

## Chapter 1411: Eight Great Beings Gathered

There were two true gods headed to the nest where all the Sector Beasts lived, known as the Land of Darkness. They were Hong, who had become a true god 30 billion eras prior, and Eye Devil God from the first universe era in Universe Ocean. Compared to other true gods from Universe Ocean, they were only average true gods. However, they had two things in common. They both had machine-type valuables! And they both had strong willpower!

They both traveled toward the Land of Darkness in true god spaceships, yet they were attacked by Sector Beasts at the periphery of Land of Darkness.

\*\*\*\*\*

The chaos air filled Universe Ocean. Within it, other than the four Lands of Extremis, there were other dangerous palaces. Some of the places were residences created by true gods, such as Jue He Ocean.

Jue He Ocean was originally called "Golden Sand Ocean." Although true gods weren't afraid of it, they didn't dare to enter recklessly. Jue He True God's power, however, had been greatly improved since entering the World of Jin, and he had roamed Golden Sand Ocean. He had even placed a palace true treasure at the center of Golden Sand Ocean, making it into his place of residence.

"Be careful! Teacher is inviting the other seven supreme beings in Universe Ocean. Pay close attention." A universe master who had a pair of copper-colored horns on his head was yelling at the universe knights under him.

"Yes."

"Yes." All the universe knights were respectful.

The universe master with the copper-colored horns nodded. "Go prepare."

The universe knights scattered, transmitting their voices excitedly.

Jue He True God was a lone, low-key true god from the second universe era. He had been practicing for a long time, and special life forms were his vassals. He immediately allocated some universe knights from his miniature universe, as he was going to greet seven other great supreme beings.

"The other supreme beings are arriving. I can't believe we can also see the other supreme beings in Universe Ocean."

"With our teacher, there are eight supreme beings."

"They're coming."

All the universe knights were looking forward to it.

After a long time, two streaks of light arrived.

"Haha! Divine Eye, Bei Chi. I can't believe you arrived here together."

A giant, barefoot god with fiery skin walked out of his palace. He trod across the space with his great feet, taking huge steps, and strange, fiery flowers blossomed under his feet with each step he took. There were dozens of small, golden horns on his head, and there was a golden horn on his head. All his eyes gleamed with green light.

“Aren’t they still here?”

“You guys arrived here first. The others might be coming.” Jue He greeted them by themselves. The three conversed as they walked into the palace.

\*\*\*\*\*

After Divine Eye True Master and Bei Chi Star Master arrived, Skeleton Master arrived as well, followed by Nine-Headed Demon Master.

Hong!

Three beings arrived like three streaks of light. Skeleton Master, Divine Eye True Master, Bei Chi Star Master, and Nine-Headed Devil Master arrived first. Jue He True God greeted them all one by one. Three streaks of light flew in from a distance and became three beings. One was a man wearing a golden cape. He had a faint smile on his face, and his eyes were gleaming with a dim, golden light.

There was also a middle-aged man looked wicked and eerie. He looked pale with black engravings on his face.

In the middle was a man in a white cape who appeared quite ordinary. He glanced around, and there was unimaginable magical power contained in his eyes. Jue He True God and Divine Eye True Master both missed a heartbeat just looking him in the eyes.

One of them was Primal Chaos City Leader, the person in charge of the first power in Universe Ocean! One was Nine Remoteness True Master, representing the second power in the original universe, the Ancestral God School, and he was undying. The third one was acknowledged as the strongest great being in Universe Ocean, and also had the highest authority in the World of Jin: Milky Way Horde Leader!

“Chaos, Nine Remoteness, Milky Way, welcome.”

The other five greeted them.

The power dynamics in Universe Ocean completely changed. The ancient civilization had greatly improved the chance of true gods being born, and only the original universe could breed true gods! Now, the most powerful era in Universe Ocean was the original universe era—stronger than the first and the second universe eras combined.

As for the two holy lands? True gods were required to fight Sector Beasts, yet there were no powerful true gods in the two holy lands, so nobody cared about them.

The humans had the most true gods, followed by the Ancestral God School, followed by the Space Beast Alliance. This was the internal ranking in the original universe.

Most of those who became true gods during the past trillion eras had all been universe masters previously. The demon race, the bug race, and the automaton races had lost over 200 universe masters in the World of Jin, all of whom had been the true elites who had become universe masters without help from the ancient civilization. After they were killed, the demon race, the bug race, and the others only had weak universe masters left, so there were only a few true gods.

As for the Ancestral God School and the Space Beast Alliance, they hadn't lost anyone, so many true gods were born in their races! Actually, there were many other races in the Hong Alliance, so naturally, there would be many true gods in that group. However, after the united forces alliance disintegrated, the biggest threat to the human race was posed by those other races in the Hong Alliance! After all, there were hundreds of universe masters in other races, but the humans only had 20. The power gap was too large, so the humans needed to constrain them.

For the past trillion eras, the humans had been trying to suppress the other races in the Hong Alliance. If they didn't, the humans wouldn't be able to control them any longer. The humans kept suppressing the other races so that the other races had to respect humans.

\*\*\*\*\*

The supreme beings were those who truly mattered when fighting Sector Beasts. After all, there were only a limited number of true gods in Universe Ocean, and without quantity, quality mattered! In the past trillion eras, eight supreme beings had emerged from the World of Jin, and they were widely recognized as the eight most powerful beings in Universe Ocean.

The first one was Divine Eye True Master from the first universe era.

The second one was the supreme master from the skeleton race. The skeleton race and the Divine Eye clan had been fighting for a long time. Skeleton Master was highly rewarded in the World of Jin. His power exploded, and he now rivaled Divine Eye True Master.

The third one was Bei Chi Star Master. Previously, he had conducted public teaching in the black-striped stone pillars. He was venerated and also a robust great being.

These were the three supreme beings from the first universe era. The fourth and the fifth ones were Jue He True God and Nine-Headed Devil Master. They were the strongest in the second era, and both were special life forms. Special life forms were revered in Universe Ocean, such as Sitting Mountain Guest. He didn't participate in any battles, so even though everyone knew he was mighty, no one knew the true extent of his power, so he wasn't among the eight supreme beings.

The sixth one was Nine Remoteness True Master, who had endless godly power, making all the other great beings jealous.

The seventh one was Primal Chaos City Leader. He had already been a shining star back when he was still a universe master. After becoming a true god, he had reached an incredible level through his hard work and the detailed inheritance from the ancient civilization obtained by his disciple, Luo Feng.

The eighth one was Milky Way Horde Leader. Nobody in Universe Ocean knew for certain the extent of the power of Luo Feng. He was only a universe master, but he was ranked as the strongest in Universe

Ocean. Other true gods all knew godly power burning techniques and had machine-type valuables, yet they were still not Luo Feng's match.

A trillion eras prior, Divine Eye True Master had still been able to fight Luo Feng. Now, all seven great beings admitted that Luo Feng could easily defeat them all. Over the past trillion eras, Luo Feng hadn't become a true god, but he had become much stronger!

\*\*\*\*\*

At the center of Golden Sand Ocean, inside the sparkling palace and around the crystal round table, were eight thrones. Fruit and wine from all three universe eras sat on the round table.

Luo Feng and the other seven sat down.

"Illusion Heart True God of you humans and Eye Devil God from the first universe era went to Land of Darkness," said Jue He True God with fiery skin. "Milky Way, Chaos, you must know a lot about the Land of Darkness now."

Primal Chaos City Leader nodded. "Yes. Both Hong and Eye Devil God are true gods who are exceptional at illusions, and they have strong willpower... They approached the periphery of the Land of Darkness carefully, but they were quickly attacked by three Sector Beasts all at once. They survived the attacks and were safe and sound inside the spaceships, but once they got out, those three Sector Beasts yelled at the same time. The resulting invisible soul attack put them in great pain even though they could resist it. The three Sector Beasts immediately attacked them, severely injuring Eye Devil God. They retreated immediately."

"For one thing," Primal Chaos City Leader continued, "the soul attacks of the Sector Beasts were incredible, so you must have a soul supreme true treasure, and you'll still feel agony! Both of them have willpower stronger than true gods. Sector Beasts are mighty. Much stronger than them. The energy attack alone was able to severely injure Eye Devil God. The energies the Sector Beasts use are different from our godly power. Their energies can quickly annihilate our godly power. At the same time, their energies will wither away as well."

Luo Feng nodded. "Yes. A power opposite to godly power."

Luo Feng had felt that sort of power when he had fought Great Thunder Star Tower. Sector Beasts were using the exact same power, which was why Eye Devil God had been quickly injured even with a machine-type valuable. Both Eye Devil God and Hong only had mediocre godly bodies, so they couldn't be consumed.

"Ordinary true gods can't contend with Sector Beasts." Divine Eye True Master shook his head. "How many Sector Beasts are there?"

## **Chapter 1412: Sector Beasts Come Out**

Bei Chi Star Master nodded. "We know too little about them at the moment. First of all, we know that Sector Beasts are great at soul attacks, and secondly, we also know that they wield a power that is the opposite of godly power. Also, we know that although Sector Beasts fight and try to kill each other,

when we show up, they'll work together to attack us. Eye Devil God and Illusion Heart True God were attacked by three Sector Beasts at the same time."

Luo Feng and the others nodded. They realized that even though the Sector Beasts were trying to kill each other, when facing an enemy from the outside, they would cooperate and fight the outsider together.

"Then..." Nine Remoteness True Master shook his head. "It'll be difficult to kill them one by one."

Luo Feng thought, Both Hong and Eye Devil are great at illusions, and their willpower is at void space level! The true gods in Universe Ocean had their willpower at void space level after being trained in the World of Jin, but many are only at the true god level. If they only have willpower at the true god level, they'll suffer great losses...

Some of the words were forbidden in Universe Ocean; information about true gods of void space and those that were more powerful was concealed.

"We know too little about Sector Beasts," said Nine-headed Devil Master anxiously.

"What skills do they have? How many are there? We don't know anything." Jue He True God nodded.

"Besides, the end of this universe era is approaching," said Divine Eye True Master. "It might only take several trillion eras for it to come. According to the original mind, we have to end the Sector Beasts before this universe era ends. Otherwise, it'll be too late."

The Sector Beasts were a source of worry to all the great beings in Universe Ocean. Even Luo Feng and Divine Eye True Master, who had been foes before, were friends now. With a common enemy, enmities could be erased in no time.

"I think we need to go to the residence of the Sector Beasts again," said Divine Eye True Master.

"Yes, we need to go again, and we need to get more information." Jue He True God was anxious. "We must learn more about them. Then we can be more prepared and can plan better."

Over the past trillion eras, Universe Ocean had been absorbing the inheritance from the ancient civilization, including some ancient techniques, machine-type valuables, and how to control them!

The great beings in Universe Ocean had already reached their limit. Beings like Divine Eye True Master, Skeleton Master, and Nine Remoteness Master wouldn't be able to greatly improve themselves anymore, even if they were given another universe era. On the contrary, the Sector Beasts would only become stronger as time went by.

It was time to fight!

"We need to form a team of true gods made up of those from Universe Ocean," Primal Chaos City Leader said with a nod. "We need to go to the Land of Darkness and learn more details about them so that we can make a better plan. Firstly, all the true gods in the team need to be powerful. Also, we need to acknowledge that it's going to be dangerous. We can't let this failure shake the foundation of Universe Ocean!"

Everyone nodded. Nobody actually knew how hazardous the Land of Darkness was. If half the eight supreme beings were killed, even if they gained detailed information, it wouldn't mean anything. After all, the eight supreme beings were the pillars of Universe Ocean.

"I'll lead," said Luo Feng. "One true god from the first universe era, one true god from the second true god, and two true gods from the original universe era. We'll form the team like this, and I'll also join. There will be five of us."

Including Luo Feng, three came from the original universe. It was to be expected, since the number of true gods from the original universe was much larger than that of the first and the second universe era.

"Okay."

"Milky Way Horde Leader is leading this time, so there'll be no problem."

"Milky Way Horde Leader will be able to find the mysteries behind this."

Jue He True God, Divine Eye True Master and Skeleton Master were all pleasantly surprised. Luo Feng was the most powerful being in Universe Ocean. If he couldn't find out anything, nobody could.

