

SWALLOWED 681

Chapter 681: Luo Feng's Death Trap

Luo Feng floated in space, the 216 thick vines that stretched over 10,000 km were like huge snakes made wrapping about the assassin within, also the countless leaves all attacked individually, with one of them using the e9 grade laser gun, shooting the glaring pillar of white light at Kasey, the high temperatures caused the surrounding leaves to melt, however it didn't pierce through Kasey's armor.

"The e9 grade laser gun can kill normal sector lord level 9s, however it doesn't guarantee a 100% against a sector lord level 9 pinnacle." Luo Feng was clear on this point.

To be able to make a move within Wu Long Starfield, this assassin must have been hidden for extremely long.

The moment he made a move, it would definitely be shocking!

To be killed so easily, even Luo Feng couldn't believe it.

"Bring it, let's see what you have, see how much you can force me to unleash?" Luo Feng stared at the silhouette within the white pillar of light.

Rumble...

Kasey's expression was pale as he crashed into the large amount of vines behind him

"Vines, kill him." Luo Feng ordered.

Rustle...

The countless vines slid about in space, engulfing Kasey. Kasey was very clear...that the cloud contact vine was a plant life form that was extremely hard to deal with, many powerful humans with backgrounds all used cloud contact vines to protect themselves, in terms of its size and cell genetics, it was extremely terrifying.

Luo Feng's cloud contact vine was nurtured extremely well.

A total of 216 vines, at sector lord level, every vine could reach up to 30,000 km, its thickness was at least 300 km thick, naturally in battle there was no need to go that big, a sector lord level 6 high level vine's sturdiness was extremely solid, even a sector lord level 9's destroying speed...probably couldn't keep up with its regeneration.

"Ah!!!" Against the vines that swallowed him up, he struggled within and let out a mad howl.

"Why howl before you die?"

Luo Feng stood in the distant space and watched.

Suddenly...

"Rumble...A formless terrifying energy, almost like an ant seeing a dragon, began to expand throughout, causing Luo Feng's expression to change greatly, the spot where Kasey was began to sprout with explosions of flames, causing the space there to become a sea of flames, large amounts of the vine and its leaves were instantly burnt to ashes.

Many thick vines began to warp.

The vine sent a simple thought to Luo Feng, terrified, unable to withstand...

...

With Kasey as the core, an area of 30 km was reduced to ashes, many of the regenerated thick vines didn't dare go close within that 30 km again.

Endless flames burnt within the space.

There were 2 silhouettes within the flames.

One was the heavily injured and mad Kasey, the other...was a 2m tall man, dressed in ancient black armor, revealing his arms. He was the center of the flames, his arms had thick fiery red hair that covered even his face.

His eyes were like flames burning.

He!

Flame undying!

"No, undying!" Luo Feng watched from far, looking at the undying surrounded by endless flames, he felt a powerful pressure, that undying energy that worked on his body, endless undying energy, like a huge mountain pressing him down!

With the undying energy pressure, he couldn't resist.

"It's actually, an undying, this assassin actually brought an undying with him, it definitely, definitely must have been hidden within his internal world." Luo Feng squinted, "What power is this, to actually stay hidden within Wu Long Starfield's members...My guess was indeed right, his trump card truly is terrifying."

It was terrifying.

So terrifying it drove people crazy.

An undying!

Agent 6, to be able to rank top amongst the other pawns hidden within Wu Long Starfield, it was because he had hidden an undying within his internal world. This undying was one that had his soul controlled by the bug clan, and as his identity was compromised, he had no way to show himself or use his god country to return to the bug clan territory.

Without their hidden ambush value, these controlled undyings were normally used as cannon fodder or weapons.

Placing an undying as a pawn within an internal world...using him at critical times!

If one could create a technological weapon capable of killing an undying, it's price would be absurd, these normal controlled undyings...however, their worth was still much more. Also, a sector lord wielding these weapons in true battle would still never compare to an undying.

This!

Was agent 6's true trump card, it was also the trump card the bug clan had prepared to kill Luo Feng!

"Long Jue Emperor, I need help, there's an undying the member brought with him to kill me." Luo Feng immediately sent a thread of his consciousness into the virtual universe network, simultaneously sending a letter to Long Jue Emperor and spamming it 10 times over!

...

Long Jue emperor was at the time within the outermost palace of the starfield, discussing business with others.

"This is 10 million mixed elements to buy goods, this 10%...which is 1 million mixed elements, is a little for your troubles Long Jue emperor." A bald old man in a black exquisite long robe spoke in a friendly manner, smiling.

"You wish to get 10 million mixed elements worth of goods, that's not easy..." Long Jue emperor frowned, "You should know that for over 1 million, I cannot make the decision myself."

As it has to go into the accounts, and there would be detailed records within.

Whatever was bought and paid for.

Like Luo Feng purchasing 1 million mixed elements worth of bug corpses, these were all recorded and thoroughly audited.

Hence...it put an end to buying separate batches, and not anyone could simply come and purchase items, one had to have a certain level of position! If one bought 1 million mixed elements worth of goods and simply did it 10 times, it was too good to be true. The virtual universe company and the huge axe dojo along with the other leviathans would never allow such a loophole, their audits were extremely strict.

The moment there was any corruption, the consequences were severe.

"Long Jue emperor, we've known each other over the past 10,000 eras, I seriously need to create this weapon, how about this way...15% commission will belong to you. As for how to split this with the other 4 members, that's up to you." The black robed bald old man's eyes were almost like space itself, he spoke softly.

"Wait awhile."

Long Jue emperor frowned as he muttered within, "Who'd send me 10 straight messages?"

He sent part of his consciousness into the virtual universe network and entered his palace on Thunder island.

Standing within, he gently tapped the space and a screen appeared, he opened the mail within, "Long Jue Emperor, save me, there's an undying assassin here brought by an internal member."

Hu!

He was totally shocked.

"Luo Feng, attacked?" Long Jue once again opened the screen and immediately adjusted his Wu Long starfield map, sending out an alarm to the security system, "There's someone being attacked in Wu Long Starfield, hurry and check it out!" No matter what he first had to find the exact location before sending anyone, as the system used white dots and red dots to distinguish between internal members and outsiders.

However there were many people choosing goods within, it was hard to tell which was Luo Feng, he could only tell from where there was a battle!

Di! Di! Di!

The security system scanned all the observation points within the starfield.

"There's been no battle." The system replied.

Long Jue Emperor was stunned, however he immediately understood, ordering, "Have there been any points compromised?"

"Observation point b2446—56453—13202—96233 has malfunctioned, 36 seconds ago b2446—56 has already headed there to check and do maintenance." The system replied, this entire process was extremely slow, Luo Feng sent the messages earlier after the battle had only been going on for 4 seconds.

However as Long Jue Emperor slowly moved and opened the mail before waiting for the replies from the system etc, 32 seconds had passed.

"Right here! There's an attack here in this observation point region." Long Jue emperor shouted.

"Contacting the 2 guides." The security system automatically reacted.

"I'm allowing you to immediately send someone." Long Jue Emperor said anxiously.

"Long Jue Emperor, your authority isn't enough, the system has to follow the regulated procedures." The system continued to try connecting to the 2 guides in the region, over and over...a total of 20 seconds, to no avail. Only then did it send an order to a knight.

This was an AI!

Even if it was a living AI, like Babata the moment the master gave an order...it had to stick completely to the set regulations within, it couldn't go against it.

This security system of Wu Long star field was exactly like that, as some requests and orders were set by all 5 managers, hence it had to comply.

Without rules, it would be a mess.

Armies had their rules.

This system too naturally had some fixed rules, it may seem stiff, but without them it would result in chaos and even greater losses. And these stiff regulations, even if there were losses from it, it would be within their ability to withstand them.

"It would take about 90 seconds for a knight to get there. Luo Feng, hope you can survive, if you die...that undying wouldn't be able to flee, even if he teleported through his god country, the ripples left behind by his god country, at least within 60 seconds, with a knight's ability, he would be able to track its coordinates, he'll definitely take revenge for you." Long Jue emperor thought, "It'll depend on how long you can last."

...

Wu Long Starfield.

The undying surrounded by endless flames turned to look at Kasey beside him.

"Undying, you have 80 seconds, you have to kill Luo Feng within 80 seconds. Otherwise one of humanity's absolute warriors will get here." Kasey's eyes gleamed with madness, simultaneously communicating via his world energy.

"You can die now."

A low voice resounded in Kasey's mind.

Rumble!

Kasey was immediately swallowed by origin law flames and reduced to ashes, this undying hiding within his internal world was considered his final trump card, the moment it was used...it meant that the bug clan would definitely not let Kasey survive, in case humanity discovers how they invaded and stayed hidden within.

"Human!" The flaming undying stood there and turned to Luo Feng, his endless god pressure expanding, Luo Feng couldn't move.

"You can die too!"

Rumble...

Endless flames erupted and almost like a dragon formed from flames, the surrounding 10,000 km region lit up in flames and rushed at Luo Feng!

Chapter 682: Golden Horned Beast vs Undying

This flame was one infused with origin laws, only a true flame undying that had fully comprehended the flame laws could produce such a level of flame so easily, the domain it spread over...was on a godly

level, a true law domain! Even though it wasn't a true god country, it was still much stronger than a sector lord pinnacle's world projection.

In an undying fight, some were ground gods, some controlled fire, some the land, these were all the law domains, gold, wood, water, fire, ground, wind, thunder, light, the 8 laws had different levels, naturally their domains were different too.

Hence in an undying fight, they normally didn't use the law domains.

However!

If an undying was trying to kill a sector lord or domain lord etc, they could use it to bully their opponent. This was the law domain that one only got after fully comprehending a law.

Howl...

A howl tore through the space and resounded.

A mountain like enormous beast that was covered in black scales, the pinnacle of space beasts Golden horned beast appeared before Luo Feng, as it appeared, its body length strength over 200 km, it was still shrinking as it appeared.

Crackle...it's density kept increasing as it shrank, its scales shrank and its bones and muscles grew more dense, the 5 horns on its head shrank too.

In an instant.

It became a 100 km long space beast!

Deities of the world level 2, small progress, its body length had shrunk 5 times while its density had exploded over 100 times...raising its battle ability to 5 times!

Deities of the world, if he makes great progress in the 2nd level, his strength could be increased by 9 times, the 3rd level allowed his strength to rise 36 times. However this technique was easiest when the golden horned beast was small, as it got stronger, it got harder to train.

Many golden horned beasts only finish the 1st level throughout their entire lives.

Very few actually made great progress in the 2nd level.

As for the 3rd level? It was just a legend.

Luo Feng's golden horned beast was already sector lord level 6, it was extremely hard to improve in deities of the world, and the requirements were extremely harsh, even now, Luo Feng had no way around it.

...

"Golden horned beast?" The flame undying was shocked as he saw the huge beast, "What powerful energy, it should be a sector lord pinnacle beast, and the golden horned beast of that level is supposed to be over 1,000 km long, this one however has used some sort of shrinking technique."

"A human actually has a golden horned beast to protect it, who knows whether he's controlled the soul of this beast or it was a gift from his teacher True Yan Emperor." The undying was pondering.

"No matter!"

"Even a sector lord pinnacle golden horned beast will die!" The flame undying's eyes lit up and burned with flames.

Rumble!

The flame laws became a huge fire dragon rushing at the golden horned beast.

Against the endless flames, the golden horned beast let out a fierce howl.

