Lava Devil God had progressed to dangerously close by.

Near Molten Lava Devil God, the golden horned lizard said in a voice filled with despair, “It is too late now.”

## Chapter 1189: Fight for a Chance to Survive

Luo Feng, Five Chaos Master, and Ultimate Arrow Master all looked at the towering Molten Lava Devil God. They all realized that they didn't have time anymore, especially after the fight between Luo Feng and Five Chaos Master, which only took one second and crushed both Miniature Universe and Five Chaos Sector, and which blocked the safest route for them.

The safest route was to fly underground and to get into the underground cave... Then they could teleport themselves and leave.

But after one second, it was too late.

Yin Tuo was closest to Molten Lava Devil God. He had become a golden horned lizard by using Golden Sulphone Armor. Luo Feng was the second closest, while Five Chaos Master and Ultimate Arrow Master were the farthest. However, they were all less than ten billion kilometers away from each other. That was only one step for Molten Lava Devil God.

Luo Feng had told them he would let them go if they gave him Water Ripple Prison, Forbidden Temple, Extermination Godly Armor, Core of Blade Sector, and Golden Sulphone Armor. But who was willing to give those up? They were their most important true treasures, and they would fight even if they had the slightest chance.

"Damn it! Damn it! Damn it!" the golden, one-horned lizard was yelling. His body quickly bulged. It was formed by the true treasure Golden Sulphone Armor, and it was turned into a beast god. At the same time, it became larger abruptly under Yin Tuo's power. It turned into a golden, one-horned lizard 100 million kilometers tall.

\*\*\*\*\*

"Come in, Ultimate Arrow Master."

Five Chaos Master turned his hands, and a palace surrounded by lightning showed up. It was the pinnacle flying-palace type true treasure, "Forbidden Palace."

"Okay," said Ultimate Arrow Master and went in it without hesitation.

Five Chaos Master glanced at Luo Feng in the distance, then entered the Forbidden Palace.

\*\*\*\*\*

Luo Feng turned his hands also, and a bloody pyramid showed up. That bloody pyramid was Star Tower.

Inside the tower was Golden Horned Beast body. The Golden Horned Beast had Blood Cloud Pearl. With it, he was able to disguise the godly body, its aura, and the shape of true treasures and armors. He had made Star Tower into the shape of a long shuttle, and now, he changed it into the shape of a pyramid.

It was easier to disguise it as a bloody pyramid.

Sou!

Luo Feng went into the bloody pyramid.

Luo Feng had stalled the others, which had stripped them of their best chances of survival. However, the supreme beings wouldn't just accept death like that. They would fight for their lives!

All of them were struggling to survive. They fought for the last chance to survive! At the same time...

Hong! Hong! Hong! Hong! Hong! Hong!

The rocks cracked, and the towering Molten Lava Devil God showed up. There was heated lava all over his body, and his three eyes burned, nearly bursting with mad hostility. Even Luo Feng, Yin Tuo, Five Chaos Master, and Ultimate Arrow Master didn't dare look him directly in the eye. If they did, the mind attack would lower their power by half. His fangs were bared, and growls emanated from his giant godly body; the space was completely shattered.

"Larger, larger, larger." The golden horned lizard was already almost a billion kilometers long.

"Die!"

The three eyes of Molten Lava Devil God were on the golden horned lizard in the distance, and a ripple came from his mouth. Though none of them had heard of it before, Luo Feng, Five Chaos Master, and Ultimate Arrow Master all knew what that meant.

Shua!

The right leg of Molten Lava Devil God moved, and unlike before, the right leg moved extremely fast. That leg seemed to be able to destroy a small universe. It was irresistible. The mysteries behind this move were beyond Luo Feng's imagination.

Peng!

He kicked the giant lizard.

The golden lizard roared in agony and was shattered completely. The fragments of its body flew in all directions, and there were cracks on the fragments. Apparently, that attack was able to damage a top-tier pinnacle spiritual force true treasure weapon.

While the fragments were flying, so did countless drops of water. They rained down on the black ground. The drops of water slipped into the cracks and fell.

"Humph." Molten Lava Devil God felt that there was still power underneath, so he trod down again. The rocks rumbled. The water was annihilated. Then Molten Lava Devil God raised his head as he noticed the two flying objects in the lava ocean. He could sense the creatures inside the flying objects.

\*\*\*\*\*

Sou! Sou!

The bloody pyramid (Star Tower) held Luo Feng and the Golden Horned Beast, and inside Forbidden Temple were Five Chaos Master and Ultimate Arrow Master. The two flying objects surged almost at the same time.

Shua! Shua!

Just when Molten Lava Devil God crushed the golden horned lizard with his step, the two flying objects flew into the lava ocean.