Luo Feng nodded. He was a universe master with several bodies. Even if one of his bodies was annihilated, it could be recovered soon. For the past trillion eras, his willpower had already reached the level of an eternal true god, and practicing "Godly King Technique" was highly rewarding. He also had a giant godly body and was the most powerful being in Universe Ocean. He wasn't afraid of the home of the Sector Beasts.

"Divine Eye True Master, Jue He True God, go back and talk to the great beings from your universe eras," said Luo Feng. "One true god from each universe master, and they must have strong willpower."

Both Divine Eye True Master and Jue He True God nodded and answered.

"Sure."

"No problem. Many true gods will be honored to go with you."

Over the previous trillion eras, Luo Feng had become more and more powerful. After practicing "Divine Eye Technique," Luo Feng could now intimidate true gods with a single glance. All of them venerated Luo Feng, and they also knew that his power would be beyond imagination once he became a true god.

\*\*\*\*\*

After this meeting, they now had a basic plan for how to deal with the Sector Beasts. The eight supreme beings soon separated. Luo Feng, Primal Chaos City Leader, and Nine Remoteness Master flew back to the original universe.

"Nine Remoteness," said Luo Feng. "We need two more true gods from the original universe. One from the Ancestral God School and one from the Space Beast Alliance. Will that be a problem?"

"No problem." Nine Remoteness Master nodded.

The Ancestral God School and the Space Beast Alliance also had many true gods.

“But you need to be careful as well,” said Nine Remoteness Master. “That’s the residence of the Sector Beasts, which forces the original mind to use so many methods.”

“That’s right,” said Primal Chaos City Leader solemnly. “Don’t underestimate those Sector Beasts. Remember Huge Axe.”

Luo Feng nodded, “I know it. I’ll send my Mosha body there this time, so nothing will happen.”

Primal Chaos City Leader relaxed. Mosha body was an energy type creature, and it didn’t have a soul, so soul attacks were useless against it. Besides, Luo Feng could also reach the second level on his energy type lives, and Mosha body was 100 million kilometers tall. Such a large godly body was much bigger than Hong or Eye Devil God, so there was nothing to be afraid of.

This time... Luo Feng thought. When all three universe eras select their champions, I’ll need to go talk with my teacher.

Luo Feng knew that true gods belonged to different races, and it would take them some time to decide who was going.

\*\*\*\*\*

Land of Darkness in the core area of the remote Tilted Peak Sector.

Hua! Hua! Hua!

There was black mist tumbling on the edge of the Land of Darkness. There hadn’t been so much before, but with time going by, it was growing denser and denser.

Hong!

A streak of black light shot out of the Land of Darkness. Then it slowed down and stopped.

It was a giant monster emitting black light from every inch of its body. It had two ferocious heads, and on each head was a single eye, a nose, and a mouth. It had one pair of arms and one pair of legs. It was completely naked, and wicked force permeated from every part of its body. The singular eyes on each of its two heads glanced around. Its body bore dozens of injuries, and black blood seeped from its veins.

Suddenly, its first head opened its mouth, and its tongue extended. It swept across its body like a giant beam of light, licking every wound on its body.

“Bei Di...!” The hideous black monster bellowed and roared. “I am the ultimate king! I am! You rigged the system, which is why you’re stronger. You want to kill and eat me? Just wait and see—it’s not going to be that easy. Last time, two dishes of food were at our door.”

“Those three idiots were so stupid that they let the delicious food get away,” the ugly monster whispered. “Bei Di, perhaps I can’t beat you in our nest, but other than eating other Sector Beasts, I can also devour delicious food to strengthen myself. I’ll go to the world where the delicious food lives, and I will keep eating it nonstop. I’ll get stronger, and when I come back, I’ll outmatch you. The Sector Beasts in our nest are all wicked, and they won’t let you eat them like that. The food outside is much easier to acquire. When I come back, I’ll be stronger than you. Then I’ll eat you and all the others. I’ll be the ultimate king.”

Hua!

It flew out toward the endless waves where a large boat floated.

As the black light flew toward it, two towering beings flew out.

“My king,” said Zhen Jia Emperor and Dragon Rock Ancestral God.

The hideous monster stopped and looked down at the two true gods. It stared at them for a moment. Then, it suddenly changed its shape. It changed from a hideous monster to an enormous humanoid creature which had a giant tail on its back, simulating some of the characteristics of Zhen Jia Emperor and Dragon Rock Ancestral God. At the same time, it also permeated godly power.

“Look. Do I look like your kind?” asked the Sector Beast.

“Yes, you do,” answered Zhen Jia Emperor and Dragon Rock Ancestral God.

They referred to every Sector Beast they saw as “King.” All the Sector Beasts were deranged, and each one thought he was the best.

“I need detailed information about Universe Ocean,” said the Sector Beast. “Tell me about all the great beings in Universe Ocean.”

Zhen Jia Emperor and Dragon Rock Ancestral God looked at each other. This Sector Beast was going to Universe Ocean?

They were exhilarated. They had been repressing their desires for too long. After Great Thunder Star Master died, they were the only two foes Luo Feng had left! Given Luo Feng’s reputation, they didn’t dare to go to the World of Jin, so they had neither the ancient civilization nor any machine-type valuables. And so, they had lingered here for all that time.

### **Chapter 1413: Sitting Mountain Guest and Willpower of the Origin**

Zhen Jia Emperor’s voice sounded like the clashing of metal. “The Universe Ocean of today is much stronger than before. This was because of the emergence of the fourth most dangerous land, the World of Jin. The World of Jin was a world left behind by the ancient civilization. It is where many living souls, true gods, and even higher existences of the ancient civilization could be found. The inheritance of the ancient civilization and automaton type treasures all could be found in abundance in the World of Jin! The various groups of top powers from Universe Ocean have penetrated deep within the World of Jin to hone their skills and gain treasures. Their powers have improved tremendously. And among them, we need to be extremely careful of... Milky Way Horde Leader Luo Feng!”

“Milky Way Horde Leader Luo Feng?” The Sector Beast looked down at the two true gods and asked, “This Milky Way Horde Leader. What do we know about his background?”

“He is a great being from the human race of the primal universe era, and he is a universe master,” Zhen Jia Emperor said.

“Hahaha! A universe master! Such fragile food... you all want me to be wary of him?” The Sector Beast burst out laughing.

There was no reason for him not to laugh. He was a Sector Beast. A super life form bred by Universe Ocean. Even though he was currently only in his growth period—which was the true god stage—his power was certainly not lower than that of a universe master.

Dragon Rock Ancestral God replied right away, “My dear respected Emperor, you must never, ever underestimate this Milky Way Horde Leader. Previously, when the World of Jin had yet to appear... Great Thunder Star Master had already perished at his hands.”

“Great Thunder was killed by him?” The Sector Beast grew more wary and paid more consideration now.

Unable to resist the temptation, the three true gods had decided to seek refuge with the Sector Beasts, yet they themselves were actually quite highly skilled individuals.

A universe master who could kill a true god...

“And that was when he had just entered World of Jin; it was said that he had an extremely great encounter,” Dragon Rock Ancestral God said in a hoarse voice. “He once annihilated a few hundred universe masters from the united forces alliance and the Purple Moon Holy Land all at once, within a fleeting moment. There was no evidence, but later on, during the trillionth era, when there was provocation raised against the humans within the primal universe, all the advocators were ruthlessly punished by the humans. The various groups of top powers were all of one mind... Milky Way Horde Leader Luo Feng wielded great authority within the World of Jin.”

Dragon Rock Ancestral God went on to say, “And the willpower of the primal universe origin also leaked out this information... Milky Way Horde Leader Luo Feng was a Number One Master of Universe Ocean!”

Sector Beast was greatly appalled. “He is just a universe master. How can he be the Number One Master of your Universe Ocean?”

“This is acknowledged by all,” said Dragon Rock Ancestral God. “Over the past trillion eras, he made multiple strikes, and every time he made a move, he always gained an absolute edge over everything that dared to provoke him by keeping them suppressed. Because he was so powerful, neither of us dared to venture into the World of Jin. Now, he is only a universe master. When he becomes a true god, he will certainly be a more horrifying figure! My dear respected Emperor, if you can exterminate him, then in the whole of Universe Ocean, there will truly be no one who can stand in your way anymore!”

Sector Beast fell silent. In the beginning, he had shown indifference and had placed no importance on this figure, but now, the name was etched in his memory: Milky Way Horde Leader Luo Feng.

“Number One Master of the Universe Ocean. Is that so?” Sector Beast said to himself. “I, Morosa, shall not confront you head-on. I shall first feed myself well with delicious food, and when my powers become stronger, I will come and see for myself just how powerful you are. See if you are more powerful than Beddy.”

At this moment, this Sector Beast, Morosa, had already set Luo Feng—a being whom he had never met before—as an opponent second only to “Beddy.” And Beddy was the greatest opponent he’d had to face in order to become the ultimate king.

As for Luo Feng, he was the greatest obstacle hindering the Sector Beast from feeding on all the delicious fare it craved as he rampaged through Universe Ocean.

“First, I will kill and eat this dish called Milky Way. Then I will eat everything I can find within Universe Ocean and return here... Beddy, if I come back to see that you are already killed by other Sector Beasts, I will be so disappointed.”

The Sector Beast, Morosa, looked down at the two true gods. “Tell me about the map of Universe Ocean.”

\*\*\*\*\*

After a long time, having gathered enough information, Sector Beast Morosa now had a detailed understanding of Universe Ocean. Finally, he left the Land of Darkness, the nest of the Sector Beasts, and set off for Universe Ocean alone.

\*\*\*\*\*

Primal universe.

Amidst the vast, starry sky, a man in a white robe appeared and walked through the darkness of space. He headed straight for a red-hot star—a star that was already headed toward the end of the path.

Within the star, blazing flames surrounded the core. But this core, on the contrary, exuded an endless coldness.

A damaged ship was floating amidst the blazing flames, and the cold air kept all those flames away. An elderly man sat cross-legged, unmoving. In his hand was a stone. This stone had been smoothed by his persistent touch.

“Teacher.” The man in white robe walked amidst the flames and soon approached this end of the ship from afar. Neither the flames nor the cold air had any influence on him at all.

The elderly man opened his eyes and looked at Luo Feng. “Going to the Sector Beasts’ nest?”

“Uh-huh.” Luo Feng nodded. “At this point, the great beings of Universe Ocean have mostly reached our limits. Even if we are given another trillion eras, it will still be difficult for us to increase our powers. Yet the Sector Beasts’ powers are consistently on the rise... We feel that we should not delay further. This time, my Mosha body will lead a small team over to briefly look into the situation and uncover more facts. Then we can better formulate our plan of action.” Luo Feng also sat down, cross-legged, far across Sitting Mountain Guest. “Teacher, previously you told me to call on you before heading over.”

Luo Feng had always felt as though Teacher Sitting Mountain Guest hid himself behind a veil. Therefore, Luo Feng had never truly been able to see him clearly.

“First, I need to tell you something,” Sitting Mountain Guest said directly. “Regarding some of the information that the willpower of the primal universe origin openly revealed with the help of the three ancestral gods... Part of it was true, but there are some parts that are not true. For instance, saying that the Universe Boat was created for the sake of dealing with the Sector Beasts... That is an absolute joke.”

Luo Feng was struck by a sudden thought. "Teacher, you mean to say... the words of the willpower of the primal universe origin are not credible?"

"No," Sitting Mountain Guest replied. "Killing a Sector Beast is certainly good for you all. The existence of Sector Beasts is mainly for the purpose of destroying. They are capable of destroying all kinds of miniature universes. So, of course, it would be right for you all to get rid of them in their early stages."

Luo Feng frowned. "Then, Teacher, what you mean to say is—"

"I want to tell you that, first off, this Sector Beast is an incomparably terrifying life form that the Universe Ocean gave birth to," Sitting Mountain Guest said in a most solemn tone. "Truly, it is terrifying. Within the entire Universe Ocean, there is one primal universe, and the Sector Beast takes up an opposing role against it! As for you countless life forms, you are all merely the byproducts of what the Universe Ocean bred. Speaking of the nobility of this life form alone, who can hold a candle to it?"

Luo Feng could not help but nod to indicate his agreement. Such a life form was, undeniably, highly noble.

"Of course, I am specifically referring to the final survivor after one billion Sector Beasts fight one another to death," Sitting Mountain Guest said. "This last one standing is the truly incomparably noble yet terrifying one. For now, there are still many of them, so the threat posed by one of them... will not be great enough to eliminate your ability to resist. Also, this Sector Beast, as noble as it is, it is naturally endowed with immeasurably high intelligence. Do you know, within the Universe Ocean, what is the least threatening to the Sector Beast?"

