

Unlimited Power - The Arcane Path (Completed)

Novel Chapter 211

Chapter 211: 211

Leon had a hard time finding a dungeon amidst that destroyed city, since there wasn't much light and the mist was thick, he only saw one after looking for three days straight . Fortunately, while Leon was learning Magma Spear, he also learned how to multitask as well, and thanks to it, his arsenal increased .

Still, even though Leon flew in the same direction for several days, he didn't find the end of the destroyed city . It was hard to believe, but it looked like the people of Miebos put together several cities to create the capital of the world, and the city was the size of a continent .

Regardless, Leon only found the dungeon because he heard something weird below him . When he approached, thanks to Mana Dominion, he felt the presence of something moving . That thing had a lot of mana, but it was quite small, and its shape was weird as well .

Approaching without knowing his enemy was dangerous, so Leon used a gust of wind to disperse the mist for a while and then used a fireball to illuminate the ground, and then he saw it . A fifty centimeters long, grey spider .

‘What the...’ Leon frowned .

The size alone was weird, but the color was even weirder . Still, the spider foolishly jumped to attack Leon's fireball . However, instead of burning itself, the damn thing absorbed the fire in an instant . Thanks to that, he saw clearly what that thing was .

‘ A mechanical spider... no wonder its presence it’s so weird . ‘

It was a robot in the shape of a spider, it was weird, but Leon attacked the thing anyway . But much to Leon’s surprise, the mechanical spider dodged Leon’s Ice Bullet with ease...

‘It can move pretty fast despite being a robot and even under the effects of powerful gravity... I guess this is the type of monster Hammath mentioned that couldn’t be eaten . ‘

It was astonishing, but Leon confirmed that after using the gravity ring to slow down the spider and using several Ice Bullets to destroy it . After noticing the mana of the robot had dispersed, Leon used the telekinesis ring to grab the robot .

‘Wow... it’s very heavy . Despite its size, it is as heavy as my steel spears... this metal... it looks like it isn’t the same material the choppers William received from that lizards . Its legs are razor sharp... this thing can’t use magic, but its legs can easily cut a human in half . ‘

(fu() { googletag.display('div-gpt-ad-InStory-3'); });

It was weird considering that thing was using mana to move, but it even had a circuit board . However, Leon could barely see the

circuits . Those were so small that it was kind of hard to believe that the hands of a sentient being had built those... most likely, it had been created by another robot . Soon, Leon found the cave where those mechanical spiders were coming from...

‘So the monsters I will see if I reach the other world will be only robots? Things were getting crazier...‘

Leon recalled that he wanted to try to help Sarah and replicate that weird metal, but he didn't have time to do so . He also recalled that he didn't have many difficulties destroying the blades of those choppers... so the metal itself wasn't the source of the robot's durability, it was the same inside them, Leon confirmed that after hitting the mechanical spiders that were leaving the dungeon .

‘Electric attacks would be the best weapon against them... but I only have lightning... I guess it's time to learn the basic electric spells . ‘

Although his spells added with gravity ring were enough to destroy the mechanical spiders, Leon had to use a lot of mana . As someone who wanted to be efficient in everything he does, Leon couldn't keep doing that forever . Besides, electric attacks had a fascinating effect, they could paralyze the targets as long as the projectile is strong enough, and in enemy territory, Leon needed such a weapon .

‘Come to think of it... if the dungeons evolved, did the shop evolved too?‘

Leon had a stupid amount of coins, and he would be silly in not using them to speed up his progress . So, he decided to check the shop . Unfortunately, once he got too close, several mechanical spiders left the dungeon to attack him . The damn things couldn't fly, but they could jump at a fearsome speed .

‘Let's see how those little bastards handle water...‘

Leon created a pool of water and used it to block the entrance of the dungeon . Once the mechanical spiders entered the water, they didn't break as Leon had expected... Well, that was alien technology, so it was only obvious that those robots were waterproof . Still, they lost their mobility, and Leon could control them somewhat since the whole water was under his control . Damaging them was impossible, but Leon used that opportunity to access the dungeon shop .

Unlike the things on the Earth, the shop didn't change all that much every second... it looked like the people of Miebos decided to ignore the monsters that were coming from the dungeons and focused only on the harvesters . Still, the variety of things Leon could buy there was phenomenal . Leon could even buy tomes that would teach him Earth Manipulation and the like... he even found a railgun being sold there . The price was ten million coins... it was stupid, but it could be bought .

Unfortunately, the only weapons available weren't much better than his current weapons . Even the accessories were leagues behind the ones Leon gave to his friends . That was a letdown, but in the end,

Leon was fine with that . It wasn't a good idea to rely too much on powerful weapons . A powerful weapon wouldn't bring him back home . He needed to increase his strength for that to happen .

Novel Chapter 212

Chapter 212: 212

In the end, Leon only bought thousands of potions to help with his training . He recalled that his skeletons could use Thunder Arrows, but he couldn't imagine them being faster than the mechanical spiders . He had to learn that himself .

‘The most efficient way to do things here is to learn new spells and use them to obtain free status... Still, only electric attacks will give me the chance to attack the spiders before they cut me to pieces . ‘

It would be great if Leon could control his electric projectiles and cause damage over time, but to do that, he would have to touch them... and electrocute himself in the process . Paralyze himself on the battlefield was out of the question, so Leon could only learn the active version of those attacks . His ultimate goal for the next few days was to cause a dungeon break and level up his skills as much as possible . But until Leon learns at least one electric attack that doesn't consume so much of his mana, that was just a crazy idea .

‘Well... let's start with the basics . ‘

In the blink of an eye, Leon created a wind bullet . After that, he tried to strengthen the projectile . Much to his surprise, a Thunder Bullet soon appeared, but since its power wasn't his on control yet, Leon got electrocuted, and the spell dispersed .

‘Ouch!’ Leon said while his right hand was trembling .

Just a small spark hit Leon's arm, but since the difference of his intelligence and mentality was high, he lost twenty percent of his health, and his arm got paralyzed for five seconds .

‘Holy crap, this is dangerous...‘

No wonder it was so hard to control, the energy behind even the small thunder bullet was stupidly high . Still, Leon could clearly see the potential of that kind of attack . Besides, even though it wasn't his intention, he also would train his Thunder Resistance .

