

Chapter 1291: Ancestral God

Sitting Mountain Guest had left and started making another Ancient God Eye.

Old beast god... Luo Feng sat in a quiet palace with his legs crossed, thinking. I can't believe he came to find me first before we went to ask him.

There were three types of powers the humans needed. The first type was the universe masters from lots of idle races. Individually, they were all weak, yet combining them all made them the most important power!

The second type consisted of powers like the Ancestral God School and the Space Beast Alliance, who weren't demanding on territories.

The last type were those lone universe supreme masters!

Humans were willing to pay a price to draw idle universe masters to their side! After all, it was not going to affect humans' future plans! However, for universe supreme masters, the Ancestral God School, and the Space Beast Alliance, it would be tricky. The humans knew exactly what they wanted: incarnation transcendence.

For one thing, the humans couldn't guarantee they would be able to transcend incarnation, as the advanced information was covered by the original mind. For another, those lone universe supreme masters would ask for experience in becoming limit universe supreme masters even if they couldn't get the methods to transcend incarnations. And this experience would be the key to training pinnacle powers in the human race—which was Teacher Origin's level.

If some beings from the other races and lone universe supreme masters became as powerful as Teacher Origin, the humans wouldn't have an advantage over pinnacle powers; then the humans wouldn't become the first power in Universe Ocean.

The humans were waiting—waiting to see how many universe masters they could draw to their side! And they were also waiting to see how many of their enemies they could draw and who would stay neutral!

If the humans were able to resist the alliance, they wouldn't need the Space Beast Alliance! After all, the humans needed to consider the future.

That day, the old beast god arrived around three hours after Luo Feng arrived.

“Luo Feng!” His voice echoed in the palace.

Sou!

Luo Feng flew out. He looked at the giant being in space. It had a giant dragon's head bearing nine horns. The horns were in the shape of crowns, and his long body wielded enormous claws mounted on nine toes.

It's the real body, Luo Feng thought. Apparently, Space Beast Ancestor is sincere.

"Space Beast Ancestor," said Luo Feng.

Space Beast Ancestor extended his body, and he was still looking at Luo Feng. "This would be the second time we have met since Beast God Sector."

"Indeed." Luo Feng smiled. "I've been grateful for your help."

"Hahaha...!" Space Beast Ancestor guffawed. His voice echoed throughout each inch of the space. "No need to be grateful."

Actually, the Space Beast Alliance had owed Sitting Mountain Guest before, which was why he had allowed Luo Feng to enter Beast God Sector.

"We're no strangers, so I'll be straightforward," said Space Beast Ancestor. "You know the situation quite well. The humans and the alliance are enemies now. The alliance keeps drawing powers to its side, and I know many powers have agreed to join them."

"Some powers have joined us as well," Luo Feng said with a smile.

"Yes," said Space Beast Ancestor. "However, all the powers know what a threat the humans are! Those idle races know, too... Don't mention your promise, as it doesn't mean anything. Everyone will break a promise in certain situations. Surviving is cruel, and when humans become more powerful, promises will be broken."

Luo Feng sighed.

"That means you won't be able to draw as many powers to your side as the united forces alliance," said Space Beast Ancestor. "Which is why you should cooperate with my alliance, the Ancestral God School, and those lone universe supreme masters."

"Oh?" Luo Feng listened carefully.

"I've spoken with the three ancestral gods before." Space Beast Alliance watched Luo Feng. "The Space Beast Alliance and the Ancestral God School will be on the same side!"

Luo Feng was shocked. The two powers had just formed a side of their own. They would certainly have more bargaining power when negotiating with humans or the alliance...

"Our requirements are simple," said Space Beast Ancestor. "Firstly, we want the experience to become a universe supreme master from a universe master. Secondly, we want the guidance to transcend incarnation. Luo Feng, if you and the humans agree, my alliance and the Ancestral God School will join the human team immediately!"

Luo Feng's heart skipped a beat. It was exactly what he had expected. Actually, different powers had different requirements based on their roles. Those weak powers didn't even dare to think about

transcending incarnations. The only thing they wanted was a universe supreme master so their race wouldn't go extinct and could live for at least three universe eras.

"Ancestor." Luo Feng stared at Space Beast Ancestor. "Don't you know about the original mind?"

"The original mind?" said Space Beast Alliance. "Of course, I do."

"Then you should understand that the information about incarnation transcendence and more advanced experience are hidden by the original mind." Luo Feng looked at Space Beast Ancestor. "Even we don't know how to transcend incarnations."

Space Beast Ancestor said, "I've talked with the three ancestral gods, so of course, I know about that. You just need to provide us with as much as you can. For example, the experience to become a limit universe supreme master, and, after that, I'll make efforts myself. Do you agree?" Space Beast Ancestor stared at Luo Feng. "If you do, then the Space Beast Alliance and the Ancestral God School will join the human team immediately. We won't be the only powers who join, as these conditions are appealing to other lone universe supreme masters as well. It all depends on whether you're willing to give out the information or not. You gain only after you pay. It's up to you."

Space Beast Ancestor gazed at Luo Feng.

Luo Feng went silent.

Did he have a choice?

Actually, the lone universe supreme masters, the Space Beast Alliance, and the Ancestral God School couldn't have cared less about humans' power, as they didn't care about territories at all! As for another power thriving in Universe Ocean and a power stronger than the holy land? They didn't care about that either. All they cared about was the inheritance—and the experience to reach the limit!

And as for how to get it? They didn't care about that, either! Whatever would work!

Space Beast Ancestor gazed at Luo Feng.

After a while, Luo Feng said, "Ancestor."

"What's your decision?" Space Beast Alliance was a bit anxious as well, as this had to do with his fate—the fate of his race.

Luo Feng responded, "I've pondered your offer for a long time, but I can't make this decision myself. I need to talk about it with the other universe masters in my race, especially my teacher Primal Chaos City Leader. If they agree, I'll tell you myself, immediately. If they don't, I'll tell teacher Sitting Mountain Guest to tell you."

"Okay!" Space Beast Ancestor growled. "Then I'll be waiting for your response."

Hong!

Space Beast Ancestor disappeared.

Luo Feng stood there for a long time...

Although Luo Feng's original body was at Sitting Mountain Guest's, he went to contact Primal Chaos City Leader through the virtual universe.

"Luo Feng, I thought you asked Sitting Mountain Guest to make a true treasure. Why are you here?"

Primal Chaos City Leader realized that Luo Feng might have something important to tell him. They both sat down.

"The old beast god met with me and offered me a deal," said Luo Feng.

"The old beast god?" Primal Chaos City Leader was surprised. "What sort of deal?"

"The deal I expected." Luo Feng continued. "Firstly, the experience from ancient civilization about becoming universe supreme masters from universe masters. Secondly, the experience of how to reach a limit universe supreme master!"

Primal Chaos City Leader frowned. A limit universe supreme masters? That was power at the level of Teacher Origin.

"He also said the Space Beast Alliance and the Ancestral God School have formed an alliance," said Luo Feng.

"Ancestral God School?" Primal Chaos City Leader frowned. "Ancestral God School shouldn't be so hasty... Their requirements shouldn't be as high as that of the Space Beast Alliance."

"What?" Luo Feng was confused.

Primal Chaos City Leader smiled. "You've been adventuring in Universe Ocean since you arose, yet you still don't know some common knowledge. The three ancestral gods are only universe masters, not universe supreme masters."

"What?" Luo Feng was shocked.

The three ancestral gods were universe masters?

"This is a secret shared among the seniors." Primal Chaos City Leader shook his head. "For one thing, the three ancestral gods came into being when the Ancestral God School was formed. Do you really think it's so easy for universe supreme masters to be born? And there are three of them, and they're all in the Ancestral God School? For another thing, the three ancestral gods have never entered Universe Ocean. Also, issues in Universe Ocean are all solved by universe masters like Nine Remoteness Master."

Chapter 1292: Urgent

Luo Feng frowned. "But... but when ancestral gods make their orders, they'll be strictly enforced, and they can wield the power at top-tier level six by using only pinnacle true treasures!"

“Haha...” Primal Chaos City Leader smiled. “Do you know what is meant by ‘making orders, once given, strictly enforced’? It’s a privilege given to universe supreme masters by universe origin. However, when fighting universe masters, this privilege will be stripped away. If the original mind wants to favor those ancestral gods, they can give them the privilege.”

Luo Feng blinked in surprise.

“The privilege is bestowed by the original mind!”

“As for reaching top-tier level six by using only pinnacle set true treasures, they have universe-supreme-master level techniques,” said Primal Chaos City Leader. “You comprehended it by yourself. Peng Gong used the engravings on the supreme true treasures! As for the three ancestral gods, they use the techniques bestowed by the original universe directly, like inherited techniques.”

“Inherited techniques?”

Luo Feng understood. Just like his technique “I Am the Universe, the techniques bestowed by the three ancestral gods were more advanced. They were at the universe-supreme-master level.

“Do you understand now?” Primal Chaos City Leader exclaimed. “The Ancestral God School was created by the original universe, and it has chosen three great beings to be its representatives! The original universe gave them privileges and inherited techniques. However, they have to bear more responsibilities, and there are lots of restrictions on them.”

Luo Feng nodded. It was true. If they were indeed universe supreme masters, they would go deal with the issues in Universe Ocean themselves. If they were indeed universe supreme masters, Virtual-Real Devil God wouldn’t have said that the ancestral gods weren’t his match in Universe Ocean. The real reason was that ancestral gods were decoy universe supreme masters.

“They are restricted, and they can only be free after this universe era.” Primal Chaos City Leader smiled. “To them, the most important thing is to become universe supreme masters. However, space beast ancestors have a point. Those ancestral gods, eight beast gods, and those guarding beast gods and guarding godly masters all want to become universe supreme masters and transcend incarnations at the same time. However, no alliance is eternal. Space Beast Alliance and Ancestral God School won’t stand side by side forever. I’ll talk to the Ancestral God School, and I’ll convince them that the best thing we can offer is experience on how to become universe supreme masters.”

Luo Feng nodded, “Then what about the Space Beast Alliance and those lone universe supreme masters?”

“Just wait!” said Primal Chaos City Leader. “Those idle powers are still hesitant. We’ll try our best to draw as many of the universe masters to our side as possible. 100 universe masters are as powerful as 10 universe supreme masters... We should concern ourselves with the idle races. If we can draw enough of them to our side, we don’t need to worry about those lone universe supreme masters anymore.”

From undying fighters to universe supreme masters, the systematic way from the ancient civilization cultivated pillars of power—like lots of universe masters and universe supreme masters. As for pinnacle powers, they were those like Teacher Origin.

“Nobody in Universe Ocean is as powerful as Teacher Origin,” said Primal Chaos City Leader. “If one or two humans become as powerful as Teacher Origin in the future and we have enough pillar powers, we’ll become invincible.”

“Yes.” Luo Feng nodded.

Everyone wished that their races would become stronger! Nobody wanted to share the secret to pinnacle powers with other powers. If their powers became stronger, like lone universe supreme masters, they would roam Universe Ocean without caring about humans.

They might be in conflict with humans, and if they were fighting, even if the humans were relatively stronger, they wouldn’t win, as the lone universe supreme masters didn’t have anything to care about. They were as powerful as Teacher Origin as well.

“Wait! Wait until everything becomes clearer.” Primal Chaos City Leader sounded excited.

After three days, Luo Feng took another Ancient God Eye from Sitting Mountain Guest and went back to the human territory. He tried to persuade some lesser powers to join them.

“As you see, none of the universe masters who joined us died!” Luo Feng said, trying to convince a gigantic rock being. “Perhaps we don’t have a great chance to win, and I won’t brag about our power, but they don’t have that much of a chance to win either. However, I can guarantee that you’ll be safe. We have Boat of Mausoleum, Black Prison Tower, and Star Tower. If you join us, your safety will be absolutely guaranteed!

