

Towers 131

Chapter 131: Think about It

When the freshmen heard the words of the vice principal of the Logistics School, Yu Zhitong, they were surprised.

The future pillar? It was a terrific commend. This was too explosive!

It meant Chu Long could become the leader of the Logistics School in the future. She would be the core figure of Lighthouse School.

However, when everyone thought about it carefully, they realized that their combat classes could only last for two to three minutes. Chu Long, a support class without fighting power, was able to last for eight minutes. It was indeed impressive and respectable.

However, when Chu Long heard Yu Zhitong's words, she did not reply. Instead, she looked at Liu Yan, who was not far away.

It was like she wanted to listen to Liu Yan's opinion.

Yu Zhitong saw through Chu Long's thoughts and immediately had a helpless expression. She looked at Liu Yan and asked, "Looks like she will have to listen to your arrangements."

Liu Yan then smiled helplessly and said, "Of course, the supporting class will gain a lot at the Logistics School. It's the best choice. Chu Long, quickly thank Vice Principal Yu."

When Chu Long heard this, she looked at Yu Zhitong and thanked her, "Thank you, Vice Principal Yu."

Seeing this, Yu Zhitong smiled bitterly. However, she was thrilled to recruit such a talented support genius.

"Alright, remember to make the registration!"

After that, Yu Zhitong left. She still had to pay attention to and recruit the other support geniuses.

Although the other geniuses might not be as good as Chu Long, they were worth nurturing too.

Luo Qingcheng saw Chu Long return to Liu Yan's side and congratulated her, "Congratulations, Chu Long. You attracted so many attentions! You will definitely perform well in the future."

"Thank you." Chu Long's eyes were smiling like crescent moons.

Liu Yan glanced at Chu Long and didn't say much. In his heart, he understood that it took more than a strong healing ability to persist in the virtual opponent's fight for a long time. Chu Long must also have strong willpower.

After all, she had been hit by the virtual opponent while kept healing herself the entire time. This willpower was not something that everyone had. It was extremely rare.

The three of them waited for a while more. This batch of new students had all come out, but only one person had yet to come out. It was Murong Xue.

Looking at the time again, it had already reached fifteen minutes. It had already surpassed the previous best record.

When the freshmen saw this, they were all a little surprised.

“This is too amazing. She managed to hold on for 15 minutes.”

“There were so many freshmen before, but the longest one was only 10 minutes.”

“It’s considered normal. Her previous battle record was incredible.”

“Sigh, I only managed to hold on for one minute. If only I could hold on for 15 minutes. In the future, I would soar to great heights. The entire family would be able to live a good life with me.”

“She is already an absolute genius if she can hold on for more than 15 minutes. He is indeed formidable!”

“...”

At this moment, the Lei Jianbo and a few vice principals were also paying attention.

Even the vice principal of the Combat Technique School, Shi Tian, had already walked up to the teleportation array and started waiting. He directly announced, “This talent has to come to our school. If any of you dare to fight me to recruit her, I will not back up!”

The other vice principals all smiled when they heard his words, but they didn’t have the intention to fight with him.

They had also seen Murong Xue’s battle record. She was indeed a talent that was suitable for the Combat Technique School.

The awakened with the power of God of War was a rare talent. She must go to the Combat Technique School.

Chu Long couldn’t help but say, “Sister Murong Xue is so powerful. She can actually last for so long.”

“That’s normal. She should be able to hold on for twenty minutes with her strength.” Liu Yan smiled and spoke.

Liu Yan was clear about Murong Xue’s strength.

Although there was a big gap between her and Liu Yan, it was not because Murong Xue was weak, but because Liu Yan was too monstrous.

Murong Xue’s strength was already extremely powerful. She had already shaken off a large gap between the other awakened ones of the same level. She was definitely a genius.

In addition, Murong Xue was a Rock Pugilist. Her defense was already astonishing, and she specialized in defense. It was indeed not that difficult to last a little longer.

Everyone waited patiently for a while. When the time reached 23 minutes, Murong Xue walked out of the teleportation array.

At this moment, Murong Xue was panting. She was covered in sweat, but her aura was fully unleashed. The new students felt a wave of pressure. This was all because Murong Xue was much stronger than them.

Liu Yan felt this aura and said with slight surprise, "Looking at this aura, it seems that Murong Xue has used this test to successfully activate the fourth level of the Tyrant Body."

Liu Yan was very clear about Murong Xue was not that strong after activating the third level of the Tyrant Body. It was clear that she had broken through during the fight and successfully activated the fourth level of Tyrant Body.

Liu Yan remembered that Murong Xue had activated the third level of Tyrant Body for the first time during their battle before entering the third level of the Tower.

After that, she was able to slowly familiarize herself with the third level of Tyrant Body.

He had never thought that Murong Xue would be able to activate the fourth level Tyrant Body so quickly. Her growth rate was astonishing.

Berserker Stance was purely an S-grade close combat talent. With every level of Tyrant Body, her strength would undergo an earth-shattering change.

Liu Yan could feel the aura of Murong Xue's fourth level Tyrant Body. He guessed that Murong Xue's strength would increase by at least 50%.

However, her aura was still not stable. After all, this was the first time she had activated the skill. She was still not familiar with it yet. After she slowly familiarized herself with it, perhaps her strength would become even stronger.

The vice principal of the combat techniques school, Shi Tian, looked at Murong Xue, who was emitting an astonishing aura. His eyes were filled with admiration. He hurriedly said, "Murong Xue, right? Come to my Combat Technique School and become my disciple. After my guidance, you will become a top-notch powerhouse of the human race!"

The other three vice principals and the new student director, Lei Jianbo, were surprised when they heard that Shi Tian had such a high evaluation of Murong Xue.

Although Shi Tian had a fiery temper and was more carefree, he had always been more practical and would not speak nonsense.

He gave a high evaluation of Murong Xue. It seemed that Murong Xue was indeed a rare genius. She would grow into a top-notch powerhouse in the future.

When the new students heard Shi Tian's evaluation of Murong Xue, they were all jealous.

Not only did Murong Xue receive the vice principal's attention to enter the Combat Technique School, but she could also become Shi Tian's disciple. Her future was limitless.

However, at this moment, Murong Xue did not hold back and said, "I like to enter the Combat Technique School, but please allow me to consider becoming your disciple."

Murong Xue was not stupid. Although Shi Tian was powerful, he was only the vice principal of the Combat Technique School.

The principal of the Combat Technique School was definitely more powerful, so Murong Xue naturally needed to consider it.

When the freshmen heard this, they were all a little surprised. Murong Xue's talent was indeed extraordinarily strong, but her words were too blunt.

The dignified vice principal of the Combat Technique School wanted to take her as a disciple, but she did not agree right away.

Shi Tian did not feel embarrassed at all. Instead, he laughed and said, "Alright, then come to the Combat Technique School and think about it. You can see if I'm enough to become your master!"

Chapter 132: Liu Yan's Final Test

"Thank you, Vice Principal Shi." Murong Xue said calmly.

Although she said thank you, her expression did not show any gratitude at all. Instead, it was as if she was giving Shi Tian a face.

However, Shi Tian's personality was more straightforward. In addition, Murong Xue was indeed a genius and had the right to be arrogant. Hence, Shi Tian did not bother with Murong Xue at all.

Shi Tian smiled and returned to the stage.

Murong Xue also returned to Liu Yan's side and said excitedly, "I have successfully opened the fourth level of Tyrant Body!"

Liu Yan could already see that and said with a smile, "Not bad, Congratulations!"

The other two girls also congratulated him.

At this point, the three girls had already completed the third test. They had completed the freshmen test and confirmed their respective schools.

The three girls' talents were quite impressive. They had all received the attention of the vice principals of their respective schools. They believed that they would receive enough resources and special training in the future. Their future would definitely be limitless.

Very quickly, the next round of the test began. It was also Liu Yan's turn.

The three girls cheered for Liu Yan. At the same time, they were also curious about how long Liu Yan could last.

After all, the three girls knew clearly that Liu Yan was the strongest powerhouse in their team. He was ridiculously strong.

Murong Xue, who had successfully activated the fourth layer of Tyrant Body, had her strength increased by a lot. But even so, Murong Xue felt that there was still a huge gap between her strength and Liu Yan's.

After witnessing the battle between Liu Yan and the Ancient Draconic Croc, Murong Xue realized her strength was far behind Liu Yan's.

Even if she had activated the fourth level of Tyrant Body, she was still not a match for that terrifying Ancient Draconic Croc. She would definitely be killed in one move.

However, such a terrifying and powerful Ancient Draconic Croc was not a match for Liu Yan. Liu Yan was able to kill it without suffering much loss. It undoubtedly made Murong Xue very surprised.