Luo Feng was filled with doubts. "Least threatening?"

"The primal universe!" Sitting Mountain Guest laughed. "The primal universe is almost harmless to the Sector Beast."

"Teacher, do you mean...?" Luo Feng's eyes lit up. He seemed to have an inkling about what his Teacher meant.

Sitting Mountain Guest laughed out loud as he said, "When a Sector Beast attacks any miniature universe, it will definitely be met with retaliation. Regardless of whether it is the two Holy Lands or the various miniature universes... any attack made would arouse a frenzied retaliation from a large number of great beings. However, when it attacks the primal universe, the primal universe by itself is simply incapable of any form of resistance.

"It may have bred countless lives, and it may seem to possess an endless power, but it is unable to initiate attacks. Therefore, it could only passively withstand all the devouring by the Sector Beast. The primal universe origin is said to be vast and endless. Even if the Sector Beast feeds to its heart's content, or even until it is stuffed to death, it will never devour all of it.

"To a certain degree, the primal universe will still undergo self-destruction to return back to its origin, during which the Sector Beast will not be able to attack. However, the change between the birth and destruction of the primal universe is under the control of intangible rules. It cannot be destroyed at will. Before destroying it, a Sector Beast will devour as much of the primal universe origin as possible, causing fundamental damage. If all of you great beings combine your strength to create a form of deterrence,

these Sector Beasts may give up on you for the time being and refocus all their attention on specifically dealing with the primal universe. After all, that is the greatest meal they could ever have!”

Luo Feng’s eyes brightened further as he gained an understanding of what Teacher was saying.

“This is why,” Sitting Mountain Guest said with a laugh, “the willpower of the primal universe origin told a lie.”

Hong! Hong! Hong!

There were faint tremors in the surrounding space. A strong, oppressive force was spreading out, rocking and shaking everything in the surroundings.

Luo Feng looked around. The flames of the star that were surrounding the broken ship were becoming distorted as they tremored. It was as though they would be extinguished at any moment.

“No need to worry,” Sitting Mountain Guest laughed. “The willpower of the primal universe origin has to adhere to the most fundamental universe laws. So long as you do not challenge any of those laws, it will not be able to do you any harm. It can only rely on help from other great beings... But within the universe, who could be your match?”

Luo Feng shook his head. “If this was said before the other great beings, I could just brush it off. But before Teacher, I am not that confident.”

“No.” Sitting Mountain Guest shook his head. “The willpower of the primal universe origin is not wrong in saying so. You are, indeed, Number One in Universe Ocean. Regarding the Sector Beast, the willpower of the primal universe origin is lying because it wants you all to go out there to fight and kill. Actually, to the high and mighty willpower of the primal universe origin, whether or not all of you survive, does it really matter? It can always breed generations of reincarnation eras.

“Life and death were originally part and parcel of the development of nature. It is not the least bit concerned about your life and death. To it... its origin is of the utmost importance. After all, the moment its origin is injured, it might never be able to recover even after countless reincarnation eras. This is why you should not act as its weapon of choice so easily. You must learn how to reap some benefits from it.”

“Benefits?” Luo Feng frowned. “The willpower of origin has given its promise: inheritance, treasures, or even the release of Teacher Origin. Everything is possible.”

“Those are no benefits at all.” Sitting Mountain Guest shook his head. “Treasures and all... To the willpower of the origin, these are merely some of the countless treasures left behind since long ago. It has no use for them, so it was randomly tossing some over to you. As for releasing Teacher Origin? That poses no threat to it at all. That’s why it was willing to do so.”

Luo Feng quickly asked, “Then what benefit should I ask for?”

“The greatest benefit,” Sitting Mountain Guest said in a most solemn manner. “Combining one’s consciousness with the primal universe origin. By doing so, one can personally experience what it is like when the primal universe undergoes a cycle of destruction and renaissance. First, you destroy the primal universe. Then you let the primal universe undergo rebirth.”

“Combining one’s consciousness with the primal universe origin?” gasped Luo Feng. “To personally experience destruction and renaissance?” Luo Feng was taken aback.

The very notion was incredible.

#### **Chapter 1414: The Food of Sector Beasts**

“No miniature universes can compare with the original universe, and not even the World of Jin can compare with the original universe.” Sitting Mountain Guest looked at Luo Feng. “Every one era of the original universe contains the ultimate mystery. Even if I want to get into the origin, the original universe won’t let me do that. It would rather let Teacher Origin go than let you get the opportunities. However... Between the threat of the Sector Beasts and giving you a great opportunity, I think it will make the best choice.” Sitting Mountain Guest looked at Luo Feng. “Actually, I envy you, but there’s nothing I can do.”

Luo Feng was confused. He could sense that Sitting Mountain Guest meant to say something else. The accomplishments he had now, and the inheritance from Duan Dong River, plus the sealing task in the World of Jin, should have all been beyond Sitting Mountain Guest’s expectations. These accomplishments empowered him greatly.

“Teacher,” said Luo Feng.

“Huh?” Sitting Mountain Guest looked at Luo Feng.

“You created the Flame God race and the earthlings,” said Luo Feng. “I never knew why you did that. I owe you so much, and I’ll be forever grateful for you. If you want any help from me, I’ll do anything to help you.”

Sitting Mountain Guest looked at Luo Feng and laughed. “Look around, Luo Feng.” Sitting Mountain Guest pointed around.

Luo Feng looked around; the burning fire around this rugged boat was driven away by the cold. The fire was shaking as an invisible force enveloped the area. It was the force of the original mind. Apparently, the original mind had arrived and was angered by some of the things Sitting Mountain Guest had said, yet it couldn’t do anything about it.

“The original mind has arrived. Some things I can say, but something is forbidden, which means even if I want to tell you, I am not allowed to do so.” Sitting Mountain Guest looked at Luo Feng. “Like in Universe Ocean, we can’t talk about inheritance information above true gods.”

Luo Feng nodded.

“It’s not that I don’t want to tell you, but I can’t tell you right now,” whispered Sitting Mountain Guest. “It has something to do with the ancient civilization, and it’s about the biggest secret in Universe Ocean. I can only tell you when it is appropriate.”

“When will it be appropriate?” asked Luo Feng.

“I’m very satisfied with your power now, but this is not the time yet.” Sitting Mountain Guest shook his head. “No need to ask, because I can’t say, even if I want to.”

Luo Feng considered. The ancient civilization? The biggest secret in Universe Ocean? He had long speculated that Sitting Mountain Guest was related to the World of Jin.

“Then I’ll just wait and see,” said Luo Feng.

“Remember,” said Sitting Mountain Guest. “Don’t underestimate the Sector Beasts. It’s wise of you to send your Mosha body to the Sector Beasts’ nest... You haven’t reached the peak of your power yet, but other true gods already have, and it’s difficult for them to break through. Once you’ve become a true god, your power will surge again. Don’t bet everything on it. You’ll reach your peak when you become a true god.”

Luo Feng was shocked. According to his teacher, he wasn’t able to kill those Sector Beasts yet.

“Go,” said Sitting Mountain Guest. “Remember, be careful. This is the fiercest war in Universe Ocean.”

“Okay,” said Luo Feng. He stood up, took a bow, and left.

\*\*\*\*\*

In Ancestral God Palace in the ancestral god secret region, Luo Feng entered wearing a white cape. The guards didn’t stop him, as they all knew who Luo Feng was. The three ancestral gods had said before that Milky Way Horde Leader could enter at any time.

“Ancestral gods.”

Luo Feng walked into the palace, glanced around. The three ancestral gods sat on the thrones.

After a trillion eras, the three ancestral gods from the Ancestral God School had already become true gods! After all, they were highly gifted, which was why they had been chosen to be ancestral gods, and besides, they were favored by the original mind. Now, many true gods were being born in the original universe, so it would be a joke if the three ancestral gods were still universe masters.

“I think the original mind knows my requirement now,” said Luo Feng.

Double-Face Ancestral God sighed. “Requirement? We don’t know what your requirement is, but the original mind is a bit upset now. Do you still stand by your requirement?”

“Yes,” Luo Feng nodded.

Upset? That had nothing to do with him. The original mind had suppressed Teacher Origin—the entire human race was upset! As Sitting Mountain Guest had said, there was no need to be afraid of the original mind, as it had to follow certain rules, and it needed Luo Feng to get rid of the Sector Beasts.

Actually, when his consciousness entered the universe origin, it would be as if he was becoming the original universe, experiencing the destruction and rebirth. It sounded mysterious, but Luo Feng wouldn’t blindly believe everything Sitting Mountain Guest said. After all, he needed to make an avatar to enter the land of origin. Once the original universe started to destroy itself, it could easily kill Luo Feng by attacking the avatars and killing his soul!

This requirement had some risks. Luo Feng had said yes firstly because of one of the top three techniques of Duan Dong River, “Undying River.” After becoming a true god, he would complete

Undying River and leave some blood behind as a backup plan. Even if he was attacked by the original universe and died, he could be resurrected. Of course, that was the worst-case scenario. That original mind needed to follow the rules, so if he didn't provoke it, he wouldn't be killed.

Of course, if Luo Feng wanted to feel the birth and destruction of the original universe, he needed to wait until the end of the original universe. Only then would the original universe be destroyed and born again. It wouldn't destroy itself in advance because of Luo Feng. Besides, Luo Feng hadn't become a true god yet, so he didn't wish for the original universe to be destroyed.

"Since you insist." The ancient ancestral god looked at Luo Feng down in the palace. "Even though it is very demanding, if you, Milky Way Horde Leader, are really able to kill all the Sector Beasts and protect the original universe from being harmed, the original mind will not only let Teacher Origin go, but consents to your requirement. Of course, your requirement can only be met when this universe era ends. Everything the original mind consents to is bound by the operation law, so it won't deceive you."

The voice spread, followed by a blurry ancient ripple, enveloping the entire palace, so it was spread to Luo Feng as well.

"I trust you." Luo Feng nodded.

\*\*\*\*\*

Each of the three universe eras needed to choose a venture to go to the nest of Sector Beasts. It was extremely dangerous, so nobody was willing to go.

Why did I have to go? Why couldn't he go? I would be the only last hope of my race, so if I died, my entire race would die.

There were internal discussions and compromises that would take several years or longer to be completed. It was as Luo Feng had expected. Compared to a trillion eras, a few years was a blink of an eye, so there was no need to rush anything.

\*\*\*\*\*

While the powers in Universe Ocean were selecting who would go, Sector Beast Morosa left Tilted Peak Sector.

Wa!

"This is chaos air! There's no rich chaos air like this in the nest. It's everywhere."

A giant, golden man with a tail stood amid the chaos air. He wore ancient armor, and his body shape looked perfect. His bloody eyes glinted ferociously.

The Sector Beast looked around. He had assumed a shape that was typical in Universe Ocean, and he had godly power, so everyone would think he was a great being from a certain race in Universe Ocean.

Xiu!

Sector Beast Morosa opened his mouth, and all the chaos air flooded in. Suddenly, everything around him became a black hole, and the chaos air kept flooding into his body. It only stopped after a whole day.

“So pleasing! Although devouring other Sector Beasts is still better, I can devour this air at any time.” Sector Beast Morosa was very satisfied. There was chaos air in Tilted Peak Sector, but it was too thin to be significant. “It’s too slow just swallowing this chaos air.”

Sou!

Sector Beast Morosa took a step and started to teleport. It started to tour Universe Ocean. With the map provided by Zhen Jia Emperor and Dragon Rock Ancestral God, it wouldn’t get lost. Besides, there was a strong connection among all the Sector Beasts, so even if it did get lost, it would seek out other Sector Beasts.

\*\*\*\*\*

After half a month of touring Universe Ocean, the golden, towering Sector Beast Morosa was slashing his tail, standing in space, staring at a giant miniature universe in front of him. It had a diameter of 100 million light years. It was enormous.

“Oh, oh... So delicious!” Sector Beast Morosa’s eyes gleamed with madness. He gazed at the miniature universe in front of him with his tail whipping. He was thrilled. “I can actually feel the universe origin of this miniature universe. It will be so delicious. The sensation itself thrills me...”

