

SWALLOWED 541

Chapter 541: Tian Shi Palace Leader

"Greetings Undying!" Sector lord Mo Luo Ke bowed respectfully.

The huge warrior with the big axe on his back responded slightly before looking at Luo Feng, "Luo Feng, the leader wants to meet you, follow me." After which, a formless energy that couldn't be seen by the naked eye formed a large hand and carried Luo Feng. The huge warrior brought Luo Feng and swiftly headed towards the 9th level of the palace.

"This is the strength of an undying?" Luo Feng felt the ripples of origin laws around him.

Flying through level after level!

Every level of Tian Shi palace was incredibly vast and huge. Very quickly, this undying brought Luo Feng to the 9th level!

This 9th level hall should be the biggest hall of all of the palace

Just like how the 1st level had a specific ship docking area, places to welcome people, with sector lords resting areas, and a special area to monitor Blood River world, and a place for the sector lords to train...in all, from the 1st to 8th level, every level was incredibly vast but each had been organized extremely well.

The 9th level however was a vast hall of endlessness!

The entire 9th level hadn't been segregated at all. The length and width reached tens of thousands of km, and its height too was ten thousand km. It was so large, that even earth was able to fit into this hall.

"Tian Shi palace leader?" As he landed in the 9th hall, Luo Feng's gaze landed on the distant silhouette ahead.

He was dressed in a silver long robe. It seemed as though his robe itself produced countless images. On it were gold engravings, however with a blink of an eye, the robe was ultimately just a silver robe. Illusionary and mysterious, it was intoxicating. His reddish brown long hair was let loose.

Standing there, gazing at the vast space outside Tian Shi palace.

At this point Luo Feng even felt that he was even more vast than the space outside, even more majestic.

"Leader!" The huge warrior bowed respectfully.

"Go on." A clear voice, like a wind blowing through a bamboo forest.

"Yes." The warrior became a beam of light and immediately left the 9th level. The light behind the stairs turned dark, as the pathway behind seemed to close.

He, finally turned around!

He had reddish brown long hair, sparkling skin, black eyes, and an engraving on his forehead. Other than the engraving, his resemblance to an earth human was uncanny. Even though he was taller than normal, however before him, even the giants would feel as though they were facing an endless space, and would be subdued and feel inferior.

"Luo Feng," The voice seemed to resound within his ears and heart.

Only then did Luo Feng awaken. "Even with my willpower, I was still unknowingly affected by him. Its, its too terrifying. Compared to the true governing powers of the universe, even with my strong willpower, there's still such a difference." If Luo Feng's thoughts were known by the warriors of the universe, they'd all break out laughing.

Standing before a pinnacle ancient being, who, through his countless years of training, the universe energies shaping, his willpower alone was at an unbelievable level.

A universe level little doll that had only lived for a few hundred years...

And compared to the Tian Shi Palace's leader?

He alone was more than capable of keeping the intimidation on the beings of Blood River world.

"Luo Feng greets the leader." Luo Feng bowed respectfully.

"Your willpower is not bad." The leader nodded. It was almost like the entire land and skies were speaking. "Your batch of geniuses are the most exceptional in the past 10,000 eras, because in your batch, there's Bolan, you and Rong Jun."

Luo Feng was stunned by his words.

Past 10,000 eras, was essentially over 1 hundred million years.

"Before you entered Blood River world, the Virtual Universe company's management level had a contest over you and Bolan." The leader looked at Luo Feng. "The contest was about your sturdiness in character, and to see if you are fit for walking this path of the strong. Your high talents! And Bolan's pride, yet his unbelievable talent. However...your willpower far exceeds his."

"Back then some favored you, while others favored Bolan."

"And I, I favored you." The leader looked at Luo Feng, his eyes smiling.

"Thank you leader." Luo Feng bowed.

"Your time here in Blood River world, according to your teacher, he said that you have comprehended the 35 wonders of the space laws?" The leader looked at Luo Feng. "Did that happen?"

"Yes." Luo Feng replied frankly.

"Back when your teacher said that, immediately the numbers that favored you grew." The leader said, "I too thought that you and Rong Jun would have more hopes of becoming true absolute warriors in the universe humans."

"Rong Jun and I?" Luo Feng was stunned.

Just complimenting him alone was enough.

Rong Jun?

From the leader's words, everybody was contesting between him and Bolan, but no one mentioned Rong Jun at all. However right now, be it the heavenly bridge or fantasy ocean, he and Bolan were far ahead!

"Rong Jun?" Luo Feng was curious.

"If Bolan were to understand, he too would be your competitor." The leader looked at Luo Feng. "As for Rong Jun, if you are able to exceed Rong Jun in this life, it would be an accomplishment."

"What." Luo Feng stared wide eyed.

This life?

If he could exceed Rong Jun in this life, it would an accomplishment? And this was said by the leader of the Tian Shi palace.

Would he not be able to exceed him? Ever since he acquired the beast god statue, Luo Feng didn't even place Bolan or Rong Jun as his opponents. He thought he was set to exceed them by far. His true opponents were the absolute beings from before! However the leader, someone of such status wouldn't speak rubbish. Rong Jun had indeed attracted two universe country leaders to accept him as their disciple, that weird matter made Luo Feng curious.

"So the upper echelons favor Rong Jun more than me and Bolan?" Luo Feng thought.

"Hmph!"

"They better look well."

"I have the beast god statue to study the 1st claw, the Moshu clan to study the 9 universe tablet, and the earth body to meld the two. I'm already ahead of Rong Jun. My return this time...I should be able to exceed Bolan too! And after this time, I will continuously improve, leaving them far behind." Luo Feng's state of mind was incredibly sturdy.

Even though he valued the leader's words, but to get shaken by it?

He wanted to be strong!

Continuously growing!

His improvement speed will only get faster, as for Rong Jun? Bolan? It'll just depend on whether they could keep up.

"Your mental state sure is solid." The leader saw through Luo Feng's eyes and guessed his thoughts. Smiling, "The universe is vast and profound. Every one has their own miraculous meetings and advantages. The three of you are not bad. However at such a young age, your willpower has already reached such levels. It's really not easy. My good friend favors Rong Jun. As long as he doesn't fall, he will definitely have accomplishments in the future. However, I'm betting on you."

Betting?

Luo Feng was stunned, this leader seemed to know some secret about Rong Jun, yet he was still betting on himself?

"Don't let me lose." The leader's eyes were smiling, "You actually comprehended the 35 wonders." Following which he pointed in mid air.

Formless energy gathered and a stone tablet formed.

On it was a picture...the drizzle picture!

There were a total of 36 rain drops in it.

"This 36 wonders, which one haven't you comprehended yet?" The leader said.

"This one." Luo Feng pointed and his spirit energy landed on a particular drop.

"Since we could meet, I'll help you out." The leader waved his hand and immediately black fireballs with diameters of 100km immediately floated in the air in the hall. Every one of them were extremely huge and completely black. The surfaces were burning with black flames, and there was a total of 9 of them!

Chi chi chi...

The space around the black fire balls seemed to burn and split apart, and the broken space flowed erratically, locked in by the black fire balls, the space further away seemed to warp.

Almost as though there was some very strong gravity causing the space to get drawn in.

Only the space around Luo Feng and the leader was very solid.

"What's this? Those undyings are able to play with even planets. Just what are these 9 black planets?" Luo Feng looked up shocked. Even though it was controlled in this palace, he still felt the temperature rise up to 1,000 degrees. However this wasn't anything to a universe level 9.

However just the burning temperatures caused the space to split apart, even making the space flow weirdly locked in position.

This was definitely thousands to tens of thousands of times more terrifying than a star!

"I'll completely demonstrate the 36th wonder which you've yet to comprehend. But just once, whether you can comprehend it will depend on yourself." The leader looked at the 9 black fireballs floating, immediately they began to move, with one movement...

The land and skies vanished.

Luo Feng couldn't help but get completely immersed within. The movement of the 9 fireballs completely infused with the universe space laws, the space was completely controlled. At this time, it was even deeper than studying the 9 universe tablet itself. The main reason was that the tablet was but something an absolute warrior of the universe had left behind, and right now, the leader of the Tian Shi palace was personally demonstrating the 36th wonder.

After finishing the demonstration, the 9 black fireballs continued to move about, all the more mysterious...

Luo Feng was completely immersed within, many thoughts and comprehensions occurred in his mind, however the more he saw, the more he didn't know.

He even lost track of time...

"Rumble!"

The 9 black fireballs were already invisible to the naked eye. Only the countless flame marks were left, finally forming a peculiar beast picture. This beast picture, was the beast in the 9 universe tablet's 7th to 9th pictures, the ones Luo Feng didn't understand.

After which, the 9 black fireballs completely vanished and the vast hall returned to normal. The leader looked at Luo Feng who was immersed in his study and waved his hand.

Shua!

Luo Feng vanished and appeared in the 1st level. Within a particular F grade universe ship's control room, he was still sitting crossed legged and within his study, not even realizing he was already in a ship.

"Send him off, don't disrupt his study." The leader communicated.

"Yes leader."

The leader of the Tian Shi palace gazed down, almost as though he could see through the many levels. Looking at Luo Feng immersed in his study in the universe ship, laughing lightly, "Luo Feng, how much you can comprehend depends on yourself." After which he sat crossed legged, laughing softly, "Such a young age with such powerful willpower. Interesting, interesting, even when I was domain lord back then, my willpower wasn't that strong."

Everything returned to silence.

Tian Shi palace 9th level, was as calm as it had been for the past trillion years.

And the F grade ship brought Luo Feng who was immersed in his study and left Tian Shi Palace.

Chapter 542: Blade World

Luo Feng's nest, star fragment 80389081. It had a diameter of 6,200km.

This star fragment was floating in space, and on it was a huge villa that took up most of the space, with universe level soldiers patrolling about. Suddenly, they spotted a universe ship slowly descending. They became shocked, and immediately informed their leader Ao Duo.

"General, there's a ship!"

"A ship has come."

A silhouette appeared within the villa. It was the bald old man Ao Duo, he looked up at the universe ship. From one look, his expression changed, "The mark of Tian Shi Palace? It's actually a F grade universe ship, follow me!"

Ao Duo brought the 10 guards with him in beams of lights, swiftly flying over.

In the distance, that ship descended, landing on the wild grass and flowers.

"Hm?"

"The ship is from Tian Shi palace. It should be his majesty returning, but why haven't they opened the cabin door after so long?" Ao Duo brought the guards and stood beside the ship waiting at attention. The ship stopped for quite a while before the cabin door opened and landed on the ground. A huge warrior with a huge axe on his back came out, coldly gazing at Ao Duo and the group.

The formless pressure fiercely landed on Ao Duo and the group's souls.

"Greetings undying." Ao Duo bowed in shock.

"Greetings undying." The group of guards too were shocked.

"Luo Feng is studying now, we cannot disrupt him in this critical time." The warrior said coldly. "Our Tian Shi palace ship will be stationed here until he awakens, you all cannot disturb him either."

"Yes."

Ao Duo and the group bowed, simultaneously feeling shocked.

My god.

This pressure that he released before them, had ripples of origin laws all around. Obviously this was a powerful undying! And Luo Feng was actually able to have an undying wait here without disturbing him, this was too absurd. Luo Feng was after all an absolute beginning member. His position should still be slightly lower than that of an undying in Tian Shi palace.

Hua!

The cabin door closed and Ao Duo and the group could only wait outside.

1 hour, 2 hours...

1 day, 2 days...

"Why hasn't his majesty awoken yet?"

"Right, we've been waiting here for quite some time. General, if his majesty continues his study, should we still wait here stupidly? From what I see, we should return first."

"Shut up!"

