

Towers 411

Chapter 411: Prison of Giant Trees

Outside the fire attribute territory.

Liu Yan and the others sat on their guardian beast, Undying Fire Phoenix. They headed toward the fourth wave of elite monsters.

This time, Liu Yan and the others chose to face the steel head-on.

At this moment, a group of elite monsters huddled together to defend.

Although they did not adopt a formation, they stuck together firmly. Hence, Liu Yan and the others had the slightest chance to break through them.

Liu Yan and the others naturally could not adopt the same battle plan as before. They could only fight one by one.

Liu Yan was also a little surprised. It was the first time he encountered a monster with such high intelligence. It could command the other monsters.

Relying on his SS-grade skill, Extraordinary Five Senses, Liu Yan could observe the green humanoid elite monster in the middle of the elite monster group from afar.

This elite monster was quite different from the other elite monsters. Its body size was very similar to a human, and its entire body was emerald green. It did not have any body hair and looked strange.

Liu Yan checked the information through his smart wristband.

[Green Cloud Beast]

Potential: S-grade

Level: 56

Description: An intelligent monster. It is not good at fighting, but it is good at commanding. It can command up to a thousand monsters. It is good at spiritual attacks and has some secret special abilities.

Looking at the attributes panel of the Green Cloud Beast, Liu Yan finally understood.

It was indeed an intelligent monster. Although it was not good at fighting, it could command the other monsters.

Under its command, the overall combat strength of the other monsters had indeed increased significantly.

If it was not for Green Cloud Beast, Liu Yan and the others might have successfully defeated all the elite monsters. They would not have had such a hard time fighting back.

Xu Han also noticed Green Cloud Beast in the middle of the elite monsters. "If we can directly kill this intelligent monster, the battle will be much easier. Without its command, the combat strength of these elite monsters won't be as strong."

Liu Yan also understood this reasoning, but it was clear that Green Cloud Beast had been careful. It hid in the middle of a group of elite monsters and used the rest of the elite monsters to protect it. It would be difficult to get close to the Green Cloud Beast.

They could only fight at the back and see if there was a chance in the chaos.

Not long after, Undying Fire Phoenix brought Liu Yan and the others to the top of the group of elite monsters. They descended after observing for a while.

After flying for a certain distance, the group of elite monsters that had not made any movements earlier suddenly launched long-range attacks together. The attacks headed toward Undying Fire Phoenix.

Xu Han had long finished. He waved his S-grade weapon, Phantom Blue Staff, and the surrounding frost element condensed. Immediately, a giant ice barrier appeared once again. It was the first round of long-range attacks from this group of elite monsters.

"This Green Cloud Beast is wicked. We did not attack them when we were in the air. We are afraid it would be too far away for us to hit them. Now that we have begun to fly low, these elite monsters immediately attacked us." Xu Han could not help but curse.

Liu Yan smiled helplessly. The intelligence of Green Cloud Beasts was quite high. It had a meticulous tactic.

At this moment, Undying Fire Phoenix was already very close to the ground. Liu Yan and the others jumped onto the ground. They were in front of the elite monsters and were ready to fight head-on.

After Undying Fire Phoenix sent Liu Yan and the others to the ground, it also returned to the high sky. It was ready to fight together in the high sky.

In the low altitude, it was still relatively dangerous.

Although there were no flying-type elite monsters, the other elite monsters could attack from a distance.

Undying Fire Phoenix could not dodge in time if it were too close to the ground.

Staying in the sky was relatively safer.

After Liu Yan and the others landed, Murong Xue took out her S-grade shield, Rock Shield, and stood in front.

Murong Xue could hide behind this giant shield.

Murong Xue was clear that in a joint battle, her attack power was not very effective. Her main task was still to act as a tank, blocking the damage for Liu Yan and the others.

Liu Yan also took out his S-grade weapon, Flying Cloud Mystic Bow, and prepared for battle.

Xu Han was holding his S-grade weapon, Phantom Blue Staff, to cast crowd control skills and deal some damage output.

Allen Smith was already holding his S-grade weapon, Blood Flame Sword, and was standing beside Murong Xue, ready for battle.

At this moment, Liu Yan and the others looked extremely serious.

They were once top geniuses in Lighthouse Academy and Gifted Academy. They were way stronger than the other students.

But at this moment, they were facing the fourth wave of elite monsters. They were supposed to fight these elite monsters with their entire team. These monsters were also extremely powerful. Liu Yan and the others had to use all of their strength to have a chance of winning.

The battle was about to start.

Liu Yan and the others had just gotten into attack formation. However, more than a dozen elite monsters in front of them took the lead to charge toward them.

Seeing this, Xu Han waved his Phantom Blue Staff, and a mini blizzard appeared in front of them. Although it could not freeze the powerful elite monsters, it still caused a deceleration effect, delaying time.

Liu Yan raised his S-grade weapon, Flying Cloud Mystic Bow. He activated his A-grade skill, Flame Control. Then, arrows condensed from the fire element appeared and immediately shot out.

The fire arrows hit the elite monsters, causing considerable damage.

At the same time, Liu Yan also activated his S-grade skill, Prison of Giant Trees. Wood attribute elements surged, and a giant cage appeared. It trapped all the elite monsters that had been affected by Xu Han's skill and had slowed down.

Xu Han's miniature blizzard managed to slow down this group of elite monsters. It allowed Liu Yan's Prison of Giant Trees to trap the dozen elite monsters charging at the front.

After these elite monsters were restricted, they continued to attack, wanting to charge out.

However, the Prison of Giant Trees was a powerful skill Liu Yan comprehended from the Wood Secret Art. It was much stronger than a regular S-grade skill.

The guardian beast, Golden Tiger, had struggled for a long time but was still unable to shake the Prison of Giant Trees, let alone these dozen or so elite monsters.

The Prison of Giant Trees was not very sturdy, but it could use softness to overcome hardness. That was how it could restrain these elite monsters.

As these elite monsters attacked, the Prison of Giant Woods continued to absorb the surrounding wood attribute elemental energy, constantly stabilizing itself.

These dozen elite monsters were restricted by the Prison of Giant Trees, unable to come out.

And these dozen elite monsters instantly became living targets.

Liu Yan and Xu Han launched their powerful attacks at the same time.

Arrow feathers condensed from various elements shot out from Flying Cloud Mystic Bow.

With the support of Liu Yan's strength and Flying Cloud Mystic Bow, these arrows already contained terrifying power. They also had terrifying elemental power, making their lethality even more frightening.

Frost, fire, lightning, and even wood attribute arrows continuously shot out.

At this moment, Liu Yan directly maxed out his damage output.

Chapter 412: Elite Monsters Kept Spawning

When Xu Han saw the arrows that Liu Yan kept shooting, he was instantly shocked.

It was the first time he had seen Liu Yan use such intense power. It was terrifying.

Liu Yan's arrows contained terrifying attribute powers. More than a dozen elite monsters were instantly heavily injured.

Seeing this, Xu Han also started to attack.

He cast many frost spells. It hit the elite monsters, aggravating their injuries.

And the time that Liu Yan and Xu Han could freely attack was limited.

Not long after, the elite monsters at the back bypassed the Prison of Giant Trees and charged toward Liu Yan and the others. At the same time, some long-range attacks were coming toward them.

The Prison of Giant Trees was a continuous skill. As long as it was activated, it would replenish the strength of the wood attribute and keep restricting the opponent. Its ability to trap the opponent was powerful.

However, Liu Yan could not use a new Prison of Giant Trees unless he canceled the current one. He could only attack the other monsters. He could not use the Prison of Giant Trees to restrict the other elite monsters.

Facing the numerous long-range attacks, Murong Xue immediately raised her S-grade Rock Shield to block them.

At the same time, Murong Xue's aura changed, and she entered level two of Tyrant Body.

At the same time, the rock attribute of the Rock Shield shone with an earthen yellow color. Murong Xue used a defense skill to increase her defense.

