

Towers 431

Chapter 431: Godly Skill!

Liu Yan was satisfied.

Although Legendary Gemstone did not receive any buff from Divine Extraction, it was still good.

Just from the current situation, it could give Liu Yan's Blue Flame Gloves a tremendous buff. To be able to give an SS-grade weapon 50% buff was unbelievable.

Other than that, there was another new effect, Fist Aura Rampage.

Fist Aura Rampage's effect was powerful. It could be said to be a godly skill. More importantly, it made up for the lack of Liu Yan's AOE attack skill.

With Fist Aura Rampage's effect, if Liu Yan were to face the fourth wave of elite monsters again, it would be extremely easy for him.

Liu Yan would not need Xu Han and the others to help him. Liu Yan alone could take care of these elite monsters.

After all, with his S-grade skill Sonic Speed, Liu Yan was agile. These elite monsters could not even dream of touching Liu Yan.

No matter how many elite monsters there were, Liu Yan could also use Fist Aura Rampage to launch an AOE attack. He could annihilate them. It did not take much time at all.

After looking at the elite monsters that had been burned to ashes, Liu Yan put away his ashen fist gloves. Then, he stepped on his SS-grade equipment, Gale Boots, and soared into the air, heading towards the fire attribute territory.

Dealing with the fourth wave of elite monsters was only the first step. After that, Liu Yan still needed to deal with the final boss and obtain the only boss-killing reward. After that, he would deal with the other two forces.

Of course, the first thing to be taken care of was the remaining third wave of monsters in the fire attribute territory.

When Liu Yan returned to the fire attribute territory, members of the Land of Origin team were currently fighting against the third wave of ordinary monsters.

The individual strength of the third wave of ordinary monsters was far inferior to the team members. After all, these ordinary members had previously obtained high-grade cultivation resources and consumables. After using these cultivation resources, their levels and strength increased quite a bit. At this moment, it was relatively easy for them to face the third wave of ordinary monsters.

However, the number of ordinary monsters in the third wave was too high.

Although the ordinary members had already dealt with more than half of the monsters, there was still a lot of them left.

At this moment, the killing speed of the ordinary members had not increased much after Xu Han, Murong Xue, and Alan Smith joined the battle.

After observing for a while, Liu Yan discovered that these ordinary members could deal with these ordinary monsters easily. However, most of them did not have any AOE attack skill, so the speed of clearing the monsters was also relatively slow.

Among Murong Xue's group of three, only Xu Han had an AOE attack skill. The clearing speed of the monsters was a bit faster because of Xu Han.

Although Murong Xue and Alan Smith were powerful, they could only deal with the monsters one by one. Their speed was not amazingly fast.

Seeing this, Liu Yan was convinced that an AOE attack skill was rare. Fist Aura Rampage was even more like a godly skill.

High up in the sky, Liu Yan saw that there were still many monsters left in the third wave, so he decided to join the battle.

Holding the SS-grade weapon, Blue Flame Gloves, Liu Yan directly came to a group of monsters on the ground.

Several monsters around him rushed toward Liu Yan.

Liu Yan held the Blue Flame Gloves and activated his A-grade skill, Flame Control. Liu Yan's body was instantly covered with a terrifying fire attribute power.

These monsters were charging toward Liu Yan. However, they did not manage to attack Liu Yan's body because they were already burnt to smithereens by the fire attribute energy.

No matter how many monsters there were in the surroundings, they could not get close to Liu Yan.

As long as they got close to Liu Yan, they would be burnt to smithereens. At a certain distance, they would be burnt to smithereens.

However, these monsters were not afraid. They continued to charge toward Liu Yan. They were also burnt to smithereens.

Just by activating Flame Control, Liu Yan slaughtered these monsters in a brief time. Liu Yan's strength was far superior to these ordinary monsters.

Just one Flame Control was enough to kill ordinary monsters instantly.

When the team members saw that Liu Yan had joined the battle and was quickly clearing the monsters, their confidence immediately increased.

Liu Yan's previous deeds had long made him an idol in their hearts.

As long as Liu Yan was here, these ordinary members were full of confidence and would not be afraid.

Liu Yan was practically the heart of the Land of Origin team.

“It’s Captain. Captain Liu is back!”

“Captain Liu is back. We can clean up these monsters quickly.”

“Brothers put in more effort. Captain Liu is watching us. Bring out our strength.”

“We cannot let him down!”

...

The team members were inspired by Liu Yan. They immediately burst out with all their strength, quickly killing these monsters.

When Liu Yan saw this scene, he was satisfied.

Although the strength of these team members was not comparable to Murong Xue and the other top team members, they had an advantage in numbers.

Although the strength of these many members was not particularly outstanding, every one of them was not weak. When all the members gathered together, they would naturally possess a terrifying strength.

The Land of Origin had become much stronger after they entered the fifth level of the Tower. The strength and cohesion of the team became stronger. Their overall strength had obtained a frightening improvement.

Immediately, Liu Yan withdrew his gaze and began the battle.

Liu Yan’s body was covered with a terrifying fire attribute elemental energy under the effect of Flame Control.

The fire attribute energy of the Blue Fist Gloves received an 80% boost. It was even more terrifying.

Immediately, Liu Yan threw a punch.

Liu Yan did not use any other buffing skill. It was just an ordinary punch. However, Liu Yan’s strength was already strong. With the buffs of Blue Flame Gloves and Flame Control, the power of this punch was also extremely terrifying.

The monster was hit by Liu Yan’s punch and turned into powder instantly.

Following that, the fist wave spread out in a big fan-shaped area.

The fire attribute power mixed with the power of the fist wave was terrifying. The monsters that came into contact with it were killed in the blink of an eye.

The flames burned the remaining broken limbs and bones. There was not a single living monster left.

Liu Yan looked forward. All the ordinary monsters in this huge fan-shaped area were killed by Liu Yan’s punch.

Hundreds of monsters were killed by Liu Yan’s punch instantly!

Seeing such an exaggerated effect, Liu Yan was surprised and happy. This punch was simply a godly AOE attack!

Chapter 432: One Person Is Equal to a Team?

In the fire attribute territory.

The members of the Land of Origin were all shocked when they saw Liu Yan kill hundreds of monsters with a single punch.

“Damn, it’s so powerful!”

“This is too domineering. He can kill hundreds of monsters with a single punch.”

“I don’t know how long it will take me to kill hundreds of monsters alone. Even our entire team would need a few minutes to kill hundreds of monsters, right?”

“Captain Liu killed hundreds of monsters as fast as our entire team.”

“His strength is too terrifying.”

...

The team members had long known about Liu Yan’s heaven-defying strength.

On the fourth level of the Tower, many of them had already witnessed Liu Yan’s terrifying strength during the trials on the five altars.

However, no one had expected that Liu Yan’s strength had already reached such a terrifying level.

With a single punch, Liu Yan had easily killed hundreds of monsters.

The Land of Origin team cleared the monsters much faster with the support of 20 white enchanted puppets and the addition of Xu Han and the other three top-tier members.

But even so, it would still take the entire team one or two minutes to clear hundreds of monsters.

But Liu Yan alone had killed hundreds of monsters with one punch.

The speed of Liu Yan clearing the monsters alone was faster than the entire team!

Murong Xue, who was in the midst of the battle, saw this scene and immediately felt a little envious.

She was taking down the monsters one by one, but Liu Yan was different. With one punch, he had cleared hundreds of monsters. He was way stronger than her.

“Where did he get such a strong AOE skill? When can I have an AOE skill too? Then I won’t have to work so hard.” Murong Xue complained.

Chu Long, who was at the side, noticed this scene and analyzed, “He probably just got an AOE skill. Otherwise, Brother Liu Yan would use it before.”