Luo Qingcheng was also curious about what kind of terrifying combat strength Liu Yan, who had more than 800,000 reputation points, had.

"Hey, how long do you think Liu Yan can last?" Luo Qingcheng asked curiously.

Chu Long and Murong Xue looked at each other.

They both knew that Liu Yan was very strong, unbelievably strong. However, they did not know how strong Liu Yan was.

After all, they hadn't seen Liu Yan use his full strength up until now. They didn't know what Liu Yan's limit was.

"I can last for more than twenty minutes, so I think Liu Yan last for more than thirty minutes." Murong Xue Thought for a moment and said.

However, Chu Long shook her head slightly and said, "Just now, the new student director Lei Jianbo said that the strength of each virtual opponent is different. It is adjusted according to the strength of the challenger. In other words, the stronger the strength of the challenger, the stronger the virtual opponent will be. Brother Liu Yan should also last for more than twenty minutes."

Hearing this, Murong Xue nodded slightly and felt that it made some sense.

After all, she was a Rock Pugilist. Only by being good at defense could she last for so long.

Although Liu Yan was strong, his virtual opponent would also be as strong. It was not so easy to last for too long.

However, twenty minutes or so was still a very long time. It was also great result.

Following that, the few girls waited anticipatedly for Liu Yan's result.

At the same time, Lei Jianbo and a few vice principals on stage were also paying attention to Liu Yan's test.

Liu Yan was a monstrous genius who had broken the best record in the academy, so they naturally paid close attention to him. They were curious about what kind of results Liu Yan would obtain in the third test.

Chu Long, Murong Xue, and other geniuses had great foundations. They were worthy of being nurtured. But without a doubt, there was still a huge gap between them and a scary genius like Liu Yan.

Hence, all vice principals wanted to take in Liu Yan.

As long as they took in Liu Yan, it would practically mean that their respective school would be able to break the balance between the four great schools and take the lead in one go!

At this moment, Liu Yan didn't know what the others outside were thinking. He had already arrived in front of the teleportation array, preparing to begin the third test.

The officials announced the entry and Liu Yan stepped into the teleportation array.

After a short moment of dizziness, Liu Yan appeared in an empty space.

The empty space was extremely spacious. It was neither big nor small. It was at least a few hundred square meters. It was enough to fight, but it was not so big that the new students would have space to escape.

Around the empty space were trees.

It was clear that the terrain would be beneficial for those special classes. After all, not all classes could face a battle head-on.

Not long after Liu Yan appeared in the empty space, a gray virtual human figure appeared not too far away from Liu Yan. It gradually solidified before finally transforming into a humanoid creature.

However, it was just an illusion formed by energy. There was no face on it, and it was holding a long spear in its hand.

Liu Yan could feel that the other party's aura wasn't weak. Its strength should be pretty good. Liu Yan didn't dare to let his guard down.

Previously, Liu Yan had already learned that when every challenger entered, their virtual opponent's initial strength was 1.5 times of the challenger.

Its specific strength would be based on the challenger's strength.

For example, the current Liu Yan was Level 19. The virtual opponent's combat strength was 1.5 times that of an ordinary Level 19 awakened.

Naturally, almost all the awakened ones could not defeat their virtual opponent, so they could only stall for time.

After all, even if one had extraordinary talent and could challenge opponents of a higher level, almost none of the awakened would be able to defeat an opponent that was at least 1.5 times stronger.

At this moment, Liu Yan did not think about how much time he needed to stall for more time.

The third test was no longer that important to Liu Yan.

With the results of the second test, Liu Yan was confident that he would be valued by all the higher-ups of Lighthouse Academy's upper house. He would be able to receive more resources.

The results of the third test and the length of time he needed to stall did not matter to him.

Meanwhile, Liu Yan wanted to use this battle to display his full strength and test the limit of his current strength.

The other awakened ones wouldn't be able to defeat 1.5 times stronger virtual opponents.

However, this wasn't the case for Liu Yan.

At this moment, the virtual opponent was already charging at Liu Yan with a long spear in hand. Its aura was full of pressure.

However, Liu Yan was calm and unhurried. He was taking his steps leisurely. He was extremely calm.

Liu Yan dared to fight powerful opponents like the Golden-armored Blue Ape and the Ancient Draconic Croc, so how could he be afraid of this virtual opponent?

Liu Yan directly summoned Shadow Wolf. It was only a 1.5 times stronger virtual opponent. Liu Yan did not even have any desire to make a move. He might as well test the strength of Shadow Wolf, which had just evolved and become strong again.

Once the Shadow Wolf was released, it saw the powerful virtual opponent charging at it. It was like it was facing a great enemy. It hurriedly transformed into the Ice and Fire Draconic Wolf.

The powerful elements of ice and fire were mixed in front of Ice and Fire Draconic Wolf.

Ice and Fire Draconic Wolf saw the virtual opponent charging at it. Its two heads roared twice before it opened its mouth.

A ball of fire and a frost sword appeared at the same time and shot towards the virtual opponent.

Chapter 133: Breaking the Record Again, Increase the Difficulty

In the virtual space.

The battle between the Ice and Fire Draconic Wolf and the virtual opponent was about to start.

The fireball and frost arrow hit at the same time. Under the terrifying ice and fire elements, the virtual opponent was severely injured.

However, it was a virtual opponent after all. After a short while, its origin power was fully charged. It recovered to its peak state in an instant.

When Liu Yan saw this, he understood why it was so difficult to defeat a virtual opponent. It was because all the new students could only stall for time and had no intention of defeating the virtual opponent.

The initial strength of the virtual opponent would always be 1.5 stronger than the average strength of the awakened ones with same level. Yet, it could remain uninjured and maintain its full strength. No wonder none of the challengers could defeat the virtual opponent.

After understanding this point, Liu Yan also ordered Ice and Fire Draconic Wolf to attack with full strength. They had to kill the virtual opponent in one hit to win.

Liu Yan didn't want to waste time. He wanted to defeat the 1.5-times-stronger virtual opponents as soon as possible and then continue to fight the stronger virtual opponents.

No matter what, Ice and Fire Draconic Wolf was a strong fierce beast that was level 20 and had SS-grade talent. Its strength was extremely terrifying.

Although it might not be able to compare to the current Liu Yan, it was still an extremely powerful existence to many people and fierce beasts.

The Ice and Fire Draconic Wolf understood and immediately roared as it charged towards the virtual opponent.

The Ice and Fire Draconic Wolf was attacking with all its strength. It defeated the virtual opponent in just a few moves. It directly shattered the virtual opponent, giving it no time to recharge!

When Liu Yan saw this, he could not help but praise, "Not bad, you're already so strong!"

When Ice and Fire Draconic Wolf heard the praise, it immediately returned to Liu Yan's side and rubbed its two heads against Liu Yan's hands.

Liu Yan looked at Ice and Fire Draconic Wolf. It was extremely fierce a moment ago, but now it turned around and acted cutely. He was momentarily speechless.

However, Shadow Wolf was only a few months old. It was weaned not long ago.

It grew rapidly along with Liu Yan's strength. However, its intelligence was probably equivalent to a few years old human. It was still an infant.

At the same time, outside the virtual space.

When the staff member saw Liu Yan instantly kill the 1.5-times-stronger virtual opponent, he immediately reported to the new student director, Lei Jianbo.

When Lei Jianbo heard this, he immediately said with a face full of surprise, "What? Liu Yan killed a 1.5-times-stronger virtual opponent so quickly?"

When the other vice principals heard this, they also had faces full of surprise.

Over the years, Lighthouse Academy had produced countless geniuses, but the number of geniuses who could defeat a virtual opponent was less than ten.

After all, the strength of these virtual opponents was not fixed but was adjusted based on the strength of the challenger. It was 50% stronger and with unlimited recovery, how could it be so easy to defeat?

But now, Liu Yan had broken this record. In less than a minute after entering the virtual world, he had instantly killed a 1.5-times-stronger virtual opponent with a. It was unbelievable!

When the freshmen heard this, they were also surprised. At the same time, they were somewhat puzzled.

“What’s the situation? How did Liu Yan defeat the virtual opponent?”

“Isn’t it rumored those virtual opponents are invincible? What happened”

“Liu Yan’s strength is too terrifying. He’s practically a monster.”

“Yeah, when I’m facing the virtual opponent, I can only run and get beaten up. However, this fellow Liu Yan directly defeated a virtual opponent in less than a minute!”

“Moreover, I heard that virtual opponents adjusted their strength based on the challenger’s strength. Liu Yan is so strong, so his virtual opponent must be much stronger. He’s much stronger than the virtual opponent we encountered!”