‘Still... I don't remember being able to create electricity so easily on the island... is it because my intelligence is higher now?’

It was hard to recall . The four years Leon stayed on the island, he did nothing but practice his magic . In comparison, Leon did a lot of things in the last months, so he was having difficulties confirming that . Regardless, even though the spell was the size of a bullet, Leon had to practice his control for one week and the speed of the projection of the spell for another week .

‘I spent two weeks to learn a spell that it would take a few hours to master if it were made of earth...‘

Leon couldn't help but sigh, even though his intelligence and control increased a lot, it looked like he wasn't that talented... despite the fact that everyone thought that he was a pretty good mage . In any case, Leon felt that he just lost time during those two weeks since he could have learned several other spells, practiced them, and obtained dozen of free status points .

While Leon was thinking of that, he felt something approaching from behind . It couldn't belong to the mechanic spiders, the dungeon was dozens of meters ahead of Leon, after all . Still... soon Leon recognized the presences that were approaching since they were walking as if they were in their backyard . They were Ava and Hammath .

‘... What are you guys doing here?’ Leon sighed .

‘Hey, it has been a while,’ Hammath said . ‘We have been sent to investigate this dungeon... since we didn't find any spiders approaching our village over the last week . But I can see now why we didn't find them . ‘

It wasn't a good idea to show his back to anyone, but since he kept Mana Armor activated 24/7, Leon did so . Although he had no bad

feelings whatsoever to the people of that world, Leon didn't have any good feelings toward them either . If anything, it was better to ignore them and keep doing his own thing, if Leon involves himself too much with the people of that world, he could end up postponing his return to Earth .

‘Sorry for before, Leon,’ Hammath said . ‘Grandfather didn't want to be that rude, but he can't control his feeling when he sees a mage, because the people up above used so much mana and made everything change twenty years ago . The new monsters killed my parents... that is why he blames anyone who uses mana indiscriminately . ‘

‘I don't need your apologies, and you don't have to apologize to me,’ Leon said . ‘Rather, I think it is weird that you don't hate me like your grandfather . ‘

‘I was too small when my parents died...‘ Hammath said . ‘Although I don't like to live down here and I dislike the people that live above us, I can't hate them, since hate alone won't change anything . ‘

Leon wondered if he would feel the same in fifteen years, a few months have passed since he discovered about the death of his parents and he still wanted to hunt down the bastard who caused their deaths . According to Gurr, the appearance of monsters, dungeons, and mana was like a natural phenomenon, but dragons weren't . So, Leon felt even more eager to kill whoever summoned the dragons .

It was a pity what happened to Hammath's parents, but Leon didn't waste much time thinking about it . He had too many problems in his hand to care about the problems of others . In any case, a mechanical spider appeared, and Leon finally had the chance to test his new spell and test something else . So, without a hint of hesitation, he fired a Thunder Bullet .

Although Leon still had to use gravity ring to slow down the creatures, the result of the impact had been much better than expected . The mechanical spider trembled for several seconds until the paralyzes effect wore off . It didn't cause damage, but it left the monster completely defenseless... it was a success .

Novel Chapter 213

Chapter 213: 213

‘Wow... to stop the creature for such a long time...’ Hammath said, impressed .

‘... Why didn’t you kill it?’ Ava frowned .

‘It was just a test... and the test is not over .’ Leon answered .

Once again, the mechanical spider got hit and started to tremble while the electric current was still active . Leon approached and covered the creature with a thin layer of earth . After opening a small hole in the layer and receiving some shocks, Leon activated Seal . Much to his surprise, the skill worked, and he transferred the mana to his staff .

Steel Staff III (Neutral)

It grants you the Strength + 30, Endurance + 30

It wasn’t bad, but... it wasn’t good either . It looked like the mechanical spiders had no elemental capabilities, and that explained the status ‘neutral . ’ The creature used mana to keep itself working; it didn’t use to attack, after all .

‘I thought the effects would be better considering that those robots are the monsters of what supposed to be in an evolved dungeon... I guess it is a waste of time to use Seal on them since those effects are ridiculous, and I can’t sell the weapons on the dungeon shop...’

Then Leon had an idea . He looked behind and saw Hammath wondering what Leon just did and Ava, who was still looking at him suspiciously . Then, Leon tossed the staff to Hammath .

‘Do you want it?’ Leon asked .

```
(fu() { googletag.display( 'div-gpt-ad-InStory-2' ); });
```

‘...Yes .’ Hammath said after noticing his growth in status .

‘Give me five hundred coins, and it is yours,’ Leon said .

Hammath offered a handshake without thinking twice, and then he transferred the five hundred coins . It wasn’t a half-bad trade considering that Leon only spent less than a minute to create the staff and a few seconds to use Seal .

‘Mmm... maybe the difference of an evolved dungeon and a non-evolved one are the bosses... those mechanical spiders certainly are stronger than most monsters, but I can’t imagine them being stronger than earth dragons .’

Maybe it was because he now could almost stop enemies entirely using telekinesis and gravity, but Leon couldn’t feel the real danger of those creatures . Regardless, now that the test was over, it was about

time to see the boss of that dungeon . Leon was also curious about the world those creatures came from . If it were a world without people, then it would be a waste of time to search there, but if there are people, maybe Leon could find a way to return to Earth . However, much to his surprise, Leon heard Ava's voice .

‘Hey... I want one too .’ Ava said .

‘Five hundred coins .’ Leon said .’

Ava offered a handshake and then transferred the coins, but soon Leon sighed and regretted a little .

‘I want a bow that increases my speed and dexterity,’ Ava said .

It would take a while to find that... even though Leon could create bows in a minute, the effects Seal would add to a weapon were random... fortunately, on the third try, Leon got the bow she wanted .

Sponsored Content

```

```

Steel Bow III (Neutral)

It grants you the Speed + 30, Dexterity + 30

It wasn't worth the hassle carry the other bows, so Leon used Mana-Eater and destroyed them . Unless he obtains a bow that grants him the power to shot Thunder Arrows, he had no reason to use it . Regardless, when Leon stepped forward and bought a few more thousand potions, he was stopped this time by Hammath when he was about to enter the dungeon .