“Die!” Molten Lava Devil God had ripples coming out of his throat. He waved his hands and reached toward the lava ocean.

\*\*\*\*\*

Deep inside the black ground.

One drop had reached a very deep place... There were space ripples.

Shua!

It flew to an area in the distance—a place more than 200 light years away from the battlefield, inside an underground cave deep under the ground. It was an exquisite cave, and a red, child-shaped being appeared in it.

“I came back.” Yin Tuo’s body trembled.

He was a unique life form from the first universe era, and he had gotten the name “Yin Tuo” because he was unique. He didn’t have a gigantic godly body. However, what was special about his body was that it was able to reduce any attacks to 1/10,000th! And with the true treasure armor, it could weaken it to 1/100,000,000th!

How incredible it was! That was why he was called “undying” Yin Tuo!

“No wonder—it’s Molten Lava Devil God!” said Yin Tuo. “One attack damaged my Golden Sulphone Armor, and the second attack annihilated nine-tenths of my godly body. Fortunately, he only trod on the ground instead of attacking me directly. Otherwise, I would be dead already. Besides, Five Chaos Master and Silver Wing Horde Leader attracted him also, so I escaped death.”

Drops of water around Yin Tuo showed up and merged with his body, and his godly body recovered immediately. Those drops of water belonged to his godly body. And they would merge together.

Actually, he had two choices. The first option was to rely on his armor. However, he knew for sure that the armor was only able to weaken the attack to one-tenth at the most. If he didn’t dismantle his godly armor, he would die, which was why he had put back his true treasure armor. Just as the golden, one-horned lizard had crumbled, his godly body had dissipated and was turned into countless drops of water.

When Molten Lava Devil God stomped the second time, though 90 percent of the drops of water disappeared, some of the water was already deep in the cracks. Plus, it belonged to a universe master. Some of it survived.

“I only have 11.2 percent of my godly body left.” Yin Tuo’s eyes glinted. “My Golden Sulphone Armor is also damaged, and it can only wield one-tenth its power. I don’t even know whether I can get it back or not. Damn it! Damn it!”

Yin Tuo was furious. "Silver Wing Horde Leader! Five Chaos Master!" Grudges filled his heart. "That maniac! That human is a maniac! If it weren't for him, I wouldn't have suffered this much! And that idiot Five Chaos Master! If he could have killed Luo Feng, I wouldn't have suffered this much! My Golden Sulphure Armor! My godly body!"

Yin Tuo clenched his teeth. He had suffered huge losses this time.

"I won't let you guys go this easily... Silver Wing Horde Leader, your silver wing true treasure is impressive, yet you've been keeping it as a secret! Perhaps it's as valuable as Extermination Godly Armor." Yin Tuo's eyes glinted fiercely. "You don't want others to know? I'll make it known to everyone! And Five Chaos Master! You have so much pride in yourself, but your original body might die! Haha! What a scandal! What a scandal! I'll let everyone know as well! I'll make life miserable for both of you."

Yin Tuo hated their guts.

\*\*\*\*\*

In the endless Lava Ocean.

Hua!

The giant arm was waving in the lava. And that Forbidden Palace, which looked like a glass ball, was moving forward carefully. Five Chaos Master and Ultimate Master appeared solemn.

"Five Chaos Master," said Ultimate Arrow Master.

"This is our only chance," said Five Chaos Master. "I need to go through Lava Ocean. I'll race to the top of Lava Ocean and arrive at Blazing Flames Lake. The worst we can go through is the seven-level calamities. The first level is Molten Lava Devil God. Now that Molten Lava Devil God has woken up, he won't come to Lava Ocean. This is the rule."

Ultimate Arrow Master nodded. From God-Destroying Valley to the endless Lava Ocean, he arrived at another dangerous place: Blazing Flames Lake. This was a path filled with hazards. Only universe supreme masters dared to venture there.

"Seven-level calamities. I have to go through it. I have to." Five Chaos Master clenched his teeth, and his eyes glinted fiercely. "Human Silver Wing Horde Leader! Silver Wing Horde Leader!" he yelled crazily.

He would never forget that this had all brought on by that crazy human Silver Wing Horde Leader.

\*\*\*\*\*

Inside the whirlpool center of the lava ocean.

The bloody pyramid was close to the lava whirlpool. Once it entered, it immediately neared the whirlpool and was sucked into the center of the whirlpool.

I can get to another dangerous place, Blazing Water Lake, from God-Destroying Valley, thought Luo Feng. There's a shortcut to get out of the lava ocean. Based on the records left by Jie Fanzi, there are six calamities to get through. Even if I have Star Tower, I might be trapped in the lava ocean.

