

Unlimited Power - The Arcane Path (Completed)

Novel Chapter 411

Chapter 411: 411

‘The problem is . . . what I’m going to do now ? My plan to bring my friends back to Earth won’t happen . So that means . . . I don’t have to worry about anything else aside from myself now . ‘

Leon would be lying if doing whatever he wanted wasn’t the best thing for him . If he had tried to return to America without Makoto’s help, perhaps he could have avoided several problems . William wouldn’t have died, and Leon would stay on Earth because the lizard bastard wouldn’t have noticed him .

Regardless, Leon soon recalled the first thing he decided to do in order to satisfy his own desires . . . kill the bastard who implemented the system and the one who summoned the dragons . Although Leon learned on Miebos that such an event was bound to happen in most planets after they start to run out of natural resources, he doubted that nature itself would cause such a thing . Someone or something made such a thing to happen to perhaps thousands of planets . . . for one reason he couldn’t imagine why yet .

‘If the same bastard is the culprit of both problems, even better .
However, I have to kill the lizard and the shadowy figure first . ‘

To beat them, Leon would have to get stronger, much stronger, and he already knew two ways to get stronger fast . The first was to look for spirits, and the other was to use time dilation .

‘The person who has the most access to information on Earth is Yuki . If the people here have discovered their existence, she probably would have met them . . . So, I guess there isn’t a fragment of a spirit here or in any of the planets that are connected through dungeons . ‘

Leon himself wasn’t able to feel the spirits’ presence unless he is really close to them . So, the only thing he could do was to find them automatically while he trains on worlds that are on the third stage of assimilation . Even if Leon doesn’t find them, he will save time training there .

‘Let’s see . . . where I will find a dungeon that will lead to a world that is on the third stage of assimilation, and the monsters there have a lot of mana . . . ‘

Leon quickly found a dungeon that fits his criteria, even though he decided not to go there, the dungeon was located in Japan . As if that wasn’t strange enough, the place was the same dungeon where he fought against ancient frost dire wolves . . . the creatures were the Ice Skeletons .

In the end, Leon decided to invade the dungeon without telling anyone . Using Transfer would make things easier . Besides, he didn't want to meet the people he knew . . . Leon needed to maintain his focus and not let his feelings get in the way . Cultivate blue angel leaves in a world that has such weather was impossible, but Leon would compensate that using Mana Absorption .

To avoid problems, Leon 'invaded' Japan during the night in order not to let anyone see him flying on the skies . Although several soldiers were watching the surrounds of the dungeon, and the place was well illuminated . However, Leon entered the dungeon without being noticed, all thanks to Transfer .

Ice Skeleton

Health: 8500/8500

Mana: 16000/16000

Stamina: 9000/9000

Strength: 1256

Dexterity: 1563

Speed: 1745

Active Skills: Snow Storm Lv 290, Water Manipulation Lv 255, Water Creation Lv 275, Water Transformation Lv 300, Ice Beam Lv 280, Ice Arrow Shower Lv 295, Cryomancy Lv 330

Passive Skills: Wind Resistance Lv 270, Meditation Lv 330, Fire Resistance Lv 250, Thunder Resistance Lv 250, Ice Resistance Lv 330

‘Mmm . . . they have Cryomancy and are big . . . ‘

It didn’t take long before Leon could find the first ice skeleton, they were just like that, skeletons made of ice that were three meters tall . Although they were supposed to be creatures that used magic as a primary weapon, they didn’t have equipment in them . Their red eyes were quite scary since it had a vicious glow, and their entire body had a light-blue tone .

Congratulations! The skill Ice Resistance has leveled up .

You obtained 01 status points .

‘Achoo!’ Leon sneezed . ‘Let’s see how well you can endure my . . . Achoo! My Thunder Ray . ‘

Sapporo was as cold as ever, and the things were much worse inside the dungeon . Since a cold wind was coming from the heart of the place, it wasn’t a good idea to use Flamethrower . So, Leon decided

to use Thunder Ray . Although the creatures had no flesh and even muscles, its body trembled while it was slowly melting . Ice was just water, and thunder was capable of burning everything given time . So, it was very efficient . Ten seconds later, the ice skeleton was dead . . . Although Leon couldn't say if it were alive before .

‘Ah . . . I have to drain its mana . Next time I should attack its limbs instead of its whole body . . . the electric current will spread across its body, but it won't melt entirely . . . probably .‘

The problem is . . . what Im going to do now ? My plan to bring my friends back to Earth wont happen . So that means . . . I dont have to worry about anything else aside from myself now .

Leon would be lying if doing whatever he wanted wasnt the best thing for him . If he had tried to return to America without Makotos help, perhaps he could have avoided several problems . William wouldnt have died, and Leon would stay on Earth because the lizard bastard wouldnt have noticed him .

. . .

Without wasting too much time, Leon touched the purple crystal and reappeared on the other world . As expected, it was a world of snow and ice . Leon didn't appear inside a mountain of snow because there was a barrier around the purple crystal . However, Leon could see that the snow was twenty meters deep around the crystal . . . it was as if that world was suffering from a never-ending snowstorm .

‘ACHOO!’ Leon sneezed .

Just like always, Leon didn't react well to the cold weather . However, instead of running away from it, Leon decided to endure in order to gain status points . Some individuals caused problems for him, and Leon couldn't run away from that of the situation if he wanted to pay them back really nicely .