“...”

Lei Jianbo faced the confused freshmen. He calmly explained, “Defeating a virtual opponent is incredibly difficult, but we could still defeat it. If we have the strength to instantly kill an opponent seven or eight levels higher, we can instantly kill a 1.5-times-stronger virtual opponent!”

Hearing the new student director Lei Jianbo’s explanation, the freshmen were even more shocked.

It was very difficult for ordinary people to even fight against opponents of a higher level. After all, every level up would bring about a huge increase in strength.

Even for those geniuses, they would only be able to fight against opponents of a few levels higher at most.

However, to be able to fight against opponents of a few levels higher and instantly kill opponents of seven or eight levels higher was completely different.

Murong Xue and Chu Long looked at each other, their faces full of surprise.

They had been guessing how long Liu Yan could last. Unexpectedly, Liu Yan directly defeated the virtual opponent.

At this time, the official in charge of Liu Yan’s test also looked at Lei Jianbo with confusion. He asked, “Director, should we directly increase the coefficient of the virtual opponent to fight Liu Yan, or adjust it when it’s time?”

When Lei Jianbo heard this, he was also at a loss for a moment.

Liu Yan’s situation had not appeared so far, so he did not know what to choose for the time being.

Under normal circumstances, even if the freshmen were stronger, they would be able to deal with a 1.5-times-stronger virtual opponent easily. However, it was impossible to defeat the virtual opponent. After all, a virtual opponent could constantly recharge its energy. If the virtual opponents constantly recovered to full health, it would be impossible to defeat them without killing them in one hit.

Therefore, they would adjust the strength of the virtual opponent two times stronger than the challenger after ten minutes. Then, the virtual opponent would continue to fight the challenger.

If the opponent could persist for twenty minutes, the virtual opponent would continue to strengthen. It would become three times stronger than the challenger.

This kind of slow adjustment was both safer and less prone to accidents. On the other hand, it was a fair price. This way, all the challengers would face the virtual opponent with the same strengthening magnitude and strengthening interval. It would become a fair competition for challengers with different strengths.

However, Liu Yan broke this situation.

Now, there were only two choices in front of Lei Jianbo. Either he could make an exception and increase the strength of the virtual opponent to let Liu Yan continue fighting, or he could wait for Liu Yan to wait for ten minutes. Then, he could create a 2-times-stronger virtual opponent to fight against Liu Yan.

However, after thinking for a moment, Lei Jianbo had an idea, he said, "Increase the strength of virtual opponent. Liu Yan is the number one genius of this batch of freshmen. How long he could last in the battle is no longer relevant. We have already seen his talent and strength. Now, let's see just what his limit is!"

The staff understood what he meant and immediately went back to operating.

Meanwhile, Lei Jianbo and a few vice presidents came to the front of Liu Yan's test equipment. They watched and waited. They wanted to see how Liu Yan's final test result would be.

"I have a feeling that Liu Yan can also defeat the 2-times-stronger virtual opponent." Lei Jianbo said with a bitter smile.

Shi Tian grinned and said, "I think he could defeat the 3-times-stronger opponent. Let's witness a miracle together!"

The vice principal of the Logistics School, Yu Zhitong, also covered her mouth and laughed. She said, "Having such a genius is a blessing for the Lighthouse Academy and the human race."

The vice principal of the Weapon School, Ling Feng, still remained cold and silent. However, he also stared at the testing device. Obviously, he was extremely curious about Liu Yan's test results.

At the same time, the new students also looked at Liu Yan's testing device with a face full of curiosity and surprise. They were waiting for Liu Yan's test results.

For a time, Liu Yan once again became the center of attention.

Chapter 134: Breakthrough During the Battle

In the square.

Everyone was looking at Liu Yan's testing device, waiting for the results of Liu Yan's test.

In the virtual space, the virtual opponent had once again condensed in front of Liu Yan and the Ice and Fire Draconic Wolf. Its aura was much stronger than before.

In the air, Liu Yan saw that the coefficient had reached 2.

The strength of the virtual opponent had increased a little, but it was obvious that it had not increased much.

Liu Yan patted the coquettish Ice and Fire Draconic Wolf and said, "Alright, let's go and fight. Remember to attack with your full strength!"

Ice and Fire Draconic Wolf recovered its senses and became serious once again.

Immediately, Ice and Fire Draconic Wolf and the virtual opponent engaged in a battle.

Terrifying fire and frost elements raged. At the same time, Ice and Fire Draconic Wolf and the virtual opponent engaged in close combat.

Other than its ice and fire elemental abilities becoming stronger, Ice and Fire Draconic Wolf was also superb in close combat.

After it had finished devouring the Ancient Draconic Croc and evolved to SS-grade, Ice and Fire Draconic Wolf's abilities in all aspects had increased by a large margin.

Now, Ice and Fire Draconic Wolf was not as relaxed as before. However, after fighting for a while, it still managed to insta-kill its virtual opponent.

In less than two minutes, another virtual opponent condensed in the quiet virtual space.

The virtual opponent now was 3-times-stronger than average.

The Ice and Fire Draconic Wolf seemed to have sensed the strength of its opponent. It became even more serious.

As for Liu Yan, he watched from the side leisurely.

For the time being, Liu Yan did not plan to lend a helping hand. He wanted to use this opportunity to properly check the Ice and Fire Draconic Wolf's maximum combat strength.

If Ice and Fire Draconic Wolf was no longer a match for the virtual opponent, Liu Yan would recall Ice and Fire Draconic Wolf and test his maximum combat strength.

The virtual space became intense once again.

This time, the virtual opponent's strength increased a lot.

Even if Ice and Fire Draconic Wolf attacked with all its strength, it would not be able to kill the opponent instantly.

However, Ice and Fire Draconic Wolf's combat strength was still stronger than the 3-times-stronger virtual opponent. It had been suppressing the opponent.

However, the virtual opponent had the origin energy core that was constantly replenishing its health.

As it slowly consumed its energy, Ice and Fire Draconic Wolf's combat power was also somewhat exhausted.

Seeing that Ice and Fire Draconic Wolf was truly undefeatable, Liu Yan planned to recall Ice and Fire Draconic Wolf and make his move himself.

However, at this moment, Ice and Fire Draconic Wolf let out a roar and transmitted some of its thoughts to Liu Yan.

Although Ice and Fire Draconic Wolf could not speak, it was telepathically connected with Liu Yan. It could roughly convey its thoughts to Liu Yan.

Liu Yan immediately looked at Ice and Fire Draconic Wolf with some surprise. Its meaning seemed to be that it could still fight and had yet to display its full strength. It could still fight a little longer.

“Not bad, you have quite the spirit. Then you can give it a try with your full strength!” Liu Yan said with a smile and did not stop it.

He did not expect Ice and Fire Draconic Wolf to not participate in many battles to hone its character, but it already had its character.

At this time, Ice and Fire Draconic Wolf roared, and its entire body grew a little bigger. Then, it charged towards its virtual opponent.

And on the top of Ice and Fire Draconic Wolf’s head, two small dragon horns appeared.

Liu Yan was slightly surprised when he saw this. Was Ice and Fire Draconic Wolf able to activate the dragon bloodline in its body in its extreme state?

Ice and Fire Draconic Wolf had evolved after devouring the corpse of the Ancient Draconic Croc. The Ancient Draconic Croc had a trace of noble dragon bloodline in its body.

Although there was only a trace, it was still effective.

Immediately, Ice and Fire Draconic Wolf and the virtual opponent collided. The entire virtual space shook under the terrifying impact. The virtual opponent was shattered by this terrifying attack. It was instantly killed by Ice and Fire Draconic Wolf!

At this moment, the ice and Fire Dragon Wolf howled towards the sky as if it was proud of its achievements.

Liu Yan slightly nodded when he saw this. He did not expect Ice and Fire Draconic Wolf would activate a trace of the dragon bloodline in its body when it was in its peak condition. It had broken through during the battle and obtained terrifying strength.

At this point, Liu Yan understood the peak combat strength of Ice and Fire Draconic Wolf.

It could instantly kill a level 19 fighter with 3-times-stronger combat power at its full strength.

It meant Ice and Fire Draconic Wolf could defeat a level 19 fighter with five times its combat power.

After all, Ice and Fire Draconic Wolf could instantly kill this virtual opponent who could constantly replenish its origin energy. It would need to be much stronger than his opponent to do so. Thus, it could kill its opponent easier in the outside world.

For a level 20 Ice and Fire Draconic Wolf to defeat a 5-times-stronger level 19 was already quite impressive.