Compared to the other people, Xu Han was even more shocked.

Other people did not have an AOE attack skill, so they did not know how powerful Liu Yan's AOE attack skill was. They only knew that it was an AOE attack skill.

However, Xu Han had an AOE attack skill, so he knew better.

Usually, for an awakened one to unleash an AOE attack skill with their 20% individual combat strength was not bad.

The ones who could unleash 30% of combat strength were already extremely powerful. They could be considered genius.

Even if Xu Han did it to the extreme, he could only unleash 40% of his combat strength.

However, Xu Han did not know how strong Liu Yan's punch was, but he felt it was at least 60%.

Just thinking about it made Xu Han feel terrified. To be able to unleash 60% of one's combat strength or even a higher AOE skill, Liu Yan was simply a godly existence.

With this ridiculously powerful AOE attack skill, Liu Yan's combat strength was over the chart.

Especially in such a large-scale battle, it was a stage for him to display his strength.

Xu Han was best at spell attacks and was also extremely good at AOE attacks.

But now, Liu Yan had suddenly surpassed him in the aspect that Xu Han was best at.

Xu Han sighed. He had always been known as a proud son of heaven. But he had to admit that he was indeed inferior to Liu Yan.

Xu Han could only continue to fight and work harder in the future to see if he could surpass Liu Yan or get close to Liu Yan.

Instead of completely surpassing Liu Yan, Xu Han felt that he should be better than Liu Yan in the area that he was best at. Otherwise, it would be too embarrassing.

At the same time, Liu Yan did not know that his punch had caused such a huge commotion. He also did not know what kind of shock this punch had caused Xu Han.

After witnessing the terrifying power of this punch, Liu Yan was beaming with joy as he faced the remaining large number of monsters in the third wave.

He kept throwing punches. The fist waves that were covered with fire attribute continuously shot out. Immediately, large groups of monsters fell one after another.

Not long after, Liu Yan cleared out an empty area.

Other places were filled with monsters. Only the monsters on Liu Yan's side had been instantly killed by Liu Yan. The monsters behind him had not had the time to replenish themselves.

In the middle of the densely packed monsters, there was an empty space that was extremely eye-catching.

Liu Yan immediately continued to fight, helping his team members quickly finish off these monsters.

With Liu Yan's participation, the Land of Origin team cleared the remaining monsters much faster.

In a few minutes, Liu Yan and the team members took care of all the remaining monsters in the third wave.

The corpses of the monsters were everywhere on the battlefield. The battle had finally ended.

The ordinary members had cleared the first two waves.

Then, they cleared half of the third wave. The rest had been taken care of by Liu Yan, Xu Han, and a few other top-tier members.

The fourth wave of elite monsters had been taken care of by Liu Yan and a few other top-tier members.

The only remaining monster was the fifth wave's only boss.

Liu Yan looked at the battlefield filled with monster corpses and ordered his team members to burn them. Then, they quickly repaired themselves to restore their combat strength.

Although in the middle of each wave of monsters, the team members had some rest time.

After all, the Land of Origin team took the initiative to attack the monsters here. In addition to their powerful strength, the speed of clearing the monsters was naturally faster. This way, they had more rest time.

But even so, these team members fought for a long time and killed three waves of monsters.

Not only did the strength of each wave of monsters increase, but the number of monsters also continued to increase.

The number of monsters in the third wave reached a terrifying level.

Members of the Land of Origin team had long been tired and needed to rest.

While the members were resting, Liu Yan knew the situation in the other territories through the intelligence gathered by Purple Wind Falcon.

Although the Red Star Empire team from the earth attribute territory had a favorable terrain to defend, they had lost some of their strength. They still kept their experts from participating in the battle.

It was indeed easy for them to defend against the monsters. However, their speed of clearing the monsters was also relatively slow.

The Red Star Empire team had just started clearing the third wave of normal monsters not long ago.

Ye Yifan was forced to let all the experts join the battle to share the burden of the ordinary members.

The Red Star Empire team was so slow. It was obvious they could not catch up to Liu Yan's team. Liu Yan immediately felt relieved.

Liu Yan estimated that by the time he and his team finished the final boss, the Red Star Empire might not have finished off the third wave of monsters. They could not pose any threat to Liu Yan and his team at all. They were surrounded by monsters.

Chapter 433: The Perfect Plan

In the fire attribute territory.

The team members were resting after the battle. Liu Yan was trying to understand the situation in the other territories.

The Red Star Empire team in the earth attribute territory was too slow in clearing the monsters. They were no longer a threat.

The situation was much better for the European Federation team in the water attribute territory.

After all, the European Federation team had not lost much combat strength. During the attack of the Red Star Empire team, they had taken a steady tactic and had not lost much strength. Moreover, they had the help of the members of the New Continent team, so the losses were even smaller.

Later, when Liu Yan led members of the Land of Origin team to attack the metal attribute New Continent team. As a result, the reinforcement of the European Federation team had not arrived smoothly. During the process, they only suffered some minor losses from being ambushed.

Although the European Federation team had suffered frequent losses up until now, they did not lose much combat strength. On the contrary, they were surprisingly strong.

The European Federation team deployed all their members to participate in the battle against the monster riot. In the beginning, they were more passive in their defense, and the speed of clearing the monsters was slower. Later, they changed to attack, and their clearing speed became faster.

By now, the European Federation team had already cleared more than half of the third wave of ordinary monsters.

They only needed to clear the remaining third wave of ordinary monsters before the fourth wave of elite monsters. Then, they would catch up with Liu Yan's team.

Although the European Federation team could not be the first team to fight the boss, they could make it in time before Liu Yan's team finished their battle with the boss.

Liu Yan frowned slightly. The European Federation team was still a threat. It seemed they had to deal with the boss as soon as possible when it spawned.

If they delayed for a long time, things would change when the European Federation team arrived. It might even be a little dangerous.

The Pan-ocean Community team in the wood attribute territory and the New Continent team in the metal attribute territory were in similar situations.

The strength of these two teams was relatively average, but they had the support of Liu Yan's enchanted puppets. The overall pressure was not high, but the speed of clearing the monsters was a little slow. Currently, they had just cleared half of the third wave of ordinary monsters.

After Liu Yan learned about the situation of the other four territories, he thought about the decision based on the current situation.

Not long after, Liu Yan had an idea in his mind.

The Red Star Empire team was no longer a threat. Liu Yan did not need to worry about them.

The European Federation team might be able to make it in time to pose a threat, or they might not be able to make it in time. The specifics would depend on how long Liu Yan and the others could take to finish the final boss.

Of course, Liu Yan would lead his team to finish the boss as soon as possible. However, he had to keep a backup plan to ensure nothing went wrong.

The backup plan would be the Pan-ocean Community team and the New Continent team.

The strength of these two teams was relatively average, but they were still two teams. They had many people, so their overall combat strength was still impressive.

The ordinary members of the Land of Origin team might not be of much help in the fight against the boss. After all, the difference in strength was too big. When the time came, not only would they not be of much help, but they also might even become a hindrance.

Instead, it was better to send them to the wood attribute territory and metal attribute territory to support these two teams.

With the support of members of the Land of Origin team, the Pan-ocean Community team and the New Continent team could clear the monsters much faster. They would also be able to catch up with the progress of the European Federation team.

If Liu Yan and the others could not finish off the boss before the European Federation team arrived, they could wait for the support of the ordinary members of the Land of Origin team, the New Continent team, and the Pan-ocean Community team.

Most of these members were only ordinary members, and their strength was relatively average. Hence, they would not be of much use against the boss. However, they would be of great use against the European Federation team. It was especially true when there were three times as many people as the European Federation team. It would also have an absolute advantage.