‘To increase the efficiency of my training, I guess I should also level up Haste and Electric Armor . . . However, since I will have to move around using both, I won't be able to level up Ice Resistance all that much . But I guess it is okay since I won't be able to keep them active at all times anyway .‘

While Leon thought that, an Ice Meteor fell near him . Fortunately, since the snow was so thick, he decided to reactivate Mana Dominion in order to feel the enemies' approach, and thanks to that, he escaped unscathed .

‘I guess this will do . . .‘

Electric Armor easily melted the snow, so Leon used that to approach the ice skeleton that attacked him and counter-attacked using Mana Absorption and Thunder Ray . Leon didn't try to do that before, but even while he was

attacking an enemy using Thunder Ray so up close, he didn't suffer any damage . All thanks to Electric Armor .

Congratulations! The skill Thunder Resistance has leveled up .
`.googletag.cmd.push(function()
{ googletag.display('div-gpt-ad-InStory-1 '); });`

You obtained 01 status points .

Congratulations! The skill Pain Resistance has leveled up .

You obtained 01 status points .

That also would increased his mana consumption of mana a bit more, but Leon decided to keep Regeneration active in order to heal his body from the effects of Electric Armor . However, that was unnecessary because soon, Leon ran out of stamina .

‘I always think so much of leveling up the magic skills that I ended up forgetting that my health and stamina are on pathetic levels . . . I should work on that once I investigate all this world . ‘

‘No sign of the spirit of ice . . . I guess I will find their fragments in several places, not only on the planets that favorite their elements . ‘

Leon managed to level up his Ice Resistance forty times in a week, it was a pretty good pace . . . but he decided to continue that later because it was too damn annoying having the power to run almost two kilometers per second and won't be able to do that because of his lack of

```
stamina .googletag.cmd.push(function()  
{ googletag.display( 'div-gpt-ad-InStory-3' ); });
```

‘It is time for me to become a beefy wizard . . . How come I can say this with a straight face ?‘

Although Leon could use mana to recover his stamina, he decided to make things more efficient . First, he returned to Earth, and then he headed to that island . Although he got stuck on suck place for four years, now that everyone on Earth forgot about him, he felt a sense of familiarity there that he couldn’t sense anywhere else . However, he put the nostalgia aside and grabbed a lot of red, green, and blue angel leaves . He would use those in his training, but since a few hundred years have passed since Earth reached the fourth stage of assimilation, Leon decided to train in another world . It was impossible to know when the planet would reach the fifth stage, and things would become very hectic once that happens .

Instead of returning to Japan, Leon decided to go to another dungeon, one where no one would bother him and that he could access the dungeon shop whenever he wanted . So, he returned to America and then headed to ogre’s dungeon that was located near Las Vegas .

Ogre

Health: 23000/23000

Mana: 3000/3000

Stamina: 9000/9000

Strength: 4125

Dexterity: 1123

Speed: 956

Active Skills: Bash Lv 300, Rage Lv 285, Strong Arms Lv 275, Shock Wave Lv 300, Chaotic Strike Lv 270, Sharp Eyes Lv 265

Passive Skills: Wind Resistance Lv 250, Hammer Mastery Lv 330, Fire Resistance Lv 260, Thunder Resistance Lv 280, Ice Resistance Lv 300

Ogres were like cyclopes, but they had horns, and their weapon of choice was a hammer made of bones of some weird creature . Regardless, they were strong but slow . Besides, they had an obvious and easy spot to hit and kill them quickly . It was their eyes . A single Plasma Bullet in their eyes was enough to kill them in one shot, so Leon decided to train in their world .

The ogres were violent, but they weren't vicious like the gremlins, they left a trail of destruction in their world, but they didn't destroy forests . So, their world had a pretty lovely climate . It was a perfect place to increase his stamina . . . but first Leon had to plant the leaves .

Congratulations! Your Endurance has increased by one point

Congratulations! Your stamina has increased by one point

Congratulations! Your Endurance has increased by one point .

...

Leon wanted to increase his stamina without relying on status points . Still, even though he knew his body changed to the body of someone who a lot of mana and used mostly magic to attack and defend, he didn't expect it would be so difficult to increase it after so long . Since he was still waiting for the leaves to grow and then multiply their numbers, Leon couldn't keep running non-stop . But after doing some tests, while using Stamina Restoration, Leon confirmed that he had to run for six hours in order to increase both stamina and endurance by one point . It wasn't all that difficult, but it wasn't easy either .

'If I use Haste and Electric Armor, the time needed will decrease . . . the muscular pains will be very troublesome, but I don't have any other option but endure . '

Leon didn't try that, but he eventually learned that he could use the dungeon shop even on the world of monsters . Although that seemed obvious since Leon used the dungeon shop on Miebos, it wasn't the same thing since there wasn't a connection between Miebos and Earth .

‘I wonder how Darya is doing . . . I bet a lot of time has passed there since I left .‘

Considering how much time had passed on Earth, Leon was pretty sure that the galactic snake was from a world that on the fifth stage of assimilation . . . if not from a world, from a galaxy, considering the creature’s size . So, it was very likely that hundreds of years also passed on Miebos, and soon Darya would become another person who would forget about him . Since that kind of thought was too depressing, Leon shook it out from his head .

Although Leon could use Geomancy, Pyromancy, Electromancy, and Cryomancy, it was still challenging to learn spells that consumed a lot of mana . Maybe things would get easier the more he levels up those same skills, but for the time being, he had to practice for at least two days to learn spells that consumed between fifty and one hundred mana points . It was troublesome, but at least Leon could focus on that and forget for a while the

things that happened . Leon tried to find a new goal in order to keep his mind busy, but it was clear that such things wouldn't be forgotten so easily .