“Alright, Shadow Wolf, you’ve done well. Come back and rest well. Leave the rest of the battle to me!”

Liu Yan had a satisfied look on his face as he put away Ice and Fire Draconic Wolf. He waited quietly in the virtual space alone, preparing to begin his own combat strength test.

At the same time, in the outside world.

Lei Jianbo, a few vice principals, a group of staff members, and the new students were all extremely surprised when they saw the scene before them.

In the beginning, they had adjusted the coefficient of the virtual opponent to two times, but it didn’t take long for Liu Ya to instantly kill his opponent again.

Lei Jianbo then gave the order to continue increasing the strength of the virtual opponent to three times stronger than average.

The rest of the new students needed to hold on for twenty minutes before the strength of the virtual opponent was increased to three times stronger than average. On the other hand, Liu Yan only needed two minutes.

Everyone waited for a while, but there was no result.

Everyone thought that this was almost the limit of Liu Yan’s strength and that there was no longer a need to increase the virtual opponent’s strength. They only needed to wait to see how long Liu Yan could hold on.

However, 3-times-stronger virtual opponent was instantly killed again.

For a moment, everyone was shocked. What kind of strength did Liu Yan have to be able to do this?

“D*mn, he is too powerful!”

“To instantly kill a 3-times-stronger virtual opponent of the same level, he is simply a monster!”

“I can’t even beat a 1.5-times-stronger virtual opponent, yet he directly killed 3-times-stronger virtual opponent.”

“What’s even more desperate is that Liu Yan’s level is definitely higher than ours. The virtual opponent he is facing is way stronger than the virtual opponent we are facing!”

“...”

At this moment, the staff member looked at Lei Jianbo with puzzlement and asked if he wanted to continue increasing the coefficient.

Lei Jianbo did not hesitate much and asked the staff member to continue increasing the coefficient.

“This should be Liu Yan’s limit, right? Just now, he fought for a while before he could defeat 3-times-stronger virtual opponent. Four times stronger must be his limit!” Lei Jianbo said with certainty.

As for the danger, Lei Jianbo was not very worried. When every challenger entered the challenge, they could immediately escape and come out safely if they chose to give up. There would be no danger.

After all, the virtual opponent was far stronger than an average challenger. They had to ensure students' safety.

When the staff received the order, they immediately adjusted the coefficient of the strength of the virtual opponent.

Chapter 135: One Person Affected the Power Supply of the Platform

In the virtual space.

Liu Yan stood quietly by himself, thinking about his current battle skill and battle style.

After that, Liu Yan had a ranking for his various battle styles.

Firstly, the weakest was his close combat ability which relied on his fist skills.

Then, the slightly stronger one was Liu Yan's long-range elemental attack ability.

Next, it was the explosive close combat ability, which required the S-grade Weapon, Blade of The Night.

Then, it was the long-range attack of the S-grade weapon, Flying Cloud Mystic Bow.

Lastly, the strongest one was the Elemental Fusion ability of the Flying Cloud Mystic Bow, and the S-grade skill, Dragonification.

As for the Elemental Fusion and Dragonification, Liu Yan wasn't sure which one was stronger.

The S-grade skill Dragonification was the first S-grade combat skill that Liu Yan possessed. Its power was extraordinary, but Liu Yan had not used it yet. Liu Yan himself didn't know how terrifying it was.

Other than that, there was another S-grade skill, which was Sonic Speed. Sixteenfold Sonic Speed was already extremely terrifying, far surpassing his level.

In other words, even if the virtual opponent's strength was stronger than his, and Liu Yan couldn't beat him in a battle, he could still use Sonic Speed to dodge and delay for a long time.

It was too easy for Liu Yan to obtain a good result. It all depended on whether Liu Yan wanted a good result or not.

After thinking about all aspects of his combat power, Liu Yan was a little surprised. He did not expect he had accumulated so many combat methods up until now.

The combat power of each combat method could not be underestimated.

Right at this moment, another figure condensed in front of Liu Yan. It was a new virtual opponent.

Looking at the void, the displayed coefficient was 4, which meant 4 times the combat power.

However, Liu Yan was fearless. He opened the thin blade of the A-grade weapon, soft blade boxing gloves. He then activated the A-grade skill, Power of Desolation, obtaining a terrifying ten times increase in strength.

He also activated the A-grade skill, Blazing Tyrant Fist, and the A-grade skill, Flame Control.

Terrifying fire elements raged around Liu Yan's body. With the powerful support of the fire element, the power of the Blazing Tyrant Fist received a terrifying amplification.

It was the full power of Liu Yan's Blazing Tyrant Fist.

He then threw his punch. Even though the virtual opponent had already used a shield in time to block, it was still shattered by Liu Yan's punch. The virtual opponent was instantly killed again.

The power of this punch was too terrifying.

Even though the close combat ability of his fist technique was currently Liu Yan's weakest fighting style, it was only relative to Liu Yan himself. Compared to the others, his fighting strength was still extremely powerful.

The reason why Liu Yan directly used his fist technique was that he wanted to be able to instantly kill the virtual opponent in one hit. He didn't want to drag things out.

After all, there was still a long way to go before Liu Yan's test. There were still many virtual opponents. Liu Yan did not want to waste too much energy and stamina in front of him. It was best to end the battle as soon as possible.

At this moment, outside of the virtual space.

Lei Jianbo and the others saw that they had just adjusted the coefficient to 4, but the news of being defeated by Liu Yan came instantly. They were all shocked.

Ling Feng, who had always been calm, could not help but analyze, "This kid was hiding his strength before. Now, he is testing his maximum combat strength bit by bit."

Ling Feng exposed the truth. The others immediately understood why this situation had occurred.

When they had fought against Liu Yan, it was not that Liu Yan could not do it, but that Liu Yan was conserving his strength and testing his combat strength.

"What an interesting little monster." Shi Tian smiled and said, his eyes filled with envy.

Shi Tian had always pursued top-tier combat strength. Even though he had gone far and achieved great heights, he could already be considered an absolute genius.

However, he was nothing in front of a monster like Liu Yan. He was not good enough.

Lei Jianbo was also surprised and said, "Interesting, interesting. Then today, we will fight to the end. I want to see just how much of a monster Liu Yan can be. Come, continue to increase the coefficient!"

Following Lei Jianbo's command, the coefficient increased once again.

In the virtual space.

Liu Yan saw that his virtual opponent had once again condensed in front of him. The coefficient had also reached five, forcing him to directly launch his strongest elemental attack.

Three A-grade skills and three types of elemental power continuously wreaked havoc in the small virtual space.

Terrifying fire elements, frost elements, and lightning elements continuously attacked the virtual opponent.

Under the continuous bombardment of the terrifying elemental power, the 5-times-stronger virtual opponent was instantly defeated.

After defeating the virtual opponent for a short while, another virtual opponent with a coefficient of six condensed in front of Liu Yan.

Liu Yan took out the S-grade weapon, Blade of the Night, from his storage ring.

Liu Yan activated A-grade skill, Shadow Cloak, and he instantly entered stealth mode.

At the same time, the A-grade skill, Power of Desolation, was activated, and his strength increased tenfold.

The virtual opponent noticed Liu Yan's aura, and it attacked Liu Yan.

Liu Yan immediately activated Backstab. With a flash, he appeared behind his virtual opponent. He stabbed the virtual opponent and killed it.

Then, 7-times-stronger virtual opponent was condensed.

Liu Yan put away his Blade of Night and took out his newly obtained S-grade weapon, the Flying Cloud Mystic Bow.

Activating his A-grade skill, Power of Desolation, he immediately shot an arrow. The arrow killed the virtual opponent once more.

At this point, Liu Yan realized that his combat strength had already exceeded the limit. There was no need for him to change his attack style. The virtual opponent behind him also used the Flying Cloud Mystic Bow to launch long-range attacks, testing its maximum combat strength.

At this moment, outside the virtual space.

Lei Jianbo, a few vice principals, the staff, and the new students were dumbfounded. The virtual opponents kept getting stronger, yet they were continuously defeated by Liu Yan. At this moment, everyone was already beginning to doubt their lives.

In the past, it would be impressive if the new students could defeat a virtual opponent with a coefficient of 1.5. If they increased the coefficient, those geniuses would immediately fall.

However, this move was completely useless when it came to Liu Yan. They continued to increase the strength of virtual opponents, but they were not a match for Liu Yan at all.

He had defeated 7-times-stronger and 8-times-stronger virtual opponents.

It wasn't until he reached a coefficient of 9 that he finally stopped.

However, at this moment, under such a huge amount of power output, the power of the arena had already begun to fluctuate violently. The lights were also flickering.