Ao Duo ordered softly. His gaze swept at the guards that had been standing there for 18 days waiting, and said coldly, "You are all at universe levels and domain lords. How is this long? Even I'm not

complaining, even the undying from Tian Shi palace is waiting, not daring to disrupt his training. And you dare complain? Hmph!"

The muttering guards all immediately went silent.

"Hmph!"

"Be silent and wait! If his majesty awakens and we are not there to welcome him, that would be our failure!" Ao duo ordered.

"Yes, general."

The group of guards obediently complied.

Within the ship's control room, Luo Feng sat crossed legged on the metal ground not moving.

In his mind many scenes floated in and out, the 9 black fireballs shown to him before by the powerful Tian Shi palace leader replayed over and over in his mind. Many techniques from the 2nd volume of Time Space scribbles too came into play, many areas that were obscure before were being solved!

9 universe tablet, Time space scribbles, Floating blood manual, 9 black fireballs, the ancient pictures, the beast god statue...

They all corresponded with each other.

Plus the fact that he had already comprehended the previous 35 wonders, and a lot of the 36th, with all these working together, many questions he had initially were being solved. His comprehension began to rise and Luo Feng couldn't help but smile.

Unknowingly, Luo Feng had completely comprehended the 36th wonder, because the 9 black fireballs kept replaying in his head, displaying the entire space laws over and over. He couldn't help but continue studying and move on to the 9 universe tablet's 3rd picture...The rainstorm!

Many questions began to form in his head, many hard to solve questions. Luo Feng combined the 9 black fireballs, the ancient pictures and compared notes, attacking each difficult question one at a time, using all his focus to solve one question after another...

...

"That's it." Luo Feng who was sitting crossed legged opened his eyes.

"Anymore and my efficiency will decrease. The best way to study the 9 universe tablet is still the Time Space scribbles. I currently only have 2 volumes and not the 3rd." Luo Feng could clearly feel that without the Time Space scribbles to tally with, his studying efficiency would have a drastic drop.

Time space scribbles were written by the founder of the 9 universe tablet. It is extremely valuable, and at the same time, it is the optimum way to study the 9 universe tablet.

Hua!

The control room cabin door opened and Luo Feng turned to look out. The huge warrior with the huge axe on his back walked in. He glanced at Luo Feng, "Since you've awoken, you can leave now."

"Thank you undying." Luo Feng bowed.

"This was the leader's command, no need to thank me." The huge warrior didn't say anything more. Luo Feng bowed and swiftly followed the pathway straight out of the cabin door.

"Greetings your majesty."

Ao Duo and the group of guards all bowed as they saw Luo Feng walk out, it had been over 30 days since they waited.

"Hm." Luo Feng jumped down and landed on the grass, simultaneously nodding as he smiled, "I've kept you all waiting, let's go."

"Yes." Ao Duo and the rest respectfully followed.

On this star fragment continent, Luo Feng quickly returned to his living quarters. He couldn't wait and immediately entered the virtual universe network.

...

Virtual universe, Yu Xiang mountain Absolute beginning region, villa 1136.

Luo Feng came to his training grounds.

"The Tian Shi palace leader's help this time has saved me at least 2 to 3 years worth of work. And the display of the 9 black fireballs...has shed some light on my later study of the Rainstorm picture." Luo Feng recalled the scene back in Tian Shi Palace. He couldn't help but be speechless at the 9 black fireballs.

The universe space was very steady, even with a star's high temperature, it wouldn't affect the space at all.

However the black fireballs burning in the space actually messed up the flow of space itself. Its strong gravity caused the space to warp. Luo Feng guessed that even a powerful undying, if burned by the black fireballs would be burnt to death.

"Make light work of something heavy!"

"I shouldn't think so far ahead now, I can't even make one star yet." Luo Feng shook his head, after which he cleared his mind and with a thought, the dark golden long rod appeared on his back. "I've already completely comprehended the 36 wonders, I don't know whether I can unleash the 6th level though."

Nan Shen Armament had a total of 9 levels.

The 5th space slicer, the 6th Own world. From the 5th to the 6th, it was one of the two hardest breakthroughs of the 9 levels.

80 years!

Over 80 years of hard work, Luo Feng's comprehension had risen greatly. Compared to 80 years ago, it was absurd, however he was still unable to unleash the 6th level.

"Nan Shen Armament, come out!" Luo Feng ordered.

Hua!

Countless gold lights shot out from the dark golden long rod behind him. In an instant, the gold glaring lights of little golden blades shot out. Gold engravings on the little blades formed gold threads and countless lights moved in the surrounding space, triggering the space laws. Gold laws, and the alloy ground of the training grounds completely vanished into the light.

A vast world made of blade energy revolved around.

This move could change the land and skies. It was the Nan Shen armament's 6th level...Own World!

"Hm?" Luo Feng frowned. His face was flushed red as his consciousness spirit energy madly controlled the blade world's foundation...the 5832 little golden blades.

"No, no..."

"Control!" Luo Feng couldn't help but roar.

Rumble!

The formed blade world maintained itself for about 3 to 4 seconds and after which it shook and crumbled with a crash.

The blur of 5832 little golden blades remained floating in the surroundings, however the blade world was broken.

"It actually crumbled in a few seconds. Luo Feng smiled and shook his head. "It's still ok, this was the first time I actually formed the blade world. After so many years, this is the first time I successfully formed a complete blade world. Since I can form it, the next step should come quickly."

Breaking through every level was extremely hard.

Just like the Nan Shen Armament's 1st level, simply forming one golden blade. The 2nd Piercing Sky actually required 9 blades into 1. Why was the difference so huge?

Over 80 years.

Luo Feng had been constantly improving from the 5th level's Space Slicer. His improvement speed was shocking, his encounters too were legendary. Using these 80 years that way, he finally began to feel the entrance of the 6th level's Own World. Of course, it was just the entrance...every level's power was vastly different. Luo Feng's blade world could only be maintained for a few seconds now, it was the most basic stage of forming this 6th level.

In theory...

The Rainstorm picture, when one reached a certain level of comprehension, only then would he be able to unleash Blade world. Luo Feng's comprehension of the rainstorm picture was barely even beginning.

"The 1st 3 levels of the heavenly bridge reflects the Rain drop picture."

"The 4th to 6th levels reflected the Drizzle picture."

"The 7th to 9th levels reflect the rainstorm picture." Luo Feng frowned. "This is a rough gauge, I've comprehended the first 36 wonders. Since my comprehension is 10 times stronger than a normal comprehension of the Drizzle picture, that's why I can force out the blade world."

"However..."

"I can only maintain it for a few seconds, I estimate that I still cannot pass the 7th level of the heavenly bridge. I have to get accustomed to it and maintain for longer periods of time." Luo Feng pondered.

"And even though I've comprehended the first 36 wonders, studying the rainstorm picture would still be extremely difficult. However, with little bits, I think it'll be pretty fast."

If one's basics were solid, the comprehension would be faster.

Luo Feng's basics were incredibly solid!

"Studying the Rainstorm picture requires the Time Space scribbles' 3rd volume. I should buy it now." Luo Feng understood the theory of a sharp blade increasing one's efficiency. He immediately rushed out of the training grounds.

Sou!

He flew into his study.

Sitting before the desk, he opened his laptop and swiftly opened the treasure trove, preparing to buy the manual. However he was shocked as he saw his points below.

"Points, 74,660."

"Only over 70k points? Buying the 3rd volume of time space scribbles requires 100k points." Luo Feng was stunned.

Chapter 543: The Worth of the Blood River Crystals

His earning were already considered excellent. Back in primal chaos city with the 10 times reward he earned quite a bit. After buying the 1st 2 volumes of Time Space scribbles he still had 20,360 points left.

After that, he consecutively passed the 1st 9 islands of Fantasy Ocean, gaining 51,100 points.

And during the time he spent in Blood River world, he passed the heavenly bridge's 6th level, gaining 3,200 points.

A total of 74,660 points!

The 1st volume of Time space scribbles was only 1000 points. The first two required 10k points, the first three required 100k points, first four was 1 million...it's compounded. Especially for all 9 volumes, the entire set reached 100 billion points. This was something even the universe country leaders could only stare at.

And, there wasn't any discount!

The amount required to pay for these was like choosing a bottomless pit.

"Looks like I have to confirm the end of the mission before I can purchase the 3rd volume." Luo Feng gently clicked and closed the treasure trove document. He then proceeded to open the Management file and chose Training, very quickly entering the training page. He chose to confirm the end of his mission.

"How do you do, your majesty Luo Feng." A gentle voice resounded from the screen. "You are requesting to confirm the end of your mission?"

"Yes." Luo Feng nodded.

"May I ask, of the two missions in Blood River world, which did you finish?" The gentle voice continued.

"Both of them." Luo Feng replied.

"Please wait a moment your majesty. A universe ship will arrive shortly at your star fragment to verify. After the verification, your majesty will acquire the points designated as the reward." The gentle voice spoke.

Indeed, about 8 hours later.

A grey blade shaped universe ship that was 100m long landed on the star fragment. Luo Feng led his sector lord Ao Duo and others to welcome them.

"How do you do your majesty Luo Feng." Three black uniformed men and women walked out of the cabin door. The leading black uniformed man said, "Please enter the ship, your guards need not follow."

"Alright." Luo Feng nodded.

He entered this blade like ship and quickly reached a specific verification cabin.

"When your majesty has entered the cabin, just act according to the AI's instructions." The three of them were humble and respectful. In terms of strength they were all sector lords. But, as their talent in battle wasn't that high, they belonged to the management and chore side of the company. However even in these departments, they had different statuses.

The things these three handled were considered more core. They too knew that the geniuses from this batch's genius competition, Bolan, Rong Jun and Luo Feng were heavily favored. Naturally, their attitude was humble.

If they were to meet some other geniuses who were not necessarily outstanding, they would do their job simply as is, with a cold face. Why would they even be humble about it.

"Hm." Luo Feng nodded, stepping into the cabin.

Within.

The electronic voice resounded, "Please take out one blood river crystal and place it on the desk."

Luo Feng placed one crystal on the alloy desk.

"1st mission of acquiring one crystal, complete. Points awarded 10k." The electronic voice said. "Luo Feng please prove that you are a blood warrior and place the blood river medal on the desk."

Chi!

The cloud contact armor on his body automatically separated, revealing his bare chest. Luo Feng triggered the blood river energy within and a red engraving appeared on his chest. Even though it was simple, it was complete and infused with incredibly mysterious energy and power. This in turn, completely raised Luo Feng's melding with the universe laws and energy by one fold. Simultaneously, he tossed out the blood river medal onto the table too.

The blue light scanned Luo Feng and the table.

"Verified!"

"Luo Feng, congratulations on completing the 2nd mission, becoming a blood warrior and acquiring a blood river medal. Points awarded 100k." The voice spoke.

Luo Feng smiled immediately.

"Luo Feng." A cold lady's voice suddenly resounded. "I'm messaging you via the virtual universe network. This contact will be classified and divulging of this contact is forbidden."

"Ah..." Luo Feng was stunned.

"Yes." Luo Feng reacted.

Classified?

What classified?

"Don't be nervous, we interview anyone that enters Blood River world." The cold lady's voice sounded. "Since you were able to become a blood warrior and were able to hand in one more crystal. I assume that you should still have extra blood river crystals on you."

Luo Feng was shocked.

Blood river crystals...

He couldn't even see any way to buy this within the treasure trove!

"The blood river crystal is unique only to Blood River world. Even in the vast universe, it's regarded as an extremely mysterious and valuable crystal. Hence, it is very important. Among our human race, It is considered as a prohibited item, prohibited as in it's forbidden to buy and sell this item. The moment such an action is discovered, the Virtual Universe company, Huge Axe dojo, Universe Mercenary alliance, Universe 1st bank, and Universe Galaxy bank will immediately act and collect all the crystals and punish the person heavily."

