

Towers 461

Chapter 461: The Power of Three Teams

In the water attribute territory.

The team members of the European Federation were fighting the remaining elite monsters at the front. It was ending.

At the back, Hans Wilson and Derek Doyle were discussing the matter of cooperation with the envoy sent by the Red Star Empire team.

The two teams had conflict over these years. During the battle two days ago, the European Federation team had almost eliminated the Red Star Empire team.

However, their common enemy of both sides was the powerful Land of Origin team. Their interests were the same, so it was good for both sides to work together.

After the two sides communicated, they agreed to work together to deal with the Land of Origin team.

Although the Land of Origin team was strong, the strength of the European Federation team and the Red Star Empire team were not weak either. If they worked together, they had a high chance of defeating the Land of Origin team.

Once they had dealt with the Land of Origin team, their two teams would advance to first and second place. They would both be able to receive rewards.

As for who would come in first or second, it would depend on their abilities. Whoever could collect the Lord's token fragments faster would be the first to advance.

Hans Wilson assumed that the speed at which the European Federation's team collected the pieces would be faster and would be the first to reach 10,000 pieces. After all, the European Federation's team was already ahead of the Red Star Empire team.

In addition to their current strength, they would naturally be able to obtain first place in the end and obtain a generous reward to advance.

Although the Red Star Empire team from the earth attribute territory was weaker, they were luckier during the monster riot this time. They had obtained more pieces of the Lord's token fragments than the European Federation team. However, Hans Wilson did not know about it.

After both sides agreed, the Red Star Empire team's emissary returned to inform his team.

However, the two teams had not eliminated the monsters yet, so there was no need for them to ally now. Otherwise, it would trigger the Will of Tower's announcement and attract the attention of the Land of Origin team.

It was better to wait for the two sides to be ready and start the operation before allying. This way, they could avoid alerting the enemy.

At this time, Liu Yan and the others were unaware of the plan of the European Federation team and Red Star Empire team.

At this time, the group of experts led by Liu Yan had already rested and regrouped. Then, they returned to the fire attribute territory.

The battle with Moonshine Qilin had been fraught with danger, and everyone had given it their all. All team members were experts and had high-level consumables to use. Therefore, they recovered relatively quickly.

Furthermore, Liu Yan, Xu Han, Murong Xue, and Allen Smith were the MVPs in the battle. The rest of the experts had not been injured at all.

Not long after Liu Yan and the others returned to the fire attribute territory, the other members from the wood attribute and metal attribute territories also arrived.

The ordinary members of the Land of Origin team, who rushed to the two territories to support the battle, had returned one after another. The members of the Pan-ocean Community team and the New Continent team had also arrived after finishing the battles in their respective territories.

All the members of the three teams had arrived. There were more than 200 people.

Even the slightly mediocre ordinary members were the best among the students on three continents. Otherwise, it would have been impossible for them to pass the previous trials and successfully reach the fifth level of the Tower.

These 200 people were the elites among the elites and were a powerful force.

The power of one team was already tremendous, not to mention the combined power of three territories.

After the members of the three teams arrived, Liu Yan ordered them to rest and prepare for the battle.

When the team members heard this, they began to rest and reorganize. At the same time, they were also very curious.

The monster riot had ended, and the monsters in the first four waves were killed. Liu Yan and the other experts had killed the only boss in the fifth wave.

Logically speaking, they should take a good rest at this time. The battle ended, and they collected close to 10,000 pieces of the Lord's token fragments. They only needed to collect a few hundred pieces of the Lord's token fragments to advance to the sixth level. Why would they have to continue fighting?

All the team members were discussing and guessing curiously.

"Didn't the battle already end? Why do we still have to fight?"

"I guess the captain is still doing something?"

"There are no other monsters on the fifth level of the Tower. There are only three forces left. What else is there to fight?"

“Is Captain Liu going to make a move against the Red Star Empire or the European Federation team?”

“My God, this is too cruel. But after thinking about it carefully, it seems that there is a good chance. We’ll attack them while they are still busy killing the monsters.”

“No wonder Captain Liu asked us to rest. It seems like there’s a big operation.”

“I wonder if the team leader wants to make a move against the Red Star Empire team or the European Federation team.”

“The Red Star Empire team is weaker and easier to deal with, but they don’t seem to be a threat. They can’t threaten our position as the first in the advancement. The European Federation team can threaten us, but they aren’t weak either. They might not be easy to deal with.”

...

While the ordinary members of the three teams were discussing among themselves, Liu Yan and the other core members had already gathered. They were preparing to discuss their next move.

“I’ve already told you about the plan. You can give me some suggestions or tell me if you have any specific methods.” Liu Yan looked at the crowd and spoke.

Liu Yan thought of this plan when they were dealing with the second wave of monsters. Everyone agreed with it.

Up until now, the plan was going well. Not only did the Land of Origin team take the lead in killing all the monsters in the three territories, but they also killed the only boss in the fifth wave in advance and obtained a generous boss reward.

At this time, the Land of Origin team and the two captive teams also freed up their hands.

On the other hand, the situation of the European Federation team and Red Star Empire team was not as good. One of them was still dealing with the fourth wave of elite monsters. They were only halfway. There was still some time before the battle ended.

On the other side, although the European Federation team was in a much better state and the battle was ending, they were also exhausted from the continuous fights.

At this moment, Liu Yan and the others had brought a group of team members to declare war, so there was a high chance that they could successfully take down the enemy.

There was an enormous difference in strength, so the battle was bound to be one-sided.

Chapter 462: Absolute Power and Advantages

After hearing Liu Yan’s words, the others looked at each other and had their own thoughts.

The captain of the New Continent team, Jin Cheng, was the first to speak. “I don’t have any objections. I’m a prisoner of war. I’ll listen to your orders and cooperate with you.”

Jin Cheng was previously an ally of the European Federation team. Their relationship had always been good, especially with the captain of the European team, Hans Wilson.

However, since they had already become prisoners of war, Jin Cheng could not care less. Even if it were disadvantageous to the European Federation team and Hans Wilson, Jin Cheng would still follow orders without personal feelings.

When the captain of the Pan-ocean Community team heard this, he also said, "I'm naturally following orders. I feel that the success rate of this plan is very high. Now is the best opportunity, but we must make the most of it. We need to declare war while the Red Star Empire team and the European Federation team are still fighting the monsters. We can't let them have time to rest.

"That's right. We must act quickly." Luo Qingcheng nodded and continued, "but before we act, we must also consider which team we should attack. Although we are strong and have three teams, we have just experienced a long bloody battle. The members are a little tired, and their combat effectiveness has declined. Therefore, we'd better choose a team and concentrate our strength on one team first. We can't be too greedy and defeat two teams at once. If we defeat one team, the remaining one will be a piece of cake."

"Sister Luo Qingcheng's analysis is very reasonable. Which team should we attack first? How's the situation over there?" Chu Long couldn't help but ask.

The rest of the people were also a little confused. They had been busy fighting and did not know much about the situation of the other two forces.

Everyone looked at Liu Yan. They all knew that Liu Yan had the A-grade fierce beast, Purple Wind Falcon. Although it was not good at fighting, it had been circling in the sky above the other territories to observe the situation. Liu Yan must have some intelligence of the situation in the other two territories.