‘Are you going alone?’ Hammath asked .

‘Don't even try, dude,’ Leon said . ‘Don't follow me, I don't want to involve myself with you guys any further, and I don't want to be chased by the people of your village if something happens .’

‘We are full-fledged warriors of our village,’ Hammath explained . ‘Even if we die, no one would blame you since we died in combat .’

‘Say that to your hot-blooded grandfather, who was having a hard time controlling his anger not to punch me,’ Leon said . ‘If you die, he will have the excuse to attack me, and I don't have time to waste with him . So, don't bother me, all right?’

Before entering the dungeon, Leon created a thick staff . It was shorter than the staff he sold to Hammath, but it was almost two times as thick . Leon would use that to smash the mechanical spiders .

After taking a few steps and facing the first mechanical spiders inside that space, Leon finally noticed why those creatures trembled so much

and for so long . It looked like the electric discharge messed with their circuits and nullified the effects of the mana on the metal . Leon noticed that when his staff smashed the mechanical spider almost without any resistance .

Novel Chapter 214

Chapter 214: 214

After making a mental note of trying to replicate the metal the choppers were made of, Leon moved forward . Fortunately, that was a dungeon that didn't have many bifurcations . So, Leon only had to explore the place for a few hours before he could find the boss room . He could have reached much sooner if he had used some potions, but he didn't it .

Although the mechanical spiders made Leon recall real spiders, the boss of that dungeon didn't make Leon remember anything . It was a robot, but it didn't have the shape of an animal, it was not humanoid either . That thing had several blades on the top of its body as if that were the blades of a chopper . It also had a rectangular shape being four meters tall and one and a half wide . There were nor arms or legs . In its place, Leon saw several silver guns, and he quite sure those guns wouldn't shot ordinary bullets... but what grabbed Leon's attention was a hole in the center of that robot . Leon couldn't see

anything inside that hole, it was dark for some reason, even though the entire dungeon was well-lit...

‘That looks like a problem . ‘ Leon murmured .

‘It certainly looks,’ Hammath said . ‘It is the first time I have seen the boss of this dungeon...‘

Before he even turned around, Leon facepalmed... Hammath and Ava were supposed to be around twenty years old, but it looked like their mentality was of someone who was eleven or twelve . It kind of makes sense, considering that people could live more thanks to mana . Still, that was hard to accept since Hammath had the built of the terminator...Truth to be told, Leon felt their presence, but he didn’t want to believe that those two would approach that much even after his warnings .

‘You guys already did what you wanted to do, right?’ Leon asked .
‘Now, get out of here before I give your grandfather one reason to hunt me . ‘

‘Can’t we watch you fight?’ Hammath asked .

‘Do you think I’m here to have some fun?’ Leon asked . ‘I don’t know even know if I can take down that thing, and you want to let you watch?’

‘If you give me a shield, we can make ourselves useful,’ Hammath said . ‘A few arrows also would help Ava in causing some damage . ‘

A vein started to throb in Leon’s forehead... it looked like he was arguing with an unreasonable brat . Still, that wasn’t a half-bad idea . If someone could draw the monster’s attention now and then, he would have many more chances to attack, but that also was too risky . Mostly because Hammath and Ava could die and Gurr would blame Leon, but also because Hammath was being too friendly and surviving a battle against a powerful enemy would only make him more troublesome .

‘If you let us help, we will tell you the location of the next nearest dungeon,’ Hammath said .

‘Why do you guys want to fight that thing so badly?’ Leon asked .

‘Because we want to get stronger,’ Hammath explained . ‘It can’t be helped, but our people already accepted that we would live the rest of

our lives here . I can understand the feelings of those like my grandfather, who has been fighting for so long, but I cannot accept this lifestyle forever, and I have to try at least to make things better .
,

‘Here we go again...’ Ava sighed .

‘You say that Ava, but I know that you are already sick of this place,’ Hammath said . ‘Though you are most sick of the water since it tastes weird and the food since you are a glutton . ‘

‘Shut up . ‘ Ava looked away .

Leon sighed... even though those two had the appearances of people who have been fighting for so long, in some aspects, they were just children . By the look of things, they never went to the surface, so they dreamed about living in the city above . Leon was aware that kids have difficulty accepting certain things that adults accept as a matter of fact, but Leon could relate to that . In fact, he was fully aware that he was a ‘you don’t know until you try’ person . Still, it was too risky to fight alongside them against an enemy of unknown skills .

‘This kind of thing wouldn’t be a problem if I could analyze my enemies... the problem is, Analysis only works on things I touch, and I definitely can’t touch a living boss . ‘

Leon wondered if calling that thing a living boss made any sense... anyway, Leon, now more than ever, felt like he needed to learn the updated version of Analysis . Still, he didn’t notice any changes even after concentrating a massive amount of mana in his eyes . Just that wasn’t enough .

‘What are you doing?’ Avan frowned when she noticed that Leon was moving his eyes suspiciously .

Leon ignored her and focused on the task ahead . According to the experiences he had so far, he was pretty sure there was a trigger to learn that kind of skill . He wouldn’t have to practice two weeks to learn that, so he wasn’t in a hurry .

In any case, the skill Leon was looking for was supposed to be extremely convenient . But considering his past experiences and the things Leon learned recently, he knew that not everything could be so convenient . So, that skill probably had some serious demerits . As long as Leon discover those, he would discover the things he had to do in order to activate the skill .

Leon had to try several different things before he could finally learn the skill . Unfortunately, the result wasn’t like he had expected .

Congratulations! You have learned the skill: Appraisal .

Cost: 10 mana

You obtained 01 status points .

Ava

To activate the skill, Leon had to concentrate mana on his brain and eyes at the same time . But it looked like the level of the skill determined how much information he could obtain from a target, and he could only use Appraisal on things that were within the range of Mana Dominion .

After making a mental note of trying to replicate the metal the choppers were made of, Leon moved forward . Fortunately, that was a dungeon that didnt have many bifurcations . So, Leon only had to explore the place for a few hours before he could find the boss room . He could have reached much sooner if he had used some potions, but he didnt it .

Novel Chapter 215

Chapter 215: 215

‘I guess I need to practice and make it more useful,’ Leon said .

