

## Unlimited Power - The Arcane Path (COMPLETED)

### 583 Chapter 581

'In the end

Leon didn't manage to create the armor he wanted. As expected

creating an inorganic object that could drain

store

and restore his mana was a bit too much... However

Leon managed to make some interesting gear.'

'Semi-Indestructible Mithril Armor'

'It grants you: Endurance + 1500

Mentality + 1500'

'Self-Repair function: It uses the mana of the user to repair itself.'

'Condition: When the armor suffers any damage.'

'Durability: 18000 days'

'It was pretty impressive

but considering that Leon could use Mana Armor

Mana Shield

and Mana Barrier

it felt somewhat useless. However

Leon already met individuals that could ignore his defensive spells

so such armor was a necessity. Leon's ultimate goal was to create a power-suit

but it would take some time before that happens.'

'Congratulations! You have learned the skill: Wind Shuriken.'

'Cost: 500 mana'

'You obtained 01 status points.'

'Congratulations! You have learned the skill: Magma Shuriken.'

'Cost: 700 mana'

'You obtained 01 status points.'

'Congratulations! You have learned the skill: Ice Shuriken.'

'Cost: 700 mana'

'You obtained 01 status points.'

'Congratulations! You have learned the skill: Steel Shuriken.'

'Cost: 700 mana'

'You obtained 01 status points.'

'Congratulations! You have learned the skill: Thunder Shuriken.'

'Cost: 700 mana'

'You obtained 01 status points.'

""The power-suit won't be indestructible as the name of this armor says

but I guess it is a good start

" Leon nodded to himself.'

'Congratulations! The skill Earth Creation has reached the max level.'

'You obtained 01 status points.'

'Congratulations! The skill Water Creation has reached the max level.'

'You obtained 01 status points.'

'Congratulations! The skill Wind Creation has reached the max level.'

'You obtained 01 status points.'

'Congratulations! The skill Fire Creation has reached the max level.'

'You obtained 01 status points.'

'Those unexpected notifications also made Leon conclude that he could create a giant robot if he wanted. Although the massive weight would be a problem

he could nullify that by using Gravity and Telekinesis.'

'Regardless

before thinking of creating giant robots

Leon had to become a lot more stronger in order to make that much mithril. Even though that kind of idea was already proof enough that he got a lot stronger...'

""In any case

I need another goal since it is too early for me to learn conceptual magic..."  
Leon said. "Maybe I won't even need to learn it to reach my ultimate goal. Well

I guess it is time to learn how to absorb spells."

'Leon was aware that after Resistance

the second tier of elemental passive skills would be Immunity. But despite the fact that he trained his elemental resistances for decades

he had no idea how to become immune to elemental attacks. Despite its name

Leon was fully aware that even skills like Fire Immunity would have limits

but it was the next step and goal he needed.'

""Well

just in case

I guess I should train my elemental resistances up to the max level

" Leon said. "It would be a pain if those skills are part of the requirements to learn others

and I only discover that far in the future."

'In the end

Leon forced himself not to kill the monsters

and he even let them attack him as much as they wanted. As expected

the power behind the attacks of monsters on the fourth stage wasn't something to laugh at. Despite that

Leon only killed them when the island was full.'

'Thanks to Leon spartan training

he was forced to eat much more than usual since he was losing a lot of weight even though he was healing himself whenever possible also to train his healing skills. Despite that

it took five years for him to level up his resistance to the max level. Leon even made use of Donan and the angels for that...'

"Now I don't need to harm myself anymore... good grief

" Leon said after a long sigh. "Now

I can focus on learning new skills again while I try to understand the logic behind immunity skills."

'Congratulations! You have learned the skill: Cremation.'

'Cost: 5000 mana'

'You obtained 01 status points.'

'Congratulations! You have learned the skill: Fist Cannon.'

'Cost: 100 stamina per second'

'You obtained 01 status points.'

'Congratulations! You have learned the skill: Skull Crasher.'

'Cost: 400 stamina'

'You obtained 01 status points.'

'Congratulations! You have learned the skill: Lightning Uppercut.'

'Cost: 300 stamina'

'You obtained 01 status points.'

'Congratulations! You have learned the skill: Hell Spiral.'

'Cost: 1000 mana'

'You obtained 01 status points.'