Liu Yan saw everyone's eyes on him, so he told them about the situation of the two teams in the other two territories.

The situation of the Red Star Empire team was undoubtedly worse. They were weaker, and the speed at which they killed the monsters was slower. It was estimated that by the time the Red Star Empire team successfully killed the fourth wave of elite monsters, there would still be a lot of time.

On the other hand, the situation of the European Federation team was much better. Not only did they progress much faster, but they could also finish off all the monsters in a short time. Their team members were obviously in good condition, and their combat power was still sufficient.

After understanding the situation, Xu Han thought for a while and said, "In theory, we should go for the weaker team first and then the stronger team. It would be better to deal with the weaker Red Star Empire team first. However, I'm afraid the remaining European Federation team will be more troublesome."

"Then why don't we just attack the European Federation team?" Murong Xue replied nonchalantly. "We have three teams, so why should we be afraid of the European Federation?"

When they heard Murong Xue, they could not help but hesitate, not knowing which side was the best to attack first.

Allen Smith, who had been silent all this while, suddenly spoke, "The Red Star Empire team is no longer a threat. There's no need to worry too much. Just attack the European Federation team directly."

Everyone's eyes lit up when they heard this. They had a feeling of sudden realization.

The Red Star Empire team was relatively weak. They were being pestered by the monsters in an extremely tough situation. Even if the Land of Origin team ignored the Red Star Empire team, they could not attack the Land of Origin team.

On the other hand, the European Federation team was not weak and posed a threat to the Land of Origin team. It was better to get rid of them as soon as possible.

Furthermore, this was their best chance. The European Federation team would have just finished dealing with the monsters. The members would be exhausted, and their combat power would have dropped significantly. The Land of Origin team could seize the opportunity to take the European Federation team down.

Moreover, the battle between the Red Star Empire team and the monsters had not ended. They could not threaten the Land of Origin team, nor could they support the European Federation team.

On the contrary, if they attacked the Red Star Empire team first, things would become complicated. The Land of Origin team would have to attack the Red Star Empire team while preventing the European Federation team from attacking the fire attribute territory or sending reinforcements to the Red Star Empire team in the earth attribute territory simultaneously. No matter which situation it was, it would be more troublesome and disadvantageous to the Land of Origin team.

Xu Han patted Allen Smith's shoulder in pleasant surprise. "Not bad. I thought you were not very clever. It seems like you have a brain."

Allen Smith didn't respond to Xu Han. He just looked at him, as if he was looking down on Xu Han.

Luo Qingcheng also nodded in agreement. "It is a better choice to attack the European Federation team. Then we have to hurry up. We can't give the team from the European Federation any time to catch their breath!"

Liu Yan nodded slightly. In fact, Liu Yan had already thought about this plan. He just wanted to see if the others had any new and better suggestions. At the same time, he also wanted to see their decision-making ability.

After they had decided, Liu Yan nodded and confirmed this plan. They would attack the European Federation team in the water attribute territory.

They didn't need to leave any team members to defend the fire attribute territory. After all, the water attribute territory was attacked by the three teams led by the Land of Origin team, so the fire attribute territory would not be in danger.

As for the remaining Red Star Empire team, they were still busy fighting against the monsters. They did not have the time to invade the fire attribute territory.

Such a situation was advantageous to the Land of Origin team. They gathered the superior strength of three teams to attack the European Federation team, who had just finished their battle. Besides, they

did not have to worry about the Red Star Empire team on the other side. They did not need to leave any members behind to defend their camp.

Such a good situation was thanks to Liu Yan's early planning and the hard work of the team members.

He had taken the initiative to attack the monster multiple times to speed up the progress and gain more time, which was why they could occupy such a huge advantage.

After deciding to concentrate all their forces on attacking the water attribute territory, Liu Yan also made a simple battle plan. Jin Cheng led the New Continent team, He Yang led the Pan-ocean Community team, and Luo Qingcheng led the Land of Origin team. The three teams attacked the water attribute territory from three directions.

It was just a simple plan, not a complicated one. After all, they had the absolute advantage in strength and state.

Speed was the crucial factor. They had to get there as soon as possible and start the battle. They could not give the European Federation team any time to catch their breath!

Chapter 463: Extracting Moonshine Qilin

Within the fire attribute territory.

After Liu Yan and the other core members discussed the plan, they immediately got into action.

The three captains each led three teams and set off together.

Members of the Land of Origin team were all curious when they learned there was an operation and a battle.

"Captain, who are we going to attack?"

"Are we going to attack the European Federation team or the Red Star Empire team?"

"Who are we attacking?"

"It should be the Red Star Empire team. They are slightly weaker.

"They're acting so quickly, swift and decisive."

...

All the team members were discussing and guessing.

Liu Yan flew in the air with his SS-grade equipment, Gale Boots. He looked at his team members and explained, "We'll destroy the European Federation team first, then the Red Star Empire team!"

After saying this, Liu Yan immediately flew off into the distance.

When the team members heard this, they were shocked.

"D*mn, I thought Captain Liu wanted to attack one team. I do not expect he wants to fight both teams."

“First, we annihilate the European Federation team, then the Red Star Empire team. Isn’t this too domineering?”

“Seriously?”

“Captain Liu is too domineering!”

“Haha, those two teams are going to be in trouble!”

...

Members of the Land of Origin team were full of admiration for Liu Yan.

Then, under the leadership of Luo Qingcheng and the others, they left the fire attribute territory and rushed to the water attribute territory.

As for Liu Yan, he was using his SS-grade equipment to fly in another direction.

Liu Yan did not stop until he reached a place where no one was around.

Before this battle, Liu Yan naturally needed to raise his strength.

The battle against the European Federation team in the water attribute territory was almost one-sided.

The ratio of numbers was close to three to one, and they had a huge advantage.

The three teams of the Land of Origin team had just finished their battle with the monsters. Hence, they rested for a while. Relying on the large number of high-level consumables they had obtained from the treasure chests of various levels, the team members were recovering well. Although they had not recovered to their peak combat power, they had mostly recovered.

On the other hand, the European Federation team was in a much worse state. They were still fighting the fourth wave of elite monsters.

By the time they finished fighting the monsters, Liu Yan’s three teams had already arrived and started the battle. The members of the European Federation team did not have any time to catch their breath.

This battle could be said to be one-sided, without any suspense.

However, Liu Yan still preferred to pursue stability and a foolproof plan.

On the other hand, Liu Yan’s combat strength had not increased.

The corpse of Moonshine Qilin was still in Liu Yan’s intermediate storage ring, and he was sure it could boost his strength significantly.

In addition, Liu Yan also needed to equip and adapt to the SSS-grade special equipment, Wings of Wind God, which could also bring him a great boost in battle strength.

Liu Yan first went to the surface and retrieved the corpse of Moonlight Qilin from his intermediate storage ring.

The corpse of Moonshine Qilin, which was as big as a small hill, was retrieved and placed in front of Liu Yan.

As the corpse of Moonshine Qilin was taken out, the surrounding temperature rose significantly.

Liu Yan, who had Fire Talent, knew that this was the gathering of fire elements, which caused the temperature to rise.