Facing the attacks of these powerful elite monsters, Murong Xue did not dare to be careless.

After a few long-range attacks, Murong Xue took a few steps back. Her face was flushed red. She obviously was under tremendous pressure. Fortunately, she was barely able to hold on.

When Liu Yan saw the elite monsters charging toward him, he immediately put away his Flying Cloud Mystic Bow. Then, he took out his SS-grade weapon, Blue Flame Gloves.

Liu Yan's long-range attack ability was also strong. When his DPS was full, it would not take long for him to finish off all the elite monsters in front of him.

However, he could only use long-range attacks if many members were in front to hold monsters off.

At this moment, there were only Murong Xue and Allen Smith in front of him.

Allen Smith was a warrior but not a heavy-armored warrior. Naturally, he could not defend against the onslaught of so many elite monsters.

Murong Xue was a tank, and her defense was also impressive. However, she was the only one, while dozens of elite monsters were in front of her. Murong Xue could not defend against the onslaught of many elite monsters alone. It was already difficult for her to withstand the long-range attacks of some elite monsters.

Under such circumstances, it was more appropriate for Liu Yan to use close combat.

Moreover, it was most suitable for Liu Yan to use gloves to fight head-on. This way, he could attract these elite monsters and protect Xu Han in the back row.

Using Blade of the Night be more flexible, and Liu Yan would have less pressure on himself. However, it would undoubtedly put too much pressure on Xu Han, Murong Xue, and Allen Smith.

Liu Yan looked at Allen Smith and nodded. They prepared to attack together.

Facing dozens of elite monsters, Liu Yan did not dare to lower his guard.

Liu Yan activated his S-grade skill, Dragonification. His aura immediately changed, and his physical strength received a tremendous increase.

Then, Liu Yan activated his S-grade skill, Power of the Earth. His strength instantly received a significant increase.

Lastly, he activated his S-grade skill, Absolute Unrivaled. Liu Yan improved his close combat ability.

The terrifying buffs from the three S-grade skills with the SS-grade weapon, Blue Flame Gloves, were Liu Yan's strongest close combat strength.

At this moment, Liu Yan's aura was already extremely shocking.

Even Xu Han and the others could feel a wave of pressure from Liu Yan.

At this moment, the elite monsters had already rushed in front of them. Liu Yan and Allen Smith started to attack at the same time.

Liu Yan held the SS-grade weapon, Blue Flame Gloves. With the terrifying support of three S-grade skills, he charged into the group of elite monsters and started to fight.

Allen Smith held the S-grade weapon, Blood Flame Sword, and walked among the elite monsters to fight.

Liu Yan and Allen Smith managed to withstand the dozens of powerful elite monsters.

When Xu Han saw this, he was a little surprised. The combat strength of these two people was too frightening, especially Liu Yan.

However, Xu Han did not stay idle. He continuously cast spells. When Xu Han was free, he would also do some damage to assist Liu Yan and Allen Smith in the battle.

Murong Xue had also put away her shield and picked up her S-grade weapon, Crystal Gloves. She began to fight among the elite monsters.

At this moment, Xu Han had no one to protect him. He had to rely on himself.

However, Xu Han had a lot of combat experience. He had always maintained a distance from the elite monsters. Xu Han could use his spells and skills to deal damage. At the same time, he could stay away from these elite monsters to prevent them from rushing over in time.

If the elite monsters headed toward Xu Han, he had time to react in time.

A ball of fire with a terrifying aura suddenly flew toward the elite monsters from the sky. The fireball then engulfed the battlefield. It was the guardian beast, Undying Fire Phoenix. It helped Liu Yan and the others to fight the monsters.

Liu Yan and the others cooperated fully in the battle. It did not take long for some elite monsters to fall.

However, Liu Yan soon felt that something was not right.

He had used the Prison of Giant Trees to trap more than a dozen elite monsters and killed some of them. Logically speaking, the number of elite monsters should have decreased by quite a bit. The pressure on them should have also been reduced by quite a bit.

However, Liu Yan realized that not only did the pressure not decrease, but it was also increasing.

Liu Yan hurriedly used his A-grade perception skill Omniscient Insight. He had been focused on the battle, so he had not noticed anything else.

At this moment, Liu Yan noticed that something was wrong. After using Omniscient Insight, he quickly discovered that elite monsters were continuously spawning at the spawning point.

Previously, only one elite monster would spawn at a time. It would take a long while.

Now, three to five elite monsters were spawning at the spawning point at a time. Moreover, they were spawning continuously at a fast speed.

After all, these elite monsters were strong. Any one of them was powerful in combat. No matter how powerful Liu Yan and the others were, they would not hold on if the elite monsters kept coming.

Realizing that something was wrong, Liu Yan stopped fighting with the surrounding elite monsters. He shifted his focus from dealing with the elite monsters to moving over there.

One by one, the elite monsters were repelled by Liu Yan. However, Liu Yan did not chase them. Instead, he moved to the rear of the elite monster group.

The situation on the battlefield was too chaotic. Liu Yan's Omniscient Insight was also affected by the special spiritual attack. Liu Yan needed to go to the rear to check the situation.

Chapter 413: Mysterious Spirit Energy

Outside the fire attribute territory.

Liu Yan was leading a few of his top team members as he led the fire attribute territory's guardian beast, Undying Fire Phoenix, into an intense battle with the fourth wave of elite monsters.

At the rear, Xu Han was in charge of controlling the field and causing damage. Xu Han was currently following Liu Yan's instructions. Xu Han would attack the dozen elite injured monsters in the Prison of Giant Woods while casting crowd control skills.

After a series of attacks, the dozen injured elite monsters in the Prison of Giant Woods were killed by Xu Han's powerful frost element.

At this time, Xu Han's main focus was on the remaining elite monsters.

Allen Smith, Xu Han, Murong Xue, and Undying Fire Phoenix were still fighting, but Xu Han realized something was wrong. They

could not defeat the elite monsters as quickly as before in a one-on-one fight.

However, the number of elite monsters should be continuously decreasing.

Xu Han remembered that there were only more than thirty elite monsters before the battle.

Including the ones that had respawned during this period, there were at most forty elite monsters.

They had already killed more than a dozen elite monsters in the Prison of Giant Woods. The four of them, including Xu Han, had defeated a dozen elite monsters.

Logically speaking, there should only be about ten elite monsters left.

However, not only did the number of elite monsters not decrease but there were also even more of them than the initial number.

Xu Han glanced at the battlefield. He noticed there were still fifty to sixty elite monsters standing in the battle.

Why were there more of them?

Xu Han's expression immediately became serious. He had a bad feeling in his heart.

Initially, it was risky for the four of them to face these elite monsters together with Undying Fire Phoenix. They needed to go all out and coordinate well before they could defeat them.

However, they realized that the number of elite monsters on the other side was still increasing.

These elite monsters were not ordinary monsters. Their usual combat strength was at level 50.

An elite monster could easily defeat four or five ordinary members of the Land of Origin team. The combat strength of these elite monsters was exaggerated.

Xu Han felt powerless.

Facing a large number of elite monsters, even Xu Han had some difficulty protecting himself. Xu Han did not dare to get too close to the elite monsters.

After all, Xu Han was good at magic power, long-range attacks, and crowd control skills. He was not a match for these elite monsters in close combat.

Just as Xu Han was panicked, he noticed that Liu Yan was engaged in a fierce battle with the elite monsters not far away. Liu Yan was charging toward the rear of the elite monsters.

Seeing this scene, Xu Han heaved a sigh of relief. It seemed that Liu Yan had also sensed that something was wrong. He was about to charge to the rear to investigate.

At this moment, Xu Han did not know what was happening behind these elite monsters. He could only believe that Liu Yan could solve their crisis.

Xu Han could only keep using as many crowd control skills as possible to help Allen Smith and Murong Xue.

After all, they were already facing many elite monsters, so the pressure was already huge. Now, Liu Yan had to leave and charge to the rear of the monster group. Allen Smith and Murong Xue were fighting at the same spot. They naturally felt even more pressure.