‘Practice what?’ Hammath frowned .

Hammath couldn’t help but feel confused . After all, Leon stayed quiet for one hour, and when he finally said something, his words didn’t make any sense . Regardless, even though it was a pain keep using such a boring skill, Leon used it and spent his mana without remorse to level up Appraisal . Still, only after one hour and drinking several mana potions, Leon felt satisfied with the progress of the skill .

It looked like the more information the target has, the higher level Appraisal would have to be to show that information . Leon could approach and use the skill on the boss, but once he does that, the battle would inevitably start . Most humans or living beings couldn't feel Leon's Mana Dominions, but he was pretty sure a robot would feel it if he gets too close .

'I guess the safest way to start the fight is to charge the railgun and use it to cause as much damage as possible... but that would be way too convenient, and my goal isn't to defeat the boss... I need to get stronger .' .

In the end, Leon had no reason to let Hammath and Ava fight alongside him . He could give them a hand, but he couldn't let them

get on the way of his goal, and one of the easiest ways to obtain free status points was using his skills on bosses .

‘Sorry, but you guys will have just to watch me fight,’ Leon declared . ‘But if you two help me from the sidelines, I can give you another magic item for free . ‘

‘... What do we have to do?’ Ava frowned .

‘Just throw mana potions at me,’ Leon answered . ‘That will suffice . ‘

Leon created a cart and then drop the contents of hundreds of mana potions inside of it . After that, he created two steel buckets...

Hammath and Ava frowned when they noticed that Leon wasn’t joking .

‘Wait, we can help more than that!’ Hammath protested .

‘Yeah, I know . ‘ Leon looked away . ‘But I don’t need your help . If you want to get stronger, I can give you a hand, but the boss is mine alone . ‘

Fighting against bosses was the quick way to level up skills, so Leon was a bit unreasonable trying to monopolize that advantage . But he couldn't care less about such a thing . He couldn't afford to waste time worrying about that kind of thing . He had and intended to use any means necessary to return to Earth as soon as possible .

'Fine... but how do you plan to help us ?' Hammath asked .

'I can create the weapons you guys want to practice, or I can use magic to level up your resistances,' Leon said . 'It is your choice . Still, if you choose the second option, it will be painful . I can heal your wounds, but it won't be something pleasant for you guys . Besides, I will only do so until we reach the next dungeon . '

It wasn't a bad deal, so Hammath and Ava readily accepted the offer . Although Leon assured them that they wouldn't die, they chose the weapons... but first, they had to defeat the boss .

'Don't get away from me, okay ?' Leon asked . 'Just stay close and use the mana potions on me . '

'How are we going to proceed ?' Ava asked .

‘We will just face the boss normally,’ Leon answered . ‘You will see...’

It was common knowledge that facing a boss without causing massive amounts of damage in a preemptive strike was suicide . So, Hammath and Ava couldn’t help but regret that they chose to follow a madman . Still, their opinions changed when they entered the final part of the dungeon, and the boss attacked Leon . Hammath and Ava imagined that Leon would be exploded in pieces, and then they would be the next to die, but nothing happened . Although they heard the sound of the boss firing something, they didn’t see the object, but they heard the sound of something blocking the projectile .

‘I guess it doesn’t have health and stamina because it is a robot... but to think I would finally find the invisible attack I wanted to learn here...’

Although Leon was looking at that status screen, he didn’t waste too much time thinking about it . He started to fire Thunder Bullets to stop the damn thing from shooting the invisible Mana Bullets . Although Leon’s mana was decreasing at the same time the boss was spending mana to attack, he didn’t want to fight for hours .

Thunder Bullet started to level up like crazy, and little by little, its effects over the robot were becoming stronger . Still, the machine barely stopped for half a second after getting hit by one of those .

‘The power and level of Thunder Bullet were too low to use it against a boss... maybe this will get messy .’

Thunder Bullet didn’t cause damage, so Leon had to use his staff, but considering that he only made one, he wondered if that was enough . Still, little by little, his thick staff was damaging the boss . At some point, the boss stopped attacking and used its mana to repair itself .

‘Good for me... it can’t do two things at the same time .’

That being said, the robot could barely repair itself since Thunder Bullets were continually interrupting the process... the thing was just wasting its mana . Meanwhile, Hammath and Ava were constantly

making Leon's mana recover . Still, things changed when Leon clearly saw mana becoming visible in the dark hole that was located in the center of the boss . Even his Thunder Bullets couldn't stop it . The machine finally noticed that it couldn't defeat Leon without using its trump card .

'Here it comes...' Leon murmured .

I guess I need to practice and make it more useful, Leon said .

Practice what? Hammath frowned .

Hammath couldn't help but feel confused . After all, Leon stayed quiet for one hour, and when he finally said something, his words didn't make any sense . Novel Chapter 216

Chapter 216: 216

Leon didn't have many good memories of being attacked by non-elemental attacks . Mana Bullets couldn't even make him feel nervous since he had Mana Shield... but Mana Beam made him recall the time he got shot by a railgun . Still... at that time, he got attacked by a projectile that had the power of three thousand points of mana, but he survived . Since then, his skills increased, and he got stronger, so Leon was confident that he would survive this time without losing a limb... probably .

Mana Beam slammed against Leon's Mana Shield, and the entire dungeon trembled . Once again, Hammath and Ava waited for the world after death, thanks to it, they stopped making Leon recover his mana .

'Don't stop!' Leon shouted . 'It's not over yet . '

Hammath and Ava recovered themselves, and Leon used Appraisal again . It was hard to compare, but it looked like that attack was more or less thirty percent weaker than the full-powered railgun shot .

‘Although that special attack is good to finish off enemies, it isn’t that efficient against mages that have a lot of mana . ‘

The boss used two thousand points of mana, but Leon only lost fifteen hundred points of his own mana . But it was a bit too soon to celebrate... there was a chance that the boss could use all its mana to self-destruct and cause massive amounts of damage . Fortunately, for some reason, probably because its system overheated after using that attack, the boss didn’t use Mana Beam again . In the end, after a few minutes, the robot just stopped moving like a masterless puppet .