“The only way is to enter the center of the lava whirlpool,” said Luo Feng. “The center of the lava whirlpool can affect the space underneath and formed ‘Annihilation Whirlwind.’ The center of the lava ocean is more horrendous. The deeper it is inside, the more powerful the strangling power is, and even pinnacle palace true treasures can be damaged. Supreme palace type true treasures can resist it, and it’ll get faster the deeper it gets. I’ll go to Blazing Water Lake. It’s a path that leads to certain death for others, but this is the safest path for me since I have a supreme palace true treasure.”

Luo Feng’s eyes glinted with expectation. “Although it isn’t my place, it’s worth it!”

### **Chapter 1190: Blazing Water Lake**

The bloody pyramid was sucked into the center of the lava whirlpool kept moving to the depth of the whirlpool.

Hua! Hua! Hua!

The deeper it was in the whirlpool, the more terrifying the swallowing, gravitational power was.

Peng! Peng! Peng!

Luo Feng and the Golden Horned Beast were both standing in the control room could feel the bloody pyramid (Star Tower) still spinning.

How terrifying! It can definitely rival that wing space, that endless blade storms, Luo Feng thought.

Only in those blade storms would Star Tower fly so out of control. Now, Star Tower wasn’t able to control its own direction, and it completely followed the course of the swallowing, gravitational power.

Speed up! Speed up!

300 times faster than light speed! 500 times faster than light speed! 1,000 times faster than light speed! 2,000 times faster than light speed! 5,000 times faster than light speed! The power in the center of lava whirlpool had made the laws retreat, and the bloody pyramid became a bloody light.

Tong! Tong! Tong!

Luo Feng stayed in the tower as he felt a force like Star Tower being hit by billions of hammers.

“Jie Fanzi was indeed right!” exclaimed Luo Feng. “The center of the whirlpool is indeed the most terrifying place in Lava Ocean. Even pinnacle palace type true treasures will be destroyed... Only supreme palace type true treasures can traverse this path safely.”

He was lucky enough. Even though there were several supreme true treasures. There were different types of supreme true treasures. Five-Color Aurora Lake of the Ancestral God School, the protecting armor true treasure of Virtual-Real Devil Master, the axe true treasure of Huge Axe Founder—none of them were palace type true treasures. There were quite a few supreme true treasures from the three incarnations and the two holy lands. However, there were only a few of each type.

What happened to Five Chaos Master? Did he die? Luo Feng wondered. He also delved into Lava Ocean and tried to seize a chance to survive. He’ll be extremely lucky if he survives.

\*\*\*\*\*

Five Chaos Master and Ultimate Arrow Master sat in Forbidden Palace, and they weren't able to speed up at the center of the whirlpool. There were plenty of obstacles in Lava Ocean itself, so it was relatively slow.

"Be careful."

"Ultimate Arrow, you'll be in charge of this side, and I'll be in charge of that side."

"Okay."

Five Chaos Master and Ultimate Arrow Master both performed their pinnacle domain type true treasures. However, the lava outside was too terrifyingly powerful, so even pinnacle domain type true treasures were only able to penetrate a small area.

"How long will it take for us to get to Blazing Water Lake?" Ultimate Arrow Master couldn't help asking.

"Blazing Water Lake? We're traveling tens of times faster than light speed, so it'll take a much longer time to go through the entire Lava Ocean! We've only traveled less 1/10,000th!" The eyes of Five Chaos Master glinted with madness.

"Less than 1/10,000th?" Ultimate Arrow Master was in despair.

That short moment already intimidated him. The rumor had been false. It was indeed a land of death! If he had traveled alone, he would've died.

"Strive!" Five Chaos Master glanced at him fiercely. "Don't worry! I'm here!"

"Okay! Okay!" said Ultimate Arrow Master anxiously. "Five Chaos Master, I don't have another body—I only have an original body! You have to withstand it!"

"Of course, I'll strive! Do you really think I can let my Extermination Godly Armor go? Do you really think I'll let all my accumulation go?" Five Chaos Master said, glancing at him.

"Okay, okay." Ultimate Arrow Master nodded.

He tried his best to perform his pinnacle domain type true treasure Core of Blade sector. However, the one with bodies and the one without had completely different mindsets... Besides, those dangers made Ultimate Arrow Master despair. That sense of despair and the fact that he might die anytime drove Ultimate Arrow Master mad.

"Humph!" Five Chaos Master devoted all his attention and energies to it. He sometimes controlled Forbidden Palace, sometimes controlled Water Ripple Prison, and sometimes performed his technique using Water Ripple Prison. He had created lots of techniques in the past three incarnation eras, and he performed them one after another based on the situations.