This strategy was equivalent to letting the ordinary members, who were currently unable to be of any use, help the New Continent team and the Pan-ocean Community team. This way, the two teams could end the battle as soon as possible and be liberated. Then, they could deal with the European Federation team together!

After thinking about it, Liu Yan felt that this strategy was perfect.

Following that, Liu Yan stepped on his SS-grade equipment, Gale Boots, and arrived above the Land of Origin. He gave the order to all members to split into two groups. They would head to the wood attribute territory and the water attribute territory to provide support.

After helping the two teams of the two territories deal with all the third wave of monsters and fourth wave of elite monsters, they would rush over to Liu Yan and the others. They would support the battle together and deal with the European Federation team together.

Meanwhile, Liu Yan would lead Murong Xue and other top players, as well as experts like Zheng Tainan, Liu Qing, Liu Ning, and Chu Cunrui. When the final boss spawned, they would go and deal with the boss together.

It would be even better if they could finish off the boss quickly. If they could not do so and were caught up by the European Federation team, the members of their three representative teams could support them. They would also be able to suppress the European Federation team with an absolute advantage in numbers to ensure that nothing would go wrong.

Very quickly, the ordinary members of the Land of Origin team set off according to Liu Yan's orders. They split up to support the Pan-ocean Community team of the wood attribute territory and the New Continent team of the metal attribute territory.

Liu Yan and the others did not rest for long before the notification of the Will of Tower sounded.

"The Moonshine Qilin has spawned. Its location is in the middle of the five territories!"

"After the final boss is killed, it will drop a diamond treasure chest. The winner will receive a generous reward!"

Hearing the Will of Tower announcing the arrival of the final boss, Liu Yan stood up and prepared to set off.

On the other side, Murong Xue, Xu Han, Alan Smith, Chu Long, Zheng Tainan, Chu Cunrui, and a few other top experts stood up. They had more than ten people, and they prepared to go with Liu Yan to kill the final boss.

These ten people were the top-tier combat strength of the Land of Origin team, the New Continent team, and the Pan-ocean Community team. They were the essence of the three representative teams.

Liu Yan's trip was equivalent to gathering the top-tier combat strength of the three representative teams to deal with the final boss. Naturally, he was full of confidence.

"Let's go!"

Liu Yan gave the order.

The guardian beast, Undying Fire Phoenix, was leading the way. Liu Yan stepped on the SS-grade equipment, Gale Boots, and followed closely behind in the air.

More than ten members followed behind and set off together.

Chapter 434: Two-sided Pincer Attack

Wood attribute territory.

He Yang was leading the members of the Pan-ocean Community team, tenaciously fighting against the third wave of ordinary monsters.

Although the third wave was still ordinary monsters, the strength and number of monsters had been greatly improved.

The Pan-ocean Community team was also relying on the favorable terrain. Liu Yan's red enchanted puppets were constantly fighting monsters in front of them, relieving the pressure on the team members. The Pan-ocean Community team could only hold on for now. However, their speed of clearing the monsters was naturally slower.

He Yang looked at the situation in front of him. He could not help but be a little worried.

Although they could still defend now, he did not know when they would be able to clear the monsters.

If they continued to fight like this, it would undoubtedly be extremely disadvantageous to the Pan-ocean Community team.

These members had already been fighting continuously and were already exhausted. There was a limit to how long they could hold on.

If they continued to fight like this, it was very likely that they could not finish off all the monsters in the third wave. Some members of the Pan-ocean Community team would not be holding on for long.

However, He Yang did not have any solutions at the moment. His strength was limited.

At this moment, He Yang could not understand how Liu Yan's team could clear all the monsters in the third wave so quickly. They had already started to deal with the elite monsters, and it required great strength.

The members of the Pan-ocean Community team were also somewhat depressed at this moment. They were tired of fighting, and the overall atmosphere was not too good. Their morale was shaken.

However, a member shouted, "Quick, look over there. Are those the members of the Land of Origin team? Are they here to support us?"

Upon hearing this member's shout, many members of the Pan-ocean Community team who were fighting looked into the distance.

He Yang also followed and looked over.

In the distance, a team appeared behind the third wave of monsters.

These members were the members of the Land of Origin team.

There were not many of them. It seemed that only half of the members of the Land of Origin team were present.

However, these members of the Land of Origin team had charged out from behind the third wave of monsters. The monsters were caught off guard. The Land of Origin team quickly cleared up these monsters.

For a moment, the aggro of these monsters was a little chaotic.

Their greatest aggro was naturally the guardian beast of the wood attribute territory, Sturdy Back Ape. Other than that, it was the members in front of them.

The members and their guardian beast of the Pan-ocean Community team were all in the same direction.

Now, members of the Land of Origin team suddenly appeared behind them.

The aggro of many monsters was attracted by the members of the Land of Origin team.

Suddenly, the aggro of the overall monsters was somewhat chaotic. Some monsters changed their aggro to the members of the Land of Origin team, which immediately reduced the pressure on the Pan-ocean Community team.

When half of the Land of Origin team appeared, they quickly killed monsters. At the same time, they helped the Pan-ocean Community team relieve a lot of pressure.

The members of the Land of Origin team were not defending. They were in an offensive formation, charging at the monsters and killing them. They disrupted the monsters' formation, and the battlefield immediately became chaotic.

The members of the Pan-ocean Community team, who were initially depressed, had less pressure. The Land of Origin team shared a lot of their burden. At the same time, they were excited to see members of the Land of Origin team taking the initiative to fight against the third wave of monsters, directly disrupting the overall monster formation.

"Why are the members of the Land of Origin team here?"

"They came just in time. They immediately disrupted the monster formation."

"Are they here to support us? That's great!"

"This will make things much easier for us. We finally have a chance."

"That's great. Look at the mess these monsters are in. Hahaha!"

...

He Yang was also a little confused at this moment. Weren't the Land of Origin dealing with the fourth wave of elite monsters? Could it be that they had killed the elite monsters already?

He Yang could not believe it. They were also a representative team from the same continent, and his team had more people than the Land of Origin team.

However, the Pan-ocean Community team was struggling to deal with the third wave of monsters that were almost as strong as them. They had not cleared half of the wave yet.

On the other hand, the Land of Origin team had not only cleared the third wave of monsters, but it seemed that they had also cleared the fourth wave of elite monsters.

Other than that, He Yang could not think of how the Land of Origin team could support them. Only by dealing with the elite monsters in the fourth wave could they free up their hands to assist them.

He Yang did not understand how the Land of Origin team did it, but he did not have the time to overthink.

Although members of the Land of Origin team that came to support them were strong, they did not have many people. They had to face tons of monsters in the third wave. The number of people was too small.

The Land of Origin team's attack was effective because they were strong and had a good offensive formation. Besides, they also ambushed the monsters instantly.

When the third wave of monsters gained a firm foothold, the members of the Land of Origin would be in danger.

As for He Yang, he naturally would not wait for his doom. He immediately seized the opportunity.

He Yang looked at the members of the Pan-ocean Community team who were excited about the arrival of the reinforcements from the Land of Origin team. He shouted, "Brothers, we have been defending for so long. We can finally show our strength and attack. Now that the reinforcements from the other side have arrived, this is our best chance! Listen to my orders. All members, change your battle plans and give up on defending. Start attacking. Form a pincer attack with reinforcements from the Land of Origin team. Attack all the monsters on your initiative and take care of all the monsters in one go!"

In order to fight conservatively, many team members had been defending. They had been holding their breaths and wanted to show off their skills.

Now that the reinforcements from the other side had arrived, it was undoubtedly the best time to attack. With both sides holding back and pincer attacks, there was a chance to eliminate all the remaining monsters in the third wave.

When the Pan-ocean Community team heard He Yang's orders, they formed a formation and took the initiative to attack. They charged forward bravely!