Even a dead Moonshine Qilin could gather the fire elements in its surroundings. Liu Yan believed there must be a powerful fire attribute treasure in its body.

Liu Yan was full of anticipation. He quickly used Divine Extraction on Moonshine Qilin's body.

A white light enveloped Moonshine Qilin's corpse.

After all, it was a level 70 berserk beast with an SS-grade talent.

In the past, Divine Extraction was completed in an instant. This time, Moonshine Qilin's body was too powerful. The white light took a long time to complete the Divine Extraction. A series of notifications appeared in front of Liu Yan.

[Divine Extraction has successfully extracted Moonshine Qilin (potential SS-grade, level 70). Congratulations on obtaining: Strength +3213, Vitality +4212, Adaptability +2341, Fire Secret Art (SS-grade), Qilin Revival (SS-grade), and SS-grade origin stone!]

[Fire Talent (S-grade) has been upgraded to Fire Secret Art (SS-grade). Automatically comprehended. S-grade Flame Control has been upgraded to SS-grade Flame Blast!]

Following the appearance of the system notification, Liu Yan's body also underwent a tremendous change.

Moonshine Qilin was a fierce beast with SS-grade potential, and it gave Liu Yan a tremendous boost to his attributes.

With the addition of a boost in his attributes, Liu Yan could feel that his strength and physique had been significantly enhanced. At the same time, his adaptability had also improved.

The boost in these three attributes alone was already a huge gain.

He did not even know how many precious S-grade cultivation materials he would need to extract to achieve this effect.

If the other awakened ones had high-grade training materials and consumables, they would not be able to achieve such a huge improvement in a few months no matter how talented they were.

And this was only one of Liu Yan's gains this time.

After Liu Yan felt the changes in his body after the enhancement, he looked at the rest of his gains.

Just as Liu Yan had predicted, Moonshine Qilin was an extremely powerful fire attribute beast. After extracting it, Liu Yan obtained an SS-grade Fire Secret Art.

SS-grade Fire Secret Art still had a fundamental difference from S-grade Fire Talent.

Liu Yan's perception and application of the fire element had improved.

Previously, Liu Yan could only sense some fire elements around him and use a portion of them.

After Liu Yan's Fire Talent had been upgraded to SS-grade Fire Secret Art, his perception range had increased. He could sense more fire elements. He could also use almost all of the fire elements.

Liu Yan's fire attribute abilities received a tremendous boost.

Liu Yan was happy. A few of his skills and equipment were related to the fire attribute.

After obtaining the Fire Secret Art, Liu Yan's strength increased in many aspects.

Liu Yan was able to upgrade his S-grade Flame Control to SS-grade Flame Blast.

It was Liu Yan's first SS-grade combat skill.

Apart from the metal and Wood Secret Art, Liu Yan had never possessed any S-grade skills.

He did not expect that the first SS-grade skill was not extracted but comprehended by himself.

Liu Yan was excited. He hurriedly looked at the SS-grade Flame Blast's description.

Chapter 464: Qilin Revival

The corpse of Moonshine Qilin beast had shriveled up after Divine Extraction.

Liu Yan was looking at his gains with anticipation.

Flame Blast

[Grade: SS]

[Effect: Condenses a large amount of fire element. When attacking, it will explode and produce a terrifying power!]

It was a simple introduction, but Liu Yan knew Flame Blast was extraordinary.

During the battle with Moonshine Qilin, Liu Yan used God's Effect of his SS-grade Blue Flame Gloves to activate the terrifyingly powerful Blue Flame Strike. It instantly killed the half-recovered Moonshine Qilin.

The principle of Blue Flame Strike was to store and compress the fire attribute energy in Blue Flame Gloves. Then, it would burst out in one fell swoop and produce terrifying power in a battle.

Such a principle was undoubtedly similar to Flame Blast.

Blue Flame Gloves continuously gathered, stored, and compressed a large amount of fire attribute energy to feed Blue Flame Strike.

On the other hand, Flame Blast did not have powerful equipment to boost itself. It required the condensation and attack of fire elements on the spot.

The fire element was originally a violent element. After being condensed, it produced a terrifying power. Liu Yan had already experienced it in the previous battle.

To be able to kill such a powerful Moonshine Qilin with a single Blue Flame Strike, it was clear how powerful it was!

It was a combat power that completely surpassed his current level!

This Flame Blast must have extraordinary power too.

It did not have a carrier and could not accumulate a large amount of fire attribute energy. Hence, its power might not be comparable to Blue Flame Strike.

However, it was still an SS-grade skill. Liu Yan believed that the power of Flame Blast would be extraordinary.

In addition, it was extremely troublesome to use Blue Flame Attack. It required a large amount of fire attribute energy. It could only be used as a trump card and could only be used once.

Earlier, Liu Yan had used Blue Flame Strike to attack Moonshine Qilin, so he could not use it again. He had to accumulate fire attribute energy for a long time before using it again.

However, Flame Blast was different. It was condensed on the spot. Its disadvantage was that it did not gather as much fire attribute energy as Blue Flame Strike. Its power was also not as terrifying as gray Fire Strike. However, it had the advantage of being able to release continuously, which would be of major help to Liu Yan.

Obtaining the SS-grade Flame Blast undoubtedly raised Liu Yan's attack power to a new level.

On the other hand, Flame Blast could also greatly enhance the Blue Flame Strike of the Blue Flame Gloves.

Previously, Liu Yan used his A-grade Flame Control to store fire attribute energy continuously. Yet, this Blue Flame Strike was already so terrifying.

In the future, if Liu Yan used the higher-grade Flame Blast to store fire elements, his attack would become more powerful.

It was the same as condensing more fire elements. The condensed fire attribute energy of the Flame Burst had condensed again through Blue Flame Gloves.

Under the second condensation, it would bring about a qualitative improvement!

Liu Yan couldn't help but look forward to the new Blue Flame Strike and see how terrifying its power would be.

He still needed to store it slowly, so he could only think about it later.

Blue Flame Strike would undoubtedly become an even more powerful killing weapon for Liu Yan, an even more powerful ultimate skill!

After looking at the first two rewards, Liu Yan looked at the remaining rewards from Moonshine Qilin.

One of them was an SS-grade origin stone that contained a terrifying amount of energy.

There was a wide range of uses for origin stones, especially for high-grade origin stones.

Liu Yan remembered that the core origin energy of the central rest platform on the third-and-a-half level of the Tower seemed to be a high-grade origin stone.

However, Liu Yan didn't know how high its level was, but he estimated that it was at least SSS-grade, or even higher.

An origin stone was enough to supply all the energy needed for the entire three-and-a-half-level central resting platform. It was clear how terrifying a high-grade origin stone was.

The SS-grade origin stone in front of Liu Yan was not weak either, and he believed it would be of great use in the future.

If Liu Yan used the SS-grade origin stone to create an enchanted puppet, it would be a powerful combat force that surpassed his current level.

Liu Yan wondered if he created an enchanted puppet using an SS-grade origin stone as its energy source. It was very likely that even he wouldn't be a match for it.

Of course, Liu Yan could use this origin stone to produce an enchanted puppet. However, the other materials required were also high-grade and rare. Liu Yan could not gather all of them in a short time. He could only wait and see if he could do so on the sixth level of the Tower. He would not have the opportunity to do so on the fifth level.