They could only trust Liu Yan because they could not help Liu Yan with anything else.

At this moment, Murong Xue faced an increasing number of elite monsters. Murong Xue was getting more pressure. She could no longer hold on, so she had no choice but to take out her S-grade shield, Rock Shield. She focused on defense and not the offense.

If it were not for Xu Han's powerful crowd control skills, Murong Xue would not have been able to hold on. She would have fallen into the hands of these elite monsters.

As for Allen Smith, he was extremely powerful. Even though he was facing so many powerful elite monsters, he could hold on. He could even kill one elite monster from time to time.

Although it was slow, he was still killing the elite monsters.

He was incredibly strong to be able to face so many powerful elite monsters while killing one elite monster from time to time.

The S-grade weapon in Allen Smith's hand, Blood Flame Sword, was emitting a blood-red glow. It was continuously absorbing the blood from the wounds of these elite monsters.

After absorbing the blood essence of these elite monsters, the power of Blood Flame Sword became even stronger. At the same time, a portion of the blood essence was fed by Allen Smith to help him replenish his stamina.

Because of the endurance of Blood Flame Sword, Allen Smith was able to deal with these elite monsters with all his stamina and was able to persist until now.

Murong Xue, Allen Smith, Xu Han, and Undying Fire Phoenix were still fighting. Although they were fighting many elite monsters and were at a disadvantage in numbers, they could at least take care of each other. They supported each other and barely held on.

On the other side, Liu Yan could only fight alone.

Liu Yan charged towards the rear of these elite monsters, only to discover that there were more elite monsters at the rear.

During the battle at the front, his vision was affected, so he did not pay close attention to the rear.

The number of elite monsters at the front and rear added up to more than a hundred.

With Liu Yan and the other's strength, they had no chance of defeating these many powerful elite monsters.

Liu Yan was at a loss. What was going on?

Normally, elite monsters would only respawn slowly. When the fourth wave of elite monsters attacked the territory and guardian monsters, there might not be so many elite monsters.

Everything seemed to be out of control.

Moreover, Liu Yan's Omniscient Insight was also affected.

It was the first time Liu Yan had encountered such a situation. When he was in the swamp of the altar of fragrance, Omniscient Insight helped him a lot. Liu Yan could still see the tiny fierce beast in the mud.

But now, it had no use at all.

At this moment, the perception range of Omniscient Insight had been reduced to about 50 meters, and it was extremely vague. Liu Yan could only sense the clear aura and strength. He could not sense the rest at all.

Liu Yan had previously received the SS-grade skill Soul Snatching from the principal of the Gifted Academy, Zhong Yuntian. Liu Yan had also grasped some knowledge of spirit skills.

At this moment, Liu Yan could feel that his Omniscient Insight skill had been affected. It must be the effect of a spirit skill.

Moreover, this spirit energy was at the place where the elite monsters spawned.

The sudden spawning of many elite monsters was likely related to this spirit energy. Liu Yan had to go and investigate.

Otherwise, if the battle continued, there would be more and more elite monsters. Liu Yan and the others would not be a match for them.

Even if they could rely on Xu Han's ice barrier skill and Undying Fire Phoenix to escape safely, with so many elite monsters charging into the territory, all the members of the Land of Origin team would not be a match for them.

Liu Yan had to destroy the source of these many elite monsters here!

Chapter 414: Green Cloud Beast's Special Ability

Liu Yan held the SS-grade weapon, Blue Flame Gloves.

With the A-grade skill Flame Control, the Blue Flame Gloves and Liu Yan's entire body were covered with terrifying fire element power.

Under the activation of the fire attribute elemental power, the Blue Flame Gloves were even more powerful.

At the same time, Liu Yan used the S-grade skill Dragonification and the S-grade skill Power of the Earth to increase his strength.

Relying on the S-grade skill Absolute Unrivaled, Liu Yan killed his way through a group of powerful elite monsters to the rear.

However, the further he went, the greater the obstruction he encountered.

The surrounding elite monsters seemed to have received orders. They intentionally stopped Liu Yan from going further. They desperately tried to stop Liu Yan. They fought Liu Yan even more intensely.

Liu Yan noticed the situation. He was even sure that the problem lay at the back of the monster group.

These elite monsters intentionally stopped Liu Yan because they worried he would cause trouble.

Since that was the case, Liu Yan had to go further.

At this moment, even if Liu Yan was using his full strength, he was still under a lot of pressure when facing this many elite monsters.

The pressure was too great, so Liu Yan took out the remaining ten red tier 2 combat-type enchanted puppets in his storage ring to help in the battle.

Liu Yan had 40 white tier 2 battle-type enchanted puppets, ten red tier 2 battle-type enchanted puppets, one orange tier 2 battle-type enchanted puppet, one substitute puppet, and one life substitute puppet.

The white tier 2 combat-type enchanted puppet was supporting the Land of Origin team and the metal attribute territory.

The orange Tier 2 battle-type enchanted puppet was supporting the wood attribute territory.

The substitute puppet was currently in the fire attribute territory, emitting the aura of the Undying Fire Phoenix. It was attracting the third wave of monsters.

As for the life substitute puppet, it had long been refined into Liu Yan's body. It could help Liu Yan to block one fatal attack.

Liu Yan had ten red tier 2 combat enchanted puppets left.

As soon as he released ten red tier 2 combat-enchanted puppets, Liu Yan controlled them to fight the elite monsters through his Gold Secret Art. The purpose was to block these elite monsters so that Liu Yan could continue to advance. It was not to deal with these elite monsters.

The strength of the elite monsters was incredible. Their combat strength was level 50 or even above. On the other hand, the average combat strength of these red tier 2 combat enchanted puppets was only level 45. Naturally, they were no match for the elite monsters.

It was also the reason why Liu Yan did not use them before.

Now that Liu Yan was under too much pressure, he had no choice but to use the last ten red tier 2 combat enchanted puppets.

However, the performance of these red tier 2 combat-enchanted puppets was beyond Liu Yan's expectations.

At first, Liu Yan thought these red tier 2 combat-enchanted puppets were not as powerful as the elite monsters, so they would not be much useful. They could only delay the elite monsters.

However, Liu Yan realized that he was wrong. Although these enchanted puppets were no match for the elite monsters, they were still enchanted puppets. They had no life, were not afraid of pain, and would carry out Liu Yan's orders without hesitation.

Facing the elite monsters that were stronger than them, the enchanted puppet still risked its life to delay them.

Although the combat strength of the enchanted puppet was not as good as that of the elite monsters, it was not that much weaker.

It would take some time for the elite monsters to finish off an enchanted puppet. These enchanted puppets could still move with their broken arms or short legs. The monsters had to destroy the puppets' cores to finish them, which was troublesome and annoying.

Under the desperate stalling of these enchanted puppets, the pressure on Liu Yan was greatly reduced.

Liu Yan found a gap. He quickly seized the opportunity and used his S-grade skill, Sonic Speed, to rush out of the encirclement.

As for those enchanted puppets, Liu Yan could not care about them for the time being. He could only leave them here to fight.

After passing through the gap, Liu Yan instantly rushed out of the group of elite monsters, and his vision suddenly became clear.

In an open space, the Green Cloud Beast was emitting a strange light. It was doing something to the spawning point.

The spawning point that should have been sparsely spawning elite monsters was spawning several elite monsters at once.

Liu Yan saw this scene and immediately understood the situation.

It was the Green Cloud Beast's doing.

Liu Yan was also a little surprised. He did not expect that the Green Cloud Beast could not only command the group of elite monsters but also use a special method to spawn more elite monsters.

No wonder the attributes panel said that it had a special ability.

Liu Yan did not know how the Green Cloud Beast did it. He guessed it should be a spirit-type skill. However, there was no doubt that it was all because of the Green Cloud Beast.

Liu Yan suddenly felt a little lucky. Fortunately, he chose to take the initiative to face these elite monsters. That was how he discovered this scene.