Rumble...

The surrounding over 10,000 km in area warped and became an endless mountain range world, powerful world projection...it immediately clashed against the burning flames, the mountains that hit first were immediately burnt to ashes, however the world projection continued to form.

The flames continued to burn!

The world kept forming!

As such, it became a stalemate!

"How can he have such powerful world projection?" The undying's expression changed, "It's actually comparable to the law domain, I've long heard of the powerful swallowing beast's internal world and how vast it was, however...this one is simply absurd!"

World projection, it depended on how powerful one's internal world was.

Under normal circumstances.

The moment law domain was unleashed, the world projection of a sector lord would instantly crumble without any ability to withstand it.

And for it to be comparable to the law domain, it was simply an impossible scenario.

A human sector lord pinnacle's internal world only had a diameter of 10,000 km, Luo feng's however was over 60 million km! Much bigger than even true golden horned beast's worlds! Normally, sector lord pinnacle golden horned beasts only had world's with diameters about 30 million km...

Unleashing world projection, they could barely withstand law domain.

They may be disadvantaged but they could withstand it.

At this time!

Luo Feng's world projection was in a stalemate with the law domain.

60 million km compared to 10,000 km, the difference was 6,000 times, it was like china's entire territory compared to a small village, china's projection compared to the village's projection, the power difference was huge.

"Howl!" the beast howled.

Picking the hardest path naturally had its benefits.

At least, it's incredibly huge internal world had an extremely powerful world projection, there was no need to fear an undying!

"It's no use! Law domain is but an assisting skill, in an undying battle, we don't even use this." The undying roared too, instantly becoming a flaming beam of light and rushing towards the beast.

Howl!

The beast raised its head and howled.

The engravings on its 5 horns all lit up, its head, neck, back, 4 claws, scaled wings all lit up with engravings all over. It wasn't just such, even its right claw began to undergo change, becoming thicker, its scales changed as they swiftly changed to gold.

Natural ability strengthening!

Blood river energy triggered!

The natural ability made it's body grow in strength by an entire time, its physical strength, world energy etc!

With the blood river energy triggered, it's entire body strength was condensed and its right claw's strength rose by 11 times.

Deities of the world amplitude was 5 times, natural ability strengthen was 2 times.

Blood river energy amplitude was 11 times, the nameless manual had resulted in its strength already 3 times from before.

It's terrifying right claw strength...was currently a shocking 330 times that of a normal sector lord level 6 golden horned beast without any natural abilities, and a normal sector lord level 6 beast was already no weaker than a human sector lord pinnacle warrior.

330 times amplitude!

And with its spirit energy amplitude at over 3,200 (32 times that of a normal human), and its strengthen ability doubling that, its world energy was now 64 times stronger!

However in comparison.

The beast's strongest point was still its body!

Its world projection could match up to the law domain, hence it at least had the ability to put up a fight!

Howl...the beast roared madly, simultaneously welcoming the undying rushing over, it waved its powerful right claw and through its comprehension of the gold and space laws from studying the beast god's howling picture, it followed the beast god presence comprehension that it had worked so hard on for over 180 years...unleashing it's strongest attack!

Sky tearing claw!

Rumble...the space around it was instantly torn apart, layers of space were split, causing space tears all around.

"Even if you are a golden horned beast, you are only sector lord level, you actually dare block me, go and die!" A huge blade appeared in the flame undying's hands, it burned with powerful flames and with a slash...the universe space was also torn apart, the seams and layers sliced open.

This move was infused with complete flame laws along with some space laws.

Its power was terrifying!

With undying energy backing this move, it was extremely powerful.

Rumble...

The gold claw clashed directly with the flaming blade. However against the right claw, the blade seemed as small as a toothpick.

...

330 times stronger than a normal sector lord pinnacle level strength, even though the world energy was far from its right claw's power, it was infused within, its power was stronger from that. And with its 10 times amplitude from its comprehension of the beast god howling picture, this terrifying claw attack...

Was the golden horned beast's strongest move!

And even though that flame undying was a very normal undying, he was still an undying, he's strength was countless times stronger than a sector lord. A sector lord pinnacle golden horned beast, only very few exceptional ones were comparable to a normal undying, many still choose to flee.

Rumble!

The huge golden horned beast and the flame undying were knocked far apart, the powerful clash caused space around them to tear open, its powerful ripples seeped in through the tears into space itself.

"330 times the strength of a normal sector lord pinnacle, and with the howling beast god picture amplitude, and my law comprehension raised 10 times...plus that little bit of the beast god presence, I actually, actually still cannot defeat a normal undying." Luo Feng was shocked by the difference between a sector lord and undying.

"I, am an undying, I actually cannot defeat a sector lord level golden horned beast?" The flame undying was shocked too.

After which...

Howl, the beast once against rushed.

"Kill!" The flame undying began to grow mad too.

Fierce battle.

The scales on the beast were torn apart as gold blood spewed everywhere.

Waving its right claw, the black armor on the undying was slashed open too, its scales flying everywhere, his layer of red fur was slashed apart, his muscles torn, his gold blood flying about.

Rumble! The beast was knocked hard into the endless bug corpses.

Rumble! The undying too was knocked hard into another pile of corpses.

It was a tough even battle.

One had a 60 million km diameter internal world, with training in the nameless manual along with 100 absorbed blood river crystals, along with other special encounters.

The other was a normal flame undying.

1, had completely comprehended the flame laws and some of the space laws.

1 had comprehended a good half of the gold laws and a part of the space laws, along with the beast god presence, and the howling beast god picture raising its amplitude to 10 times.

Rumble! Rumble!

A golden horned beast and a flame undying, battling within the endless bug corpses, almost every second they would exchange over 100s to 1,000s of blows, fast as lightning, the scales of the beasts were torn apart while the skin and muscles of the flame undying were torn apart too, gold blood spewed in all directions.

"The battle has already lasted 50 seconds." The undying was boiling with rage, "Kasey had said I have to kill Luo Feng in 80 seconds. This human is protected by the Golden horned beast within its internal world, if I don't kill it, I can't kill him."

"There's no time!"

The flame undying, as a soul controlled slave was willing to do everything at any price to fulfill his master's orders.

Xiu!

He rushed again at the beast, the beast roared as it raised its powerful gold right claw again, as the 2 clashed...

"Arghhh..." The undying's expression was struggling, his red fur shook as he howled, his eyes filled with madness, "Go and die golden horned beast, explode! Explode! Explode! Explode! Explode!"

Rumble...

The space about crumbled as he instantly became a terrifying super fire ball, almost like a new star that was about to explode!

God, self destruct!

The final move!

Complete the mission at all costs!

Chapter 683: Luo Feng's Battle Strategy

"Self destruct, this is definitely an undying under soul control!" Luo Feng was shocked.

Howl...

The golden horned beast let out a painful howl, with no time at all to dodge, the self destruct power of an undying was terrifying. To train to undying level was extremely difficult, the true power an undying held was no less than a star, this self destruct was an instant explosion of his trillions of years undying energy!

He already chose to self destruct, why would he leave any undying energy behind?

Plus this was a flame undying.

Rumble...Hotter than even the law flames by hundreds to thousands of times, even the space about was instantly reduced to particles, the supernova like explosion had power on an unbelievable level, and the super close by golden horned beast was the first to receive this attack.

It's gold right claw was the hardest point on its body.

Its strength was raised by 330 times, actually the other parts of its body were only raised by 30 times, and the right claw was only about 10,000 times that of a normal right claw, hence on average it evened out to 330 times. Raising the right claw by that much...it was harder than even most Undying weapons.

And the particle stream formed from this explosion melted even space itself, yet the right claw managed to withstand it.

Chi chi chi...

Howl...The beast let out a painful howl.

The areas closest to its gold right claw its neck and stomach regions were all attacked, the black scales there were instantly bright red before turning to ash, chi chichi...the thick powerful intertwining muscles, muscles that had strength to tear through space itself, however the explosion had burnt a large portion of this muscles into ash instantly.

Its internal organs were instantly turned to ash too!

Its gold bones were obviously much stronger than its muscles and scales, it had darkened quite a bit from its original gold.

The particle stream caused from the explosion rippled in all directions!

The beast was but in one of those directions, they were surrounded by the large amount of sector lord pinnacle bug corpses in other directions, these were after all sector lord pinnacle corpses with extremely

sturdy scales. Even using an e9 grade laser gun, it would still be hard to pierce through its shell, this was mostly because they were dead without any energy infused within its shell.

A true sector lord bug warrior had extremely strong defense!

Even though its body was much weaker, it still shouldn't be underestimated.

Hence the explosion which was originally capable of spreading over tens of millions of km in area, surrounded by the endless sector lord pinnacle bug corpses, the extremely hot particle flow instantly melted through large amounts of the corpses, continuing to flow out and reducing a large amount of them to ash.

The explosion rippled over 10,000 km in area.

The sector lord pinnacle bug corpses within a 100 km area were reduced to ash, above that up to 10,000 km, some had flaked while others were simply knocked away, without much damage.

Afterall!

After layers and layers of sector lord pinnacle bug corpses withstanding the attack, even an undying's self destruct, it could only pass through that many layers.

...

However, the golden horned beast with a body length of 100 km took the greatest ripples of the attack.

The strongest peak of the explosion was at 0.01 seconds, and the particle stream that burst out immediately decreases in power swiftly as it flows, even the crumbled space about was regenerating. One could see...under the effects of the weaker flames, the mountain like beast floated in space, at this time...it was almost like a skeleton golden horned beast.

Of its entire body, only its right claw, tail and scaled wings at the side were still covered in scales, its main body portion was left with dark bones, even its head was left with its skull and 5 horns.

"Too terrifying."

"The power was actually beyond what the beast could withstand, its nothing but a skeleton now." Luo Feng thought.

At the same time...

Sou!

The skeleton golden horned beast continued to swiftly fly in the distance, about 80k km away from its body, there was a torn up cloud contact vine fragment, however within it were several vines wrapping a few km of room, an entire unit of bug clan corpses!

At the core of the vines...was one bug clan shell!

Shua!

It instantly became Luo Feng, his earth body.

Sou! Luo Feng swiftly headed towards the skeletal golden horned beast, when the 2 got close, the beast vanished straight into his internal world.

Right.

Luo Feng's true life core wasn't within the golden horned beast, before...when he discovered assassin agent 6 Kasey earlier, he had wanted to use this to test himself, however he was clear...that an assassin able to hide within Wu Long starfield, such an important place, would definitely have terrifying trump cards.

He didn't want to play with fire and lose his life, hence the 1st thing he thought about while planning was...

What would happen if he couldn't win?

Before even considering victory, he planned for failure!

Hence...

When he sent out the cloud contact vine, allowing those 216 vines to extend over 10k km, he had long made the mosha clansman take the form of a leaf within the vines, and placing the core within its body.

Also!

When the vines extended over 10,000 km, it had one more motive, that was to place the mosha leaf over 10,000 km away from the battle, hiding the leaves among sector lord level bug corpses, as it entered the group of corpses, the leaf immediately became a shell of the bug clan.

Mixed within the corpses, it wasn't noticeable at all.

And when the undying appeared after, causing large amounts of the vine to instantly explode and fly in all directions, the flame undying then...how could he have thought about the bug corpses over 10,000 km away, and after all there were endless corpses all about, he didn't even suspect anything.

After which!

When Luo Feng used his world projection, expanding over 10,000 km, simultaneously showing the golden horned beast body, Luo Feng's earth body entered his internal world!

