

Commander?

Since when did President Lu become a Commander?

Everyone stared at Lu Chen in shock before glancing back at Xiao Zhan.

They were already confused when he came in with his military suit, but they did not expect him to act as such too.

Of course, people like Wang Wei, Xia Jun and some others who knew about what happened to Lu Chen in Myanmar weren't so surprised anymore, especially Xia Jun who was transferred to Kokang by Lu Chen for a month over; he would consider himself close to Xiao Zhan by now.

"Reporting to the Commander. Following your command, the Killer Shrine had already gathered more than ten thousand people and had trained 250 aviators in half a month. All the Seven Great Juntas had reached out to us for a chance to work together. They had all transferred their rough stones over to our factory to undergo rough stone refining. Up until now, we had already refined more than 100 thousand tons of jadeite stone and we

estimate that this amount will reach more than 1.5 million tons by next year. Also, under General Manager Xia's provision, construction in the city area of Kokang had been going smoothly. We estimate that everything will be done by May next year. That's all I have to report. Please give your instructions on what to do next, Commander!"

Xiao Zhan saluted Lu Chen after finishing.

Lu Chen nodded before saying, "Have a seat."

Regarding Xiao Zhan's report as well as future plannings, although it sounded rough and not detailed, Lu Chen believed that everything would be finished by estimated timing.

Kokang was undeniably poor. So, when Lu Chen offered a favorable policy to the people there, citing to build houses for them and encourage them to do businesses, of course the people there would fully support the rebuilding of Kokang.

When Lu Chen wanted to end the meeting, he noticed that many were still curious

about Xiao Zhan and Kokang. Chuckling to himself, he explained, "Alright. Two weeks ago, I requested for a temporary land lease on Kokang for 100 years from the Myanmar government. At the same time, I have a military junta with more than 10 thousand people in Myanmar. Kokang will also belong to the company in the future."

Lu Chen didn't want to brag.

However, everyone was still impressed when they heard what he said.

Who else would be able to get a land lease for 100 years in a time like this other than President Lu?

Of course, they all knew about Myanmar's situation, considering him mentioning about The Killer Shrine, everyone figured that President Lu probably forced Myanmar's government to give away the land lease using his military power.

Lu Chen was being protected by the military in the country, as well as having private territory and military outside of the country.

*No one else other than President Lu would*

*be able to wield such tremendous power and authority.* ame impressed by Lu Chen and respected him even more.

After the meeting ended, everyone went to the venue.

Yi Qi Technology's gala night was held on this night; besides three thousand workers from the head office, more than hundreds of workers from Sheng Shi Supermarket and Kaitian Rough Stone Group also came to Science and Technology Park.

The first ever gala night was done on a great scale; not only were five-star chefs invited to prepare the meals, A-listed stars were also invited to perform.

Even a few of the A-listed stars who were joining the CCTV New Year's Gala show were coming over to Chongqing with the private plane that Lu Chen had arranged for him after their rehearsals for special guest appearances.

A total of 5 A-list celebrities, 12 B-list celebrities, and a few comedian actors were invited for the gala.

A great line up like this made all the

workers excited.

This was mainly because most of these workers had never seen their favorite idols perform in such a close proximity in front of them.

On this night, thousands of workers posted on their social media about the gala, making their friends who were working in other companies jealous of them.

After all the performances ended, Lu Chen closed the gala with a New Year speech before giving out red packets to all the workers, officially announcing the start of their New Year holiday.

The red packet wasn't much. However, the workers were still happy to receive a thousand each.

Yi Qi Technology gave a high salary for their workers in the first place, so it was a nice gesture to offer more bonus for their workers.

All of them respected their boss and were grateful to have a boss like this.

Moreover, due to the non-disclosure agreement signed between the company and scientists, most of their family had moved into Science and Technology Park's housing area.

The Science and Technology Park's housing area was filled with mansions that were given to each of the scientists for free.

Even the housing area for workers that were prepared for those in management as well as the normal workers could be bought by getting interest-free loans from the company. The price of the housings were also less than half the price compared to the housings outside.

There were also shopping malls, entertainment places that were mostly automated at the Science and Technology Park.

There were also schools. However, they only had kindergarten and elementary schools for now as higher tier schools were still under construction.

Just this year, many who stayed in Science and Technology Park had chosen to spend

their New Year holidays in the place.

Because of this, Lu Chen arranged for everything in the malls to be sold for half-priced and gave free entries to the entertainment places.

On New Year's Eve on this day, every mansion was decorated with bright lights; every family was reunited and the atmosphere was warm and hearty.

However, Lu Chen still felt like something was missing.

He knew it was because he still couldn't get in contact with his father.

He'd called his dad and contacted Lu Zhong after killing Xiao Bieqing. However, Lu Zhong didn't know where Lu Tianxing went either.

It'd been quite a few years since he last met his father.

Lu Chen was being stubborn before this. However, all that was left now was a feeling of yearning.

"Daddy! Mommy asked you to come over

to play with fireworks with us!” Qiqi ran over and called out to him, snapping him out of his trance.

“Alright! Let’s go light up some fireworks!” Lu Chen carried Qiqi into his embrace and headed outside.

When Lu Chen walked out with Qiqi, they saw Lin Yijun, Lin Yijia, as well as the Three Marquises of the Water Margin and the others playing with fireworks.

The Three Marquises of the Water Margin were orphans who were brought up and given the opportunity to train by Lu Chen.

Although Lu Chen was disappointed in them initially, he’d finally accepted them due to their loyalty.

Lu Chen had invited all three of them over for New Year this year. Even though they hadn’t married yet, they all brought their girlfriends along too.

“Young master, here! You get to release the first bucket of fireworks!” Lin Tong suggested and grinned cheekily.

“Alright!” Lu Chen hopped over. He lit the

string of the firework before taking a few steps back while carrying Qiqi; he was mainly worried about scaring Qiqi.

Watching as the fireworks burst into the sky, Qiqi shrieked with joy in his embrace, not the slightest bit afraid of the loud noises.

After finishing the fireworks, the entire family sat down and enjoyed the night view while playing mahjong.

Lu Chen had given each of them red packets of 10 million for them to enjoy mahjong.

The Three Marquises of the Water Margin felt indifferent about the pocket money; they had all followed Lu Chen for a long time and knew that Lu Chen would never treat them shabbily. Giving out red packets as much as 10 million each meant nothing to Lu Chen.

However, their girlfriends almost fainted from excitement when they received the pocket money.

Even Wang Xue was excited. After Lu Chen transferred his shares for Dong Jia

Electronics over to Lin Yijun, she had forced Lin Yijun to get her a job there, allowing her to get into the company to spend her post-retirement days.

The weather was sunny the next day. They'd planned to go on a trip, but many of the leaders started showing up at his place before they left, thus forcing Lu Chen to cancel his plans to go on a trip with them.