Sector Beast Morosa was excited. It had eaten other Sector Beasts in the past, and the process was a fiesta. However, the smell of the universe origin in front him made him crave for more. It would be just as fantastic as eating other Sector Beasts.

Eat! Eat!

Sector Beast Morosa was yelling inside, but his brain maintained control.

“I can’t believe the miniature universe is so delicious. According to the two slaves, there are many miniature universes, holy lands, and the original universe. I’m still very weak, and miniature universes have the weakest defense. I can swallow them much more quickly. It might take me a long time to swallow holy lands, followed by the original universe, but the origin of the original universe is limitless. This miniature universe belongs to an ordinary small universe from the first universe era, according to the map. That Milky Way Horde Leader is the biggest threat. As for this true god? He’s very mediocre. I’ll take it as my first meal.”

Sector Beast Morosa thought for a while. He reckoned that the master of the miniature universe before him was weak, so he decided to swallow the miniature universe.

### **Chapter 1415: Firefly True Master**

Sector Beast Morosa was stood in the endless chaos space. The godly power previously emanating from his body had dissipated. Instead, the godly power had been replaced by waves upon waves of wicked black air. The waves of black air surrounded Sector Beast Morosa. Sector Beast Morosa was the center,

there were traces of black light flowing around the sector, forming traces of curves, rushing toward the miniature universe in front of him.

Hua! Hua! Hua! Hua! Hua! Hua!

From the Sector Beast, traces of light mixed with black light shot out. They curved, extending toward the entire miniature universe. Originally, the previous traces of light were all visible. However, when they extended more than 100 million light years long, they all gradually blurred and even disappeared, as if they had integrated with the space around them.

Hu!

Sector Beast Morosa's body trembled, and it closed its eyes, looking satisfied.

Hua! Hua! Hua!

Traces of gleaming light were swiftly transmitted from 100 million light years away along those curves and merged with the point of origin: Sector Beast Morosa.

"Ah, this is what the universe origin taste like? So delicious." Sector Beast Morosa was thrilled. "If Bei Di knew, it would rush here immediately. There are only a limited number of miniature universes, so it'll only take a short while to swallow them all. They'll definitely have time to go back to the nest. I'm so wise. I can't let them know about his. Otherwise, I'll have to share with them."

Sector Beast Morosa was swallowing the miniature universe recklessly, and the colors of the light were more various than rainbows. They were all transmitted to the body of Sector Beast Morosa from 100 million light years away.

Swallow! Swallow! Swallow! It kept swallowing the miniature universe.

Morosa hated the fact that he was so weak. If he was able to swallow all the other Sector Beasts and become the last remaining king, it would be much faster than swallowing these miniature universes.

"Based on the information from the two slaves, this small universe belongs to 'Firefly True Master' from the first universe era. He's only a mediocre true god in Universe Ocean, not one of the eight supreme beings." Sector Beast Morosa understood that Firefly True Master would certainly realize that he was eating his universe origin. It would become weakened, and all the creatures in it would die.

\*\*\*\*\*

In the miniature universe, the Firefly clan wasn't as impressive as the Divine Eye clan or the skeleton clan, as they only had one true god. Inside the miniature universe where Firefly True Master and his race lived, there were many dimensions, and the core dimension housed lots of undying fighters, universe knights, universe masters, and the only true god: the supreme being of the Firefly clan, Firefly True Master! Inside the core dimension was the glowing ancestral palace where Firefly True Master lived.

Hu... Hu...

Firefly True Master occupied an area deep in the ancestral palace. He was deep in sleep, and in his state of unconsciousness, he was able to comprehend the laws as quickly as possible. It was silent in the ancestral palace, as nobody dared to bother him.

Finally, Firefly True Master, who was covered in gray, opened his eyes. His hundreds of hoofs stood up, and so did his entire body. On each section of his body was a piece of gray armor.

“What is...?” Firefly True Master’s face was covered with wrinkles. The sole eye in the midst of his wrinkles glinted with anxiety. This was something it had never felt before. “The origin of the miniature universe!”

Firefly True Master immediately realized what had happened. The origin of the miniature universe—the origin that sustained the entire miniature universe, the origin that contained the core and the most mysterious power—was being steadily weakened, as if something were swallowing it. And it was being swallowed fast.

However, the miniature universe was enormous! Although its origin was constantly being devoured, it was still able to last for three to five minutes. Yet it was being constantly swallowed, and at this speed, the origin would be sucked dry in the next eight to ten days. After that, his entire miniature universe would crumble.

“No! Definitely no!” Firefly True Master was furious. “Why is the origin of my miniature universe being consumed? Why? No true god has ever encountered something like this...!”

Firefly True Master was suddenly dazed. He recalled that a trillion eras before, when the fourth Land of Extremis, the World of Jin, had just appeared, the original mind had told everyone about the terrifying being known as the “Sector Beast” through the three ancestral gods! They had mentioned that Sector Beasts would destroy and devour everything.

“Is it a Sector Beast?” Firefly True Master was shocked. “A Sector Beast is eating my small universe?”

Firefly True Master was truly terrified. Although he had many techniques and no true gods could be considered mediocre, he was only an average true god. He didn’t even have a machine-type valuable! He had left after spending millions of eras in the World of Jin. Of course, he had obtained three supreme true treasures.

“Nobody has seen Sector Beasts in Universe Ocean yet. Am I the first target?” Firefly True Master was worried. He then decided to sense carefully.

Hong! Long!

The membrane of the miniature universe permeated the strength of the universe origin, and that strength immediately sensed the existence of another type of energy.

“That way.” Firefly True Master turned around his head, looking to a direction as if he could see the outside of the universe.

“Come in, all universe masters!” Firefly Master yelled.

His voice echoed in the ears of all universe masters from the Firefly race, and they all rushed toward the ancestral palace either by transportation or teleportation. After less than ten seconds, all the universe masters had arrived, and they flew toward the palace.

All the universe masters flew in.

“Ancestor.” All 13 universe masters were respectful. They were the 13 universe masters who had entered the World of Jin and had been through training in the World of Jin. They had all left their original bodies or avatars in the small universe. At the start, all 13 universe masters had entered the World of Jin, following most of the other powers in Universe Ocean, but by now, most of them had left.

“You must all know about Sector Beasts.” Firefly True Master looked down.

The universe masters from the Firefly race who were standing in the palace were all looking at each other.

“I don’t have time to elaborate, but I suspect that the Sector Beasts have come out, and one of them is right outside the miniature universe of our race. It’s devouring the origin of my miniature universe!” said Firefly True Master anxiously. The news horrified all the universe masters.

Firefly True Master gave a direct order: “Control Dark, you have an energy body, and you’re not afraid of soul attacks. Now, you send your body out of the miniature universe, and I’ll escort you to the universe membrane. When you get there, you can just follow the direction I give you and teleport out. Inspect what is happening carefully. This concerns the fate of our race, so you must be careful.”

“Okay,” answered Control Dark Master, who stood down there. “I am prepared to die trying.”

\*\*\*\*\*

The other body of Control Dark Master, who was living elsewhere, was transported outside the universe membrane by Firefly True Master. That was where Firefly True Master sensed the strange energies coming from.

Control Dark Master, who was dark with two purple antennae and covered with a shell, went out of the universe membrane, looking at the endless space outside.

Sou!

It then flew in a straight line along the direction specified by Firefly True Master. He teleported and inspected the area carefully. He teleported again and again, inspecting his surroundings again and again. Though there were many curves, the chaos space was massive and filled with chaos air, so it was impossible to see clearly over a long distance.

“I have a very strange feeling about this.” Control Dark Master kept teleporting.

He felt like he was being suffocated, as if he were entering another dark world. Little did he know that Sector Beast Morosa was performing its inherited techniques and swallowing the origin, and the area around the Sector Beast was terrifying and suppressive.

“That direction!” The stronger it got, the more easily Control Dark Master could decide on the direction. Finally...

Hua!

Control Dark Master, who was tiny and dark, showed up in out of nowhere. He looked in front of him and was able to see the curves connecting, all pointing toward the same spot. Each curve was gleaming, and all the bright light entered a common point.

“That is...” Control Dark Master saw the spot in the distance. It was a towering, golden creature in humanoid form. It had a tail, and it was looking toward Control Dark Master with its bloody eyes.

“Fragile but delicious food,” the creature said as it spotted Control Dark Master.

Control Dark Master immediately confirmed, “Ancestor is sensing the whole thing correctly—it is indeed swallowing the origin... It must be a Sector Beast.”

Control Dark Master wasn't afraid at all, as he had already prepared to die when he had decided to come here. Even if he lost this body, the greatest loss he could suffer was some energy.

Hong!

Suddenly, a black curve of light arrived and covered Control Dark Master. A powerful swallowing force penetrated Control Dark Master.

“No!”

Control Dark Master immediately burned his godly power and performed the first level of godly power burning technique. However, it was completely swallowed after only a few seconds.

“It's only a universe master, and it is too weak,” said Sector Beasts Morosa. “That so-called strongest great being in Universe Ocean, Milky Way Horde Leader, is also only a universe master. Even if he's 100 times or even 1,000 times stronger than this one, I can also kill him instantly. Perhaps the great beings in Universe Ocean are weaker than I thought.”

Sector Beast Morosa's eyes were gleaming with madness and greed.

\*\*\*\*\*

Inside the ancestral palace of the miniature universe.

“Ancestor, it's indeed a Sector Beast at the end of your directions,” said Control Dark Master. “The Sector Beast is enormous and has a tail. There are traces of light emanating from that Sector Beast, extending toward the space. I think the light is devouring the origin. My body was immediately swallowed by a trace of light, even though I burned my godly power to resist it.”

Firefly True Master was shocked. “A Sector Beast! It is here! We must tell all the races from Universe Ocean. I alone might not be able to resist it. Tell all the races in Universe Ocean that a Sector Beast showed up outside the miniature universe of Firefly race.” He commanded his followers to tell all the true gods they could.

“Yes, Ancestor.”

The universe masters all began spreading the news. This time, they needed help!

## **Chapter 1416: The Great Army of Universe Ocean**

Primal Universe, within the borders of Ganwu Universe, Milky Way Holy Land.

The present-day Milky Way Holy Land was known as one of the two major centers of the human race. One center was the primal secret region. The other was Milky Way Holy Land. As the human race was now powerful enough, Remote Ocean was no longer required to stay within the primal secret region. This was why Luo Feng had first shifted it into a god country before changing it again from a god country to Milky Way Holy Land.

With the endless Remote Ocean, Milky Way Holy Land had six true gods and over 100 universe masters; it even had universe knights and countless undying fighters. It was where Luo Feng, the number one master of Universe Ocean, resided. The entire Milky Way Holy Land had already been expanded, with various clusters of palaces in undulating waves all over. Amongst them, there was a vast piece of the starry land that belonged to Hong, and another vast piece belonged to Fire Dome. These two lands already occupied close to the entire Milky Way.

“Fire Dome.” Luo Feng, garbed in his white robe and walked along the corridor of the void space. Following close behind him was a youth with long, red hair. He might have seemed like a youth, but he was actually “Fire Dome True God”, the illustrious super talent whose teacher was Luo Feng, the number one master of Universe Ocean.

“Teacher,” Fire Dome said, bowing with reverence.

Luo Feng spoke as he walked. “I imparted to you the inheritance of the pulse of Jie Fanzi and also the inheritances of various pulses of the World of Jin. You are, unquestionably, extremely gifted. Your secret technique has also attained an extremely high level of achievement. However, your willpower is apparently hindering your path to perfection. Right now, your willpower is only at the true god level... As a true god, this level of willpower is much too weak.”

“You disciple understands.” Again, Fire Dome bowed reverentially as he responded.

Inwardly, Luo Feng lamented. Both he and Hong were from the pulse of Earth. As great beings from Earth, so long as they were outstanding figures, their willpower should have been more determined and powerful. But this second disciple of his was relatively weaker in this respect.

“When the next era is here, you will head for the World of Jin. I will make the necessary arrangements. Going there will allow you to hone your willpower. If your willpower can be increased to the void space level, I can start imparting willpower secret techniques to you.” Luo Feng gave Fire Dome one brief glance.

Immediately, Fire Dome became extremely excited and said, “I will definitely do my best and not disappoint you, Teacher.”

He could not forget that back when he had first become a true god and went to the World of Jin to hone his skills, he had considered himself to be among the top tier of true gods. He was full of confidence. In light of this, facing his Teacher—named “Number One Master of Universe Ocean”—he was eager for a chance to learn through sparring.

