Technician's Manual - Chapter 25

Chapter 25 - Within 7 steps, the gun is accurate and fast

"You come?"

Sonia was a little puzzled, she looked suspiciously at Ya Xiu's eyes.

In the growth career of the magician, the exploration of the virtual world is undoubtedly an important part of them, and it can even be said to be the most important part.

The vast majority of adventures, breakthroughs, and promotions in this world take place in the virtual realm. Many magicians do not hesitate to spend their lives exploring the virtual realm.

Compared with the virtual world, reality is just a stage for the magicians to pretend in their free time.

Although the virtual realm is so important, so far, there is no one that can be followed to explore the virtual realm.

Perhaps, but Sonia's current status is still out of reach.

When Sonia was in class in the afternoon, she also specifically asked Professor Trozan if she had any warm tips about the virtual world. However, Trozan also spread her hands to indicate that she did not.

"The reason why magicians have equal status is precisely because we are all the same ignorant in the virtual world."

Sonia knew that Professor Trozan valued herself, and she also saw that Professor Trozan was a typical swordsman, and she was disdainful of lying and fooling weak people like her.

Even the Three Wing Sanctuary Magician did not have an effective strategy, so Sonia did not have any expectations for the viewers.

“There is danger in the Void Realm,” Sonia reminded: “Once I die here, it will take three days to recuperate when I go back.”

The magician will die in the virtual realm.

The most common method of death is naturally to drown.

When a magician wants to explore the deep sea, or stay still in the sea, he may be submerged by the sea of knowledge.

That’s why Sonia was so surprised at the boats—which meant they were free from the risk of drowning.

The magician will cause great trauma to the soul after the death of the virtual realm. The stronger the strength, the heavier the trauma, the longer the recovery.

Adorable new magicians like Sonia only need to recuperate for three days, while the official silver magician needs to recuperate for at least 15 days. The golden magician needs to recuperate by months. It is said that the recuperation time of the sanctuary and legendary magician even takes In years.

The inability to explore the virtual world means that their growth rate is reduced by 90%. Therefore, there are many different views on the exploration of the virtual world: some people are conservative and grow as smoothly as possible; while some people like to take risks. , I won the club young model by betting, and I became the club young model after losing the bet.

The former Sonia tended to take risks because she had nothing, but now she tends to be cautious- after discovering her talent for swordsmanship, Professor Trozan commented on her that ‘20 years of gold is not a problem, 40 years is hopeful for the sanctuary’.

In the Starry Nation, the two-winged golden magus is not too big or too small. It shouldn't be a problem to be a little noble, it can be said that Sonia's life goal has been achieved.

If you can be promoted to Three Wing Sanctuary, you can even start a family, and you will be famous for a while.

Therefore, Sonia's petty citizen mentality is very normal. She is not unaware that she has a better future, but the embarrassing reality forces her to just want to hold on to what she has.

The world is beautiful, it is worth fighting for, she can only agree with the second half.

But no matter how conservative, Sonia must also explore the virtual world, there is no option to 'stay in place'. Countless school teachers, and even Professor Trozan also specially reminded her: don't stay in the same place.

So far no one knows what will happen to staying in the same place for a long time, but those who stopped after entering the virtual realm soon stopped their heartbeat in reality, and even the healer could not be saved, because their souls were basically Not in the body.

Therefore, there is a saying: If you are still in the virtual realm, your body will think that you are dead and die on the spot.

"I heard that it is safest to walk in the direction of the shallowest white mist when entering the virtual realm for the first time," Sonia said.

This is not a strategy, at most it is a small reminder summed up by the senior technicians of Jianhua University, and the success rate is less than 60%, and the other 40% of the respondents are in danger.

But in this completely unknown ocean, the 60% chance is already worth a bet.

"No, we are going over there."

Ya Xiu pointed to the place where the white mist was the thickest. Sonia wanted to say something, but the boat sailed by automatically, and she suddenly diverted her attention: “Can you control this ship? You brought this ship?”

“Yes.”

“Then you tricked me into jumping into the sea just now!?”

Seeing Sonia clenching the wooden sword tightly again, Ya Xiu quickly explained: “I just found out that I can control this ship. I was sincere when I let you jump into the sea!”

“Do you really want to make a fool of me?”

“I really want to see you get wet... Hey, calm down, we have entered an unknown area, and we may be in danger at any time!”

White mist rushed towards her face, unknown that it might appear at any time, and Sonia could only sit down angrily.

But as she passed through the layers of white mist, Sonia felt something flowing into her body, her consciousness became clearer, her skin glowed with silver, and a lot of knowledge about swordsmanship suddenly appeared in her mind.

This is the reason why the magician must explore the virtual realm—as long as he moves in the virtual realm, the magician can automatically obtain the knowledge of the virtual realm and condense his knowledge into silver mana!

When a large amount of silver magic power is deposited and condensed, it can form a symbol of the strength of the Void Wingman: Silver Wing!

Sonia suddenly understood why the magicians like to be immersed in the virtual world. UU reading [www.uukanshu.com](http://www.uukanshu.com)

This feeling of acquiring knowledge every second and becoming stronger every moment is as comfortable as stretching out for the first time in the morning.

While Sonia was enjoying the thrill of knowledge, Asia Xiu kept staring at the map in the light screen like a scumbag in class.

In the center of the map is a small boat with eight grids around it. At this time, the boat is entering the top left grid.

That's right, this is the "Void Exploration" mode provided by the game. When Ash moves the boat in the game, the boat in the Void will also move along with it.

In addition to moving, Ya Xiu can also query the information of these eight grids:

"Waste of effort", "Death to oneself", "Waste of effort", "Waste of effort", "Waste of effort", "Worth a trip", "A little trouble", "Better not to go."

Among the eight prompts, "in vain" obviously means that there is nothing in the grid, "seeking a dead end" is dangerous, "better don't go", Ash can't guess it, and "it's worth going" is obviously given by the game. hint.

Soon, after passing through the layers of white fog, an island surrounded by dense fog appeared in front of the two of them.

Seeing this scene, Sonia suddenly remembered that the place where the viewer had previously tried her dreams with her was the same as the virtual world?

No wonder the viewer is so confident that he can use the virtual realm for trials, and it is natural to explore the virtual realm!

The boat stopped slowly, and the moment the two set foot on the island, the thick fog suddenly dispersed, and a hunter wearing a wide-brimmed hat and holding a long gun appeared in front of them.

“Out of seven steps, fast.”

The hunter raised the gun and aimed at the two: “Within seven steps, the gun is accurate and fast!”