Otherwise, if Liu Yan and the others had safely returned to the fire attribute territory and defended the fourth wave of elite monsters with his entire team, they would be in big trouble.

The Green Cloud Beast would definitely spawn more elite monsters.

These elite monsters were not ordinary monsters. Each of them was powerful. Even a top-tier member like Liu Yan would need time to deal with an elite monster.

Ordinary members were no match for these elite monsters.

If they were to face a large group of elite monsters, Liu Yan and all the team members would probably not be a match for the large group of elite monsters led by the Green Cloud Beast.

However, Liu Yan discovered the scheme of the Green Cloud Beast. He naturally would not allow it to continue spawning so many powerful elite monsters.

Liu Yan did not know how the Green Cloud Beast did it, but it did not matter.

Liu Yan only knew that he had to kill the Green Cloud Beast, so it would not continue spawning so many elite monsters.

In addition, these elite monsters did not have a commander without the Green Cloud Beast. Then, Liu Yan and the others could split up and finish them one by one. It would be much easier.

Unlike now, when these elite monsters were all gathered together, they were not alone and were extremely difficult to defeat.

At this moment, the Green Cloud Beast also noticed Liu Yan's arrival and immediately revealed a human-like expression of surprise. It did not expect Liu Yan could break out of the encirclement of so many elite monsters.

The Green Cloud Beast roared. More than ten elite monsters had just spawned and were responsible for guarding the surroundings. They rushed towards Liu Yan together.

Liu Yan chose to engage in close combat to help Allen Smith and Murong Xue relieve the pressure. He also wanted to protect Xu Han at the back.

Now that there were no more members around. Naturally, Liu Yan did not need to expend any effort to fight these more than a dozen powerful elite monsters.

The elite monsters rushed over. However, Liu Yan's figure suddenly disappeared from the spot.

Not only did his figure disappear, even his voice completely disappeared. It was as if Liu Yan had vanished from this world. They could not detect his aura either.

Chapter 415: An Outlier

The Green Cloud Beast looked at the empty space with a puzzled expression.

The group of elite monsters could not find Liu Yan at all.

At this moment, Liu Yan had turned invisible under the two powerful concealment skills, the B-grade skill Traceless Silence and the A-grade skill Shadow Cloak.

After entering the invisibility state, Liu Yan bypassed these elite monsters and approached the intelligent-type elite monster, Green Cloud Beast.

To catch a thief, one must first capture the leader. Naturally, the first thing to do was to get rid of Green Cloud Beast.

Otherwise, there would be endless elite monsters kept coming at them.

The Green Cloud Beast was an intelligent-type elite monster. Although it could not find Liu Yan's aura and did not know where Liu Yan was, the Green Cloud Beast knew that it would be in great danger. It knew that Liu Yan's target was it.

The Green Cloud Beast turned around and was about to escape. Its speed was fast. In a flash, it had reached a distance. It was about to enter the group of elite monsters.

The Green Cloud Beast wanted to hide in the group of elite monsters. Since there were so many elite monsters, it was difficult for Liu Yan to rush in and do anything to it.

Liu Yan, who was invisible, noticed this scene and was surprised.

This Green Cloud Beast did not have much combat ability, but its speed was fast.

However, Liu Yan was not afraid.

Liu Yan activated his S-grade skill, Sonic Speed. Under the speed of 16 times Sonic Speed, he had already appeared beside the Green Cloud Beast in the blink of an eye.

The Green Cloud Beast sensed Liu Yan's approach, especially when it sensed Liu Yan's terrifying speed. It was immediately shocked and terrified. It even wanted to rush toward the elite monsters.

At this moment, Green Cloud Beast felt a sense of danger. It felt a terrifying sense of danger from Liu Yan.

At the same time, the dozen elite monsters behind also rushed over. They wanted to rescue Green Cloud Beast and attack Liu Yan together.

How could Liu Yan give them a chance?

Before they arrived here, Liu Yan had already sensed that the elite monsters in the Prison of Giant Trees were killed. Liu Yan then canceled the Prison of Giant Trees. It meant that Liu Yan could now cast a new one.

Liu Yan immediately cast a new Prison of Giant Trees.

The wood attribute elements surged crazily. Soon, a cage formed by the wood attribute energy locked Liu Yan and Green Cloud Beast in it.

The elite monsters behind had just arrived, but they were locked outside the Prison of Giant Trees.

These elite monsters tried to attack, but all their attacks were futile against the Prison of Giant Trees. There was no damage to the prison at all. They had no chance to break the Prison of Giant Trees.

Liu Yan had already expected it.

During this period, Liu Yan gained a certain level of understanding of the Prison of Giant Trees.

After all, it was a skill he had comprehended from the Wood Secret Art. It was much more powerful than ordinary S-grade skills.

Although the Prison of Giant Trees did not deal any damage, its restraining ability was terrifying.

Based on his previous experience, Liu Yan thought that even if he used his full strength, he could not break the Prison of Giant Trees in a short period.

This Prison of Giant Trees was too strong. Not only was it compatible with the Wood Secret Art, but it was also extremely good at restricting. At the same time, the Prison of Giant Trees would continuously absorb the wood attribute energy and strengthen itself. Thus, it was difficult to break it unless the attack reached an extremely exaggerated level in an instant.

However, Liu Yan believed that there was still no such existence on the fifth level of the Tower.

It also meant that Liu Yan's Prison of Giant Trees was invincible on the fifth level of the Tower. As long as it locked someone up, the other party would not be able to come out.

Just like now, Liu Yan locked the Green Cloud Beast and himself in the Prison of Giant Trees.

The Green Cloud Beast could not break out, and the group of elite monsters outside could not break in.

Liu Yan could safely fight the Green Cloud Beast inside. After that, he would then remove the Prison of Giant Trees.

Although Liu Yan was also imprisoned there, Liu Yan was still in control of the situation.

Liu Yan ignored the elite monsters that were still 'scratching the itch' of the Prison of Giant Trees. Instead, he turned his head to look at the unique intelligent-type Elite Monster, the Green Cloud Beast.

The Green Cloud Beast had tried for a while but could not break out of the Prison of Giant Trees. The elite monsters outside were also unable to come in and help it.

The Green Cloud Beast looked at Liu Yan in despair. It did not expect Liu Yan to have such a powerful restriction skill.

The Green Cloud Beast was intelligent, but its combat strength was ordinary. Naturally, it was not a match for Liu Yan.

The Green Cloud Beast immediately looked at Liu Yan with a face full of despair.

Liu Yan held the SS-grade weapon in his hand, Blue Flame Gloves. He stared at the Green Cloud Beast with malicious intent, ready to make a move.

At this moment, the Green Cloud Beast pretended to be in despair a moment ago. In the next moment, its eyes lit up as it stared at Liu Yan.

Liu Yan immediately felt his head shake. He was immediately shocked.

This Green Cloud Beast had launched a spirit attack!

However, after his shock, Liu Yan quickly steadied his mind. He used his spirit energy to defend and counterattack.

Although Liu Yan did not have a spirit attack method, he did have spirit skills. It was the SS-grade Soul Snatching skill.

It was even a godly skill that only the warden on the tenth level of the Tower could master.

Although Liu Yan did not have a complete grasp of spirit energy, he could not achieve a spirit attack like the Green Cloud Beast.

However, under the influence of the Soul Snatching skill, Liu Yan's spirit energy was already powerful.

Just now, Liu Yan did not pay attention and was affected by the spirit attack of the Green Cloud Beast.

At this moment, Liu Yan regained his senses and blocked the spirit attack of the Green Cloud Beast.

To attack the other party, one had to have stronger spirit energy than the other party. Otherwise, it would be impossible for the attack to succeed.

Liu Yan didn't learn a spirit skill. But because of the Soul Snatching technique, Liu Yan's spirit energy became extremely powerful after a long period of nurturing.