The origin power core not only had to supply the energy of the virtual opponent but also had to supply power to the entire city and the operation of the entire platform.

There had never been such a problem before. After all, the coefficient was not very high, and the amount of energy needed was not much, so there was no problem.

However, this time, the coefficient had reached nine times, and it was still nine times higher than Liu Yan's high level, so the output of energy was naturally extremely high.

The energy consumption in the virtual space increased. It meant the power supply outside became unstable. Naturally, the lighting system would flicker.

When Lei Jianbo and the others saw this, they were all shocked.

Since the third test was set up, this was the first time that the voltage became unstable because of the power supply of the virtual opponent!

Chapter 136: Overload

Lei Jianbo and the other vice principals looked at the flickering stadium, not knowing what to say for a moment.

"It's fine. It's still barely holding on. That monster Liu Yan is almost at his limit." Ye He said with a smile.

However, just as he finished his sentence, they heard the news that Liu Yan had once again defeated the virtual opponent.

Even the 9-times-stronger virtual opponent could not stop him.

For a moment, Lei Jianbo and the other vice principals looked at each other. They were speechless for a long time and didn't know what to do.

When the surrounding freshmen saw this, they were completely shocked.

"Holy sh*t! He defeated the 9-times stronger virtual opponent. How is that possible?"

"This Liu Yan is a huge monster!"

"He made the power supply of the entire platform unstable, but he still hasn't reached his limit!"

"This is too exaggerated!"

"..."

At this moment, Lei Jianbo and the others didn't know what to do. The energy supply of the entire platform was already unstable, but they still couldn't test Liu Yan's limit.

Should they end the test now, or continue to increase the coefficient of the virtual opponent's strength?

Lei Jianbo and the others discussed among themselves.

At this moment, a figure silently arrived. It was a pale-haired old man.

Unlike Lei Jianbo and the others, the aura on his body was more powerful. It was obvious that he was more powerful.

However, the old man didn't have the slightest aura fluctuation. Not to mention Lei Jianbo and the few vice principals, he was even inferior to the freshmen.

It was as if the old man didn't have any cultivation at all and was just an ordinary person.

After the old man arrived, he smiled and said faintly, "It's fine. Try to increase it to 10 times stronger than average!"

Lei Jianbo and the others turned around when they heard this. When they saw the old man's face, they immediately became extremely respectful.

"Welcome, Principal!"

"Welcome, Principal!"

"..."

Lei Jianbo and the others showed incomparable respect.

When the new students saw this, they were all curious. Lei Jianbo and the others were the leading figures of Lighthouse Academy. They actually showed such respect to this old man and even called him principal. Could it be that he was the Lighthouse Academy's principal?

At this moment, Lei Jianbo also looked at the new students and introduced, "Everyone, the person in front of you is the principal of our Lighthouse Academy's upper house, Zhong Yuntian!"

Lei Jianbo and the others were extremely respectful towards the principal. Moreover, it was not the kind of respect of the employees, but the respect from the bottom of their hearts.

Zhong Yuntian's position in their hearts was extremely important.

At this moment, when Lei Jianbo heard the principal's words, he said a little worriedly, "Principal, the power supply is already unstable now. If we continue to increase the coefficient, will it..."

Principal Zhong Yuntian waved his hand and said with a smile, "It's fine. Let's give it a try. It's rare to have such a talented genius. We have to let him test his own limit."

When Lei Jianbo and the others heard this, they understood what the principal meant and immediately gave the order.

And the coefficient of the virtual opponent increased again, reaching a terrifying ten times!

...

In the virtual space.

Liu Yan had just finished off the 9-times-stronger virtual opponent.

This time, Liu Yan was already having some trouble.

Using the Flying Cloud Mystic Bow's full strength, with multiple stacked skills and full firepower, Liu Yan finally killed the 9-times-stronger virtual opponent.

Liu Yan understood that if he continued, he would have to use a more powerful attack method.

At present, he had already tested the method of using the Flying Cloud Mystic Bow.

Using his full strength, he instantly killed a virtual opponent with a coefficient of nin. It was already a stunning result.

One had to understand that this was an instant kill. In a normal battle, Liu Yan estimated that with his strength, it should not be a big problem for him to deal with an opponent with a strength of over ten times the same level.

And at present, Liu Yan only had two trump cards left.

One was to use the Flying Cloud Mystic Bow's God's Skill to fuse the elements.

It was said that different elemental energies were repelling each other, making it extremely difficult for them to coexist.

However, as long as they were able to fuse, they would be able to erupt with extremely horrifying strength.

Currently, Liu Yan had four types of elemental energies. They were A-grade Flame control, A-grade Frost Control, A-grade Electrification, and C-grade Wind Control.

If the two types of elemental energy were fused, Liu Yan's offensive ability would be greatly improved. He would obtain a qualitative improvement, not to mention the fusion of the four types of elemental energy.

Other than that, there were also two S-grade skills that he had not used, Dragonification and Sonic Speed.

Liu Yan could not help but look forward to it. It had been a long time since he had used his full strength. This was a rare opportunity.

After waiting for a while, just as Liu Yan was surprised that the outside world would not continue to increase the coefficient of the virtual opponent, another virtual opponent appeared in front of Liu Yan.

In the air, the number 10 indicated that this virtual opponent's combat ability had reached 10 times the combat ability of a level 19 excellent awakened.

A 10-times-stronger virtual opponent was not as simple as ten level 19 awakened ones. It was much stronger. The difference was huge.

Liu Yan once again raised the Flying Cloud Mystic Bow and used its God's Skill, Elemental Fusion!

It was his first time using this God's Skill, Liu Yan chose to use Electrification and Wind Control just to be safe. He combined the lightning element and wind element.

These two attributes were relatively easier to control, and they were not repelling each other.

If he were to directly fuse the fire element and frost element, which were two opposing elements, Liu Yan was worried that something wrong would happen.

A-grade skill Electrification, and C-grade skill Wind Control, were activated at the same time.

Lightning and wind elements gathered, condensing into bolts of lightning and gusts of whirlwind.

Following that, Liu Yan used the Elemental Fusion of the Flying Cloud Mystic Bow to fuse them.

The two elements that Liu Yan could not fuse previously were miraculously fused successfully on the Flying Cloud Mystic Bow.

Because of the Flying Cloud Mystic Bow, the two elements were much more obedient and temporarily fused together.

The lightning element and wind element condensed into a fusion elemental arrow.

The purple energy mixed with green energy looked extremely gorgeous.

And Liu Yan could feel its enormous power.

Liu Yan was secretly surprised. Was this the power of Elemental Fusion?

Liu Yan had yet to shoot this arrow, but he knew that this elemental fusion arrow was already more powerful than his previous stacked skills and full power arrow.

Following that, Liu Yan shot this terrifying arrow.

However, right after he shot the arrow, the entire virtual space shattered. The virtual opponent disappeared, leaving nothing in front of Liu Yan. So, he missed the shoot.

Liu Yan was slightly surprised. This virtual opponent was extremely powerful. From the beginning until now, no matter what the coefficient was, it could not dodge his attack. He had to face it head-on.

But soon, Liu Yan realized that something was wrong.

The entire virtual space was unstable. It was as if the origin power core did not provide enough energy, causing the entire virtual space to be unstable.

When Liu Yan's terrifying arrow shot out, the energy supply was greatly affected. The energy supply was cut off, and the virtual opponent directly disappeared.

A thought suddenly emerged in Liu Yan's mind. Could it be that this virtual space couldn't hold the 10-times-stronger virtual opponent and his terrifying arrow at the same time?

Chapter 137: Fighting Over Liu Yan

On the square.

Principal Zhong Yuntian, Lei Jianbo, a few vice principals, a group of staff, and freshmen.

Just as they were waiting for Liu Yan's result of challenging a virtual opponent with a coefficient of ten, the lights suddenly flickered.

Immediately, with a “boom”, the surroundings were pitch black.

At this moment, the entire upper house had fallen into darkness.

The origin power core’s power supply to the light suddenly stopped.

Everyone was shocked. They did not understand what had happened and were discussing it in panic.

“What’s going on? Why did the power suddenly go out?”

“Didn’t they say that the light source is powered by the origin power core and will never go out?”

“Is there a fierce beast attacking the city?”

“That’s impossible. This is the third-and-a-half level. It’s a space created by the seniors. Fierce beasts can not reach this place through our human’s teleportation array!”

“What’s going on?”

“...”

While everyone was discussing in panic, the light was restored once again.

After all, it was a powerful origin power core. After a short period of insufficient energy supply, it quickly recovered.

Lei Jianbo had a puzzled look on his face. He asked, “When we built this virtual opponent system, it should withstand 10 times the strength of a level 30 awakened. Although Liu Yan is very strong, he can’t be level 30!”

