

Sweet Love 3331

Chapter 3331: Sudden Changes (72)

He was wearing a belt with his pants. This belt was only an ordinary belt, but the belt buckle was an extraordinary object.

A bad feeling came over Yun Shishi when she saw someone entering with a child in tow!

It was only when she clearly saw the child brought in by the man that she screamed.

“Yi...”

Before she could utter his name, Little Yichen opened his eyes slightly and gave her a look.

Yun Shishi immediately shut her mouth and gripped the metal bars tightly. She was scared witless!

The crewman threw him to the ground and tried to kick him a few times. Seeing no reaction from him, he assumed that this being a child, he could not be a threat, so he went to the other cage and unlocked it.

Now!

Mu Yichen suddenly flipped over and landed steadily on the ground. He casually touched the buckle on his leather belt and pulled it off abruptly. He pressed on the mechanism and a sharp blade immediately shot out from the metal buckle!

He looked around. There were six people here.

A few crew members heard the commotion behind them and immediately turned around. When they saw Mu Yichen standing behind them with a sharp dagger in his hand, they were shocked!

“F*ck, where did this brat get the dagger from!?”

“Take him down!”

The two burly men immediately pounced on him. They thought that the child would be scared out of his wits, but little Yichen unexpectedly charged at them!

The two men immediately took out their machete and slashed at him!

Little Yichen nimbly dodged their attacks and grabbed the man who was charging at the front. He held onto the man’s wrist tightly. The man cried out in pain as his machete fell to the ground with a clang!

“Ahhh!”

Little Yichen sneered and jumped up. His hands were tightly wrapped around his waist, and with his legs overhead, he wrapped them around the man’s neck and twisted them like a pair of scissors and made a dazzling turn!

The man’s neck was locked tightly. Then, he felt a sharp pain. The momentum threw him to the ground!

As his back struck the ground hard, he felt as though his spine was about to break apart!

Little Yichen raised his hand and slit his throat with the sharp dagger. Blood spurted out!

From the moment he attacked to the moment he killed his opponent, it had only taken him less than ten seconds. Fast, accurate, ruthless. Every move made one's scalp tingle!

No one had expected the little imp to be so skilled!

Such a young fellow was actually such a formidable and ruthless character!

"Get him!"

One of the men ordered as he fumbled for his gun.

Another one of them picked up the machete from the ground and charged towards him!

"Be careful!"

Yun Shishi almost fainted in fright when she saw the man coming at the boy with the machete!

Little Yichen curled his lips, but he did not turn around. Based on the judgment of the footsteps behind him, he waited before he spun around and executed a beautiful and neat roundhouse kick, accurately hitting that person's face. The latter fell to the ground with a thud, with a broken nose!

The man fell to the ground, covered his nose, and howled in pain. Little Yichen reached out, grabbed him by the collar, and punched him hard in the throat. A strange sound came from the man's throat as his eyes widened. Then, his face turned stiff and lifeless!

As the boy looked up, he heard the sound of a pistol being loaded. Out of the corner of his eye he saw a cold light flash onto his face.

Moonlight streamed in through the skylight. The rest of the crew members held their guns tightly and aimed them at him. They shouted in broken Mandarin, "Don't move!"

Chapter 3332: Sudden Changes (73)

Moonlight streamed in through the skylight. The rest of the crew members held their guns tightly and aimed at him. They shouted in broken Mandarin, "Don't move!"

A gun?

His lips stiffened as he slowly stood up and raised his hands above his head with a cold expression.

"Put the dagger down!" That person shouted at the top of his voice again!

It was as if the person standing before him was not an eight-year-old child, but a demon!

Mu Yichen tilted his head, the corner of his lips curling into a sinister smile as if he was puzzled!

The man gestured with his hands and feet again. "Put the dagger down!"