Liu Yan kept the precious SS-grade origin stone and looked at his last harvest. It was an SS-grade skill, Qilin Revival!

It was also the second SS-grade skill that Liu Yan had obtained. Liu Yan immediately looked at it with great anticipation.

[Qilin Revival]

[Grade: SS]

[Effect: Passive skill. It cannot be activated. After entering a heavily injured state, the Qilin's power in the bloodline will be activated. It will absorb a large amount of fire attribute energy in the surroundings to quickly recover from injuries and stamina. During the recovery process, the user can move and fight until the user is fully recovered.] (Current usage: 1/1, recovers once a month)

Liu Yan's eyes lit up when he saw the Qilin Revival. Wasn't that the powerful passive skill of the Moonshine Qilin?

That terrifying recovery ability was still fresh in Liu Yan's mind.

Back then, Liu Yan and the rest of the experts had used all their strength to attack Moonshine Qilin. However, their attack speed was not as quick as Moonshine Qilin's recovery speed. It was clear how heaven-defying the skill was.

Liu Yan also noticed something different. When Moonshine Qilin was recovering, it could not move or attack at all. It could only stand there and take the beating.

According to Qilin Revival's description, the user could still move and fight during recovery.

This difference in detail was the essence.

It would be troublesome if Liu Yan couldn't move or fight during his recovery. Although his recovery ability was terrifying, he was still somewhat passive and could encounter accidents.

However, Qilin Revival would be a godly skill if Liu Yan could move around while using it. It could allow Liu Yan to move and attack and have a terrifying recovery ability. It was simply difficult to die even if one wanted to!

Even though Liu Yan could only use it once a month, it was enough. It was an extremely powerful life-saving skill.

In addition, Liu Yan's life substitute-enchanted puppet that Liu Yan could die once in Liu Yan's place.

In this way, Liu Yan had two more lives. No matter how powerful he faced in the future, Liu Yan would have two chances to make mistakes.

Coupled with Liu Yan's terrifying speed from his S-grade Sonic Speed skill, Liu Yan would not be able to die even if he wanted to!

Chapter 465: Terrifying Flying Speed

Liu Yan was satisfied after counting his loot from the [Moonshine Qilin]. He then checked his new attribute panel.

[Liu Yan]

[level: 43 (5000/41000)

[Class: Dark Ranger (second transition), Law Warlock (third transition inactive)]

[Strength (attack): 22902]

[Vitality (defense): 24092]

[Agility (speed): 14303]

[Spirit (mana): 12293]

[Adaptability (magic resistance): 12293]

[Luck (probability): 89]

[Bow and arrow: Flying Cloud Mystic Bow (S-grade)]

[Traps: none]

[Familiars: Ice and Fire Two-headed Wolf, Purple Wind Falcon, Treasure Pangolin]

[Allocatable attribute points: 1789]

Talent:

Divine Extraction (SSS-grade, tier 3): 356/410 (recovers every hour)

Extraordinary Five Senses (SS+)

Superior Elemental Affinity (SS+)

Skills: Omniscient Insight (S-grade), Fog (B-grade), Ultimate Aim (A-grade), Poison Control (A-grade), Traceless Silence (A-grade), Poison Immunity (B-grade), Animal Affinity (B-grade), Flame Blast (SS-grade), Frost Control (A-grade), Wind control (C-grade), Plunder(A-grade), Split (A-grade), Track (A-grade), Electrocutation (A-grade), Supersonic Speed (S-grade), Shadow Cloak (A-grade), Backstab (B-grade), Dragonification (S-grade), Perfect Trickery (A-grade), Fire Scythe Dance (S-grade), Treasure Hunting (A-grade), Absolute Unrivaled (S-grade), Pure Body (A-grade), Domination (S-grade), Power of the Earth (S-grade), Soul Snatching (SS-grade), Prison of Giant Trees (S-grade), Qilin Revival (SS-grade)

Items: Soft Blade Boxing Gloves (A-grade), Blade of The Night (S-grade), Flying Cloud Mystic Bow (S-grade), Turin Assassination Set (A-grade), intermediate storage ring (B-grade), Blue Flame Gloves (grade SS), Gale boots (grade SS), wings of wind god (grade SSS)(sealed)]

Elemental laws: Gold Secret Art (SS-grade), Wood Secret Art (SS-grade), Fire Secret Art (SS-grade)]

With the boost in attributes, Liu Yan's current thought attribute was terrifying, especially his strength and vitality. They had already crossed the 20000 mark, and his strength was terrifying.

Apart from that, there were two new SS-grade skills, both of which were extremely powerful.

Any one of them was a tremendous gain for Liu Yan.

These three gains also caused Liu Yan's combat strength to increase significantly.

Moonshine Qilin was a powerful SS-grade fierce beast. The benefits it had brought Liu Yan were too much.

Liu Yan then looked at the corpse of Moonshine Qilin. After Liu Yan's Divine Extraction, the corpse of Moonshine Qilin had withered a lot.

However, some parts of his body were still dazzling.

They were Moonshine Qilin beast's scales, two horns, a tail, and four hooves.

Liu Yan knew that the entire body of Moonshine Qilin was a treasure.

After Divine Extraction, these few body parts were still in good condition. They must be extraordinary.

Liu Yan stepped forward and took out these parts. After an examination, he found that they were all S-grade or even SS-grade treasures. If they were used in the right way, they would have a great effect.

Among them, Liu Yan had a pretty good way of using the scale. He could use it with SS-grade origin stones to create powerful enchanted puppets.

Liu Yan could make third or fourth-tier enchanted puppets if he used the high-grade origin stone with some other rare materials. Their combat power would be at least level 60 or 70, or even higher!

Liu Yan did not have that much time at the moment. He could only put these rare materials into his intermediate storage ring for the time being. He would see how to use these rare materials when he had the time.

Liu Yan then took the SSS-grade special equipment, Wings of the Wind God, from his intermediate storage ring.

[Wings of the Wind God] (sealed)

[Grade: SSS]

[Description: The Wings of Wind God created by a divine level expert. It is filled with mystery and has terrifying effects.]

[Sealed effect: Flying speed +10000, wind attribute skills increase by 50%]

[God's Effects: Gale Force (passive skill, terrifying wind-type cutting effect can be emitted wherever it flies, causing terrifying damage), Whisper of the Wind (active skill. After activation, it can detonate the wind element in a large area, causing a terrifying area of damage!)]

SSS-grade equipment could only be equipped after it recognized its owner.

Liu Yan cut his finger and dripped a few drops of blood.

The Wings of the Wind God glowed with a green light, and Liu Yan could feel massive wind elemental fluctuations in the surroundings.

After the master recognition was completed, Liu Yan immediately equipped the wings of the wind god.

Even though the Wings of Wind God were sealed and could not display their true strength, the current effect was already powerful.

With a gentle flap of Wings of Wind God, Liu Yan reappeared in the sky in the next moment, surrounded by a terrifying fluctuation of wind elements.

Liu Yan was a little surprised. He didn't expect his speed to be so terrifying.

