Technician's Manual - Chapter 27

Chapter 27 - Technician's Manual

Ya Xiu almost forgot that the game "Magician's Manual" can still be recharged.

He thought that the supply of source crystals obtained by the daily sign-in was the only source of his card draw, but he did not expect that there is a currency recognized by the game in this world.

Regardless of whether the value is high or low, this discovery shocked Yaxiu's blood, and once again had the motivation to struggle—like a boss saying to you, 'I will choose you for the next promotion', even if you know that the hope is slim, but at least There is still hope.

But he didn't dare to recharge the medal like this, because he could see that this medal was the extraordinary foundation of this world and the source of power that the magicians were desperate for-Shu Ling!

"Do you want this Shu Ling?" he asked.

"Do you want it?" Out of Asia Xiu's expectation, Sonia didn't have any interest in this magic spirit: "Then you take it."

Now, Ya Xiu became curious: "This is Shu Ling, don't you want it?"

"This is neither a swordsmanship spirit nor a general-purpose warcraft spirit. It's useless for me to come, and it's a waste of my money."

"What does this have to do with money?" Ah Xiu asked ignorantly.

Sonia feels that the viewers are taunting her in secret, after all, the viewers can control the boat to sail in the virtual world, how could they not understand the common sense of the magician?

Or is it that the viewer is a rich person who doesn't have to worry about feeding Shu Ling at all? In novels, there are often such funny sections of "rich aristocrats do not understand common sense". Didn't I expect that I would encounter this endangered species in reality?

Under Sonia's explanation, Ya Xiu discovered that the magical ecology of this world was far more complicated than he had imagined.

First of all, Shu Ling is to be fed, and it must be fed with currency in circulation!

Silver coins and gold coins are the main food of Shu Ling. One-wing Shu Ling must feed silver coins, and two-wing Shu Ling must feed gold coins. Shu Ling that cannot be fed will dissipate on its own. It is really possible for some poor magicians. Hardly starve to death his own Shu Ling!

In addition to currency, Shu Ling can also be fed through other materials, but the materials that each Shu Ling needs to feed are different, and it is extremely cumbersome to find, while silver coins and gold coins are the common rations of all Shu Ling. I don't know how to feed my own Shu Ling, anyway, I use money to plug Shu Ling's mouth and it's over.

In addition to this, the existence of magic light will consume the magician's spirit. A magician with a lot of magic spirits, just like a man with a lot of girlfriends, not only can't eat his wallet, but also his body.

Therefore, low-level magicians, especially those with the fine traditions of the proletariat, do not have as many magical spirits as possible for them. They must be selective in choosing the magical spirits that suit them. 'Small but fine' is the majority. The development strategy of junior technicians.

Secondly, there are restrictions on the use of Shu Ling.

According to restrictions on use, Shuling is divided into various factions, such as the swordsmanship faction that requires the use of swords, the bluffing faction that uses guns, the weaker faction that has a strong physique, the boxing faction that uses punches... The required Shu Ling is a specific faction Shu Ling, also known as the Specialized Shu Ling, such as the "Wave Sword", which requires the magician to use a sword to activate it.

If there is no requirement for the magician, or the requirement is easily met by most magicians, it is called a general magical spirit, such as the 'eagle eye', as long as the magician has eyes, it can be activated.

Generally speaking, a magician possesses a magical spirit, which consists of a specialization and a general-purpose magical spirit. It is best not to have more than two factions for the specialization of Shu Ling, and the general Shu Ling also depends on the situation, and try not to keep useless Shu Ling.

Even if Sonia took the 'Burst' Shu Ling, she would definitely sell the Shu Ling, it is impossible to keep wasting her money.

The reason why Sonia is not interested in this Shu Ling at all is that the "Burst" Shu Ling is not valuable.

"The 'burst' is a product of the flintlock era hundreds of years ago, and now it is the era of automatic stepping and automatic hand gunning. The hand gunner can dump seven gunshots in one second. There is no shortage of 'continuous shooting'. "This shot of'." Sonia spread her hand, "Although the 'burst' can also be used on weapons such as mortars and shipborne guns, the latter also has better options for magical skills, and will not use it. 'Burst'."

"Like this kind of Shu Ling that has been eliminated by the times, the purchase price of the school is at most one silver coin-this is also the lowest purchase price of Yi Yi Shu Ling."

Sword Princess was going to school, and Ya Xiu knew about it, but he didn't care about it either, thinking it was just a game setting anyway.

"Then I will take it!"

"Take it, take it." Sonia didn't take it seriously either.

Axiu secretly thought of the exchange, the medal in his hand turned into a white mist and dissipated, and a message popped up in the game: "Recharge successful! You got 10 points."

The cheapest purchase option in the game is to buy 1 source crystal with 6 points, which means that this “burst” magic spirit can only buy 1.5 source crystals, and one draw requires 3 source crystals, that is to say two for each wing. Shuling is equal to one draw.

Shuling is also an extraordinary power anyway. How can this price be as low as that of a graduated college student...Axiu sighed and looked down at the hunting notebook in his hand: “Then what is this notebook?”