This Green Cloud Beast's spirit energy was inferior to Liu Yan's. After a round of spirit attacks, it could not attack Liu Yan and even injured itself a little.

The Green Cloud Beast immediately looked at Liu Yan with a surprised expression. It didn't understand how Liu Yan's spirit power could be so strong.

Liu Yan also laughed inwardly. Under normal circumstances, no awakened ones on the fifth level of the Tower could grasp a spirit skill. Even if they did, it would be weak. It was simply impossible for them to be so powerful.

However, Liu Yan was an exception. He had received special instruction from Principal Zhong Yuntian at the Gifted Academy. There was no need for him to cultivate his spirit power at all. Liu Yan's spirit power was extremely powerful under the influence of the SS-grade skill Soul Snatching.

Liu Yan looked at the helpless Green Cloud Beast and sneered. "Let's see what else you have up your sleeve!"

With that, Liu Yan approached the Green Cloud Beast with the Blue Flame Gloves in his hand.

Chapter 416: Useless Skill or Godly Skill?

When the Green Cloud Beast saw Liu Yan approaching, it immediately curled up in a corner of the Prison of Giant Trees with a face full of despair.

It had so many powerful elite monsters under its command, and these elite monsters were only outside.

However, its elite monsters could not break into the prison to save it.

At this moment, the Green Cloud Beast could not do anything to Liu Yan.

The Green Cloud Beast was good at intelligence, command, and spirit energy.

However, all of these were of no use to Liu Yan.

There was no way to leave this Prison of Giant Trees, and it could only face Liu Yan.

However, whether it was its combat strength or spirit energy, they were far inferior to Liu Yan.

At this moment, the Green Cloud Beast's intelligence was helpless in the face of absolute strength.

The Green Cloud Beast still could not understand how this human could be so powerful.

At this moment, Liu Yan did not care what the Green Cloud Beast was thinking and directly went in front of it. He wanted to give the Green Cloud Beast a deadly blow.

After all, Xu Han and the others were still struggling with the elite monster group outside. Liu Yan still needed to defeat the Green Cloud Beast and help them.

Liu Yan came to the Green Cloud Beast and smashed his fist fiercely, killing the Green Cloud Beast.

As the Green Cloud Beast fell, a platinum treasure chest that emitted a dazzling platinum light suddenly exploded from the ground.

At the same time, the elite monsters outside also lost their command, and the battle instantly became chaotic.

Xu Han and the others were currently struggling against many elite monsters.

However, Xu Han suddenly realized that these monsters had changed.

Just a moment ago, these monsters were all fighting together against Murong Xue and Allen Smith. They did not give them a chance at all.

Although these elite monsters did not have a powerful formation, there were many of them. They had the upper hand relying on their strength and number.

Murong Xue and Allen Smith were under a lot of pressure. They could not hold on any longer.

However, all of a sudden, these elite monsters changed their behavior and became unorganized.

Many elite monsters started to fight randomly. It was a completely different scene from before.

Xu Han was stunned when he saw this scene. He immediately reacted and shouted, "It was Liu Yan who took care of the Green Cloud Beast. These elite monsters have lost their command. Hurry up and stop fighting. We will use the previous battle method."

Murong Xue and Allen Smith immediately reacted. They stopped fighting with these elite monsters and directly left the place.

Immediately, some of the elite monsters were attracted by Allen Smith and Murong Xue. Some of them ignored them.

The formation of these elite monsters became messy. Many of the elite monsters were left alone because of the aggro.

These elite monsters had a large number. Murong Xue and Allen Smith were no match for them.

At this moment, when some of the elite monsters were left alone, it gave Murong Xue and Allen Smith an opportunity.

They seized the opportunity to deal with the elite monsters one-on-one.

Although the strength of these elite monsters was not ordinary, it was not comparable to Murong Xue and Allen Smith. These elite monsters ended up getting slaughtered.

Murong Xue could not help but heave a sigh of relief.

Earlier, he could not hold up much longer. He could not even defend herself. These elite monsters were stronger, and there were many of them. It was difficult for Murong Xue to deal with them.

Fortunately, Liu Yan did not disappoint and successfully dealt with the Green Cloud Beast.

The elite monsters lost their commander all of a sudden. They became disorganized and isolated. Their combat strength was even less than half of their usual.

Although many elite monsters were still alive, Murong Xue did not feel as much pressure.

After all, these elite monsters did not have a commander. It was easy to deal with them.

Moreover, there were many elite monsters. They were already injured in the battle, so it was even easier to fight them.

At this time, Allen Smith could finally relax and start attacking and fighting. He did not have to be passive like before.

On the other side, Xu Han climbed onto Undying Fire Phoenix and began to bombard the air with spells, killing these elite monsters.

At this moment, Xu Han also discovered that although there were more elite monsters than the initial number, it was much easier to deal with them without their commander.

At the same time, Liu Yan took the opportunity to use Divine Extraction of the Green Cloud Beast's corpse.

Green Cloud Beast was a fierce beast with S-grade potential. It was also an extremely rare fierce beast with special intelligence. Hence, it would bring Liu Yan some good stuff.

As the milky white light descended, a notification appeared in front of Liu Yan.

[Divine Extraction of Green Cloud Beast (potential S-grade, level 56) successful. Congratulations: Agility + 789, spirit + 1346, adaptability + 703, Plunder (A-grade), Perfect Trickery (A-grade)!]

[Plunder (A-grade) has been successfully fused with Robbery (C-grade). 5% increase in Plunder's power!]

[Perfect Trickery (A-grade) has been successfully fused with Deception (B-grade). 30% increase in Perfect Trickery's power!]

Seeing the notification in front of him, Liu Yan was secretly delighted.

After all, it was a special elite monster that gave Liu Yan many attribute points.

Moreover, these attributes were rare. It was difficult to extract so many spirit attributes and fitness attributes from the bodies of ordinary monsters and fierce beasts.

Apart from that, he also obtained two A-grade skills.

However, when Liu Yan saw the names of these two A-grade skills, his expression was a little strange. What kind of skills were these?

Especially when he saw that these two new skills were successfully combined with Robbery and Deception, Liu Yan immediately guessed the general purpose of these two skills.

However, Liu Yan still checked the effects of these two skills.

No matter what, they were still two A-grade skills. Even if they were special functional skills, their effects should not be weak.

[Plunder]

Grade: A-grade

Effect: After activation, you can steal any item from the opponent without the opponent knowing. You can also randomly steal an item from the opponent's storage ring. Besides, you can also directly steal

equipment, weapons, or treasures from the opponent, but you will be discovered. (Current activation distance: 10 meters)

Liu Yan looked at the skill effect of Plunder and was immediately surprised.

He initially thought it was just a unique functional skill that could be useful only under special circumstances. Usually, it had no use at all, especially when it came to combat.

However, Liu Yan realized he was wrong after seeing the effect of the skill.

Compared to the previous Robbery, Plunder had a qualitative improvement.

In the past, Robbery could only let Liu Yan steal the items from the other party's body, and it had to be close to the body before it could be stolen. Robbery could only steal a random item from the other party. It was practically useless.

It was not an exaggeration to call Plunder a godly skill!

Chapter 417: Perfect Trickery

Liu Yan looked at the introduction of the newly obtained A-grade skill, Plunder. He pondered over its various uses. The more he thought about it, the more he felt that this skill was ridiculously powerful.

It allowed him to steal anything from a target.

In the past, Robbery only allowed him to steal a random item from a target. Now, he could choose to steal whatever he wanted with Plunder.

Therefore, the difference between Robbery and Plunder was significant.

Other than that, the most ridiculous aspect of Plunder was that it could steal the items in the other party's spatial ring.

Plunder could only allow Liu Yan to randomly steal a thing from the spatial ring, which meant he could not choose the items he wanted. However, it was still impressive.

If Liu Yan was lucky, he could even steal the other party's treasure, which would have an unexpected effect.

In addition, Plunder could also steal the other party's weapons, equipment, and treasures. This time, Liu Yan could choose which weapon or equipment he wanted.