It seemed that the +10,000 flying speed was more terrifying than he had imagined.

Liu Yan's agility attribute was already very high, at 14,000 points. With the addition of 10,000 points of flying speed, Liu Yan's speed in the air was terrifying.

Liu Yan traveled a hundred meters away in the blink of an eye without using a skill.

This speed was too terrifying.

With the Wings of the Wind God, Liu Yan could fly fast.

Liu Yan would undoubtedly be more flexible in future trials.

There was no increase in combat strength, but it was a boost to Liu Yan's ability in a battle.

After a series of experiments, Liu Yan became familiar with the rapid flight speed and was able to get used to it.

The second attribute of the Wings of Wind God was that it could increase all wind-related skills by fifty percent.

An increase of fifty percent was already extremely terrifying.

Liu Yan had many skills, but only one skill was related to the wind attribute.

This skill was C-grade Wind Control. It was relatively weak and was mostly used by Liu Yan as a functional skill. Even if it increased by 50%, it was still ordinary.

It was undoubtedly a pity. Liu Yan could hope he could obtain other powerful wind attribute skills later.

A fifty percent increase was terrifying, so he naturally couldn't waste it.

Liu Yan also looked at the remaining two God's Effects of the Wings of Wind God, intending to experience and understand them.

The first God's Effect was Gale Force, which was a passive skill. It could release a terrifying cutting effect of the wind attribute wherever it flew, causing a terrifying destructive power.

Liu Yan didn't think much about it and immediately tried it.

With a light flap of his wings, Liu Yan flew off in a direction.

While flying, Liu Yan directly activated Gale Force.

With the terrifying speed of Liu Yan and the Wings of Wind God, the surrounding wind elemental energy was drawn in. Then, huge hurricanes appeared on both sides, spreading to both sides!

Chapter 466: Gale Force

Two huge cyclones flew away.

Within a huge area, the mountain was directly cut open.

The two cyclones did not stop. They continued to fly into the distance and only stopped when they hit the ground.

Liu Yan's figure turned and arrived at the mountain that had been cut.

Under the terrifying cyclones, half of the small mountain had been cut open.

The surface that was cut was neat.

Seeing this, Liu Yan was a little surprised. Was this the power of the wind element?

Although Liu Yan had the Wind Control skill, it was still a low-level skill. Hence, Liu Yan's understanding of the wind attribute was somewhat limited.

With the help of the SSS-grade equipment, the Wings of Wind God, Liu Yan finally witnessed for the first time how terrifying the power of the wind element was.

It was swift and deadly. It was impossible to guard against too.

If such a powerful cyclone hit Liu Yan, he would be seriously injured even if he didn't die.

The most troublesome thing was the terrifying speed of the cyclone, which was impossible to guard against and unable to defend in time.

Liu Yan had thought that the God's Effect of Wings of Wind God, the Gale Force, was a passive skill.

Now, it seemed that Liu Yan had completely underestimated its horror.

1

Its power was still terrifying even though it was a passive skill!

After all, God's Effect on SSS-grade equipment was not weak.

In other words, it was a high-level wind element skill, so its power was naturally terrifying.

Liu Yan had been in contact with more basic elements, gold, wood, water, fire, and earth.

He had never come into contact with high-level elements.

From the looks of it now, a high-level element was powerful.

If Liu Yan could master such a powerful wind elemental power, his combat strength would undergo a qualitative change.

It was a pity that Liu Yan had yet to come into contact with any awakened or fierce beast that mastered the wind attribute. Thus, Liu Yan did not have the opportunity to obtain a powerful wind attribute skill with the help of Divine Extraction.

He could only wait until he reached the higher levels of the Tower to see if he had the opportunity to come into contact with it.

But for now, Liu Yan was already satisfied.

Liu Yan had not mastered any wind attribute skill. However, with the help of his SSS-class special equipment, and the Wings of Wind God, Liu Yan could also use powerful wind elemental skills.

The Gale Force he used just now was over the top.

Liu Yan roughly understood the distance of the Gale Force. He could only use it when flying at high speed in the air with the help of Wings of Wind God.

Under the swift and violent speed, it also affected a large amount of wind elemental power in the surroundings. The surrounding underwent massive wind elemental fluctuation. It created a huge cyclone, causing a terrifying destructive power.

If Liu Yan's speed were faster, the effect of Gale Force would become stronger.

Liu Yan had not even used his full speed to fly just now.

If he flew at full speed, the Gale Force that he displayed at his fastest speed would be terrifying!

Liu Yan was satisfied with God's Effect of the Wings of Wind God.

It was a handy passive skill. It meant Liu Yan could use it continuously without using much of his energy. He could use it while flying too. This way, Liu Yan could kill people invisibly, making it impossible for the opponent to guard against it!

After understanding the Gale Force, Liu Yan looked at another God's Effect of the Wings of Wind God, Whisper of the Wind. (Active skill. After activation, it can detonate the wind element in a large area, causing a terrifying area of effect damage! [usage: 3/3, recovers three times a day])

Compared to the unlimited usage of the Gale Force, the Whisper of the Wind had limited usage in a day. At Liu Yan's current strength, he could only use it three times, and he could only use it three times a day.

When Liu Yan's strength increased, especially after he mastered wind talent or secret art, he could use it more times.

However, it also meant that the Whisper of the Wind would be much more powerful than the Gale Force.

The Gale Force was already strong, so the Whisper of the Wind's power was undoubtedly powerful.

Liu Yan pondered for a moment and decided not to try. After all, he could only use it a limited number of times, so it was better not to waste it.

It was to prevent him from having to use this skill in the battle against the European Federation team and the Red Star Empire team.

It was a powerful group attack skill that could play a significant role in a battle.

After understanding the effects of the Wings of Wind God, Liu Yan was satisfied.

The Wings of Wind God was in a sealed state, but its effects were already so terrifying.

It would be even more powerful if Liu Yan could unseal it in the future.

Liu Yan looked at the Wings of Wind God on his back. With a thought, he could retract them. It was convenient. He could put it away when he was not using it, and it would not affect his movements and battles on the ground.

It was convenient to use it when it was needed.

After all, it was an SSS-grade equipment piece that recognized its owner. It was different in all aspects.

Liu Yan once again released the Wings of Wind God. He then quickly flew in the direction of the water attribute territory.

After extracting Moonshine Qilin and familiarizing himself with the Wings of Wind God, Liu Yan's combat strength improved.

Liu Yan would undoubtedly be more confident in the battle against the European Federation team.

With his rapid speed, Liu Yan caught up with his team in no time and flew rapidly toward the sky above his team.

Liu Yan didn't stop and continued to move forward. He stopped at the edge of the water attribute territory. Then, he waited for the team from the Land of Origin team behind him.

The team members were marching forward. They suddenly felt something pass by in the sky.

When they looked up, they could only see a green afterimage and nothing else.

The speed was so fast that they didn't even have time to react before the other party disappeared from their sight.

They were skilled awakened ones, and their reaction and perception were far superior to ordinary people. Hence, they were able to sense something.

If they were ordinary people or low-level awakened ones, they would not have been able to sense it at all.

Everyone looked up at the disappearing green shadow, and they were confused.

What was that thing just now? How could it be so fast?