“You’re afraid that you’ll be attacked? Don’t worry about that! We have many universe masters on our side, and if any race dares to take vengeance on you, we’ll annihilate that race with Star Tower and Boat of Mausoleum.”

“You’ll definitely win if you join the alliance! As you can see, there are six powers already in our alliance, and the unity is strong. These six powers alone have already had around 300 universe masters! And some idle races have joined as well, so we’ll have many more universe masters. Besides, we have more universe supreme masters and supreme true treasures as well.

“What? Mind-shock valuables? That’s a joke! I have to admit that such a valuable is indeed impressive, but look at how many universe masters we have! The six powers alone have 300 universe masters already. If we divide them into teams of 50, there’ll be six teams! No matter how powerful those valuables are, it can only attack one team! After all, the mind-shock valuable depends on distance, and the farther we are from the valuable, the weaker its power will be. You know the black-striped stone pillar and how it works.

“All we need to do is to be farther away from those humans—about ten million kilometers away from them. Which means that mind-shock valuable won’t affect us much during the war. Besides, if we divide the universe masters into small teams, the effect will be smaller!

“To summarize, our team is definitely winning! Besides, the feud between us and the humans will last a long time. If they don’t give us the inheritance, we’ll suppress them forever so that they’ll never prosper, and those who seek the humans will regret it.”

Both sides were trying to recruit more members.

The humans were relatively weak, yet the united forces alliance was stronger. (After all, the Northern Territory Alliance alone had around 100 universe masters already).

Days passed. All the powers in the original universe were observing the situation, and the powers in Universe Ocean were doing the same thing as well.

“Damn it!”

“We can only stay in Universe Ocean! Damn it! If we can enter the original universe, we can force the humans to give us the experience on incarnation transcendence.”

“Why can’t we join?”

The powers in Universe Ocean were all anxious, but they felt helpless as well. Both the first universe era and the second universe era were much more powerful than the original universe era! Several pinnacle races from these two universe eras were powerful enough to crush all the powers in the original universe. However, they couldn’t enter the original universe.

Luo Feng took out a token.

“Milky Way Horde Leader!”

“The memory stone you gave me last time is indeed useless! If you give me one more, and that memory stone is indeed useful, I’ll give you eight supreme true treasures for the third memory stone. What do you think? Unless you’re trying to deceive me, you should give me the second memory stone.”

“Eastern Emperor Ancestor, if you want to get the second memory stone, give me four supreme true treasures.”

In the current conversation, Luo Feng was still being tough!

Apparently, Eastern Emperor Holy Land knew what was happening in the original universe. After the trade last time, the ancestor assumed Luo Feng wasn’t deliberately trying to deceive him because Luo Feng couldn’t read the more advanced information, which was why he still wanted the second one.

However, the ancestors didn’t want to give up any more supreme true treasures. He understood that the humans were in a difficult situation, so he went to Luo Feng directly!

“I still insist. If you’re not giving me supreme true treasures, then there’s no deal.”

It was not that Luo Feng didn't want to do it. Instead, he understood that the first memory stone he had given to Eastern Emperor Ancestor was already the best option. Even though he couldn't read the information, he knew how precious those memory stones were and what type of experiences the stones contained. If the first one was useless, then the following two would only be worse.

That was why Luo Feng couldn't give him the memory stones. And besides, Luo Feng was the only one who had the memory stones, so he had a monopoly over them. Eastern Emperor Ancestor couldn't do anything about it.

With time going by, the war was drawing near as well. The whole original universe was under terrific pressure. And the powers in Universe Ocean were also concerned about the situation, as they wanted to join the fight. Unfortunately, they couldn't.

Suddenly, Luo Feng heard the voice of Primal Chaos City Leader. "Luo Feng, Luo Feng, come!"

"Huh?" Luo Feng sensed that something was wrong.

Sou!

He teleported to the main palace where Primal Chaos City Leader was, and all the universe masters showed up one by one.

Chapter 1293: The Great Change

Luo Feng teleported himself to appear within the hall and looked around him, where various figures were appearing successively after teleportation. A short moment later—including Primal Chaos City Leader, who was standing high above—a total of 19 universe masters appeared. All the human universe masters were present. Not even one was absent.

Luo Feng was in awe. There were a few universe masters who had remained in the original universe. But now, the "avatars sustained by godly powers" of these few universe masters had all rushed over.

"What is going on? Teacher has actually summoned all the universe masters of the human race." Luo Feng was feeling the pressure. Even when they were out battling against the united force of the three races, this was something that had never happened before—all the human universe masters gathering together in one place.

At that time, within the hall, everyone wore heavy expressions. Silence. None of the universe masters spoke.

An invisible pressure caused every single universe master to feel heavy-hearted as they looked toward Primal Chaos City Leader.

"Everyone!" Primal Chaos City Leader said. He walked down the stairs, looked around at the numerous universe masters, and slowly said, "The situation has undergone a great change."

"What change?" Long Yan Master could not help asking.

“Primal Chaos City Leader, what has happened?”

“What is the exact situation now?”

“Teacher!”

One by one, the universe masters spoke up. Even Luo Feng was asking persistently. This scene apparently had all the universe masters on pins and needles.

Primal Chaos City Leader said solemnly, “I just received news that a large number of scattered races...”

Luo Feng and the rest suddenly felt knots in their stomachs. The universe masters of the scattered races were the key to the final battle this time around! The human camp and the united force camp... Who could obtain enough support? The winner would be in a more advantageous position. Judging by the situation, could it be that most of the scattered races were turning to the united force camp?

“A total of 282 powerful races, close to 10,000 ordinary races, and a tremendous number of weak races...” Primal Chaos City Leader said in a solemn tone. “They must be forming an alliance secretly!”

“What!”

“An alliance?”

“The scattered races are forming an alliance?”

Suddenly, the hall was in an uproar. Luo Feng and everyone else was shocked.

Those billions of scattered races—the so-called “ordinary races” and “weak races”—all lacked strength. Like the golden horned race that was living in the human territory in great numbers, none of these races had a single universe master. This was why they lived precariously within the universe. Most lived as vassal races, relying on the stronger races or even relying on pinnacle races for survival. So even though it was said to have a total of billions of races, the actual total was mainly composed of the alliances of the 282 powerful races!

“How did it turn out to be like this?”

“How can such a thing happen?”

“The scattered races. These—these scattered races! How dare they form an alliance? They think they can actually combine forces?”

At that moment, there was chaos in the hall. Everyone was shocked and flustered.

This was earth-shattering news for them all! Previously, there were nine top powers in the primal universe. Every top power, like the Hong Alliance and the Bug Clan Alliance, had a total of around 40 universe masters. The Northern Territory Alliance had the greatest number of universe masters, but it was, at most, around 100, and they were dispersed all over! This was why it was always considered relatively quiet in the primal universe.

A combination of the various scattered races was difficult to fathom. Their territories were scattered in all corners of the primal universe, and some bore extreme hatred for one another. Combining forces?

The human camp and the united forces camp had never considered this before! After all, within such an extremely short period of time, for countless scattered races to combine forces... That would be something very difficult to achieve.

“282 powerful races. Just... just how many universe masters would there be?” Ice Mountain Master could not help asking.

“How is that even possible?” Luo Feng was also in disbelief.

Forming an alliance was easier said than done. It implicated many races, as well as their grudges, benefits, interests, and conflicts. Who had higher status? Who was lower? Who would be the leader?

Primal Chaos City Leader said in a solemn tone, “This has already happened, and it will be made public soon. Previously, the scattered races were not under such great pressure, but now, under the influence of the two camps forcing them to choose sides... Naturally, some of these universe masters do not wish to take particular sides but were worried that if they choose to stand alone, they would be too weak. That is why races start to rope in universe masters to form cliques.

“Although these signs appeared earlier, I didn’t take them seriously. Who would have thought that within such a short time, an entire alliance could take shape? And... the alliance master of this alliance is none other than Shi Hua Island Leader!”

The moment this was said, everyone within the hall was shocked into a daze.

Shi Hua Island Leader?

Shi Hua Island Leader was one of the supreme masters who traveled alone and had always been so mysterious. Out of all the supreme masters, Shi Hua Island Leader, Sitting Mountain Guest, and Northern Territory Alliance Master were known as the three most mysterious ones. Such a mysterious fellow would actually become an alliance master of a super alliance?

“This super alliance consists of six major groups of secondary powers and some other smaller groups of powers,” Primal Chaos City Leader said seriously. “There is a total of 282 powerful races, and the total number of universe masters exceeds 400! And the human camp and united forces camp have seen a number of universe masters leaving us to join that super alliance.”

“Leaving the camps?” Luo Feng and the other universe masters’ expressions became more twisted.

“Primal Chaos City Leader, how many universe masters have left the human camp?” Deserted Mirror Master quickly asked.

With a nod, Primal Chaos City Leader replied, “As you all know, the vassal races that turned to us were, after all, reliant on us! During a war, we can reasonably detain a number of these universe masters as hostages in our original universe. But when the war ended with the united force of the three races, we certainly had no reason to not allow them back into the primal universe.

“Previously... they were faced with two tough choices, but after many struggles, they finally decided to turn to us. But when this alliance was secretly being built up, it also got in touch with the universe masters who turned to us and the united force camp, respectively. Just a little persuasion was enough to get these universe masters to turn their backs on us.

“Some time ago, the total number of universe masters in our human camp had risen to over 180. But now, including myself, we only have 162, and there are still universe masters coming forward to bid farewell.” Primal Chaos City added with a sigh, “When they choose to leave, how is the human camp able to stop them?”

Dead silence.

Luo Feng and the other universe masters were all devastated.

Earlier on, when the scattered races chose to support the human camp, they were merely turning to the humans as the humans had given them certain promises. But it was not possible for them to sell themselves to the humans forever! These scattered races had already fought a battle for the humans, and without even asking for any benefits, they left. Even if they were not allowed to leave, they would fly out from the ‘original universe’ and into the Universe Ocean.

Now it seems like the humans wanted to kill them all. If the humans really dared to do so, this would blow up into an even greater furor.

There was only silence within the hall. Not one of the 19 universe masters spoke a word. Everyone was at a loss for words.

Finally, it was once again Primal Chaos City Leader who got the ball rolling.

“Within the past few days, major groups of powers from Universe Ocean have gotten in touch with us.” Primal Chaos City Leader said. “They were all asking for the guidance from the ancient civilization to learn about how they could cultivate to transcend reincarnation. Among them, many knew about the influence of the willpower of the origin of the primal universe. So they are requesting the cultivation experiences to learn about how they could cultivate to reach the ultimate limit of a universe supreme master. And they are all willing to trade these experiences with supreme true treasures.”

The various top groups within the Universe Ocean were all very powerful. Like the Divine Eye Clan, the Skeleton Clan, and many others—all of them had several universe supreme masters. For them to take out a supreme true treasure to trade for the cultivation experiences on how to cultivate to reach the ultimate limit of a universe supreme master, they would be most willing to oblige! After all, when confronted with doomsday, who would still be unwilling to give up their true treasures?

“Those loathsome powers of Universe Ocean just have to choose this most critical moment to negotiate with us,” Void Gold Master said coldly. “They know that we are in a difficult situation now.”

“This is precisely why they are here to tempt us, because we are in such a predicament,” Darkness Master said in a low voice.

“Not only them...” Luo Feng started to say. “Not too long ago, that East Emperor Holy Land contacted me again.”

“East Emperor Holy Land?”

Suddenly, everyone looked at Luo Feng.

The humans were unwilling to strike deals with other groups of powers because giving out part of their inheritance to these other groups of powers, they would most probably be shaping a powerful opponent for themselves in future! But East Emperor Holy Land was different. Because East Emperor Holy Land already had an existence that transcended reincarnation. He already had the experience of cultivating to the ultimate limit of a universe supreme master.