“Magician’s Manual!” Sonia glanced at Asia with a strange expression.

“Magician’s Manual?” Ya Xiu was startled.

Sonia nodded.

“The magician’s manual will summarize the magician’s life in a certain way. For example, this manual will register the information of the hunting target of the gunman before his lifetime, indicating that hunting is the most important thing in his life for this magician. It’s part of it. Well, it’s actually the diary of the magician.”

“But this is not a diary written by the magician voluntarily, but after the death of the magician, their souls automatically return to the virtual realm and become the projection of the magician, and then their life memories are precipitated and turned into a book-just like birth, old age, sickness and death. , This is an unavoidable natural law.”

“We will refer to this book collectively as the Handbook for Masters.”

“If the Void Realm is the magician’s cemetery, then the magician’s manual is the magician’s tombstone.”

A Xiu realized that the hunter was a projection of a dead person just now. He thought it was a living person, so he wondered how could he meet other magicians so easily.

But even if he is a living person, he will not keep his hands. After all, death in the virtual world is not a real death.

Sonia said: "Like the medal, the Sorcerer's Manual is also usable. You can directly absorb the manual with your consciousness, so that you can get a random skill from the owner of the Manual that cannot be classified into the Spell School-completely random."

Ya Xiu asked: "Then do you want it?"

"I don't want it, I feel tired after a few glances." Sonia shook her head: "But you have read the entire manual, you will not be contaminated if you absorb it."

"Pollution?"

"The manual of the magician is polluting. Generally speaking, the magician can only read the manual of the magician that is similar to his own worldview, values, and outlook on life. If an inappropriate manual is forcibly absorbed, it will cause damage to the soul, even May cause schizophrenia."

"so serious?"

"Serious is serious, but it is easy to prevent, because as long as you don't feel discomfort when looking through the surgeon's manual, it means that there will be no problem in absorbing this manual."

Having said this, Sonia is also a little curious: "According to what I heard, ordinary magicians have encountered ten manuals for magicians. If they can absorb two or three of them, even if luck is good, there are even many magicians who spend their entire lives. You can't find an assimilation manual...How can you make it possible to pick up a manual for the magician and absorb it directly without pollution?"

Ya Xiu naturally couldn't answer this question. He followed Sonia's instructions and guided his consciousness to touch the hunting notes in his hand.

The hunting notebook turned into a light smoke and flowed into his body. After a while, Ya Xiu felt a piece of ice in his consciousness melted, and suddenly a lot of indescribable knowledge was added.

He opened the “Crew Management” in the game and found that he had one more skill.

「Anti-Reconnaissance Proficiency」

As a jungle hunter and war soldier, even if he has not learned anti-reconnaissance, Carbin Stoly will inevitably honed this survival skill in the war. For Ya Xiu who was planning to escape from prison, anti-reconnaissance was also a small skill that could come in handy.

After Ya Xiu absorbed the hunting notes, they found that the island was sinking. The two hurried back to the boat. After a while, the island disappeared completely, and the sea level was quiet, as if nothing had happened.

“This is the peculiarity of the Void Realm. It meets impermanence and is only for inheritance.” Sonia sighed, “There are countless small inheritance islands floating in the sea of knowledge, quietly waiting for the new born magician to discover. Once the magician takes away the inheritance, the small island will naturally return to the sea... Some people say that the small island is the evolution of the magician’s obsession. It is the old Japanese magician who hopes that someone can remember their traces in future generations. UU read the book www.uukanshu.com that’s why he put his own heritage On the sea.”

“The life traces of all magicians are deeply engraved in the virtual realm. Here we will meet the inheritance of countless predecessors, confront the gunmen hundreds of years ago, communicate with the wise men thousands of years ago, everything is there. It may happen... and our traces will also be engraved in the virtual realm. When a certain magician tears through the white fog hundreds of years later, he will also encounter the challenges left by you and me.”

“Sounds very romantic.”

“Really? Do you think your life can be passed on to future generations without any cover, so that future generations can admire your great achievements?”

Axiu suddenly felt unromantic: “Can you delete some life records before the magician dies, such as “Learning Materials”, “Art and Life” and so on...”

“How to die decently, and how to live stubbornly, has always been the two important research projects of the magician.”

Although I didn't get anything and the benefits were taken by Ashura, Sonia was very relaxed and stretched out on the boat: “Which way to go next? You decide, and it's up to you.”

Xiaodao Battle is definitely not thrilling. If Ashiu can find this kind of inheritance island every time, Sonia is very willing to take risks.

As long as she encounters a swordsmanship school spirit or a suitable wizard manual, she will make a lot of money.

The expectation of many magicians is to explore smoothly in the virtual realm. Not to mention the inheritance of the virtual realm, it is enough for them to admire them without encountering danger.

“Let me see...”

Yaxiu opens “Void Realm Exploration” and inquires about the surrounding grids:

“Waste effort”, “Waste effort”, “Waste effort”, “Waste effort”, “Better not to go”, “Waste effort”, “Waste effort”, “Waste effort”.

“Huh?”