(fu() { googletag.display('div-gpt-ad-InStory-3'); });

Like always, there was a purple crystal at the end of the dungeon, and Leon touched it while preparing himself to act if something unexpected happens on the other side . After touching it, soon, Leon started to regret that . Putting the numerous bosses, Leon could see

around aside; he was more interested and worried about the situation of that world . Leon felt the temperature of his body increasing because the weather in that place was much higher than in any place he had ever been . Not only that, but the air was also stagnated, and the smell of things rotting was everywhere .

‘The heck is this...‘

Leon appeared in the middle of a metal city; despite that, he could see pieces of metal and trash in all directions . He was even on the top of a pile of organic garbage that was incredibly unpleasant, and the texture made him recall a slime... a dark slime . At first, Leon thought he was in an abandoned city where the living beings of that world used to throw their trash, but he changed his mind when he saw himself surrounded by skyscrapers... that wasn't something he would see in an abandoned city . Besides, some robots were still building some facilities .

‘Everything is made of metal... it is as if robots created everything and intend to keep growing their empire . ‘

Leon didn't see a living soul in the distance, he had to confirm that, but he didn't have time . Still, he was pretty sure that it was a world that AI took control over everything and eliminated the intelligent race or races that lived in that world . That place didn't have the climate to sustain the life of ordinary living beings... Regardless, Leon returned because he was about to be attacked dozens of those bosses .

‘What a scary place... it made me recall the Terminator world . ‘
Leon murmured .

‘Who is the Terminator ? ‘ Hammath frowned .

‘... Someone who you will never meet . ‘ Leon sighed . ‘Lead the way to the next dungeon, once we get there, you will receive your rewards . ‘

Leon managed to level up his Thunder Bullet and Staff Mastery a lot while fighting the robot boss, but he still could train them against the mechanical spiders . However, he didn’t feel like it because he already had the means to defeat them with ease . Although Leon needed free status points, he also required battle experience . Raw power wasn’t the only thing he would need against the beings that were threatening that world .

‘My first option is to obtain knowledge on the city above, but I will also need power and more combat experience to return to that place, obtain what I want, and escape alive . ‘

That was Leon’s plan, but it looked like things wouldn’t go as smoothly as he wanted . Once Leon, Hammath, and Ava left the dungeon, they saw Gurr and four other men waiting for them, and by the look of Gurr’s face, he didn’t come to say hi .

Leon didnt have many good memories of being attacked by non-elemental attacks . Not only that, but the air was also stagnated, and the smell of things rotting was everywhere .

The heck is this...

Leon appeared in the middle of a metal city; despite that, he could see pieces of metal and trash in all directions . He was even on the top of a pile of organic garbage that was incredibly unpleasant, and the texture made him recall a slime... a dark slime . At first, Leon thought he was in an abandoned city where the living beings of that world used to throw their trash, but he changed his mind when he saw himself surrounded by skyscrapers... that wasn't something he would

see in an abandoned city . Besides, some robots were still building some facilities .

Everything is made of metal... it is as if robots created everything and intend to keep growing their empire .

Leon didnt see a living soul in the distance, he had to confirm that, but he didnt have time . Still, he was pretty sure that it was a world that AI took control over everything and eliminated the intelligent race or races that lived in that world . That place didnt have the climate to sustain the life of ordinary living beings... Regardless, Leon returned because he was about to be attacked dozens of those bosses .

What a scary place... it made me recall the Terminator world . Leon murmured .

Who is the Terminator ? Hammath frowned .

... Someone who you will never meet . Leon sighed . Lead the way to the next dungeon, once we get there, you will receive your rewards .

Leon managed to level up his Thunder Bullet and Staff Mastery a lot while fighting the robot boss, but he still could train them against the mechanical spiders . However, he didnt feel like it because he already had the means to defeat them with ease . Although Leon needed free status points, he also required battle experience . Raw power wasnt

the only thing he would need against the beings that were threatening that world .

My first option is to obtain knowledge on the city above, but I will also need power and more combat experience to return to that place, obtain what I want, and escape alive .

That was Leons plan, but it looked like things wouldnt go as smoothly as he wanted . Once Leon, Hammath, and Ava left the dungeon, they saw Gurr and four other men waiting for them, and by the look of Gurrs face, he didnt come to say hi .

Novel Chapter 217

Chapter 217: 217

‘Hammath, Ava... return to the village... now .‘ Gurr ordered .

‘Grandfather, this isn’t what you are thinking,’ Hammath said . ‘We followed Leon . He didn’t make us enter the dungeon . He ordered us to stay behind .‘

‘I didn’t come here because of that .‘ Gurr declared . ‘I came here because it looks like he doesn’t care about the problems he may cause and keep on using mana indiscriminately .‘

‘I see...’ Leon closed his eyes and massaged his eyebrows . ‘We can’t help each other, but it looks like you don’t have any intention of overlooking my actions either . You don’t look that old, but I guess your brain aged... it doesn’t make any difference if I use mana or not . Many in the city above have even more mana than me, and they keep using... why don’t you try to stop them ?’

‘I can’t stop them; they are too numerous...’ Gurr said . ‘But I can stop you and delay the evolution process of this world . If I delay it, even for a single minute, I’m fine with it . ‘

‘...Whatever,’ Leon sighed . ‘This will be a good session of training... but remember, I didn’t start the fight . So, don’t complain later about what will happen to your body once you die... I will give you a hint about what will happen . You will become an undead minion...’

‘Despicable... you even have that kind of spell . ‘ Gurr looked at Leon, disgusted .

Gurr still wanted to fight, even after hearing that, then there was no reason to keep talking . So, Leon started to create his sharpest and most powerful Steel Spear . He wondered what would be the best method, turn Gurr into a zombie, or Seal his soul into one of his weapons .

‘... I guess, soon, I will become a truly disgusting person . ‘

If Leon was considering doing that so a living being that closely resembled a human, he noticed that he was on a dangerous path... Still, he couldn't afford to spare the life of someone who wanted to kill him .

Leon wanted to create five spears to deal with those five warriors, but before he could even finish the first, Gurr attacked . As expected, the difference in years of fighting was too big... Leon didn't even see Gurr moving . He just saw him hitting against Mana Shield . Gurr's spear was blocked before it could even get close to Leon, but his target was clear... it was Leon's heart . A single attack made Leon lose fifty points of his mana, and it decreased a little more when the others attacked with their respective weapons, which were two swords and two hammers .

