

The Boss Behind The Game Chapter 642

Just as the players on the forums were discussing the specific uses of the divine seal ...

The player who posted the thread had a game notification in his mind:

[Game prompt: you have triggered a hidden mission. Please head to the underworld's butler and submit the 'divine seal of glass' to activate the hidden mission. After completing all the missions, you will receive high rewards and hidden profession rewards (probability).]

After seeing the content of the game prompt, the player was completely stunned.

He had originally planned to sell the divine seal to Gu Yu. After all, he couldn't resist the price of 100000 soul coins.

However, when he saw the game prompt that there was a chance of obtaining a hidden profession mission, he replied to Gu Yu without hesitation,"

"Boss, I'm not selling!"

After that, the player decisively rushed to hell and handed the 'divine seal of glass' he had obtained to the hell Butler. He then received a quest line from the Butler.

Then, he happily started his hidden mission journey ...

While this player was extremely happy, Lu Wu was also very happy.

In truth, the divine veluriyam seal wasn't very useful to players.

Because the players 'cultivation system was completely different from that of the Empyrean, it was impossible for them to rely on absorbing the deity's seal to ascend, let alone be listed on The Investiture of the Gods.

However, it was different for Lu Wu because he could maximize the value of this divine seal!

.....

At this moment, in the divine artifact space.

A green divine imprint flickered with a resplendent radiance under the infusion of soul power. The law power within it was also completely awakened at this moment.

Seeing this, Lu Wu and little Bei Li, who were standing on the side, smiled.

“Big meat shield, let’s start making our own Investiture of the Gods!” Little Bei Li suddenly turned around and said to Lu Wu.

When Lu Wu heard this, he nodded excitedly. Then, he took out his “small manual on the wall” and covered it on the seal.

“What should I do next?” Lu Wu turned to little Bei Li and asked.

“Leave it to me, you just watch!” “Let’s go!” Little Bei Li said as he took a step forward and stood in front of the divine seal. He then took out his own little book and tore off three pages.

At that moment, the large amount of soul coins stored in the divine artifact space turned into a Blue River and wrapped around the three pieces of paper in little Bei Li’s hands. Then, the three pieces of paper began to burn.

In the burning, twisted black runes appeared from it and quickly rushed into Lu Wu’s “hanging manual” under the control of little Bei Li.

At this moment, the ‘hanging manual’ started to change and began to devour the ‘colored glaze divine seal’ below.

Seeing this scene, Lu Wu’s lips curved up.

The heaven realm had the list of deification and the netherworld realm had the list of Yin gods. This time, he would also have his own list of deification.

Time passed by bit by bit, and half a day quickly passed.

However, the devouring was not over yet. It was still going on.

Looking at the soul coins in his inventory, Lu Wu's face showed a pained expression.

It had to be said that this process consumed too many soul coins. If it were not for the batch of heaven realm resources he had plundered before, he might really not have enough now.

However, when he thought about the "God List" that he was about to get, Lu Wu suddenly felt much better.

Another half a day passed as he waited. The devouring process was finally coming to an end.

At this time, Lu Wu's hanging manual had already changed greatly. It was dark gold in color and was emitting a dark red light, like a rare treasure.

When the last green light of the "glazed divine seal" was swallowed by the "wall-hanging manual", the dark gold manual slowly floated into Lu Wu's hand.

[Unnamed (incomplete God ranking list)]:

[Item description: the list of deification. It controls the power of the laws of the Three Realms. The holder of this divine item can pardon the gods and establish an immortal orthodoxy!]

Investiture of the Gods 'current members (one):

Evil god (evil king):

[Laws mastered: law of undying, law of blood sacrifice, law of strange spirits, law of the netherworld, law of concealment]

[Power of unpardoned Law: Law of glass]

[Inner laws: (6/6000)]

.....

Holding the divine roll, Lu Wu's heart was surging with emotions.

In fact, the idea of setting up a divine ranking for the players had been in their minds since the beginning.

However, he had never been able to implement it.

This was because the prerequisite for constructing the divine roll was to possess at least 3000 Dao laws.

The heaven realm's Investiture of the Gods had the power of 3000 Dao laws, and the yin God List was also constructed by the power of 3000 Dao laws. If Lu Wu wanted to create a God's list for the players, he would need 3000 rule power to build a complete rule cycle system.

However, the problem was how to obtain 3000 nomological laws.

Back then, the human world walked the path of physical ascension, but this path was not suitable for the current players to walk.

In fact, this question had been bothering Lu Wu for a long time.

As the players' strength grew, they would reach the demigod realm sooner or later.

However, at that time, they could not be like the heaven realm and the yin realm, where they could become gods on the God roll, because there was no God roll that could contain them.

However, Lu Wu had found a way out now, and that was to make his own God List that combined the laws of heaven and Yin world and contained the power of 6000 Dao laws.

This path was very similar to the path that the human realm had taken in the past. If they couldn't produce spiritual energy, then they would absorb the spiritual energy from the heaven realm and the netherworld realm to cultivate.

This time, Lu Wu's choice was more thorough. He integrated the laws into it and created a divine roll that was stronger than the heaven and Yin realms.