Regardless, since the ogres were also sturdy and powerful enemies, Leon didn't have to waste too much time leveling up those skills . If they had more mana, Leon also would level up other skills, but Leon was aware that things wouldn't be so convenient .

Novel Chapter 414

Chapter 414: 414

‘I guess I can compensate that carrying weights to increase the difficulty as I did before, but . . . it is clear that the system was implemented for the people to make use of the status points to grow strong . Why? I have no idea . . . ‘

Leon understood why despite having fought for nine hundred years, Yuki and the others didn't have more mana than him . It was because the effects of regular training would decrease the stronger the body gets . Leon couldn't help but wonder why he didn't realize that after seeing the warriors from Miebos and the harvesters . Hammath said they could increase his stamina

quite fast, but it was probably because he trained more while fighting against monsters than properly running or swinging his weapon .

‘This is so stupid . . . imagine how much stamina would have if they could increase their stamina every day for nine centuries . . . a human being would have a monstrous three hundred million points of stamina . This is just insane . . . Regardless, I guess I will have to put some points into stamina and health from now on . I already am back to Earth, so I don’t have to worry about my mana pool anymore . ‘

Leon also doesn’t have to worry about his family and friends anymore; they are alive but forgot him, so he was feeling less and less human . Leon had been born on Earth, but there was nothing there for him anymore . Besides, he wouldn’t reach his current goal by staying nearby .

‘Even though stamina and endurance aren’t increasing fast enough, other skills are . . . I have to train here for a while since I don’t want to rely on tools anymore, I don’t have much choice . Obtaining status is relatively easy by facing more powerful monsters, but if I go to another dungeon, I won’t make good use of time dilation . ‘

Besides, it would be a waste leave now after creating the environment to train for two months . Regardless, Leon had to look for fragments of spirits, but in order to do that and not lose his plants, he had to secure the area .

In the end, it took Leon two weeks to explore all that world . . . Once again, he found no signs of fragments of spirits . But since he was making good use of time dilation, that wasn’t much of a problem .

‘Alchemy is making the liquids I create more potent . . . but considering how much mana I have, it isn’t enough . If I didn’t find better plants until now, I doubt that I will find it in the future . The only option is to find a way to improve things with what I have . . . ‘

Using less water to create the magic liquids wouldn’t solve the problem, the powder produced by smashing the leaves wouldn’t be dissolved, after all . Leon also doubted that just mixing all the three types of liquid would improve anything .

‘Since I don’t have to drink the liquid . . . I guess I can mix it with all kinds of things . . . like monster’s blood . ‘

Surprisingly, Leon didn't hesitate to do that . His common sense was slowly falling apart now that he was just a relic of the past, forgotten by his family and friends . He didn't have to worry about his conscience or becoming a vicious monster . He would have to become a vicious monster to fuck up the bastards who messed with him, after all .

It didn't take long before Leon obtained some results . Ogre's blood could increase the effects of mana liquid by ten percent, and the stamina liquid by twenty percent . However, it could increase the effectivity of health liquid by fifty percent . . . it was very weird that their blood could get mixed with those liquids so easily .

'I guess the effects will vary according to the monster . If they have more stamina, then their blood will be more effective in increasing the effects of the stamina liquid . The same logic will apply to monsters who have more mana . . . I should have collected the water of the ice skeletons . '

Leon could only sigh, but it couldn't be helped .

I guess I can compensate that carrying weights to increase the difficulty as I did before, but . . . it is clear that the system was implemented for the people to make use of the status points to grow strong . Why? I have no idea . . .

Leon understood why despite having fought for nine hundred years, Yuki and the others didnt have more mana than him . It was because the effects of regular training would decrease the stronger the body gets . Leon couldnt help but wonder why he didnt realize that after seeing the warriors from Miebos and the harvesters . Hammath said they could increase his stamina quite fast, but it was probably because he trained more while fighting against monsters than properly running or swinging his weapon .

This is so stupid . . . imagine how much stamina would have if they could increase their stamina every day for nine centuries . . . a human being would have a monstrous three hundred million points of stamina . This is just insane . . . Regardless, I guess I will have to put some points into stamina and health from now on . I already am back to Earth, so I dont have to worry about my mana pool anymore .

Leon also doesn't have to worry about his family and friends anymore; they are alive but forgot him, so he was feeling less and less human . Leon had been born on Earth, but there was nothing there for him anymore . Besides, he wouldn't reach his current goal by staying nearby .

Novel Chapter 415

Chapter 415: 415

‘It is getting hard to increase my stamina . . . now I have to run for twelve hours straight to increase it by a single point . Shall I stop this training?’

Leon increased his stamina a little more than four hundred times in those six months . It was impressive, but not for Leon . Maybe he had no other choice but to use status points to increase his health and stamina . . . even though he had the means to restore them and protect himself only using mana . While Leon was thinking about those things, the planet started to tremble .

‘What the . . . this is . . . ‘

Leon instincts were telling him to get the hell out of there, and so he did . Without looking back or even stopping to grab a few leaves, he used Transfer and touched the crystal . When Leon appeared back on Earth, the dungeon was also trembling . The purple crystal was glowing, and Leon knew that was a bad sign, again and again, he used Transfer, and then thirty seconds later, he was outside the dungeon . Fortunately, only the mountain where the dungeon was located was trembling . Just a few seconds later, the event ended, and Leon saw the entrance of the dungeon disappearing .