'Considering that it was the upgraded version of the elemental resistances  
the immunities also were supposed to be passive skills. So

Leon couldn't learn them by using mana. If Leon couldn't use mana

then the only way to learn it would be by burning himself... but if he burns  
himself

then he won't learn the skill because it was supposed to prevent that...'

"No

in the end

skills can only do so much on their own

◆◆ Leon said. "Even if I have Fire Immunity at the max level

if I face a stronger opponent that uses fire

I will get hurt in the same way if I didn't have the skill."

'In the end

Leon could only use fire and see what happens. As expected since his intelligence was high he ended up burning himself a lot even using a small flame. Fire Resistance was supposed to prevent that but since his Fire Creation increased his fire power it was unavoidable.'

"Mmm... some skills also have status requirements. Maybe that is what is missing

" Leon rubbed his chin.'

'Leon's mentality was really now

and since he had no idea if his theory was true or how high his mentality would have to be

he hesitated in allocating his points. However

in the end

he did it. Leon still could remember how easily he lost his arm when that other human attacked him... to avoid that kind of scenario again; he would need more defensive skills.'

## **584 Chapter 582**

'Congratulations! You have learned the skill: Fire Immunity'

'You obtained 01 status points.'

'In the end

Leon managed to learn Fire Immunity after allocating ten thousand points in his mentality. As expected

that passive skill also had a requirement in status.'

"Let's see if I can use learn the other passive skills..." Leon said and then started his experiments.'

'Congratulations! You have learned the skill: Pain Immunity.'

'You obtained 01 status points.'

'Congratulations! You have learned the skill: Poison Immunity.'

'You obtained 01 status points.'

'Congratulations! You have learned the skill: Water Immunity.'

'You obtained 01 status points.'

'Congratulations! You have learned the skill: Wind Immunity.'

'You obtained 01 status points.'

'Congratulations! You have learned the skill: Ice Immunity.'

'You obtained 01 status points.'

'Congratulations! You have learned the skill: Earth Immunity.'

'You obtained 01 status points.'

'Congratulations! You have learned the skill: Curse Immunity.'

'You obtained 01 status points.'

'Congratulations! You have learned the skill: Darkness Immunity.'

'You obtained 01 status points.'

'Congratulations! You have learned the skill: Light Immunity.'

'You obtained 01 status points.'

'Even though he tried to learn it for quite a while

Leon didn't learn Illusion Immunity

Sleep Immunity

and Gravity Immunity... most likely  
those were impossible to learn  
or they could be trouble for their users  
so the system didn't recognize them.'

"As expected

even with those immunities

I can still suffer elemental damage..." Leon rubbed his chin. "I need to make some tests

but I guess those skills decrease the power of elemental by one hundred points per level."

'It would be difficult to test that on himself

but Leon was also pretty sure that

for example

instead of decreasing the power

Fire Resistance decreased the damage caused by spells by ten points per level. Meaning

at the max level

Fire Resistance now could nullify ten thousand points of harm to any fire-related attack. Meanwhile

Fire Immunity could become ten times more efficient... that would explain the mentality requirement.'

"I suppose to learn Elemental Absorption; I will have to increase my mentality and also level up my elemental immunities to the max level..." Leon dropped his shoulders and then sighed. "Still

something is off... I found certain monsters with that kind of skill

but they didn't have a high mentality... More and more

it is becoming certain that monsters work in a different system. At least in terms of status and skills."

'Regardless

after so much literal painful grinding

Leon decided to train those new passive skills slowly. He still would have to stay at least two more thousand years in that dimension

so there was no need to rush. Even though it was a bit troublesome that learning how to absorb spell became a medium-term goal

it was a goal that was bound to be reached.'

'Although Leon decided to take it easy in punishing himself

for the time being

he ended up letting himself get wounded to obtain some sweet

sweet status points. The elemental resistances were at a low level

after all. It was the best moment to gain status using them.'

"With my Elemental Immunities

the damage caused by small fry will decrease and perhaps even disappear altogether

" Leon concluded. "Unless I use some buffs on my summoned monsters

they eventually won't cause damage to me anymore... It looks like all my roads lead to self-harm."

'Leon did some tests

and even though the immunities were at a low-level

only monsters that were above the third level of assimilation could scratch Leon. The increased mentality was helping with that

but Leon felt satisfied with his progress nonetheless.'