As for Ultimate Arrow? He was useless.

\*\*\*\*\*

Xiu!

The bloody pyramid kept getting faster at the center of Lava Ocean whirlpool. It was already 100,000 times faster than light speed, and the way it traveled against laws dazzled Luo Feng.

Five minutes and the 33 seconds after it entered Lava Ocean...

Peng!

A trace of bloody light flew out of Lava Ocean, flew across the space, and went into the cold water...

Hong! Hong! Hong! Hong! Hong! Hong!

It hit the waters at a speed of more than 100,000 times light speed. Each drop of water was heavier than neutrons. The power from that hit could have cracked a top-tier palace type true treasure. Fortunately, the bloody pyramid was Star Tower, and it was able to withstand that power.

It immediately slowed down, and under that resistance and suppression, the speed of the pyramid plummeted. 10,000 times light speed, 1,000 times light speed, 100 times light speed...

Besides, he traveled from Lava Ocean, which could immediately annihilate godly bodies of universe masters, from the water that could freeze godly bodies of universe masters to death... The immediate change was luckily borne by Star Tower.

Peng!

One minute and 58 seconds after the bloody pyramid entered the cold waters, it was traveling 100 times faster than light speed. It broke the waves, which sharply slowed down the bloody pyramid. Then it came down and landed out of the sky, floating around several hundred million kilometers above the lakes.

A human flew out of the bloody pyramid and became ten meters tall.

“Wow! Although this path is safe, I don’t know if it’s changed after all those eras.” Luo Feng looked down on the lakes and smiled. “Good. I arrived at another dangerous place: Blazing Water Lake.”

He had dared to do this not only because of the map left by Jie Fanzi, but also because he had Star Tower, which could at least save his life. Even if he ran into some special situations, he found them to be worth it, as he could avenge himself against Five Chaos Master.

“Humph. Five Chaos Master.” Luo Feng looked out over Blazing Water Lake. “That Forbidden Palace can only travel tens of times faster than light. It might take you several days to get through Lava Ocean. All those dangers... Haha! Hope you can make it.”

He indeed felt great after taking vengeance on Five Chaos Master, who could rival his teacher. Only those universe masters with supreme true treasures could surpass Five Chaos Master.

“Blazing Water Lake.”

Luo Feng stopped thinking about that Five Chaos Master, and he started to contemplate a new path. From God-Destroying Valley to Lava Ocean, then arriving at Blazing Water Lake. He needed to slightly alter his path.

“Good. I’ve been through more dangerous places, but those were not as dangerous as God-Destroying Valley.”

Luo Feng looked around at the endless Blazing Water Lake. He saw bubbles bursting on the lake, and there was blue fire on the surface of the water like alcohol burning.

Blazing water, blazing water... It was named such because of the flames.

“Blazing Water Lake...” Information flooded Luo Feng’s mind.

Though Blazing Water Lake was dangerous, it was much safer than God-Destroying Valley.

Though there were hundreds of kinds of danger, they were nothing to universe masters who were adequately prepared. The only “danger” that might be a handful was the so-called Frozen Lake Fire, which would suddenly show up above Blazing Water Lake once in a while.

Frozen Lake Fire was blue fire with lightning inside. It was extremely cold, and even universe supreme masters didn’t dare resist it directly. Frozen Lake Fire was able to destroy even top-tier flying palace type true treasures. It would keep going down, and when it touched Blazing Water Lake, it would freeze the entire lake immediately.

However, it wasn’t dangerous to universe masters. First of all, it moved slowly! It moved tens of times faster than light speed, and universe masters were able to see them from a distance, so they could avoid them easily.

Secondly, lots of areas in the Blazing Water Lake allowed teleportation, except for those areas close to the water. Which was why lots of universe masters ran away when they saw Frozen Lake Fire from a distance. As for some supreme beings, they could hide in pinnacle palace type true treasures, which could withstand Frozen Lake Fire.

That was why Blazing Water Lake was only moderately dangerous in Universe Boat. It was close to God-Destroying Valley where lots of powerful true treasures were born, so Blazing Water Lake could have some advantages because of that too. Some true treasures would show up from the lake. It was safe, and there was a relatively higher chance for true treasures to be born. That was why there would be powers stationed around Blazing Water Lake based on the records of Jia Fanzi.

\*\*\*\*\*

Shua!

There were space ripples above Blazing Water Lake, and a being showed up.

“I was stationed in this area, and I felt a ripple. Could it be a true treasure?”

A giant man with four faces and sixteen arms appeared. The facial expressions on the four faces were all different.

He glanced around. He immediately sensed another entity.

“There it is! Huh? It looks like a human...”

The great being immediately flew toward the human like a beam of light.