Luo Feng was shocked.

Prohibited item?

Just like how star annihilator cannon was an extremely rare item to the universe countries, this crystal was actually a prohibited item and forbidden from sale?

"The way you acquired your crystals was legal and appropriate, we will not snatch them from you." The cold lady continued. "However, there are certain things you need to know. You are definitely not allowed to sell it to others, and can only use it for yourself. If you wish to give them to others...please first send a request to our Virtual Universe company. Once the request gets approved, you can then pass it on to that individual. Also, if you wish to sell the crystals, our Virtual Universe company will be in charge of purchasing them from you. Each crystal will be worth 600 points."

Luo Feng's heart was beating fast within.

He had many crystals!

Of course there was nowhere else in the universe that these crystals can be found in, only in Blood River world. However, the amount of crystals in Blood River world was plenty. But now, he was finding out from this higher level member of the Virtual Universe company, that it was prohibited. So much so that even giving them as a gift required permission, and if the request didn't go through, he couldn't even gift them!

"The Virtual Universe company has many geniuses. In theory, with so many crystals, giving three to each of them shouldn't be anything." Luo Feng thought. "However it's obvious that the 5 leviathans are controlling it very strictly."

"Are you willing to sell your crystals?" The cold voice resounded.

600 points for 1!

Luo Feng currently had close to 10k crystals. If he sold them all, he would get over 5 million points.

My god.

That was a huge sum! Because according to what Luo Feng knew, the undyings could exchange money for points, 1 mixed element for 1 point.

"If I had known, I would have acquired more." Luo Feng thought.

"Are you willing to sell your crystals?" The cold voice asked again.

"I don't have that many, I wish to continue to absorb them." Luo Feng said.

"Hm." The cold voice didn't continue about the matter. "Our conversation ends here, whatever was said today is classified and not to be divulged."

"Yes." Luo Feng nodded.

After which an electronic voice resounded within the cabin, "Luo Feng, the verification is over, you may leave." Simultaneously, the door opened.

...

Standing on the grass, he looked up at the blade shaped ship swiftly vanish into space. Luo Feng had a frown on his face.

"Luo Feng, I dare guarantee, that the blood river crystals should still have some other special uses! If it were simply for absorption, the Virtual Universe company need not keep such a tight reign over it, and be so stingy to its geniuses." Babata shouted. "There's only one answer. And that is, that they have other uses for it, and I dare say that it's for the absolute warriors amongst the undying, or even the universe country leaders and knights. Hence, they are prohibited items."

Babata's views were much more vast than Luo Feng's.

Back then, he had followed Hu Yan Bo throughout the universe to explore, and experienced the dangers of life and death battles, while mostly dealing with undyings! Naturally he saw things much clearer.

"Ah?" Luo Feng thought.

"Geniuses are geniuses. However, the true pillars of humanity are the undyings, like True Yan emperor and so on. And then there are even stronger knights and universe country leaders. These eternal beings are the true pillars of humanity in the vast universe. As for the items they require, naturally they wouldn't let you geniuses have them. Didn't they already give you the chance to enter Blood River world? Giving you that one chance is already good enough of them." Babata said.

Luo Feng nodded and communicated through his consciousness, "I understand! I just felt that the blood river crystals were very important, hence I didn't sell them."

Close to 10k crystals...

If he wanted to sell them, there will always be a chance in the future. But until he discovered if they had any other uses, he couldn't bear to sell them.

"Selling is easy, but buying is hard. As it's a prohibited item, there's nowhere else to buy from." Luo Feng thought.

Virtual universe, Yu Xiang mountain, absolute beginning region.

Luo Feng once again entered and sat at his desk. He opened the treasure trove file in his laptop and discovered that his points had changed.

Points, 184,660.

"It's enough now."

Luo Feng smiled and swiftly opened the technique file, quickly finding the extremely expensive Time Space Scribbles. After having tasted its benefits, he didn't even hesitate and immediately chose to buy the first three volumes. There was no other way, no way to simply buy just one volume. Hence, he could only do it this way.

"Exchange successful!"

"Deducting 100k points, remaining points 84,660."

"Please wait a while, someone will deliver it immediately."

The page had three consecutive notifications.

Looking at his remaining points, Luo Feng couldn't help but exclaim, earning the points really wasn't easy. He took 80 years to finally absorb all three crystals, and that was because his willpower was incredibly sturdy, and he was able to rush into the whirlpool core. Otherwise, how long would it take, if he stayed outside the core for him to complete the 2nd mission?

100k points was indeed hard to earn!

"The true reward this time is still the close to 10k blood river crystals. Getting so many of them was still much easier than actually absorbing the three. And the virtual universe is willing to pay 600 points for each of them. I can sell them anytime, buying them however is impossible!" Luo Feng understood, only universe level geniuses could accept this mission.

Once he reached domain lord level and head out into the fields, there was absolutely no chance of acquiring more crystals.

"Blood river crystals!"

"Their true worth definitely isn't just 600 points, I'll just wait. Maybe it'll give me a surprise in the future." Luo Feng thought.

Chapter 544: Attempting Sky Mountain

After a while, at the entrance of the Absolute beginning region entrance.

"Your majesty Luo Feng, this is the case of manuals we just received, it's what you ordered." Lady Fox waved her bushy tail and handed over the case.

"Thanks." Luo Feng received the silver case.

It was finally here!

This was the 3rd manual of Time Space scribbles that was worth 100k points, (as he had already acquired the first two volumes, the Virtual Universe company only sent him the 3rd).

Carrying it, he turned and rose into the sky.

"Luo Feng, you mad man, stay there!" A voice resounded.

Luo Feng turned around to look. In the distance, a silver light landed on the grass. It was the silver armored black haired youth Wuka. This manka prince's body growth was indeed slow. Even after such a long time, he still hadn't fully matured.

"Why are you shouting at me?" Luo Feng smiled and walked over.

"In our past, we have had few star fragment meetings, even had the huge party for the absolute beginning members. But, you've yet to attend even one of them. Damn, recently even in the virtual universe you've completely disappeared." As he spoke, he punched Luo Feng in the chest unhappily.

Luo Feng was initially shaken but diffused the punch.

"These past few months have been critical, hence I haven't come online." Luo Feng explained. These past few months, he had acquired the beast god statue and had a miraculous encounter in Tian Shi palace. It has indeed been a few months since he's come online.

"Ah, Luo Feng." Wuka's face grew mysterious, as he said softly, "Let me tell you a secret."

"What secret?" Luo Feng asked curiously.

"I just came from the Battle arena, and I got some news. Today, Bolan attempted the heavenly bridge." Wuka said softly.

"Again?" Luo Feng was shocked.

Every 3 levels of the bridge was a breakthrough point. The higher the levels, the harder it got!

1-3 levels, 4-6 levels, 7-9...

He had spent 80 years in Blood River world. Bolan, Long Yun, Rong Jun, Wuka, Qian Shui, Jia Lai Xi etc all had chosen their own paths, all improving both slow and quick. However, everybody would still occasionally attempt the heavenly bridge! During which most of them had all improved.

However!

Bolan was on the 6th level back in primal chaos city, and over these 80 years, this absolute genius had been working hard. However, he still hadn't passed the 7th level of the bridge! It was obvious that the 7th level was extremely difficult!

Right now, in his batch...

Three people had reached the 6th level, Bolan, Rong Jun and himself! Bolan and himself had long reached the 6th level. Rong Jun just managed to do it after 80 years.

And there were four people on the 5th level currently.

"He attempted it again, did he pass?" Luo Feng asked.

"Hehe." Wuka mocked softly. "That proud punk, he just failed two years ago and attempted again today. However, he still failed...haha...would the 7th level be that easy? The difference in difficulty from the 6th to the 7th, is even more than the difficulty from levels 1 to 6 added together!"

"Failed?" Luo Feng nodded.

Right.

His 80 years had many miraculous encounters. The three bodies were all working in unison, along with the raised comprehension and melding from blood river energy. Even after all this, he still didn't have a guarantee of passing the 7th level.

"Work hard." Wuka said. "Rong Jun, that Savage had just reached the 6th level not long ago. It'll be at least a few hundred years before he reaches the 7th. Right now in our batch, the fastest to reach the 7th

is only you and Bolan! Luo Feng, you have to live up to the reputation of our absolute beginning's three heroes."

"Get lost." Luo Feng couldn't help but laugh and scold him.

Absolute beginning's three heroes?

Hearing that name, he had goosebumps all over. This was because, among this new batch of geniuses, himself, Rong Jun and Wuka, were close, and their performance was good. Naturally, others would lump them as a group. This prince Wuka however was very proud of the title of absolute beginning's three heroes.

Luo Feng wasn't used to it, Rong Jun too would frown dissatisfied, Wuka however was very proud.

"I won't speak anymore to you, I'll return first." Luo Feng said.

"Ah, what did you buy?" Wuka looked curiously at the briefcase in Luo Feng's hands.

"Time space scribbles." Luo Feng said.

"3 volumes? That's 100k points!" Wuka stared wide eyed, saying, "You ruthless, you sure are wealthy!"

Luo Feng didn't chat more and immediately flew up.

Sou!

He soared through the skies and quickly returned to his villa.

...

Within the study, he sat before his desk and held his breath as he opened the case.

Within it was a thick metal book. This book was 50cm long, 40cm wide and its thickness reached a shocking 50cm. Just how big was it? A half a meter thick book, was much thicker than both earlier volumes. The entire book was still using the gold colored metal pages, and there were a total of 1,000 pages.

"The 3rd volume!"

Luo Feng looked like a hungry wolf staring at a sheep. His eyes gleamed, and he didn't care about anything else, immediately opening and beginning to study it.

...

This Time space scribbles' 3rd volume reflected the Rainstorm picture. As he studied this, the golden horned beast still focused on studying the beast god statue's Tearing sky and land everyday, focusing on the 1st claw. These two will resonated and Luo Feng's level simply rose at a very obvious rate.

Learning is easy, application and fully grasping it however is difficult. Truly comprehending the 108 wonders was an extremely hard thing to do!

Luo Feng was currently working on the Rainstorm picture with a slight sense of comprehension.

...

"Luo Feng, there's mail. It's from the Virtual Universe company." Within the training grounds, Luo Feng sat crossed on the alloy ground. He flipped the thick Time space scribbles before him, and occasionally controlled the Nan Shen Armament to practice, as countless dark gold little blades floated and danced in mid air.

"Ah?"

Luo Feng's thoughts moved.

Shua!

Countless little golden blades acted like birds returning to their nest, all entering the dark golden long rod on his back.

"Mail?" Luo Feng immediately pointed in mid air and a screen appeared, and on it displayed was the mail he just received.

"Secret region qualification battle?" Luo Feng looked at the subject. With a thought, he quickly opened and read on.

The level of the Virtual Universe company's core members were separated, from high to low, and also into the primal region, absolute beginning, Sky and Land and Last Phase regions.

It wasn't such that if one entered the Absolute beginning region, he would remain in there forever! There was intense competition amongst the core members. The weak were knocked back into the lower regions and the strong would remain. The stronger ones even got to proceed into the higher region! Competition was always present!

If one didn't work hard...

During the genius battle, one may be the number one genius, entering the primal region. However if he didn't work hard, he may be knocked down into the absolute beginning region during the secret region qualifications. During the 2nd time, he may be knocked into the sky and land region!

Resources were limited!

The human talents were unlimited!

As time passed, new batches of genius would always present themselves. If one's strength didn't match the absolute beginning region, he would naturally fall into the sky and land region.

...