Even if the humans were to give snippets of a part of that experience, it would just be icing on the cake for them! And there was no influence or effect on the human race at all.

“East Emperor Ancestor is very sly and greedy.” Luo Feng sighed and shook his head. “It is not going to be easy trying to get another supreme true treasure from him.”

“He is just doing this because he knows that we humans are in a predicament now,” Remote Lord Master said through gritted teeth.

Every top power within the Universe Ocean was coveting after the same thing. It was just that they could not get themselves involved, so they could only wait for the critical opportunity at that right moment when the humans were stuck in a predicament. Then they would make use of the temptation of a supreme true treasure! After all, most of the top powers within the Universe Ocean mainly sought to form a coalition with the humans. The others like the united forces camp were completely off their lists.

As for loaning the united forces camp with a supreme true treasure? They were worried that would be the last time they set eyes on their treasures!

“We’ll wait!” Primal Chaos City Leader said in a low tone. “We can only wait.”

“Wait for the response when this super alliance is formed by all those scattered races put together! Before that, just a single race alone will certainly lack the clout to demand anything from us. But now... they have more than 400 universe masters, which is much more than the united forces camp! This is a strength that could truly influence the outcome of the final war, or, in other words, whichever side they decide to take. That will be the winning side!

“Now they have enough clout. Especially that Shi Hua Island Leader. So soundlessly he became an alliance master of a super alliance. For this mysterious Shi Hua Island Leader to make it this far, it will be impossible for him to want nothing more. What does he want? He must have a goal in mind.”

“So—this super alliance will make a move very soon,” Primal Chaos City Leader said with much solemnness.

Luo Feng and the others all nodded with heavy hearts. Actually, everyone could guess that, with enough influence, their opponents would definitely have requirements of extremely high expectations! Must the humans really oblige? If they did not give what was requested, what if more than 400 universe masters joined the united forces camp instead? To the human race, this would be a great catastrophe!

Within the demons’ territory, Blood Tooth Star.

Bouts of intentions were falling upon this star, and the avatar of Black Lotus Master, who was from the Northern Territory Alliance, was here.

“Loathsome. How dare they, these weak little groups of powers—inferior groups of powers—how dare they combine forces! Forming such a super alliance and causing some universe masters who have originally turned to our united forces camp to detach themselves from our camp. They cannot be stopped, nor can they be persuaded!

“Shi Hua, Shi Hua, this fellow, Shi Hua... I should have realized that he had such extraordinary methods. I would never have expected him to be able to come up with such a super alliance. Coming up with such a super alliance is an extraordinary feat. My guess is, with Huge Axe’s annihilation, he may have foreseen the imminent situations, so he must have started planning this in the dark for quite some time.”

“Now, the initiative lies in the hands of this super alliance.”

“Let’s just wait and see.”

“Let’s wait to see what this super alliance is up to.”

The united force camp and the human camp were both caught off guard.

Half a month later, the super alliance was established, and formal news was publicly announced to the entire primal universe. This super alliance was named “Freedom Alliance,” and once established, it would become the leading power within the primal universe right away.

Chapter 1294: Left by Teacher Origin

The bug race, the demon race, and the automaton race... Although the six powers formed an alliance, it was a very loose alliance. It was, after all, divided into six powers.

However, the Freedom Alliance was different. This new superpower was consolidated, and it planned to be a superpower that would exist forever. It was kind of like the Northern Territory Alliance, but it was much larger! It planned to exist forever, so the unity inside the alliance was much stronger.

Hua! Hua! Hua!

The golden waves were tumbling in the sky and sweeping across everything. The stars and planets were like grains of sand, but they were well protected.

There was an island in the golden waves. On the island, thrones were arranged to form the shape of a ring. Various life forms sat on the thrones—flesh and blood type, energy type, metal type, rock type, and plant type—and they were all powerful.

“Everyone!” A towering purple being sat on a purple throne, and his voice echoed through each inch of space and time around it. “From now on, the Freedom Alliance will rise in the original universe!”

“Freedom Alliance! For survival, for freedom!”

“All the races present are idle races, and even the most powerful one only has six universe masters. Most of the races here only have one universe master. Anyone of us is weak compared to those two

teams! If we join the united forces alliance, we need to fight even if our lives will be endangered. We can't even gain that much. If we join the humans, the united forces alliance might take revenge on us."

"We're also from a race."

"We're also a part of the original universe."

"We can't even be neutral and live our lives in peace and quiet!"

"Nobody wants to live like this!"

Shi Hua Island Leader looked around. The universe masters were all nodding. Apparently, they were in a dilemma.

"Even though I'm a universe supreme master, this is a fight between two large teams. One universe supreme master can't change anything," said Shi Hua Island Leader. "I'm not happy about that either. Why do we even fight in this universe? Because we want to get what we want and guard the most important things to us! To advance! To guard the things we love! And to fulfill that, we first need to be free! If we can't even make our own choice, what are we even guarding? That is why we formed the Freedom Alliance!"

Shi Hua Island Leader's eyes gleamed, and he went on saying, "Those universe masters who can't come here sent their avatars. Our alliance has 298 races, and there are 433 universe masters! Once we're united, neither the united forces alliance nor the human team can sway us! The humans have mind-shock valuables, and both teams have supreme true treasure palaces. But they can't sway us!

"The mind shock valuable is already exposed, so everyone knows its weakness. As for palace type supreme true treasures? 20 universe masters combined are enough to resist the swallowing power from Black Prison Tower, Empress Tower, and Star Tower. Even if the humans get more powerful in the future, they have fewer than 20 universe masters. Even if they have 100 in the future—and even if they have 300 with the help of ancient inheritance—we have more than more than 4,000 universe masters! As time goes by, there will be more. We can defend ourselves against the humans even if they prosper in the future! As long as we stand together, nobody can sway us! Present or future! This is not a crisis for us! Instead, it's an opportunity! An opportunity to become stronger!"

The voice of Shi Hua Island Leader resounded in the ears of every universe master and inflamed their desire. However, they had been too weak to fulfill them before. Now, as they looked around and saw the thrones and the shadows of more than 400 universe masters, they felt confident! It was an enormous power! And they would surely get more!

As time passed, some universe masters left the human race and the united forces alliance. After half a month, no universe masters tried to switch sides anymore. There were 298 races and 433 universe masters in the Freedom Alliance. It was a power that placed excessive pressure on the united forces alliance and the human team.

Blood Tooth Star, demon race territory.

The minds of the six universe supreme masters and the avatars of Star River Master, Black Lotus Master, and Liu Lan Star Master were all present.

“The alliance of our six powers—even if we count the universe masters who come to us, many universe masters are leaving our alliance these days, and we have fewer than 400 universe masters now! Even if we count the universe supreme masters, it might only match the Freedom Alliance.”

“Besides, we can’t guarantee the loyalty of those subsidiary races. Even if we’re going to fight the humans, we must hold some of them hostage in our miniature universes in case some of them betray us.”

“Which is why our actual power will be weaker than the Freedom Alliance.”

“What should we do?”

“Agree with their terms?”

The top seniors looked at each other. The Freedom Alliance had indeed named their terms.

One: The inheritance from the ancient civilization would be shared equally, without a doubt. And two: Two supreme true treasures would be given to the Freedom Alliance. If the united forces alliance did so, the Freedom Alliance would join the united forces alliance immediately.

“Two supreme true treasures. How greedy! The war against the humans will not only benefit us but them as well, yet they want two supreme true treasures!”

“Is that even a question? Under the same conditions, they’ll definitely join the human team. Once they join the human team, the humans will absolutely win! Besides, the humans can give them the inheritance experience from the ancient civilization... Of course, they’re more willing to join the human team. They named their terms on purpose!”

“They must have given the humans the conditions, and now they’re waiting for a response as well.”

“A supreme true treasure... The Northern Territory Alliance, the prison race, and the crystal race don’t have supreme true treasures. As for the demon race, the bug race, and the automaton race, we have four in total. Yet we’re supposed to give them two? Are they serious?”

“Don’t worry.”

“The humans will give them an answer. If the humans say no, the negotiations will be much easier. We can negotiate the conditions!”

The human team was facing a tough decision as well.

“I need to talk about it with other human universe masters, and I’ll get back to you as soon as possible,” said Primal Chaos City Leader.

“Then we’ll wait for your response, Primal Chaos City Leader.”

A phantom-like spring of water flew out of the primal secret region. After a while, the human universe masters gathered in the main palace.

“The representatives from the Freedom Alliance came here before,” said Primal Chaos City Leader.

“Their terms are precisely what we expected: the experience of how to advance from universe masters to universe supreme masters and to limit universe supreme masters. We at least need to give them some of the experience before they join us, and after the war, we’ll give them the other part.

“This is the first situation. As for the second situation, we need to give them the experience from universe masters to universe supreme masters for them, at least, to stay neutral. Otherwise, they’ll join the united forces alliance.”

Some universe masters cursed after hearing this.

“They’re so greedy.”

“So bold.”

“Why shouldn’t they be bold? They have so many universe masters.”

“They need the experience from universe masters to universe supreme masters to at least stay neutral?”

All the human universe masters were upset. However, they couldn’t do anything about it, as the Freedom Alliance was making the choice!

“I won’t reply to them first,” said Primal Chaos City Leader. “Let’s wait and see if there’s a third way!”

The humans didn’t want to share the experience. After all, they needed to share at least some of the experience with the universe masters no matter how simple the inheritance was. They would only come to their aid if they thought the experience was useful. This was actually helping the Freedom Alliance to grow stronger than it already was.

Primal Chaos City Leader looked around the universe masters. “There’s no need to rush. It’s a crucial moment, and it’s time to share the final secret of the human race.”

“The final secret?”

Everyone became quiet. They were all shocked.

“Chaos, what secret do we have?”

“Brother!”

“Chaos!”

They were all in a daze. They were, after all, already the top beings within the human race.

Primal Chaos City Leader looked at the human universe masters and said, “Teacher Origin roamed Universe Ocean and was invincible. After that, he went on to a difficult path. He knew it would be difficult, so he waited until Huge Axe became a universe supreme master to start it. Then he left us a

valuable to guard the race. After that, he followed his chosen path, and eventually, he was suppressed by the mind of the original universe.”

Their eyes gleamed.

“I’ve been guarding the primal secret region, and this is our last defense,” said Primal Chaos City Leader. “Luo Feng, Darkness, Peng Gong... You are fighting the other races, and I’ve been standing guard here. If I don’t have anything, how am I supposed to guard it? It’s time for you to know exactly what it is I do have.” Primal Chaos City Leader turned around. “Follow me.”

Luo Feng and the others looked at each other, then followed Primal Chaos City Leader.

Chapter 1295: Guarding Valuable

Luo Feng and the other universe masters followed Primal Chaos City Leader and walked through the hallway. They could see Boat of Mausoleum floating in Thousand Treasures River in the space behind the palaces.

“Where are we going, brother?” asked Darkness Master. Even he didn’t know about the guarding valuable left by Teacher Origin.

Primal Chaos City Leader looked back and said, “Let’s get into Boat of Mausoleum. Even though this is the central area of Primal Secret Region, there are lots of universe masters from other races. I don’t want the information leaked. Let’s get into Boat of Mausoleum first so you all can see it.”

Luo Feng was curious.

After a while, they entered Boat of Mausoleum, which was 100 billion kilometers long, floating on Thousand Treasures River.

“Boat of Mausoleum is indeed exceptional.” Primal Chaos City Leader couldn’t help complimenting it. “Although it can’t make attacks itself, it can easily resist the attacks from universe supreme masters. Even supreme true treasures can’t do that. With this boat, the last universe portal of our race can be safe.”

Darkness Master, Peng Gong Master, Long Yan Master, and the others all nodded. Luo Feng smiled as well.