Chapter 435: Moonshine Qilin

Metal attribute territory.

Jin Cheng led the members of the New Continent team to fight against the third wave of monsters.

Their battle plan was similar to the Pan-ocean Community team in the wood attribute territory. They were using the advantageous terrain to defend.

However, the terrain in the metal attribute territory was better. While defending, many members could deal damage to the monsters.

In addition, the expert members of the New Continent team were slightly stronger. It was undoubtedly much easier to deal with these monsters.

More than half of the monsters in the third wave had been killed by the New Continent team.

Although there were still a lot of monsters left, they could not pose much of a threat to the New Continent team. It was only a matter of time before they were killed.

Jin Cheng was initially confident that his speed was not bad. He should be considered relatively fast among the five territories.

However, through the notification from the Will of Tower, Jin Cheng learned that Liu Yan's team had completed the first kill of the elite monsters. Only then did Jin Cheng know that although his team's speed was relatively fast, it was still slower than Liu Yan's team.

Jin Cheng was struck by a blow. He did not understand how the Land of Origin team had done it.

The New Continent team had utilized the terrain to deal with the monsters. Their team members were also quite strong. They performed well in all aspects.

Even so, their progress was still lagging behind the Land of Origin team by quite a bit.

Jin Cheng sighed slightly. Perhaps this was the saying that there was always someone better out there.

Jin Cheng was observing the situation on the battlefield when he suddenly noticed that a team had appeared in the distance. They had already set up their attack formation and were ready to attack the monsters.

After taking a closer look, Jin Cheng finally recognized that this team that had suddenly appeared was the Land of Origin team. However, there were not many of them. It seemed that only half of them were there.

"Strange. Why did the Land of Origin team support us? Have they cleared all the monsters in the fourth wave? Otherwise, they would not have been able to spare their hands to support us," Jin Cheng said with some confusion.

The few people beside him looked at each other when they heard this. They were also confused.

"I don't understand. What is the situation with the Land of Origin team?"

"I thought they were clearing the fourth wave of monsters at a much faster speed than us. I didn't expect they had already finished the fourth wave of monsters."

"Their progress is too fast. How did they do it?"

"The Land of Origin team is weird."

...

Jin Cheng shook his head slightly. He did not understand what was going on either.

However, it was not the time to overthink.

The support team on the opposite side was already in formation and ready to attack the monsters. Jin Cheng also hurriedly ordered, "All team members, pull up your firepower and prepare to attract these

monsters. Cooperate with the reinforcement team on the opposite side and kill all the remaining monsters in one go!”

When members of the New Continent team heard this, they finally noticed that the reinforcement team had arrived in the distance.

Immediately, they had their DPS maxed out. They no longer held back their strength and tried their best to deal as much damage as possible. They attracted these monsters and created space for the reinforcements on the other side.

On the other side, half of the Land of Origin team did not hesitate. After the formation was activated, they took the initiative to attack the monsters.

Although there were many of these monsters, their strength was still quite strong.

However, members of the Land of Origin team improved themselves using high-grade cultivation resources and consumables. After that, their levels and strength increased quite a lot.

At this moment, the ordinary members of the Land of Origin team were extremely relaxed when facing these monsters alone. They were far from having the same difficulty as the other team members.

Members of the Land of Origin were excited and confident due to the smooth battle in the fire attribute territory. They were not afraid when facing the monsters and took the initiative to launch an assault.

Half of the reinforcements from the Land of Origin team, coupled with the full firepower of the New Continent team started a massacre of the remaining monsters. The battle situation was one-sided. These monsters were not a match for the members of the two teams. They were being slaughtered.

After the wood attribute territory and metal attribute territory had reinforcements from the Land of Origin team, the battle went smoothly. At the same time, Liu Yan led a group of experts to the battlefield of Liu Yan and the other. They were ready to launch a battle against the final boss.

Liu Yan and the others arrived at the central area of the five attribute territories.

In the sky, the guardian beast of the fire-attribute territory, the Undying Fire Phoenix, hovered. Liu Yan stood in the air on his SS-grade equipment, Gale Boots.

On the ground, Murong Xue, Alan Smith, Zheng Tainan, Chu Cunrui, and the other experts came into formation.

Xu Han led a group of long-ranged experts led by Xu Han. Chu Long, who acted as support and priest, worked together in the overall battle.

In front of Liu Yan and the others was a gigantic fierce beast.

This fierce beast was huge, as big as a small mountain. Its appearance was somewhat similar to the legendary qilin.

From its outer shape, it had a lion’s head, antlers, tiger eyes, an elk body, dragon scales, and an ox tail. Its tail was like a dragon’s tail, with a horn and meat.

All of its physical features were similar to the legendary qilin.

The only difference was that the legendary qilin was completely red and black.

On the other hand, the giant fierce beast in front of Liu Yan was covered in white and silver moonlight.

Liu Yan checked the information of the final boss.

[Moonshine Qilin]

Potential: SS-grade

Level: 70

Description: It absorbs the power of moonlight all year round. It possesses the power to destroy the world. After being defeated by a mysterious big shot and suppressed here. Its strength has been greatly restricted!

Liu Yan looked at the information of the final boss in the distance, and his eyes instantly turned cold.

It was a potential SS-grade, a level 70 powerful fierce beast.

With Liu Yan's strength, he was able to deal with the potential SS grade level 60 guardian beast, the Sturdy Back Ape.

However, Moonshine Qilin's potential was also SS-grade, but its level was suddenly ten levels higher.

The higher the level, the higher the strength.

The Moonshine Qilin's level was ten levels higher than Study Back Ape, but its combat strength was not just a little bit higher.

Through the Moonshine Qilin's introduction panel, Liu Yan also understood that the Moonshine Qilin should be somewhat similar to the Golden-armored Blue Ape he had met on the third level of the Tower. They were both extremely powerful existences that had been suppressed. Their strength had been restricted.

Even though the Moonshine Qilin's strength had been restricted, it still possessed terrifying strength.

Liu Yan did not dare to imagine how terrifying its combat strength would be if it had not been restricted.

Perhaps this was the strength of the Moonshine qilin!

Chapter 436: Probing Attack

In the middle of the five attribute territories.

When Liu Yan and the others saw the powerful Moonshine Qilin, they had solemn expressions.

This final boss was undoubtedly powerful.

Although their talent and guardian beast were SS-grade, Moonshine Qilin's level was much higher, reaching level 70.

A level 70 fierce beast with the same talent, the Moonshine Qilin, would probably have no problem facing ten level 60 guardian beasts.

When one was at a low level, many factors would affect one's combat power. The effect of the level was not obvious.

However, when one reached a high level, each level would give a substantial increase in strength. The difference between the ten levels was significant.

"I didn't expect the final boss to be so strong. Are we experts no match for it?" Zheng Tainan could not help but retreat.

Liu Qing also said, "Yeah, it's too strong. We can't even defeat a guardian beast, let alone this boss. Why don't we wait for all the team members to arrive and attack together?"

"Yeah, if the battle in the metal attribute territory and the wood attribute territory ends, we will have more team members. Also, the two more guardian beasts will join the battle too." Liu Ning also said.

At this moment, Xu Han's expression was a little solemn. However, he shook her head slightly and said, "Those members are weaker. No matter how many of them there are, they will still be cannon fodders when fighting Moonshine Qilin. It's meaningless. Moreover, the two guardian beasts have experienced a long battle. Their combat strength has decreased. They won't pose much of a threat to the Moonshine Qilin."

Murong Xue said indifferently, "So what if the Moonshine Qilin is strong? We're not weak. All the experts from the three teams are here. More than ten experts are fighting against one Moonshine Qilin. I don't believe we can't take it down."

Allen Smith did not say anything, but he stared at the tall Moonshine Qilin with a fiery expression.