Yu Xiang mountain's primal region members, according to strength were separated into sector lord, domain lord and universe level.

Within the primal region, there were 100 sector lords, 10 domain lords and 3 universe levels!

Absolute beginning region, 1,000 sector lords, 100 domain lords and 30 universe levels!

Sky and land region, 10,000 sector lords, 1,000 domain lords and 300 universe levels!

Last phase region...if a core member failed the competition, he would be dropped into the last phase region, this was the final step.

Of which...

The universe level members would compete every 100 years!

The domain lords would compete every 1,000 years!

The sector lords would compete every 100,000 years! As the sector lords would mostly be stuck at the pinnacle for very very long. Hence, every 10,000 years the Virtual Universe company would organize a genius battle and hero battle, during which, it absorbed a few geniuses here and there, along with some genius sector lords that pop out later. Thus, the number of sector lord geniuses were the most. Even with 100 slots on the primal region namelist, the competition was still extremely intense.

100 slots...

For the many from the genius battles, hero battles and others to compete for.

...

Luo Feng thought as he looked at the screen, "Qualification battle?"

"I'm currently universe level. This means that there'll be a battle every 100 years, and its beginning in 6 years?" Luo Feng thought. "From the mail, the primal region slots have extremely intense competition, and not just from people from the same batch. One will also battle with the earlier generations and seniors."

"The qualification battle is very tragic!"

"However, to enter the primal region, other than the qualification battle, there's actually another way?" Luo Feng smiled as he looked at the mail.

The Last Phase members want to enter the Sky and Land region.

The Sky and Land members want to enter the Absolute beginning region.

The absolute beginning members want to enter the primal region!

How is this supposed to happen?

There were two ways. One, was the qualification battles and the second was attempting Sky mountain!

The qualification battles belonged to a large scale elimination battle. The universe level members would compete amongst each other, finally picking the victors. This occurred every 100 years. And at sector lord level...it took place every 100,000 years!

However attempting Sky mountain was different.

The core members could attempt at anytime. There were a total of three sky mountains...primal sky mountain, absolute beginning sky mountain and sky and land sky mountain. If one Last phase member were to pass all three sky mountains consecutively, then he would immediately rise to become a primal region member!

"According to the mail, as long as I pass the primal region sky mountain, I can enter the primal region?" Luo Feng's eyes gleamed.

"I'll give it a shot!"

"After studying the 3rd volume of the Time space scribbles for a couple of months, my understanding of the rainstorm picture has grown. I can even maintain Blade world for 30 seconds now! During a battle between the strong, 30 seconds is enough." Luo Feng thought, "I'll attempt the primal region sky mountain."

Virtual universe, a specially opened space.

There was a huge piece of land there, and on it were three majestic mountains. Each one higher than the other!

"This is the Sky mountain?" Luo Feng carried on his back the dark golden long rod and looked up at the three majestic mountains. At the halfway mark of each of the 3 were glowing golden words, Sky and Land, Absolute beginning, Primal! Of which, the primal sky mountain was even bigger and taller!

Sou!

Luo Feng became a beam of light and flew straight at the primal sky mountain.

Chapter 545: 1 v 3

Primal Sky mountain was over 10,000 Li high, and was majestic and wondrous. It was a specially opened space by the virtual universe, and it was the tallest mountain here.

A beam of light stopped at the foot of the mountain. It was Luo Feng, who was carrying a dark golden long rod on his back.

"Ah?" Luo Feng looked ahead. There laid a tall and sturdy bull man with horns on his head, and beside him was a terrifying huge axe. His snores sounded like thunder, and he had saliva drooling from his mouth, flowing down his face full of fur, landing on the black stones beside him.

That bull man seemed to realize something and he opened his eyes curiously. He looked at Luo Feng and immediately got up, laughing loudly, "You are here for the primal sky mountain?"

"Yes." Luo Feng nodded.

"Haha, there's someone finally here to play with me." The bull man laughed loudly. He raised his head and roared, "White ape, Snake, get over here!"

His voice boomed and resounded.

Sou! Sou!

From two different directions, two silhouettes flew out. On the left was a golden fur skinny ape man dressed in silver white armor, and he carried a black bamboo pole on his back. And from the right was a seductive lady with a snake tail, dressed in a translucent cotton dress.

"Bull, Ape and Snake?" Luo Feng frowned.

The Apemen was a huge race(as far as numbers were concerned) within the human race, just the apemen alone could be separated into many other categories. When compared to them, the bull man's numbers were weaker than the apemen, and the snake people's numbers were much lesser. It's only considered rare only in this comparison, the snake people were still a commonly seen race in humanity.

"Hehe, finally there's someone here to attempt the Primal Sky mountain." The skinny apeman stooped and mocked.

"Let me see his background." As the seductive snake lady spoke, her shockingly long tongue would extend out occasionally, after which her crystal like eyes stared at Luo Feng. "So it's your majesty Luo Feng from the absolute beginning region. He is a new person, yet he dares attempt the sky mountain."

"Snake, don't scare him away." The Bull man roared. Looking at Luo Feng, "Your majesty Luo Feng, the rules to attempt the sky mountain are very simple. You only need to kill all the guards at the foot, waist and peak of the mountain. Then, you'll be considered to have passed the sky mountain! The three of us are the guardians of the mountain base!"

Luo Feng nodded.

Kill all the way to the peak?

"Will you still attempt it?" The bull man roared.

"I will." Luo Feng nodded.

"Haha, White Ape, Snake, attack!" The bull man roared excitedly. He immediately grabbed that terrifying huge axe and with a step, the entire ground shook. Swiftly, he rushed towards Luo Feng. As the axe was already in position, a blur of a yellow axe slashed out.

Chi chi...

With the swing of that axe, even the space around was scarred.

"Hehe!" That skinny ape man mocked. While he was standing on a stone, from behind him, the black bamboo pole flew out. It seemed to instantly grow longer. There were a total of 9 joints on it, every one disconnected with countless threads weaving through.

It formed a 9 joint whip! This, was a level 3 spirit weapon... "Arc Serpent."

Sou!

The blurry silhouette immediately pierced forward like lightning. With precise control, it actually reached Luo Feng before the bull man did. Like a venomous snake, it was trying to bite him.

"Hmph!" The snake lady snorted, her eyes gleaming purple.

A formless spirit energy immediately headed towards Luo Feng.

...

In an instant, the bullman, skinny ape man and the snake lady all attacked simultaneously. In terms of speed, naturally the spirit energy was the fastest, and it pierced straight into Luo Feng's consciousness!

Within his consciousness.

A vast void pagoda stood there. It was exquisite, and glowing gold in color, with a total of 3 levels. His comprehension of the laws had allowed him to reach the 3rd level of the void pagoda. Actually, not long after he left primal chaos city, he already reached this 3 level pagoda!

Over these 80 years, he wanted to reach the 4th level, but it was obviously still not enough.

"Rumble!" The spirit energy crashed into the void pagoda, it slightly shook but remained undamaged.

"You think you can hurt me with just that?" Luo Feng stood on the dark cloud shuttle. His killing intent was fully unleashed, "Go and die all of you!"

Rumble!

The dark golden long rod from behind immediately shot out countless gold light, a blur of little golden blades shot out countless threads, connecting directly through the universe space and gold laws. The two laws through the Nan Shen Armament fused perfectly, even the lofty mountain vanished under the light.

A vast space, blade energy revolved.

Nan Shen Armament 6th level...Blade world!

"Dang!" A piece of blade energy immediately attacked that arc serpent that had become a black light, knocking it backwards. In the distance, the skinny apeman immediately went pale, and his expression changed. "Nan Shen Armament's Blade world!" Simultaneously, he communicated, "Snake, attack his soul. Once you disperse his consciousness, his blade world will crumble!"

"You don't need to tell me!" Her expression was cold. A formless spirit energy once again attacked Luo Feng.

"Dang!" The condensed blade energy knocked away the arc serpent and rushed towards the bull man's huge axe.

The bull man felt a powerful force heading his way past the huge axe. He trembled and couldn't help but retreat, spitting out fresh blood.

At the same time...the spirit energy attack that the snake lady had unleashed clashed with Luo Feng's void pagoda.

"Go and die!" Luo Feng stared at the bull man.

Xiu!

The condensed blade energy followed and with a flash and pierced through his forehead, it left a hole, as his body fell.

Bullman was dead!

The skinny ape man and snake lady stopped their attacks.

"Your majesty Luo Feng, you actually defeated bullman? You've passed this mountain foot." The skinny apeman said.

"Congratulations." The snake lady said.

"What a powerful illusion, however it's far from enough, break!!!" Luo Feng's heart was like a mirror, seeing clearly through the distractions. His consciousness was like a blade, becoming a heavenly blade that slashed through the scenery around. Immediately the illusion was destroyed and the scene vanished.

As the illusion vanished, his expression changed.

A black light had already reached before him. That bull man with blood on his mouth roared as he rushed over, and in the distance, the snake lady was filled with shock, "He actually broke through my illusion that quickly!"

"That illusion sure was terrifying." Luo Feng was shocked.

Before, when he had heavily injured the bull man, he had already fallen for the spell. The bull man he killed was all an illusion.

"This snake lady's illusion has already reached such a level. The bull man and apeman are definitely not to be messed with either. When they clashed with my blade world before, they were only injured and not killed." Luo Feng immediately had many thoughts in his mind, simultaneously brandishing a blood shadow blade and a 6 edged shield.

A resplendent flash of a blade!

Illusionary 7 blades...Dutchman's pipe!

"Dang!" The black light was knocked away.

"Die!"

The vast blade world immediately sent a piece of the energy straight at the snake lady. Her expression changed and she roared mentally, "You two, come back and help me block it!!!" Simultaneously a black shield with snake engravings appeared before her. As a hypnotist, her control of spirit weapons had to be almost as good as a controller.

"Ah ah ah ah!" The bull man roared over. However, a fighter's speed was far from blade energy or spirit weapons.

"Go and die!" The apeman controlled the black light, piercing towards Luo Feng.

Dang! Dang! Dang! Dang! Dang! Dang! Dang! Dang! Dang!

With the shield and blade, even though he was disadvantaged, he still managed to block the attacks.

"Hmph." Luo Feng's eyes flashed with a chill as he blocked.

Chi! Chi! Chi! Chi! Chi! Chi! Chi! Chi! Chi!

Simply using his blade and shield allowed him to block the apeman's attack. Hence, Luo Feng focused his blade world on the snake lady! With the condensed blade energy, it madly surrounded and attacked her and in an instant consecutively attacking her tens of times.

Chi!

The Snake lady's spirit weapon was obviously unlike her illusion abilities, finally the blade energy pierced through her head.

"I can't maintain this for much longer." Luo Feng's expression changed.

As he was focused on both using his blade and maintaining blade world, it was extremely taxing.

"Ah!" The bull man raged, reaching beside Luo Feng.

"Xiu!" The black light was as fast as lightning, once again reaching Luo Feng.

"Dang!" Luo Feng gathered some blade energy to once again block the black light.

Rumble!

The vast blade world collapsed revealing the many little golden blades that immediately regrouped. Half of them immediately became a huge golden long blade, that blade immediately shot at the bull man rushing towards him. It was the Nan Shen Armament's 5th level...Space slicer!

"Go and die!" Luo Feng's blood shadow blade immediately unleashed the 7th technique in the illusionary 7 blades, Burial!

The flash of his blade was savage!

Filled with endless killing intent!

"Ah!" The bull man howled and swung his huge axe.

Dang!

The golden long blade smashed into his huge axe, causing it to disperse into 2000 little golden blades. His axe too however was knocked aside and Luo Feng's blood shadow blade slashed at that moment!

Chi!

The bull man was sliced into half from his head to his feet!