Little Yichen let out an "oh" and pretended to put down the dagger he was holding. Seeing this, the men relaxed a little, but at this slight relaxation, Little Yichen immediately narrowed his eyes. The dagger in

his hand suddenly flew out and drew a dazzling arc in the air. With a swish, it ruthlessly pierced the neck of one of the men!

Blood rained onto the ground. The man, who was getting ready to fire a shot, now fell limply onto the ground!

The remaining two men were completely alarmed and scared out of their wits. In their panic, they fired blindly, but the bullets missed their target. Little Yichen stretched out his leg and lifted the corpse on the ground with the tip of his toes. He pulled it up in front of him and hooked the machete that had fallen not far away with his right leg. He caught it firmly with his hand and threw it backwards!

Compared to the two drunkards, Little Yichen had undergone strict training after all. In addition, he was calm and collected when faced with such a situation. Even when faced with a large number of people, he did not panic at all. The machete accurately plunged into the chest of one of the men!

The remaining man raised his gun with trembling hands, only to realize that in the midst of his panic, all six bullets had been fired. Just as he made a move to change the magazine, Little Yichen was already flying towards him. His movements were quick as he loaded the new magazine and fired a shot, however Mu Yichen suddenly grabbed his wrist and changed the direction in which the gun was aimed.

Bang! Bang! Bang! Three bullets hit the other man!

Mu Yichen nimbly raised his leg again and delivered a vicious kick to the man's crotch.

The man let out a howl and clamped his legs together tightly. Little Yichen leaped up, grabbed his hair, and dragged him towards the cage!

Clang!

The man was instantly dizzy from the huge impact!

"Spare me... Spare me..."

Mu Yichen did not have the patience to listen to his nonsense. He grabbed the man's chin with one hand and his neck with the other. With a vicious twist, the joints in his throat snapped. The man let out a "ooooh" sound as his head fell weakly to the ground.

The scene was a mess now. The smell of gunpowder filled the cellar.

Mu Yichen slowly stood up and surveyed the lifeless bodies on the ground. He examined them carefully until he was certain that they were dead. Finally, he heaved a sigh of relief and calmed himself down before walking to Yun Shishi.

Yun Shishi was shocked speechless.

Little Yichen immediately comforted her. "Mommy, don't be afraid. You're fine now!"

He looked down, his eyes fell on the lock that secured the cage, studying it.

Yun Shishi still felt a lingering fear. She could not help but tremble in fear at the thought of the six people taking on the lone boy earlier.

Mu Yichen locked the cellar door from the inside to ensure that no one would barge in. Only then did he focus on examining the lock.

“Yichen... how... how did you get here?”

She was still in a daze.

Chapter 3333: Sudden Changes (74)

“Why... why are you here?”

Yun Shishi was still in shock.

Little Yichen playfully stuck out his tongue and said, “Of course, I’m here to rescue Mommy! Mommy, don’t be afraid; I’ll get you out of here right away.”

“Little Yichen...”

She looked at him as emotions welled up within her.

What she had just witnessed scared the living daylights out of her. Even though she had realized Mu Yichen’s formidable skills, guns and spears were blind. If he suffered even the slightest injury, she would have fallen apart!

The cage was secured by a lock. After studying it for a long time, Mu Yichen decided to try and pry it open.

Even though the lock could be released with a gun, any carelessness, would result in Mommy being hurt.

After pondering for a long time, he suddenly removed his watch and broke it apart, removing the hand on the watch face. He bent the thin, needle-like object with his fingers, inserted it into the lock, and turned it.

This was different from the locks he had picked during his training with the troops. It was still a little difficult to pry open this lock!

After all, the locks of different eras were different. With the new generation locks, some of the techniques used to pick locks in the past were no longer applicable to the current technology!

After studying it at length, the boy lowered his head and pressed his ear against the lock to listen carefully to the movement of the mechanical structure inside.

Generally speaking, the internal structure of a lock is highly complex. The better the lock, the more detailed the internal structure.