Moonshine Qilin was extremely powerful. It aroused Allen Smith's desire to fight.

Such a powerful opponent was rare to see.

Chu Cunrui had a solemn expression as he said, "This Moonshine Qilin is stronger than expected. With so many experts, we might not even be a match for the Moonshine Qilin. We have to be careful."

At this moment, Liu Yan, who was in the sky, understood the Moonshine Qilin's combat strength. He also knew that this battle was not easy.

However, Liu Yan also understood that they had to fight this battle.

They had to defeat the final boss sooner or later.

It was better to deal with it sooner rather than later. After all, the Red Star Empire team and the European Federation team were currently being entangled by the monsters. They could not break out of the encirclement yet.

After the two teams finished dealing with the monsters, they would be able to escape.

At that time, Liu Yan would no longer be able to make a move against the Moonshine Qilin.

It was the best time for Liu Yan and the others to fight the Moonshine Qilin. At the same time, it was also their only chance.

Although Liu Yan was somewhat uncertain, he could only give it a try. He immediately ordered, "Get into formation. Those good at close combat cover the front and protect the back. Pay attention to the formation. Try to attack first and test out the strength of the Moonshine Qilin!"

When the experts heard this, they immediately got into formation and prepared for battle.

Liu Yan glanced at Murong Xue, and Murong Xue immediately understood. She picked up the S-grade shield, Rock Shield, and pushed it forward.

Among these experts, the one with the strongest combat strength was not Murong Xue.

But when it came to frontal defense, the strongest was undoubtedly Murong Xue.

Even Liu Yan's defense was not as good as Murong Xue's.

After all, Murong Xue had two high-grade defense equipment, the S-grade Rock Shield and S-grade Shiny Golden Armor.

Murong Xue was also a rock pugilist. Her job and attribute were all extremely good at defense.

With all aspects combined, Murong Xue's defense had already reached an extremely exaggerated level.

At this moment, Murong Xue directly held the Rock Shield and approached the Moonshine Qilin.

After reaching a certain distance, Murong Xue activated to level 4 of the Tyrant Body, and her entire aura changed.

The level 4 Tyrant Body was already the highest level of the Tyrant Body that Murong Xue could now skillfully activate. It could bring Murong Xue a remarkable increase in strength and defense.

At the same time, Murong Xue also activated a series of defense skills. Murong Xue's body and the Rock Shield were surrounded with earth attribute energy, greatly increasing Murong Xue's defense.

Although Murong Xue seemed not afraid, she was aware of the Moonshine Qilin's strength in her heart. She did not dare to lower her guard and directly used her strongest defense state to face the Moonshine Qilin. She wanted to test the Moonshine Qilin's combat strength.

However, even though the Moonshine Qilin was extremely powerful, Murong Xue was not too worried.

After all, Murong Xue was best at defense. Her defense was over the chart.

Even though the Moonshine Qilin was extremely powerful, Murong Xue was confident in her defense. At the very least, she could withstand the Moonshine Qilin for a short period.

At the same time, Murong Xue prepared to use God's Effect of the Rock Shield to block.

The God's Effect of the Rock Shield could block and instantly increase her defensive abilities by ten times.

Although it was only for a short period and could only be used five times a day, it was not a problem to use it for emergencies and self-protection.

As Murong Xue moved forward, the team members behind her were also making preparations.

Chu Long's staff was already emitting a milky white light. Her body was covered with a holy aura. She had already prepared a powerful healing spell. It would heal Murong Xue the moment she was attacked by the Moonshine Qilin. It could ensure that Murong Xue would not be in danger.

At this moment, Xu Han's Phantom Blue Staff was also emitting blue light. A terrifying amount of frost energy covered his entire body.

If Moonshine Qilin wanted to pursue and attack, Xu Han would naturally control it to stop and delay Moonshine Qilin's attack. He would protect Murong Xue, himself, and the rest of the team.

The rest of the team members, who had various long-range skills, were also making preparations.

In the sky, Liu Yan had also taken out his Flying Cloud Mystic bow, a grade S weapon, and was making preparations.

Murong Xue's main objective was to test the Moonshine Qilin's attack and agility attributes. The rest of the team members would work together to protect Murong Xue and themselves.

Liu Yan wanted naturally needed to test Moonshine Qilin's defensive ability.

Only by testing Moonshine Qilin's combat strength would Liu Yan and the others know Moonshine Qilin's various abilities. Only then would they come out with a battle plan and start the battle.

Knew yourself and your enemy, and you would never be defeated in a hundred battles.

At this moment, Liu Yan saw that Murong Xue had already gotten close to Moonshine Qilin by a certain distance. Liu Yan also raised his Flying Cloud Mystic Bow and prepared to launch his attack.

Chapter 437: Terrifying Defense

In the middle of the space in the middle of the five territories.

Liu Yan led a group of experts to prepare for a decisive battle with the final boss, Moonshine Qilin.

At this moment, Liu Yan saw that Murong Xue had already closed the distance and was about to launch a probing attack.

Liu Yan also caught up. He raised his S-grade weapon, Flying Cloud Mystic Bow, and activated his S-grade skill, the Power of the Earth.

Liu Yan instantly received a terrifying power boost. He immediately drew the Flying Cloud Mystic Bow into a full moon shape, filled with terrifying power.

At the same time, Liu Yan also activated his SS-grade skill, Gold Secret Art.

A terrifying metal attribute elemental condensation formed the arrow feathers.

Liu Yan currently possessed SS-grade Gold Secret Art, which was considered the highest grade among all of Liu Yan's attributes.

The Wood Secret Art and the Gold Secret Art were SS-grade. But in terms of offensive ability, the Gold Secret Art was stronger.

Facing the powerful Moonshine Qilin, Liu Yan didn't dare to let his guard down. He immediately launched his powerful attack, showing full respect.

The arrows filled with terrifying power and metal attribute elemental power instantly shot out, heading towards the Moonshine Qilin.

The Moonshine Qilin reacted in an instant. It raised its head and looked at Liu Yan and the arrow in the sky with a human-like expression. Its eyes seemed to be filled with contempt. It didn't take Liu Yan's attack seriously. It didn't even dodge Liu Yan's attack.

Liu Yan's arrow landed on Moonshine Qilin's body.

However, the arrow, which contained terrifying power and the metal attribute, did not pierce through the scales of the Moonshine Qilin. It did not even leave a scratch.

At the same time, Murong Xue arrived in front of the Moonshine Qilin and used a shield strike.

Shield strike's attack power was not strong, so it naturally could not cause any damage to the Moonshine Qilin. However, it was enough to attract the Moonshine Qilin's aggro.

The Moonshine Qilin raised its head and roared, then attacked Murong Xue.

In the sky, Liu Yan could not help but feel a little worried.

The strength of the Moonshine Qilin had somewhat exceeded Liu Yan's expectations.

After all, it was a level 70 fierce beast with an SS-grade potential.

It was the most powerful fierce beast that Liu Yan had encountered, other than the Golden-armored Blue Ape.

The arrow just now had been enhanced by the Flying Cloud Mystic Bow. In addition, it had also been enhanced by Liu Yan's S-grade skill, Power of the Earth, and his SS-grade skill, Gold Secret Art.

Not to mention that it was Liu Yan's strongest attack, it was at least an arrow that Liu Yan had used most of his strength to shoot.

However, this arrow did not cause any damage to the Moonshine Qilin.

Liu Yan had already expected the Moonshine Qilin to be extremely powerful. He guessed that his arrow would not be able to cause any effective damage.

However, Liu Yan did not expect that this arrow would not even be able to leave a mark on the scales of the Moonshine Qilin, let alone pierce through its scales.

This Moonshine Qilin was stronger than Liu Yan had expected.