Wasn't this the fifth level of the Tower? Logically speaking, there should be a limit to one's strength, and there shouldn't be such a powerful existence.

The team members were all a little confused. They could not understand what was going on. Why would such a terrifying existence be on the fifth level of the Tower?

Chapter 467: Terrifying Figure

Team members of the Land of Origin team, who were marching forward, were puzzled by the swift person just now.

"What was that just now? It's so fast!"

"That's too fast. It disappeared as soon as I raised my head."

"It doesn't feel like the speed we possess at our level."

"To be able to fly so quickly, they must be at least a powerhouse on the ninth level of the Tower, right?"

"Those on the ninth level of the Tower are also top experts. Ordinary experts can't do this at all."

"How could there be such a terrifying existence on the fifth level of the Tower?"

"Looking at the direction, it seems to be a water attribute territory. I don't know if it's a friend or foe."

"If that person is our enemy, we can't defeat them."

...

The team members were discussing and speculating.

The experts behind the team members were also shocked at this time.

As experts, their strengths and perception were stronger. They could clearly sense the terrifying speed of the person just now.

“That’s fast, and they’re going to a water attribute territory. Are they the helper of the European Federation team?” Zheng Tainan couldn’t help but worry.

Liu Qing chimed in, “I think it’s possible. Otherwise, why would they go to water attribute territory? We don’t know such an existence.”

“That’s bad.” Liu Ning’s expression turned ugly. “Are we still going to attack the European Federation team? Why don’t we take a look at the situation?”

When Murong Xue heard this, her face was filled with contempt. “Look at how scared you three are. You’re cowards.”

Luo Qingcheng also analyzed. “There is indeed such a possibility. But we have decided on the plan. Liu Yan has not returned yet, so we can only keep moving. Time is crucial in this plan. We can’t stop and delay the plan.”

“Why does that person look so familiar?” Chu Long asked, puzzled.

“I also feel that it’s familiar.”

Xu Han looked at Allen Smith as he spoke, trying to confirm his guess.

Allen Smith did not say anything, but he nodded affirmatively. He confirmed that Xu Han’s guess was correct.

Xu Han was relieved and said, “Don’t worry, everyone. Let’s continue. That person is not our enemy, but our helper.”

“What do you mean? That person is our helper?” Zheng Tainan was surprised.

Liu Qing and Liu Ning were also quite happy. If they had a helper, that powerful person would definitely be of great help. Their battle against the European Federation team would be much easier.

Xu Han was too lazy to explain, so he nodded and said, “Keep moving. You’ll know in a while.”

After all, Xu Han and Allen Smith were the best in the group, and their perception was also stronger.

The other awakened ones could only sense a green person speeding across the sky.

However, Xu Han could feel that the person’s aura was similar to Liu Yan’s.

Allen Smith could sense it more clearly, and it confirmed Xu Han’s guess.

Liu Yan had obtained wing-shaped equipment from the diamond treasure chest. Therefore, Xu Han and Allen Smith immediately guessed that the equipment increased Liu Yan’s flying speed tremendously.

At this time, Xu Han was also a little shocked. He did not think that the equipment from the diamond treasure chest would be so powerful that it could give Liu Yan such a terrifying speed.

However, this was good. With Liu Yan's powerful combat strength, he was like a tiger that had grown wings. His combat strength would be greatly improved.

Such a powerful piece of equipment could only be used to its full potential on a monster like Liu Yan.

Then, the team members moved quickly to the water attribute territory.

Speed was the most important factor in this battle, and time was precious. In addition, the team members were strong, so they were naturally faster.

Not long after, the team members arrived at the entrance of the water attribute territory.

As far as the eye could see, a person was floating in the air at the entrance.

It was a slender person that did not move at all.

There was a pair of fully spread-out green wings on the person's body. The wings were nearly ten meters long and the size of several people.

As the green wings flapped slowly, the person stood still in the air, achieving complete flight.

At this moment, the person heard the commotion and turned around, revealing his face.

The person was none other than the captain of the Land of Origin team, Liu Yan!

The team members were pleasantly surprised when they saw that the person in the sky was Liu Yan. The person that had flown past them at high speed was also Liu Yan.

"Oh my god, that person just now was our captain!"

"I was wondering why he was also heading towards the water attribute territory. So it's our captain."

"Captain Liu is too strong. When did his strength increase so much?"

"It's amazing to be able to fly on the fifth level of the Tower."

"It should be because of the special equipment, but it's already powerful."

"Captain Liu was already so strong. Now, he can even fly freely. This combat power is unimaginable!"

...

When the experts behind saw Liu Yan, they also understood.

Xu Han and Allen Smith had known about it, so they were not surprised.

Chu Long finally understood. "No wonder I felt that it was familiar. It's Brother Liu Yan."

"So it's Captain Liu. Then it's fine, haha!" Zheng Tainan, who had been a little worried, was instantly relieved.

Initially, Zheng Tainan worried that this powerful person was an enemy and would threaten them, bringing them trouble.

However, they didn't expect that the person was their team captain, Liu Yan. He was one of their own and their helper.

Murong Xue was a little envious. "This fellow is too over. He can actually fly now, and his flying speed is so fast!"

Murong Xue's words undoubtedly echoed the thoughts of many.

Almost every single awakened one wanted to fly.

However, it was difficult to fly.

Even Liu Yan's SS-grade Gale Boots could only allow him to fly.

In terms of strength, only the top powerhouses on the ninth or tenth level of the Tower could do that. Awakened ones on the fifth level were far too weak.

"Haha. We'll be able to fly too." Xu Han couldn't help but tease Murong Xue.

Chapter 468: Disparity in Strength

Liu Yan looked at members of the Land of Origin team, but his expression was calm.

Liu Yan's strength had increased greatly after he had equipped the SSS-grade special equipment, Wings of Wind God, from Moonshine Qilin.

The current Liu Yan was confident in his strength.

Liu Yan was confident he could defeat Moonshine Qilin himself without using his two trump cards, the Blue Flame Strike and Elemental Fusion.

He was confident to fight the European Federation team that was exhausted from clearing the monsters.

At that moment, Liu Yan looked at the team members and ordered, "Are you ready? When you're ready, we'll fight the European Federation team!"

The team members were already in high spirits.

After all the time they had spent together, they were already full of admiration for their captain, Liu Yan.

In this battle, their numbers were three to one, and they even had the advantage in their condition. It could be said that they would win.

Most importantly, Liu Yan was going to join them in this battle. The team members were extremely excited.

Due to various reasons, Liu Yan had always been acting separately from them. It made the team members a little disappointed.

And this time, the opportunity had finally arrived.

All the team members wanted to take advantage of the time when they were with Liu Yan to perform well. They wanted Liu Yan to see their outstanding performance, progress, and everything they had done was worth it!

“Great, the war is finally about to start.”

“Don’t fight with me. Let me be the first. I want to perform well in front of Captain Liu and let him see my improvement during this time.”

“Get lost! We also want to perform well!”

“That’s right. I’ve improved the most during this period. I should be the first one!

“Don’t quarrel. What’s wrong with you? Captain Liu is watching! Whoever’s stronger, whoever has better strength will be the first. No one needs to give in to anyone!”

...