‘Phew . . . that scared me . ‘

It was weird, it looked like the ogres’ world reached the next stage of assimilation, but if that was the case, why the dungeon became inactive? Earth was also on the fourth stage of assimilation . . . There was no reason why the planets had to lose the connection between them .

‘Did this happen because I exterminated all the ogres? Come to think of it . I didn’t find any purple crystals there aside from the one that leads to Earth . . . If it was because there were no more creatures that could increase the mana of

the planet? It doesn't make sense . Since the planet can absorb the corpses of monsters . . . Ah, it was because there would be no more deaths there . The planet wouldn't absorb more mana . . . because I was the single creature alive there . ‘

Leon learned his lesson . He couldn't exterminate the species of a certain world just to cultivate some plants . . . Otherwise, something like that will happen again . Since it was impossible to cultivate plants, look for the fragments of spirits and keep the monsters of that world alive, all at the same time, Leon decided to end his stamina training . It would be much more efficient just put status points there .

‘I have no time to think about this . . . I have to resume my magic training since I didn't learn a single spell in months . ‘

Before doing that, Leon had to decide what dungeon he would go next . The best place in terms of mana, it would be the gremlins' dungeon, they had a lot of mana, and even their spears had a lot of mana . However, that world was on the fourth stage of assimilation . . . so Leon wouldn't be able to use the time dilation .

In the end, Leon decided to go to a bizarre dungeon in Brazil . It was a dungeon that spawned three types of monsters . . . they looked pretty much the same though since they had humanoid forms but emitted different types of energy .

‘What the heck is this . . . ‘ Leon frowned .

Putting the fact that they had the same status and very similar skills aside, the fact that their skills were at that level was peculiar . It looked like Leon would suffer a little bit to drain their mana since he would have to touch their bodies, but it couldn’t be helped . Besides, it would increase his elemental resistances . So, Leon would have to endure .

‘I wonder what I will find on the other side of this dungeon . . . something is very off about those monsters . Putting the Thunder Elemental aside, the Fire Elemental and the Frost Elemental were supposed to be enemies . . . why are they ignoring each other?’

There was only one way to discover that, so Leon decided to ready himself to invade the other world . To avoid unpleasant surprises, Leon decided to increase his stock of mithril .

It is getting hard to increase my stamina . . . now I have to run for twelve hours straight to increase it by a single point . Shall I stop this training ?

Although Leon didn't want to rely on tools because he could lose them, he decided to create some equipment made of mithril instead of just hiding them inside his clothes . He did that because he didn't have time to waste . Right at the moment, he was facing enemies that had a lot of mana, but eventually, Leon would meet monsters like ogres again .

‘Walking using equipment only made of mithril is a pain, but I guess it can't be helped since those elementals disappear once they die . ‘

Leon was wearing bracers, boots, breastplate, and a helmet made of mithril . The weight of those combined was equal to fifty kilograms, so after one week draining their mana, Leon decided to enter the dungeon .

The first enemy Leon faced inside the dungeon was a Fire Elemental, the creature pointed both hands toward Leon, but he moved faster and shot several Frost Waves . The small projectiles flew toward the beast and instantly froze the creature when it hit . However, soon it started to melt . . . the level of the skill was slow, after all . However, Leon had been waiting for that . The water decreased the monster's fire and amplified Leon's Thunder Ray . The creature trembled while it was being electrocuted, but soon evaporated without causing a single scratch in Leon .

‘Killing them is much easier . . . Well, it's not like I have any choice but to do that in a confined space . ‘

Leon decided to drain their mana later because it was too dangerous to get too close to them inside the dungeon . Leon used a similar strategy to defeat the Frost Elemental, after using the Heat Wave to surprise and annoy the enemy, he covered the creatures with a thick layer of earth . After that, Leon melts the creature by combining the layer of earth with his Flamethrower . The monster could extinguish the fire, but not magma, at least not fast enough .

‘I wonder why they don't have cores . . . they kind of remind me of golems . ‘

The elementals were pretty chill creatures . They didn't destroy everything on sight . . . at least not intentionally . They only looked for the enemies and didn't show any signs of emotions . . . if anything, they were like improved versions of Leon's lesser spirits . However, it was clear that wasn't the case,

Leon could only summon several spirits, as long as they weren't from the same element .

Although they had different magic properties, the same strategy worked well on the Thunder Elementals . In fact, it was even easier to defeat them . Leon just had to create a very thick layer of earth around them . The monster would try to destroy it using its elemental properties, but it would only damage itself since the earth would eventually become magma . To speed up things a little bit, Leon used Flamethrower .

‘Even though they also are monsters that came from a world that is on the third stage of assimilation, they can't even be compared to angels . . . ‘

Although his skills were leveling up nicely, Leon was already thinking about the new ones he should practice . However, considering that he already had some skills under level thirty and now he was facing elemental creatures, he decided to level up his weakest elemental spells first . Although the cost was slow, the damage would increase due to the elemental compatibility . . . in fact, it was the perfect moment to do that .

‘Well . . . first, I must see how things are on the other side and then secure the surroundings . ‘

It didn’t take long for Leon to find the purple crystal, and to keep his momentum . He decided to touch the crystal . Leon hesitated a little bit, even if he had taken his time to do it, nothing would change, but Leon couldn’t help but feel like he made a mistake after seeing a horde of elementals around him .

‘Oh, crap . . . ‘

Leon didn’t know if all of those would go to Earth or if that wasn’t the case, why were they there? However, it didn’t matter . . . it also wasn’t time to level up his low-level skills, Leon attacked those creatures using Plasma Arrows because he shouldn’t give them any chance to attack .