Murong Xue, who was on the ground, could not help but make Liu Yan worry.

He did not know if Murong Xue could withstand the attack from Moonshine Qilin.

At this moment, the Moonshine Qilin's attack had already landed on Murong Xue.

Murong Xue was holding onto the Rock Shield. The shield and her body were emitting a thick earthen yellow light. It was the rock attribute that was continuously strengthening Murong Xue's defense.

Murong Xue had already made ample preparations and brought out her strongest defense.

When Moonshine Qilin's attack landed, Murong Xue took a few steps back, but it did not cause serious damage.

Behind her, Chu Long's healing skill had already landed on Murong Xue at the same time. It increased Murong Xue's healing and defense abilities.

Previously, Chu Long wasn't sure if Murong Xue could withstand the Moonshine Qilin's attack. For the sake of safety, she didn't care if Murong Xue would be able to resist it and directly used her healing.

Not far away, Xu Han also activated her frost attribute skill.

A layer of frost descended from the sky, directly covering the Moonshine Qilin and slowing it down, preventing the Moonshine Qilin from continuously attacking and instantly finishing off Murong Xue.

This round of attacks from Liu Yan and Murong Xue was just a probing attack. It wasn't a real attack.

After one attack, Murong Xue and Liu Yan retreated to the back.

The Moonshine Qilin chased after them. It only stopped in the distance and calmly looked at Liu Yan and the others.

The attacks from Liu Yan and Murong Xue were too light and not enough to attract the Moonshine Qilin's aggro. Moonshine Qilin didn't take Liu Yan and the others too seriously.

Liu Yan returned to his original spot and observed the Moonshine Qilin in the distance. His expression became stern.

The Moonshine Qilin was unexpectedly robust.

From the simple exchange just now, Liu Yan had obtained two pieces of information.

One was that Moonshine Qilin's defense was extremely shocking. It didn't dodge the attack or use any defense skills. It relied on the terrifying scales on its body to carry out a defense. It possessed a terrifying defense.

The powerful arrow that Liu Yan used had half of his strength. However, it couldn't even cause any damage to the Moonshine Qilin, let alone deal any effective damage.

Even if Liu Yan used all of his strength, it would be difficult for him to deal any effective damage to the Moonshine Qilin.

As for the others, their strength wasn't even as good as Liu Yan's, so they were even more unable to deal any effective damage to the Moonshine Qilin.

On the other hand, Moonshine Qilin's offensive ability was not overwhelming as its defense.

When the Moonshine Qilin attacked Murong Xue, Murong Xue completely blocked it.

Moonshine Qilin's offensive ability was relatively average compared to its defense.

Liu Yan told his findings to the others.

When the others heard this, their faces couldn't help but turn solemn.

On the contrary, Xu Han said with a relaxed expression, "This might be good news for us. At the very least, our front row can withstand the Moonshine Qilin, and we can launch a siege. As for the Moonshine Qilin. Its defense is astonishing, but we can attack it with many attribute attacks and methods. I believe we will be able to destroy it sooner or later."

When Liu Yan heard this, he couldn't help but nod his head.

From this aspect, it was indeed good news.

If the Moonshine Qilin's attack were extremely powerful, even Murong Xue, who had the best defense, wouldn't be able to withstand it. They wouldn't be able to continue attacking the Moonshine Qilin.

Of course, that was only a simple attack from the Moonshine Qilin. It hadn't used its full strength.

If the Moonshine Qilin unleashed its full strength, no one knew if Murong Xue, who had the strongest defense among the group, would be able to withstand it.

Liu Yan nodded slightly and gave the order, "From the looks of it, it's still alright. We've already come this far. We can only try to attack first. We'll talk about the rest later. Time is of the essence. Let's hurry up and prepare to attack."

Chapter 438: Piercing the Scales

With Liu Yan's order, everyone attacked Moonshine Qilin.

As the tank with the strongest defense amongst everyone, Murong Xue naturally held onto her S-grade Rock Shield and charged forward.

Allen Smith, Zheng Tainan, Chu Cunrui, and the other close-ranged fighters followed closely behind, preparing to fight together.

Xu Han naturally attacked with spells and crowd control skills from behind.

Chu Long stayed behind to support and heal.

The group of experts used their methods to attack.

Liu Yan thought about it briefly and prepared to attack in close combat.

Liu Yan had three attack methods. One was naturally to use his S-grade weapon Flying Cloud Mystic Bow to shoot arrows from a distance.

During this period, Liu Yan obtained two secret arts. They were the SS-grade Wood Secret Art and the SS-grade Gold Secret Art. Naturally, his long-range attack ability had received a significant improvement.

The other method was using the S-grade Blade of the Night to carry out assassination attacks.

Comparatively speaking, assassination attacks had not received much corresponding enhancement during this time, so their offensive abilities were somewhat limited.

In addition, the assassination was used in special battles, so it was not suitable for direct combat.

The last attack method was using the SS-grade weapon, Blue Flame Gloves.

Blue Flame Gloves were the only SS-grade weapon that Liu Yan currently possessed, so Liu Yan's melee attack ability was powerful.

In addition, after extracting tons of elite monsters, Liu Yan's various attributes received a great increase. His stamina was buffed too. Naturally, his melee attack ability had received a remarkable boost.

Liu Yan's close combat ability was the strongest among the three attack methods.

Thinking up to this point, Liu Yan picked up his Blue Flame Gloves and headed forward to prepare for battle.

Close combat could display Liu Yan's powerful combat ability. It could also help Murong Xue, and the others relieve their pressure.

Moonshine Qilin's attack ability was not that strong. But only a tank like Murong Xue, who had an excellent defense, could withstand it. The rest of the team members might not be able to withstand it, and they would be heavily injured if they were hit by it.

Liu Yan going forward to fight in close combat would undoubtedly help them relieve a lot of pressure.

Liu Yan's defense might not be as good as Murong Xue's, but it was probably enough to withstand Moonshine Qilin's attack head-on.

Very quickly, Murong Xue, Liu Yan, and the other experts had already surrounded the Moonshine Qilin and were ready to fight.

Before they attacked, Xu Han's crowd control skill had already landed in the distance. A huge frost bolt locked onto the Moonshine Qilin, but it didn't cause much damage. However, it caused the Moonshine Qilin to slow down and delay its attack speed, helping Liu Yan and the others fight.

At this moment, Liu Yan and the others were in formation.

Murong Xue was at the front of the Moonshine Qilin, while Liu Yan and Allen Smith were at the two strongest sides of the Moonshine Qilin, launching their attacks.

Murong Xue, Liu Yan, and Allen Smith were the ones with the most potent close combat abilities among the group. Naturally, they were on the strongest side.

The remaining Zheng Tainan, Chu Cunrui, and the others were at the side and the back, preparing to attack together.

Allen Smith was the first to launch an attack. He held his S-grade weapon, Blood Flame Sword. His aura changed, and even a few traces of blood light appeared on his body. He had used some powerful skills.

Allen Smith's mighty sword landed on Moonshine Qilin.

However, this terrifying sword attack didn't cause much of an effective attack. It only caused the scales of the Moonshine Qilin to crack a little, but it was severe.

Allen Smith's terrifying sword attack had a limited damage effect.

When Allen Smith noticed this scene, he was surprised. He didn't expect that his full-strength sword attack could only cause the scales of Moonshine Qilin to crack a little.

Behind him, Zheng Tainan, Chu Cunrui, and others launched their attacks.

Facing the powerful Moonshine Qilin, everyone didn't hold back and used their full strength.

However, all kinds of attacks landed on Moonshine Qilin, but they didn't cause much damage.

Allen Smith had at least split Moonshine Qilin's scales a little, and it had some attack effects.