The keyhole component, the lock cylinder, the unlocking mechanism, the groove, the push plate, the levers... There are dozens of components. If one is not very familiar with locks, one will not be able to decipher it.

However, no matter what kind of lock, there is always a way to pry it open.

Because there is no technology in this world that could create a perfect lock.

The most perfect lock-picking tool has to be the boomerang needle. However, he did not carry such a thing with him. The watch's pointer was limited in length and rigidity. Therefore, he had to be careful and listen to the movements inside with bated breath, relying on the sound to make a judgment.

Yun Shishi kept quiet and looked at him nervously.

Mu Yichen suddenly stood up and ran his hand through his hair in frustration.

"Is it impossible to release it?"

Mu Yichen shook his head. Afraid that she would be nervous and worried, he quickly consoled her, "I just don't have a suitable tool. I'm still missing something."

"What are you missing?"

Mu Yichen turned around and took a look at the few corpses lying in puddles of blood. With the thought of giving it a try, he searched their bodies one by one, but other than pistols and magazines, there seemed to be nothing else that was particularly useful.

Until he felt a box of gum on the last person.

He opened it and sniffed it to make sure that there it was nothing out of the ordinary. He tossed one into his mouth and chewed till it was like a ball of mush. Then he returned to the cage, spat out the gum, and slowly stuffed it into the lock.

Yun Shishi watched dumbfounded. She did not know what kind of technique he was using, but she did not dare to make a sound for fear of disturbing his train of thought.

It was Mu Yichen's sudden idea to use the chewing gum to unlock the door.

When he found the box of gum, he immediately recalled that it was possible to use chewing gum to pry open locks.

Having studied the structure of the lock carefully, he knew that this was a simple lock, so he could try using gum!

However, he did not have much confidence. He had only seen others attempt such a lock-picking method, but he had never done it himself!

Nevertheless, he had to try.

Chapter 3334: Sudden Changes (75)

After Mu Yichen stuffed the chewing gum into the lock, he manipulated it with his fingers until it was firmly embedded. Then, he straightened the watch hand and inserted it into the lock and kept turning it. In less than three seconds, there was a click and the lock popped open.

Yun Shishi was dumbstruck as she watched him!

Mu Yichen unlocked the cage door and opened it, only to realize that Yun Shishi's hands were cuffed. The boy was definitely skilled with handcuffs, so it did not take much effort for him to unlock it.

However, the moment the lock was released, a beeping sound was heard coming from Yun Shishi.

Beep—

Beep—

It sounded like an electronic device.

It seemed that it rang at the same time that the handcuffs were released!

It was as though a device had been activated upon the cuffs being unlocked!

But this was only Mu Yichen's guess!

He found this very odd.

This sound wasn't unfamiliar to him. When he was undergoing combat training with the troops, he had witnessed bomb disposal events.

This was the sound of a time bomb!

Crap, could it be...!?

As Yun Shishi started to get onto her feet, Mu Yichen suddenly pressed her back to her original position and said in a quiet voice, "Mommy, don't move."

"What's the matter?" She could not help feeling nervous as well, and her breathing quickened at the sight of his wary face.

Mu Yichen immediately smiled and reassured her, "Mommy, don't be nervous. From now on, let me take over, okay?"

"Okay..."

Mu Yichen held his breath as he listened attentively. Following the source of the sound, he abruptly lifted Yun Shishi's corset and unbuckled it. A time bomb had been strapped around her waist.

Yun Shishi did not know of its existence because this time bomb was installed while she was unconscious!

"Combination device!?" Mu Yichen looked at the timer attached to the handcuffs. When the handcuffs were released, the bomb had been automatically activated and started the countdown.

It was an extremely complicated combination device.

The countdown continued. On the small rectangular screen, the numbers kept jumping. The countdown of 300 seconds meant only five minutes!

Of course, Yun Shishi did not know what a combination device was, but when she saw the rows of explosives on her waist, she immediately realized what this thing could be. Her face turned pale!