...

The golden horned beast vs the flame undying, it was the chance for him to test his true battle abilities.

If he succeeded, that would definitely be a happy thing.

If he failed, the golden horned beast would self destruct!

It was simply losing one body, no big deal, using some world energy, he could easily replace that body in his internal world! As for the blood river energy within its right claw...if he could retrieve the remains of the right claw after, that would be a good thing, he could easily absorb it into the new body.

If the opponent took the remains of the right claw away...at most he could just absorb another 100 new blood river crystals into the new body.

...

"Whether I succeeded or failed, I would suffer no true losses. And things really took a turn for the worst and an incredibly powerful enemy presented himself. If the golden horned beast died, I will toss my earth body out and throw some items out of my space ring, making it seem like my internal world collapse, then I'll let him kill my earth body. Allowing him to think that he truly killed me." Luo Feng thought.

That was the worst case scenario.

To force the golden horned beast to self destruct, only Luo Feng would pick such an opponent, no matter what, the moshu had transformed into a bug shell and was hidden amidst endless bug corpses...

Under any circumstance, he had already devised backups, using all 3 bodies and an incredibly huge world projection, he had many ways around it.

"Damn!"

"The power of the flame undying's explosion sure is strong." Luo Feng looked about, it was empty, in the distance he could see burnt bug corpse remains, the law flames from before and the self destruct explosion, had destroyed at least 1,000 units around him, the main thing was the bodies were too densely clustered without the energies from when they were living.

"The losses are that huge?"

"Close to 1,000 bug corpses units, all sector lord pinnacle." Luo Feng gazed about, "When Wu Long Starfield realizes they've lost close to 10 million mixed elements they'd be mad."

"Hm?" Luo Feng thought within.

He immediately flashed!

He immediately flew several hundred km away and expanded his internal world out, immediately sucking in 300 units of sector lord bug corpses in.

"Hmph!"

"Since they've already lost close to 1,000 units of bug corpses, they shouldn't be able to discover these 300 extra missing." Luo Feng muttered within, he was happy, 300 units, buying them would require 3 million mixed elements, and he simply just took them like that. Even though he had to use quite a bit of world energy to regenerate the golden horned beast, that little bit of energy was only worth a few mixed elements.

These 300 bug corpses units, was the true benefit from being attacked.

However, he didn't dare take too much.

That would be too easy to be discovered.

"I'll take it as compensation, if I didn't have the golden horned beast body, I'd really be dead. This Wu Long starfield's response system is seriously too lousy, I requested for help from Long Jue Emperor and

yet up till now no one has shown up." Luo Feng stood in space, not doing anything, just patiently waiting.

His battle with the flame undying was 50 seconds.

The self destruct explosion wasn't even 0.01 seconds.

The golden horned beast returned to the internal world, about 0.1 seconds.

After which...

Luo Feng looked about and thought of taking that extra 300 units of bug corpses, putting them in his internal world, that took about 1 second.

...

It may seem slow but everything happened really quickly. At that level, Luo Feng's consciousness and reaction speed were comparable to a quantum computer, his movement speed was also extremely fast, reaching over 10,000 km per second.

After finishing everything, he put on the persona of a victim, patiently waiting in space.

"I'm a victim." Luo Feng muttered to himself.

Chapter 684: No Evidence

Wu Long Starfield, the place where remains of corpses, weapons and weapons etc were sorted out well from the outer region wars, lined up organized within space itself. Only the tens of thousands of km area that had just gone through an undying level of catastrophe was in a mess, the organized corpses of the sector lord bugs were strewn about.

A few tens of thousands of km away from Luo Feng, where the round metal observation device was situated, a silhouette appeared.

He was about 10m tall, dressed in a complex peculiar armor that was black and purple, mysterious engravings covered the entire armor, causing it to emanate energy that shook even the space about, the boots he wore...it felt like an endless mountain.

Standing in space, he dominated that area!

"Hm?" He glanced at the broken ball beside him, before gazing in Luo Feng's direction, muttering, "Energy ripples, it's a flame undying."

Sou!

Luo Feng who was standing in space looked shocked at the great being that suddenly appeared before him, Luo Feng looked up at him...seeing his dark red eyes behind his peculiar helmet, his soul shuddered within, he couldn't help but bow respectfully, "Greetings knight!"

After his experience in Primal chaos city, and seeing a few emperor level undyings, he had no doubt that this being that made his soul shudder this way was definitely a knight level being.

"You are Luo Feng?" His voice rumbled in space and within Luo Feng's consciousness.

"Yes." Luo Feng replied.

"What happened here, say everything in detail." The knight looked at the little punk before him, the security system on Wu Long starfield had given him some information and made him leave immediately, it also gave him Luo Feng and the other 3 internal members' information.

"Yes knight." Luo Feng said respectfully, "I was here to buy bug corpses, the 2 guides and I were inspecting the conditions on the different units, however just now...we coincidentally met with another internal member, he was in a white robes too, he was called Kasey. The 2 guides that brought me recognized him."

"It is extremely rare to bump into another member within the starfield, hence the 2 guides were very happy to meet and chat with him."

"However!"

"At this time, my AI informed me that it felt surveillance signal in this area vanish." Luo Feng's eyes gleamed, saying solemnly, "And at this time, Kasey suddenly attacked without any provocation, without any defense at such close distance, my 2 guides were instantly killed."

The knight gazed at Luo Feng and listened silently.

Luo Feng was nervous within.

He was very clear he needed to be extremely careful in answering, in Wu Long starfield, such a important location of humanity, the knights about ensured that no one could easily flout the rules of the starfield.

"After which, Kasey attacked me." Luo Feng emphasized, "However since I've reached domain lord level and placed outside by the virtual universe company, I knew that I would occasionally encounter danger, naturally I have some trump cards. Within my internal world I bring 10 sector lords as guards and I immediately summoned them back then, also allowing my plant life form cloud contact vine to assist them, dealing with Kasey..."

"It seemed like an easy task to kill him, however!"

"Before he died, he brought out a flame undying from his internal world." Luo Feng said, "I didn't expect that he'd actually have a flame undying within...this was simply too terrifying!"

The knight listened silently.

"The moment the flame undying appeared, the 1st thing he did was to kill Kasey, it made me extremely shocked." Luo Feng said, "After killing him, he made a move to kill my 10 sector lord guards, however, he didn't know... that within my 10 guards, 1 of which was my soul slave, and within his internal world, it held one of my trump cards..."

Luo Feng was very clear...

That flame undying's self destruct would create ripples that left behind traces, it definitely couldn't be hidden from the knight, even a normal undying would be able to discern it.

How did he actually escape this?

He needed a solid alibi, however it had to be reliable, otherwise, he'd be in trouble.

"Fire god origin crystal?" The knight's voice exploded within Luo Feng's mind.

"Yes." Luo Feng said respectfully.

The fire god origin crystal was a technological weapon of the automaton race, as the entire universe's most technologically advanced place, the automaton race was able to create weapons that could kill undyings, however these weapons were extremely pricey, especially those able to be used over and over, their prices were absurd.

F grade laser gun?

It was said it's price was over a hundred million mixed units, even emperor level undyings couldn't necessarily afford it.

Other than these laser gun type single held weapons, there were other bigger weapons like Space fort, God Sacred land, those were terrifying weapons that used in the outer region wars, even emperor level undyings, with their entire fortune, couldn't afford it. Naturally amongst the undying killing weapons, there were still some cheaper ones.

Those that were for one time usage.

Like the Fire god origin crystal, flame, as the easiest explosive energy, the crystal was one of the easier undying killing weapons to purchase. It was a crystal infused with a large amount of flame undying energy within, an explosive device that made all its energy instantly explode. Similar to a flame undying's self destruct.

The theory was simple but the technology behind it was extremely high, after all to compress such shocking amounts of flame undying energy into an undying crystal, and condense it even more tens of millions of times to an origin crystal, the technology was absurd.

Version 1,129 type flame god origin crystal, it was more of a low level crystal, it's strength was only akin to a normal flame undying's self destruct.

As a 1 time usage item, if one had a pathway to buy it, it's price was around 1 million to 1.5 million mixed elements.

"My soul controlled slave used the flame god origin crystal, instantly exploding...as I fled the moment my 10 sector lord guards were dealing with the undying...when that crystal exploded, I was already tens of thousands of km away." Luo Feng said respectfully, "The explosion caused the undying to die as well, but I managed to escape."

...

To protect the secret of his golden horned beast, Luo Feng relied on his world projection to instantly collect all of the beast's broken scales and flesh into his internal world.

After careful consideration.

He crafted an alibi, using the flame god origin crystal to explain everything, using his controlled sector lord slave to trigger the move.

...

Luo Feng stood respectfully there, awaiting the knight's reply.

"Hm." The knight nodded finally, "I will record everything you said and send it to the security system of Wu Long starfield. As for you...the other 5 emperor level undyings will make a decision after discussing."

At this time...

There were ripples in the distant space, in an instant, a universe ship appeared.

Luo Feng's eyes gleamed, it was Long Jue emperor's ship.

Hua!

The cabin door opened, Long Jue Emperor and Dylan became beams of lights as they instantly appeared.

"Knight." Long Jue emperor bowed respectfully.

Dylan bowed too.

"The matter here will be left to you 5 to settle, as for Luo Feng's explanation and my deduction, it's already been passed to the AI of Wu Long starfield." The knight said coldly, after which he vanished and instantly teleported from their vision.

In space, Luo Feng stood there with Long Jue emperor and Dylan.

"Your majesty, are you fine?" Dylan asked, he seemed self reprimanding within, "The grandmaster left you to my protection, however..."

"Dylan, this isn't your fault." Luo Feng shook his head.

Long Jue emperor said, "It's not Dylan or Luo Feng's fault, it's a problem in our Wu Long starfield's internal division, it looks like there's some spies of other races mixed in." Normally whenever any absolute genius of humanity was attacked, most would say it was done by spies of the other races, actually there were some times when these geniuses were killed by other humans with grudges etc.

However as long as it wasn't thoroughly investigated, it would normally be pushed to other races.

"Who made the move?" Long Jue emperor looked at Luo Feng.

"Wu Long starfield internal member Kasey." Luo Feng said.

"Hm." Long Jue emperor nodded, looking about, his formless undying energy expanding out, with a scan of some of the broken bug corpses and surroundings, "There's quite a bit of cloud contact vine remains..."

"It's my supporting plant life form." Luo Feng said.

"The losses this time are not small at all."

Long Jue emperor frowned, "We actually lost over 1,000 sector lord bug corpses units, hm, if this battle had happened in the domain lord level corpses area, the losses would be much less. Losing over 1,000 units, this will be troublesome."

"Troublesome?" Luo Feng looked at him.

"Hm."

Long Jue Emperor looked at Luo Feng, nodding, "Right, even though you informed me that someone tried to kill you, however...the 2 guides and the killer Kasey, are all dead! And since that's so, there's no evidence! If 1 was still alive, we can search his soul properly for evidence, now there's nothing left though...if the loss to Wu Long Starfield was small, not 1 million mixed elements, I can easily settle it myself. However since it's all 5 managers handing it. And there's no evidence, Luo Feng, you may have some trouble."

Chapter 685: Yan Zhu Emperor

"His majesty was attacked within Wu Long Starfield and its internal management was useless." Dylan raged, "It's already lucky that he managed to survive, now there's trouble? What trouble?"