Their attacks didn't leave any marks and didn't cause any damage to Moonshine Qilin at all.

Seeing this, Liu Yan wasn't surprised. Just as he was testing out the attacks, Liu Yan discovered that Moonshine Qilin's defense was unbelievably strong.

It was difficult for this group of experts to deal much damage to the Moonshine Qilin in a single round of attacks.

At the same time, Liu Yan also began his attacks.

Liu Yan activated the S-grade skill, Power of the Earth, the S-grade skill, Dragonification, and the S-grade skill, Absolute Unrivaled.

The Power of the Earth gave Liu Yan a terrifying increase in strength. Dragonification gave Liu Yan's various attributes a huge buff.

As for Absolute Unrivaled, it was a powerful close combat God's Effect that combined offense and defense.

With the support of three powerful S-grade skills, Liu Yan's close combat ability had already received a terrifying increase.

Liu Yan once again activated the A-grade skill, Flame Control. Instantly, Liu Yan's entire body was covered by intense fire energy.

And after the Blue Flame Gloves received the fire attribute, its power instantly became even more powerful.

In this instant, Liu Yan had already raised his close combat ability to the peak.

Facing the powerful Moonshine Qilin, Liu Yan unleashed all of his strength without holding anything back.

With the support of many skill buffs, Liu Yan threw a punch at the Moonshine Qilin.

A punch that contained terrifying power and fire attribute elemental power landed on Moonshine Qilin.

The Moonshine Qilin was attacking Murong Xue and did not notice Liu Yan. It also did not Dodge and was directly hit.

Under the powerful punch, Moonshine Qilin's enormous body trembled slightly, and the scales that were hit directly cracked open!

Seeing this, Liu Yan immediately heaved a sigh of relief in his heart. It had finally caused quite a bit of damage.

If Liu Yan were like Allen Smith and the other experts, his strongest attack would only be able to split Moonshine Qilin's scales a little. If they continued to fight like this, even if everyone worked together to finish the Moonshine Qilin, it would probably take a lot of time and energy.

If that was the case, it was likely that Liu Yan and the others would have already used up most of their energy before they could defeat Moonshine Qilin. Then, the European Federation team and the Red Star Empire would finish off the monsters they were facing.

At that time, even if the ordinary members of the three territories faced them, without the experts like Liu Yan and others, they would still be in an extremely passive position.

Now that Liu Yan could shatter the scales of Moonshine Qilin with a single punch, this battle would undoubtedly be much easier.

Chapter 439: Sudden Improvement in Combat Power

On the battlefield.

Allen Smith and the others had all used their strongest attacks to attack the Moonshine Qilin. However, the effects were limited.

Only Allen Smith's attack had caused a crack in one of the Moonshine Qilin's scales. However, that was all.

As for the other experts, they were unable to leave any marks on the scales. They could cause damage to Moonshine Qilin.

However, everyone saw Liu Yan's attack.

They saw that under Liu Yan's powerful punch, one of the Moonshine Qilin's scales was completely shattered.

Seeing this, Allen Smith was instantly stunned. He did not expect Liu Yan's punch to have such terrifying destructive power.

His attack just now could only cause cracks to appear on the scales of the Moonshine Qilin.

But Liu Yan's punch shattered the scales of the Moonshine Qilin. The difference was too huge.

At the same time, Allen Smith was also somewhat puzzled.

According to his previous understanding of Liu Yan, Liu Yan was indeed incredibly strong. Liu Yan's strength was stronger than his, but it shouldn't be much stronger.

However, Allen Smith could not understand why the difference between Liu Yan and him was so big.

Allen Smith had a strange feeling. It was as if Liu Yan's strength had improved tremendously during this short period, and his strength had increased tremendously.

However, when he turned his head and thought about it, Allen Smith felt it was not very likely.

After all, his strength had already reached this stage. It was hard to get a significant increase in strength all of a sudden.

Allen Smith could not understand. Did Liu Yan obtain a remarkable improvement in his strength all of a sudden, or had Liu Yan been hiding his strength all along?

But now, this was naturally a good thing. Liu Yan was able to shatter the scales of the Moonshine Qilin. His attack on the Moonshine Qilin was undoubtedly much easier.

The other experts were even more shocked when they saw this.

They were all experts, but their strongest attack could not leave any marks on the scales of Moonshine Qilin.

Even a peak expert like Allen Smith was only able to cause cracks to appear on the scales of Moonshine Qilin.

On the contrary, Liu Yan could pierce through the scales of the Moonshine Qilin.

The gap between them was quite large. It meant that Liu Yan and Allen Smith had an enormous difference in strength. As for them, the gap between them was like heaven and earth. There was no comparison at all.

The group of experts had long known of Liu Yan's strength. After all, Liu Yan was a man who could defeat a guardian beast by himself.

However, the group of experts had never thought that Liu Yan would be so strong to such an extent. There was such a huge gap between them and the experts.

Xu Han, who had been controlling the battlefield to support the battle from behind, was surprised when he saw this scene.

Xu Han was familiar with Allen Smith's strengths. His offensive ability was powerful.

Even so, Allen Smith's strongest attack only caused cracks to appear on the Moonshine Qilin's scales. One could see how terrifying the Moonshine Qilin's strength was and how powerful its defensive ability was.

However, when it reached Liu Yan's side, it shattered the Moonshine Qilin's scales with one punch. It was too exaggerated.

"When did this Liu Yan become so strong? When he fought elite monsters, he wasn't this strong." Xu Han said with a puzzled expression.

Even if Xu Han did not fully understand Liu Yan's strength, he had seen Liu Yan fight before.

Compared to before, the current Liu Yan obtained a huge improvement. It was an extremely obvious improvement.

When Chu Long was assisting and healing by the side. Then, she heard their conversation. However, she was not surprised and said, "Brother Liu Yan has always been like this. His talent is shocking, and his strength has improved rapidly. It's hard to imagine."

After all, Chu Long had started working with Liu Yan on the second level of the Tower, so she naturally had a better understanding of Liu Yan.

All along, Liu Yan had always been like this. His strength had improved quickly, and it was even a little exaggerated. It was hard to understand.

However, Liu Yan was like this.

When Xu Han heard this, he immediately felt a little embarrassed. They were both top-notch geniuses, but the terrifying speed of Liu Yan's strength improvement was also something Xu Han could not imagine.

However, it was not the time to overthink. It was time to fight the final boss, the Moonshine Qilin.

"This is also good. If Liu Yan can shatter the scales of the Moonshine Qilin, we can cause damage to it much easier. There will be a certain amount of attack effects." Xu Han sighed in relief.

At this moment, in the front of the battlefield, after Liu Yan shattered one of the Moonshine Qilin's scales, he also shouted, "You guys attack the places where I've pierced through the scales. I'll pierce through a few more!"

As he said this, Liu Yan went to the side and prepared to attack the other places of the Moonshine Qilin.

The attacks of these team members could not leave any traces on Moonshine Qilin's body. Liu Yan had already noticed this.

If this continued, it would naturally not work. No matter how these team members attacked, they would not be able to cause any damage to the Moonshine Qilin.

It was hard to deal with the Moonshine Qilin just relying on Liu Yan and Allen Smith. Even if they could do it, they would need to spend too much time and energy.

Fortunately, Liu Yan could pierce through the scales of the Moonshine Qilin, allowing the other team members to attack from the pierced scales.

These team members could display their strength and more damage to the Moonshine Qilin.

When several experts attacked simultaneously, the damage was still very considerable.

When a few team members heard this, they immediately understood.

They could not pierce through the Moonshine Qilin's scales, but their team captain, Liu Yan, could.

They could not deal any damage to the Moonshine Qilin's scales, but it was different when they attacked from the shattered scales.