“A bomb!?”

“Uh huh!”

Yun Shishi was immediately scared witless!

She had seen time bombs in movies a few times. Even though there were some variations in the design, the difference is that the ones in movies were fake. In real life, once a bomb exploded, it would kill everyone in its vicinity!

If an ordinary person saw this thing, it would be like seeing the Grim Reaper itself. They would undoubtedly be scared out of their wits!

She immediately pushed Mu Yichen away and said, “Hurry up and leave; don’t bother about me!”

Mu Yichen staggered backward from the push. He immediately got up and pounced on her, hugging her tightly. “Mommy, I’m not leaving! Don’t chase me away!”

“Once the bomb explodes, you’ll die!”

“Mommy, listen...” Mu Yichen took in a breath of cold air and said, “I’ve learned some bomb disposal techniques and have some knowledge.”

Although this was how he reassured Yun Shishi, the reality was that there were no so-called bomb disposal experts among the troops. Most of the time, they would use robots to dispose of bombs.

After all, human lives were more important than robots.. Hence they made use of robots whenever possible.

Chapter 3335: Sudden Changes (76)

After all, human lives were more important than robots. Hence they made use of robots whenever possible.

The loss of a robot was a small matter, but if a person died, it would be impossible to account for it.

The structure of a bombs is indeed simple, but sometimes, the simpler something is, the harder it is to resolve!

This sort of thing can be lethal hence it was all the more important that it didn’t fall into the wrong hands.

Mu Yichen said in a quiet voice, “Mommy, this is a time bomb. In other words, the device is designed so that it can explode.”

Some bombs are made to explode on demand. When the fuse is removed, it would immediately explode.

The design of a time bomb, on the other hand, is such that it prevent detonation!

This meant that there was a chance of survival. Even if it was extremely slim, there was still a chance!

Only four minutes remained.

Mu Yichen swallowed hard and carefully removed the shell of the time bomb. He was considerably quick in dismantling it, but even then it took him a good 20 seconds. After he did so, the inner wiring of the bomb was exposed.

There are various types of time bombs.

According to his understanding, there were detonators, electric detonators and black gunpowder.

Typically, a detonator bomb can be defused directly. Without a detonator, the bomb will be useless. It will not explode no matter what.

Black gunpowder is child's play.

Other than that, TNT is for military use and is more common. A guy like Dietris would never be able to get something like that.

If it's nitroglycerin, then it will be extremely volatile and explosive. The slightest vibration could cause it to explode. In other words, even a simple action like standing up will trigger an explosion.

The other explosives like HMX, RDX, PENT, and C-4 are all extremely high-end bombs. They are rarely seen on the market. Even many terrorists organizations do not have the means to obtain them. Generally, they are used in extreme situations, and their structures are extremely complicated. If one were to encounter these, it would be very difficult to dispose of them.

However, after analyzing it, Mu Yichen came to the conclusion that this was an electric detonation device. Generally, such bombs needed a line. Of course, it was definitely not like those commonly seen on television, where the person had to choose between a red line and a blue line. Instead, he needed to cut the explosive device off from the live battery and electrical circuit. Most of the current was direct current. This way, once the power source was destroyed, the bomb would lose its effect.

Without electricity, there wouldn't be an explosion.

However, even though it sounded simple, the circuitry of such a device was complicated. It was very difficult to differentiate and identify the mass of wires in the device.

Mu Yichen counted and found that there were about ten lines. These lines were dense and orderly, but they were of the same color.

If the wrong wire was cut, it would blow up. Even if he were to cut the right lines, there was a certain chance of triggering the capacitor reverse detonation. It was impossible to guard against this.

The situation became a little tricky.

As Mu Yichen fiddled with the wires, cold sweat trickled down his forehead and cheeks.

Looking at his nervous expression, Yun Shishi realized that this bomb was very tricky. If he made an error, she would die.