"Dylan."

Long Jue Emperor frowned.

"Long Jue isn't too blame." Dylan slightly bowed before getting up, emphasizing, "But the grandmaster arranged for me to protect his majesty, and I trusted Wu Long Starfield's security, hence I didn't follow him. However...I only left him for such a short time and he was attacked! The grandmaster had entrusted him to me and yet I failed..."

Long Jue Emperor shook his head, "I'm from the virtual universe company too, naturally I lean towards Luo Feng. However, this is something all 5 managers will decide. Our matters here are highly regulated. A few deals with problems etc, everything is settled by us 5. Only when there are huge matters will the powerful knights have to step in."

Luo Feng and Dylan nodded.

"I'm leaning towards you 2, however the other 4 are from the other leviathans...they may not trust you, the 5 leviathans are after all still competing with each other despite working together." Long Jue emperor, "Please wait a while, the other 4 will immediately be here. Right, amongst the 4 coming, you should be most careful of Yan Zhu emperor."

"Yan Zhu emperor?" Luo Feng was stunned.

"Hm, Yan Zhu emperor is from the huge axe dojo, plus his background is terrifying, hence he managed to become a manager, among us 5, he is the most brutal one, I and the other 4 tend to avoid him." Long Jue Emperor said solemnly, "Hence don't ever mess with him, otherwise there'd be trouble."

Luo Feng nodded and remembered the name.

Yan Zhu Emperor?

...

Luo Feng and the other 2 chatted in space, tens of thousands of km away the space rippled and a few ships appeared, not even half a minute between their appearances. 4 ships appeared, all top leveled ships, after they all gathered, their cabin doors opened.

Hua! Hua! Hua! Hua!

With the doors opened, large amounts of silhouettes flew out, a total of 100, half of them undyings.

Wu Long starfield forbade any undyings from entering, however under special circumstances, it was possible.

"What's going on?"

"Look here at this mess."

The 4 managers led their armies over, flying most ahead was a handsome man in an exquisite white robe, this was an extremely dashing and handsome man, not only would women be enticed by him, even men would be moved by his looks, his beauty had reached an extraordinary level.

He had long silver hair, his skin crystal like, almost like the bug clan queen Alina.

His features were perfect.

On his forehead was a dark mysterious engraving, plus his ancient energies, it made others not be able but fall for him.

Such an absolute handsome man, standing there, the other 3 seemed like background figures.

"Follow me." Long Jue emperor communicated to Luo Feng and Dylan.

The 3 went to welcome them.

The 4 managers led their armies and stopped in space, the group gathered silently there.

"Luo Feng, let me introduce you." Long Jue emperor smiled, pointing at the curly haired and green skinned skinny man, "This is the universe 1st bank's Da Nian emperor."

"Da Nian Emperor." Luo Feng bowed respectfully.

"Luo Feng this was our Wu Long starfield's internal department's inefficiency, please be forgiving." Da Nian emperor smiled back.

Long Jue emperor laughed loudly, "Luckily Luo Feng is fine. Luo Feng, this is from the universe galaxy bank, Ceng Yu emperor." This was a humanoid with 4 arms and 4 eyes, his formless energy was ice cold, he only nodded at Luo Feng.

"This is Yin Ge emperor from the universe mercenary alliance." Long Jue emperor said.

Luo Feng looked at Yin Ge emperor, he looked very alike earth humans, only he had more body hair, his eyes were like blades as he smiled at Luo Feng and nodded.

"As for this...this is the legendary absolute genius, the one who became an official level emperor the moment he broke through to undying, he...is Yan Zhu emperor!" Long Jue emperor's voice was louder than before, obviously he was more passionate in introducing Yan Zhu emperor.

"Yan Zhu emperor." Luo Feng bowed respectfully.

My god.

How could there be such an absolutely perfect man, he was the most perfect out of all the men and women Luo Feng had ever seen! Even Fantasy spirit emperor had her charm, and the bug clan queen, that level of life form, they couldn't compare to his man before him, the engraving on his forehead gave off an ancient energy that made others want to get closer to him.

He extended his white jade like finger and rubbed his chin, gazing at Luo Feng, "Luo Feng, True Yan's disciple? I've heard of him."

Luo Feng listened respectfully.

"No one knows exactly what happened here." Yan Zhu emperor's voice was gentle, it swayed the hearts of people, "I've seen the report of what the knight before had submitted to the system, we can only confirm...that the final blow was from a flame undying's explosion!"

"But what exactly is the truth?"

Yan Zhu emperor shook his head, "The 3 internal members are all dead."

Luo Feng felt a knot in his heart.

"Yan Zhu emperor." Long Jue emperor laughed loudly, "The matter is simple, Luo Feng is an absolute genius of our virtual universe company, he's one of the top ten to be assassinated amongst the other clans. This assassination...for him to survive, at least I can answer to the upper echelon of the company."

Yan Zhu emperor glanced at him, "Long Jue emperor, we don't answer to only the virtual universe company, but to all 5 leviathans!"

"This matter has 3 dead internal members!"

Yan Zhu emperor's eyes gleamed coldly as he pointed at Luo Feng, "Luo Feng said it was the internal member that tried to kill him, however all 3 are dead without any evidence. This could totally be constructed by him!"

"He said others tried to assassinate him!"

"However!"

"Maybe he had long planned to instantly kill 3 members and take away large amounts of units of the sector lord bug corpses!" Yan Zhu smiled coldly, "It's a huge sum worth over 10 million mixed elements, enough to make a domain lord take the risk, and he's using his absolute genius identity as protection, naturally thinking there would be no losses."

Luo Feng's expression changed.

"Yan Zhu emperor." Luo Feng spoke.

"Shut up, I'm speaking with Long Jue emperor, don't speak when I don't allow you to." Yan Zhu emperor frowned, glancing at Luo Feng with disdain.

Luo Feng stood there, raging within, however he remained calm and didn't say anything.

"Yan Zhu emperor, "Long Jue emperor frowned, "There's no need..."

"There is!"

He said seriously, "This matter is very serious, firstly our Wu Long starfield has lost over 10 million in mixed elements, and it involves an assassination plot, and the final explosion...had power akin to a normal flame undying. No matter, we have to investigate it thoroughly!"

"Whether if there's a loophole or spy within our Wu Long starfield, or Luo Feng coming up with this entire ploy, we have to know the truth!" Yan Zhu emperor looked at the other managers, "Everybody speak."

Da Nian Emperor, Ceng Yu emperor, Yin Ge emperor, everyone exchanged glances.

"Yan Zhu is right, this matter is very serious and we have to investigate well." Da Nian emperor nodded.

"Hm." Ceng Yu nodded.

"We cannot let Luo Feng be maligned too." Yin Ge said indifferently.

"But of course!"

Yan Zhu nodded, turning to Luo Feng, "Luo Feng, I'll question you now."

"Yes." Luo Feng replied respectfully.

Beside him however Long Jue emperor looked worried, communicating to Luo Feng, "Luo Feng, don't mess with this Yan Zhu emperor, as much as possible just look down and bear with it." Dylan too communicated to him anxiously, "Your majesty, I'm currently informing the grandmaster of this incident, once he shows himself, this matter will definitely be solved."

Hearing Dylan and Long Jue's emperor's words, Luo Feng felt more steady within.

"Let me ask you." Yan Zhu emperor looked at Luo Feng, "Was what you said with the knight before all true?"

"Yes." Luo Feng said.

"Do you dare release your soul's protection, without resistance, and let me search to see the truth? You can relax, I will definitely not harm your soul at all." Yan Zhu emperor continued.

"No."

Luo Feng frowned and said respectfully, "Searching one's soul means one has to completely release all protection, allowing others to dig deep and search, the moment he's not careful, memories may be destroyed. And once one loses his memories, he'll become an idiot and his soul may crumble and die!"

"Do you not trust my ability?" Yan Zhu looked at him.

"Yan Zhu emperor." Luo Feng said, "It's not that I don't trust you, but I do not dare gamble like that, I Luo Feng...do not like placing my fate in other people's hands."

Even if Luo Feng didn't have any secrets within, he wouldn't dare do this, if Yan Zhu emperor had ulterior motives...slightly destroying something, making him become an idiot. After that Yan Zhu could easily say he was simply careless, even if he was punished, Luo Feng would be an idiot by then.

What's more...

Luo Feng had many secrets within, he couldn't let others search his soul.

"Yan Zhu emperor, everybody has their own secrets, no one would simply bare theirs open. What's more, he's a genius of our virtual universe network, how could we allow such a dangerous thing to happen?" Long Jue emperor frowned, "If it were those normal internal members it would be fine, but such a genius...one that humanity regards as a true treasure, no one would allow it."

"Ok."

Yan Zhu nodded coldly, "Since you cannot accept a soul search, then let me ask you, you told the knight before...you let your soul slave use the Flame god origin crystal to explode and kill that flame undying. Then let me ask you...where did you buy this flame god origin crystal? Does the universe 1st or galaxy bank have any records to prove it?"

"No proof." Luo Feng shook his head.

"You can't even show proof for this." Yan Zhu looked at him, "Your words are all fabricated without any proof, how do you expect us to believe you?"

Luo Feng frowned and said, "Yan Zhu emperor, one doesn't necessarily need to buy a treasure to have it."

"For example!"

Luo Feng flipped his hand and brandished the e9 laser gun.

"Can you check where I got this e9 laser gun?" Luo Feng looked at him, "Can you find any proof of purchase? No, I have no proof either, and you'll never find any pathway of purchase, yet I still have it!"

Luo Feng flipped his hand again and took out the purple 100 net leaf!

"Yan Zhu emperor, do you have any proof of my purchase of this 100 purple net leaf, or transaction records?"

The leaf was priced at about 2 million mixed elements or so.

Flame god origin crystal, the low leveled one was priced about 1 million to 1.5 million mixed elements.

The e9 laser gun (0.1 second preparation, special level) priced at 0.5 - 1 million mixed elements.

"There's no proof at all."

"Yet I still have the 100 purple net leaf, the e9 laser gun." Luo Feng looked at him, "Similarly, I had the flame god origin crystal!"

Chapter 686: Lock Up

Yan Zhu Emperor looked at the purple 100 net leaf and the e9 laser gun in Luo Feng's hands and frowned, with his position, naturally these items didn't mean much to him, however he was still shocked that a domain lord level 9 youth had such wealth and ability, spending money to buy things was impressive, not spending and acquiring these was something else.

"You sure know how to twist." Yan Zhu emperor laughed softly, "I won't bother you about the flame god origin crystal anymore, let me ask you, that soul slave sector lord you controlled, what's his name, which universe country and starfield is he from."

Luo Feng was shocked within.

Trouble.

This was a loophole.

"Back then I bought a large amount of universe level slaves one of which was called Tai Wu." Luo Feng's consciousness speed was akin to an AI, instantly picking out a name from a slave from his universe level and domain lord level slaves, "His talent was exceptional, Yan Zhu emperor, you should know, back then I was only a star level 9, I had no way to force a universe level to be my slave. And this universe level slave didn't resist at all, hence..."

Luo Feng had indeed bought many universe level slaves.

And many had died along multiple incidents, like the poison gas of the mother nest alone had killed a few.

In all, the things that happened long ago on earth, no matter how powerful one was, he wouldn't be able to dig it up.