Zheng Tainan, Chu Cunrui, and the other experts began to attack.

A few attacks landed on the Moonshine Qilin's original wound and caused some damage instantly.

The Moonshine Qilin roared and changed its direction. It no longer paid attention to Murong Xue, who had terrifying defense but no offensive ability. It turned around and began to attack these team members.

Seeing this, how could Liu Yan grant the Moonshine Qilin's wish?

Murong Xue's defense was strong. She could withstand the Moonshine Qilin's attack head-on. Hence, she would not suffer any injuries.

However, the other team members' defense was much weaker than Murong Xue's. If they were attacked head-on by the Moonshine Qilin, even if they did not die, they would be heavily injured. They could not withstand it at all.

Even if Chu Long were healing them, no matter how terrifying her healing abilities were, she could not cure them in time.

Liu Yan hurriedly activated his S-grade skill, Prison of Giant Trees.

The surrounding wood elementals surged wildly. Immediately after, a giant cage formed from wood elemental condensation appeared. It enveloped the Moonshine Qilin.

Liu Yan deliberately controlled the size of the Prison of Giant Trees. It was enough to trap the Moonshine Qilin but would not trap the rest of the team members.

When the Prison of Giant Trees surrounded the Moonshine Qilin, Liu Yan shrunk the Prison of Giant Trees. It trapped the huge Moonshine Qilin inside, making it unable to move.

Chapter 440: Everything Went Smoothly

The Prison of Giant Trees suddenly appeared, surrounding Moonshine Qilin within.

Following that, the Prison of Giant Trees continued to shrink. It trapped Moonshine Qilin in its original position, making it unable to move.

Moonshine Qilin attacked the Prison of Giant Trees. Prison of Giant Trees shook for a moment, but it did not break.

Seeing this, Liu Yan felt much more at ease.

Although Moonshine Qilin Beast was powerful, the S-grade skill, Prison of Giant Trees, was equally powerful.

After all, Prison of Giant Trees was a skill comprehended from the SS-grade Wood Secret Art.

Although Prison of Giant Trees was an S-grade skill, its actual power was much more powerful than most S-grade skills.

In addition, Prison of Giant Trees also perfectly displayed the advantage of the wood attribute. It could use flexibility to absorb the attack.

Moonshine Qilin's attack was like hitting a ball of cotton. It could not display its terrifying offensive ability.

Moreover, the Prison of Giant Trees was absorbing the surrounding wood elemental energy continuously. It kept strengthening the cage. It could delay for an exceedingly long time.

Liu Yan estimated that the Prison of Giant Trees could last for a while.

During this period, Liu Yan and his team members would naturally be able to launch a siege on Moonshine Qilin.

Murong Xue saw that Liu Yan's Prison of Giant Trees had successfully restrained the powerful Moonshine Qilin. She immediately exclaimed in surprise and joy, "He's even able to restrain it. It is too amazing!"

Allen Smith also looked at Liu Yan in surprise. He had seen Liu Yan's restraining skill before. It was indeed spectacular.

However, he had never thought that Liu Yan could restrain such a powerful Moonshine Qilin.

This restraining ability was a little terrifying.

The other experts were also thrilled.

Initially, they could not pierce through Moonshine Qilin's scales. They were also unable to break through its defense and deal any effective damage.

However, with Liu Yan helping them pierce through its scales, their attacks were undoubtedly much more convenient.

Initially, they still needed to be careful of Moonshine Qilin's counterattack. Moonshine Qilin was so powerful. If they were hit by it, they might not be able to withstand it.

However, they did not expect Liu Yan to have such a powerful restriction skill. He directly restricted Moonshine Qilin to its original position, making it unable to move. It became a safe target for them to attack at will.

"This is too powerful! Captain Liu has such a powerful restriction skill!"

"Captain, you're too fierce."

"It'll be much easier for us to attack. It'll be doomed if we keep attacking it."

“This Moonshine Qilin is so strong, but we could gang up on it now. Hahaha!”

“We will defeat this Moonshine Qilin!”

“Haha, this is much easier!”

...

The team members cheered non-stop.

Liu Yan ordered, “Seize the time and attack the place where the scales are pierced!”

“Yes!”

“Alright!”

Hearing Liu Yan’s order, the team members began to attack.

They had an enormous difference in strength compared to Moonshine Qilin. Hence, it was much easier to attack the place where its scales were pierced by Liu Yan.

Those who were brought here by Liu Yan were not weak. They were all masters, so they could deal effective damage to Moonshine Qilin where its scales were shattered.

Seeing that, Allen Smith joined in and attacked together.

Liu Yan did not rest and continued to attack. He kept penetrating the scales of Moonshine Qilin with his full strength so that his team members had many places to attack.

The battle in front was going smoothly.

Xu Han and Chu Long, who were at the back, had nothing to do.

Originally, Xu Han wanted to control the field or use long-range spells, but now that Moonshine Qilin was restricted by Liu Yan’s Prison of Giant Trees. It could not move at all. Xu Han naturally did not need to use crowd control skills.

As for long-range spells, with so many team members attacking, it was not convenient for Xu Han to use long-range spells.

Chu Long’s situation was similar.

Moonshine Qilin was restricted by the Prison of Giant Trees, and none of the team members were injured.

Even Murong Xue, who was originally the tank, was not injured at all. Naturally, Chu Long did not need to heal at all.

Still, Chu Long used some support skills from time to time to strengthen the team members’ strengths. She helped them recover some stamina, speeding up their attack progress.

Xu Han, who had been idle, could not help but sigh, “I didn’t expect Liu Yan’s restriction skill to be so powerful. He can even restrict the final boss, Moonshine Qilin. It’s too powerful.”

When Chu Long heard this, she nodded and said, "It is impressive. With this restriction skill, the attacks of the other team members will undoubtedly be much smoother. We will also have a much easier time."

"Looks like there's nothing for us to do anymore." Xu Han sighed and could not help but feel a little bored.

Xu Han initially thought that fighting the final boss would be extremely taxing.

However, he did not expect Liu Yan was too strong. Liu Yan helped the other members penetrate Moonshine Qilin's scales, making it easier for others to attack. Moreover, he also had such a powerful restriction skill. He directly restricted the powerful Moonshine Qilin, allowing the team members to gang up on Moonshine Qilin safely.

However, Chu Long shook her head slightly. She still had a serious look, and she did not relax.

"The two of us still have to be careful. After all, this Moonshine Qilin is the final boss of the fifth level of the Tower. It is extremely powerful, and there is a high possibility that it still has other abilities. As crowd control and healer, we still cannot relax. We must be prepared to help the team members at the front at any time," Chu Long could not help but say seriously.

Xu Han also came back to his senses when he heard this. He stopped relaxing and continued to treat it seriously.

Xu Han naturally understood what Chu Long meant.

Even though the battle ahead was exceptionally smooth, there was nothing for the two of them to do.

However, Moonshine Qilin was the final boss of the fifth level of the Tower. It was extremely powerful, and no one knew if there would be any accidents.

The two of them played the roles of crowd control and healer in this battle. They played a crucial role in the entire battle.

Right now, the two of them might not have much chance to perform, but something might happen. For example, Moonshine Qilin suddenly broke free or something. They played crucial roles in this battle.

Xu Han glanced at Chu Long, who was not far away, somewhat surprised.

Xu Han did not expect such an innocent cute girl to know so much. Chu Long was familiar with the situation on the battlefield. She also knew the division of labor between the two of them and their roles.

Since Chu Long could do this, Xu Han naturally would not be willing to fall behind. He immediately became serious, keeping an eye on the situation on the battlefield and making preparations at the same time.

If there were the slightest change, Xu Han's crowd control skills would be the backup plan. Xu Han needed to cover for everyone and prevent any accidents.