The team members were all filled with fighting spirit.

The battle plan had already been decided, and with Liu Yan’s command, the battle had already begun!

The team members maintained their battle formation and set off for the water attribute territory.

At the same time, the members of the New Continent team and the Pan-ocean Community team were also heading toward the water attribute territory under the leadership of Jin Cheng and He Yang.

The three teams began to attack the European Federation team in the water attribute territory from three directions simultaneously.

When they entered the water attribute territory, the Will of Tower’s announcement suddenly sounded.

[Detected the Land of Origin team is entering water attribute territory!]

[Detected that the prisoners of war of the Land of Origin team, the New Continent team are entering water attribute territory!]

[Detected that the prisoners of war of the Land of Origin team, the Pan-ocean Community team are entering water attribute territory!]

[The Land of Origin team and the European Federation team have automatically entered a state of declaration of war!]

[The current battle mode is free combat. Both sides can use any battle tactic. If either side’s guardian beast is defeated, it is a loss!]

...

As the Will of Tower continued to make announcements, it also marked the beginning of the battle.

Members of the Land of Origin team, the New Continent team, and the Pan-ocean Community team were all extremely confident.

They had taken care of the monsters first and had obtained a certain amount of time to rest. They had recovered a lot.

In addition, they had three teams against one European Federation team, so they had a huge advantage.

It would be an overwhelming battle!

Within the water attribute territory.

The leader of the European Federation team, Hans Wilson, and the vice-leader, Derek Doyle, had just ended the battle of the fourth wave of elite monsters. They were just about to order their team members to rest and build the battlefield when the Will of Tower's announcement suddenly sounded.

The members of the European Federation team panicked when they heard this.

They had just experienced a long battle and were already exhausted.

Now that it had just ended and they could finally take a break, the Land of Origin team suddenly attacked.

The most ridiculous thing was that the Land of Origin team had brought all the members over. There were three teams, three times the number of people on the European Federation team.

With the advantage of their poor condition, the comprehensive combat strength of the Land of Origin team was more than three times that of the European Federation team.

The battle had yet to begin, but members of the European Federation team knew they would lose.

"I didn't expect the Land of Origin team to arrive so quickly. They're too fast."

"Their speed of killing the monsters was a little too fast. It's too fast."

"Yeah, we've just finished the fourth wave of monsters here, but they've already finished the final boss. They've rested for a while before coming over."

"There's no way we can fight this. We'll definitely lose."

"We're finished. We're finished. We're going to be eliminated this time."

"The Land of Origin team is too fast. They took advantage of our weakest moment to come over."

"They probably planned this long ago. Otherwise, they wouldn't have been so quick to finish off all the monsters. The representatives of the land of origin are playing a big game!"

...

Members of the European Federation team were all flustered.

The battle had not truly begun, but they had long lost the will to fight. The disparity in strength was too great, and there was no chance of fighting.

The captain of the European Federation team, Hans Wilson, and the vice-captain, Derek Doyle, were also surprised when they heard the Will of Tower's announcement.

“It’s obvious that the Land of Origin team has planned this all along. They’ve timed it so well that they’ll pick this moment to deal with us. We’re done for. We’re all done for.” Derick Doyle was also panicking.

Hans Wilson frowned. He was also aware of the severity of the situation.

But Hans Wilson knew panicking at this time would not help in overcoming the predicament. The more it was at this time, the more he needed to think calmly.

After careful consideration, Hans Wilson looked at Derick Doyle and said, “I’ll be in charge of appeasing the team members and organizing a defense as soon as possible. We’ll do our best to defend. You should immediately contact the Red Star Empire team and ask them to send out reinforcements as soon as possible. If we’re finished, they’re finished too. They must help us so that they won’t be eliminated. We’re already in the same boat!”

Chapter 469: Showdown

Hearing Hans Wilson’s order, Derek Doyle immediately recovered from his panic, as if he had found his backbone.

“Okay, okay, I’ll do it now. Don’t worry.” Derick Doyle quickly left.

Hans Wilson came to the team members of the European Federation.

His team members had just finished their battle and were resting. They were flustered and at a loss when they learned that many awakened ones from the three teams of the Land of Origin team were about to arrive.

Hans Wilson came to the high platform and shouted in a deep voice, “All members, please calm down!”

The members of the European Federation team were panicking. When they heard their captain’s bright voice, they calmed down and looked at him as if they had found their courage.

When Hans Wilson saw that his team members had quieted down, he said, “I know that the situation is difficult, but we’ve already come this far. We’re only one step away from advancing to the sixth level of the Tower! This last step might be the most difficult, but we’ve already reached this point. We’ve paid an uncountable amount of sweat and blood to reach this point. We can’t give up no matter what. As long as we can endure this last step, we’ll be able to advance!”

The members of the European Federation team recalled their previous experiences when they heard Hans Wilson’s words.

Many of them had already made preparations before entering the Tower.

The accumulation of knowledge and the training of the body had already begun.

After entering the Tower, they walked step by step from the Tower’s first level to the current fifth level.

Along the way, they had paid an unknown amount of sweat and blood, put in a lot of effort, and paid a blood price.

Those who could reach this point were the best of the best.

The awakened ones who were in the same batch as they had been eliminated.

Awakened ones who could reach the fifth level of the Tower were already existences that had been selected from thousands of people. They were all outstanding and hardworking.

And now, they were only one step away from completing the trial on the fifth level and successfully advancing to the sixth level.

The members of the European Federation team naturally didn't dare to give up.

They were only one step away, and no one wanted to give up.

Even though this last step was challenging, they had to persevere no matter what.

The members of the European Federation team looked at each other and saw fatigue and unwillingness in each other's eyes!

They went through the monster riot and the battle of four waves of monsters, so they were already exhausted. However, they were not willing to give up just like that. They did not want to be eliminated here. They all wanted to persevere and give their all to reach the sixth level of the Tower!

Hans Wilson heaved a sigh of relief when he saw his team members' fighting spirit gradually reignited, and their morale recovered.

The situation was disadvantageous to the European Federation team. Even Hans Wilson could not see the slightest hope.

But no matter what, he could not give up. He had to persevere.

If they wanted to succeed, the crucial step was to ignite the fighting spirit of the members of the European Federation team. Only by erupting with terrifying combat power would they have a chance of persevering.

If they gave up before the battle started, they would have no chance at all.

At this moment, Hans Wilson continued, "I know this battle will be difficult, so difficult that we can't see any chance at all. However, we don't have any way out. We can only fight. Perhaps, we can only see hope in the end. Also, I hope that all of you won't forget that you are the most elite European Federation students this year. You are even more outstanding than the others from other continents. If we can display our full combat power, we will have a chance. No matter how many people they have, they have experienced a great battle and are not in much better condition than us. We can fight!"

The members of the European Federation team felt their blood boil.

Yes, they were members of the European Federation team.

The European Federation had always been in the top two among the five continents.

Over the years, their predecessors had always been existences that suppressed the other continents.

For many years, they had always been strong.

Their pride and awareness of being strong were innate, and they would not allow themselves to lower their heads.

All of a sudden, the depressed members of the European Federation team gradually reignited their fighting spirit under the encouragement of their captain, Hans Wilson.