"This Tai Wu, as a slave, had no resources at all, his training methods were rough and yet he still reached universe level 9, later, I passed him a technique, and during the time I was in the virtual universe company, I gave him the best resources." Luo Feng smiled, "Tai Wu very quickly reached domain lord

level and as my soul slave I didn't want to waste his time, making him go straight from domain lord level 1 to 9, after which, his luck was good and he actually broke through to sector lord level! I naturally used my resources to nurture him and bring him along, after all, using a soul slave to do many things is convenient."

Yan Zhu emperor frowned.

Before this questioning, naturally he had checked up on Luo Feng as much as he could, however before the genius competition, Luo Feng was but a normal leader of earth, plus it was in the dark space, there was no information on it. And these low level slave transactions were naturally messy.

"Ah?" Yan Zhu looked at him, "That time, you already knew soul control techniques?"

"Yes." Luo Feng replied respectfully.

"What techniques?" Yan Zhu continued, he had to get a lead, soul control techniques were rare and before Luo Feng was in the virtual universe company, just what techniques could he have?

"Soul imprint." Luo Feng replied.

"What is that, is there such a thing?" Yan Zhu frowned.

Beside him Long Jue emperor smiled, "Yan Zhu emperor, your intel on Luo Feng should have shown that he is flying the Yun Mo Planet ship, that ship is the Yun Mo planet master Hu Yan Bo's ship." Even though there were many undyings in human territories, however any with a little reputation were easy to recall.

Undyings had extremely good memory.

"Luo Feng naturally acquired Hu Yan Bo's inheritance." Long Jue emperor smiled, "And Hu Yan Bo, had 9 great undyings as his slaves, many knew about this. Among his slaves, Iron Blade official even got on many people's bad side. Hu Yan Bo's technique which he used to control the 9 undying slaves was Soul imprint."

Yan Zhu emperor frowned.

"You said back then you summoned 10 sector lord guards, 1 was your soul slave, the names and identity along with their backgrounds of the other 9, reveal them all." Yan Zhu said.

"Yan Zhu emperor, what do you want to ask." Luo Feng frowned.

"Didn't you hear me? You only need to answer!" His eyes gleamed coldly.

Luo Feng said respectfully and bowed, "Yan Zhu Emperor, the other 9 were 9 gold horn race sector lords that followed me to protect me after I was invited into their community awhile back."

"Gold horn race?" Yan Zhu emperor was boiling with rage.

Gold horn race, they were independent of humanity.

Even though they were subservient, however their management and nurture of later generations etc, humanity didn't meddle in them, hence whatever happened in Laos world was impossible to check.

"Everyone listen to the order." Yan Zhu emperor turned to look at the over 100 underlings behind.

Over 100 white and purple robed underlings all awaited his orders.

"Check the surrounding traces of battle around carefully, any hint and clue, check it all." He ordered.

"Yes."

The white and purple robed underlings immediately separated and began to investigate the area.

"I'll stop my questioning here, we'll see from the remains of the battle." Yan Zhu looked at Luo Feng and went silent.

Luo Feng kept silent.

Luo Feng looked at Long Jue emperor, communicating, "Long Jue emperor, does he have a grudge with me, why is he deliberately making things difficult?"

"He is making it difficult for you, as for the reason, I don't know. I only know from his character that he may find trouble with you, however this is a bit beyond that." Long Jue emperor replied, "Right, have you informed your teacher True Yan emperor of this?"

"Dylan told me he has, in awhile I'll go see my teacher in the virtual universe." Luo Feng communicated.

After which Luo Feng looked into the distant space.

Tens of thousands of km in area, the white and purple robed underlings flashed about, investigating everything.

Luo Feng and Dylan along with the 5 managers all looked on silently.

...

"Place a flame undying weapon shard and pretend it's something suspicious you found." Yan Zhu emperor instantly communicated to a distant purple robed undying searching for clues, that was a flame undying too, when he heard the order, he replied, "Yes Lord."

...

After a while.

Over 100 white and purple robed underlings flew back, all with some items in their hands.

"Lord." They all bowed respectfully.

"The surroundings should be filled with sector lord bug corpses, these are the items that weren't." Yan Zhu emperor pointed at several items, "Let's seem these, ah, this is a weapon shard with flame law engravings, it's obviously a commonly used weapon by flame undyings. What if it wasn't the flame god origin crystal's explosion but the attack of a flame undying? And these items, Luo Feng, how do you explain these? These aren't sector lord bug corpses, obviously they were from somewhere else, can you explain all of them?"

Luo Feng frowned and said respectfully, "Yan Zhu emperor, there were many sector lords that were killed, when one dies, their internal world collapses and large amount of items fly out. How would I know where all these came from?"

"Hm?"

Yan Zhu emperor smiled coldly, "You sure know how to push things aside. From your words, does it mean everything that could be used as evidence can be explained as items from sector lord internal worlds crumbling?"

"From start to end, I see how you have been lying."

"Everything you've said have been unable to be verified."

"Guards, place Luo Feng in the 1st starfield hell." He ordered, "There, he'll have to answer everything!"

Beside him, Long Jue emperor and the others were all shocked.

1st starfield hell?

The strictest jails in humanity were the legendary 1st 9 and bottom 9 jail hells, the 1st 9 were the 1st to 9th hells, normal undyings knew about it. The bottom 9 were from the 10th-18th, many undyings didn't know about it.

18 starfield hells, they were like the legendary 18 levels of hell.

The later it got, the more terrifying!

Even an emperor level undying, the moment he was placed in the 18th starfield hell, he probably couldn't survive.

The 1st had the lowest risks, however in comparison...at least to Luo Feng, it was terrifying enough.

"Yan Zhu Emperor." Luo Feng was raging.

"Shut up, you don't have a right to speak." Yan Zhu emperor retorted coldly.

"I came here to your Wu Long starfield to purchase goods, I got attacked, your attempt to save me was that slow, if it weren't for my own trump cards, I'd long be dead." Luo Feng didn't care about his retorts anymore, raging, "I haven't even questioned about your useless protection, and yet you go on over and over questioning me."

"I've been answering all your questions and yet you find trouble."

"Hmph."

"You really think we of the virtual universe company are that easy to bully." Luo Feng said coldly, "I will immediately tell my teacher True Yan emperor of everything, also the organizer of this era's genius battle 9 blade knight, and lastly to the elder who had been good to me Tian Shi palace leader! I really want to see...just how far you of the huge axe dojo dare to treat me, a primal region member of the virtual universe company!"

Yan Zhu emperor's face was immediately flushed.

The others around were shocked...

9 blade knight? Tian Shi palace leader?

They were all emperor level undyings, to be managers of Wu Long Starfield, they all had huge backgrounds, True Yan emperor wasn't too much of a threat to them. 9 blade knight was different, and the Tian Shi palace leader was even more of a legend, even more terrifying than 9 blade knight.

"Tian Shi palace leader?" Yan Zhu was shocked within.

Even his backing wouldn't dare mess with such a being.

Tian shi palace leader was the man that single handedly dominated the entire blood river world, more powerful than many universe country leaders. Blood river world was after all a terrible place where many of the virtual universe company's warriors were killed, one could only imagine his power, even though it wasn't like ancient times, it was still very powerful. For the leader to dominate over the entire world, his strength was already a well known legend.

"Hmph."

"No matter what, Luo Feng is still suspicious, how can we let him go?" Yan Zhu ordered, "Guards take him to Drizzle palace and watch him well."

"Yes." The purple robed undying flew over.

Long Jue emperor and the others didn't say anything.

This lockup was a simple house arrest, nothing serious.

"Yan Zhu emperor." Luo Feng stared at him, "The people of the huge axe dojo sure know how to vent their anger, your useless management of the Wu Long starfield has resulted in me being attacked, and you still treat me this way. I will definitely let the upper management of the virtual universe company know, including 9 blade knight and Tian Shi palace leader."

Hearing those names, Yan Zhu emperor's eyes twitched.

"Take him away, lock him up." He shouted.

Sou!

Luo Feng was grabbed by 2 undyings and brought into a purple universe ship, sent straight to a palace within Wu Long starfield, of which Luo Feng was locked in a small hall. As for Dylan...before beings such as Yan Zhu emperor, he had no way to resist.

Chapter 687: Shi Huo Knight

Drizzle palace, it was originally a hall for someone to train in, it slowly became a frequently used place as a lockup, the entire drizzle palace was 100 m tall, it's length and width was also several hundred meters, it was completely empty within.

Luo Feng sat crossed legged within.

"Your majesty, I'm outside." Dylan's undying energy passed through the halls as he communicated, "This matter, that Yan Zhu emperor is too much, he purely seeks to cause trouble for you. They have their own problems in their internal department and yet they find fault with you, don't worry, it will be solved very quickly."

"No problem." Luo Feng sat crossed legged and smiled, "Just a small setback, it doesn't mean anything."

Suddenly Luo Feng looked down at his wrist communicator, he had received a call request.

"Hm? Teacher?" He immediately connected his consciousness to the virtual universe.

Virtual universe Yu Xiang mountain, Primal region, Luo Feng's villa.

A gold armored apeman True Yan emperor was sitting in the hall, Luo Feng suddenly appeared and flew straight in, bowing respectfully, "Greetings teacher."

"Sit." True Yan smiled and looked at him.

Luo Feng sat.

"I already know about your matter, and I've also checked through the records of Wu Long Starfield." True Yan looked at Luo Feng, "Was whatever you told the knight true? That Kasey had indeed attacked you and there was a flame undying after that?"

"Yes."

Luo Feng said respectfully, "As for what I told the knight, the core is true, some smaller details, I don't wish to reveal."

The core was indeed all facts.

Luo Feng's story about defending against Kasey was that of the 10 sector lords, however he had relied on his own void pagoda soul defense! He relied on the golden horned beast to kill the undying, not the flame god origin crystal!

In all, the core was true.

Anything that involved the important secrets, he lied slightly.

"Hm." True Yan nodded, not asking anymore, as an ancient being that had been around for trillions of years, he was very clear that any absolute genius that could survive in the vast universe all had their own special secrets. He was also very clear that this particular disciple of his had quite a few.

The demon note inheritance was one, and before that, he had already guessed...that Luo Feng had others.

However, everyone had their own secrets.

True Yan couldn't possibly get everything out from his disciple, he just needed to confirm...that whatever he did, he didn't go overboard. That way, he wouldn't bother about everything else.

"Since you say that this was an assassination attempt, then there's no problem here." True Yan smiled had a sense of pride, "No matter what, you are still a genius of the virtual universe company, no matter how tyrannical that Yan Zhu is, he doesn't have the right to determine the fate of our members."

Luo Feng let out a sigh of relief.

"Tell me your exact conversation with Yan Zhu." True Yan said.

"Yes teacher."

Luo Feng immediately repeated the entire story to him.

True Yan immediately laughed when he heard, "Haha, you sure know how to throw in names, throwing in 9 blade knight is good enough, after all when you become undying, you will become his underling. You even used Tian Shi palace's leader's name...hahaha, hearing his name, that Yan Zhu must have been very shocked."

"Is the leader that powerful?" Luo Feng asked seriously, "Stronger than even 9 blade knight?"

"Tian Shi Palace leader, he rules over the that palace and dominates over blood river world for trillions of years." True Yan's eyes had a gleam of respect, "That is much stronger than any universe country leader or knight, he's the true upper echelon of the virtual universe company. You were extremely lucky when he gave you some guidance back then."

Luo Feng was shocked.

His teacher's words confirmed that Tian Shi palace leader's position was amazing.