Although the other party would find out Liu Yan was stealing, so what?

Liu Yan could steal the other party's weapon, defensive equipment, or treasures during battle. Then, the battle would naturally be much easier for him.

Then, the combat strength of the other party would be reduced by half after losing their weapon. It was the best advantage of Plunder.

Finally, Liu Yan also noticed the distance limit to the use of Plunder.

It was unlike the previous Robbery, where he had to come into close contact with the other party to steal their thing. It was inconvenient and troublesome.

On the contrary, Liu Yan could use Plunder from a distance.

The current usage range of Plunder was 10 meters. It seemed that it would increase with proficiency and strength in the future.

The current distance of 10 meters was already powerful.

Liu Yan glanced at an elite monster outside the Prison of Giant Trees. He activated the A-grade skill, Plunder.

In the next moment, the weapon in the hands of this elite monster appeared in his hands.

The experiment succeeded, and Liu Yan was instantly satisfied.

In the future, when fighting fierce beasts, monsters, or awakened ones, Liu Yan could use Plunder to seize their weapon. How would the other party win against him?

Of course, Liu Yan could also guess that if the opponent was too strong, Plunder might lose its effectiveness. But even so, it was already powerful.

Following that, Liu Yan looked at another newly acquired A-grade skill, Perfect Trickery.

[Perfect Trickery]

Grade: A-grade

Effect: The user can deceive the opponent, confuse the opponent, and temporarily deceive the opponent through illusion. The user can also temporarily change the opponent's thoughts. The specific effect depends on the spirit energy of both parties!

Liu Yan's eyes suddenly lit up after learning the effect of Perfect Trickery.

Perfect Trickery seemed to be extremely powerful.

The previous Deception was a skill that Liu Yan had extracted from Luo Qingcheng.

The original effect of Deception was to deceive the other party and make the other party believe Liu Yan. Its effect was achieved through language and actions.

Perfect Trickery was a high-level version of Deception.

Perfect Trickery allowed Liu Yan to use strong spirit energy and an illusion to deceive the opponent. He could even change the opponent's mind.

Of course, the specific effects would also depend on the spirit energy of both parties.

A person with low spirit energy could not confuse others with high spirit energy.

Just like the Green Cloud Beast from before. Although Liu Yan did not know the spirit attack at all, Liu Yan's spirit energy was stronger than Green Cloud Beast's. Liu Yan did not know any spirit defense techniques, but he could easily withstand the spirit attacks of the Green Cloud Beast.

Perfect Trickery had the same principle.

However, Liu Yan's spirit energy was abundant because of his SS-grade skill, Soul Snatching.

After Liu Yan used Divine Extraction on the Green Cloud Beast's corpse, his spirit energy increased a lot.

Currently, Liu Yan's spirit energy was overwhelming.

Liu Yan would keep improving his spirit power.

And those with strong spirit energy would be extremely strong when they used the deceive technique against those with weak spirit energy.

For example, the Green Cloud Beast used its spirit energy to command these elite monsters.

Liu Yan could also change the minds of these elite monsters through Perfect Trickery. He could make them stop attacking his team and instead attack each other.

Liu Yan's eyes suddenly lit up when he thought of this idea. This method might indeed work.

Although these elite monsters were powerful, they only had strong physical strength. Occasionally, they would use powerful spell attacks, but they were not as powerful as those with high spirit energy.

On the contrary, the spirit energy of these elite monsters was very low. They were generally existence with relatively low IQs.

Therefore, Perfect Trickery was a godly skill against these elite monsters with low spirit energy!

Liu Yan directly tried it. He used Perfect Trickery to deceive the dozen elite monsters outside the Prison of Giant Trees.

The content of Liu Yan's illusion cast toward the elite monsters was straightforward. It was to change their thoughts and make them think their partners were enemies.

An invisible power spread out from Liu Yan's body.

In the next moment, the elite monsters were stunned. Their eyes were filled with confusion. Not long after, they regained their 'consciousness'.

After they regained consciousness, the elite monsters that were partners just a moment ago became hostile towards each other.

Following that, the elite monsters from the same camp immediately attacked each other.

More than ten elite monsters were attacking each other. It was the first time Liu Yan had seen such a scene.

Following that, Liu Yan canceled the Prison of Giant Trees and walked out of it.

At this moment, the surrounding elite monsters were attacking each other, completely ignoring Liu Yan.

They thought their partners were their enemies. Liu Yan no longer had any hatred toward them.

Usually, the duration of Perfect Trickery would only last a few minutes.

However, the spirit energy of these elite monsters was too low. In addition, Liu Yan's spirit energy was relatively high. This time, it could probably last for dozens of minutes. It was enough for these elite monsters to finish each other off.

In the end, Liu Yan only needed to come out and reap the harvest when they were almost done fighting.

Liu Yan ignored the elite monsters fighting each other and walked forward.

There were still many elite monsters there. Xu Han and the others were fighting these elite monsters.

These elite monsters had lost their commander, so Xu Han and others could fight these elite monsters separately. However, these elite monsters were strong, and there were many of them. Xu Han and the others would undoubtedly spend a lot of time.

However, since Liu Yan had such a godly skill, Perfect Trickery, everything became easier.

Chapter 418: Continuous Combat Ability of Blood Flame Sword

Outside of the fire attribute territory.

Xu Han and the others were fighting a fierce battle with the elite monsters.

At this moment, these elite monsters had lost their command and were in a mess.

Murong Xue, Allen Smith, and Xu Han intentionally attracted these elite monsters in three directions.

When the elite monsters moved in one direction, Murong Xue and the others would attack from the other two directions to attract the aggro of the elite monsters. This way, they could change the elite monsters' direction to delay time and deal more damage.

During the process, the three of them constantly found opportunities to fight the elite monsters that were alone.

However, as the battle continued, Murong Xue and Xu Han's condition was not very good.

After all, they had experienced a head-on battle with these elite monsters and had lost a lot of stamina.

If they had fought like this from the start, Murong Xue might have been able to hold on for a long time.

However, the head-on battle was too dangerous. Murong Xue had used up a lot of stamina. At this moment, she could not hold on any longer.

On the other side, Xu Han was also not in a good condition.

In the previous head-on battle, the situation was more critical. Xu Han continuously released many crowd control skills to help Murong Xue and Allen Smith.

Because of this, Xu Han used up a lot of energy. Now, his energy was insufficient. He needed to recover for some time before he could continue fighting.

If they had Chu Long's Mysterious Fog Pearl, Xu Han would not have this problem. He would have an inexhaustible amount of energy, enough to continue fighting for a long time. It could support Xu Han's continuous bombardment of spell attacks.

However, a rare treasure like the Mysterious Fog Pearl was not something everyone could have.

However, Xu Han was not in a hurry at the moment. These elite monsters had lost their commander. It meant Liu Yan's operation on the other side must have succeeded.

Xu Han believed that Liu Yan would come back soon. He just had to hold on until Liu Yan's reinforcements came back.

At this moment, Allen Smith was different from Murong Xue and Xu Han.

Allen had used up a lot of stamina just now in a head-on battle with this group of elite monsters. However, he had an S-grade weapon, the Blood Flame Sword. It could continuously absorb the opponent's blood essence during the battle. When the sword buffed itself, it could also replenish the user's stamina. It could help the user recover their stamina continuously.

At this moment, under the continuous replenishment of the Blood Flame Sword, Allen Smith had already absorbed the power of many elite monsters' blood essence.

Because of this, Allen Smith still had a lot of stamina. He was even at his peak, so it was naturally easy for him to deal with these elite monsters.

These elite monsters were already injured in the previous battles. Every time Allen Smith found an opportunity to face the elite monsters alone, he would be able to deal with them easier.

One by one, the elite monsters fell under Allen Smith's Blood Flame Sword. At the same time, the Blood Flame Sword was constantly absorbing elite monsters' blood essence to increase its power. At the same time, it was replenishing Allen Smith.