“We’re the European Federation team. We must show these people our strength!”

“That’s right. Our team has always been at the top because of our strength!”

“We can defeat three teams!”

“You don’t think we’ll be exhausted after killing the monsters, do you?”

“If we go all out, we have a chance.”

“It’s the showdown. I will not give up!”

...

When Hans Wilson saw this, he felt a sense of pride.

It was the European Federation team he knew. Even when they faced opponents who outnumbered them by three to one, the European Federation team was not afraid and still dared to fight.

All of this was because they had always been strong, and their hearts were filled with confidence.

Then, Hans Wilson led the members of the European Federation team to carry out the pre-battle deployment, which was mainly for defense.

Hans Wilson knew very well that there was a great disparity in strength in this battle, so their main task was to defend.

They needed to defend against the attack of the Land of Origin team. They would only have a chance when the reinforcements from the Red Star Empire team from the earth attribute territory arrived.

Even if the reinforcements from the Red Star Empire team arrived, it would still be two teams against three teams. There would still be a disparity in strength.

However, the difference in strength would be smaller. It was not a problem for the two teams to defend against the Land of Origin team.

Most importantly, Hans Wilson had always believed that the European Federation team was the strongest among the five teams, followed by the Red Star Empire team.

The two strongest teams still stood a good chance against the other three teams.

There was a great disparity in strength in this battle. Hans Wilson felt they had a chance to fight by relying on the advantageous terrain, the formidable team members, and the support from the Red Star Empire team.

Especially since they were in the showdown, they had a better chance if they could burst out with terrifying combat power!

Chapter 470: Dead End

Earth attribute territory.

The Red Star Empire team was currently in an intense battle with the remaining fourth wave of elite monsters.

At this moment, members of the Red Star Empire team had already killed half of the monsters in the fourth wave. However, there were still half of the monsters left, and they would still need some time to deal with the monsters.

Ye Yifan, the captain of the Red Star Empire team, had just received a report from his subordinates. The European Federation team had agreed to cooperate, and the two teams planned to deal with the Land of Origin team together.

When Ye Yifan heard this, he immediately felt relieved.

In terms of the current situation on the fifth level of the Tower, the Land of Origin team was way too ahead, and their strength was too strong.

The Red Star Empire team couldn't deal with the Land of Origin team alone.

Fortunately, they had successfully allied with the European Federation team. There was no doubt that they had a great chance of winning if the two strong teams worked together to deal with the Land of Origin team.

But at this moment, the Will of Tower's voice reverberated through the world.

Ye Yifan and other members of the Red Star Empire team immediately heard it. They all knew that the Land of Origin team had already made a move against the European Federation team.

"The Land of Origin team is too fast."

"We haven't finished dealing with the monsters yet, but they've already declared war on us."

"I don't think the situation of the European Federation team is much better than ours. I think the European Federation team will be in trouble this time."

"The three teams are attacking the European Federation team together. The European Federation team has probably just finished their battle. How can they hold on?"

"It's over. If the European Federation team is defeated, won't we be next?"

"It's a pity that we still have to fight the monsters. We can't go to the European Federation team at all."

...

The members of the Red Star Empire team immediately started discussing among themselves. They were all slightly worried.

Although the European Federation team suffered this time, the Red Star Empire team would be next.

If the European Federation team was eliminated, they wouldn't be any better off.

Ye Yifan was also surprised. He had long guessed that the Land of Origin team would attack the European Federation team or Red Star Empire team.

Ye Yifan was worried, so he contacted the European Federation team in advance and agreed to fight the Land of Origin team together.

However, Ye Yifan did not expect the team from the land of origin to move so quickly.

This timing was too awkward.

The European Federation team had just finished their battle with the monster, and their members were all exhausted.

How could they possibly have the ability to resist the three teams at this time?

The Red Star Empire team had yet to finish their battle with the monsters. They had withdrawn their spells and could not support the European Federation team.

At this moment, a subordinate beside him reported, "Captain, the vice-captain of the European Federation team is contacting you on the public chat interface. You should go and take a look. The situation seems to be very urgent.

When Ye Yifan heard this, he quickly used his smart bracelet and opened the public channel chat interface.

As soon as he opened it, Ye Yifan saw the urgency of the vice-captain of the European Federation team, Derek Doyle.

Derek Doyle: "Is the captain of the Red Star Empire team here? Hurry up. This is an emergency."

Derek Doyle: "Members of the Red Star Empire team, help me inform your captain immediately. I have an urgent matter."

Ye Yifan also quickly responded.

Ye Yifan: "I'm here. You can speak."

Derek Doyle: "Captain Ye, you've finally replied. You've also heard the announcement from the will of the Tower, right? The situation is urgent, so hurry up and help us. If you don't help us, we'll be gone. We can't hold on at all."

Ye Yifan: "I know the situation is urgent. I also want to help you, but we haven't finished the battle with the monsters. We can't help you."

Derek Doyle: "No matter what, you need to find a way to send reinforcements. We will try our best to hold on. If we don't receive your reinforcements, we will lose. At that time, you will also be eliminated!"

Ye Yifan: "I understand. I'll try my best to think of a way."

After ending the call, Ye Yifan also fell into deep thought.

At this time, Ye Yifan naturally wanted to support the European Federation team. After all, they were in the same boat.

Otherwise, if the Land of Origin team successfully eliminated the European Federation team, their Red Star Empire team would become the next to be eliminated.

Only by protecting the European Federation team would the Red Star Empire team not be eliminated. They would then be able to work together to deal with the Land of Origin team.

However, what made Ye Yifan extremely helpless was that the battle with the monsters in their earth attribute territory had not ended yet. They could not withdraw and could not support the European Federation team at all. Ye Yifan was powerless.

Ye Yifan frowned and didn't know what to do.

If they did nothing, the European Federation team and the Red Star Empire team would be eliminated by the Land of Origin team.

However, Ye Yifan didn't know what to do at all.

The vice-captain of the Red Star Empire team saw Ye Yifan's worry and reminded him, "Captain, there's nothing we can do now. We can only kill the monsters as soon as possible and then help out."

When Ye Yifan heard this, he shook his head helplessly and said, "There's still a lot of elite monsters left in the fourth wave. It'll take some time for us to finish them off. The European Federation team won't be able to hold on any longer after we clear the monsters. Even if we can hold on, we'll be exhausted and have no combat power. Can we help the European team and fight against the land of origin together?"

No matter how Ye Yifan thought about it, he felt that he was at a dead end.

The European Federation team might hold on until the Red Star Empire team finished clearing with the monsters. However, the Red Star Empire team might not have the strength to help the European Federation team defeat the Land of Origin team.

After all, the European Federation team and Red Star Empire team had experienced a long battle with monsters. Their combat strength had dropped significantly, and they were in dire condition.

On the other hand, the Land of Origin team had rested for a while. Their combat strength had recovered a lot.

If the two teams were given some time to recover, they could still fight the Land of Origin team together.

There was no time for them to rest and recuperate, and they could not recover their combat power. Even if they joined forces, they would not be able to fight against the team from the land of origin.

Vice-captain Sun Wen suggested, "Maybe we don't need to support the water attribute territory and can help the European Federation team out of the siege?"