"Right, teacher, why did that Yan Zhu emperor target me." Luo Feng asked suspiciously, "I've never seen him before."

"It's my fault."

True Yan's eyes had a glimpse of disdain, he mocked, "That Yan Zhu, in terms of comprehension, aptitude, talent, everything is actually average. If no one gave him guidance, if he trained on his own, even becoming a sector lord would have been extremely hard. However he has a very powerful father, a true genius of the huge axe dojo, he is also currently Shi Huo knight of the dojo."

"Shi Huo Knight?" Luo Feng was stunned.

"Hm."

True Yan exclaimed, "That is a true absolute genius, not even weaker than the Ke Di I mentioned before. Sector lord pinnacle, he could kill official level undyings, after he broke through...he immediately became an emperor level undying, and tens of thousands of years after, he became a knight."

Luo Feng was shocked.

"Shi Huo knight only had 1 son, you could say he spent endless resources and energy." True Yan exclaimed, "To make his son Yan Zhu stay in the sector lord level, making him take his time there and not breakthrough, he stayed there for a total of over 9 million years."

Luo Feng was shocked, Long Jue emperor had said Yan Zhu was a genius before, becoming an official level undying straight after breaking through, however now after hearing this...he actually stayed in the sector lord level for over 9 million years.

Human sector lords only had life span of 1,000 eras.

"Terrifyingly valuable treasures, even treasures that knights would go mad for, Shi Huo knight didn't even use them himself, he gave all of them to his son." True Yan said.

"What?" Luo Feng was shocked.

"Did you see the mysterious engraving on Yan Zhu's forehead, that's the mark of that treasure." True Yan exclaimed.

Luo Feng immediately recalled his first meeting with Yan Zhu, seeing that mysterious engraving on his forehead...it had indeed given off an ancient energy.

"Endless resources and treasures, along with treasure that even knights would go mad for, they were all used on this sector lord back then." True Yan exclaimed, "Just his body alone, it was raised to perfection from his father's treasures. Hence he's that beautiful, training for 9 million years at sector lord level along with countless treasures, how could he not be strong?"

"Becoming official pinnacle straight after breaking through, that's completely average."

True Yan shook his head, "Even normal undyings, with those treasures would immediately reach official pinnacle."

"Ah." Luo Feng was shocked.

From this...

That Yan Zhu wasn't a genius at all.

"He simply had an absolute genius and incredibly powerful father." True Yan mocked, "As for himself, he's purely a petty spoilt brat that had been pampered too much by his father, he's always jealous of true geniuses, that's why back then when I rose up, he battled me. However I taught him a good lesson. I didn't care about anything else."

Luo Feng laughed.

"He kept losing when he challenged me. I couldn't do anything about it, every time we fought, he would lose, hence we became enemies." True Yan shook his head, "And with his petty character, it wouldn't be strange if he sought trouble with you. 1, you are a genius too. 2, he hates me to the bone, however he can't do anything to me, hence he would naturally take it out on the disciple I favor. I actually already saved him some humiliation, there were several losses that I didn't even announce, mainly not to get on his father's bad side. His father...is a true formidable person. Over a trillion years, yet his power is still unfathomable, his position in the huge axe dojo is extremely high."

Luo Feng nodded.

Not even taking 10,000 years to become emperor level undying, tens of thousands of years to become a knight, over a trillion years...his power would definitely be even more shocking.

"No wonder he's that tyrannical, no wonder Long Jue emperor and the others, all with their own backgrounds kept empowering him." Luo Feng thought, "It's purely because of his powerful father that forced him to emperor level, his father must have paid a hefty price. Not even using the treasure for himself but on his son."

"You have to bear with this matter for now." True Yan smiled, "No matter how strong that Shi Huo knight is...he is still from the huge axe dojo. If their people can so blatantly bully our virtual universe company people, our company will definitely not back down."

Luo Feng nodded.

This involved exchanges between the 2 leviathans.

"No matter how unwilling that Yan Zhu is, he will still have to let you go." True Yan said, "However you have to wait...until the upper echelon says so."

Luo Feng understood that Yan Zhu emperor had Shi Huo knight behind him.

His teacher True Yan emperor was but a being close to becoming a knight, compared to that Shi Huo knight that had been in training for trillions of years, their positions were on completely different levels, this matter...his teacher's appearance alone would probably not be enough. After all Yan Zhu hated True Yan to the bone, he definitely wouldn't show him any respect.

...

Wu Long Starfield, within a majestic palace.

"True Yan's disciple actually dared to act out before me!" The beautiful looking Yan Zhu's face was twitching, his eyes burning with hate, recalling his many exchanges with True Yan before, True Yan was arrogant and aggressive not afraid of anything, Shi Huo knight's son was still stepped on by him!

Yan Zhu Emperor must have had it bad back then.

After being humiliated, if True Yan didn't think about Shi Huo knight, he would probably have just killed Yan Zhu back then.

"Hmph."

"True Yan emperor?"

"I didn't expect your disciple to be as arrogant as you, you 2 are completely alike. Never mind...your disciple has already been put on the list here, even if he escapes this time, there'll be time to deal with him in the future." Yan Zhu's eyes gleamed coldly.

After living for so many years, other than his father's punishments, no other person had dared humiliate him like that.

Back when he was trampled, he was driven mad, even howling to his father before..."Kill True Yan, kill him, if he doesn't die, I'll die! As long as he's there, I cannot exist!"

His father Shi Huo knight's reply was...

Throwing his son into the 9th starfield hell, for a total of 1,000 years, he was much better when he returned, even though he was still as petty and ruthless, it was not as unbridled as before.

Chapter 688: Knowing Oneself

On the day Luo Feng was locked up, within virtual universe's thunder island, in a completely black palace that gave off a terrifying aura.

Beneath the palace.

Long Jue emperor knelt respectfully there, his head on the ground itself.

"Shi Huo's son keeps picking trouble with True Yan." A thick powerful voice resounded throughout the endless palace, there were crackling noises, "However he's stupid to find trouble with Luo feng, he is after all one of the top 10 seedlings recognized from the other geniuses, to make him suffer without any evidence etc from this matter, that's a joke."

In the throne above, an ugly life form covered completely in black scaled armor with a pair of horns on his head, this tall and sturdy scaled life form sat there, his right claw terrifyingly sharp, he casually brushed the armrest, creating the ear piercing sound. He gave off a formless pressure that emanated throughout.

It made people shudder from within!

It made people fear him!

His finger casually scratching of the rest, he ordered, "Give the order, release Luo Feng."

"Yes." Long Jue emperor knelt there, not looking up at all.

Sou!

He instantly vanished from the virtual universe.

...

Wu Long starfield, the majestic castle in which Yan Zhu emperor stayed in welcomed a guest...Long Jue emperor.

"Tian, why are you here?" The beautiful Yan Zhu emperor was lying in a chair of the 9th floor, beside him 2 beautiful and sexy fantasy spirit ladies were giving him a massage, he sat in a spot where he could see out into the endless space outside, even to the distant endless amounts of floating goods.

"Yan Zhu emperor."

Long Jue emperor walked over and said seriously, "The top has given the orders to release Luo Feng."

"Top, which top?" Yan Zhu looked up and glanced at him.

"My direct superior, You Mo knight." Long Jue emperor said.

Yan Zhu's eyes twitched when he heard the name, the universe was vast, every universe country leader and knight were still few in numbers, it took extremely long periods of time for one to be born or produced...there were only those few, and amongst them, there were differences in rankings and position.

If one said Tian Shi palace's leader was a legend, staying within Tian Shi palace, not making a move for trillions of years.

Relying solely on his name to dominate.

Then You Mo knight was a bloody legend. His name was completely built on slaughter and killing, even his terrifying body wasn't natural, it changed after his self created technique morphed it into the best killing construct. He was definitely known within the virtual universe company as a god of death.

"I know what to do." Yan Zhu emperor frowned.

"Yan Zhu emperor." Long Jue smiled, waving his hand for the 2 fantasy spirit ladies to leave.

Yan Zhu looked at him.

Long Jue emperor smiled, "We have been together for endless periods of times, I've hardly ever overstepped you. However...this Luo Feng is after all one of the heavily favored geniuses from this generation within our virtual universe company, we only lost 10 million mixed elements, this small loss would definitely never equate to the loss of an absolute genius."

"Thanks." Yan Zhu emperor's eyes gleamed.

He could hear it.

Long Jue emperor was hinting at him...Luo Feng was one of the exceptional geniuses of this batch of geniuses (Referring to all the geniuses in Yu Xiang Mountain currently), without any guarantee, it was best not to mess with him. Otherwise it would enrage the upper echelon of the virtual universe company.

"Haha, then I'll be leaving." Long Jue emperor smiled and left.

Yan Zhu got up personally and sent him off.

...

After awhile, Yan Zhu returned to that stone throne draped with the Devil clan royalty's 9 mist beast skin, he lay in the soft skin and closed his eyes.

"This Long Jue emperor sure is scheming, he plays the good guy on both sides." He muttered to himself.

The 5 managers all represented the 5 leviathans.

The moment a deal exceeded 1 million mixed elements, the 5 would have to audit it together. Over the long periods of time, naturally they formed their own understanding.

Like Yan Zhu emperor's strength, made the others give him some leeway.

Normally they wouldn't mess with him.

Like the smaller deals.

Or to deal with some punks.

Against Luo Feng however, Long Jue emperor had a bottom line...like if Yan Zhu insisted on sending him to the 1st starfield jail hell, he would definitely not agree to it. However as long as Yan Zhu didn't cross that line, Long Jue would naturally let certain things slide. No matter what, his relationship with Luo Feng was shallow, he would allow Yan Zhu to do anything as long as it didn't go over board.

However the moment a big deal was involved, no one would go soft!

Anything involving the leviathans' reputation, then these were things they wouldn't back off on!

The small matter of locking Luo Feng was but a little ruckus.

"It's a pity I didn't find any proof." Yan Zhu's eyes gleamed fiercely, "If I could falsify evidence to show it was Luo Feng's ploy, that he killed those guards and stole up to 10 million mixed elements worth of bug corpses...then it'd be over for him, the proud disciple would be killed, True Yan would definitely be enraged."

"Hehe."

"True Yan, don't be too proud now."

His expression warped slightly, "I have patience, I will definitely make you suffer, and kill you! As long as I accomplish this...I'm willing to die for it!" His eyes gleamed madly, people had always let him get his way, with his father's presence, even the powerful beings were friendly to him, this way of life had spanned over tens of millions of years, it was ingrained within him.

Until he met True Yan emperor!

The violent and intrepid True Yan! The one that never submitted to anybody!

His greatest blow, standing up over and over and yet being defeated time and again, even being trampled on, it had caused him to descend into madness, back then he even howled to his father those words..."Kill True Yan, kill him, if he's not dead, I will die! I cannot live when he's alive!"

However his father Shi Huo knight simply sent him to the 9th starfield jail hell.

A nightmare for 1,000 years.

Within the jail hell for 1,000 years, many blows were much worse than what True Yan had dealt to him, it was simply like hell. However those blows...made him hate True Yan even more, he believed that everything was because of True Yan, the source was him!

When he came out of the prison, he had become more steady, however deep within he still madly believed in his one target.

"Make True Yan suffer, kill him!"

"I want to make him feel fear, regret and suffer because of me."

"If I accomplish it."

"I'll die with no regrets!"

...

"Wei Ni En." Yan Zhu emperor lay in his throne and said softly.