Novel Chapter 417

Chapter 417: 417

‘Mmm . . . this place is . . . ‘

Leon couldn't help but frown when he looked around, he had imagined that he would see a world very similar to one of the elemental golems, but that one also looked very ordinary . Leon could see in the distance a forest, a few mountains and . . . a massive castle .

‘The sentient race of this planet still exists? That is surprising . . . but if that is the case, why they aren't trying to invade Earth?’

Maybe Leon should change his mindset a little . . . it was a bit harsh to consider that every single creature of other planets were his enemies . Regardless, the building was so massive that Leon couldn't even see any scratches from that distance . It was hard to imagine if that had been built after the dragons appeared or before and managed to survive their attacks .

‘I wonder what I should do . . . if there are people there, I can't understand why they didn't try to communicate with the humans from Earth . If they aren't interested in domination or aren't concerned with them, it must be because they are powerful, but that doesn't make any sense, since this world is supposed to be on the third stage of assimilation . ‘

The more Leon thought about it, the more confused he got . To avoid problems and unpleasant surprises, Leon decided to lay low for a while and do his own things . He came to that world to train, after all . Not to make friends . It didn't take long before a few elementals started to approach the purple crystal that would lead to Earth .

‘I guess it is time to level up my skills . I must start following the order on the list . . . ‘

After covering the monsters' bodies with earth magic, Leon shot several Fire Bullets toward them by combining Fast Conjunction and Multi-Conjunction . Leon used a lot of mana, but the creatures also started to tremble while they suffered damage . . . even though they were creatures that had no proper feelings like fear, they still could react that way upon receiving damage .

Congratulations! The skill Earth Creation has leveled up .

You obtained 01 status points .

Congratulations! The skill Fire Bullet has leveled up .

. . .

It didn't take long before Fire Bullet could reach level fifty, Leon used a lot of mana, after all . Despite that, some elementals were resisting and didn't die . . . they were all Fire Elemental, as expected . Leon already imagined

something like that would happen, so he fired Ice Bullets toward them at the same time he was slowly consuming the mithril around his body .

‘It is time to bring the big guns . . . ‘

Leon fired several Spinning Ice Arrows, the power of those were still low, but they did the job and stopped the fire elementals before they could get too close . Regardless, Leon had to use the equivalent of the double of his mana pool to defeat a small group of fifteen elementals . . . that was troublesome . Still, since Leon’s goal was to level up skills and obtain status, he decided not to overthink it .

Congratulations! The skill Ice Bullet has leveled up .

You obtained 01 status points .

You obtained 01 status points .

As if they had been programmed or something to do that, five minutes later, another group of five fire elementals, five frost elementals, and five thunder elementals headed toward the purple crystal . More and more, it was becoming clear that they weren't monsters . . . they were magic creatures obeying the will of someone .

‘A harvester . . . one much more powerful than the ones who tried to screw with me .‘

That was clear because the status of the elementals didn't change no matter what . . . that being said, Leon was having difficulties imagining how someone could create so many creatures that had that much mana .

‘It is probably a mage, and since that is the case, I shouldn't get too far away from the crystal since they can probably feel their minions getting killed . ‘

Since Leon didn't know the logic behind summoning or perhaps monster creation, he wasn't sure . But it made sense that the mana of someone was creating those creatures, Leon didn't have the skill to create golems, even though he was pretty sure that it does exist and it wouldn't require a catalyst to be used .

Leon decided to concentrate in order to act in case something happens, the chances of a mage that was specialized in creating minions approaching him to fight were low, but one can't be too cautious .

Regardless, it looked like things wouldn't go the way Leon wanted . When the fourth group of elementals appeared, they suddenly stopped and vanished . Much to his surprise, a semi-transparent screen of mana appeared

in front of Leon . Nothing was being shown on the screen, but then Leon heard a strange voice amidst the sound of static .

‘Hello, traveler . I want to talk to you . Can you come to my castle ?’

Mmm . . . this place is . . .

Leon couldnt help but frown when he looked around, he had imagined that he would see a world very similar to one of the elemental golems, but that one also looked very ordinary . Leon could see in the distance a forest, a few mountains and . . . a massive castle .

The sentient race of this planet still exists ? That is surprising . . . but if that is the case, why they arent trying to invade Earth ?

Maybe Leon should change his mindset a little . . . it was a bit harsh to consider that every single creature of other planets were his enemies . Hello, traveler . I want to talk to you . Can you come to my castle ?

Novel Chapter 418

Chapter 418: 418

'I guess I should look for another dungeon . . . I'm too old to trust the words of a stranger just like that . '

The moment Leon was about to touch the purple crystal, a voice echoed inside his head .

'Hey, wait a minute, I just want to talk,' A feminine voice echoed in Leon's head . 'I'm not an enemy, and I'm not mad that you destroyed a few of my elementals . '

Leon frowned; it was Telepathy . It has been a while since Leon met someone who could use it . Only Darya could use it, after all . Still, the tone of the voice, despite being calm, it only made Leon feel more worried . He didn't kill a few elementals . He killed thousands of them . If Leon had that power and someone destroys his creatures just to create mithril, he would get really pissed .

‘Hey, are you listening?’ The woman’s voice echoed in Leon’s head again .
‘Is Telepathy working? Am I using proper words? It has been a while since I talked with someone . ‘

‘No, you are not using proper words,’ Leon said . ‘Since that is the case, I’m going to leave, have a good afternoon . ‘

‘ . . . If I am not using proper words, how did you understand my question?’
The women asked .