The tip of her nose felt a little sore as she looked at Mu Yichen. Feeling sorry for him, she said, "Little Yichen, don't bother about me, okay? I don't know when this bomb will explode. It's not a toy! Do you know how dangerous it is?"

Chapter 3336: Sudden Changes (77)

Mu Yichen calmly curled his lips and lowered his head to look at the circuit. "There's still three minutes before the explosion. Even if I can't save you, I have three minutes to spend with you."

He suddenly raised his head. His eyes were red, but he said with determination, "Mommy, I promised Daddy to bring you home unharmed. I can't go back on my word."

He could not go back on his word!

Daddy was waiting for them to come home!

He must not leave Mommy behind!

Yun Shishi suddenly choked up. "But... don't force things, okay? If there's really no hope, you have to run. There's no need to stay and lose your life..."

Little Yichen suddenly smiled. He looked up at her and gently asked, "Mommy must be worried that you're burdening me, right?"

Her lips trembled.

"Sometimes, I have to say that Mommy is really weak like a tree branch that breaks when the wind blows! For example, in this instance, Mommy, you're really so foolish. Do you really believe everyone's words so easily? No matter how close someone is to you, they will one day betray you! But Mommy seems so naive, trusting people so readily!"

Little Yichen paused for a moment before he changed the topic. "That's why the heavens must have sent Daddy to you and given you two powerful 'guardians' like Youyou and I. I think that protecting Mommy is our life mission! No matter what, everything else is secondary, we'll always look after Mommy!"

Yun Shishi was stunned and touched beyond words.

Little Yichen smiled with tears in his eyes. "Mommy is very kind. Even though there are some people in this world who don't like this kind of kindness because they are born selfish, this kind of selfishness is inherently bad. However, selfishness is not wrong because there is only one life. Everyone wants to live well and protect themselves. However, kindness is not wrong."

Yun Shishi bit her lips hard, as Little Yichen continued, "Mommy, do you know? Before I met you, I felt that the world was cold. When I was at the Mu family, every step I took was frightening. Everyone was

secretly scheming for their own benefit! But after I met you, my life has been filled with sunshine. Because mommy is really very gentle! It makes me feel warm!”

With that, he took a deep breath and wiped away his tears. “So, I can’t lose you! This is my bottom line!” As he spoke, he lowered his head and carefully analyzed the wiring.

Yun Shishi’s lips curved upwards into a smile as she planted a kiss on his forehead. She calmed down as fear left her.

The wiring was extremely complicated. It was not that the lines were complicated, but Little Yichen had to spend a lot of effort to mark more than ten different lines.

After marking the lines, he had to check the direction of the lines and study the function of each line.

Before he knew it, three minutes had passed and Little Yichen had eliminated five wires, three of which were lead wires and two were time wires.

If these two time wires were cut, the countdown would stop. At first glance, it would seem as if the danger had been eliminated.. However, in reality, while the countdown would stop, detonation and explosion would take place after 5 seconds.

Chapter 3337: Sudden Changes (78)

In reality, while the countdown would stop, detonation and explosion would take place after 5 seconds.

It was easy to confuse such a route with a power line, but Mu Yichen had a certain amount of experience. The more important the route, the shorter the design, and the longer the wire, the more dangerous it was.

120...

119...

118...

The countdown continued.

Mu Yichen’s face was already covered in cold sweat. His eyes were blurry from the sweat, and Yun Shishi immediately wiped it away for him with heartache.

The more he analyzed the circuit, the more he seethed with hatred for that cunning fellow, Dieteris!

What the hell!

How did they design such a complicated circuit?!

Mu Yichen ignored the fact that he was dripping with perspiration as he tried his best to maintain his calm. He continued to line up and categorize all the routes before the alarm sounded. There were only twenty seconds left!

He sucked in a breath of cold air sharply and casually pulled the dagger from his belt. He flicked it open and lined up two of the wires. The blade pressed against the two wires. A cold light reflected in his face, blinding him for a moment.