Lu Wu had also asked little Bei Li if this would affect the Three Realms.

Little Beili, on the other hand, expressed that there was no problem at all.

This was because what they needed to do was not to separate the nomological belt between the heaven realm and the netherworld realm, but to cultivate new nomological power.

For example, in the divine seal of the evil demon God, little Bei Li had extracted the power of five laws and added them to the evil king.

These five nomological laws were not the main nomological belt. They were just imprints, and their disappearance had no effect on the Three Realms. However, little Bei Li had a way to cultivate these five nomological marks to the point where they could be connected to the main law.

In other words, Lu Wu didn't need to take the main law belt controlled by the Emperor of heaven realm or the Emperor of netherworld. As long as he got the law marks, and then used his soul power to cultivate these marks into the main law belt, it would be enough.

Thus, doing so would not affect the normal operations of the Three Realms!

However, the number of nomological marks that could be derived from the main body's nomological belt was not unlimited. According to little Bei Li, each main body's nomological belt could only produce 108 nomological marks at most.

At this time, Lu Wu's God List had swallowed the "glaze divine seal" of the heaven realm, which was equivalent to the heaven realm losing a glaze law seal forever.

As for the five law marks left by the evil demon God, Lu Wu would consider returning them when he cultivated the main law belt, but there was no possibility of returning the ones in the heaven realm.

Not only would he not return it, but Lu Wu was already thinking about how to kill a group of gods in the heaven realm to enrich the laws contained in his God List.

After all, Lu Wu was going to walk the path of integrating the 6000 Dao laws of the two worlds. No God would give his own divine seal to him for free, so he could only Rob it.

As he thought of this, Lu Wu's face showed a strange expression.

The way players grew was by plundering. He didn't expect that the future Ascension would also be by robbing others ...

This was very logical and in line with the players 'actual situation!

"Big meatshield, start your magic gathering journey!" At that moment, little Beili clenched his fist and gave him a look of encouragement.

Lu Wu rolled his eyes,"

"There are only six nomological divine seals right now. Do you have any way to quickly collect them?"

"There are!" "Yes!" Little Beili nodded.

"Speak!"

"First of all, you have to understand that what we want is not the main system of laws. As long as there is the power of laws, it will be enough. There are players who have mastered the power of laws among the players, such as explosive man. He has the divine seal of dark laws in his body. When the time comes, you can secretly deduct some of it, and then we will use soul coins to cultivate the divine seal of dark laws with the deducted portion of dark laws!"

Little Beili paused for a moment before he continued,"

"Of course, it's better to have a ready-made divine seal of laws, because the cost of cultivating it is very large. As long as we have a ready-made divine seal of laws, we don't need to spend a large number of soul coins to cultivate it bit by bit. We can catalyze it into a magical belt in one go!"

After hearing little Beili's explanation, Lu Wu nodded in agreement.

He had just devoured the ready-made divine seal of veluriyam, and it had cost him five billion soul coins.

If it was truly nurturing the law power into the law Divine seal, the soul power consumed during this process would be even greater than devouring.

Therefore, it was better to get everything done in one go and directly devour the divine seal after snatching it.

This way, he could skip a step that consumed a lot of energy.

As for how to cultivate the divine seal into the main system of laws in the future, Lu Wu did not think about it for the time being.

The main reason was that they were poor and couldn't afford to train them!

However, Lu Wu was not worried.

When the players were able to kill gods, Lu Wu would get an unimaginable amount of soul coins for every God they killed.

As long as the players grew, the income of soul coins would also continue to increase. When the players could become gods, the soul coins they created every day would naturally be enough for Lu Wu to cultivate his main law belt.

As he thought of this, Lu Wu began to hope that the players would quickly become stronger.

My baokemeng collection journey ... Bah, the collection of laws will have to be fought for by you killing gods!

At this moment, Lu Wu really wanted to make a public announcement:

Do you want the treasure? it's with the gods. Quickly go and kill the gods!

.....

After some fantasizing, Lu Wu turned to look at Xiao bei and said,”

“What name do you think I should give my wall-mounted notebook?”

“Think of it yourself, I have to think of the name, what’s the use of having you as the boss!” Little Beili immediately showed a look of disdain.

When Lu Wu heard this, he smiled awkwardly and then began to think hard.

Leek ranking? Man God ranking list? The calamity rankings?

After thinking for a while, Lu Wu suddenly had an idea.

At this moment, he thought of the ancestor of the human race.”The human Emperor was killed.

It seemed that the Army he led was called “otherworldly demons” by the outside world, and the human warriors under him were very similar to the players, all plundering and growing, immortal and undying.

As a descendant of the human race, let me continue my glory!

“What do you think about naming it the heavenly demon ranking?” Lu wuwang asked as he watched Xiao bei leave.

Little Bei Li did not say anything. He just took a sip of the iced Coke and slowly left the divine artifact.

However, before he left, Lu Wu saw that little Bei Li’s hand that was holding the iced Coke seemed to be trembling, and his eyes were red.

Lu Wu scratched his head, looking a little confused.

After some thought, he still decided to give it this name.

At this moment, three big words slowly appeared on the cover of the dark gold “wall Handbook.”

The heavenly demon ranking!