Principal Zhong Yuntian’s expression changed slightly at this moment. He didn’t understand how it happened.

Logically speaking, a factor of 10 should be a huge load to the origin power core, but it was still manageable. It should not cause a blackout.

The few vice principals also had puzzled expressions as they discussed and guessed, but they couldn’t come up with a conclusion.

At this moment, in the virtual space, after that terrifying arrow disappeared, the virtual space gradually stabilized.

The 10-times-stronger virtual opponent condensed once again.

Liu Yan frowned slightly. The power of Elemental Fusion was enough to defeat this 10-times-stronger virtual opponent.

Liu Yan hadn’t even fully displayed his full strength yet.

Only the easiest two of the four elements had been fused.

The power of elemental fusion had yet to be truly displayed.

Apart from that, Liu Yan still had two S-grade skills, Dragonification and Sonic Speed, which he hadn't used yet.

However, Liu Yan could roughly guess that it was because the power of the fusion of elements was too terrifying, and the virtual space could no longer bear it.

After thinking about it carefully, Liu Yan also understood.

This virtual space was a temporary space that was not too stable. The power of the fusion of elements was enormous. It caused a huge burden on the virtual space. So, it was no surprise that the virtual space was overloaded.

Liu Yan was slightly disappointed. Although he had already tested many, he had not used his two strongest attack methods. He still had not reached his limit yet.

This virtual space was already unable to withstand his terrifying attacks.

Sighing, Liu Yan chose to give up and leave the virtual space.

But even though he had not tested it, Liu Yan had a rough idea in his heart.

The fusion power of the lightning element and the wind element was enough to instantly kill a virtual opponent with a coefficient of 10.

If the fire element and the frost element were fused, or even the fusion of four elements, Liu Yan estimated that it would be no problem to instantly kill a virtual opponent with a coefficient of 12, or even higher.

Moreover, he had not used his Dragonification skill yet.

Even if Liu Yan was losing, he could still use Sonic Speed to dodge the attacks and stall for time. With Liu Yan's current mental strength, using Sonic Speed to stall for an hour would probably not be a problem.

However, this test only had one result, and it did not affect Liu Yan that much. There was not much difference, so Liu Yan naturally could not be bothered to pursue a good result.

Liu Yan's figure walked out of the teleportation array.

And Liu Yan's third test had finally ended here.

The gazes of the entire crowd instantly focused on Liu Yan. This was simply a monster.

The crowd looked at Liu Yan's third test result.

It was 28 minutes. He even had defeated a 9-times-stronger virtual opponent!

Although it was only a few minutes more than Murong Xue, the difference between the two of them was like heaven and earth.

After all, Murong Xue would only face a virtual opponent with a coefficient of three in the end, while Liu Yan would face a terrifying opponent with a coefficient of ten.

When the crowd saw Liu Yan, they all went crazy.

“Liu Yan!”

“Liu Yan!”

“...”

The new students kept shouting Liu Yan’s name, feeling excited and proud of Liu Yan.

Although this was Liu Yan’s test result and not theirs, they were all human beings. Seeing such a heaven-defying powerhouse among human beings, they were all very excited.

At this moment, the four vice principals came in front of Liu Yan one after another. One of them was the arrogant vice principal of the Weapon School, Ling Feng.

Shi Tian still took the lead and came in front of Liu Yan, with a smile on his face, he said, “Liu Yan, come to our Combat School. I will teach you everything I have learned in my life. Let’s pursue the pinnacle of martial arts together. How about it? If you come, you can choose any of the combat techniques in the Combat School!”

Ye He, who had always been more refined, did not care about his old body at this moment. He squeezed forward and said, “Liu Yan, don’t listen to him. Your strength is already so strong. There is no need for you to spend all your effort to raise your strength. Why don’t you come to Our Command School? We will train you to be the next leader of the Academy. In the future, you might even have the chance to become a leader of mankind!”

Yu Zhitong also had a smile on her face. She said, “Liu Yan, the Logistics School has everything you want. If you come, we’ll give you whatever you want. We’ll definitely satisfy you! Our Logistics School is extremely rich. Do you want a house? We’ll give you a house, cars or money!

At this moment, Ling Feng even said, “Only the pinnacle of weapons can bring earth-shattering strength to the human race. If you are willing to come to our Weapon School, you can name any conditions you want. You can take all kinds of high-grade equipment and weapons. I’ll satisfy your needs!”

The many new students below looked at the scene in front of them with astonished expressions.

This scene was truly too mind-blowing. The four vice principals of the Lighthouse Academy were disregarding their image and trying to recruit Liu Yan crazily. They kept offering all kinds of conditions. Each of them was simply better than the other.

However, the many new students had already witnessed Liu Yan’s impeccable talent and felt that this scene in front of them could be considered reasonable.

Such a monstrous genius was worthy of the four vice principals fighting over him.

All of this, Liu Yan was undoubtedly worthy!

At this moment, the many new students could only be envious. They begged to enter the four great schools. However, the vice principals of the four great academies were begging Liu Yan to join their respective schools. The difference between them was huge. It was simply like heaven and earth.

Liu Yan looked at the four crazy vice principals in front of him and was slightly shocked. He didn't expect this scene to happen.

Liu Yan immediately laughed in his heart. These four did not know that he still had not reached his maximum combat strength in the virtual space.

If the virtual space could withstand his power and he used his maximum combat strength, the results of his third test would be even more shocking.

At that time, would the four vice principals be even crazier?

Chapter 138: The Principal's Arrangements

On the square.

The new students looked at the scene on the stage in shock.

The four esteemed vice presidents were currently fighting over the genius Liu Yan, regardless of their reputations and images.

Shi Tian saw that the other three vice-presidents were also competing for Liu Yan, and they even offered extremely generous conditions.

Shi Tian immediately shouted with some dissatisfaction, "What are the three of you fighting for? He could fully explore the potential of his martial art by going to my Combat Technique School. It will be a waste of talent if he goes to your schools, okay? Combat Technique School is the best choice for him."

Ye He, who had always disliked quarreling, did not want to back down this time. He said snappily, "What are you saying? With Liu Yan's talent, he will definitely be a top-notch expert in the future if he was trained properly. No matter where he goes, his strength will not be inferior. Why don't you come to Our Command School? We need such a new student who can command and is also very strong. If you come to our school, you might even have the chance to become the future leader of mankind. Of course, it would be the best choice for you to come to Our Command Academy!"

When Yu Zhitong heard this, she smiled charmingly and said, "You guys don't have to argue. No matter where Liu Yan goes, he will perform well. He can go wherever he wants. Who knows, he might even want to come to our Logistics School. He will be happy to be at ease and have many beautiful women!"

Ling Feng did not pay attention to the other three vice principals. Instead, he looked at Liu Yan with a serious and expectant expression. He said, "The foundation of the Weapon School is suitable for you. You could still cultivate. Besides, we can also explore new mysterious weapons and equipment together. We could explore new peaks of weaponry. It is what we are pursuing!"

Just as the four vice principals were in a heated argument, Principal Zhong Yuntian, who had been silent all this while, laughed and said, "Alright, alright. The four of you are the esteemed vice principals. Now, you have lost your composure when you are arguing with each other. What kind of decency is this? Stop arguing. I will take care of this matter!"

Seeing that the principal had spoken, the four vice principals didn't want to argue anymore. They stopped arguing and looked at the principal.

“Principal, please judge. Such a rare cultivation genius, shouldn’t he come to our Combat Technique School?” Shi Tian looked at the principal and asked.

Ye He, who was standing at the side, did not give in at all. He continued, “Who said that Liu Yan is only a cultivation genius? He is also a rare commanding genius. Everyone saw it during the second test. Of course, he is the best fit for our Command School!”

Yu Zhitong smiled and said, “I won’t compete with you guys, but I feel that such a rare genius could choose the school according to his preferences. We can’t force him to make a decision!”

Ling Feng’s face was solemn as he said, “Principal, I have never begged anyone before, and I have never snatched any genius freshmen before. But this time, I want this Liu Yan for sure!”

The four vice principals did not back down. All of them wanted to take Liu Yan in.

Principal Zhong Yuntian could not help but laugh when he saw this.

If it were any other time, he would have been in a difficult position when faced with this scene.

The four vice principals had made great contributions to the Lighthouse Academy. It was not good to reject any of their requests, and it was not good to offend them.

But this time, Zhong Yuntian had already made plans regarding Liu Yan’s whereabouts, so he naturally would not make things difficult for him.

“Alright, alright!”