Allen Smith also noticed Xu Han and Murong Xue on the other side. One of them did not have enough energy, the other did not have enough stamina. Overall, their combat strength had decreased.

Allen Smith could only bear more pressure and attract more elite monsters to help Murong Xue and Xu Han share the pressure.

Allen Smith also knew if he did not have Blood Flame Sword, he probably would not be much better despite his strength being slightly better than the other two.

With Blood Flame Sword, Allen Smith could continue to absorb blood essence. He could recover stamina and maintain his peak combat strength.

Allen Smith liked Blood Flame Sword in his hand even more. With such a treasure, his stamina increased, and his combat strength was also ridiculously strong.

Especially when he was facing a large number of powerful elite monsters. It was undoubtedly crucial to maintain combat strength.

However, the pressure on Allen Smith at this moment was a little too much.

There were too many elite monsters, and Murong Xue and Xu Han's combat strength had decreased. Allen Smith was unable to hold on by himself.

However, Allen Smith continued to fight with a cold expression. He kept attacking elite monsters. Every time he found a lone elite monster, he would immediately go up and kill it.

When the three of them were struggling to hold on, they did not notice some elite monsters on the other side were fighting among themselves.

On the other side of the battlefield, Liu Yan had already arrived.

Liu Yan did not make a move. Instead, he directly used his A-grade skill, Perfect Trickery.

Under Liu Yan's hallucination, this dozen or so elite monsters had their minds changed by Liu Yan. They treated each of them as the enemy and started a bloody battle.

Perfect Trickery did not have limited usage. Liu Yan could continuously hallucinate multiple targets through the hallucination.

However, Liu Yan did not dare to use it on too many elite monsters.

The higher the number of targets, the higher the requirement for Liu Yan's spirit energy. At the same time, the pressure on Liu Yan's spirit energy was also greater.

Previously, Liu Yan had already used Perfect Trickery on more than a dozen elite monsters. They were fighting among themselves. It was the same for the new dozen or so elite monsters here.

In total, Liu Yan used Perfect Trickery on more than 30 elite monsters. It required a lot of his spirit energy.

These elite monsters had low spirit energy. So, Liu Yan knew how effective it was to use Perfect Trickery on them.

But if Liu Yan used it on a few more elite monsters, it would put a lot of pressure on him.

More than a dozen elite monsters were fighting among themselves. Liu Yan stood aside and waited.

Liu Yan waited until these elite monsters were almost done fighting before he started to harvest them.

After he finished off these elite monsters that were fighting among themselves, he could use Perfect Trickery on other elite monsters.

At this moment, these elite monsters saw each other as their enemies and attacked each other fiercely.

It was because these elite monsters had been hypnotized by Liu Yan. They mistook their partners as their enemies.

As a result, all kinds of wounds appeared on the bodies of these elite monsters.

Not long after, these elite monsters were dying under the attack of each other.

But even so, they were still attacking each other.

Liu Yan felt it was almost time, so he took out his Flying Cloud Mystic Bow.

He activated his A-grade skill, Flame Control. Multiple fire attribute arrows appeared on the Flying Cloud Mystic Bow.

Liu Yan shot out arrows continuously. The elite monsters that were on the verge of death were easily killed by Liu Yan.

At the same time, notifications kept popping up in front of Liu Yan's eyes.

[Green Demon successfully killed (potential A-grade, level 48). Obtained: 3000 combat EXP!]

[Soft Mud Monster successfully killed (potential B-grade, level 56). Obtained: 2800 combat EXP!]

[EXP full. You have successfully leveled up to level 38!]

Chapter 419: It's a Secret

Liu Yan glanced at the notification.

He did not aware that he had already advanced from level 35 to level 38. His strength had increased quite a bit.

It was tough to level up when he was at a higher level.

Liu Yan obtained a large number of experience points to level up from level 35 to level 38.

Those enchanted puppets must have killed many monsters and accumulated some experience points.

The enchanted puppets were all created by Liu Yan, so the experience points they gained were transferred to Liu Yan.

Although the experience points of those monsters were not much, there were many of them. One enchanted puppet killed many monsters during this period and gained a lot of experience points.

In addition, the number of enchanted puppets was also not small. With the help of enchanted puppets, Liu Yan gained a lot of experience points.

Now that Liu Yan had killed these elite monsters and gained a lot of experience points, he had successfully leveled up to level 38.

However, Liu Yan did not have the time to pay attention to his level. After finishing this batch of elite monsters, Liu Yan's A-grade skill, Perfect Trickery, was available.

Liu Yan moved forward once again. Many elite monsters noticed Liu Yan and attacked him one after another.

However, Liu Yan directly activated Perfect Trickery.

An invisible force spread out.

These elite monsters were instantly stunned on the spot.

Not long after, these elite monsters regained their 'consciousness' and resumed their movements.

However, these elite monsters suddenly changed the direction of their attack.

They changed from attacking Liu Yan to attacking each other.

At this moment, these elite monsters each other as their biggest enemies.

As for the current Liu Yan, he was a stranger who had nothing to do with them. They had no aggro toward him at all.

Liu Yan did the same thing and waited for a while.

After these elite monsters killed each other intensely, many of the elite monsters had already died. The remaining elite monsters were on their last breaths. Liu Yan continued to kill them with his S-grade weapon, Flying Cloud Mystic Bow.

A series of lightning attribute arrows killed the remaining elite monsters.

Notifications appeared in front of Liu Yan once again.

[You have successfully killed a Wind Devil (potential S-grade, level 35). Obtained: 3,200 combat experience!]

[You have successfully killed a Soft Mud Monster (potential B-grade, level 56). obtained: 2,800 combat experience!]

[You have successfully killed a Demon Man (potential A-grade, level 48). obtained: 3,000 combat experience!]

[EXP full. You have successfully leveled up to level 39!]

An elite monster worth a lot of experience points. With the experience points of many elite monsters, Liu Yan leveled up again and reached level 39.

Liu Yan continued to move forward.

After Liu Yan killed two batches of elite monsters were killed by Liu Yan, there were not many elite monsters left.

Liu Yan could already see the remaining elite monsters not far away fighting with Murong Xue and the others.

However, at this moment, Murong Xue and Xu Han were slightly out of stamina and energy. Their combat strength had decreased, and they were struggling to hold on.

Only Allen Smith's combat strength was not bad. He had to bear a large portion of the pressure. The three of them had to work together with their guardian beast, Undying Fire Phoenix.

Liu Yan knew Allen Smith could hold on until now because of the S-grade weapon, Blood Flame Sword.

It seemed that Blood Flame Sword was indeed powerful. It was much more powerful than an ordinary S-grade weapon. It played an extremely crucial role in this long battle.

However, it became much easier after Liu Yan came back. Liu Yan used Perfect Trickery on the majority of the remaining elite monsters.

Xu Han and the other two were cooperating with the guardian beast, Undying Fire Phoenix. They were struggling to hold on as they fought the elite monsters.

However, they suddenly noticed that half of the elite monsters were stunned for a moment. They stopped attacking. It was strange.

Just as Xu Han and the other two were puzzled, half of the elite monsters resumed their actions.

However, the moving direction of these elite monsters suddenly changed.

Initially, these elite monsters were attracted by Murong Xue and Allen Smith. They wanted to attack the two of them separately.

However, at this moment, these elite monsters turned their heads to attack the remaining elite monsters.

The remaining elite monsters originally wanted to attack Murong Xue and the other two. However, they were at a loss when they saw the sudden internal strife of the remaining elite monsters.

“What’s going on?” Xu Han’s face was filled with confusion. It was the first time he had seen these elite monsters fighting amongst themselves.

But logically speaking, it shouldn’t happen. These elite monsters were fine just a moment ago. Why did they suddenly start fighting amongst themselves?

On the other side, the elite monsters stopped chasing after Murong Xue and Allen Smith. Instead, they started fighting amongst themselves. Because of this, the two of them began to relax.