A lump formed in his throat, he couldn't stop his hands from trembling.

"Mommy..."

Mu Yichen suddenly raised his head and held her hands tightly. He planted a heavy kiss on the back of her hand, revealing a bright smile.

"No matter what, we'll be together forever! I won't leave you!"

Yun Shishi was so choked up that she could not speak. She could only nod her head haphazardly as tears streamed down her face.

Even though she believed in her son's abilities, fate was more important than anything else. Other than feeling uneasy, she felt a sharp pain in her heart!

How could this little fellow bear so much on his tiny shoulders?

Yun Shishi hugged him and enunciated every word clearly, "I believe you. Yichen, don't worry. Just do as you wish!"

"Uh huh."

He squeezed the two wires. Only one of them was an electrical wire. The other, he wasn't sure if it was a detonator wire or something else.

However, he could no longer find any other detonator wires.

These two lines were the only life-saving lines he could identify!

However, he did not dare to cut off the power lines that had already been determined. If he did, and this device was detonated in reverse with a capacitor, then cutting off the line would also cause the bomb to explode.

In that case, he could only place his hopes on another line. Although he was not fully confident, it was worth the risk.

Mu Yichen gritted his teeth tightly as he pinched one of the lines. He closed his eyes and inhaled deeply. In the last few seconds, he abruptly cut off the line!

Beep—

The timer of the time bomb made an extended sound. It was so sharp that it was ear-piercing. The number stopped at "003" seconds and did not move anymore!

Mu Yichen widened his eyes in shock. Only when the countdown stopped did he realize that he had really cut the fuse!

However, he did not relax immediately. Just in case, he cut off the power line and the timer went out immediately!

Yun Shishi was so nervous that she held her breath. Even when she saw the timer go off, sweat continued to roll down her face!

Mu Yichen finally fell heavily to the ground. The series of tense moments earlier, especially the critical moment, had exhausted all his mental strength. Now that he had relaxed, he felt weak and completely exhausted!

A sense of fatigue came over him as though he just came out of a battle, his mind was a blank!

Chapter 3338: Sudden Changes (79)

A sense of fatigue came over him as though he just came out of a battle. His mind was blank!

Seeing him like this, Yun Shishi roughly understood the situation. She knew that she was out of danger, but she did not dare to move, fearful that any carelessness would trigger another dangerous situation.

Mu Yichen slowly sat up. Wiping away the cold sweat from his forehead, he smiled nervously.

He suddenly pounced on her and snuggled into her embrace, hugging her so tightly as if she was a precious treasure that he had lost but found again!

Yun Shishi hugged him tightly as well. She had tried to hold back her tears during the nervous process earlier, but now, she felt like bawling!

“Yichen, thank you!”

He did not give up at the most crucial moment.

Mu Yichen was laughing and crying at the same time. Even though he was very brave, he was still badly frightened by the ordeal!

His hands had been trembling because he was fully prepared to detonate the bomb!

He never thought that he was favored by the heavens this way. This was his fortune!

Mu Yichen did not have too much time to spend with her. He immediately removed the bomb from her waist and threw it out through the skylight.

She stood up in confusion. “Where are we going now?”

Mu Yichen said, “Mommy, from now on, just follow me and do whatever I tell you to do!”

“Uh huh... but...” she asked hesitantly, “this is a cruise ship; it’s no different from a prison at sea. How are you going to take me away from here?”

Mu Yichen grinned and replied, “That is why I’m heading to the cockpit right away.” After a pause, he asked again, “Mommy, are you scared?”

“I’m not afraid! With you around, I’m not afraid of anything.” She shook her head firmly.

The boy smiled and said, “That’s good then. Follow me.”

Yun Shishi immediately hitched up her dress and followed after him, but just as she stepped out of the cage, she tripped. She looked back and saw that the long dress was caught by metal wires.

How bothersome.