'Mana Shield...'Gurr said, annoyed .

'So you do know... I guess I will play with you for a while . ' Leon said .

Leon still had some mana potions inside his magic box, so he decided to make good use of them . Gurr and his friends were, without a doubt, the most powerful enemy Leon had ever fought . He couldn't even see him moving, after all . So, to win, Leon would have to use his brain . Besides, staying like that for a while wasn't a bad idea .(fu()

‘Thanks for the help . I really wanted to level up this skill a few more times .‘ Leon smirked . ‘ Can you keep that pace until it reaches level thirty?’

‘Tch .‘ Gurr bit his lips in annoyance .

Despite saying that, Leon had to use mana potions like there was no tomorrow . Still, little by little, he was putting his plan in action . Leon couldn’t see those five moving, but whenever they attacked the Mana Shield, Leon added some earth on their legs without letting them notice .

Although Leon's status grew a lot in the last few days, the only moment he could act was when their attacks landed . Thanks to that, he had to wait for a few moments and used almost all his potions before he could do anything . Still, the preparations had been made, and when the time came, Leon cut off their legs by sharpening the earth .

'Ugh... how... with just this amount of earth...' Gurr fell and saw the clean-cut on his left leg .

'Grandfather! Stop it, Leon!' Hammath shouted .

'No can do... I can understand why they don't want to help me, and I don't care about that . ' Leon approached . 'However, things change when they want to stop me from returning home . '

While Leon was wasting time talking, Gurr and the four warriors got up . He didn't know how, but they managed to slow down the bleeding . Since the cut had been so clean, they grabbed their foot, and they were obviously hoping to reattach them . Still, Leon wouldn't wait for that . Now that they lost their mobility, Leon could attack them freely .

Leon used the remaining mana potions to fill his mana . He would need his mana full in order to finish them off using Magma Spear . Even without their mobility, they were too dangerous, and it wasn't a good idea to approach them .

Before Leon could even aim, Hammath and Ava put themselves in front of Gurr and the others . Their weapons were on their hands, but they didn't intend to use them to attack, they would use to block whatever Leon shots at them .

'This is enough .' Ava glared at Leon .

'Please, Leon... don't become an enemy .' Hammath said . 'Prove that you are different from those who locked us in this place .'

'... I don't have to prove anything to any of you .' Leon said . '... But I will stop here . Remember, I could have killed all of you, but I didn't, however, if you try to screw with me again . I will let a big chunk of that city fall on your village .'

Hammath, Ava... return to the village... now . Gurr ordered .

Grandfather, this isnt what you are thinking, Hammath said . We followed Leon . He didnt make us enter the dungeon . He ordered us to stay behind .

I didnt come here because of that . Gurr declared . I came here because it looks like he doesnt care about the problems he may cause and keep on using mana indiscriminately .

Novel Chapter 218

Chapter 218: 218

After giving his warning and leaving that area, Leon let out a long sigh . He was too stressed... it was all because Leon knew it would take years before he could return to Earth . Once again, he would have to work hard for years day and night to return to where his family and friends are .

‘I don’t have time, nor the leisure to let the blood rush to my head... calm down, Leon . Focus . ‘

Once again, Leon would have to search for a dungeon blindly . Still, it was better than traveling with strangers . Besides, he was already used to staying alone . It was easy to concentrate alone, anyway .

It took Leon a few days, but he eventually found the next dungeon after reaching the territory of a new type of monster... golems, again .

However, those were the evolved version of the previous golems . They couldn't change the body to all the four elements like the bosses Leon faced back on Earth, but their bodies weren't only made of earth, water, wind, and fire either . They were made of ice, magma, steel, and thunder .

‘They look more dangerous than that boss... still, I guess this is a good opportunity to train my elemental resistances . ‘

It would be painful and very dangerous, but Leon knew that he had to make some sacrifices in order to avoid problems down the road . Besides, even though they were far stronger than the ordinary golems and probably had the same level of power as the boss, Leon faced, he still could counter-attack using their weaknesses . To stop a golem made of magma, ice would do the job and so on...

‘Still... I wonder what kind of planet they came from . It is the same world that it was connected to Earth? Gurr said that two planets couldn't stay connected if they are in two different stages of the assimilation . . . but I have to check that . ‘

Although Leon didn't even think about the boss of that place, he was already wondering about their world... it was a bit imprudent, but it couldn't be helped given the situation .

Like the golems Leon faced before, those were slow . However, their attacks were far stronger and faster... Leon felt shivers when he faced a thunder golem and tried to block a Thunder Lance with an earth wall... only to see his defense get completely destroyed . He stopped the magic projectile, but the debris hit him . To make things worse, the power behind the lance warmed the stones to the point where Leon suffered some burns where he got hit .

‘Why the hell did I give that thing the chance to attack first?’

Before recovering from his injuries, Leon created five earth walls and made them two times thicker than the first . Thanks to that, he managed to block the attacks of the thunder golem . Leon used those blocks to smash the golem into pieces, but much to his surprise . The creature moved so fast when it noticed that Leon was trying to lock it, that it looked like it had teleported . However, it didn't move to get closer . It moved to escape from the attack . Not only that, but the thunder golem also stopped moving and didn't attack for a few seconds .

‘I guess it can use the thunder in its body to increase its movement speed... but that is risky, and it can't be used frequently .’

Active Skills: Thunder Lance Lv 50

Passive Skills: Thunder Absorption Lv 100

Those opponents were many times more difficult than mechanical spiders... perhaps they were the true monsters of the second stage of assimilation . Regardless, Leon discovered the electric attacks would also heal the creature, but he didn't intend to do that anyway .

There was no time to waste, and Leon wanted to make a magical weapon out of that golem, so he didn't hold back on the use of his mana . Once again, Leon tried to smash the golem using his earth walls, but the creature moved at an unbelievable speed again . Still, Leon already had a good idea where the golem would land . So, without wasting a single moment, he created the earth and sent toward the creature covering its whole body . Turned the earth into steel would be the quickest way to kill the thing, but Leon would suffer a lot if he does that . So, Leon just compressed the earth and slowly smashed the creature .