It was true. Teacher Origin was suppressed eternally, so the universe portals from the original universe to the primal universe would be fewer and fewer if they were broken, and they couldn’t be rebuilt. Even if there were Black Prison Tower and Star Tower, they would still be blasted away and couldn’t protect that universe portal. However, Boat of Mausoleum was much more stable.

Luo Feng was confident. “In Universe Ocean, even those level-seven and level-eight universe supreme masters can’t damage Boat of Mausoleum, not to mention those in the original universe.”

Boat of Mausoleum was 100 billion kilometers long. The universe portal was well protected in a huge room in the boat, making it absolutely safe.

In a palace of Boat of Mausoleum, the human universe masters all gathered.

Primal Chaos City Leader smiled. "I'll show you here."

Luo Feng and the universe masters were all looking forward to what Primal Chaos City Leader was about to show them. It was a guarding valuable left by Teacher, so it must have been exceptional.

"Look at it." Primal Chaos City Leader glanced at all the universe masters and stretched out his palm.

They all stared at the palm of Primal Chaos City Leader. Suddenly, an object appeared in his palm, and the force of a true treasure permeated from it. Everyone looked bewildered.

"This—this is..." Luo Feng opened his eyes wide.

"Huh?" Peng Gong Master was confused.

"What is this?" Darkness Master was confused as well.

An object like a sculpture sat in the right palm of Primal Chaos City Leader. There was an artificial hill, a lake, and a wooden house! The hill, the water, and the house seemed to coexist in harmony, but it appeared to be just a piece of art; the force was ordinary although it had the force of a true treasure. It was, at most, a top-tier true treasure. If it was indeed a supreme true treasure, the force should be suppressing.

Luo Feng couldn't help looking at Primal Chaos City Leader. "Teacher?"

The others looked at Primal Chaos City Leader, confused. "What is this, Chaos?"

"Is this the guarding valuable left by Teacher Origin?"

"No, this is definitely not a supreme true treasure! How can it guard the race?"

Primal Chaos City Leader glanced at Luo Feng and the universe masters with a smile, then said, "I need to infuse it with my godly power before you know the power of this valuable."

Godly power burned in his palm, and it infused the valuable immediately. The valuable floated and became much larger. Then a mountain 10,000 kilometers tall showed up in the palace. On the mountainside was a wooden house 100 kilometers tall, and there was a lake with a diameter of 1,000 kilometers in front of the wooden house.

"Come," said Primal Chaos City Leader, and he shrank his body to ten kilometers tall.

The others shrank their godly bodies as well. They followed Primal Chaos City Leader and walked along the lake to the wooden house.

"Chaos, what about the power of this valuable?" Peng Gong Master asked.

"I haven't triggered the engravings yet," said Primal Chaos City Leader. "Of course, it can't wield the power."

He stood beside the lake, and suddenly, a being showed up. It was a barefoot body carrying a rugged stick.

“A body!”

Luo Feng was shocked.

“This is a complicated valuable,” said Primal Chaos City Leader. “Both me and this body of mine need to work together to have enough godly power to drive this valuable.”

The barefoot body walked to the mountain. It merged with the mountain as soon as it touched it.

Primal Chaos City Leader stepped out onto the lake and walked to the center of it.

Weng! Weng! Weng!

Mountains started to tremble under powerful ripples, and blurry engravings appeared, flashing across space. A green hue extended from the mountain to the sky, covering the sky above it.

Hong! Long! Long!

The lake and the ground trembled. The blurry engravings flowed and disappeared. The ground extended, forming a gray tract of land. The green sky and the gray land met at that wooden house.

Ang!

The wooden house started to gleam brightly! Light covered every inch of the sky and land, and the green sky and gray land kept intersecting with each other, exerting power, forming endless light. Beneath it, Luo Feng, Darkness Master, Long Yan Master, and the others were all amazed. They could feel an enormous source of power.

“So powerful!”

“My teacher devoted a lot to create this valuable.” Primal Chaos City Leader stood on the lake and recalled events from the past. “The mountains, the lands, the lakes, and the wooden houses are formed by 36,200 components. The materials are exquisite, yet the techniques are simple. Only after they’re combined can they be structured. Mountains, lakes, and wooden houses—these three elements form this sky and land. Teacher said before that this is the primal rule of universe operation. This valuable is called ‘palm universe.’ It’s a simplified version of a miniature universe. The palm universe can create two top-tier level-six attacks immediately in the area it controls. Plus, it covers an area of one square light year.”

Everyone was stupefied. This was more incredible than a domain type supreme true treasure! Ordinary domain supreme true treasures could attack within their domains, but universe masters couldn’t make attacks at top-tier level six when using them! After all, domain true treasures were used more often for suppression! Only universe supreme masters could use their techniques to make the true treasures reach top-tier level six, and only one at a time.

However, Primal Chaos City Leader could perform it twice as if two universe supreme masters were making attacks. And they could appear anywhere within the range.

“This is a simplified miniature universe,” said Primal Chaos City Leader. “Once someone is in this area, it’s like being in a miniature universe. I control it. I can attack the target with a single thought! I can even make universe supreme masters feel agonizing pain, and they can’t get away from this area in a short time. However, this ‘palm universe’ can only reach top-tier level six even in Universe Ocean, so it’s more useful in the original universe. Teacher Origin made it to guard our race, and with this valuable, even two or three universe supreme masters will suffer losses if they try to attack us. Teacher Origin could only create a top-tier true treasure, but when he combined all the true treasures, he had a valuable that was beyond imagination.”

Darkness Master, Long Yan Master, Huang Jian Master, and the universe masters were all dazed. He had made a valuable better than a domain supreme true treasure?

Of course, it was weaker than a domain supreme true treasure in Universe Ocean.

“Machine type!” Luo Feng was shocked. “This is machine type! The small components form three systems—like Shi Wu Wing! Shi Wu Wing is also made of lots of components. A pair of white wings, five pairs of other wings, and an origin! This palm universe is also made of different components, and the core is that wooden house.”

“It’s even more complicated than Shi Wu Wing!” Luo Feng exclaimed.

Of course, palm universe was still a low-tier machine type valuable. The civilization level of the origin was far superior to palm universe. However, in terms of structure, Shi Wu Wing was very simple, while palm universe was far more complicated. It needed both bodies of Primal Chaos City Leader to use it. However, it was still much simpler than Boat of Mausoleum and Universe Boat.

One thing was for certain: This was of machine type, which was why it had such an ordinary appearance but extraordinary power. It had power at top-tier level six.

“One is the sky, one is the land, and one is the heart of sky and land,” said Peng Gong Master slowly.

“Dark, Light, and the origin,” said Darkness Master.

All the universe masters looked at the simplified universe, as did Luo Feng. Although it was machine type, the technique contained in the palm universe had universe operation law, and it was much more advanced than his miniature universe.

“Time and space combined, and a universe is born...” Luo Feng looked at the sky and land—the green sky, the gray land, and the gleaming, golden light, all of which contained the universe operation law. He was mesmerized.

After hitting the limit universe knight level, he couldn’t make the breakthrough. However, inspiration now flooded his mind.

Luo Feng looked up, and he smiled.

Chapter 1296: The Breakthrough, A Universe Master!

The mountain range, lake, and wooden house were all suspended in the air.

With it as the center, everything within the vast space and spread around its surroundings fell within its area of control. This mountain, lake, and wooden house... The greatest area under the influence of its control was a diameter as wide as one light year! How vast this region was! And within this region, a single thought could execute the power of a sixth tier as the top level.

The various universe masters were all in awe.

“Impressive. Simply too, too impressive!”

“In the primal universe, it is even more powerful than a supreme true treasure. The only downside of it is that controlling it is a tad more complex. It requires both bodies of Primal Chaos City Leader to control it together.”

“A simplified miniature universe? How did Teacher Origin achieve that?”

“I cannot fathom it. I simply cannot fathom any of it! Indeed, that’s Teacher Origin for you. Only Teacher Origin can create a virtual universe, which has reached a stupefying level on the way the universe revolves. I suppose this must be the reason why he can create this unique treasure, ‘Palm Universe.’”

The part of time and space that was under the influence of this Palm Universe was completely isolated from the outside world. All the universe masters were shocked yet intoxicated by what they saw.

“Luo Feng.”

“Luo Feng?”

Suddenly, someone realized that there was something not quite right with Luo Feng. Earlier, he was still smiling; but later, he shut his eyes and his entire being started to exude a strange aura.

“Do not disturb Luo Feng!” Darkness Master immediately shouted to stop the others.

Within the human race, the majority were not aware that Luo Feng was merely a universe knight. But Darkness Master knew.

Could it be that he was going to achieve a breakthrough soon? Darkness Master wondered to himself.

Not only him—Primal Chaos City Leader, who was standing above a lake quite a distance away, also saw the seemingly unique state that Luo Feng was in. In his heart, he could not help looking forward with much eagerness.

This disciple of mine is going to have a breakthrough soon?

Luo Feng was already capable of creating secret techniques at a universe supreme master level, and his law comprehension had already reached the ultimate limit of its bottleneck, whereby he had comprehended heart of beast god long ago. He could be said to have met the various expectations, and his avatar was consistently cultivating in a cultivation space within the space of inheritance. With a rate of 10,000 times of time velocity, he had been cultivating for many years.

What Luo Feng had accumulated was more than abundant. So even if he was slower, upon enduring a few more years in the outside world, he would be able to break through; that was for sure. If he was fast, the breakthrough could be anytime.

This breakthrough... It could occur at a time when he was getting emotional or feeling touched or just looking at the revolving, starlit sky or even in a life-or-death battle. In short, no one knew when it would happen because at any point in time, with a little touch of his gifted talent, he might be enlightened and thus be able to achieve the breakthrough.

Palm universe was a unique treasure. Luo Feng could not comprehend Shi Wu Wings and the Boat of Mausoleum because they were both too profound. However, Palm Universe was very close by. Since he could create a secret technique at a universe supreme master level—and what this Palm Universe contained was also at the ultimate limit of a universe supreme master—Luo Feng could, therefore, vaguely comprehend it. Just one touch of this Palm Universe, and the bottleneck that he was stuck at for so long seemed to disappear soundlessly. He had, thus, broken through this bottleneck.

Luo Feng suddenly opened his eyes. “Teacher.”

Primal Chaos City Leader looked over.

Teacher and disciple exchanged glances, and mutual understanding traversed the space between them. The look of excitement on Primal Chaos City Leader’s face was hard to conceal. This disciple of his was beyond formidable. Even though he had yet to achieve his breakthrough, he was already so powerful. Once he achieved his breakthrough... he would be a great help in the final battle that was drawing close.

“I will first make a trip out,” Luo Feng said.

“Go.” Primal Chaos City Leader nodded. At the same time, he stopped the execution of Palm Universe right away for Luo Feng to exit.

Shua!

With a single teleportation, Luo Feng disappeared wordlessly.

Luo Feng’s god country was so endlessly vast that it could be described as inexhaustible.

Hua!

The endless Remote Ocean was always filled with ripples, and even without any wind, it had waves that rose up to three feet high. This endless Remote Ocean stretched over a diameter of 80 billion kilometers. It was deep and vast, and its normal waves were so big that they were astounding. With this endless Remote Ocean, together with the additional support from his god country, even if other universe supreme masters were to barge their way in, they would be in for a great loss.

The god country that was originally peaceful underwent a change. Just as Luo Feng broke through the bottleneck while he was inside the Boat of Mausoleum—

Hong!

The origin laws of the primal universe fell right away. An endless oppressive force enveloped the entire god country. The endless Remote Ocean that was originally considerably peaceful was suddenly surging with mighty waves.

“Huh?”

