Technician's Manual - Chapter 28

Chapter 28 - The legend of the golden fish

"You didn't catch up, right?"

"No, no? He can't swim, right?"

"What kind of road is your area? It's really harmful."

"Before I led the way, I told you that it was dangerous. Who was just as confident as the student holding the cheat sheet and said it was okay?"

"Can this be called just a bit dangerous!?"

In the white mist of the Sea of Knowledge, both Yaxiu and Sonia lay on the boat panting, their statures were as thin as the white mist around them, as if they were about to dissipate at any time, and even the argument was weak.

Just now, because of a voyage with no gain for almost an hour, Ashura couldn't help but propose to Sonia to explore the area "Best not to go" on the map. Sonia, who had just entered the virtual realm, was also confident. Expansion, so the two broke through the white mist and entered the danger zone.

However, not only is there no inheritance island in the dangerous area, but there is a giant fish with wings. It directly overturned Yaxiu's boat and spews water cannons, which can blow up the sponge dozens of meters high.

Yaxiu and Sonia just rubbed the water cannon, and the paint fell off like they had been rubbed with sandpaper hundreds of times.

Fortunately, the boat is very sturdy, even if it flips, it still floats firmly on the water. The two climbed back to the boat and hurriedly left the dangerous area by pulling the seawater with their hands.

The giant fish would actually chase, and even fly up and rush towards the boat. Fortunately, Ya Xiu was anxious to gain wisdom and used "Void Exploration" to control the boat to speed up. Only then did he narrowly avoid the fish head charging and did not hand over theirs. The first drop of blood in the virtual realm.

After her anger, Sonia looked at the drenched Ya Xiu, a trace of doubt flashed in her beautiful eyes, pretending to ask at will: "Can't you kill that mudfish dragon?"

Ya Xiu did not doubt that he had him, and said out of breath: "You can't even do it, how can I do it?"

Is the viewer so weak?

Many thoughts flashed through Sonia's mind, but in the end they all fell silent. Even if the viewer is weak at the end, she has nothing to do. She can't kill the viewer, and the viewer's control over her, she has yet to find a way to resist, and even Professor Trozan hasn't noticed the viewer's exist.

And after the end-viewer showed the ability to explore the virtual world, Sonia's mentality also faintly changed.

Even if she has just become a Void Wingman, Sonia also knows the importance of the Void Wingman to the Void Wingman, and she also understands how terrifying the end-viewer's ability to perceive the fog of the Void World is so terrifying.

As everyone knows, no one can insight into the fog of the virtual world, and this is the reason why all magicians are equal-in the face of unknown risks and benefits, everyone is equal, the strong will fall, and the weak also have the possibility of reaching the sky in one step!

This is the so-called, equal opportunity!

And now, an existence that can perceive unknown risks and surpass all magicians has appeared!

The master of the magician, the last viewer!

If it is said that following the orders of the viewers before was more or less compelled to be reluctant to toss, then Sonia's mentality has undergone a slight change, and she is overwhelmed by the viewer's abilities, and even begins to expect her to be led by the viewer. Fei's beautiful life is almost the same as Evil Fall.

Originally, Sonia wanted to ask the viewer why she chose herself and what is different about herself, but she thought about it, in case the viewer suddenly realized, "Oh, what do I want you for?", then she turned her head and gave up Sonia. Ya, didn't she miss an opportunity to become a master?

And, if there is no tyrannical strength, how does the viewer control her actions, perceive the mist of the virtual world, and pull her into the dream trial?

Be wary of spectators playing weak cards!

Once Sonia is fooled by this, maybe the viewers will take advantage of the problem and arrange more severe punishments to treat her harshly!

"Speaking of which, what kind of creature was that fish just now?"

is here, and even ask me such common sense questions, pretend, just pretend!

Sonia cooperated with him in the performance: "The mud ichthyosaur is one of the most common intellectual creatures in the virtual world. Killing it can obtain various magical spirits such as water and earth factions. If this mud ichthyosaur was previously After killing other magicians, there may also be other magicians' magic spirits in the body."

There are only two kinds of intelligent creatures in the virtual realm, one is the magician and the other is the knowledge creature.

As the name suggests, as long as the magician kills the knowledge creatures, they can obtain their condensed knowledge-the magic spirit.

Unlike the inheritance left by the magician, the magical spirits exploded by knowledge creatures are not fixed, although they basically have the same faction, like the mud fish dragon, they will not explode the magical spirits of the fire school faction.

But even in the same faction, there are many different magic spirits, and the loot of knowledge creatures will be updated with the version.

For example, in reality, a magician invented a new knowledge system and summoned a new variety of Shu Ling. Then when other magicians killed knowledge creatures in the virtual world, they might directly explode a new version of the magic that had just been invented not long ago. spirit.

If the new knowledge system is too novel and crazy, it may even directly give birth to new varieties of knowledge creatures and expand the biodiversity in the virtual environment.

Like 'equal opportunities', this is also one of the important prerequisites for the equality of technicians: 'equal knowledge'.

No one can monopolize knowledge forever. No matter how you cling to your newly invented knowledge, other magicians can get your results in the virtual world. If you want to maintain your advantage, you need to keep innovating.