Zhong Yuntian acted like a good person. He waved his hand and said, “Vice principals, don’t argue anymore. We have decided on this matter. We will give the four of you a satisfactory answer. What say you?”

The four vice principals heard this and didn’t speak anymore. But at the same time, they were a little puzzled. They all wanted Liu Yan, so how could the principal give them a satisfactory answer?

No matter which school Liu Yan went to, the vice-principals of the other three schools would be extremely jealous.

Principal Zhong Yuntian came before Liu Yan at this time

Zhong Yuntian didn’t have the airs of a principal at all. He was like a kind and friendly old grandpa.

Liu Yan couldn’t feel any aura from him, as if he didn’t have any strength at all. Liu Yan even suspected that this Principal Zhong Yuntian didn’t have any cultivation, and was just an ordinary person. Perhaps his management ability or other outstanding abilities made him the principal.

While Liu Yan was sizing up Zhong Yuntian, Zhong Yuntian was also sizing up Liu Yan.

After sizing Liu Yan up, Zhong Yuntian nodded slightly, his face full of admiration.

“Not bad, not bad. Your talent was quite strong despite your young age. You don’t have the slightest bit of arrogance. You have a mature mindset!” Zhong Yuntian praised.

When the four vice principals behind saw this, they immediately had a bad feeling.

At this time, Zhong Yuntian looked at Liu Yan and said with a smile, "As a specially recruited student, you enter our academy. In the future, you will be personally trained by me. How about it?"

When the surrounding freshmen heard this, they were all incomparably shocked. He could receive personal training from the principal?

The Lighthouse Academy's principal had always been mysterious. Many freshmen knew very little about him. They only heard that he was an extremely powerful existence. He was an idol-level existence among the higher-ups in Lighthouse Academy.

To be personally trained by the principal was undoubtedly the best choice. The new students were very jealous.

However, when they turned their heads and thought about Liu Yan's heaven-defying strength, it seemed completely reasonable.

With such a monstrous talent, it wouldn't be an exaggeration to say that he would receive any special treatment.

The expressions of the four vice-principals behind them were quite unsightly. The four of them finally understood the meaning behind the principal's words just now.

So the so-called "satisfying" meant that the principal wouldn't give Liu Yan to any of them.

Although they respected the principal, the four vice-principals weren't willing to back down on such a crucial matter.

"Principal, this... isn't an ideal arrangement, right?" Shi Tian said with an awkward expression.

Although the other three vice principals didn't dare to say anything, they all looked at principal Zhong Yuntian with eager eyes. Their intentions couldn't be any clearer.

Zhong Yuntian looked at the four vice principals. He smiled and said, "Don't worry. I don't mean that I'm the only one training Liu Yan. I know the strength of the four of you. I plan to let Liu Yan go to your four schools for the first four days of a week. He will then come to my place for the next three days for special training."

"Of course, Liu Yan will also be more tired this way." Principal Zhong Yuntian looked at Liu Yan again. With a slightly serious expression, he said, "However, who asked you to be such a monstrous genius? "Since you are a genius that only appears once in a hundred years, you naturally have to undergo all-rounder-focused training. This is our responsibility as the principal and vice principals of Lighthouse Academy to you! Although you will be more tired, who asked you to be a genius? You need to constantly improve in all aspects."

The four vice principals finally understood what the principal meant. They looked at each other. Although they wished that Liu Yan could enter their respective schools, it was not realistic.

The current arrangement was undoubtedly more reasonable. The four vice principals could focus on Liu Yan's cultivation.

Other than that, it was the principal's personal cultivation of Liu Yan.

The four vice principals looked at it and nodded in agreement.

Seeing this, Liu Yan also felt that it was not bad.

Just now, Liu Yan was also hesitating about which school to join. Each of the four schools had its advantages, and it was beneficial to him.

The principal's arrangement was undoubtedly the best. Liu Yan could go to all four schools, and then he could also go to the principal's place.

It looked like it was more tiring, but he could get the benefits from the four schools and the principal. Liu Yan was satisfied with the principal's arrangement.

"Of course. Then I would like to thank the principal and the four vice principals for your nurturing and care!" Liu Yan bowed slightly and said gratefully.

Chapter 139: Greetings

Principal Zhong Yuntian nodded slightly in satisfaction when he saw Liu Yan being so humble.

As the principal of the upper house of Lighthouse Academy, Zhong Yuntian had seen countless geniuses.

However, the proportion of geniuses who could truly become an expert was very small.

It was because the Tower was too dangerous. Those arrogant geniuses always underestimated their enemies.

Liu Yan was able to have such incredible talent, but he was humble. Zhong Yuntian couldn't help but look forward to the growth of Liu Yan.

If he was properly nurtured, the growth of such a monstrous genius would be a blessing for the entire human race.

"Not bad, the new student director Lei Jianbo will arrange for you to complete the relevant paperwork. See you next time."

Principal Zhong Yuntian said and then left.

The important and scary new student test ended here.

Some people were happy while others were worried. In the new student tests, nearly half of the new students were eliminated and kicked out of Lighthouse Academy.

Most of the remaining new students performed average in the third test.

They could only enjoy the basic resources and equipment of Lighthouse Academy to cultivate.

A small number of new students had good results and received a certain amount of attention. They were directly invited to join the various schools.

A small number of new students would undoubtedly have a chance to become an expert in the future.

The other new students might have a chance, but it would undoubtedly be much more difficult and even require a lot of luck. One couldn't become an expert just by relying on hard work.

After Lei Jianbo arranged for some follow-up matters, he handed the rest of the job to the staff members.

Lei Jianbo and the four vice principals left one after another.

In this new student test, Liu Yan was undoubtedly the biggest winner. He showed off his brilliance and talents in the new student test.

He got a full mark on the first test, and he even set a new record on the second test.

The third test was even more ridiculous. He could even fight against the 10-times-stronger virtual opponent. He was now known as a once-in-a-century genius.

What everyone didn't know was that Liu Yan hadn't even used his full strength yet.

If the virtual space couldn't withstand his tremendous power, Liu Yan could have used his last two trump cards to last even longer. His test result would have been even more ridiculous.

At this moment, Liu Yan had already gathered with the three girls. They were preparing to head to the dormitory.

The dormitory had already been distributed. Although most of them were from different schools, they shared the same dormitories.

At this moment, many of the surrounding freshmen saw that the freshmen test had already ended, so they all gathered in front of Liu Yan, wanting to get close to him and curry favor with him.

If they could get closer to him, it would be of great benefit to them in the future.

However, Liu Yan couldn't be bothered with them. There were simply too many new students, so it was too much of a waste of time to deal with them one by one. Liu Yan didn't have that much time to waste.

After all, compared to the other new students, Liu Yan's cultivation task could be said to be even more arduous.

The other new students only needed to cultivate in the same school and cultivate in their respective fields.

As for Liu Yan, not only did he have to cultivate in the four schools, but he also had to go to the principal's place to receive the principal's special training. It could be said to be a heavy task.

Perhaps this was the trouble of geniuses.

Following that, Liu Yan brought the three girls and quickly left.

When the many freshmen saw this, they felt a little regretful, but they didn't dare to stop him.

The current Liu Yan wasn't an existence that they could afford to offend.

If they pissed Liu Yan off, the four vice principals wouldn't let them off easily, let alone the even more scary principal.

It was already late at night.

Liu Yan and the three girls ate some food and went back to their dorms to rest.

After all, they still had things to do tomorrow, and they needed to report to their respective schools.

When there was time later, they would have a nice gathering to relax.

All the students who were valued had their own single dorms, and naturally, Liu Yan was the same.

The single dormitory wasn't big, but it was still relatively clean, and it was completed with all sorts of facilities.

Liu Yan ate some simple food, took a shower, and went to bed to rest.

In today's third test, Liu Yan had used all sorts of combat methods to defeat several virtual opponents. He was already extremely exhausted.

Fighting against many virtual opponents was even more exhausting than the battle with the Ancient Draconic Croc. Liu Yan was really tired, so he quickly rested.

...

The next morning.

Liu Yan slept in and had a good rest. Then, he left the dormitory and headed to the school.

For the first four days of every week, Liu Yan needed to go to four different schools. Yesterday, Lei Jianbo and a few vice principals had also discussed the order with Liu Yan. This way, it would be convenient for the vice principals to make arrangements in advance.

And on the first day, he was going to the Command School.

Liu Yan opened his smart wristband and searched for the Command School's location.

The Lighthouse Academy was quite big, just like a small city. It would naturally be a waste of time to walk.

Liu Yan spent some federal coins and got on the origin power car.

"Head to the Command Academy." After getting into the car, Liu Yan said lightly.

Then, the origin power car set off.