‘ . . . I am very good at . . . solving puzzles . . . that is why I managed to understand the message,’ Leon facepalmed because of his stupidity .

‘Whatever . . . you are one of them, right?’ The women asked . ‘One of the guys who got involved with the harvesters and now wants to kill them, I’m the same . That is why I want to talk to you . ‘

Leon wondered how someone could understand that much just by looking at him . Now that Leon thought about it, Mind Armor was still active, but someone still could use Telepathy to talk with him . . . Probably because it wasn’t an offensive skill . Regardless . . . everything was too suspicious . Although he concluded that the person who was talking to him was a harvester, she was acting as if she wasn’t one .

‘Why do you want to hunt them?’ Leon asked . ‘You are the same as them . ‘

‘No, I’m not,’ The woman said . ‘I’m not killing sentient beings, only monsters . . . you should have noticed that . Did you find any other type of monster near the dungeon? My golems only attacked you because I wanted to

confirm my hypothesis . I'm sorry for that, but I wouldn't be able to judge if you were an enemy or not without doing that . ‘

‘Well, now . . . what should I do?’

‘Just come to my castle,’ The woman said . ‘I already told you I just want to talk, you probably have the information I want, and of course, I will help you a little bit if you prove yourself useful . ‘

‘Don't read my mind . . . ‘ Leon frowned . ‘What kind of information do you want?’

‘You picked the interest of some harvesters, right?’ The woman asked . ‘I can tell because I already saw many like you . ‘

Now that was surprising . . . Leon didn't expect to hear something like that anytime soon . However, it wasn't that surprising that he would meet someone in a similar position, or at least someone who knew several individuals that experienced what Leon experienced . Everything was starting to make sense, that woman was much more powerful than someone who would actually live in a world that was on the third stage of assimilation . She was capable of creating those elementals, after all . She was only there to make use of time dilation .

‘If you are that afraid, you just have to create two checkpoints using mithril,’ The woman said . ‘Just put one of them near the crystal, and you will be able to move to their instantly as long as you keep the second with yourself . ‘

As expected, she was really a magician that had a lot more knowledge than Leon has . That kind of information was valuable, but Leon was angry because he was clearly being taunted but still was falling for that cheap trick .

‘Hah . . . I’m not going to keep insisting,’ The woman said after a long sigh .
‘In the end, someone so fearful wouldn’t help me in any way . ‘

After that, Leon didn’t hear anything . Leon felt alleviated, but he couldn’t help but wonder about what he should do . Until now, he only found enemies that had more magical knowledge than him . It had been the first time that he met someone who knew more than a few tricks and clearly didn’t show any hostility .

‘Mmm . . . It is risky, but like everything that is dangerous, it may grant me many things . She probably is going to ask me about the harvesters that I know . . . most likely, she also wants to hunt a harvester or two . I will take my chances . ‘

I guess I should look for another dungeon . . . Im too old to trust the words of a stranger just like that .

The moment Leon was about to touch the purple crystal, a voice echoed inside his head .

Hey, wait a minute, I just want to talk, A feminine voice echoed in Leons head . Im not an enemy, and Im not mad that you destroyed a few of my elementals .

Leon frowned; it was Telepathy . It has been a while since Leon met someone who could use it . Only Darya could use it, after all . Still, the tone of the voice, despite being calm, it only made Leon feel more worried . He didnt kill a few elementals . He killed thousands of them . If Leon had that power and someone destroys his creatures just to create mithril, he would get really pissed .

Hey, are you listening ? The womans voice echoed in Leons head again . Is Telepathy working ? Am I using proper words ? It has been a while since I talked with someone .

No, you are not using proper words, Leon said . Since that is the case, Im going to leave, have a good afternoon .

. . . If I am not using proper words, how did you understand my question ? The women asked .

. . . I am very good at . . . solving puzzles . . . that is why I managed to understand the message, Leon facepalmed because of his stupidity .

Whatever . . . you are one of them, right ? The women asked . One of the guys who got involved with the harvesters and now wants to kill them, Im the same . That is why I want to talk to you .

Leon wondered how someone could understand that much just by looking at him . Now that Leon thought about it, Mind Armor was still active, but someone still could use Telepathy to talk with him . . . Novel Chapter 419

Chapter 419: 419

‘I wonder how many years it would take to build something like this with my current status,’ Leon rubbed his chin . ‘Rather, why build something so massive ? Just to show off or level up her skills ? I guess it is probably the

second option . . . I did something similar, creating the spear that killed the galactic snake, and I received a lot of points . ‘

There were no windows on that building, but it had four massive entrances that were being used only by the elementals . As expected, they were leaving in groups of fifteen and walking toward very specific locations . . . they were going toward several purple crystals .

Leon entered the building, and this time the elementals ignored him . Despite the lack of windows, the interior of the castle was well illuminated by candles made of mithril . . . it was quite an inefficient way to use mithril, but thanks to the numbers, Leon found the way to the center of the building . It was weird, but the whole castle had only one room . . . the woman created four walls and a ceiling and then decided to call it that a castle just because it was big .

Leon found the woman sitting cross-legged right in the middle of that massive room . She was a redhead . . . it was the only thing Leon could see since her hair was so long that covered her whole face and most of her body . Leon could see some parts of her clothes, but those became brown thanks to the dusty, and Leon couldn't recognize if she was wearing a dress or something else thanks to it . It looked like she stayed in that position for a very long time . . .