Luo Feng saw through his thoughts with a mere glance and said, “You can try. Put in all you’ve got.”

So Fire Dome executed his secret technique of blazing his godly power and made use of his automaton-type treasure as he readied himself as thoroughly as he could.

Yet all it took was one look from Luo Feng!

One single look, and Fire Dome instantly felt as though the time and space around him vanished. What remained were only those incomparably terrorizing eyes that could drown out everything in a fleeting moment. Right away, Fire Dome lost consciousness and crashed to the ground!

Every time he recalled his first time facing Teacher... Just one look from Teacher, and he had been knocked out right away! Fire Dome had always found the willpower secret technique from Teacher's set of knowledge overwhelming. Yet, at the same time, he yearned to learn more about it. The numerous disciples under Luo Feng all knew that their teacher had an extremely powerful willpower secret technique, yet up until now, none had been able to inherit it.

According to Luo Feng, "It is not me refusing to impart the technique to you. It is just that for all of you, your willpower simply does not reach the threshold for cultivating the technique."

What a stinging remark!

"Huh?" Luo Feng's expression suddenly changed.

"Teacher...?" Fire Dome was in doubt as he started to ask a question. Then he too showed a change in expression as he exclaimed in shock, "Sector Beast!"

"Sector Beast..." Luo Feng said slowly. "Finally, it's here."

Then Luo Feng looked up.

Far in the distance, a figure appeared. It transformed into a streak of flowing light and sped toward Luo Feng. Very quickly, the figure descended. This black-haired man garbed in a black robe was none other than Hong.

"You sensed it, too?" Luo Feng nodded. "Big brother and Fire Dome, both of you have to come along with me. We will go look for Firefly True Master."

Hong walked over, shaking his head while sighing. "Previously, I suffered a loss because of this Sector Beast. Who would have expected another Sector Beast to appear in such a short time? I'm afraid the reason is because Eye Devil God and I went over to their territory. Thus, those Sector Beasts also thought about the idea of coming out. Only after you have truly fought against one will you understand how truly terrifying these Sector Beasts are. Luo Feng... This time, we really need to depend on you."

"Let's wait and see first. No one knows exactly how strong this Sector Beast is." Luo Feng instantly waved and—Hua! A nine-story tower appeared. "Let's go."

Luo Feng was the first to walk towards the doors of Star Tower, with Hong and Fire Dome closely behind as all three entered. At that moment, another figure was approaching from the distance. It was Moshabody, and it, too, followed the rest, entering Star Tower.

Luo Feng was exercising extremely high vigilance. Even though he had many treasures with him, in terms of defense, Star Tower was still extremely powerful. His Remote Ocean body and Moshabody had set off at the same time. And even if Moshabody were to lose and perish in the war, Remote Ocean body could still take over the treasures left behind by Moshabody after it was destroyed.

\*\*\*\*\*

“Divine eye.” Amidst the chaotic airflow, Luo Feng and company were on board Star Tower, rushing their way to Firefly True Master. Luo Feng took out a transmission token. “What? You are unable to make your way there quickly?”

“Milky Way, these Sector Beasts have appeared outside Firefly True Master’s miniature universe. No one knows exactly how many have come to Universe Ocean. It might be quite a few. If we all set off for Firefly True Master’s miniature universe at the same time, what if other Sector Beasts suddenly appear and charge into my miniature universe...? I would not be able to rush back in time. This would spell big trouble. I have already sent two of my true gods, who are rushing over now. After all, even if we discover the presence of Sector Beasts, we need to alert all the groups of powers from Universe Ocean into leaping into action.”

Luo Feng understood his point of view. It was similar to why he left his Golden Horned Beast body in the primal universe. He could disintegrate another body of himself anytime he wanted and bring it back to its original form when it was within the endless Remote Ocean.

“Nine-Headed, all right, all right. I am rushing over too,” said Luo Feng, transmitting his instructions to another top-tiered great being. “Your miniature universe is also near Firefly Master’s miniature universe. You make your way over first and keep the situation under control. I will rush over as fast as I can.”

Of the eight great overlords of Universe Ocean, Luo Feng served covertly as the leader, and at that very moment, he was speedily trying to establish contact with every single one.

This time, out of the eight great overlords, three were rushing over. Other than those three, there were many other true gods. For instance, from the human race itself, as many as seven true gods were rushing over. Clearly, this was the first time a Sector Beast had made an appearance in the Universe Ocean, as the various powerful groups were exercising extreme caution and vigilance.

\*\*\*\*\*

The various true gods were all at different distances from Firefly True Master’s miniature universe. Some were near, while others were very far away. Luo Feng, who had set off from the primal universe, would have been considered to be very far away.

After all, among the three reincarnation eras, numerous true gods’ miniature universes from the first reincarnation era were far from the primal universe. They were scattered far, and even within the first reincarnation era, distances between the various miniature universes differed. Some were closer to one another, some were equally distant from one another.

Time continued passing by, and around the membrane wall of Firefly True Master’s miniature universe, almost half of Firefly True Master’s meandering body was out of the membrane wall as it gazed far into the distance.

“No! Loathsome.”

Firefly True Master was very anxious. It could clearly feel the origin of its miniature universe being continually eaten away. It was the most fundamental form of encroachment. It was almost impossible to

recover; an immeasurably long period would be required just to recover to only a small degree. That was also why the willpower of the primal universe origin was so dreadful.

“What should I do, what should I do?”

Firefly True Master was filled with anxiety, but it did not dare leave without even a single automaton-type treasure—especially when Control Dark Master, who was under its command, had been swallowed the moment it encountered that Sector Beast. This further eroded Firefly True Master’s confidence.

“Ancestor.”

By his side, there were several other universe masters from his Firefly clan.

“Ancestor, even if the various parties are rushing over, they are, after all, rushing from all corners of Universe Ocean. They will need time. The number one master of our Universe Ocean, Milky Way Horde Leader, will need to travel from the primal universe.”

“Milky Way Horde Leader will not be able to make it in such a short time.”

“The nearer they are to us, the faster they will be able to make it here. However, those nearer to us might not come. Some of the true gods are worried that they, too, might get attacked by the Sector Beast.”

These universe masters were all very anxious too.

\*\*\*\*\*

“Hahaha...”

Amidst the void space, Sector Beast Morosa stood tall. Rays of distorted light penetrated the endless void space to swallow the origin of that faraway miniature universe.

“How gutless,” said Sector Beast Morosa. “The origin of his own miniature universe is being swallowed by me. How can that Firefly True Master possibly be unaware? In the very beginning, he had sent one universe master over to look into the matter. Yet since then, there hasn’t been a single move made. Obviously, it was fearful of me, and thus, did not dare to deal with me. Haha! It seems I have overestimated Universe Ocean. I’m afraid the various races of Universe Ocean are pretty weak after all.”

Sector Beast Morosa was exhilarated. It had prepared well for a war, but it had not expected that, even after waiting for quite some time, Firefly True Master would make no move other than to send a universe master to probe around. After that, it had made no further moves.

\*\*\*\*\*

Firefly True Master was truly anxious.

A piece of news was transmitted over. “Firefly, I have arrived.”

One of the clawed hoofs of Firefly True Master grasped a transmission token, and the moment it received this news, it was instantly delighted. “Blood Orchid, you are here? I have been so worried. Some of the other true gods are either scared or worried about their own universes and simply stayed

away from here. There are others who are rushing over from very faraway places. Blood Orchid, my coordinates are..." Firefly True Master was extremely agitated.

"I will be there immediately," came the reply.

Firefly True Master was very excited as he looked around. "Blood Orchid Ancestor will arrive soon."

"Blood Orchid Ancestor?"

"With Blood Orchid Ancestor here, things will be much better."

"Blood Orchid Ancestor and my Firefly clan did share a relationship with one another, and when such something happens, she is the first to come and help. As for the other three miniature universes nearest to us, not a single one came."

The universe masters all sighed while lamenting how true friends could be identified only at the most crucial moments.

A short while later—

Hua!

A black, triangular tower teleported over and appeared in the vicinity. Then it flew over rapidly. Firefly True Master raced to receive it as it came to a halt and a towering figure walked out. She was surrounded by countless crimson flowers, looking very finely adorned. It was her: Blood Orchid Ancestor!

Back when the World of Jin had yet to emerge, three true gods had frequently stayed around the black-striped stone pillars. They were Bei Chi Star Master, Blood Orchid Ancestor, and Rampaging Devil God. When the World of Jin had emerged, Blood Orchid Ancestor had made her way there, as expected. After spending a period of time honing her skills, she had become more powerful. In terms of power, she was not far below the eight major overlords. If the eight major overlords were said to be the top-notch team, she would have been regarded as second only to them.

Her greatest advantage was her body. As a plant life form, Blood Orchid Ancestor had a massive body. At the moment, she took the form of a woman surrounded by flowers. However, that was only a transformation that she took on. It was not her original look.

Previously, she had spent quite a long time at the black-striped stone pillars, so her willpower was extremely strong, too.

"Me?" Blood Orchid Ancestor looked in the distance at the numerous universe masters of the Firefly Clan, then turned toward Firefly True Master with a dubious look. "It's just me alone?"

Firefly True Master wandered over and said a bit awkwardly, "The other true masters were quite far away, so they have yet to arrive. Milky Way Horde Leader, Nine-Headed Demon Master, and Nine Remoteness True Master are also in the process of rushing here now."

## **Chapter 1417: Fight**

They're all on their way? Blood Orchid Ancestor thought. Let's wait. We'll wait until they all arrive.

Firefly True Master felt that the origin of his miniature universe was being swallowed. The situation would be grave after five days, but he was far from crumbling. Besides, even he wasn't brave enough to fight the Sector Beast, so he didn't want to ask Blood Orchid Ancestor to do that.

\*\*\*\*\*

Days passed. Even an era was like a blink of an eye to true gods, not to mention a day. They all thought that the miniature universes were very close to each other, yet now, Firefly True Master was resentful that the distance between miniature universes was too large. If only his miniature universe was close to the original universe!

"Ah!" Firefly True Master couldn't have been more worried.

The fourth day after the Sector Beast started to devour the origin of his miniature universe, there were already four true gods outside it. Two of them were from the first universe era while the other two were from the second universe era.

"Everyone," Firefly True Master said, looking around at Blood Orchid Ancestor, surrounded by red flowers, a true god from the skeleton race who was tall but made up of bones, and a blurry being made of water. These true gods were all looking at Firefly True Master. They did not act. "Everyone," he said again, anxiously. "That Sector Beast is eating the origin of my miniature universe really fast. Half of its origin is already gone. If we let it continue, even if my miniature universe can survive, I won't have any chance to transcend incarnations if my origin is destroyed."

"Firefly, do you really think we are enough to deal with that Sector Beast? If we could, the original mind wouldn't make such a scene and ask for help from the entire Universe Ocean."

"Let's wait, Firefly. Let's wait until Nine-Headed Devil Master arrives. He's one of the eight great overlords, so we can just follow him."

"We alone can't be of much to help."

They were indeed friends, but even Luo Feng had decided to let his Moshu body go and die when fighting Sector Beasts. Clearly, all the great beings in Universe Ocean were being careful. They didn't dare to underestimate the enemies.

"Firefly, you can go yourself. Be careful and stay in the supreme true treasure palace. As long as you stay in there, you can at least survive."

\*\*\*\*\*

Three great overlords were rushing there this time: Milky Way Horde Leader, Nine Remoteness True Master, and Nine-Headed Devil Master.

Milky Way Horde Leader and Nine Remoteness True Master were from the original universe era, so it would take them a long time to arrive. Comparatively, Nine-Headed Devil Master was much closer.

\*\*\*\*\*

The eighth day after the Sector Beast started to devour the miniature universe origin.

“Should I go or not...?” wondered Firefly True Master.

He felt like he was losing his mind. He feared that his universe origin couldn't last long. However, if he went to fight the Sector Beast alone, he might be killed instantly. Including Firefly True Master, there were already eight true gods.

“It's been such a long time.”

“Our ancestor might not be able to hold it anymore.”