Those who cling to the disability, and expect an invention to have a permanent lead, are no different from fools who stay in the same place for a long time in the virtual world.

If you don't take risks, the virtual world will engulf you; if you don't innovate, reality will beat you badly.

After introducing knowledge creatures, Sonia couldn't help but tentatively said: "Since you know that there is danger in the mist, can't you detect what kind of creature the opponent is?"

"I can't detect it. I only know the degree of danger for us in the fog, but I can't know what the danger is."

Sonia was a little disappointed: "Then you must not find the golden fish."

"Golden fish?" Ya Xiu was a little dazed, "What did it come from?"

It's like hearing someone ask herself "How much is 1 plus 1?" Sonia chuckled and suddenly thought: Does he want to cultivate my compliance by asking herself mentally handicapped questions? If I resist him, will he make him feel that my loyalty is not high enough, and then treat me harshly with severe punishment?

At this point, Sonia raised her vigilance and seriously answered this mentally retarded question: "The golden fish is a fish floating on the surface of the sea of knowledge. On the back of the fish is the continent of time, and the continent of time is where the Second Wing Master goes. ..."

"Wait, mainland?" Ya Xiu interrupted, "How big is this fish?"

"It is huge. No one has ever seen the whole picture of a golden fish. It is said that the smallest scales on a golden fish are equivalent to a large city that can accommodate a million people."

"Such a big fish, shouldn't it be easy to find?"

"On the contrary, only a few lucky ones can find golden fish in the sea of knowledge, and without exception, those lucky ones have become famous legendary magicians."

Ya Xiu said, "Then what is the benefit of finding the golden fish?"

"Ascend to the Time Continent and directly become a Second Wing Master."

"what?"

“Become a Second Wing Surgeon directly.” Sonia resisted the impatience in her heart, thinking that none of the children she met during her tutoring was so mentally retarded: “The biggest difference between the First Wing Surgeon and the Second Wing Surgery The teachers are all in the sea of knowledge, and the two-winged wizards are all in the time continent.”

“When the One Wing Sorcerer gathers his mana to the extreme in the Sea of Knowledge and turns into Silver Wings, he cannot gain more mana in his voyage. If he wants to climb to a higher level, he must be promoted to the Second Wing. .”

“The normal way of promotion is for the magician to summon the two-winged magic spirit through delving into knowledge, and then from the two-winged magic spirit to find the gate of truth to pass through the virtual realm, then he will reach the second layer of the virtual realm-the time continent. Only in the time continent can the magician absorb more magic power and condense the second virtual wing: Golden Wing.”

The First Wing Sorcerer sails in the sea of knowledge, condensing the Silver Wings, and the Second Wing Sorcerer walks on the Time Continent, condensing the Golden Wings...Axiu initially understands the power system of the Sorcerer, but there is a question: Can't you obtain the Second Wing Shu Ling from someone else and then directly reach the Time Continent?”

“Absolutely impossible.” Sonia shook her head: “As long as it is not the Shu Ling summoned by herself, the magician will not be able to find the door of truth in it, and it is even difficult to search within the Shu Ling-the Shu Ling is composed of knowledge. You don't understand the structure of Shuling, how do you explore the secrets of Shuling?”

Ya Xiu now understands the way a wizard is promoted: summon a higher-level magical spirit, use the magical spirit to travel to a higher virtual realm, and continue to call a higher-level magical spirit after he becomes stronger, and the cycle goes back and forth.

Because of the two premises of “equal opportunity” and “equal knowledge”, adventure and research run through the life of a practitioner from beginning to end. No one can retire comfortably. As long as you are unwilling to give up your existing interests, We must continue to take risks and create benefits.

This process not only guarantees the sound development of the technician system, but also constantly optimizes the old white rabbit technician who stops and does not want to fight... It sounds a bit like a KPI system! Another final elimination system would be perfect!

found that the magician is just another type of hitting workers, and Ash suddenly became confident: on the theory of part-time job, he has never lost anyone!

“Wait, if we can find the golden fish in the sea of knowledge and board the time continent, wouldn’t it be a shortcut to advance through the back door?”

“We prefer to call this kind of ‘stowaways’, who smuggle from the bottom to the top...that’s why the magicians want to find the golden fish.” Sonia shrugged: “Who can refuse the temptation to get something for nothing? What?... So can you find the golden fish?”

“I want, too.”

“Then you ask me why so much, go on sailing.” Sonia looked at her somewhat illusory palm: “Don’t go to the place where fighting will happen, I’m a bit tired, and sailing in one or two areas should be fine. Do not leave the virtual realm.”

Ya Xiu nodded, he also felt tired.

The voyage of the Void Realm is not without cost. Passing through the white mist is not only condensing mana for them, but at the same time tempering their spirit and consuming their soul energy. When the soul energy drops to a certain level, they must exit the virtual realm to rest.

Every ordinary voyage contains countless precious miracles.

Ya Xiu opened the “Exploration of Void Realm”, and if nothing else, he saw a lot of “wasted effort” and “Better not go.”

But this time, he actually saw golden light glowing in the lower right corner of the map!

The prompt below the        area is surprisingly:

“welcome”!