A demonic silhouette appeared.

"Master." The silhouette bowed.

"Head to Luo Feng's home...earth." Yan Zhu ordered, "You don't need to do anything, just hide one of my undying crystals there, leave now."

"Yes master." The demonic figure replied respectfully.

Weng...

Jade green lights engulfed the area and the space rippled.

Sou!

A space pathway instantly appeared and vanished, the demonic figure had left Wu Long starfield via her god country teleportation.

"True Yan emperor, I'm an undying, I have time, let's take it slow." He smiled a perfect smile.

Drizzle palace.

Luo Feng sat crossed legged within, his consciousness within his internal world.

...

Within the vast internal world, the black clothed Luo Feng was floating above the endless sea.

"Bug clan island, form!"

Black clothed Luo Feng pointed down at the endless ocean, immediately the waters began to churn and howl, with crackling noises, they split apart and pure world energy gathered, 100,000 km area of sea had become endless world energy, after which they came together to form continuous rock.

The endless world energy in the air poured in.

In an instant.

An island with a diameter of 100,000 km was formed, there was mud, grass, mountains, canyons, rivers etc, it was a very normal continent world.

"Alina, from today on, you'll live here." The black clothed Luo Feng ordered, wielding a world ring, Alina was within, transferring her from the center continent to this new island.

"Yes master."

The queen Alina and the mother nest landed simultaneously in the island.

"These are 300 sector lord bug can units, from what I estimate, you should be able to produce 3 million tiger armored bug soldiers." He said, retrieving large amounts of bug corpses from his world, even within his internal world, Luo Feng couldn't teleport, unable to instantly bring her from the center continent over, he had to use a storage device to bring her over.

"300 units?" Alina was curious.

"Every sector lord bug corpse unit is made of 100,000 sector lord pinnacle bug corpses." Luo Feng explained, the large amount of corpses piled up beside, it became a mountain formed from 30 million sector lord pinnacle bug corpses.

"Wow."

The queen's eyes gleamed, she was getting excited.

"How's your speed in producing sector lord pinnacle tiger armored bugs?" Luo Feng asked.

"I can produce 10 a day." She said, "Every sector lord pinnacle bug has incredible amounts of energy, hence the speed is slow. If it were creating star level bugs, I can produce them infinitely from the caves in my mother nest."

"10 a day? Over 3,000 a year. It'll take 300 years to produce a million sector lord army, hm, anyway my training will take long." Luo Feng nodded, "Then you should begin now."

"Yes master." The queen Alina was obviously very excited with anticipation.

Sou!

She flew within the mother nest, after which that over 800m tall round ball floated into the sky, diving into the mountain of corpses.

It began producing...

The black clothed Luo Feng watched on silently.

After a little over 2 hours, the mountain of corpses slightly shook, and a malevolent bug over 10 storeys tall climbed out, it was covered in incredibly thick armor, powerful and intrepid, this sector lord pinnacle tiger armored bug jumped down when it saw Luo Feng, with a rumble it landed on the ground, it was extremely respectful before Luo Feng.

"The 1st tiger armored bug..." Luo Feng's eyes were filled with glee.

"Million sector lord army!"

Luo Feng seemed like he was staring at endless amounts of sector lord tiger armored bugs, his blood boiled within as he anticipated excitedly.

As for acquiring the corpses from Wu Long starfield's debris, Luo Feng didn't feel any sense of regret from that. When one reached a level of mental stability as Luo Feng's, one would see everything clearly, as for knowing oneself, he saw through the mess, he wouldn't deceive himself.

Heart like a mirror, seeing clearly through the mud.

Knowing oneself and staying true!

Luo Feng was clear on himself, ever since he left earth to explore the universe, as the strongest of earth, especially with all the deception in the universe, seeing ancient families get destroyed, entire planets enslaved, even the gold horn race being subservient, their unwillingness and unhappiness from deep within their bones.

Luo Feng felt a sense of danger!

"I have to get strong!"

"I have to give my all, fighting for my root, if the root dies, how can the leaves survive?"

Back then when Luo Feng decided to sacrifice himself with the golden horned beast, he had already taken earth to be his root, maybe he was strong and had far exceeded the entire earth. However his root was earth...if the earth were to perish one day, with all his comrades dying, what would be the meaning in his life of solitude after?

Luo Feng knew himself...

Back when he immolated his soul to fight the golden horned beast, he knew it already.

He had to be a guard!

He had to protect his home, his root...earth!

"Progress, never ending progress."

"I need to keep getting stronger, I will give my all." His eyes were like blades, solid and piercing.

The path to becoming strong may result in many situations, like the assassination attempt from the bug clan assassin...that flame undying self destructing and destroying large amounts of bug corpses, under such circumstances, Luo Feng easily made the decision to grab away 300 units of bug corpses, it probably had no effect whatsoever to the entire Wu Long starfield, however to his growth, it was a huge benefit, and it didn't harm anybody...why not?

Anything that harmed others, he would rarely do.

However if it involved the survival of earth, even if it meant a few innocent lives, he would slaughter without hesitation.

He knew his own heart, doing things without hesitation, straight to the point!

Taking away those bug corpses.

Slaughtering, so what?

Knowing oneself, staying true to it.

Only with a steady heart, not affected by outside influence, whether it was to become a slaughtering demon, or a perfect kind person, or an evil person, as long as one was true to his heart, he would go far in his training! And even so, this path was still filled with dangers, like how Luo Feng almost died this time.

"Pa! Pa! Pa!"

There was knocking on the palace's door.

"Luo Feng, you can come out." Long Jue Emperor's voice resounded.

Luo Feng who was sitting crossed legged within Drizzle Palace opened his eyes, they gleamed with glee within.

Chapter 689: Revenge

Rumble...

The door of Drizzle palace opened as 2 sector lord guards used their strength to push it, slowly the door split apart and the silver armored Luo Feng walked out smiling.

"Luo Feng, you've suffered this time." Long Jue emperor walked over.

"It's ok." Luo Feng smiled, "That Yan Zhu emperor is only a person from the huge axe dojo, I didn't believe he could do anything drastic."

"Haha..." Long Jue emperor laughed loudly, his laugh resounding throughout the hallways, "Your words are right, no matter what, you are still a member of our virtual universe company. And you are the victim this time, his actions were seriously overboard."

Luo Feng looked at Dylan beside him, "Dylan, I'm prepared to enter Wu Long Starfield."

"Again?" Dylan was stunned.

"I've already paid for 1 million mixed elements worth of goods, should I just leave it?" Luo Feng joked.

Long Jue emperor nodded, "That's a given, this time, I'll personally accompany you and be your guide."

"How can that be." Luo Feng was surprised.

"Why not?" Long Jue emperor asked, "When do you want to go?"

"I don't wish to waste any time, how about right now." Luo Feng nodded.

"Ok, then we'll head out now."

...

Long Jue emperor brought 2 white robed guides to follow Luo Feng in a ship, heading towards the region in Wu Long starfield where they stored the endless bug corpses.

"Buzzz..."

The space rippled and a ship appeared, the cabin door opened, Luo Feng, Long Jue emperor and 2 white robed guides flew out.

"Ah, this is the place where I was attacked?" Luo Feng looked at the coordinates on his wrist quantum computer, shocked, "We travelled straight here? I remember the last time I was here, the 2 guides had to first bring me to the void region first before flying slowly over."

"That's the normal rules." Long Jue emperor shook his head, "I don't need to follow that."

Wu Long starfield's storage region forbade undyings from entering, however after Luo Feng was attacked last time, Long Jue had brought Dylan straight in.

Long Jue emperor and the other managers had special authority.

"Hehe." Luo Feng looked about, the marks of the explosion from the flame undying were all gone, large amounts of units of sector lord bug corpses had filled the area in an orderly fashion, "Long Jue emperor, it's only been a day, there's already such a change here."

"Haha."

Long Jue emperor asked, "How much of the 200 units have you seen?"

"Half of it." Luo Feng said.

"Then I'll help you complete it and after seeing all 200 units, you can choose." Long Jue emperor said.

Luo Feng flipped his hand and immediately 200 metal cards floated out, with a thought, these 200 became 1 big pile and a small pile, "This small pile is for the units I haven't seen."

"Ah?" Long Jue emperor glanced at it, quickly determining the quickest viewing route.

"Then let's head out." Long Jue emperor said.

...

He brought Luo Feng with the 2 guides and began to fly within the pathways of Wu Long starfield.

After half a day, they finished the remaining units and after going through all 200, Luo feng had an idea of his top 100.

"Even though I already have 300 corpse units already, there's still no light at the end of the tunnel, buying these 100 extra units won't be a waste." Luo Feng thought, simultaneously he turned to smile at Long Jue emperor, saying, "Long Jue Emperor, I've already chosen which 100 units I want."

"Ah?" He looked at Luo Feng, "Which 100?"

"These."

With a flip of his hand, he produced 100 metal cards.

Long Jue emperor glanced through them and swiftly compared them with the information he had, he looked shocked at Luo Feng, "Impressive, these sector lord corpses are all broken apart and hard to distinguish between each other, the 100 units you've chose, according to their quality, is indeed the best 100."

Even the internal department information couldn't be too specific.

After all without careful individual examination of each body, with only the most basic differentiation, like top level, mid level and low level goods, this was all information done by the internal department to gain some benefits, Luo Feng's choices however had picked all the top level goods, with some at mid level.

When Long Jue emperor passed Luo Feng the metal cards, it was mixed in with all 3 levels.

"Can you not bear to sell me these?" Luo Feng smiled.

"Of course not." Long Jue emperor turned and threw 50 cards to the 2 guides, "You 2, each bring these 50 units over."

"Yes."

The 2 white robed guides bowed respectfully and became beams of light, dispersing and searching in the distance.

"Luo Feng, we just need to wait." He said.

"Hm." Luo Feng frowned, "Long Jue emperor, I want to know...that assassin Kasey, have you found anything on him? Just who it was that wanted to kill me?"

"We've found something, however it's still in the investigation process." Long Jue emperor waved his hand and a ship appeared, the cabin door opened, "Let's go in and talk."

Luo Feng nodded and followed him in.

After a while.

In the distant Taijin universe country's Lan Hai starfield, there was a very normal life planet, Bomo planet, ripples appeared in its space and a black disc shaped ship appeared.

It's mid portion opened and 3 silhouettes flew out.

The leader was a purple armored old man, he gave off terrifying ripples of law energy, he waved his hand and kept the ship, ordering, "We have to catch the target, no mistakes."

"Yes."

The 2 black armored soldiers bowed respectfully.

"Head out!"

The old man ordered, immediately the 2 swiftly flew into Bomo planet.

Bomo planet was a planet with a diameter of 18,219 km, it's oxygen level reached 36% of all its air, the entire planet's temperature fluctuated, even in the same place on the same day, morning could be minus 30 degrees, afternoon could be 50 or 60...however human's adaptive abilities were amazing.

This planet had a population of about 22 billion.

And today, there were 3 warriors, 1 thunder undying and 2 sector lord pinnacles that entered it.

"The virtual universe system has already confirmed the location." The purple armored old man stood on the top floor of a skyscraper, gazing at the city below, ordering coldly, "The target is in this city, find him and bring him here."

"Yes captain."

The 2 sector lords bowed respectfully.

The 2 simultaneously released their world energy and easily engulfed the vast city that was just over a 100 km in area, whatever happened in the city...evil in the darkness, new lives being born in the hospital, couple squabbles, affection, weaker warriors training hard, whatever there was...