'Leon frowned when he saw several giant hands appearing out of nowhere to attack him. Although Mana Armor protected him

it didn't change the fact that he got caught by surprise. However

once he activated Mana Eyes

he clearly found his new targets. Even though they were using Invisibility

Leon could clearly see a group of humanoid creatures that had wings and horns.'

"Demons?" Leon frowned. "They don't look that dangerous."

'It looked like those were a variation of the ones Leon faced before. They were smarter and far calmer. Regardless

they tried to kill Leon using a sneak attack

so he didn't hesitate to kill them.'

'Congratulations! You have learned the skill: Giant's Water Hand.'

'Cost: 1000 mana'

'You obtained 01 status points.'

'Congratulations! You have learned the skill: Giant's Wind Hand.'

'Cost: 1000 mana'

'You obtained 01 status points.'

'Congratulations! You have learned the skill: Giant's Earth Hand.'

'Cost: 1000 mana'

'You obtained 01 status points.'

'Congratulations! You have learned the skill: Giant's Fire Hand.'

'Cost: 1000 mana'

'You obtained 01 status points.'

'After a while

Leon finally learned their attacks

but he frowned when he tried to create some variations. Those elemental attacks had the shape of a massive hand

but instead of attacking the targets with a punch

it only slapped the target. Leon tried to create the punch version of that skill

but the system didn't recognize it.'

""Well

that kind of thing happens sometimes..." Leon said.'

'Leon analyzed that species of monsters hoping that they would teach him some more interesting spells

but he didn't find any in their skill list. Fortunately

those four spells could generate the other four

so for the time being

Leon was okay with it.'

'In any case

while Leon was leveling up those skills

he finally found another expensive spell worth of the hassle... Mindscape Transportation. With that skill

Leon could transport his enemies to a place created by his mind

and Leon would have full control over the events and rules of such a place. Thanks to that

Leon understood that was the skill Sekundez used... it was a very useful spell

but as expected

the price was very high... Leon would have to spend another one trillion coins.'

## 585 Chapter 583

'Some time has passed since the time Leon bought the last tome. Still

it would take a few decades for him to obtain the necessary coins to buy that tome.'

"Well

it will be useful

so it is worth the hassle

" Leon nodded to himself. "After learning that and obtaining Sekundez's power

I will be able to create this environment and create super-soldiers at an astonishing pace."

'The cost of mana wouldn't probably be high since Sekundez said that only a moment would pass in reality while Leon undertakes the trial. The only problem would be too finding individuals how could withstand being alone for hundreds of years. The human race wasn't strong enough to survive the attack of the harvesters

but they had the strength that couldn't be surpassed by just a few decades of training. Hence

the kind of situation where Leon was in was necessary.'

'Congratulations! You have learned the skill: Giant's Magma Hand.'

'Cost: 1500 mana'

'You obtained 01 status points.'

'Congratulations! You have learned the skill: Giant's Ice Hand.'

'Cost: 1500 mana'

'You obtained 01 status points.'

'Congratulations! You have learned the skill: Giant's Ice Hand.'

'Cost: 1500 mana'

'You obtained 01 status points.'

'Congratulations! You have learned the skill: Giant's Steel Hand.'

'Cost: 1500 mana'

'You obtained 01 status points.'

'Although the cost of mana of those new spells was high and he couldn't customize them as much as he wanted

Leon would still use them because of their effective range

and considering the size of skills

it would be perfect for smashing the zombies with them.'

""Using Mindscape Transportation

my replicas will probably meditate faster..." Leon concluded. "Even without Sekundez's power

I should be able to increase the speed of time passes there... the problem is

can I transport a replica to such a place when I'm in a place created by someone's else mind?""

'The answer was probably yes since Leon could summon things from his mind

after all. Still

Leon could think of applications of that skill once he learns it. For the time being

it was better to focus on the things he could do.'

'Congratulations! You have learned the skill: Bottomless Swamp.'

'Cost: 1000 mana'

'You obtained 01 status points.'

'Congratulations! You have learned the skill: Vacuum Fist.'

'Cost: 500 stamina'

'You obtained 01 status points.'

'Congratulations! You have learned the skill: Bloody Aura.'

'Cost: 100 health and 100 stamina per second'

'You obtained 01 status points.'