Amidst the endless Remote Ocean, a figure suddenly emerged. This was Remote Ocean body. It was looking up into the sky where immeasurably huge, black and white whirlpools were appearing. These rotating whirlpools were enormous, and they carried with them an inexhaustible amount of power.

Upon discovering his breakthrough, Luo Feng destroyed his previous Remote Ocean body and bred a new one right away. It was the fastest method to get back to god country.

“Breakthrough!”

Luo Feng’s Remote Ocean body teleported out into the sky beyond the edge of the entire Remote Ocean in a flash.

“This tremendous momentum is so, so imposing.”

Luo Feng looked up into the sky to see that huge whirlpool which had a diameter greater than tens of billions of kilometers. This was different from the previous five-colored whirlpool that had appeared when he achieved his breakthrough to become a universe knight. This time, it was composed of alternating black and white ones. Within a large black whirlpool, there was a white one, and within this white one, there was another black one.

Black whirlpool, then white whirlpool. Black whirlpool, then white whirlpool. Round after round.

While exuding a formidable oppressive force, there was a passageway at the center of this huge whirlpool. It was the link between the universe law ocean and Luo Feng’s god country.

“The critical moment!”

Luo Feng suddenly understood what was happening. It was the most critical moment of his breakthrough—the swallowing of godly power!

The endless Remote Ocean was massive. To increase his godly power, he would need a long, long time! And the bigger his godly body, the stronger the ability to recover. Even if a universe master were to self-destruct suddenly, the speed at which his godly power was consumed during this instant self-destruction was nothing compared to the speed of auto-recovery of Remote Ocean! The greater the volume, the greater the power. As a result, the speed of recovery would be even more alarming.

This was why the endless Remote Ocean progressed at a very slow pace during its initial stage of growth. For its diameter to double from 10 billion kilometers to 20 billion kilometers, a long time was required. For the diameter to expand from 20 billion kilometers to 80 billion kilometers, it would be much faster. But when the latter was compared to the speed attainable in future expansions, it was still considered to be much slower. Further down the road, the speed would soar to a figure that was exponentially faster. That was how Nine Remoteness Master had been able to create that massive Nine Remoteness Ocean.

Luo Feng was about to become a universe master. His endless Remote Ocean was still far inferior to Nine Remoteness Ocean. Therefore, Luo Feng would cherish this opportunity even more.

“The time for swallowing godly power is limited,” Luo Feng said to himself. “The swallowing must occur at the most efficient rate possible.”

Hong! Long! Long!

From the alternating black and white circles that were intertwined at the center of the whirlpool—that whirlpool passageway with a diameter of few tens of billions of kilometers—was pouring out ocean water that was empowered by a formidable godly power. Torrential ocean waters surged out in a frenzied manner.

Hong! Long! Long!

Like an ocean collapsing, the water poured out at a speed so fast that it was simply terrifying. Compared to when Luo Feng achieved a breakthrough to become a universe knight, everything was much faster this time around.

“Inhale, suck, absorb!”

Luo Feng used his willpower to the best of his ability and tried hard to control his endless Remote Ocean. He was absorbing like crazy, and the transformation took place immediately.

His godly power that was originally 10,000 times the life genes of knight soared up 100 times to hit a godly level of 10,000 times life genes—a universe master level!

Swallow, then transform... The rate at which that whirlpool passageway was pouring out godly power empowered the ocean water totally in sync with the rate at which Luo Feng’s endless Remote Ocean absorbed it. The faster he absorbed, the faster the pouring of ocean water would be.

“Transform! Transform! Transform!” Luo Feng was doing his best to keep everything, and he also noticed that after his willpower got stronger, it brought him more benefits.

The powerful willpower also greatly increased the efficiency of the transformation happening under his control. But no matter how great the increase was... it was still not enough.

A moment later, peace and quiet resumed in the god country. The oppressive force of the primal universe origin laws was gone, and for a short moment, Luo Feng could swallow godly power to his heart’s content.

“My endless Remote Ocean has a diameter of 80 billion kilometers.” Luo Feng stood in the sky above the Remote Ocean. “Just a while ago, the godly power transformed reached around 15 percent of the size of my endless Remote Ocean!”

Luo Feng estimated that the entire Remote Ocean must have had an approximate diameter of 80 billion kilometers, of which, more than 40 billion kilometers along its whole diameter was successfully transformed. That was approximately 15 percent of its entirety. In terms of efficiency, this rate was considered high. After all, the endless Remote Ocean was massive.

“When I became a universe knight previously, the rate of transformation was 12 percent. This time around, the rate has increased a little. I was lucky that my willpower also reached a breakthrough point. If my willpower had not reached the level of a universe supreme master, I’m afraid the transformation of godly power this time around would have been far lesser.”

Luo Feng continued his descent.

Pu! Tong!

He sank down into the endless Remote Ocean, where his body naturally fell apart and blended into the Remote Ocean.

Soon, a new Remote Ocean body was formed within the endless Remote Ocean. This Remote Ocean body was a lofty figure that was close to 10,000 kilometers tall. Its godly power was 1,000 times that of a universe master life gene level, and it was also ten times higher than the godly power of Luo Feng himself when he was still at the universe knight level.

Hua! Hua! Hua!

The entire endless Remote Ocean was still resonating with the faraway universe origin law ocean, absorbing its godly power and trying hard to transform the entire Remote Ocean. The only pity was that now, the speed had slowed down considerably compared to before.

Xiu! Xiu! Xiu!

Three light rays appeared at the same time within his god country and transformed into three streaks of light high up in the sky. They flew about freely. Bouts of godly power rapidly shot out from the Remote Ocean below to quickly envelop the three godly bodies within their influence. These three godly bodies were none other than the original earthling body, Golden Horned Beast body, and Mosha body.

In an instant, the three godly bodies started to transform. The original earthling body and Golden Horned Beast body’s godly powers soared to 100 times, reaching a godly power level of 10,000 times that of a universe master life gene. Mosha body’s godly power also soared by 100 times, reaching a godly power level of 100 times that of a universe master life gene.

“My Mosha body, in terms of godly power, is comparable to my previous original body.”

The original earthling body, Golden Horned Beast body, Mosha body, and Remote Ocean body were all full of fighting spirit. His original earthling body and Golden Horned Beast body, with their pinnacle true treasure in hand, could both display an outburst of combat power up to the sixth tier as the top level! Mosha body, with its Blood Ghost Blade, would also be able to display an outburst of combat power up to the sixth-tier. Remote Ocean body was equipped with even more methods.

“Now, I have to address two things.”

Four different bodies of Luo Feng flew to the core of his god country. At the public square before his godly palace, the four bodies found scattered spots to settle down, where Golden Horned Beast body lay sprawled on the ground.

“The first thing will be my Mosha body!” Luo Feng whispered. “After becoming a universe master, the bottleneck of 100 times life genes will no longer be imposed on my Mosha body, which means I can

bring the increase to as high as 1,000 times life level—or even 10,000 times of life level. Regarding the materials required to increase the life genes, I have already prepared them all.”

His Mosha body was not a flesh and blood life form, so it could not cultivate the Nine Volume Manual. Just like any ordinary universe master, it had to reach the level of a universe master before its current 100 times life gene level could increase further.

“The second thing will be my god country. If I achieve a breakthrough to become a universe master, my god country will become even more complete.”

Luo Feng looked at his own vast god country.

At that moment, his god country was slowly transforming. The expansion of its area was secondary. More importantly, the structure was beginning to stabilize toward an ultimate limit. Once the perfect transformation was completed this time around, the next breakthrough would be that of his god country’s “miniature universe,” which meant that this time, it was already the ultimate level of his god country.

Chapter 1297: The Humans’ Response

Human territory, primal secret region.

“Freedom Alliance!”

“Ancestral God School, Space Beast Alliance, lone universe supreme masters.” Primal Chaos City Leader stood against the railing and looked at Thousand Treasures River. “They’re all waiting for our response, and they want to know more information about how to become a universe supreme master and a limit universe supreme master. If we actually give them that, the inheritance of the ancient civilization will be widespread. Then all the powers will know about it. Why did Luo Feng even strive for it in the first place?”

It was indeed difficult for Primal Chaos City Leader. The inheritance of ancient civilization was divided into two parts. The first part was to cultivate the weaker beings into universe masters more efficiently, and the second part was to cultivate universe masters into universe supreme masters or even limit universe supreme masters!

The powers wanted the second part! However, humans needed territories to boom, so it would be good for the humans if they had hundreds of universe masters. If they didn’t have enough territories, 100 was a good amount. There were already around 1,000 universe masters from other powers, and once they had the inheritance, there would be more and more universe supreme masters. Some might even become as powerful as Teacher Origin. Then the inheritance would make no difference to the humans! In that case, other races would reap the benefits!

“We might as well just fight them!”

Don’t even think about getting the inheritance, not even a little bit, thought Primal Chaos City Leader. Even if we go back to the primal universe, Luo Feng will have much more power after becoming a universe master. All his bodies have power at top-tier level six, and that so-called alliance won’t be

together forever. Luo Feng's four bodies, Peng Gong, Darkness, and me... We can totally make the humans great again. We'll only be weak for a while. Then we'll thrive again!

Just as Primal Chaos City Leader was thinking, a being walked down the hallway. He wore a white cape, which made Primal Chaos City Leader's eyes gleam.

"Luo Feng!" Primal Chaos City Leader said.

"Teacher." The man in the distance looked up, took a step, and walked to beside Primal Chaos City Leader.

Primal Chaos City Leader looked at Luo Feng and nodded contently. "Breakthrough?" he asked.

Luo Feng had a smile on his face. "Yes."

He was indeed happy. Both his original earthling body and Golden Horned Beast body had reached the limit godly power of a universe master! Even universe supreme masters couldn't wield power greater than him in Universe Ocean, which meant these two bodies were not weaker than anyone. As for Mosha body, its life gene level had reached more than 3,000 times, and his godly body was 10,000 kilometers tall!

However, it was difficult for Mosha body to reach the perfect life gene level now! After all, Mosha body needed many precious valuables to improve its life gene level, but it didn't have much in storage. However, a life gene level at more than 3,000 times had already made Mosha body incredibly powerful. Remote Ocean body was the weakest at 1,000 times of life gene level but was still much stronger than before.

For what was worth, they were all able to wield power at top-tier level six in the original universe! In Universe Ocean, Luo Feng was much stronger, especially with his technique "Duan Mie," which meant Luo Feng already stood among the top-tier beings both in the original universe and Universe Ocean. Even if he was weaker in laws, he could make up for it with his Blood Shadow Blade and Duan Mie—the technique left by the three ancestral teachers!

"Fantastic." Primal Chaos City Leader nodded. "Wonderful!"

"Teacher, I can tell you're worried. Is it about the upcoming final war?" asked Luo Feng.

Primal Chaos City Leader sighed. "How could I not be worried? The Freedom Alliance formed so suddenly and already has much more bargaining power. They're waiting for our response... The Ancestral God School, the Space Beast Alliance, and the lone universe supreme masters have all come to us and named their terms, and are waiting for our response."

"What do you want to do, teacher?" asked Luo Feng.

"If we say yes to them and give them all the inheritance, they'll be the ones who gain the most, so what would be the point of us going through all this effort? We might as well just fight them, and if we lose, we'll just return to the primal universe. If anyone dares to destroy the human territory, we'll destroy their territory with Boat of Mausoleum as well! It's better to give them all the inheritance."

Luo Feng nodded and said, "Teacher, I have an idea."

“An idea?” Primal Chaos City Leader gazed at Luo Feng.

“Teacher, I’ve become much stronger after becoming a universe master, especially my Remote Ocean body...”

Luo Feng started to elaborate on his plan, and Primal Chaos City Leader’s eyes gleamed as he listened.

After a while, Luo Feng finished describing his idea.

Primal Chaos City Leader was still anxious. “That would be much better,” he said. “However, can your Remote Ocean body actually resist it?”