All the other universe masters from the Firefly race standing aside were worried. However, when it came to fighting Sector Beasts, they, as universe masters, couldn't do anything to help. After all, with burning godly power techniques and machine-type valuables and so on, the power gap between universe masters and true gods was vast. Even 100 universe masters couldn't rival one true god. How many universe masters were there in Universe Ocean? If there were more than 100, they might have been able to help, but there were only a limited number. Which meant that when it came to fighting Sector Beasts, universe masters weren't able to help whatsoever. The weapons of choice were true gods.

Of course, Luo Feng was an exception. Luo Feng had the inheritance from Duan Dong River, and he also had the inheritance from the World of Jin. (The Godly King of Jin had died, and with Luo Feng's authority in the World of Jin, he could read all the inheritance he wanted.) He alone had two supreme inheritances, which would have made many great beings jealous—even within the ancient civilization.

Hong!

A gleaming golden spaceship appeared out of nowhere and flew toward the miniature universe like a streak of light. After seeing that golden spaceship, all the true gods, including Firefly True Master, were exhilarated.

“It's Nine-Headed Devil Master.”

“It's Nine-Headed Devil Master.”

“It's the spaceship of Nine-Headed Devil Master.”

All the true gods were overjoyed, and Firefly True Master was elated. He swung his body and flew toward Nine-Headed Devil Master, yelling in excitement, “Nine-Headed Devil Master! I've been waiting for you!”

A towering being exited the spaceship. He had the body shape of a human being, and he was tall and built. However, on his neck were nine distinct heads, and each one looked ferocious. The head in the middle was larger than the other eight heads. All of them glanced toward the eight true gods. He was Nine-Headed Devil Master.

The natural appearance of Nine-Headed Devil Master was actually that of a strange beast with four hoofs and nine heads. However, after entering the World of Jin, he had found out that the creatures in the World of Jin were divided into tribal warriors and strange beasts. Since there were tribal warriors

from the World of Jin who had nine heads, Nine-Headed Devil Master had altered his form into a humanoid shape.

“Nine-Headed Devil Master,” everyone greeted.

“I’ve talked to both Milky Way Horde Leader and Nine Remoteness True Mater.” Nine-Headed Devil Master stepped through space with large steps. He was rumbling, and all the other great beings shut up to carefully listen to him speak. He looked around. “They’re heading here from the original universe. Firefly True Master is from the first universe era, so his miniature universe is too far away. It might take him several days to arrive.”

“Devil Master,” said Firefly True Master anxiously, “by the time Milky Way Horde Leader and Nine Remoteness True Master get here, my miniature universe may have already crumbled, and even if it hasn’t, the origin might be dried out already.”

“You’ve already told me that, Firefly True Master,” said Nine-Headed Devil Master solemnly. “This Sector Beast is indeed able to swallow the origin of a miniature universe quickly. It’s been only eight days... If your miniature universe was any farther away, even I might not have been able to make it.”

All the other universe masters present nodded seriously.

“The First True Master also said that the Sector Beast is indeed dangerous, and the worst-case scenario, there might be more than one at a time.” It was a true god from Divine Eye race with a single-eyed phantom who was talking. There were two true gods from Divine Eye clan there at the moment.

“That’s right, I’ve talked to Divine Eye as well.” Nine-Headed Devil Master nodded.

“Devil Master... If we wait any longer, I—I...” Firefly True Master was exceedingly worried, and the universe masters behind him were also gazing expectantly at Nine-Headed Devil Master. They didn’t have a say in any of this.

Nine-Headed Devil Master nodded. “Relax. Milky Way and Nine Remoteness can’t make it in time, but we can’t wait any longer. We need to strike now... Theoretically, there’s still a long time before this universe era ends, so this Sector Beast shouldn’t be very powerful. If we cooperate, we can deal with it. And even if we can’t, we can at least survive that Sector Beast.”

Everyone agreed. Yes. Nine-Headed Devil Master was one of the eight great overlords. Even Illusion Heart True God and Divine Eye True Master could survive the nest of Sector Beasts, not to mention Nine-Headed Devil Master.

“I’ll fight the Sector Beast first,” said Nine-Headed Devil Master. “I’ll fight it so that it isn’t able to swallow the origin of the miniature universe. In that way, I can stall time. When Nine Remoteness and Milky Way get here, we can kill it with one shot.”

“Yes.”

“Sounds great.”

“We just need to stall time, and when Nine Remoteness True Master and Milky Way Horde Leader get here, we’ll definitely win.” The assembled true gods weren’t afraid at all now.

Nine-Headed Devil Master nodded. "Okay. Let's act together. However, Firefly True Master, you'll be the vanguard."

"Vanguard?" Firefly True Master, whose face was covered with wrinkles, appeared dazed.

"This is your miniature universe. Do you expect other great beings to attack first?" Nine-Headed Devil Master turned around and looked at him. "If you don't want to do it, we can just wait here and let your miniature universe be eaten by that Sector Beast... We can wait until Milky Way and Nine Remoteness get here. It's safest to make attacks together."

Firefly True Master said instantly, "I'll be the vanguard."

"Okay, let's go!" Nine-Headed Devil Master said directly.

Hong! Hong! Hong! Hong! Hong! Hong!

Everyone was taking a supreme true treasure palace, and only those from the same race—like the two true gods from Divine Eye clan—shared a supreme true treasure palace. As for those who were from different races, they all sat in their own palaces.

With Nine-Headed Devil Master in the lead, they all teleported together.

\*\*\*\*\*

The Sector Beast with a golden body and a tail was extending curves from its own body toward space, swallowing the universe origin. Sector Beast Morosa was quite relaxed.

"Huh?"

Suddenly, Sector Beast Morosa was startled. The area covered by its inherited technique could sense that a team was charging toward him, and the team was composed of nine great beings.

"Finally?" Sector Beast Morosa's eyes glinted ferociously. "I thought they were weak, but it seems they're as powerful as my two slaves. Just come. I haven't eaten any lives from Universe Ocean."

Suddenly, all the supreme true treasure palaces showed up, and the space condensed. Apparently, the space was sealed. Nobody could teleport to flee.

### **Chapter 1418: Encircle the Sector Beast**

Nine-Headed Devil Master let the group of true gods and arrived at where the Sector Beasts resided. They spotted the giant, golden being with a single glance.

"Is that a Sector Beast?" Nine-Headed Devil Master, Blood Orchid Ancestor, and the other true gods were all careful.

"Hahaha..." Traces of bent light shot out of the Sector Beast in the distance, penetrated space. At the same time, it started to guffaw, and its voice echoed the entire space. "Are you the true gods from Universe Ocean? And you're here to kill me?"

Nine-Headed Devil Master and other true gods, standing opposite it, were on high alert.

“Firefly True Master!” yelled Nine-Headed Devil Master, transmitting his voice. “You go first!”

Firefly True Master was reluctant to do so, but he didn’t have a choice. After all, it was his miniature universe origin that was being swallowed.

Hong!

Firefly True Master drove a spaceship and rushed toward that giant Sector Beast in the distance.

“Sector Beast, you’re not staying in your nest. Instead, you came out and you’re trying to swallow my miniature universe? I’ll kill you!” Firefly True Master was yelling furiously, and the voice was rumbling. At the same time, the spaceship became a gleaming streak of light, launching itself to strike Sector Beast Morosa in the distance. Yet Sector Beast Morosa didn’t even try to dodge it.

Peng!

The front of the spaceship hit the body of Sector Beast Morosa. Its body caved in, but it immediately recovered and smacked the spaceship away.

“You are the owner of the miniature universe I am swallowing?” Sector Beast Morosa giggled. “Poor food. You don’t even dare to come out and fight me?”

“Firefly True Master!” Nine-Headed Devil Master in the distance sent a message through the communications token in his head. “What are you waiting for?”

He had asked Firefly True Master to be the vanguard because he wanted to test the power of this Sector Beast. If he kept hiding in his spaceship, he would indeed stay safe, but it would be impossible to test the real power of the Sector Beast.

That message made Firefly True Master both fearful and enraged. He looked at Sector Beast Morosa out there, and his eyes produced fire! He was full of resentment. Everything that was happening now was because of this Sector Beast!

“Sector Beast, you deserve to die!” Firefly True Master roared.

Hua!

His body swung and flew out of the spaceship instantly. His body was long and wriggling, and it had hundreds of hoofs. Each hoof was sharp—clearly intended to be weapons. It had also prepared true god level valuables that were suitable to it so that it could wield its pinnacle power.

Hong!

Godly power burning technique!

Hong!

Dimming white light surrounded the area. It was a domain-type supreme true treasure!

“Die!” Firefly True Master had lost his mind, and at this moment, a blurry but ferocious phantom appeared in the space around him. He raced toward Sector Beast Morosa.

“Haha...” Sector Beast Morosa guffawed.

Suddenly, a raging and terrifying soul attack penetrated the body of Firefly True Master. The powerful attack made Firefly True Master howl, and the attack it had been planning to unless was disrupted. Sector Beast Morosa was still guffawing. Suddenly, long arms extended from its body. Dozens of arms extending from its body, and they all slapped at Firefly True Master.

Although Firefly True Master howled, he was able to bear the pain, and he raced toward those arms. Each hoof on its body was a terrific weapon, and his claws tore the space apart, containing endless power.

Peng! Peng! Peng!

The arms of Sector Beast Morosa and the hoofs of Firefly True Master were striking against each other. The fight was a nail-biter.

\*\*\*\*\*

Huh? Nine-Headed Devil Master thought. Firefly True Master is only at a slight disadvantage?

The other true gods all started to transmit their voices. "Compared to other true gods in Universe Ocean, Firefly True Master is only mediocre. However, he's only slightly weaker than that Sector Beast."

"Not surprising, actually. The original mind said that true gods were able to fight Sector Beasts. Although Firefly True Master doesn't have a machine-type valuable, he has a soul-type supreme true treasure, a supreme true treasure armor, and a domain-type supreme true treasure. When it comes to close combat, he's much better than Eye Devil God. Besides, Eye Devil God and Illusion Heart True God were attacked by three Sector Beasts at the same time, but we're only facing one Sector Beast right now."

"That's right. The Sector Beasts are trying to swallow each other in their nest. Some must be stronger than others. This Sector Beast who got out might be a weaker one."

All the true gods relieved. Of course, deep down, they were still on high alert.

"How? Firefly True Master!" Nine-Headed Devil Master transmitted his voice. "All true gods, act together. Don't be reckless. Help each other out. Let's kill this Sector Beast together."

"Okay!"

"Let's act together!"

When the other true gods heard the order, they didn't try to run away from it. They had already had so many true gods acting at the same time, and before, Illusion Heart True God and Eye Devil God had acted together. They were only two beings. Now, there were nine of them, and Nine-Headed Devil Master was here to lead them. They had nothing to fear!

"Kill!"

"Let's go kill that Sector Beast!"

All at once, those eight true gods, including Nine-Headed Devil Master, charged at the Sector Beast like streaks of light. In the distance, Firefly True Master, who was fighting Sector Beast Morosa, was also exhilarated.

“Let’s cooperate and kill that Sector Beast!” he said.

\*\*\*\*\*

A door with dimming white light opened in space. The door opened gradually, and a black thread shot out of that door, reaching right at the front of Sector Beast Morosa.

Chi! Chi! Chi!

Two traces of golden light showed up in space, and the two traces of golden light intertwined with each other. They were like scissors, cutting everything in their path, and they rocketing toward Sector Beast Morosa.

Bloody flowers also showed up, and they all flew toward Sector Beast Morosa, trying to envelop it. Invisible soul attacks also shot toward it.

\*\*\*\*\*

As all the true gods flew toward the Sector Beast, they performed some long-distance techniques, attacking Sector Beast Morosa.

“Ah!” That Sector Beast Morosa was attacked by many true gods at the same time, and it howled. The golden armor formed by its energies was already eroded, and bubbles formed on the armor. Its own strength was resisting the godly power, and they were annihilating each other.

Sector Beast Morosa looked around. It blasted Firefly True Master away, who was striking at him, and then it bellowed, “You’ve infuriated me! You are food, and you should realize that you’re no better than food!”

“Kill it!”

“Kill!”

The true gods ignored Sector Beast Morosa, but at the same time, they couldn’t help but think that this Sector Beast was a moron. It was a being who represented destruction from birth, so they couldn’t underestimate it—not even a little bit. They were all trying their best to attack the Sector Beast. However, Nine-Headed Devil Master opted to observe it instead of wielding his power.

“Die!”

“Sector Beast, you die!”