Yun Shishi gritted her teeth. She could no longer care about her image. She tore off a large portion of her dress, revealing her pair of long, bare legs.

Mu Yichen held her hand and opened the door, but he was in no hurry to leave. He knelt on the deck and placed his ear next to the ground, using the method of sound conduction to determine if there were people nearby.

After passing through the deck, he made a preliminary judgment of the deployment of people nearby and immediately led Yun Shishi to the right.

On the way to the cellar, he had already formed a map of the terrain in his mind, so he roughly knew the direction to the cockpit.

Cruise ships are all built rather similarly. The cockpit is generally situated on the second or third floor while they were now in the basement of the ship.

Mu Yichen first settled Yun Shishi in a corner while he went to figure out the route. On their way out of the cellar, he had taken some guns and ammunition from the dead crew members and affixed silencers on the guns.

He loaded a pistol and walked down the corridor with his back to the corridor entrance. Then he heard someone coming down the stairs.

From the sound of the footsteps, one could roughly tell that there were two people.

He held his breath and suddenly thought of something. He immediately put the gun back into the holster around his waist.

When the footsteps approached, he suddenly dodged. His movements were agile and fast, like a ghost.

The two crew members were shocked by the sudden appearance of this phantom figure. They frantically tried to draw their guns, but Mu Yichen was even faster. He scaled the wall in a flash and with a jump, landed on the man's shoulder. With his hands, he grabbed the man's chin and neck, forcefully twisting in opposite directions, severing his cervical joints!

Chapter 3339: Sudden Changes (80)

The other man had just drawn his gun, but before he could load it, Mu Yichen grabbed his wrist and ruthlessly snapped his elbow joint with his other hand. In a flash, his arm was bent at a strange angle!

"Ahh!" He started to howl in pain, but Mu Yichen grabbed his chin, and with a twisting motion, dislocated his jaw.

The man looked at him in horror, as though the boy was a terrifying monster!

Mu Yichen did not give him any chance to struggle. He gripped his throat tightly and crushed it.

The boy then dragged the two bodies aside and hid them in a corner. After cleaning up the scene, he returned to Yun Shishi's side.

"Mommy, let's go!"

The reason why he had no intention of using a gun was because it would get bloody and that would scare his mommy. That was secondary. The main reason was that if things got bloody, it would attract too much attention and they would be easily discovered.

Compared to the tall and strong crew members, he was too skinny and small. However, this was both a disadvantage and an advantage.

He knew though, that he would not be able to come up against a large number of people at any one time no matter how strong he was physically.

However, with his small stature, he was as agile as a wolf.

He made his way around stealthily. En route, after dealing with a few crew members, he led Yun Shishi towards the cockpit.

In the cockpit, the deputy was sitting in a chair. At this point, a dexterous figure flashed past, opened the cockpit door, and silently crept up behind him.

Before the captain could react and identify the figure, he was punched in the head and knocked out of his senses.

Mu Yichen picked up his tottering body and spun the dagger in his hand nimbly. The poor man felt a chill in his throat as hot blood rained on the passenger seat. A metallic smell assaulted his nostrils.

The little fellow left the captain hanging to his life by a thread, and in the same manner entered the engine room. By the time the boy returned to the cockpit, there was a crooked corpse left behind in the engine room.

The captain was scared out of his wits. He huddled in a corner, shivering.

Mu Yichen took out his gun and jabbed it against the man's temple. He coldly asked in broken English, "You want to live?"

"Please! Don't kill me!" the captain begged humbly.

The boy tightened his grip on the gun. "I won't kill you if you behave yourself and do as I say."

"Sure! Sure! I promise to be obedient!"

Mu Yichen drew out a pair of handcuffs and cuffed the man by his left hand to a fixed point. Then he ordered the man, "Disarm the alarm!"

Most cruise ships are armed with radar alarms. Once other ships or units got close, the alarm would be activated.

The reason he spared the captain's life was because he didn't like killing people. The captain seemed weak and didn't seem to pose any threat.