‘Oh, you really came,’ The woman said . ‘Guess you aren't a coward, after all, a coward wouldn't choose the path you are following . My name is Ilyana Daeyarus . You can call me Ilyana . ‘

‘My name is Leon . . . nice to meet you .’ Leon hesitated for a second but decided to greet the weird woman .

‘Well, Leon . . . how about we make things fair for both of us?’ Ilyana asked . ‘You can ask a question, and then I will answer whatever you ask . After that, I will ask a question, and you will answer with the best of your ability . How about that?’

‘I guess it is fine . . .’ Leon said .

‘Well, then, let’s start,’ Ilyana said . ‘You can sit down; I don’t think this conversation will end anytime soon .’

‘All right . . .’ Leon sat down but decided not to relax too much . ‘Do you know how to use Teleport?’

Things were getting weird again, Leon already knew that Ilyana could read minds, but he couldn’t imagine how she discovered that, given that Leon didn’t think about that .

‘Don’t make such a face,’ Ilyana said . ‘First, you have to learn that every spell, skill or passive skill can be countered . There is no power that is absolute for creatures like us . The appraisal is very useful and all, but it has its limits . The improved version of Appraisal is much more useful . I can even see your age, date of birth, and the planet you come from . ‘

‘That is . . . ‘ Leon frowned .

Terrifying, to say the least . . . it was like the universe had the register of every single living being, and that skill granted Ilyana such knowledge . That being said, Leon didn’t know how such knowledge could be used during a fight .

‘Well, it is my turn now,’ Ilyana said . ‘You got transported to another world, right? How many times and by who?’

‘You asked three things . . . ‘ Leon said . ‘Yes, I was summoned by a lizard man once and by a shadowy figure that I couldn’t see another time . The second teleported me to the insides of a massive monster . ‘

‘I see . . . I know them,’ Ilyana nodded . ‘I never met them, though . Well, you can ask three questions . ‘

‘How do I learn teleportation? Can you teach me how to summon creatures?’ Leon asked. ‘And lastly . . . why did you call me?’

‘You are not ready to learn teleportation,’ Ilyana said. ‘You have to have at least ten thousand points in intelligence to control it effectively. Not only that, but you also have to understand the principles of dark magic. I can teach you how to summon basic creatures like golems, to summon something else, you will have to study for months, maybe years. And I called you because I want to ask you where you met them.’

As expected, to learn certain skills or spells, minimum attributes were necessary. Perhaps that woman could see that by using the skill she used to counter Leon’s Mind Armor. Regardless, Leon obtained some valuable information, but he could obtain even more, he just has to be a bit patient.

‘There is a planet called Miebos. I found a dungeon that spawned liches, and that was connected to the world of the shadowy figure,’ Leon answered. ‘As for the lizard man, he did some things here and there on Earth, but a long time has passed since then. I only saw him once on Miebos, too.’

I wonder how many years it would take to build something like this with my current status, Leon rubbed his chin. Rather, why build something so massive? Just to show off or level up her skills? I guess it is probably the second option . . . I did something similar, creating the spear that killed the galactic snake, and I received a lot of points.

Novel Chapter 420

Chapter 420: 420

‘Sure . . . So, you were a victim of harvesters too?’ Leon asked . ‘There are many others like us?’

‘If you live long enough, you will find a few hundreds of people that have been messed with by several troublesome individuals,’ Ilyana explained .
‘Most of them are much older than me, so I can’t understand what their goal is, but a few only want to get rid of individuals like you because they can accelerate the growth of entire races . ‘

‘I imagined something like that,’ Leon said .

‘After reaching a certain level of power, they can only manifest their bodies in worlds that are on the fourth stage of assimilation,’ Ilyana added . ‘However, they can only kill individuals because they are beings that considerate to belong to the worlds on the sixth stage of assimilation . I can’t say for sure, but I think they are in a race to reach the seventh stage of assimilation . . . I never heard of a sentient being that becomes powerful enough to reach that stage, but many think that is the last stage . . . the ones who reach that level will become gods . ‘

‘Seriously . . . ‘Leon massaged his eyebrows . ‘They caused so much trouble to many just for power . . . I already knew that, but . . . after hearing that from someone else only makes me feel a terrible headache . ‘

‘If you want to know, I can tell you how your world will change,’ Ilyana said . ‘At this pace, in four hundred years, Earth will reach the fifth stage of assimilation, and the true harvesters will be able to manifest themselves there . It will be a slaughter . As you can imagine, the people there aren’t strong enough or have the numbers to protect themselves . Some of them fled to other planets . Only that won’t solve the problem . With the level of mana on your planet at the fifth stage, the planet will be able to heal itself from the damage caused by them . However, even though it will be hard, it won’t be impossible to destroy the whole planet if two or three harvesters that are on the sixth stage get serious . ‘

‘Is that so . . . ‘ Leon said .

‘After one thousand years on the fifth stage, Earth will reach the sixth stage of the assimilation,’ Ilyana added . ‘From that point onward, your planet won’t be destroyed no matter what . However, the harvesters will be able to use their power freely and appear and leave whenever they feel like it . Their presences alone will change the weather of your world and destroy everything that makes it habitable . ‘`googletag.cmd.push(function()
{ googletag.display('div-gpt-ad-InStory-1 '); });`

‘That sounds scary,’ Leon said while he was scratching his chin .