All the true gods surrounded the Sector Beast and performed their techniques.

Blood Orchid Ancestor was the most powerful out of all the true gods. Blood Orchid Ancestor had an enormous godly body, and one vine after another extended from its body. On each of the vines was flowing black light, which came from a set of machine type valuables she had obtained from the World of Jin that perfectly fit her techniques. Those vines with black light all extended toward Sector Beast Morosa, seeking to wind around it.

Close combat, distant attacks, and binding... Sector Beast Morosa felt that it couldn’t resist the surrounding true gods any longer.

I originally wanted to conceal my power and tempt all those true gods, thought Sector Beast Morosa, but I didn't realize that they were all so powerful.

Sector Beast Morosa was stunned that it had been encircled like this. Apparently, Blood Orchid Ancestor and the others were much more powerful than Firefly True Master.

Sector Beast Morosa went mad. It was surrounded by eight true gods.

The most powerful true god, Nine-Headed Devil Master, was observing that Sector Beast.

"It's indeed powerful," said Nine-Headed Devil Master, thrilled. "It's being encircled by eight true gods, yet it's only at a slight disadvantage. Even compared to the eight great overlords in Universe Ocean, it is only slightly weaker. If those Sector Beasts keep getting stronger, in the future, none of us other than Luo Feng will be able to rival these Sector Beasts. Let's kill it first."

Nine-Headed Devil Master finally started to wield his power after observing the Sector Beast for a while.

All nine heads of Nine-Headed Devil Master raged. The nine faces produced a series of strange yet distinct voices, each one yelling furiously. All of a sudden, another twisted portal in space, and all nine twisted portals intertwined with each other. The intertwined portals formed a peculiar picture, which extended toward Sector Beast Morosa.

"Die, Sector Beast!" After a furious roar, light emerging from the entire body of Nine-Headed Devil Master. His whole body turned purple; this effect came from a machine-type valuable.

The peculiar picture formed by those nine twisted portals arrived at Sector Beast Morosa. This drove Sector Beast Morosa crazy. It suddenly raised its head—and it opened its mouth!

No sound came from the Sector Beast. However, that soundless scream pierced directly into the soul of every true god encircling it. Even Nine-Headed Devil Master, who was trying to rush toward it, paused midway. As for the other eight true gods, they all displayed pangs of torment. Even though they were in agony, six of them were still able to barely resist it, but two howled under the invisible attack and could no longer concentrate on fighting the Sector Beast.

"Food is supposed to stay food." Sector Beast Morosa turned around and glared at Firefly True Master.

Hua!

Those curves emanating from Sector Beast Morosa suddenly turned around and raced toward Firefly True Master. They suddenly converged and gathered, enveloping Firefly True Master like a cocoon.

### **Chapter 1419: The Reluctance to Kill**

Streaks of distorted rays of light entangled with one another as they surrounded Firefly True Master, forming a cocoon around him. The cocoon released a black fog.

"Ah!"

Within the cocoon, Firefly True Master was struggling like mad, causing the cocoon to suddenly balloon up. Then, without warning, another spot bulged out, and the bulging of the cocoon at random spots

continued successively while the black fog became all the more pervasive, increasingly spreading outward.

“Save Firefly True Master!” roared an infuriated Nine-Headed Demon Master. At the same time, he was blazing up his godly power rapidly to its limit. Then he transformed into an incomparably dazzling golden light and directly charged at the Sector Beast, Morosa.

Sector Beast Morosa also knew that this Nine-Headed Demon Master was not to be trifled with. He was one of the eight great overlords of Universe Ocean. Once again, it opened its mouth. Soundlessly...

Wa!

The soundless scream was only directed at Nine-Headed Demon Master. Nine-Headed Demon Master was momentarily stunned but recovered fast enough to continue charging toward Morosa. As one of the eight great overlords, his willpower certainly was not his shortcoming. He might not have been Luo Feng’s equivalent, but his willpower had also reached the ultimate limit of a true god of void space. Receiving the impact of the soundless scream, he undoubtedly felt a sharp pain, but he was able to endure its intensity.

“Sector Beast!” Nine-Headed Demon Master’s hands sported sharp, golden claws. The pair of sharp claws was an automaton-type treasure. “Tear!”

Nine-Headed Demon Master roared. Suddenly, the pair of sharp claws acting as his hands expanded and became a pair of sharp claws one million kilometers long. Tearing through the void space and moving along a mysterious trajectory, the sharp claws connected with one another. At that moment, the entire void space seemed to be divided into two sides, one black and the other white. Its sharp claws manipulated these two different sides of void space and descended directly upon where the Sector Beast Morosa was.

“Scram,” said Morosa. Two of the Sector Beast’s palms suddenly surfaced into view, and rapidly, they expanded and grew bigger.

Hong! Long!

The pair of golden claws instantly crashed into those palms. Right away, it grabbed Sector Beast Morosa’s body and suddenly tried to tear it apart!

Hua!

This tearing move was the essence of Nine-Headed Demon Master’s attack. Yet Sector Beast Morosa’s body was like rubber. Even though it was being pulled outward—to a length of ten million kilometers—it was still not torn apart.

The elongated Sector Beast angrily roared, “You are Nine-Headed Demon Master? As expected, you are much stronger than the other fools, but it’s still pointless. You can’t kill me!”

“Save me! Save me!”

From afar, the gigantic cocoon of black fog was emerging into view. The consistent bulging was still very apparent, as Firefly True Master was still struggling like mad from the inside. At the same time, he was relying on a domain-type supreme true treasure for voice transmission.

“All of you, attack that black fog cocoon!” Nine-Headed Demon Master shouted his orders via voice transmission.

“All right!”

“Leave it to us.”

The other seven true gods, upon hearing his orders, immediately attacked the black fog cocoon in a frenzied manner. All at once, the cocoon was bombarded by all sorts of moves. Yet it was tenacious. Every time it was bombarded, the force would only be enough to either cause a temporary dent on the cocoon or cause it to become elongated; there was simply no way it could be torn apart.

Also, the streaks of black light rays from the black fog cocoon were connected to the faraway Sector Beast, Morosa. Morosa was in the midst of maintaining the existence of the cocoon. Thus, the power he had will not be able to

The seven true gods were anxious yet helpless.

“Nine-Headed Demon Master, this black fog silk cocoon can annihilate our godly power like mad, and it is incomparably tenacious. That Sector Beast must be providing it with power, and that power is continuously counteracting against us... There is no way we can tear apart that cocoon.”

“There is no way we can attack it to break it apart from the outside. Maybe it is easier from inside.”

“Break!”

Within the black fog cocoon, Firefly True Master was roaring crazily.

Hong!

The cocoon suddenly expanded. It continued to expand until it was expanded to over ten times its original size, and internally, Firefly True Master was apparently going crazy and hysterical. But there was still no way he could break out of that cocoon.

Firefly True Master anxiously transmitted a voice message. “Everyone, it is swallowing my godly power like crazy. Continuously absorbing, and its energy level is not reducing but, on the contrary, increasing! However, I am doing my best to resist, burning up my godly power to resist it. It needed to use its strength to suppress mine, and we were trying to annihilate one another. Previously, when you were all attacking this black fog cocoon from the outside, I felt that its resistance was obviously weakened... All of you should continue to attack. Attack this black fog cocoon! It has limited tolerance. There is no need to use other ways because the other ways will not produce much effect. So long as we use our godly power and try our best to make it use up its power so that it is unable to replenish its supply of godly power in time, we will be able to cause this black fog cocoon to collapse.”

Everyone outside, including Nine-Headed Demon Master, all felt that his reasoning made sense. Godly power was very important to every true god. With the help of an automaton type treasure, a true god’s godly power could unleash hundreds and thousands of bouts of combat power. If they had directly used their godly power to get their opponent to use up its power, then they would be wasting their godly power. For true gods with smaller bodies, this would be a just cause for hesitation.

“Let’s work on using up its power.” Nine-Headed Demon Master ordered.

“All right.” Blood Orchid Ancestor was the first to receive the orders.

A tremendous amount of flowers and vines extended out to ensnare the cocoon in a frenzied manner as Blood Orchid Ancestor launched her attacks with a great deal of godly power.

Chi! Chi! Chi!

Like a pair of red-hot tongs being dunked in water, the reaction between the godly powers and the black fog cocoon was sudden and volatile. Both sides tried madly to consume one another.

Hong!

Within the black fog cocoon, Firefly True Master was also doing his best to put up a resistance. He transmitted a voice message in a most anxious tone: “Everyone, altogether. Let’s try our best together! So long as we can wear it out, the cocoon will break. I just need a moment to achieve this!”

The other true gods, who were feeling hesitant, looked at one another. Then, with gritted teeth, they released their godly powers together in a mighty manner. Without further ado, they charged toward the black fog cocoon.

Hong!

Internally and externally, the eight great true masters combined their efforts. All their godly powers combined to deal a mighty attack. Suddenly, the numerous streaks of distorted light rays that were scattered and spread all over the place by Sector Beast Morosa all converged to surround the black fog cocoon. At that moment, there was no longer a single light ray penetrating the void space. All of these rays were now surrounding the black fog cocoon, as if in preparation for a full-scale attack.

Peng!

Mere seconds later, the black fog cocoon split open with a loud rumble. Firefly True Master dashed way out, looking like a very sorry sight.

“Hahaha...!” Firefly True Master laughed, pleasantly surprised.

Then his delight turned into fear. His godly power had already been used up by as much as 70 percent. That black fog cocoon was absorbing it at a rate that was much too fast.

Peng! Hong!

In the distance, Sector Beast Morosa and Nine-Headed Demon Master were engaged in heated crossfire. Nine-Headed Demon Master was relying on a pair of golden automaton type huge claws that could place Sector Beast Morosa under complete suppression. However, Morosa was also executing a soundless soul attack, which allowed it to easily evade Nine-Headed Demon Master’s attacks.

“Firefly True Master?” Sector Beast Morosa turned back and looked toward Firefly True Master. With a hideous smile, he said, “I had intended to devour you. Who would have expected you to make a successful escape? In that case, you can meet your doom right away.”

Sector Beast Morosa’s body suddenly shook and vibrated.

Hua! Hua! Hua! Hua! Hua! Hua!

The numerous distorted light rays that were scattered all over the place when the black fog cocoon had shattered suddenly lit brightly and transformed into dazzling black rays. These rays were no longer distorted as they gathered to form a black, shining column! This black column of light charged toward Firefly True Master so quickly that he was given no chance of escape.

Chi! Chi! Chi!

To the naked eye, it would have appeared that Firefly True Master's body was gradually disappearing, part by part.

What incredible annihilation! Two opposing powers at that moment were annihilating one another. It was an eye for an eye; killing 1,000 of the enemy would mean incurring a personal loss of 1,000! Yet the Sector Beast, Morosa, could afford to fight on... Earlier, it had already devoured a large portion of Firefly True Master's godly power, so devouring more than half of the origin of a miniature universe was hardly worth a mention. However, it could not digest the godly power fast enough to transform it into its own power, which was why it had to temporarily store it. Undoubtedly, it was not afraid of using up its godly power.

"No!" Firefly True Master said, attempting to fly toward its battleship.

Greatly shocked, Blood Orchid Ancestor manipulated her vines as she attempted to block the black column of light. She wanted to help build a stronger resistance.

Nine-Headed Demon Master was greatly taken aback. "Stop!"

The rate of annihilation was simply too fast. The black column of light collided with Firefly True Master, causing his body to disappear part by part. Just as the various other parties were about to intervene, Sector Beast Morosa raised its head and let out another soundless attack. This time, every single true god was affected. The one who suffered the smallest impact was Nine-Headed Demon Master, who happened to be the furthest away from Firefly True Master.

"No, no, no..." Firefly True Master tried his best to fly toward the battleship. So long as he could make his way into the ship, he would be safe.

Suddenly, that black column of light started to move and flow. The instantaneous flowing movement gave form to a black, foggy cocoon. It once again enshrouded Firefly True Master, preventing him from escaping.

"Break open!" said Blood Orchid Ancestor as her crimson vine flowers finally flew over.

Hua!

The cocoon vanished into thin air, and Firefly True Master disappeared with it. What was left behind were some treasures, like weapons and armor, that floated in the void space.

Far off in the distance, Nine-Headed Demon Master and Blood Orchid Ancestor were all shocked. Firefly True Master had been annihilated?