“Don’t worry, teacher. If we really need to consume our godly power, that’ll be my biggest advantage. Even if they consume all their godly power, my Remote Ocean body will still have left,” said Luo Feng confidently. “As for other factors, I haven’t taken them into account yet, but I have Star Tower, so I believe I can perform it!”

Primal Chaos City Leader was still frowning and worried. Luo Feng’s plan was too crazy. He could die!

“No need to rush it. We need to test it first,” said Primal Chaos City Leader. “We’ll test it first. If you think it’s okay, we’ll implement it.”

In Primal Chaos City Leader’s mind, he had the best chance to become a universe supreme master, followed by Luo Feng. And Luo Feng was the only inheritor of Duan Dong River inheritance, so he might have had a better chance to transcend incarnations in the future! He couldn’t put Luo Feng’s life in danger, even if that meant retreating back to the primal universe.

“Okay, let’s test it first.”

“I’ll call the other universe masters.” Primal Chaos City Leader nodded.

All the universe masters from the human team gathered on the same day. There were over 100 universe masters there, and they took part in the test. Afterward, Primal Chaos City Leader went to talk to Teacher Origin, and he confirmed with Luo Feng again.

“Great! We’ve tested it, you’re confident enough, and Teacher Origin thinks it’s a good idea!” Primal Chaos City Leader nodded. His eyes were gleaming. “These days, the Ancestral God School, the Space Beast Alliance, the lone universe supreme masters, and the Freedom Alliance are being too greedy—especially the Freedom Alliance. They want a response? We’ll give them a response.” Primal Chaos City Leader smiled.

Luo Feng smiled, too. “Teacher, it could get better.”

“We’ll let them choose whether they want to help us or the alliance,” said Primal Chaos City Leader.

He had been hesitant before. After all, if they actually retreated back to the primal universe, the human race would develop much more slowly in the future. It was a tough choice to make.

Even though Luo Feng's plan sounded crazy, it was achievable in the original universe! They had tested it with the 100 universe masters, and they had talked about it with Teacher Origin and other universe masters from the human race. Everyone had agreed with the new plan in the end!

They would fight to the end!

Ancestral God Secret Region, inside Ancestral God Palace.

Three ancestral gods, eight beast gods, guarding beast gods, and guarding godly masters had gathered. None of them belonged to the human team, the united forces alliance, or the Freedom Alliance; instead, they all belonged to the Ancestral God School, and almost everyone was a special life form.

"Everyone."

Three ancestral gods sat in the thrones in the palace. The one in the middle had a ferocious beast head, and his hair—each strand as thick as a finger—drooped. His eyes were green, and he said, "The humans gave us a response."

The universe masters, including Nine Remoteness Master, were all looking forward to the response.

"The response is simple. They'll only give us the guide to become universe supreme masters! That's the only price they're willing to pay."

All the universe masters were shocked that the humans were still so stubborn even in a situation as difficult as this.

"We had two requirements," said a giant fish with a black body. "The first one is the inheritance on how universe masters can become universe supreme masters! The second is how to reach the limit of universe supreme masters. The humans don't agree to the second one?"

"Ancestral gods," said Nine Remoteness Master. "The humans only agreed to the first one? With no further negotiations?"

"That is their bottom line," said the central ancestral god.

Everyone grew quiet.

"Decide whether we're joining the humans or not," said the central ancestral god.

On the same day...

An island floated on the golden waves. On the island, more than 400 universe masters sat on thrones. The beings who had gathered were all powerful, and space and time twisted around them as they gathered. This was the first power of the original universe: the Freedom Alliance!

They were waiting for humans' response as well. The representative from the human race had just left.

The response was very straightforward. “We’re willing to give you the inheritance about how to advance from universe masters to universe supreme masters, and this is the best we can offer. There should be no more negotiation.”

This was the only response. And it was up to the Freedom Alliance to decide whether they were going to join the humans or not.

Chapter 1298: Arrangement

More than 400 great beings from the Freedom Alliance gathered at the center of the alliance.

“I bet you’ve all learned about the humans’ response,” Shi Hua Island Leader said. “Even those who weren’t there when the representative came must have heard about it now, after talking with other universe masters. Now that we know their response, I am open to suggestions as to how we should proceed.”

Some of the ill-tempered universe masters roared in response.

“The humans are too reckless and arrogant. They didn’t even show any respect for us! The Freedom Alliance is the most powerful alliance in the universe! Without our help, they can’t survive in the original universe!”

“What do they gain for being so reckless? They don’t even have a way open to retreat.”

“Don’t they want to survive?”

Since the formation of Freedom Alliance, the members had felt that they were in a different status in the original universe. They weren’t as weak as before; instead, they were the powerful Freedom Alliance. They thought that humans would definitely agree to their terms, so they all got furious when the humans rejected them.

Some universe masters started to talk with each other.

“Night Flame, what do you think?”

“Actually, we’ve been stuck at the level of universe masters for a long time, so becoming universe supreme masters is what we most desire. As for limit universe supreme masters? That’s too far from us... Actually, Shi Hua Island Leader is the one who most desires to become a limit universe supreme master! To us, the conditions offered by humans are satisfying already.”

“I think so, but Shi Hua has a huge influence on our alliance, so he won’t just say yes easily.”

“True.”

“Besides, some of the races that were bullied by pinnacle races and those really confident also stand by Shi Hua Island Leader.”

Shi Hua Island Leader sat listening to the debate. He glanced across all the 400-something universe masters sitting close to each other and thought, The Freedom Alliance is huge, but lots of races are actually enemies of one another! The only reason they came together is that they were pressured by both sides. Actually, there are too many races and divisions in the alliance...

Some of the races are too progressive and confident! Some are fearful, and they still look up to pinnacle races like before and don't want to wrong them. Some are mature... Some are sneaky... It's difficult for them to follow me. I need to get them on my side this time, and we have to force the humans to give us the inheritance to become limit universe supreme masters.

They talked about it for half a month, yet nobody could convince anybody. Universe masters all had long lives, and this was a crucial time for them. There were way too many races in the Freedom Alliance, and some had been enemies for a long time. Even Shi Hua Island Leader couldn't keep them under control.

Shi Hua Island Leader rarely spoke during this time. Instead, he'd been observing.

Many universe masters are ambitious. The Freedom Alliance is a powerful alliance, so lots of universe masters want to control this power.

Like the Northern Territory Alliance. The alliance master didn't have any rights. Instead, Star River Master, Black Lotus Master, and Xuan Lan Star Master had the executive power.

Some universe masters were ambitious and wanted to marginalize Shi Hua Island Leader so he would be a leader in name only. Shi Hua Island Leader wouldn't just let his power go like that. The debate showed how serious the power struggle was among the divisions and races within the Freedom Alliance.

There was an independent mountain at the top of Space God Mountain named Ancestral Mountain. There, space and time were twisted, and the electric snake was crawling.

Hong! Long! Long!

A giant being showed up on Ancestral Mountain.

"Humans, how ambitious they are!" Space Beast Ancestor said in a furious voice.

"How should we decide, Ancestor?"

"Ancestor, we'll force those humans to give us the inheritance. We need to show them what we're capable of!"

The universe masters gathered, and they were all furious. They hadn't expected that the humans would dare to give a response like that!

"Teacher Origin was born among the humans, so they're proud of themselves," said Space Beast Ancestor slowly. "And now, Luo Feng has received the inheritance from Duan Dong River. How can they not be ambitious? Do you really think they'll give away the inheritance to the limit power that easily? I

thought they would have given us because they're in a desperate situation. Yet they still refused to give us!"

Space Beast Ancestor was furious. He thought he was no stranger to Luo Feng, and Luo Feng was one of the top seniors in the human race. On top of that, he had gone to talk to Luo Feng directly. He had thought the humans would definitely give him the experience of how to become limit universe supreme masters.

However, the humans had still refused, and they were only willing to give them the experience of how to become universe supreme masters.

"What should we do, Ancestor?"

"We can't let the humans off the hook like that!"

"Ancestor..."

The space beasts were all roaring. They were naturally bloodthirsty with great pride, and they were very disappointed that the humans wouldn't agree to all the requirements they made.

"No need to rush yet," said Space Beast Ancestor. "It's not the time to make a choice yet. I know humans. Even if they resort to retreating back to the original universe, they won't give out the inheritance. We need to wait for our chance. When the humans are finally in despair, they'll panic, and if they still refuse to give us the inheritance, we'll join the alliance and make things worse for them!"

"Okay."

"Humans, humans!" roared the space beasts.

They may have been friends with some universe masters from other races, but when it came to the benefits of an entire race, they would definitely stand by their race's side! Luo Feng had lots of friends as well, yet he still stood by the humans. Survival in wars could be cruel.

The human race gave a response to the Freedom Alliance, the Ancestral God School, the Space Beast Alliance, and the lone universe supreme masters.

No powers were completely satisfied.

Human territory, primal secret region.

Luo Feng stood above Thousand Treasures River, and Darkness Master was beside him.

"Some of them must be very disappointed at our responses," said Luo Feng. "However, they're facing a choice. If they choose the united forces alliance, they might not get any inheritance even if they win the war. If they choose us, they can at least get part of the inheritance."

Darkness Master nodded. "That's right, so it won't be too bad. Some powers will choose us, at least."

"Yes." Luo Feng nodded. "If we actually lose the war, even if we slow down, we'll prosper after a time."

“That’s right.” Primal Chaos City Leader was confident.

“Go.”

Luo Feng waved his hands, and a nine-level tower flew out from his palm in the center of Thousand Treasures River.

“Larger, larger, larger!” commanded Luo Feng, controlling Star Tower.

Hong! Long! Long!

Star Tower grew larger and larger, taller and taller. 100 million kilometers, a billion kilometers, ten billion kilometers. It stopped expanding after it nearly hit the palace where Luo Feng lived.

“Let’s begin the arrangements,” said Luo Feng.

“Let’s go. I need to see it as well. This might be the only chance, as I see it.” Darkness Master smiled.

Luo Feng smiled. “Let’s go!”

They walked to the edge of the bottom of Star Tower. It bordered Luo Feng’s palace. They flew into the palace and entered a quiet secret chamber. Inside, there was an exquisite sculpture on a wall that stood about 100,000 kilometers tall. These palaces were, after all, the homes of universe masters, so the palaces were massive. This quiet chamber for training was quite large; it was not unheard of for a wall to be 100,000 kilometers tall. The exquisite sculpture on it was actually a portal.

“The god country portal was already established.” Luo Feng pointed at the sculpture. “This is the entry to my god country.”

“Let’s go!”

Luo Feng took a step and touched the wall. After a ripple, Luo Feng entered, and Darkness Master entered as well.

Mosha body was guarding Star Tower, so it could easily control Star Tower.

In the vast god country.

Hong! Long! Long!

Remote Ocean was tumbling, and above it was a light screen. Two beings walked out: Luo Feng and Darkness Master.

“Is this your god country?” Darkness Master looked around and exclaimed, “Impressive!”

Luo Feng smiled and nodded. His god country had already hit its limit! It would become a miniature universe if it progressed a step further. There was no need for him to hide his god country anymore.

“This Remote Ocean body of yours...” Darkness Master looked down at the endless remote ocean, and admiration flashed through his eyes. “Impressive. With such a godly body, there will never be a shortage of godly power.”

“It’s just luck.” Luo Feng smiled.

For one thing, he transferred the soul of Golden Horned Beast to himself, and the blood he had chosen was the limit of what a golden horned beast could bear. It wouldn’t be able to breed it if it exceeded the limit. Also, he had the Nine Volume Manual, so he could gradually improve the genes of his bloody sea from the prince level all the way to Nine Remoteness Master’s level.

Darkness Master shook his head. “It’s not just luck.”

Luo Feng smiled. “I’ll begin.”