‘I guess using the inverse element to kill them like this is also an option...‘

Before the thunder golem's core could be destroyed, Leon created a spear and then activated Seal to steal the monster's spirit . The shock almost made him give up but endured because he was pretty sure that magic weapon would be pretty nice, and he was right .

Steel Spear IV (Thunder)

It grants you the skill Thunder Slash Lv 30 . Speed + 40, Strength + 40 .

This weapon causes thirty percent more damage to water and ice-related targets .

Although the status and the new skill weren't half bad since the spear could shot a wave of electricity in the shape of a crescent moon, Leon was more interested in using a weapon like that like he uses his own spears .

‘Mmm ?‘

Still, much to his surprise, Leon couldn't control it as he wanted... it was an immense letdown, but after a while, Leon understood why he couldn't use his new spear like that .

‘I can't transfer my mana to the weapon because the weapon already has mana in it... it is a magic weapon, after all . ‘ Leon sighed, disappointed .

Novel Chapter 219

Chapter 219: 219

In the end, Leon had to give up on creating several spears of the same element to attack the golems who had an elemental weakness against that said element... but only for a while . It wasn't exactly the way he wanted to control them, but by putting his earth around the weapon, he could control it as if he has infused his mana or as if he was using telekinesis . Of course, the power and speed behind his attacks weren't the same, but it would help Leon to conserve his mana until he reaches the dungeon and buys more potions . In his current state, he could barely defeat three golems without running out of mana .

Congratulations! The skill Fire Resistance has leveled up .

You obtained 01 status points .

'I thought I would be able to train my resistances, but... I was too naïve . It looks like I'm a glass cannon much frailer than I thought...'

If thunder golems didn't like to approach their enemies since they would become easy targets once they use their high-speed movement skill, magma golems were the inverse . They wanted to get close, and Leon could barely endure the heat they transmitted when they were ten meters away . Things were getting better little by little thanks to the dragon hearts, but soon they would end, and Leon would return to

his predicament . He was in a world in which the monsters were more dangerous than the ones on Earth, after all .

Still, if covering their bodies with water and freezing it to kill them wasn't good enough, Leon had his Ice Pillars to do the trick... that being said, the mana he saved using those skills was small .

‘This is annoying since I can't advance like always... but I can see this is a good place to train my spells . ‘

Although the steel golems were the most resilient ones, they didn't cause many problems to Leon . He could block their projectiles with his staff and causing damage to them was pretty simple, Leon just had to create a fireball of the same size and wait for them to melt . Still, that wasn't nearly enough . He was training all his skills related to manipulation, transformation, and creation, but since those were already at high levels, he wasn't obtaining that many free status points .

‘I need to create more spells and practice them... the problem is, the more options I have, the less time I will be able to train each of them . I can easily imagine myself facing a troublesome enemy and not

having the means to defeat it because I choose quantity over quality .
What a pain...‘

Truth to be told, Leon knew that he could easily solve the problem of dealing with the golems, he just has to create amulets and rings that increase the power of his elemental attacks . But that wasn't solving the problem . It was just doing a half-assed job . The same thing could be applied to his current actions; strengthening himself wasn't only increasing his mana and intelligence... Leon needed powerful spells to make his status shine .

‘In the end, I can't just choose either of the options...‘

To avoid that kind of trouble, Leon could buy tomes in the store of simple spells . However, since their cooldowns were longer than the spells Leon learned himself, it was hard to train... he had to wait between uses . Besides, Leon would literally spend coins to buy spells he would never use in combat since those spells were way less efficient .

‘I need to learn some sort of time magic... that way, I will increase the speed of my training, and I will learn new spells faster . I will also have more time to practice the same spells and put them at decent levels . ‘

That was already in the list of Leon's goals, but just everything else in that list, Leon had no idea how to learn the principles of such magic . Maybe finding some clues of teleportation magic in the city above was impossible, but Leon was hoping that things were different about things like time-magic and support-magic .

Anyway, to speed up things a little bit and to save some coins, Leon decided to make magic items and use them to restore his mana later . He was still hoping that all his problems would be magically solved the very moment a teleportation tome appears on the dungeon shop, and to buy it . Leon would need a lot more coins . Besides, there was always a small chance that Leon would hit the jackpot and create a magic item that could be compared to the rings he gave to his friends... one could only hope .

Congratulations! You have learned the skill: Wind Lance .

Cost: 20 mana

You obtained 01 status points .

A few days passed while Leon camping nearby the elemental golems' dungeon, Leon was diligently leveling up his skills, but he also tried to learn new ones . Although he didn't create any magic item that could satisfy his standards, things were going well until he started to feel some discomfort .

‘Am I sick or something ?‘

Leon's current lifestyle couldn't be considered healthy . He was only eating meat and drinking water he could produce . Besides, several weeks had passed since he had seen sunlight . Adding to all that the poisoned mist that was always covering that destroyed city, it wasn't that surprising that Leon could get sick . Still, he felt like the origin of the discomfort wasn't because of the environment or because of his circumstances... his instincts were telling him that he was being watched .

‘I guess despite being a mage, that kind of sense can grow naturally, even without being considered a skill by the system . Four years alone on that island changed me in many ways that I didn't notice...‘

In the end, Leon had to give up on creating several spears of the same element to attack the golems who had an elemental weakness against that said element... but only for a while . It wasn't exactly the way he wanted to control them, but by putting his earth around the weapon, he could control it as if he has infused his mana or as if he was using

That was already in the list of Leons goals, but just everything else in that list, Leon had no idea how to learn the principles of such magic . Maybe finding some clues of teleportation magic in the city above was impossible, but Leon was hoping that things were different about things like time-magic and support-magic .

Anyway, to speed up things a little bit and to save some coins, Leon decided to make magic items and use them to restore his mana later . He was still hoping that all his problems would be magically solved the very moment a teleportation tome appears on the dungeon shop, and to buy it . Leon would need a lot more coins . Besides, there was always a small chance that Leon would hit the jackpot and create a magic item that could be compared to the rings he gave to his friends... one could only hope .

Congratulations! You have learned the skill: Wind Lance .

Cost: 20 mana

You obtained 01 status points .