\*\*\*\*\*

Hong! Long! Long!

The entire miniature universe started to vibrate. Cracks formed within space as it began to collapse.

Every living soul that belonged to this miniature universe—from universe masters of the Firefly clan to universe knights, undying fighters, and ordinary living souls—were annihilated in the blink of an eye.

\*\*\*\*\*

In the void space, Sector Beast Morosa felt neither joy nor anger.

“Disappeared? Disappeared? Killing that Firefly True Master, the origin of his miniature universe actually disintegrated and returned back to Universe Ocean? My delicious meal! Oh, my delicious fare! If I had known, I would never have killed that Firefly True Master.”

Regret! Sector Beast Morosa sorely regretted his actions. Devouring the origin of a miniature universe would allow him to absorb a tremendous amount of energy—even more than devouring ten true gods! Yet, by killing Firefly True Master, the origin of Firefly True Master’s miniature universe had collapsed right away to retreat back to Universe Ocean. There was no way he could get hold of it.

“Sector Beast!” Nine-Headed Demon Master and company went crazy with rage as they besieged Sector Beast and started to rain attacks down on him like mad.

“If I kill another true god, won’t I be destroying another miniature universe? That was my meal...!” Sector Beast Morosa was reluctant to kill another true god, so he turned to flee. “I would rather feed on the origin of the miniature universe first, then kill the true god later! Now is not the time to kill them.”

Sector Beast Morosa turned to make its escape.

“You want to escape?”

Nine-Headed Demon Master and the other true gods persisted in attacking it and blocking off all possible routes of escape. This infuriated Sector Beast Morosa. As the surrounding void space had been frozen, there was simply no way it could teleport. By relying on flying alone, would it be able to escape from their clutches at all? Nine-Headed Demon Master and company could follow it wherever it went. There was no escape.

\*\*\*\*\*

Star Tower was advancing amid the chaotic airflow within void space. Luo Feng, clothed in his white robe, held onto a transmission token.

Nine-Headed Demon Master transmitted the news. “Milky Way, Firefly True Master is dead. However, we are no longer taking any chances. The Sector Beast is trying to escape now, but the surrounding time and space are frozen. It is not possible for it to escape! Milky Way, we can suppress it, but killing it would cost us dearly. Who knows? We might see another one or two true gods annihilated. This is why we did not force it into a corner. We only tried our best to ensure that it could not escape. Also, we tried as hard as we could to stall for more time until you and Nine Remoteness could arrive.”

“Great,” Luo Feng replied. “How did Firefly Master die? Even with all of you around, it actually managed to kill a true god?”

From where Nine-Headed Demon Master was, there was silence. No news at all.

A short moment later, a piece of news arrived: “Milky Way, the Sector Beast! The Sector Beast... has escaped!”

### **Chapter 1420: Panic-Stricken**

On the third day after the Sector Beast fled and disappeared, Luo Feng, Nine-Headed Devil Master, and Blood Orchid Ancestor met in the chaos space in Universe Ocean. As for the other true gods, they all went back to their miniature universes.

“Devil Master, Blood Orchid,” Luo Feng said, standing in space. Nine Remoteness True Master stood beside him, while Fire Dome True God and Hong were standing behind him.

“What happened?” said Nine Remoteness True Master anxiously. “Nine-Headed Remoteness Master, you said that you sealed the space, and all of you eight true gods were encircling him. Under sealed space, even teleportation is strictly prohibited. How did that Sector Beast get away so quickly without any problem?”

Luo Feng also looked at Nine-Headed Devil Master, confused. When they had been talking with Nine-Headed Devil Master through the communications token, Nine-Headed Devil Master had said that it was difficult to talk about it through the communications token. He needed to talk with them face-to-face.

“No need to rush.” All nine faces on Nine-Headed Devil Master looked solemn. “Ever since that fight against the Sector Beast, I’ve been thinking about the fight, and I’ve talked with Blood Orchid. I’ve discovered something strange. I’ll tell you one by one now.”

Beside him, Blood Orchid Ancestor nodded in agreement.

Luo Feng, Nine Remoteness Master, Fire Dome True God, and Hong were all listening.

“Normally, Sector Beasts are not powerful,” said Nine-Headed Devil Master. “The power of that Sector Beast is slightly stronger than Blood Orchid and slightly weaker than me. However... that Sector Beast has some special skills. Firstly, it’s able to swallow the origin of a miniature universe. Based on our estimation, it would take it around eight days to completely swallow the origin of a miniature universe! Of course, when engaged in a fight, a Sector Beast wouldn’t be able to swallow the origin anymore. This swallowing technique is one of the special skills Sector Beasts have. Secondly, those circuitous curves it emits... In addition to swallowing the origin of a miniature universe, they can also swallow true gods!”

Hua...!

His godly power immediately simulated the previous fighting scene in space. The black mist cocoon completely enveloped Firefly True Master, and no matter how Firefly True Master struggled, he couldn’t break it to get away.

“Look,” said Nine-Headed Devil Master. “Inside that black mist cocoon, the godly power of Firefly True Master was constantly being devoured... It didn’t matter how he tried to resist. The burning godly power of Firefly True Master was still neutralized by the power contained in that black mist cocoon. Other true gods also tried to help, but they couldn’t break the black mist cocoon at all. In the end, Blood Orchid helped...”

Blood Orchid Ancestor nodded. “That’s right. Other true gods and I gave up on weapon-based attacks and used our godly power to sweep across the cocoon. We used our godly power to consume it. That’s how we broke the cocoon. Clearly, if there were only one or two true gods present, if one was trapped by that Sector Beast, they wouldn’t stand a chance of getting back into a palace true treasure. The black mist cocoon can change its size however it wants and would just keep trapping the true gods. That Sector Beast wouldn’t give you a chance.”

Luo Feng, Nine Remoteness True Master, Hong, and Fire Dome all looked sullen. If one true god encountered a Sector Beast, he wouldn’t stand a chance of surviving!

“In my opinion,” said Nine-Headed Devil Master, “weapons can still work on that black mist cocoon, but the weapons we used are not strong enough. Otherwise, that Sector Beast would’ve used that technique to trap me. I posed the biggest threat. Instead, it trapped Firefly True Master, who is weaker.”

“Yes.”

“That’s right.”

Luo Feng and the others all nodded.

“However, we still have to take that technique of Sector Beasts, black mist cocoon, seriously.” Nine-Headed Devil Master then turned toward space, and the displayed scenes changed. The traces of black light all became black pillars and rushed toward Firefly True Master, consuming the body of Firefly True Master bit by bit. “After the black mist cocoon was broken, they quickly turned into black pillars and started to erode the body of Firefly True Master! When he was trying to get back to the spaceship and we were trying to slow down the Sector Beast, the Sector Beast used soul attacks to affect us while those black pillars were eroding Firefly True Master. However, when Firefly True Master had almost reached the spaceship, the black pillar suddenly became the black mist cocoon and immediately enveloped Firefly True Master. Soon after that, Firefly True Master was dead.” Nine-Headed Devil Master stepped aside, looking solemn. “Apparently, the black light pillar can turn into a black mist cocoon at any time! Even if Firefly True Master had carried his spaceship with him, the black light would’ve immediately turned into a black mist cocoon.”

Luo Feng, Nine Remoteness and the others all went silent. It was indeed scary. From cocoon to light pillars to cocoon again—Sector Beasts could keep this cycle up forever, and nobody could even run away.

“This is their scariest move! Endless binding and erosion!” said Nine-Headed Devil Master solemnly. “But thirdly, it has incredible soul attack skills. Once they are performed, under such soul attacks, those with true-god level willpower will be in such agony that they won’t be able to attack anymore. Only those at the level of a true god of void space could stay conscious, but their power would still be reduced. Only those at limit void space level could withstand it easily. And now we need to talk about its escape skills.” Nine-Headed Devil Master pointed at the space beside him. “Just watch for yourselves.”

A scene appeared in the space beside them. The giant Sector Beast Morosa howled, after which, an image with a black edge and golden surface showed up all over its body. 99 engravings showed up, and after a sound—hong—the body of Sector Beast Morosa suddenly split into 99 streaks of light that swiftly flew in different directions.

The speed immediately surged. 1,000 times faster than light speed, 10,000 times faster than light speed.

“In that time...” Nine-Headed Devil Master sighed. “None of us eight true gods dared to completely separate because we feared that it would attack us one by one, which is why we were divided into two teams. One was myself, the others were other seven, led by Blood Orchid. We chased two of the lights. We kept chasing them, but they both suddenly disappeared after a short while. The Sector Beast disappeared just like that.”

Both Nine-Headed Devil Master and Blood Orchid shook their heads, looking hopeless. Luo Feng appeared at a loss. A body separated into 99 parts? And two of them vanished?

“The body was disintegrated.” Luo Feng frowned. “Once they escape, each part of the body can be the main body. The other 98 parts can then dissipate and gather back together with that main part, becoming the Sector Beast.”

“We think likewise. How are we supposed to kill it if it can use that move?” Nine-Headed Devil Master frowned.

Nine Remoteness Master also shook his head. “Too difficult.”

Everyone was anxious.

Hong, who had been silent, suddenly said, “It’s not that easy, everyone... It has such incredible escape skills, but why did it fly away right after killing Firefly True Master? Nine-Headed Devil Master could only suppress it. It could have killed however it pleased. Why didn’t it keep fighting?”

“That’s right.” Nine-Headed Devil Master nodded. “We thought about it after that, and we were also confused by this. Everything seemed to be under its control. It could’ve certainly killed another true god with its skill black mist cocoon. However, it immediately left after killing Firefly True Master.”

Blood Orchid Ancestor added, “I’ve talked with Devil Master also, and we thought that the skills the Sector Beast performed weren’t all the skills it has.”

Luo Feng, Hong, Fire Dome, and Nine Remoteness all looked dazed.

Nine-Headed Devil Master was also worried. “It doesn’t have powerful fighting skills, but it has all sorts of other special skills. Black mist cocoon, black light, soul attacks, and escape—and these are just the skills it has demonstrated. It was pushed to despair by us, so it might still have some techniques it hasn’t used.”

Luo Feng and the others all nodded. It was a habit common among great beings; they would intentionally hide their trump cards unless it was a crucial moment.

Sector Beasts were terrifying creatures bred in Universe Ocean that represented destruction. They could tell that the Sector Beast had only treated this event as a trial, and it hadn’t really been driven to despair. It was likely that it still had some special techniques.

“No wonder the original mind attached great importance to it,” said Luo Feng. “One Sector Beast is already so difficult to deal with, and this is only one of them! There are many more in the nest of the Sector Beasts...”

Everyone was heavy-hearted.

“The problem is, we don’t know what other skills it has,” said Nine-Headed Devil Master worriedly.

\*\*\*\*\*

In the space of Universe Ocean, the golden Sector Beast Morosa lay within the chaos air. It breathed it in, looking more relaxed than ever.

Hua! Hua! Hua!

Black light flowed across its body.

Wa!

“I had such a great meal. I haven’t even finished the origin of a small universe yet, but I felt that I’ve already had a lot. It feels much better than eating ten true gods.” Sector Beast Morosa was satisfied. “Every time after I swallow a miniature universe, my power will be improved, so if I keep swallowing those origins, I should become stronger than Bei Di. And after that, I’ll swallow all the other Sector Beasts. Then I can become the one true king of Sector Beasts!”

Sector Beast Morosa was expectant. Currently, it was trying to convert those energies into its own at its leisure.

\*\*\*\*\*

The entire Universe Ocean was panic-stricken.

A Sector Beast had suddenly appeared, and it had killed Firefly True Master while surrounded by nine true gods led by Nine-Headed Devil Master. Then it had run away as if nothing had happened. Besides, it had been able to complete swallowing the origin of a miniature universe in only eight days, which frightened all the powers in Universe Ocean. After all, it would usually take Luo Feng and the other seven great overlords a long time to get to a miniature universe.

Now that the Sector Beast had disappeared, nobody knew when it would show up again, and no one could say for sure that he wouldn’t be the next Firefly True Master.

“We’ll separate into eight teams, and once that Sector Beast shows up, at least one of us can arrive in time. Milky Way has two bodies, so he’ll be responsible for two areas.”

“Many true gods from the original universe will also come out.”

“We should remain well-prepared all the time.”

“Once that Sector Beast shows up, we’ll get there and kill it all at once.”