The most important thing was that he did not know how to navigate a cruise ship. If the cruise ship lost its helmsman or ran out of control, the consequences would be dire.

Hence for safety, he kept the captain alive.

The captain nodded in a daze. When he showed hesitation, Mu Yichen's plunged the dagger into his thigh!

"Argggggh!" The captain gritted his teeth in pain. Mu Yichen suddenly grabbed his collar and warned him with a sneer, "Do as I say!"

"Yes, Yes!" The captain was in so much pain that he couldn't even breathe properly. He immediately pulled down a lever. With a ding, the screen displayed the message "THE ALL-CLEAR".

The alarm had been disarmed.

"Continue on the course!"

Chapter 3340: Sudden Changes (81)

"Continue on the course!"

"Yes! Roger..."

Mu Yichen then led Yun Shishi into the cockpit, locked the door, and said to her, "Mommy, this is the safest place for now."

Yun Shishi nodded blankly. The corpse in the cockpit had already been cleaned up by Mu Yichen. She suddenly felt uneasy when she saw the little guy disheveled and stained with blood.

She did not want to see Mu Yichen kill anyone, but right now, she knew very well that if Mu Yichen did not get rid of all these people, then they would be the ones getting killed!

The world has always operated on the basis of the survival of the fittest!

Mu Yichen was unaware of the nonsense that was going through her mind. He removed the necklace he wore around his neck, opened it gently, and pressed a hidden button. The location information was immediately sent to Mu Yazhe's terminal!

...

At the windy harbor.

Gong Jie's armed ship was ready.

Two hours ago, he had rushed over at top speed. He had happened to be in that region of the sea, so he managed to arrive in time.

Besides the armed ships, he had also brought a dozen armed helicopters and two nuclear-armed submarines.

Naturally, three billion US dollars was also on stand-by.

However, although Gong Jie had prepared the three billion US dollars, it was not to say that Dietris was guaranteed the fortune to be able to lay his hands on it.

Mu Yazhe's handheld terminal vibrated. He opened the interface and saw that Mu Yichen had sent him a location signal. Excited, he looked up at Gong Jie and said, "We can set off now!"

Gong Jie had been waiting for some time now. When he heard this, the good looking man looked slightly surprised and asked, "You've received the signal?"

"Uh huh!"

Before the two little lads set off for this mission, they each wore a necklace. The necklaces were signal receivers that could send out GPS information.

It was also at this moment that Mu Yichen realized, Youyou had invented such terrifying technology.

The dagger disguised as a belt, the signal transmitter hidden in the necklace, and the intelligent nano chip implanted under the skin...

Youyou had actually used some of the concepts he had only seen in science fiction magazines, to produce these items in real life!

"Let's go." Mu Yazhe sent the location to the freighter's positioning system and sped towards the destination.

Compared to the Dietris' cruise ship, Gong Jie's armed ship could be said to be an extremely abnormal existence. Not only did it travel at an exceptionally high speed, it was fully armed.

When Mu Yazhe first boarded the ship, he was shocked.

The so-called "steamship" was only a term used by Gong Jie.

This man had always liked to describe nature-defying inventions in understated terms.

In fact, this so-called steamship, was a second-generation aircraft carrier developed using technology behind the Soviet aircraft carriers.

An aircraft carrier!

Mu Yazhe was beyond surprise.

Even though today's military was highly developed, not every country had a huge aircraft carrier.

Even for a superpower like Nation M, there were only ten active Nimitz-class nuclear-powered aircraft carriers, two other super nuclear-powered aircraft carriers, and twelve aircraft carriers cruising the sea. In today's world, it was fully deserving of being a super sea overlord.

Many countries did not have aircraft carriers in military service and only dreamed of developing their own!

Having an aircraft carrier meant that the military armed forces were powerful!

However, such an aircraft carrier, that was on par with super nuclear power, was but like a toy ship to Gong Jie.