Congratulations! You have learned the skill: Fire Lance .

Cost: 20 mana

You obtained 01 status points .

A few days passed while Leon camping nearby the elemental golems dungeon, Leon was diligently leveling up his skills, but he also tried to learn new ones . Although he didnt create any magic item that could satisfy his standards, things were going well until he started to feel some discomfort .

Am I sick or something ?

Leons current lifestyle couldnt be considered healthy . He was only eating meat and drinking water he could produce . Besides, several weeks had passed since he had seen sunlight . Adding to all that the poisoned mist that was always covering that destroyed city, it wasnt that surprising that Leon could get sick . Still, he felt like the origin of the discomfort wasnt because of the environment or because of his circumstances... his instincts were telling him that he was being watched .

I guess despite being a mage, that kind of sense can grow naturally, even without being considered a skill by the system . Four years alone on that island changed me in many ways that I didnt notice...

Novel Chapter 220

Chapter 220: 220

‘... I can’t sense anything inside Mana Dominion... so, whatever is observing me is a good hunter... a survivor of this planet . ‘

Leon couldn’t help but sigh... it looked like Gurr didn’t learn his lesson and sent someone to keep an eye on Leon . Maybe he wanted to learn more about Leon could do and create a plan to kill him... that was a bit too extreme considering that Leon certainly wasn’t the source of his misfortune . Still, Leon was aware that sentient living beings tend to avoid being reasonable at the necessary moments .

Anyway, Leon could only wait until Gurr and his warriors do whatever they want . Although he could try to attack whoever was watching him, Leon was pretty sure he wouldn’t succeed . He wasn’t fast enough, not even when flying . So, Leon just continued to do his own thing .

However, much to his surprise, after a few minutes, Leon felt the presence of five people approaching . Leon prepared himself to fight, but those people were approaching as if they weren’t wary of Leon . Soon, he saw them, and their weapons were on their backs, not on their hands .

‘Greetings traveler,’ A random redhead warrior said . ‘My name is Eadmund, and I wish to talk with you . ‘

‘... If Gurr sent you, you should go away . I don’t have time to waste with you guys . ‘ Leon said .

Leon frowned when he heard the guy called Eadmund . His courteous demeanor was way too suspicious . He had to reason to be so polite when Leon cut off the feet of the village leader and other warriors .

‘You already met Gurr?’ Eadmund frowned . ‘I can imagine he treated you pretty badly... We are from different villages, so we have different beliefs . It looks like you don’t want to meet him ever again, but I assure you that we mean no harm and only wish to negotiate . ‘

‘You wanted to negotiate now because you already know a few things I can do?’ Leon asked .

‘Sorry, it is not an everyday occurrence to find a traveler from another world . ‘ Eadmund slightly bowed his head . ‘I’m sure you can understand why we were cautious . ‘

‘Yeah, I can... but what I don’t understand is why you guys want to negotiate with me .’ Leon said . ‘I’m a mage, I’m not from the city above, but I’m certainly the type of person who made people like you suffer a lot .’

‘So, you heard about Gurr’s story...’ Eadmund looked sharply at Leon . ‘Although I do hate the people living above us, I don’t have any reason to hate you . Unlike Gurr, I don’t think that the use of mana is a bad thing per se .’

‘How can you think that after decided to follow the path where you don’t have to rely on mana all that much?’ Leon frowned .

‘Even if we have different preferences in terms of fighting style, it doesn’t mean we have to become enemies .’ Eadmund said . ‘Unlike Gurr, I’m not of the belief that mages only bring chaos and death... do you know why?’

‘How am I supposed to know?’ Leon shrugged .

‘You should know because you are part of the reason . ‘Eadmund said .

Leon frowned... it looked like that guy was trying to mess with him and make Leon drop his guard saying random and convenient things . Still, Leon couldn’t see any malice in his brown eyes, not even in the eyes of the other warriors . It was a bit too early to trust in his instincts blindly, but Leon decided to trust them at that moment... mostly because his Mana Shield was activated and ready to be used .

‘You look confused, but once you think about it, you will understand my reasoning,’ Eadmund said . ‘You know why you are here, right ? Your presence was inconvenient in your world, at least to the being who brought you here . If you are a mage, I can imagine that you have been brought here because you spread your knowledge... don’t you think that is weird ? Why would the being who summoned you to this place act like that when you did such a convenient thing for him ?’

Leon opened his eyes widely because, just like Gurr’s words, that guy’s explanation also made sense . By spreading the knowledge of how to use mana, Leon would accelerate the process of assimilation of Earth... eventually, that would give the chances to the harvesters to go to Earth . So, why that lizard brought him to another world... Leon already knew that answer . It was because his actions were unfavorable to him . The question was... were his actions unfavorable to harvesters ?

‘Do you think the people in the city above don’t deserve to pay for their actions?’ Leon asked .

‘I believe they deserve to pay for locking us down here because we wanted to do things in a different way .’ Eadmund answered . ‘I don’t think they deserve the blame of causing our planet to reach the second stage of assimilation . At this very moment, they are fighting against the harvesters, after all . We lost many of our people when the second stage began, but even if that happened a few years later, nothing would have changed . The event itself didn’t cause the deaths . Many died because we didn’t consider that new monsters could appear .

Leon nodded, they lowered their guard after they become used to the dangers of the new world... their lack of preparation was what caused the deaths . Still, despite everything, Leon didn’t feel all that surprised that someone would think differently of Gurr . By the look of things, Eadmund was the leader of another village and wanted to make use of Leon’s skills, unlike Gurr, who didn’t want to see even his shadow .

Although Leon didn’t thank him, Leon felt for a while the need to thank Eadmund . There was a chance that he was lying, but he got rid of the weight that Leon had on his shoulders . Nothing could confirm that his actions didn’t doom Earth, but now Leon at least wasn’t sure that he condemned his planet .

... I cant sense anything inside Mana Dominion... so, whatever is observing me is a good hunter... a survivor of this planet .

Leon couldnt help but sigh... it looked like Gurr didnt learn his lesson and sent someone to keep an eye on Leon . Maybe he wanted to learn more about Leon could do and create a plan to kill him... that was a bit too extreme considering that Leon certainly wasnt the source of his misfortune .