Luo Feng looked at the endless Remote Ocean, and his mind started to control it. Suddenly, Remote Ocean started to tumble. The water surged and flew toward the light screen like a dragon.

Hong! Long! Long!

The tumbling Remote Ocean rushed toward the other end of the portal. Meanwhile, in the primal secret region, water from Remote Ocean flooded out from the sculpture in Luo Feng’s training room.

Chapter 1299: Division of the Camps

In the core ground of the primal secret region, the palaces of Luo Feng and Primal Chaos City Leader were scattered all over the area. Thousand Treasure River was rippling, and a nine-story tower that was several tens of billions of kilometers tall was being suspended right in the middle of Thousand Treasure River.

“Eh?” A figure suddenly flew out from within the tower. He wore black all over and was looking down at the sight before him.

“Snow Sand Ocean!”

Mosha Luo Feng quickly took control of the situation. At one time, the boundless Snow Sand Ocean was rapidly moving to enshroud the surrounding area of around ten billion kilometers, so naturally, the palace where Luo Feng resided, along with part of the base of Star Tower, would be enshrouded.

Hong!

The turbulent waters of Remote Ocean directly surged out of the palace where Luo Feng resided like a water dragon—at a speed that was almost as fast as the speed of light. At the base of Star Tower, a side door adjacent to Luo Feng’s palace opened. This side door was around one billion kilometers tall, so jets of ocean water columns surged in easily.

Mosha Luo Feng was drifting about amidst the icy, snow-white sand grains with brows slightly furrowed. “The water column has a diameter of 100,000 kilometers. Even if it charges over almost as fast as the light of speed... to turn the entire endless Remote Ocean around, I will still need a long, long time.”

Indeed, it would take an extremely long time. Until today, the diameter of the water column was only 100,000 kilometers, while the endless Remote Ocean was a massive ocean with a diameter of 80 billion kilometers.

This water column continued erupting at the speed of light, yet even if the eruptions were still consistent after one year, it was still only a small part of the entire endless Remote Ocean. There were many universe masters whose godly bodies were not even 10,000 kilometers tall, but for this column of the ocean water of Luo Feng's endless Remote Ocean, even after one year of transportation, the Remote Ocean showed no trace of movement at all. This showed how vast it truly was.

"I still need to continue establishing god country transportation passageways," Moshu body said to himself.

Hong!

Moshu body was here while the original earthling body was in god country. They both worked single-mindedly to start establishing stationary god country transportation passageways. Stationary god country transportation passageways were very common sights. Ordinary undying fighters such as the emperor of Black Dragon Mountain empire could also construct such stationary passageways. Or perhaps, to an ordinary undying, this might not be a small price. But to Luo Feng? Even if he were to construct 10,000 or even one million of such stationary transportation passageways. It would be something so simple and casual to him.

"Rise. Fix!" Moshu Luo Feng pointed to one of the empty grounds on the courtyard of his palace. That area had an approximate diameter of one million kilometers, and the entire passageway speedily fixed and stabilized.

A god country transportation passageway could be big or small. The smaller it was, the easier it was to construct; the bigger it was, the more stable it had to be, so the more difficult it was to construct. Especially when the god country transportation passageway continued to expand, the price to pay would soar accordingly. Luo Feng might own quite a sizable fortune, so it did not affect him at all, but he was also unwilling to waste too much of his fortune. When he was constructing the entrances of these god country transportation passageways, the largest diameter would normally be one million kilometers, and the smallest would be a few tens of thousands of kilometers.

One after the other, passageways were established!

Hong! Hong! Hong! Hong! Hong! Hong!

Numerous water columns of Remote Ocean—be it immeasurably thick or extremely fine—surged and gushed toward that side door like thousands of horses galloping together at a high speed that could almost match the speed of light. That side door was, after all, as tall as 100 billion kilometers, so it could easily accommodate the impact of so many water columns of the Remote Ocean. However, as the number of passageways continued to increase, Star Tower was forced to expand further, and this expansion took place in all other directions possible.

That was still acceptable. The space of the core ground was enormous. After all, Thousand Treasure River spread over an area of a few light years, which was a good measure of how vast and wide that space was.

Star Tower continued to expand to hundreds of billions of kilometers tall, then continued expanding. Eventually, all the side doors and the deep abyss at the base of Star Tower opened to accommodate more and more ocean water flowing in from the Remote Ocean.

“Construct, construct, construct.” Luo Feng was constructing without restraint. “Too slow, too slow, too slow.”

He was also frustrated over how massive the endless Remote Ocean was. However, he could only continue to construct god country passageways painstakingly. As many as one million passageways fully occupied the surroundings of Luo Feng’s palace grounds, and their total surface area added up to a diameter of 100 billion kilometers.

Even so, within three days, the endless Remote Ocean was fully transported into Star Tower from god country.

Within these three days, many great beings from various races, and even some undying fighters, sector lords, and guards of the human race were filled with doubts. Why would that endless Snow Sand Ocean envelop such a great piece of domain? Yet, even if they were dying of curiosity, there was no way they could seek comprehension.

Within Star Tower. In a vast, individual space, the water of the endless Remote Ocean was flowing out. Luo Feng, Darkness Master, Primal Chaos City Leader, and Peng Gong Master were positioned above this space.

“I consider myself to have truly experienced this.” Darkness Master sighed. “These three days, I have stayed around and truly felt how massive this endless Remote Ocean is! With a passageway with a diameter as wide as 10,000 kilometers, even if you take one to ten years to transport, or even up to 100 years, it would still be very far behind. If this was the transportation of my godly body, I don’t even need the time for a blink of an eye.

Primal Chaos City Leader laughed and said, “Otherwise, how could Nine Remoteness Master’s Nine Remoteness Ocean be considered comparable to a supreme true treasure? Because the other races were completely helpless against his Nine Remoteness Ocean... that’s why it is worthy enough to be compared to a supreme true treasure.”

Peng Gong Master looked down with great envy. Such a massive godly body!

“It’s overly massive. Moving it is tedious and difficult,” Luo Feng said, mocking himself. “You see, just moving it here from my god country has consumed so much of my strength. I’ve been constructing transportation passageways like crazy because I can only depend on these transportation passageways to gradually channel over the ocean water of the endless Remote Ocean.”

In fact, Luo Feng had been racking his brains for a solution on how to transfer the endless Remote Ocean over.

Because the endless Remote Ocean could only move about in its entirety, and it moved so slowly that it was almost tortoise-like speed. In the beginning, Luo Feng had to bring Star Tower into god country. Then Star Tower was expanded to a massive size so that ocean water from the endless Remote Ocean could gush into Star Tower all at once. This would facilitate the transfer well. This was earlier on, when Luo Feng was still quite weak.

He once had to depend on Star Tower to achieve such a transfer! However, that was when Remote Ocean was still small! And the level of its godly power was weak! But now...everything was different.

Upon bearing the entire endless Remote Ocean, the speed at which Star Tower moved became ridiculously slow! Luo Feng felt overwhelmed by exhaustion. Even if the speed of movement was slow, making use of god country transportation passageway, it should be able to move fast. Yet the truth was, when Star Tower barely made it to the entrance of the god country transportation passageway, it caused the entire god country transportation passageway to collapse!

The oppressive force exerted on Star Tower after bearing the endless Remote Ocean was simply overwhelming! God country transportation passageway was too weak and fragile by comparison; there was no way it could accommodate a Star Tower that was bearing the endless Remote Ocean.

Luo Feng was dumbfounded, too. Could it be there was no way he could transfer Star Tower that was bearing the endless Remote Ocean?

Fortunately, Luo Feng recalled that he could establish more god country transportation passageways so that the ocean water from the endless Remote Ocean water could directly flow through. This ocean water from the Remote Ocean was well-suited for flowing. Naturally, it was fast and efficient. This made Luo Feng sigh in relief. Luckily, this took the form of ocean water. If this was a massive mountain range or a world tree or the likes of it, he would have worries such as whether he was able to construct a god country transportation passageway that was so massive!

No matter what, after painstakingly going through various hardships, he finally managed to move endless Remote Ocean from the primal secret region into Star Tower with the use of god country transportation. Then Luo Feng stored Snow Sand Ocean and everything resumed peace and quiet. Those great beings from various other races were filled with doubts, but still, they were unaware of what happened over the past three days.

Following this, the human race started a long and slow wait. Various methods were in place. They were just pending the replies of the various groups of powers.

“The Ancestral God School has promised to join the human camp!”

“The Ancestral God School has requested that we give them a part of that guidance first. Then, after the war, we will give the other part.”

“All right.”

“Haha...! With the Ancestral God School joining the human camp, it will be equivalent to gaining three more ‘sixth-tier as the top level’ combat powers. And the Ancestral God School has two supreme true treasures.”

The moment they heard this piece of news, the sea of humans was a scene of jubilation. On the contrary, the united forces camp was in a rage when they learned of the news. The internal disagreements within the Freedom Alliance went on. When they heard that Ancestral God School had chosen to join the human camp, these disagreements within the Alliance grew even more heated!

Updates arrived successively.

“Black Universe Creator has decided to join the united force camp!”

“Northern Territory Alliance Master has decided to join the united force camp!”

“E Zhou is joining united force camp!”

“Virtual Real Devil God is joining united force camp!”

The humans might be feeling bouts of pressure, but they continued to prepare themselves. Since the humans had no intentions of giving out information on cultivating to reach the ultimate limit of a universe supreme master, it was a fact that these supreme masters who traveled alone were not going to help the humans. On the other hand, the united force camp was rejoicing.

At that very moment, the division of powers between the two sides was gradually coming to light. Other than Sitting Mountain Guest, Demon Beast Ancestor, and a few other great beings who had not made their stand yet, the majority of the groups of powers had already announced their decisions. Now, only the Space Beast Alliance and Freedom Alliance had yet to make their final choice.

“The Space Beast Alliance has sent its envoy here again. Quite an eloquent one, he even said that imparting them information on cultivating to reach the ultimate limit of a universe supreme master will not affect the overall situation that the primal universe is in... Through the conversation, it is so obvious that there is a hint of a threat, and apparently, this Space Beast Alliance is also contemplating whether or not it should join the united force camp.”

“There is no need to bother about him. Now, the Freedom Alliance’s decision is our greatest concern.”

Right now, within the entire primal universe, various groups of races were all looking toward the Freedom Alliance. It was the most important source of strength, especially with the united forces camp’s increase in ability, which had already surpassed the human camp’s power by leaps and bounds. But the moment the Freedom Alliance decided to help the humans, then no matter what, the united forces camp was destined for failure.

Fight! The internal disagreements within the Freedom Alliance were severe.

The majority wanted to join the human camp. At least they could obtain the guidance from the cultivation experience of the ancient civilization on how they could cultivate to achieve the universe supreme master level.

The other part of the Freedom Alliance—including Shi Hua Island Leader—wanted to pressure the humans into acquiescing to their demands. Otherwise, they would join the united forces camp as a way of threatening the humans.

The differences between both parties, especially when the situation within the entire primal universe eventually depended on their decisions, became even more serious. The more aggressive party headed by Shi Hua Island Leader and the more stable party that consisted of the various other groups were engaged in an extremely intense fight against one another.

It was the third month since the endless Remote Ocean had entered Star Tower.

“Luo Feng.”

“Teacher.”

Luo Feng met with Primal Chaos City Leader.

“Come over to Earth as fast as you can,” Primal Chaos City Leader requested. “The avatar of the alliance master of the Freedom Alliance, ‘Shi Hua Island Leader,’ has landed on Earth this very moment.”

“Landed on Earth?” Luo Feng frowned.

“Yes. He is here alone to negotiate with us humans.” Primal Chaos City Leader was very solemn as he continued. “Because we have many great beings of various races in our primal secret region right now, he is unwilling to disclose his identity... Therefore, the venue for negotiations will be on Earth. Seems like Shi Hua Island Leader intends to help the human camp.”