"Block!" As he killed the bullman, Luo Feng used the 6 edged shield to block the Arc serpent piercing from behind.

"Rumble!"

As the black light clashed into his shield, the 9 joint serpent black light actually waved its tail as fast as lightning, and pierced through Luo Feng's head, as red and white splattering.

Luo Feng was killed!

"Damn, two of us actually died due to him." The skinny apeman let out a sigh of relief, he couldn't help but feel shocked.

Beside, the bull man and snake lady revived. She looked as Luo Feng's body vanished, shocked, "My illusion and abilities, actually couldn't affect him!"

"This is only a newbie and he actually managed to kill 2 out of 3 of us?" The bull man stared.

...

Yu Xiang mountain, Luo Feng sat in his study.

"I actually wasn't able to even pass the foot of the mountain." Luo Feng shook his head. "Hm, in times of crisis, I still cannot maintain the blade world long enough. Just maintaining the blade world alone, I can only do it for 30 seconds. However...while using the blood shadow blade and shield, and maintaining blade world simultaneously, the time I can do it is cut short by a lot."

"My comprehension is still lacking!"

Luo Feng recalled the battle before, reflecting on the flaws and failures...

After a while.

"Luo Feng, your teacher True Yan Emperor is requesting a call." The fist sized demon Babata on his shoulder shouted.

Chapter 546: Five Warriors

"Teacher?" Luo Feng stood up. His demeanor was humble. Simultaneously, he opened the screen.

On the screen, one could see a pavilion, which was erected on a reef, and below it was True Yan emperor lifting a wine glass. in the distance behind him was a luxurious and majestic palace, and on it were two large golden words True Yan.

"That should be his shrine in Thunder Island." Luo Feng thought.

"Luo Feng." On the screen, True Yan smiled and shouted.

"Teacher." Luo Feng bowed respectfully.

"You should have already received the mail the Virtual Universe company had sent." He said, eyes mocking, "Don't you really wish to make it into the primal region?"

"Hm." Luo Feng nodded. After which, he shook his head helplessly and said, "Teacher, after reading the mail, I learnt that there were two ways to enter the primal region. One of them was the qualification battles and second was the Sky mountain. I just went to try the sky mountain..."

"Pffff!" True Yan spat out the wine, and his golden furred face started laughing, "You said you just attempted sky mountain?"

"Hm." Luo Feng nodded.

"Failed?"

"Hm." Luo Feng nodded.

"It'd be weird if you didn't!" True Yan couldn't help but mock him. "Looks like you really don't know anything about the sky mountain."

"I just read the mail and found out about it." Luo Feng said.

True Yan couldn't stop laughing. "3 sky mountains, the core members can attempt them anytime! As long as one passes it, he'll immediately rise to a higher region. It sounds perfect, however, do you think the difficulty would be that simple? Do you remember your 7 storey pagoda trial during the genius battle?"

Luo Feng nodded.

He had lost at the 6th storey's 1st level of the pagoda, and Bolan actually made it to the 7th storey.

"There is a reason behind it!"

"The 7 storey pagoda was set up so that there's almost no hope of passing!" True Yan said. "This sky mountain is the same! The difficulty is extremely high. Yet, you wish to enter the primal region by passing sky mountain? I'll tell you this, even if the primal region universe level members all went, none of them would be able to pass their own primal sky mountain."

Luo Feng was stunned.

Even if it's the primal region members, none of them could pass the primal sky mountain?

"Do you understand?"

"If you can pass the primal sky mountain, that would mean you are even stronger than the same leveled primal region members! Naturally, they'd give you the position then." True Yan said, "As for just how hard it is, you've already tried it. Where did you fail, foot? Mid or peak?"

"Foot." Luo Feng was somewhat ashamed, "I killed two of them, before I failed."

"Being able to kill two is already not bad. How long have you been nurtured in the Virtual Universe Company?" True Yan said. "As for the difficulty of the sky mountain, the foot, mid and peak all have three guardians."

"The guardians are all fighter, spirit reader controller and hypnotist."

"The three of them will gang up on you."

"Even if the three of them are weaker than you by a little, with their combined forces, and by working together, they become extremely strong." True Yan said. "The mid mountain guardians are 10 times stronger than the foot! The peak guardians are 10 times stronger than the mid section!"

Luo Feng stared, "How can that be? Doesn't that mean that the peak guardians are 100 times stronger than the ones at the foot?"

"Right, 100 times." True Yan nodded.

"When unleashing the blade world, I can maintain it for 30 seconds. Unleashing blade world at universe level 9, even in the vast universe, wouldn't that be absolute already?" Luo Feng was clear on his status, True Yan nodded, "Yes it's absolute."

"I'm almost able to pass the mountain foot, and yet the peak guardians are 100 times stronger?" Luo Feng couldn't help but shout out, "How can a universe level 9 pass it?"

It was hard to imagine.

At universe level 9, there was still someone 100 times stronger.

He was able to unleash the blade world! And his willpower and consciousness was able to defend against hypnotism!

"Right, how can one pass?"

True Yan laughed too, "Hence, even the primal region universe level members cannot pass it!"

Luo Feng was stunned.

"The primal sky mountain is a benchmark! It was placed there for people to aspire at, for people to feel like they have a goal, and to never feel proud." True Yan said. "Hence, if you wish to rise to the primal region, the true path is the qualification battles!"

"Teacher?" Luo Feng thought.

On the screen True Yan emperor looked at him.

"Has anyone ever passed the primal sky mountain?" Luo Feng asked.

"Yes! Of course! And quite a few in fact!" True Yan smiled and nodded. "In this vast universe, with it's countless humans, many of them have had miraculous encounters. There are also strong characters with extremely high comprehension and great physiques...what hasn't there been? In the vast history, just how many geniuses have there been?"

"You and Bolan are but geniuses of the last 10,000 eras. And how long has the primal universe been around for?"

"Within the endless periods of time, geniuses stronger than you and Bolan by 10 to 100 hundred times have appeared, everything has happened before." True Yan shook his head. "The chances of a genius becoming a strong warrior are extremely high. However, there is still a large amount of them that fall. Back during my generation, of course 10s of thousands of years earlier, there was one called Kedi. He was named as a one in one hundred million eras genius!"

"Universe level, domain lord, and sector lord, these 3 periods, he directly passed the primal sky mountain, which is extremely miraculous and beyond compare. When he was in the outfield battles, he simply shocked the other races. During sector lord level, he was able to kill an undying with the title official!"

"A group of universe country leaders and knights competed to accept him as their disciples. Finally, it was the primal chaos city leader that accepted him."

Luo Feng was stunned.

Treating the primal sky mountain as a game? Sector lord level able to kill an undying with the title official? A group of universe country leaders and knights fighting to take him in?

Madness!

"And finally?" True Yan shook his head, "In a particular universe secret region, he died. When he died, he was sector lord pinnacle."

Luo Feng blinked hard.

"Saying someone is a genius, maybe if it's within a galaxy, indeed he would be number 1. However in a star field? In a universe country? In the entire humanity?" True Yan smiled, "Even if you are the number 1 genius in the universe of humanity, that's only 1 period of time. In 10,000 years, 10,000 eras, hundred million eras, the entire history of humanity? What are you against that."

Luo Feng couldn't help but nod.

"One should be confident, but not arrogant." True Yan shook his head, "That Bolan is too proud. Yet he doesn't know that the group of universe country leaders don't even favor him. Over their long life, they've already seen many geniuses similar to him."

"I understand."

"I will work hard, if others can pass the primal sky mountain, I too will work hard." Luo Feng said.

On the screen, True Yan was slightly taken aback before nodding.

"My reason for calling is to warn you about the qualification matches." True Yan said. "These matches, firstly it is an internal battle within the absolute beginning region! There are a total of 38 in that region. The original 30, plus the 8 of you new people."

Luo Feng nodded.

"38 decisive battles, picking out the top 3."

"The strongest 3 will have the right to challenge the people of the primal region. Of course, very few have ever succeeded." True Yan said, "What I want to talk about now is your internal battle between the 38."

"You, Rong Jun and the rest of the 8 are all new people."

"And as for the old people of the universe level, some of them have been nurtured for 1,000 years, and many for thousands of years." True Yan said. "Right now, of these 30 old people, 5 have passed the 7th level of the heavenly bridge and 25 have passed the 6th."

Luo Feng couldn't help but stare.

This, this...

30 old people, 5 have passed the 7th level? And the rest have all passed the 6th?

"That's not strange at all. If Wuka and the rest train for thousands of years, they'd all be able to pass the 6th level as well." True Yan said. "Time, that's the power of time! Your talents may be high, but they've trained longer."

"Why have they not broken through to domain lord after so long?" Luo Feng couldn't help but ask.

That was simply bullying.

The new people would be crushed. 30 old people and 5 of them had already passed the 7th level!

"Bottleneck, to these geniuses, they can definitely pass it in a 1,000 years." True Yan poured his wine, downing the glass and pouring yet another. "However, the universe level is one that allows them to take missions and earn points! And it is also a good time to lay down solid foundations, naturally their achievements would be higher later."

"Since their life spans are long, what's thousands of years in the universe level?"

"No one is stupid, they are all taking the chance to earn points."

"And because of this, one can only take 10 missions every 100 years! And the safe level, normal, difficult, dangerous, suicide levels, every one of them have limits to how many you can take." True Yan said.

"This, this is simply bullying." Luo Feng couldn't help but say.

"They too were once new people." On the screen True Yan said. "You are still ok, staying in the absolute beginning region shouldn't be a problem. However Wuka and the rest of them, they'd probably be knocked back into the sky and land region."

Luo Feng was silent.

"Your greatest enemies are those 5, the 5 who've passed the 7th level of the heavenly bridge." True Yan said.

"5, the 5 from the 30 old people?" Luo Feng frowned.

5 great warriors.

The talents of these 5 people were at least Wuka's level, and with such long time to train and grow, they would have taken many missions and had much experience.

"Work hard."

"Your opponents are them." True Yan said. "This is your first qualification battle. There's not much of a chance to enter the primal region. My request for you is for you to make it into the top 3 of the absolute beginning!"

After the call ended, Luo Feng sat in his room for awhile.

"My initial plan was to make it into the primal region. But the old people of the absolute beginning are actually that strong...teacher wishes for me to make it into the top 3?" Luo Feng thought. "A soldier that doesn't wish to become general is not a good soldier. If I don't even dare to dream about entering the primal region, than I'd be useless."

"This time!"

"I definitely have to make it into the primal region!"

"6 years, I still have 6 years." Luo Feng thought. As for these next 6 years, he already gave up on the initial plan. He already had a general idea for his plan for the next 6 years.

"My strengths!"

"My advantage is my strength and I will further strengthen them as much as possible."

Chapter 547: Attempting the Heavenly Bridge 7th level!

What was Luo Feng's greatest strength right now?

It was the right claw of the golden horned beast with 97 blood river stones within, the beast god statue, the 3 ancient pictures, Tearing Sky and land, the combination of those 4!

Before he went to Blood River world, his greatest strength was the Moshu clansman, the 9 universe tablet, Time space scribbles! The Moshu clansman studied the space laws, hence it was extremely fast. It even once resulted in Luo Feng's comprehension of the gold laws lagging behind the space laws!

But now, things were different!

The golden horned beast was naturally proficient in the golden origin laws. Through unleashing the right claw's 1st claw, its fusion with the universe energy was raised by 10 times! Its body itself was already absurdly strong, and 10 times stronger, with the fusion of space comprehension, it wasn't weaker than the Moshu clansman anymore!

With this level of comprehension of the two laws, when training Tearing sky and land, what kind of shocking speed would that result in? This was after all a technique created by the earlier generations of golden horned beasts, it was naturally suited for it.