Everything was incredibly clear!

"Target locked on!"

"Locked on!"

The 2 sector lords confirmed the target's location simultaneously, within an old skyscraper, there was a green haired man wearing a consciousness transfer helmet, connected to the virtual universe network.

Sou! Sou!

The 2 sector lords immediately became beams of light and flew past tens of km of distance, reaching that little room and easily capturing that green haired man.

"Captain, we've already..."

The sector lord's transmission had just begun when.

Suddenly...

An incredibly terrifying energy exploded from beneath the ground of the city, rumble...the entire city was instantly reduced to dust, following which the energy seemed to instantly engulf the entire planet, whether it was the seas, lands, mountains, they were all split apart, the explosion in the center core of the planet tore apart space itself.

The entire life planet had instantly become a disaster!

In the space above.

Rumble! Rumble Rumble!

3 silhouettes rushed through tens of thousands of km standing above, gazing at Bomo planet, this planet's endless debris and dust floated, the planet had been severely plowed through, its residents were at most only star level 9, they couldn't avoid this at all.

"Captain." The 2 sector lords had blood on their lips, their bodies swiftly recovered as they looked at their captain.

"The target is dead, the lead is gone." The purple armored old man gazed at the planet, "Let's go."

The 2 sector lords looked at the life planet, sighing within.

They sat in the universe ship and left.

Leaving behind the mess of Bomo planet, the 22 billion population, zero survivors.

...

Wu Long starfield.

Within the sector lord bug corpse region, a ship stopped within the space pathway.

"Luo Feng, Luo Feng." Long Jue emperor ran to the resting quarters.

Hua!

The door opened.

"Long Jue emperor?" Luo Feng looked suspiciously at Long Jue emperor.

"We just got the news." His expression was heavy and serious, "Our virtual universe company checked up on Kasey's actions and movement before in the virtual universe network, like his mail, conversations etc, we finally found a very small lead and followed it. We were preparing to go capture an important figure. However during the capture, the planet he was on simply exploded and all 22 billion of its people were killed."

"What?" Luo Feng's expression changed.

22 billion.

"Hm."

Long Jue emperor nodded his head heavily, "Yes according to our interaction with the other races before, such vicious methods should be from the bug clan infiltration organization."

"Bug clan?" Luo Feng expression changed.

"Hm." He nodded, "The bug clan is proficient in invading and controlling the souls of many life forms, hence their infiltration organization is hard to deal with, and the moment there is a problem with any of their pawns, they would immediately cut them off and sacrifice everything, in the meantime exacting their revenge. Causing an entire planet to become a catastrophe, this is a form of revenge. However in spite of that, we still have to check on the leads, even if we fail hundreds to thousands of times, as long as we succeed once, we'll be able to do heavy damage to the organization that has cost them countless resources to build.

Luo Feng took a deep breath, 22 billion people, all the life on a life planet.

All gone like that.

The exchanges between races were indeed brutal.

"You have to be careful, it's obvious you are already on their kill list." Long Jue emperor emphasized.

Chapter 690: Searching for Treasure in Rubbish Mountain

"I understand." Luo Feng nodded his head seriously.

Bug clan?

He didn't expect to acquire the mother nest and after be targeted by the bug clan themselves, of course the 2 had no relation at all.

"No matter who it is or wants me dead, they can keep dreaming. Even if I die, I'll make sure I hit them hard before I do." Luo Feng swiftly pondered on the best ways to deal with the bug clan assassination attempts, his quantum computer calculation speeds allowed him to think of countless possibilities.

For example allowing the mosha clansman to carry the main core and stay in a safe place while the earth body explores...this seemed like the safest way, however he crossed this out immediately. If his earth body were to be killed one time, many would think that he was actually dead...the virtual universe company would know this too.

And if such a thing happened and he created yet another earth body.

Another Luo Feng would appear!

Even an idiot would know...there was something up with Luo Feng! A domain lord could never have an undying body.

Only if I keep the main core with me will I be able to deal with such a situation. However that has its dangers as well." Luo Feng pondered.

After pondering for 3 seconds.

Luo Feng already came up with his answer, it was the best he could think of at the moment.

"Hm, just like that." Luo Feng nodded.

...

After chatting with Long Jue emperor for a while, Long Jue returned to his own room. After all, the 2 white robed guides required about 3 days of time to collect the 100 units of bug corpses, Luo Feng and Long Jue naturally wouldn't be chatting around for all 3 days, they returned to their rooms to rest.

Within the room.

Luo Feng sat in a chair and sent a thread of his consciousness into the virtual universe network.

Yu Xiang Mountain Primal region, Luo Feng's study.

He sat before his desk and looked at the laptop, entering the treasure trove folder and the screen displayed, techniques, weapons, treasures, technological weapons, materials, tools, life forms and other special things, 8 categories, Luo Feng immediately opened the treasures folder.

He quickly found "A world."

World villa, 0.02-0.1 mixed elements.

World house, 0.1-0.3 mixed elements.

World Belt 0.3-3 mixed elements.

World ring, 0.5-10 mixed elements.

...

The different types all had specific details, these were items with worlds within them, the larger their size, the cheaper they were. Just like Luo Feng's 1st examination from the universe mercenary alliance, he entered that world within that villa, the entire world was within that villa.

To compress an entire world, naturally the smaller one had to compress it, the harder it got!

A belt able to hold an entire world within.

If one wanted to put an entire world into a ring, then the materials used...had to far exceed that of the belt.

Hence...

The cost of creating a world wasn't exactly very high, sector lords and above could all do it. The only thing was the size. To create a world ring however, this was the most expensive. Even the cheapest within the virtual universe company's treasure trove was 0.5 mixed elements.

0.5-10 mixed elements, this represented the different space within.

The smallest was a world with an area of 10k km.

The largest was 1 hundred million km.

And the ring he was given in Wu Long starfield was 100k km in area, the price of that ring was about 1 mixed element, to the clients that paid up to 1 million mixed elements, giving a world ring was nothing. As for rubbish mountain...it was too much to handle.

However.

The prices of the world rings was many times more than a space ring. Because the space rings, almost all universe levels had them, even star levels had them.

However!

A sector lord pinnacle warrior would on average have a fortune of about 10 mixed elements, normally they would spend half of it on training, weapons, armor, techniques and part of it on a ship, for them to spend 10% of that on a world ring was impossible, they'd rather use their own internal world, creating a world house within, when they become undying, they can then use more valuable materials and absorb that house into a world ring.

Hence...

Under undying level, very few actually use world rings, unless they had huge backgrounds or wealth.

"Purchase world ring."

"f10 model, 1 hundred million km wide and high." Luo Feng swiftly ordered.

The primal region members had a 30% discount, they only needed to pay 7 mixed elements.

"Your majesty Luo Feng, your location is confirmed to be on Wu Long starfield, we will send it there immediately." A gentle lady's voice resounded.

"No need at the moment, when I request for you to send it, you can do it then." Luo Feng ordered.

"Yes your majesty Luo Feng."

Closing the laptop, he revealed a smile.

With the extra large world ring, when he left the storage area of Wu Long starfield and acquired it, his plan could begin.

"Bug clan?"

"Want to kill me? Hmph...I'd rather hibernate for a million years than follow the steps of those geniuses!" Luo Feng thought, the percentage of geniuses falling was very high, one was because this path to become strong was in itself very dangerous, secondly, geniuses were envied, with other clans trying to kill them, any power within each race would face dangers.

After this incident, Luo Feng was even more cautious.

...

On the 4th day after the 2 white robed guides went to search for bug clan corpses, they finally returned.

The cabin door of the ship opened.

"Lord." The 2 stood in space and bowed respectfully at Long Jue emperor.

"You've brought them?" Long Jue looked at them.

"Yes lord." The 2 instantly retrieved all the corpses they had searched for, the empty space beside suddenly had 2 corpse mountains, both 10km tall.

Luo Feng looked at the 2 mountains floating there, nodding his head. After which he absorbed them into this internal world, as the action of absorbing into his world ring and internal world was exactly the same, triggering world ripples.

Hence back then he had placed the mother nest into his internal world and now the mountains of bug corpses.

"Luo Feng, with the corpses in hand, there's no more problem, these are the 100 units you've chosen." Long Jue smiled at Luo Feng.

"Haha, of course there's no problem." Luo Feng nodded and smiled.

As for the other 100 metal cards, he had already returned them to Long Jue emperor.

"With the corpses in hand, do you want to head to rubbish mountain to search for treasures?" Long Jue looked at Luo Feng, actually, he accompanied Luo Feng only out of habit and courtesy, he wouldn't

offend anyone with any power, these past few days meant little to him. However if Luo Feng decided to go search for treasures...

That would take much longer.

Luo Feng naturally saw through Long Jue's intentions, smiling, "It's rare that I come here, and with the world ring you gave me, I definitely have to go search for treasures at rubbish mountain. However Long Jue emperor, you've already accompanied me enough these past few days. Your 2 guides will suffice for when I go search for treasures."

"Hm, that's good." Long Jue emperor nodded without any hesitation.

"You 2 follow Luo Feng, remember, the moment you discover any one else close by on the map, immediately get away. No one is to get close to you all." Long Jue emperor emphasized.

"Yes Lord." The 2 complied.

"Then I'll be leaving, I wish you the best of luck in getting a heavenly treasure." Long Jue laughed loudly, "The attack from before, luck is just like that, good luck will come after the bad, after being attacked in Wu Long Starfield, this was an incident that hasn't happened in the past hundred million years. It's chances are even much lower than acquiring treasure in rubbish mountain."

Luo Feng said so too, "If even an attack can happen, looks like getting a treasure is possible."

"Haha, then I'll be leaving."

Long Jue emperor nodded, after which he sat in his ship and swiftly became a beam of light amongst the distant space pathways.

The 2 white robed guides stood beside Luo Feng respectfully, one of them said, "Your majesty, there are rubbish mountains all throughout Wu Long starfield, where will you begin your search?"

"Let's go through universe travel and randomly pick a spot." Luo Feng shook his head and smiled, "This place where I just got attacked probably is my bad luck region."

...

Sitting in the ship, Luo Feng then randomly picked a spot, after travelling awhile, they found a couple of rubbish mountains.

Without going there, he wouldn't have known. Luo Feng got a shock as he entered the mountains, it was filled with worthless remains, of course even though they were considered worthless, they were still worth a lot more than the diamonds of earth, these were still remains of the outer region wars.

However even if it filled the entire 100k area world ring, it probably wouldn't even be worth 0.1 mixed elements.

0.1 mixed elements was after all able to buy a normal galaxy.

"Treasure hunt, it all depends on luck."

"Let's go, universe travel."

...

Luo Feng was in a good mood, almost like he wasn't at all affected by the assassination of Yan Zhu emperor before, this was also a display of his mental state training.

...

"To the nearest stop point." Luo Feng ordered.

"Yes your majesty Luo Feng."

The 2 white robed guides complied, the ship immediately returned to the actual universe, the surrounding region was mostly empty, in the distance was endless goods, amongst them there would occasionally be majestic mountains of rubbish, their size towered over the goods.

"Hm?" Luo Feng frowned.

He could feel a faint calling from somewhere, it entered his entire body, every cell within began to boil!

"What's going on?" Luo Feng gazed into the distance.

In that direction, it felt like there was a magnetic field acting on his body.