“Alone?” Luo Feng seemed to have an inkling of what was going on. “What Teacher means to say is that he is not representing the Freedom Alliance... but representing only himself?”

Primal Chaos City Leader nodded slightly.

“All right, I will go and meet up with him.” Luo Feng nodded.

The individual being sent for negotiations was a clear reflection of the degree of importance. Currently, within the human camp, the ones of the highest status would be Primal Chaos City Leader, Luo Feng, Darkness, and Peng Gong. Out of these four, the status of Primal Chaos City Leader and Luo Feng were of higher importance.

Chapter 1300: The Final Choice of Freedom Alliance

Life on Earth was as peaceful as ever. The war between the two major camps in the primal universe had not aroused the slightest trace of disruption to the populace living on the countless life planets. This populace was made up of the common people.

Strolling along the wide and spacious pavements, it was common to see warriors walking out of dojos in their training uniforms, and there would be many universe businessmen walking down the streets while discussing business matters.

“Luo Family?”

A purple-robed figure stood before the door of an old mansion.

This old mansion was the house of the Luo Family. Even on Earth, it had a unique significance. By the doorstep, there were guards to stop intruders or simply the common public who were trying to satisfy their curiosity. But where the purple-robed figure stood, it seemed like the people walking past him—or even the guards at the doors—could not see him at all.

“Mama, is this Luo Feng’s house?”

“Yes, this is Luo Feng’s house. Haven’t you been making a racket about coming to Earth to see the noblest leader of the pulse of us Earthlings? Mama has fulfilled my promise and brought you here. When we get back to Jade Birch Star, you must train hard at the dojo.”

“Yes, Mama. I heard that Luo Feng was born in a distant base city era of our Earth, and at that time, there were many cities that were in ruins or desolate waste. I want to see them all.”

“Don’t worry. This time around, we have ample time on Earth. We can go to many attractions.”

A pair of mother and son, who both had black hair and black eyes with yellow skin, were walking along a sidewalk a distance away from Luo Family’s mansion. After a brief discussion, they left shortly after.

Every day, there would be many people coming to this place even during the base city era. Since the time when Luo Feng and company did not hesitate to risk their lives to fight that swallowing beast, his status had already soared to the level of an absolute hero. Thereafter, when the Nuolan Shan family clan descended on Earth, Luo Feng had once again stepped out to ward off their attacks.

Luo Feng’s status got higher and higher, and the publicity on Earth would naturally praise him to even higher elevations. There were also earthlings roaming about the universe who had benefited greatly from Luo Feng’s help. This made them even more thankful for Luo Feng... Therefore, over the past tens of thousands of years, generations of earthlings had passed on the heroic deeds of Luo Feng, and this was how Luo Feng became the greatest leader and godly spirit in the eyes of all earthlings entering the universe era.

A voice resounded: “Shi Hua Island Leader.”

The purple-robed figure turned around to look. On a bustling sidewalk crowded with people, there was a black-haired youth garbed in a silver-white robe approaching from a distance away. The people around him could not see him at all. It was as though they were in a different dimension altogether. On the pavement, there were many earthlings who specially came from other faraway planets to learn about how Luo Feng grew up through traces that were found all over his homeland. Yet no one was the slightest bit aware that Luo Feng was walking alongside them.

“Luo Feng!” the purple-robed figure greeted with a smile.

“I did not expect Shi Hua Island Leader to choose to meet here.” Luo Feng walked to the front of the mansion, then raised his head to take a look.

“I wanted to come and see the extraordinary great being from the talented young generation who rose from the human race at such a tremendous rate...” Shi Hua Island Leader said in a gentle tone. “Exactly how did he manage to rise? And what kind of environment could have cultivated this talent?”

Luo Feng smiled. He took one look at this Shi Hua Island Master, who was so handsome that he could be an epitome of perfection but seemed to be more of a neutral gender. However, this Shi Hua Island Leader was a unique life form, so it was also possible that he did not have any gender at all.

“Out of all you humans, the one I respect the most is Teacher Origin,” Shi Hua Master said softly with a sigh. “Especially the virtual universe Teacher Origin created. This virtual universe instantly made your

culture 1,000—a million times more splendid! Even for faraway cultures that were scattered all over the universe, colliding with one another in the virtual universe could create new sparks. Various imaginations could become tangible within the virtual universe... Even I myself often get to experience your human culture within the virtual universe.”

Luo Feng nodded. With or without the virtual universe, it was indeed a world of difference.

“When I was in the virtual universe, I have seen quite a few rounds of the War of Talents of you humans. Only that particular year of the War of Talents that you participated in... I was wandering on an adventure in Universe Ocean and could not dare get distracted. Therefore, I clean forgot about watching it.” Shi Hua Island Leader shook his head while lamenting. “If I had watched it, I would be tempted to take you under my wing, taking you in as my disciple. How wonderful that would have been. This inheritance of Duan Dong River... How easy would it be for me to lay hands on it?”

“Even if Shi Hua Island Leader had watched that particular round of War of Talents earlier on, you would not want me as your disciple,” Luo Feng said. “At that time, I was not the most outstanding one.”

“True.” Shi Hua Island Master shook his head and lamented again. “No one will dare proclaim to know what will happen in the future. Even if I had seen your performance that day, I would not have guessed your fate. I would never have expected a young chap from an indigenous race to be able to rise to be my equal when he matured.”

Luo Feng gave a slight frown and said, “Shi Hua Island Leader’s purpose in coming here is not merely to have a chat with me, right?”

Shi Hua Island Leader’s expression changed instantly. “Luo Feng!” Shi Hua Island Leader stared at Luo Feng. “My purpose here is simple... Now, all the major groups of powers within the entire primal universe are paying close attention to the final choice of my Freedom Alliance. In other words, whichever side my Freedom Alliance chooses to join, that side will be determined as the winner.”

Luo Feng nodded slightly.

“And now, there are split opinions within my Freedom Alliance,” said Shi Hua Island Leader said. “One part wants to join your human camp. The other part wants even more! I belong to the latter part. My purpose in coming here is that I only have one goal: that you humans will impart to me the cultivation experiences of that ancient civilization on how I can cultivate the ultimate limit of a universe supreme master.”

Shi Hua Island Leader looked at Luo Feng. Luo Feng instantly let out a hint of a sneer.

“Don’t rush to reject me,” Shi Hua Master said. “I come here representing myself. In other words... the cultivation experiences to be able to cultivate to the ultimate limit that you humans give me are solely mine to own. If you give me this inheritance, I will not impart it to any other being of the Freedom Alliance. And I will lead and persuade all those under my influence in the Freedom Alliance to join your human camp.”

Luo Feng’s eyes lit up. “You mean to say...”

“Yes. That is exactly what I mean. You humans only need to fulfill an insignificant condition that the Freedom Alliance demands! As for the cultivation experiences to achieve an ultimate limit... you only

need to give it to me! I will help you humans now that the Freedom Alliance is split in two internally and I have much influence over one of these two groups. If I help you, the stalemate will soon come to an end, and the Freedom Alliance will join your human camp. Besides, I am no fool. After I get what I am after, I will not be so silly as to share it with other great beings. Wouldn't that be the same as training my enemy?" Shi Hua Island Leader looked at Luo Feng. "What do you think of my proposal?"

Luo Feng was tempted. If the experiences of the ancient civilization on how to cultivate to achieve the ultimate limit of a universe supreme master were only imparted to Shi Hua Island Leader, the humans would not need to worry about him spreading it to outsiders. Unless Shi Hua Island Leader was, indeed, a fool.

By only giving it to him, I can get over 400 universe masters to join my human camp?

Luo Feng nodded discreetly. Previously, his plan might have been impressive, but there were still risks attached. If the Freedom Alliance joined his human camp, they would truly be freed from any possible risk.

"Give me a moment," Luo Feng said.

At that moment, in the virtual universe, Luo Feng, Primal Chaos City Leader, Peng Gong Master, and Darkness Master met on the apex of Thunder Island.

"This was what he demanded: to give him the experiences of the ancient civilization on how to cultivate to achieve the ultimate limit of a universe supreme master," Luo Feng said. "Then he will help us! Teacher, Darkness, Peng Gong, what do you all think about his demands?"

"Only giving it to him alone?" Darkness muttered to himself pensively.

Peng Gong also nodded slightly. "Now there are two voices within the Freedom Alliance. One is willing to join us; the other is reluctant to do so and demands that we give them more. Shi Hua Island Leader is the leader of the group with the second voice. If he helps us... it is indeed possible to achieve a united voice within the Freedom Alliance as soon as possible."

"Just giving it to him alone is possible," Primal Chaos City Leader said slowly. "A single universe supreme master does not affect the big picture."

"True. And when we give him the information about the inheritance, we can be as brief as possible!" Darkness Master sneered. "He doesn't even know what the inheritance we have is like. We can give him simplified information... then tell him that it's what we got. What can he do?"

Luo Feng also nodded. The four highest-ranked great beings of the human race all felt that giving the information to Shi Hua Island Leader alone—in exchange for over 400 universe masters joining the human camp—was a feasible deal.

"And we must give him a portion before the war and the other portion after the war." Luo Feng smiled. "The portion before the war will have him coveting for more. After the war, when we give him the other portion, he may find it too brief... but the war will have ended. So what if he has regrets?"

"Mm."

“True.”

“We can accede to his request.”

The higher-ups of the humans all nodded their agreements; Primal Chaos City Leader even contacted Teacher Origin once to consult him about this matter. Teacher Origin was also in agreement.

Firstly, they only had to give information to Shi Hua Island Leader. Secondly, even if he managed to get his hands on that simplified information on that inheritance, it would still be extremely tough for Shi Hua Island Leader to achieve a breakthrough and cultivate to reach the ultimate limit.

Earth.

“Internally, the human race has finished this discussion.” Luo Feng looked at Shi Hua Island Leader. “And all agreed.”

Shi Hua Island Leader heaved a sigh of relief and revealed a smile.

“Before the war, we humans will give you a third of the information,” said Luo Feng. “If the Freedom Alliance joins the human camp in this war, then after the war has ended, we will give you the other two-thirds of the information.”

“Deal.” Shi Hua Island Leader nodded. “When will you give me the information?”

“Very soon.” Luo Feng replied. “The human race has held an internal discussion.” Luo Feng looked at Shi Hua Island Leader. “And we have agreed to accede to your request.”

“After your human camp gives me part of the information, I will act fast and urge the Freedom Alliance to join your camp,” Shi Hua Island Leader said without further ado.

The human camp, indeed, prepared a set of information on the inheritance that very same day and handed it over to Shi Hua Island Leader, who was excited and overjoyed to see it. This partial information alone was able to stir up his desire for more... and he was already yearning to lay hands on the remaining two-thirds. The only thing was, he had to wait until after the war.

The humans were all waiting anxiously.

“Shi Hua Island Leader wouldn’t go back on his word after receiving the information and not help us as promised, would he?”

“Fret not. Shi Hua Island Leader put so much effort into creating that Freedom Alliance, and even became an Alliance Master, for what? All of it was just for the inheritance, wasn’t it? It will do him no good at all if any of the universe masters from the Freedom Alliance also gets a part of it. Getting it all for himself is enough... He will handle this appropriately.”

Luo Feng, Darkness Master, Primal Chaos City Leader, and the rest were waiting anxiously. They were all worried that an accident might happen midway. After all, the Freedom Alliance was brimming with great

beings. Even if Shi Hua Island Leader were to help, he was also unable to give a 100 percent guarantee that he would succeed in his persuasion.

Half a month after being given a third of the information on cultivation experiences from the inheritance, Shi Hua Island Leader finally sent a piece of news:

“Internally, the Freedom Alliance has arrived at a consensus. The Alliance has decided to... join the human camp!”