‘I don’t want to face hundreds of them,’ Leon answered . ‘I will be satisfied in beating the two that messed with me to a pulp . . . I guess I can’t just leave Earth behind since the fastest way to find them is to try to protect Earth . ‘

‘So, are you going to protect your world?’ Ilyana asked, ‘Even though no one there still remember who you are?’`googletag.cmd.push(function()
{ googletag.display('div-gpt-ad-InStory-3 '); });`

‘I don’t have much of choice,’ Leon said . ‘Even though that is the case and I don’t know for how long I will live, I want to keep that place habitable . Besides, it doesn’t matter if my family and friends forgot about me . I didn’t forget about them, and my memories won’t let me just watch they die . ‘

‘I see . . . considering your level of Mental Fortitude . I’m quite impressed . ‘ Ilyana said .

‘Is that so?’ Leon asked .

‘Yes, ninety percent of people like us become mad dogs after understanding everything,’ Ilyana explained . ‘Being forgotten by every single person is enough to crush the spirit and heart of any ordinary individual . The people who suffer through that sometimes even chose to end their own lives . ‘

‘Well, being forgotten is really a scary thing, after all,’ Leon said .

‘Do you want to work with me?’ Ilyana asked . ‘I failed to save my planet, now that place can’t even grow a single blade of grass . . . but perhaps with my help, you can save yours . ‘

‘ . . . Why would you help me?’ Leon frowned . ‘What would you gain by doing that?’

‘Not much, but if you manage to kill one or even two harvesters, my workload will decrease a lot,’ Ilyana explained . ‘If you are that dubious of my intentions, then you don’t have to do anything that I would recommend . Just ask what you want to know and train the way you want to train . ‘

That was quite a good proposal . It would actually decrease the chances of Leon falling into a trap . If what Ilyana said was true, she already had the means to kill Leon . That world was on the third stage of assimilation, and she would only be able to stay there if her power was considered to be on the fifth stage . The system wouldn’t stop her from killing Leon . Despite all that, there was a chance that she could lure him into a trap, in some way or another . Unfortunately, Leon would have to accept some risks in order to obtain power . To find the other spirits, it was better to ask her .

Sure . . . So, you were a victim of harvesters too? Leon asked . There are many others like us?

If you live long enough, you will find a few hundreds of people that have been messed with by several troublesome individuals, Ilyana explained . Most of them are much older than me, so I cant understand what their goal is, but a few only want to get rid of individuals like you because they can accelerate the growth of entire races .

I imagined something like that, Leon said .

After reaching a certain level of power, they can only manifest their bodies in worlds that are on the fourth stage of assimilation, Ilyana added . However, they can only kill individuals because they are beings that considerate to belong to the worlds on the sixth stage of assimilation . I cant say for sure, but I think they are in a race to reach the seventh stage of assimilation . . . I never heard of a sentient being that becomes powerful enough to reach that stage, but many think that is the last stage . . . the ones who reach that level will become gods .

Seriously . . . Leon massaged his eyebrows . They caused so much trouble to many just for power . . . I already knew that, but . . . after hearing that from someone else only makes me feel a terrible headache .

If you want to know, I can tell you how your world will change, Ilyana said . At this pace, in four hundred years, Earth will reach the fifth stage of assimilation, and the true harvesters will be able to manifest themselves there . It will be a slaughter . As you can imagine, the people there arent strong enough or have the numbers to protect themselves . Some of them fled to other planets . Only that wont solve the problem . With the level of mana on your planet at the fifth stage, the planet will be able to heal itself from the damage caused by them . However, even though it will be hard, it wont be impossible to destroy the whole planet if two or three harvesters that are on the sixth stage get serious .

Is that so . . . Leon said .

After one thousand years on the fifth stage, Earth will reach the sixth stage of the assimilation, Ilyana added . From that point onward, your planet wont be destroyed no matter what . However, the harvesters will be able to use their power freely and appear and leave whenever they feel like it . Their presences alone will change the weather of your world and destroy everything that makes it habitable .

That sounds scary, Leon said while he was scratching his chin .

I dont want to face hundreds of them, Leon answered . I will be satisfied in beating the two that messed with me to a pulp . . . I guess I cant just leave Earth behind since the fastest way to find them is to try to protect Earth .

So, are you going to protect your world? Ilyana asked, Even though no one there still remember who you are ?

I dont have much of choice, Leon said . Even though that is the case and I dont know for how long I will live, I want to keep that place habitable . Besides, it doesnt matter if my family and friends forgot about me . I didnt forget about them, and my memories wont let me just watch they die .

I see . . . considering your level of Mental Fortitude . Im quite impressed . Ilyana said .

Is that so? Leon asked .

Yes, ninety percent of people like us become mad dogs after understanding everything, Ilyana explained . Being forgotten by every single person is enough to crush the spirit and heart of any ordinary individual . The people who suffer through that sometimes even chose to end their own lives .

Well, being forgotten is really a scary thing, after all, Leon said .

Do you want to work with me ? Ilyana asked . I failed to save my planet, now that place cant even grow a single blade of grass . . . but perhaps with my help, you can save yours .

. . . Why would you help me ? Leon frowned . What would you gain by doing that ?

Not much, but if you manage to kill one or even two harvesters, my workload will decrease a lot, Ilyana explained . If you are that dubious of my intentions, then you dont have to do anything that I would recommend . Just ask what you want to know and train the way you want to train .

That was quite a good proposal . It would actually decrease the chances of Leon falling into a trap . If what Ilyana said was true, she already had the means to kill Leon . That world was on the third stage of assimilation, and she would only be able to stay there if her power was considered to be on the fifth stage . The system wouldnt stop her from killing Leon . Despite all that, there was a chance that she could lure him into a trap, in some way or another . Unfortunately, Leon would have to accept some risks in order to obtain power . To find the other spirits, it was better to ask her .