The beast god statue and 3 ancient pictures were profound, but that's only because they had no specific training methods.

Tearing sky and land however had a specific training method.

The two of them resonated!

Just the improvement speed alone of the golden horned beast studying Tearing sky and land's 1st claw was shockingly fast. Especially in these few months, since he acquired the beast god statue, his own improvement speed left Luo Feng somewhat speechless.

"My strongest attribute in training is the 1st claw."

"In battle, my strength is, being able to use both spirit reader side and fighter." Luo Feng quickly organized his thoughts, "The mosha clansman is actually supposed to train the illusionary techniques, instead...I'll let it work with the golden horned beast and train mainly on Burial."

Burial and the 1st claw.

In terms of law usage, these two were the closest, this was what made burial become the Mosha clansman's strongest move.

"When I get into close combat with the enemy, I'll simultaneously use my spirit weapons! When I attempted the sky mountain earlier, I relied on this to kill two of them." Luo Feng thought.

In terms of close combat ability.

Luo Feng was able to use one blade to withstand that bull man, and the ape man's spirit weapon. It was only slightly disadvantaged...and while using the Nan Shen Armament's 5th level, Space slicer was actually knocked away by the bull man. Only when using the 6th level's blade world was he able to pressure him.

"My close combat strength is slightly weaker than my spirit weapon, but it's not that far off."

"I'll focus more on Burial for awhile, and with the 1st claw's help, the improvement will be very fast." Luo Feng smiled. If he were to be caught in a stalemate using the Nan Shen Armament, during the critical time, he'll use the blood shadow blade to close in and kill. That was akin to having a trump card when needed.

How strong was Luo Feng's close combat...

No one really knew, even True Yan emperor only knew of what Luo Feng had accomplished back in primal chaos city, that move that Luo Feng used to pass the heavenly bridge. During that time, his close combat was far weaker than his spirit weapon.

As time passed, the universe humanity's most elite universe level geniuses all made their preparations for their qualification battles.

Luo Feng didn't dare relax either. The golden horned beast and the mosha clansman worked on their 1st claw and Burial, Time space scribbles, 9 universe tablet, 9 black fireballs, he replayed all these scenes over and over etc. Everything resonated with each other, and when he had any questions he would go ask his teacher True Yan emperor.

"Luo Feng, how is he improving so quickly?"

"Luo Feng, you are sure you can unleash this page's technique in the time space scribbles? Show it to me first." True Yan watched as Luo Feng did it successfully. He stared hard, "Madness, how are you improving even faster than in Blood River world by so much?"

True Yan was shocked.

Luo Feng didn't dare relax even after.

...

It had been half a year since he returned from Blood River world.

Virtual universe, Heavenly bridge.

On that beautiful island in the center, a black star robed watchman Bevin was shocked to see Luo Feng appear out of thin air. "Luo Feng, since you passed the 6th level, you haven't returned at all."

"Yes." Luo Feng nodded.

"Are you going to attempt the 7th level?" Bevin laughed.

"Hm." Luo Feng nodded.

"You look very confident." Bevin smiled and pointed into the distance, "There's no one on the 9 universe bridge. I wish you all the best. If you can pass the 7th level, you'll have truly exceeded Bolan!"

"I believe I can succeed." Luo Feng smiled, after which he became a beam of light rushing into the distance of the 9 universe heavenly bridge, and flying swiftly up the many levels.

7th level, this was a vast space.

The bridge extended into space itself. At the end of the bridge, there floated a small meteorite that had a diameter of 1km. Luo Feng, who was dressed in his dark red armor stood on the other end, staring at the floating meteorite.

"Pick your opponent. Fighter, controller, hypnotist, pick one and if you defeat him, you'll have passed the 7th level. A hoarse voice resounded from the meteorite.

"Controller!" Luo Feng said.

Pa!

A small stone broke off from the side of the meteorite, landing on the bridge itself. It rolled about slightly on the bridge before transforming into a blue armored masked warrior, who stood on a dark cloud shuttle, and carried a dark golden long rod controller.

"Universe level 9 youngster, haven't seen you in awhile." The blue armored man's voice was old.

"I wouldn't come unless I had the confidence." Luo Feng said.

"Very good!"

The blue armored man stood on the dark cloud shuttle and roared, "Let me see how much you've improved, since you have so much confidence."

Rumble!

The dark golden long rod he carried shot out 10 million gold lights. In an instant countless little golden blades shot in all directions, seemingly warping the entire land and skies. And standing on his own dark cloud shuttle in the distance, Luo Feng's dark golden long rod too shout out 10 million gold lights!

The two of them had similar moves! The land and skies around the two changed completely.

Rumble! Rumble!

The vast world had blade energy revolving. This was the blade world, the blade world the blue armored man formed clashed directly with Luo Feng's.

Rumble, Rumble, Rumble...

The two worlds collided, and countless blade energy clashed.

"Your improvement is shocking. However, your control of the blade world is still weaker than mine by a little." The blue armored man pointed at Luo Feng, "Go!"

Xiu!

The blue armored man gathered one thread of golden blade energy and shot at Luo Feng.

"My control of the blade world is weaker?" Luo Feng was still very confident. Actually, two months ago, he was already able to form a stable blade world! The reason he waited for two more months was to perfectly control the blade world and even under circumstance or pressure, to maintain his stable control of it.

Why he was slightly weaker was mainly because Luo Feng was multitasking. He was using only part of his consciousness to control the Nan Shen Armament. He was seeing how it would go.

"Then now, I'll use my full focus on the Nan Shen Armament. If I can win without using close combat, then there's no need for it." Luo Feng's eyes gleamed. The surrounding blade energy erupted, seemingly strengthened, immediately pressuring and pushing against the other blade world. Simultaneously, he pointed and shouted, "Go!"

A thread of golden blade energy shot directly at the blue armored man.

Chi! Chi!

The two condensed blade world energies formed incomparably, and the piercing blades that clashed, completely dispersed.

The further away from the body, the weaker and harder it was to control the blade world energy. Hence, every time it would be condensed closer to the body. Since, this was the strongest point!

"Chi!"

"Chi!"

Two threads of golden blade energy once again clashed and dispersed.

"Blue armored man, you are set to lose." After trying two attacks, Luo Feng didn't conserve his energy anymore, coldly ordering and pointing at the blue armored man.

Xiu!

A thread of gold blade energy shot at him.

"It's no use. You should go back and train further. Your power is close to mine, train another 3 years and you may pressure me. Train another 10 years and you'll be able to defeat me." The blue armored man controlled a thread of gold blade energy and shot towards Luo Feng to deflect his attack.

"Hmph." Luo Feng stared coldly at him.

Hu!

Luo Feng's attack actually swerved and dodged in mid air, not going head on against the blue armored old man's attack. While it dodged...it continued on towards the blue armored man.

"What?" The blue armored man's expression changed, "Then we'll risk it all!"

The two controllers matched off.

Especially in blade world, the two of them used their full strength to condense the blade energy! It was like two warriors holding their blades, slashing wildly at each other! This resulted in a heated exchange. If one was stronger and could block off one attack, he could then attack and kill the other, that would mean success.

And Luo Feng's move was made to not even block the attack against him, but slashing straight at his neck.

This was a suicidal move!

It was called...kamikaze!

"Xiu!" Luo Feng controlled that shot of blade energy till it reached right before the blue armored man, its speed was much faster than the dark cloud shuttle.

"Xiu." That dark gold blade energy reached Luo Feng too.

The two of them were both facing danger.

However, they had completely different methods to deal with it. A shield appeared before the blue armored man, and he used spirit energy to block it.

"Break!!!"

Luo Feng held one shield in his hand and a blood shadow blade in the other. With a roar, the blade pressured the space around, even affecting the blade world energy around it. This blade was filled with brutality, and was extremely fast. The edge of the blade glimmered gold and it slashed directly against that thread of gold blade energy.

Rumble!

Luo Feng felt the impact and was knocked back 10m. His blood was boiling within, however that dark golden blade energy was already dispersed.

"Chi! Chi! Chi!"

On the other end, the blade energy that Luo Feng controlled was as fast as lighting. The shield's movement speed couldn't keep up at all with it. After parrying two times, the 3rd time, it pierced through the blue armored man's head!

His body fell down...

Luo Feng looked at the blue armored body and said softly, "We both have the blade world. But my blade and the Nan Shen Armament isn't too different in level!"

The 7th level of the heavenly bridge, success!

"Bolan, I'll take the lead." Luo Feng smiled and rushed into the sky, headed towards the 8th level.

Chapter 548: Newbie Luo Feng

At the end of the heavenly bridge's 8th level.

Luo Feng looked at the floating meteorite, "Every three levels of the bridge is a breakthrough level. However, towards the end, it gets harder and harder, like the levels 19, 20 and 21, passing the 21st would make one a knight, an eternal being on the same level as the universe country leader. The 20th and 21st levels are incredibly difficult."

From the 7th to 8th, the difficulty may not be as jarring as from the 6th to 7th!

However it was still definitely more than from the 5th to 6th!

...

"Trying the 8th level at universe level 9, you are indeed exceptional. Right now, in the Virtual Universe company universe level, there's only one who has passed the 8th level." The blue armored man stood on the dark cloud shuttle, his eyes smiling behind the mask, "Receive this."

Rumble!

The blue armored man's dark golden long rod shot out 10 million gold lights. Luo Feng did exactly the same thing, as simultaneously, countless little golden blades shot in all directions, immediately connecting with the space, and gold laws. The land and skies changed in color, and in an instant the entire surroundings were filled with blade energy.

Still the same 6th level...Own world!

"Rumble!" The blue armored man controlled his blade world and violently smashed over. immediately Luo Feng's side began to crumble and split apart, the blue armored man's blade world however was still growing.

"Not good." Luo Feng's expression changed.

Sou!

He became a beam of light, wielding the blood shadow blade and rushing at the enemy.

"Chi!" A dark golden blade energy formed right before his eyes and pierced right through his head.

Luo Feng lost, the 8th level, failure!

...

"I actually lost like that." Luo Feng sat in his study, still shocked from before. "According to the information I've seen, this should be the blade world's Omnipresent level."

Nan Shen Armament's 6th level, Blade world was a very terrifying attack.

Just like the 1st level, forming one golden blade, up till 9.

The blade world too had different levels.

Luo Feng was currently only at the start of controlling it, and was able to condense 1 thread of the blade energy. He also had to be in close range to the enemy to do it! Because, as he got further away, the control would weaken, he still couldn't control it at will. However the 8th level opponent did it easily.

He gathered his blade energy in an instant and killed Luo Feng!

One had to reach a level of control of the blade world where one could easily do what he wanted, to make the blade energy omnipresent!

"The reason for my failure is due to the blade energy of the opponent being omnipresent, and I couldn't even defend." Even though he had passed the 7th level, he wasn't proud at all, but continued his studies as per usual.

Virtual universe heavenly bridge.

Watchman Bevin stared wide eyed, muttering, "The humans of the universe have trillions of races, I've already seen many geniuses. This Luo Feng however...he actually exceeded Bolan! Bolan's talent was incredibly shocking to countless people before. Interesting, this is getting interesting."

After which, Bevin sent out the news of Luo Feng completing the 7th level to the people involved, also sending it out to all absolute beginning and primal region members.

...

Yu Xiang mountain, primal region, Long Yun's training grounds.

In the vast training grounds.

Long Yun knelt on the floor, smashing fists after fist against the hallow ground.

Rumble! Rumble! Rumble! The ground shook and his expression was heavy. Every hit smashed the ground more, until a crater was formed.

"I said before that I would return proudly to Swelling water universe country."

"I said that I would become an absolute warrior in the universe."