Liu Yan also looked at the interior of the origin power car. The overall structure was relatively simple. After all, it used the origin power to operate, and many parts were missing from the interior.

In addition, the car drove smoothly and quietly. It was undoubtedly more comfortable.

The speed was not slow either. It could reach 100 km/h.

However, this kind of speed was nothing to Liu Yan.

Liu Yan, who possessed an S-grade skill, could already reach a terrifying Sixteenfold Sonic Speed when he used his full strength. His speed was far faster than the speed of the origin power car.

However, using the Sonic Speed was also quite tiring. He couldn't use it for a long time, so Liu Yan couldn't use Sonic Speed to travel all the time. It was still more convenient to use the origin power car.

Very soon, the car stopped at the Command School, and Liu Yan got off.

After bypassing the statue in front of the Command School, Liu Yan stepped into it. It was an academy-style building. It seemed that the Command School didn't have many students, so the entire command academy wasn't very big. It was about the same size as the lower house of the Lighthouse Academy, which was on the second and a half level.

Soon, Liu Yan arrived at the vice principal's office and saw the vice principal of the Command Academy, Ye He.

"Vice Principal Ye, greetings." Liu Yan knocked on the door and greeted him.

Ye He, who was reading the documents, raised his head and saw Liu Yan. He immediately stood up with a face full of joy and said politely, "Liu Yan, you're here. Come in, come in, come in. Sit here."

Liu Yan was a little flattered as he entered and sat down. Was this the treatment of a genius? It was too comfortable.

The other party was the vice dean. He was just a student after all, yet Ye He was so polite to him.

Liu Yan had just sat down when Ye He asked with concern, "How's the dormitory? How do you come here? Is the traffic alright?"

"The dormitory is not bad. It's quite convenient to come in an origin power car." Liu Yan nodded slightly.

Ye He immediately said with disdain, "This Lei Jianbo is really something. Why didn't he arrange it properly for you? Forget it, I'll arrange it for you. I'll give you a luxury car and a villa first. You stay there for now. If you want, you can change to a better one."

As he spoke, Ye He generously threw the two chip cards in front of Liu Yan.

Chapter 140: Rich and Overbearing

Liu Yan looked at the two chip cards in front of him and was slightly stunned.

In the upper house of Lighthouse Academy, the origin power technology was relatively advanced, so the keys had developed into more convenient chip cards.

These two chip cards in front of him were the keys.

Giving away a villa and a luxury car? So Good?

"Vice Principal Ye, are you serious?" Liu Yan said awkwardly.

Last night, Liu Yan also took a look. Should he change to a better place and get a car? That way, it would be more convenient to travel inside the upper house of Lighthouse Academy.

After all, Liu Yan was quite rich right now. The previous cooperation commission, as well as selling all kinds of equipment and yin and yang cards, made Liu Yan's family wealth relatively thick. He already had close to one billion federal dollars.

But after looking at the price, Liu Yan gave up.

It was because origin power technology was super-advanced here. Some of the things in the upper house of Lighthouse Academy were far more expensive than in the outside world.

In the outside world, tens of millions of federation coins might be enough to build a relatively ordinary villa. A few million was enough to buy a nice car.

But in Lighthouse Academy, the price had soared ten times.

Liu Yan could barely afford the pensive price. However, Liu Yan's federation coins had other uses besides living. The various aspects of cultivation required a lot of funds, so Liu Yan naturally couldn't bear to spend the money.

However, Liu Yan didn't expect that on the first day he came to the Command School, the vice principal of the Command Academy, Ye He, would directly give him a villa and a luxury car.

When Ye He heard this, he smiled indifferently and said, "This is nothing. Just accept it. This is also the basic treatment of our Command School. As long as you join the Command School, you will be given a house and a car. Your talent is more valuable, so you could receive better treatment. This is the condition of our Command School. There's nothing we can do about it."

Liu Yan was slightly stunned, but he understood.

The Command School was different from the other three schools. They had fewer students. It seemed that there were less than five freshmen in the new batch.

In addition, the Command School was also relatively rich. After all, they were all intelligent talents, and they had a lot of resources in various aspects. It would be quite easy for them to get some money.

In this way, the Command School was undoubtedly more extravagant.

When the ordinary students of the Combat Technique School were still living in the six-person dormitory, the Command School would give students houses and cars upon admission. The difference between the two was extremely large.

At this moment, Liu Yan naturally did not decline anymore.

"Then, thank you, Vice Principal Ye." Liu Yan said as he accepted the two chip cards.

At the same time, Liu Yan also noticed the notification on his wristband. It showed that a villa and a luxury car had been paid into his account. The information about the villa and the luxury car could be found on it.

Originally, he had planned to have a gathering with the three ladies tonight. It seemed that there was no need to think about the place now. He could have a gathering at the new villa. It was much more convenient.

After that, Ye He immediately started to talk about serious matters with a slightly serious expression.

“Liu Yan, how much do you know about the importance of commanding a team in battle?” Ye He asked.

Liu Yan thought carefully, but his expression was a little confused as he said, “I only know how to arrange the teammates to the position that they are good at. I let them use their strengths to cooperate with each other and overcome their own weaknesses. I don’t know much else.”

“Previously, when we encountered a powerful fierce beast on the first three levels of the Tower, how did you command your team command when you are unable to deal with a fierce beast alone?” Ye He asked again.

Liu Yan thought about it carefully.

They had not encountered any fierce beast they couldn’t defeat alone. All of them were dealt with by Liu Yan alone. So, they had never really fought in a team before.

“It seems that we haven’t met such a situation before.” Liu Yan shook his head and said.

Hearing this, Ye He was slightly stunned, and his expression immediately became a little strange.

He originally wanted to ask Liu Yan about his team battle experience, and then discuss and analyze it. It could be considered Liu Yan’s first day of school’s basic command teaching.

But he didn’t expect that Liu Yan didn’t have any command battle experience at all.

Thinking about it carefully, Ye He also understood.

The awakened naturally couldn’t face the fierce beast alone in the first three levels of the Tower. But because Liu Yan was too strong, he hadn’t encountered such a situation.

One could only say that Liu Yan was too powerful.

This was also the first time Ye He had encountered such a situation. Liu Yan was a new student, but he had never encountered a fierce beast that he couldn’t defeat on the first three levels of the Tower. It was too exaggerated.

“Forget it, forget it. Then let’s take it slow. There are a few basic teaching books on commanding here. Go back and take a look when you have time. When you come back here next week, we will discuss it properly.” Ye He waved his hand. Then, he handed over a few books.

“Okay.” Liu Yan replied and accepted them.

“Alright, you can go back and study and cultivate. I won’t delay the cultivation of a genius like you. However, if you have any questions or needs, you can look for me anytime.” Ye He said again.

Ye He also understood that he did not need much effort to teach a genius like Liu Yan. He just had to teach Liu Yan in an efficient way. It could also save a lot of time.

At the same time, Ye He was also a little surprised. Liu Yan had not even experienced a real group battle, yet he was able to obtain the achievement of commanding. It seemed that Liu Yan’s commanding talent was very good. As long as he was nurtured, he would be a very good commanding talent.

Liu Yan said goodbye to Ye He and left.

When he came to the parking lot, Liu Yan found a luxury car he had just obtained.

It was a high-tech origin power sports car that was purple.

Liu Yan opened the door and sat down. After understanding the various functions, he was immediately filled with joy.

After all, it was a high-tech origin power sports car. Firstly, it was naturally very fast in terms of speed. It was much faster than an ordinary sports car. Secondly, it had all kinds of functions. He could even change the exterior color of the car. It was rather convenient.

Liu Yan checked the price of the luxury car and villa on the online shop page and was slightly surprised.

The name of this luxury car was Wings of the Wind. It could be considered a very high-end sports car. It even cost hundreds of millions of federation coins!

As for the price of the villa, it was even more exaggerated. It cost 800 million federation coins!

Liu Yan sighed slightly. After all, it was the Command Academy, and it was rich and overbearing. On the first day of school, they gave him a luxury car and villa. Both of them cost about one billion federation coins. Many people could never touch these two luxurious items in their lifetime. Yet here, the Command School just gave them away like they were nothing.

Today's mission was almost completed. For the rest of the day, Liu Yan only needed to read a few books.

During this time, he had been studying and cultivating at Lighthouse Academy. He could finally relax properly.

For a few months in the Tower, his nerves had been tense. Liu Yan also treasured this period of relaxation very much.

After completed the schools, he could continue to climb the Tower.

The first three levels of the Tower were basically the beginner village. The danger was not that high.

Starting from the fourth level of the Tower, it was the truly dangerous place in the Tower.