Murong Xue panted heavily and rested. Finally, she could take a breather.

After a series of high-intensity battles, no matter how much Murong Xue loved fighting, she was exhausted.

While resting, Murong Xue also did not understand the situation in front of her.

Why did these elite monsters suddenly start to fight among themselves?

While Allen Smith was resting, he noticed that Liu Yan had arrived on the other side.

Although he did not know what was going on with these elite monsters, Allen Smith immediately guessed that this should be Liu Yan’s doing.

Allen Smith was a little puzzled. He did not understand how Liu Yan did it.

Did Liu Yan cause these elite monsters to fight among themselves?

At this moment, Liu Yan walked to them.

Allen Smith saw Liu Yan walking over and couldn’t help but ask, “How did you do this?”

Xu Han and Murong Xue were confused, but they quickly reacted.

These elite monsters wouldn't suddenly start fighting among themselves. It must have something to do with Liu Yan.

Xu Han immediately looked at Liu Yan in disbelief and said, "Damn, did you do it, Liu Yan? How on earth did you do it?"

Murong Xue also looked at Liu Yan with a puzzled look, not understanding what was going on.

Murong Xue and Liu Yan had known each other for some time and knew how mysterious and powerful Liu Yan was. The situation this time was too unexpected. Murong Xue also did not understand how Liu Yan did it.

Murong Xue also remembered that Liu Yan did not have this ability in the past. Otherwise, when they encountered the fierce beast tide in the past, Liu Yan would have used this powerful ability.

In other words, Liu Yan should have obtained this mysterious ability recently.

At this time, Liu Yan would not explain too much to his curious and doubtful teammates. He smiled mysteriously and said, "Secret, secret. Hahaha."

Chapter 420: Victory at Last

Hearing Liu Yan's words, Murong Xue immediately rolled her eyes.

"If you don't want to say it, then don't want to say it." Murong Xue curled her lips and spoke.

Xu Han and Allen Smith saw that Liu Yan did not want to say anything. So naturally, they did not ask any more questions.

Everyone had their secrets, especially a genius like Liu Yan. He had too many secrets. So naturally, he could not tell them all.

Allen Smith glanced at the elite monsters who were still fighting among themselves not far away. It seemed that they did not need to fight at all.

"We can finally catch our breath." Xu Han sighed.

Although he did not know how Liu Yan did it, it was undoubtedly an immense help to them.

At this time, the battle was finally almost over. They could catch their breath.

There were too many dangers in this battle. It put a lot of pressure on them. It had been a long time since Xu Han had fought such a big battle.

"Oh, right." Xu Han suddenly remembered. He asked, "During the previous battle, I also noticed that the number of elite monsters kept increasing. Liu Yan, you should have also noticed this. That's why you went to their rear, right?"

Just now, the battle was urgent. After such a serious situation occurred, only Liu Yan could kill his way to the rear of the elite monsters to understand the situation.

Xu Han and the others could only deal with elite monsters in front of the battlefield. There was no way for them to go to the rear to check the situation.

When Allen Smith heard this, he looked at Liu Yan in confusion.

Just now, Allen Smith also noticed this. He was about to kill his way to the rear of the elite monsters to understand the situation. However, Allen Smith encountered layers and layers of obstacles from the elite monsters. He did not have enough strength to kill his way through the elite monsters and head to the rear of the elite monsters.

Fortunately, Liu Yan's strength was sufficient, and he could kill his way through.

Otherwise, they would face more powerful elite monsters as the battle continued. The key was that these elite monsters still had commanders. Their outcome would only be a failure, and there would be no chance.

At this moment, Murong Xue also said, "That's right. What exactly is going on? Why are there more and more elite monsters? It was too dangerous just now."

Even Murong Xue, who was battle-hungry, was shocked after experiencing such a big battle. Now, when she thought about it, she felt some lingering fear.

This battle against the fourth wave of elite monsters was tough and dangerous. If any of the links were to go wrong, they might lose. They would all die here.

First, they had to fight the elite monsters head-on. Facing an elite monster horde with a commander, the pressure of a head-on battle was extremely huge.

Luckily, they were resilient and cooperated well. They could withstand the pressure and have the stamina to fight against these elite monsters.

However, they encountered this crisis later on.

These elite monsters were initially strong and had many numbers. Yet, the more they fought, the more they fought. Who could withstand this?

Fortunately, Liu Yan successfully resolved this crisis. He solved the problem of the increasing number of elite monsters and also killed the commander of these elite monsters.

Without a commander, the elite monster hordes were undoubtedly much easier to defeat.

However, even so, Murong Xue and the other two, who had used up too much stamina and energy, were somewhat unable to defeat this large number of elite monsters.

Fortunately, Liu Yan rushed over at this moment and rescued them. Moreover, he used this strange and mysterious method to cause the remaining elite monsters to fight amongst themselves.

Murong Xue understood in her heart that this battle was scary. There was no need to say that they had made any mistakes. If they did not do it perfectly, they might end up suffering here.

At this moment, Liu Yan told the others about the situation.

First, Liu Yan discovered the strange situation and guessed that the Green Cloud Beast had done something. Then, he used all his strength to clear a path through the elite monsters and successfully went to the rear.

During the process, if it were not for the help of the ten red enchanted puppets, Liu Yan might not have been able to succeed at all.

When he reached the back, he realized that all of this was the doing of the Green Cloud Beast.

Liu Yan took action and successfully took down the Green Cloud Beast with the help of more than a dozen elite monsters. He did not continue to spawn elite monsters, and the remaining elite monsters did not have a commander anymore. It reduced the number of monsters to what it was now.

After listening to Liu Yan's explanation, they finally understood the actual situation. They could imagine how dangerous it was.

Liu Yan killed his way through so many powerful elite monsters. He successfully took down the Green Cloud Beast and more than ten elite monsters.

Although the Green Cloud Beast's combat strength was weaker, they knew how difficult it was to come into contact with the Green Cloud Beast.

Liu Yan's understatement was very likely that he had put in tons of effort and risked so much.

Fortunately, after experiencing many risks and dangers, they survived and were finally about to usher in victory.

At this time, the infighting among the elite monsters was almost over, so Liu Yan let Murong Xue kill them.

Liu Yan took out his S-grade weapon, Flying Cloud Mystic Bow, and activated his A-grade skill, Flame Control. Several arrows condensed from the fire elements appeared and were immediately shot out.

After a few arrows, the elite monsters that were already on the verge of death were killed instantly.

At the same time, Xu Han, Murong Xue, and Allen Smith also displayed their abilities and killed all the remaining elite monsters together.

Liu Yan and the others looked at the mess on the ground and the corpses of all sorts of elite monsters and could not help but sigh.

This battle had finally come to an end. Although the process was tortuous and dangerous, Liu Yan and the others still won. Liu Yan and the others also successfully dealt with all the elite monsters in the fourth wave.

"This battle was not easy." Xu Han sighed.

Liu Yan smiled. Although there were many dangers during the process, the gains were also huge.

Not only did Liu Yan gain a lot of combat experience, but he had just killed the last of the elite monsters. Liu Yan's grade had also successfully reached level 40, and his strength had increased quite a bit.

When he had just arrived at the fifth level of the Tower, Liu Yan's level was still relatively low, somewhat behind the ordinary members.

After all, he had been on the third-and-a-half level of the Tower for so long. Liu Yan's focus back then was building a perfect foundation and rebuilding his physical body. He had not trained or leveled up at all.

However, after entering the fifth level of the Tower, after a series of experiences, Liu Yan's level raised rapidly. He had long since caught up or surpassed the average team member.

This time, after killing the fourth wave of elite monsters, besides obtaining a large number of experience points, Liu Yan also got a bunch of attribute points, two godly skills, and a platinum treasure chest from the Green Cloud Beast.

There were also many bronze treasure chests, silver treasure chests, and even a few platinum treasure chests lying on the ground. Liu Yan and the others could not wait to pick them up.