"I said that I would always remain within the primal region." Long Yun gritted his teeth. His eyes were filled with veins. "Why, back then Luo Feng and I weren't too different in levels. However right now I just passed the 5th level and he's already passed the 7th?"

"I won't accept it!"

"I won't accept it!" Long Yun grit his teeth.

"Calm, I need to remain calm." He closed his eyes and mutter softly, "Yes, one step at a time. I cannot let him affect my emotions. If I am distracted, I'm bound to fail. I need to remain calm, calm."

Long Yun was a very low profile person, yet no one truly dared look down on him.

He was silent.

He had been alone all this while. In his genius competition batch, his talent may have ranked only 20th or 30th, but his improvement speed was just as fast as Wuka's.

...

Similarly within the primal region, Bolan was in his villa.

Bolan wielded the blood blade in his hand and he casually swung it about. However, he suddenly frowned and gently tapped the screen before him and a mail opened.

"Luo Feng, successfully passed the 7th level." Bolan gently read it out, after which he completely froze.

Pa!

The blood blade fell onto the floor, the crash actually awoke Bolan suddenly.

"He passed? He's surpassed me?" Bolan didn't even care about the blood blade on the ground, silently walking into his living quarters and into his study. He sat crossed legged and stared at the photo hanging on the wall. It was of an old man teaching a youth.

He sat silently...

Not a sound was muttered.

There was a very crowded spot in the absolute beginning region...the arena!

The area was a public arena where geniuses would often gather to spar against each other, even wagering on the matches, naturally both sides would wager on their fights. Afterall, the deaths in the virtual universe were fake, and no one dared bet too much on others.

"Your majesty, I think you should give up."

"Your majesty Wuka, you've already lost 8 matches today."

"Anymore, you'll still end up losing."

A group of universe level absolute beginning members watching the matches mocked and laughed. In the arena.

Wuka was lying flat in the corner of the arena. His head was filled with blood, as he lay there breathing heavily.

"Shut up all of you!!!" He roared fiercely. He stood up abruptly, as fresh blood stained his face red. He stared hard at the group of spectators below the arena, "I'm not dead yet!"

After which, he stared at the distant youth with silver white scales on his face. That youth snorted coldly, "Your majesty, you've already lose 8 consecutive matches, I think you should just leave."

"Bullsheet!"

Wuka roared.

Rumble!

With a stomp, his entire being rushed straight against that youth closing in until there was only 10m left. In his hands, two short axes appeared. He waved one of them and swung it directly at the youth.

"Hmph!" The youth with the silver white scales immediately dodged and left a hundred images. With a rumble, he immediately grabbed one of Wuka's arms and swung him around smashing him straight into the ground.

"Get lost!"

Wuka's other axe immediately slashed right through his own captured arm, and he flung that axe straight at the youth, causing his expression to suddenly change as he dodged as fast as lightning. However, there was a slash wound left on his chest already, as fresh blood flowed.

"Hahaha, hahaha..." Wuka stood there, his left arm grabbing the axe. Fresh blood flowing from his broken right arm, yet he laughed loudly. He held the axe and pointed with his left hand at the youth, "Mo Yi Lin, didn't you proudly declare like an idiot before, that I wouldn't be able to even touch you, haha..."

The youth gritted his teeth, staring at Wuka, "You madman."

"Haha, madman, Luo Feng of our Absolute beginning 3 heroes is the true madman. I cannot compare to him." Wuka laughed loudly, after which he turned to face the group below. He pointed at them, "All of you listen, the 8 of us are new here. Haven't you all just trained a few thousand years more than us. what's there to be proud of? Yet, all of you are so arrogant, saying I, Wuka, cannot even hurt anyone of you? I've only just passed the 5th level and you've all passed the 6th. Don't look down on us new people!"

After he finished, he jumped straight off the arena.

The group at the side of the arena, there were 8 that were gathered. The leader was a man in a silver grey long robe, he said coldly, "Wuka is indeed a Manka warrior, intrepid. However newbies are still newbies. During this qualification battle, all 8 of you are entering the land and sky region! Only about 10 of the members in that region have reached the 6th level!"

"Di!"

"Di!"

"Di!"

The group of universe level geniuses all received a mail simultaneously.

"We've all received something?"

"Who sent it?"

"Open it?"

The group of senior universe level members in the absolute beginning region all opened the mail.

"What, 7th level?"

"Luo Feng?"

"It's Luo Feng of the 8 newbies?" Many of the geniuses couldn't help but get shocked. The 6th to 7th level was too difficult, even though they were geniuses that had trained for thousands of years, only 5 of them managed to pass the 7th. The rest were still stuck on the 6th.

"Luo Feng?"

Wuka who was just about to leave heard, quickly opening the mail and reading the contents. He immediately stared with glee and surprise, following which he pointed at the group of seniors and laughed loudly, "You bunch of bastards, have you seen it? What a genius is, what a true genius is? What about us newbies? We've only trained a hundred years, what about it? Yet we are able to pass the 7th level, what about it?"

"Haha, you all better remember the name Luo Feng! He's one of the 3 heroes of the Absolute beginning region!" Wuka smiled wide.

The group of seniors all went silent.

"Luo Feng?" The silver grey robed man squinted his eyes, glancing at Wuka who was wielding the blood stained axe and leaving. "To be able to pass the 7th level, I have to check him out properly. Our attempt to rush into the primal region this time...this Luo Feng has already become a threat."

...

The Honor secret region of the universe mercenary alliance was akin to the Virtual Universe company's Primal region and Absolute beginning regions, a secret region which was excavated and remodeled.

Honor secret region, there was a desolate large planet.

It, was called Hell arena!

A skinny wolf like man with yellow fur and green eyes gazed into a distance while standing on a stone. Suddenly he frowned, his brown eyes gleaming green, "Luo Feng? This new batch is pretty impressive. However, the slot for the primal region is mine!"

Chapter 549: Change

Virtual universe, primal region, Bolan's training grounds was currently an ice land.

There was enough snow to bury a person up to his knees.

Bolan sat crossed legged in the snow, topless with his eyes shut.

"Bolan." A cold voice resounded.

Hua!

Bolan stood up and the snow fell in all directions, and he turned to look. A tall and skinny man with eyes like a venomous snake, and a body rippling with origin laws, appeared in the ice land, gazing over him, "Luo Feng has already passed the 7th level. Why, are you not affected by it?"

"Teacher." Bolan bowed, not speaking more.

Primal region members had an undying specially catered to teach them, and according to their needs, they can even change for a different undying teacher!

This one before him was an official level undying.

"Stupid, what a joke." The man's cold eyes gazed at Bolan. "Are you so stupid that you are still insisting on your old ways?"

"Teacher, I've thought it through." Bolan bowed.

"Speak." The cold man said.

"I admit I was too proud before, and too over confident." Bolan said softly. "The study of the Universe primal chaos tablet, I've decided to focus on the space laws."

"That's wise!" The cold man revealed a smile.

Just like how a parent who makes a decision for their children, but they are obstinate in their ways. However...when the child grows up and discovers that the path his parent chose for them is the right choice.

One theory.

Bolan's decision was a wise one. When he was young, many warriors weren't as talented as he was, hence his choice had always been right. However...with regards to the problem of which tablet to pick in primal chaos city, the ones giving him advice were undyings and even universe country leaders were afraid of the geniuses falling.

Undyings and even universe country leaders, just how high were their perspectives?

Their long eternal lives has resulted in them seeing how many generations of geniuses pass? Their suggestions...were a result of their experience!

Maybe...

If Bolan continued down this path, in 10,000 years, 100,000 years, a million years, he would still become an absolute warrior amongst the undying. However, Luo Feng of the same generation would have far left him in his dust.

"Your space talent is the most absurd I've ever seen." The cold man said. "Even compared to the legendary geniuses of before, just your space talent is top class. Your decision is very wise! You should celebrate having such a rival like Luo Feng in the same generation!"

"Because of him, he's shocked you." The cold man said.

Bolan was silent, his eyes however gleamed in a new way.

Luo Feng?

"Since you've made the decision, then we'll begin according to the plan I've constructed." The cold man said.

...

The universe tablet was one that trained in space and time. However over a trillion years, just how many were able to work on both space and time and improve at the same speed?

Hence, there were 3 ways to study the universe tablet.

One of them was to have time as the main and space as secondary.

Another was space as the main and time as secondary.

The last was training both at the same time.

If the 3rd option was accomplished, one would definitely be absurdly powerful, and Bolan had picked this 3rd option before. But right now, he was picking to let space be the main and time as the secondary.

Once the path was chosen right...

The improvement speed would be shocking!

"Luo Feng."

"Luo Feng, hurry over."

"Madman, come to Wuka."

Luo Feng who was studying the 3rd volume of time space scribbles seriously immediately received the many messages from Wuka and Rong Jun. The two of them were worried about disturbing his training, hence they sent messages. The virtual assistant Babata would report to Luo Feng according to his situation.

"The both of them, why are they looking for me so urgently?" Luo Feng smiled and shook his head.

After which he flew out his balcony and into the sky, gazing at the not too distant Wuka's villa.

...

Within the living room.

Wuka and Rong Jun sat there, facing the table with wine on it.

"Madman is here." Rong Jun stood up.

"Luo Feng, Luo Feng." Wuka was the 1st to rush out and welcomed him with a bear hug.

"What's up?" Luo Feng was shocked as he dodged to the side, smiling as he looked at Wuka, "Why so friendly?"

"Madman, you are too awesome." Wuka grabbed Luo Feng's arm and dragged him into the living room. Luo Feng saw the exquisite wine on the table, especially with the two complex words Thunder Rain, he was shocked, "Wuka, you stingy punk actually bought Thunder Rain wine?"

Thunder rain wine, in reality, it was something even True Yan emperor couldn't bear to drink casually.

Even in the virtual universe, this one bottle alone cost 32 mixed elements! Meaning that this one bottle was the equivalent of an entire sector lord's wealth, drinking 10 galaxies in one go! However amongst Luo Feng, Rong Jun and Wuka, there was no doubt Wuka was the most wealthy. There was no other way about it, his father had such a high position.

Wuka's father was one of the pinnacle figures in the Manka universe country.

However even so, he wouldn't dare spend money this way.

"What's one bottle of wine?" Wuka said passionately as he gently opened the cork off the bottle, and pouring a glass for Luo Feng. The liquid was translucent, with crystal like droplets floating within, and the droplets had traces of electricity coursing through them.

Even though this bottle of wine didn't have the same effect as changing one's body structure in reality.

However from the body and soul, the feeling was the same. Drinking it in the virtual universe was an extreme luxury!

"It's just one bottle. Brother, you've passed the 7th level. That's awesome, thrilling, thrilling." Wuka couldn't help but shout.

"Oh, you all know about it?" Luo Feng was stunned.

"Madman, you are shameless." Beside, Rong Jun couldn't help but say as he enjoyed the wine.

"Truly shameless, you actually never told us about this. Luckily watchman Bevin sent a message to all of us." Wuka said.

"Damn." Luo Feng stared, "This Bevin actually..."

"Hahaha, the message came at the right time." Wuka said, "You didn't see, since the time the virtual universe sent the message regarding the qualification battles, the seniors in the absolute beginning region who were peaceful before suddenly got arrogant and feisty."

"Everybody is competing to not get kicked into the Sky and land region!" Wuka shook his head, "Those seniors look down on the 8 of us, who are new. I was unhappy with it, hence I constantly challenge them to battles!"

"Frequently battle?" Luo Feng was stunned.

Wuka had just passed the heavenly bridge 5th level. But, amongst the 30 universe level seniors, 5 of them had passed the 7th level and 25 had passed the 6th.

"Why, cannot I compete? Our Manka people have never lowered their heads and admitted defeat. Even if we lose temporarily, we'll return to battle again." Wuka snorted coldly, "Those group of bastards are all arrogant. In the end, they were still injured by me. However, this is still not thrilling. The thrilling part was...when that group saw that letter and the news of you passing the 7th level."

"You didn't see their expressions, that was exciting."

"Many just stared wide eyed with shock." Wuka laughed loudly. "Back then I was mocking and laughing at them, they couldn't even retort. That's truly thrilling, hence I bought a bottle of Thunder Rain to celebrate the achievements of us newbies, and also the number 1 person of our batch."

"Temporarily number 1." Rong Jun smiled beside and glanced at Luo Feng.

"Hm, temporarily number 1." Wuka nodded.

Luo Feng laughed.

The reason why he got along well with these two was because of their one similarity, which was that they were never willing to admit defeat. They may temporarily be lagging behind, however no one would give up and instead constantly improve.

"Wuka, Rong Jun, I are ready to accept another mission." Luo Feng said. "However, my knowledge of the missions is very low, do you have any suggestions?"

"The missions, naturally the higher the difficulty, the more shocking the points." Wuka said.

"I have some suggestions. I've already finished the 10 missions for my 100 years." Rong Jun said, "And these were all suggested by my teacher..."

The three of them began their discussion.

...

Luo Feng's plan was to first pass the 7th level of the heavenly bridge.

And after, grasp the time to go do some missions. Through real life battles and along with the training environments, he would be able to improve himself! Through that first Blood River world mission, he had gained huge benefits, he wasn't intending to do any random mission, that simply.

Every mission had to have some great benefits hiding behind.

It all depended on whether he could get it or not.

Of course...the prerequisite was strength!

...

The three of them chatted for awhile. Luo Feng finally had a clearer plan of how to choose his missions.

"This wine is really good."

"This feeling is even more wonderful than the life evolution when I broke through to the universe level." Luo Feng closed his eyes, feeling the change in his body and soul. That comfortable feeling, of course these were all simulated by the Virtual Universe company. The real Thunder rain was something even Wuka couldn't afford in reality.

And even people like True Yan emperor, Tong Nan emperor, these eternal beings, they would only purchase such luxuries once every countless years.

"This wine is awesome. It's time I attended classes, the class today is taught by an Emperor undying, which fits me well." Luo Feng got up.

"Hm, I won't send you off."

"Go on."

Rong Jun and Wuka lay in the sofa, enjoying the delicious wine, not willing to get up.

Training should be harsh, but one should still indulge occasionally and enjoy the luxuries of life.

"These two punks." Luo Feng smiled and shook his head, after which he became a beam of light and flew straight into the sky.

...

At this time, within another villa in the absolute beginning region.

"Today's class talks about space and gold, the fusion of these two laws. That Luo Feng will definitely go. Mo Yi Lin, Ah Shi...you two should go attend the class too and find a way to challenge Luo Feng to feel him out. Once we know what moves he has, we'll be prepared and when the qualification battles come...it'll be much easier!" The man dressed in the silver grey robe said.

Chapter 550: Provocation

Absolute beginning region, classroom number 2.

The room was 80km long and 60km wide. This was bigger than a normal city of earth, yet this was only a place for an undying to teach. There were over 1000 seats at the back of the classroom, and beams of lights occasionally flew in to fill the seats.

Sou!

Luo Feng appeared before the seats too, and picked one casually from the left.

"Look, it's Luo Feng."

"He's Luo Feng from the newest batch of geniuses? Looks pretty handsome and strong."

"He hasn't been in the Virtual Universe company that long and he already passed the 7th level. He seems very strong. We are only on the 8th level but we are already domain lord level." In the corner, two ladies, one with beautiful wings and another with eyes filled with enticement, discussed with hushed voices. They weren't shy at all, and looked passionately at Luo Feng.

The other members in other places were all discussing too.

"That's Luo Feng?"

"Right, it's him."

"That punk is brutal. Back when I was at universe level, the highest I got was only the 7th level. And that was over 3,000 years after joining the Virtual Universe company."

"According to his improvement speed, he has no chance of entering the primal region this qualification battle. But by the next one...maybe there's hope. As long as he has a few thousand years, he definitely has a guarantee of making it into the primal region."

Two sector lords sitting in the corner were discussing.

Discussions were rampant!

It seemed the moment Luo Feng sat down, the entire classroom number 2 with close to 100 students all began to discuss him. Luo Feng became the center of attention. To be able to in such a short time, pass the 7th level, even before the 1st qualification battle,, only absolute geniuses were capable of such things!

Luo Feng sat silently there, his ears moving slightly.

He clearly heard all the discussions.

"I've become a zoo animal." Luo Feng felt helpless within.

"How do you do Luo Feng." A boorish voice resounded.

Luo Feng turned to see a bent body with a forehead with 6 protrusions, and his skin was covered in black fur. This man sat a few meters away from himself. While looking at Luo Feng and smiling, he said "I'm Suo Dragon, domain lord level. Today, I've heard many discussing about you...however, you are indeed impressive."

"Thanks." Luo Feng replied.

Within however he was laughing. According to the separation, the absolute beginning region had 1,000 sector lords, 100 domain lords, 30 universe levels. He was one of the new 8, making the entire number of the region go up to 1138.

However after the qualification battle, the numbers would return back to 1130.

Just from the looks of it, the number of sector lords were the highest, and most of the people in this classroom 2 were sector lords too. Very few of them were domain lords and the universe level numbers

were very pitiful. Including Luo Feng, there were only four of them. This alone had made him shocked, because there were usually only two universe levels attending the classes.

"Today, there are two more universe level members here." Luo Feng thought.

"Absolute beginning members have a very low chance of making it into the primal region!" Suo Dragon said softly, "My friend and I were discussing, saying that you will have hopes of making it in a few hundred years! Our absolute beginning region...very rarely will one ever make it. Everytime such a thing happens, it makes us all excited."

"Even if you are only one step ahead of everyone, this will eventually lead to you being more steps ahead of everyone."

"The earlier one gets into the primal region, the faster the improvement." Suo Dragon seemed to be exclaiming while speaking.

Luo Feng to glance at him, "If you work hard, you too will have the chance of making it into the primal region."

"Haha..."

"Don't laugh at me. For me to remain in the absolute beginning region in the next qualification battle is not bad already." Suo Dragon shook his head, and his eyes were filled with helplessness. "If I drop to the Sky and Land region in the next qualification battle. Then, my position outside will drop too. What a headache!"

The domain lord core members, they were placed outside with authority and position!

According to Luo Feng's way of thinking, they were placed as envoys in territories.

However...

Primal region members, absolute beginning, sky and land members, last phase members, their treatment outside was completely different. When the primal region members ventured outside, just their guard team had an undying leading the army! The position they are finally arranged for is also according to their rank!

If one was originally a primal region member but knocked back into the absolute beginning region.

Then the position would shift accordingly, even the undying general would be shifted away and a sector lord would take his place.

"This punk sure is unlucky."

"When he went out as a envoy, he must have been quite powerful. However, with his chances of getting knocked into the Sky and land region...his position will definitely shift and his rank will drop." Luo Feng laughed within. Regardless, he chatted for awhile with this guy, and came to know of some of the things the envoys frequently encountered outside.

After a while...

The undying teacher arrived and began his class, immediately the room went silent. Even if they wanted to discuss, they had to communicate mentally, they definitely didn't dare disrupt the class.

...

There were a total of four universe level students, of which one of the two had a face full of silver scales, and the other had bronze colored skin, while his forehead with a single black horn.

"Ah Shi, look, this Luo Feng is listening quite seriously." The silver scaled man communicated.

"Hm."

The black horned man looked at the left corner in which Luo Feng was seated. "Mo Yi Lin, Ni Nan has told us to find a reason to challenge him and feel him out. How do you think we should do it? If we find trouble with him and he doesn't care at all, and leaves the virtual universe, then we'd just look stupid."

"Relax, I have a plan." The silver scaled man squinted, like a venomous snake, "We'll do this first..."

"It seems simple." The black horned man frowned after listening.

"What else can we do, there's no 100% guarantee plan." The silver scaled man said.

"Alright, when the class ends, we'll head over." The horned man nodded.

After speaking to the class for awhile, under the gaze of the absolute geniuses, the Emperor undying vanished.

Luo Feng closed his eyes and tried to savor every bit of the lesson earlier before opening and seeing the two men before him. One of them had silver scales on his face and other was a sturdier looking man with a black horn on his head. Their similarity was that the two were universe level.

The two of them looked at Luo Feng.

"And you two are?" Luo Feng sat there looking at them.

"How do you do Luo Feng, I'm Mo Yi Lin." The scaled man smiled.

"Luo Feng, I am Ah Shi." The black horned man smiled. "We are both like you, universe level members, only we joined the Virtual Universe company earlier."

"Is there something you two wish to say?" Luo Feng frowned.

Towards the universe level seniors, Luo Feng didn't have much of a good impression. Because, as he chatted with Wuka the day before, Wuka had explained many things and even though he didn't specifically point out anyone, there were only a total of 30 seniors, and Wuka had trouble with at least half of them.

"We know that you've passed the 7th level, respect." The silver scaled man's eyes gleamed. "I, Mo Yi Lin, love battles. Hence I'd like to have a go with you at the arena, just a friendly spar."

"I too would like to spar with you." The black horned man looked at Luo Feng.

Luo Feng frowned.

Battle?

If it was for training, he could easily simulate very powerful opponents in the training grounds. Battling people however was mostly just for seeing who was better or finding out his trump card.

When you know your enemy, that's when one can stay invincible.

"They probably have never fought with me, hence they don't know my battle tactics and my trump cards. Even though there's footage back from the genius battle, I was still very weak back then. I'm countless times stronger than back then. The footage back then doesn't reflect my true strength, hence they came to challenge me." Luo Feng understood immediately.

"Apologies, I have no interest." Luo Feng stood to leave directly.

The black horned man and the silver scaled man exchanged glances, they knew they had to rely on their 2nd plan to challenge him.

"Haha, Luo Feng, you are the number one person in the new batch. I didn't expect your guts to be that small." The scaled man said.

"If you don't even dare to accept our challenge, it looks like this new batch really has no hope." The black horned man said.

"That stupid Wuka, he's so much weaker but he still keeps challenging us. Luo Feng, you are strong, yet you don't dare to do the same. This qualification battle, you newbies should just give up immediately."

The groups of sector lords and domain lords in classroom 2 listening to the class before all turned over with interest. Most of them favored Luo Feng because he was indeed shocking. However that was only because their levels were different. They were sector lords and domain lords, they had no business messing with Luo Feng at this time, naturally they were indifferent.

"The two who are challenging really have no class."

"No class at all. If it were me, I'd be too lazy to bother too."

"Both of them are clowns."

The sector lords and domain lords discussed, with some of the sector lords' voices being extra loud. Immediately the expressions of the scaled man and the black horned man turned uglier.

Luo Feng however stopped in his footsteps.

This made the sector lords and domain lords shocked...was Luo Feng about to accept their challenge?

Was he so easy to provoke?

Luo Feng turned to look at the two of them.

"Hm?" The scaled man and black horned man discovered his gaze was hostile.

"Wuka battled you two?" Luo Feng looked at them.

"You mean that Manka prince?" The scaled man mocked. Besides, the black horned man too joined in, "That idiot, he battled us and was severely punished for it."

"Congrats to you two." Luo Feng said.

The scaled man and the black horned man were stunned.

Congrats?

"I didn't wish to battle you two initially, because I didn't wish to waste any time on you." Luo Feng looked at the two, "However now, you've riled me up, I've decided...to accept that challenge this time."