'Congratulations! You have learned the skill: Telepathy.'

'Cost: 100 mana per second'

'You obtained 01 status points.'

'Although Leon hesitated a little bit

after learning some skills from a random species of monster that he lost interest in

he decided to summon a replica of Darya in order to learn Telepathy. To avoid all possible problems

he summoned the Darya before he even learned her name

and even so... as soon as she appeared

he used Sleep before entering her mind and finding the memories of her using that skill. As soon as Leon found those memories and copied them

he made the replica disappear.'

"In the end

I feel like I did something even worse of creating someone to talk to..." Leon said

dropped his shoulders

and then sighed.'

'Although Leon did that to summon Donan and some angels

it was different since most versions of them treated him like an enemy. The only version of Darya that treated Leon like an enemy was the one who helped Donan when Leon challenged him.'

'In any case

Leon didn't have to summon his friend again because most of the skills Darya had

Leon was the one who taught her. Now

Leon could take with his summoned monsters without being nearby or touching them

but it would be useless for the time being since his monsters were already at the max level

and he wasn't using them to fight all that much.'

"I guess the easiest way to level up Telepathy would be to try to talk with Sekundez

" Leon nodded to himself. "Trying to make my mana leave this place will certainly consume all of it... Although that will cause a massive headache

I can't see better ways to level up Telepathy here."

'It already had become a common occurrence at that point

but a new monster appeared when Leon was about to do that kind of experiment. Much for Leon's surprise

the new species of a monster was very small... smaller than his fist. But even without using Appraisal

he discovered what they were just by seeing them flying around with small wings and sparkling like gems.'

"Fairies?" Leon asked

dumbfounded.'

'In Leon's mind

all fairies were females

but he saw some males among that group. However

such concern disappeared from his mind when those little creatures started to sing. Their voices were beautiful

and the melody was also relaxing

but Leon didn't feel even a little bit relaxing when his health

mana

and stamina started to drop for some reason.'

'Without wasting time

Leon used Sunlight Nova. The choral-like sound disappeared while the corpses of the monsters turned into ashes. Leon couldn't remember a single game or story where fairies were enemies

but it looked like they would torment him unless he kills them fast.'

'Congratulations! You have learned the skill: Song of Despair.'

'Cost: 100 mana per second'

'You obtained 01 status points.'

'Congratulations! You have learned the skill: Song of Melancholy.'

'Cost: 100 mana per second'

'You obtained 01 status points.'

'Congratulations! You have learned the skill: Song of Weariness.'

'Cost: 100 mana per second'

'You obtained 01 status points.'

'Congratulations! You have learned the skill: Harmony.'

'Cost: 500 mana per second'

'You obtained 01 status points.'

'Congratulations! You have learned the skill: Disharmony.'

'Cost: 500 mana per second'

'You obtained 01 status points.'

'It was already obvious

but Leon still felt quite surprised when he learned the fairies' skills. They could use their songs to attack the enemies' health

mana

and stamina directly. They also increase the status of their allies and decrease their enemies' status just by singing... it would be great if Leon could use all those skills at the same time

but he couldn't unless he uses Transform and create a version of himself that has five heads.'

## **586 Chapter 584**

'In the end

Leon could transform into a giant that had five heads

and each head could activate one of those song skills

but since it was scary

he soon stopped that. Although it was more efficient to use all the skills at the same time

those songs were Area of Effect skills

so they could affect several enemies at the same time

thus making the skills level up faster.'

""Although it is weird

it is also kind of cool to attack monsters using songs

" Leon nodded to himself. "It is also tiring for someone like who isn't used to singing

but I bet this could be useful in the hands of humans non-combatants."

'Since that kind of skill also can't be countered by any resistance

it was very useful. Besides

even those tone-deaf like Leon could use it perfectly... magic could really perform miracles.'

'Congratulations! The skill Fire Blessing has reached the max level.'

'You obtained 01 status points.'

'Congratulations! The skill Earth Blessing has reached the max level.'

'You obtained 01 status points.'

'Congratulations! The skill Thunder Blessing has reached the max level.'

'You obtained 01 status points.'

'Congratulations! The skill Wind Blessing has reached the max level.'

'You obtained 01 status points.'

'Congratulations! The skill Ice Blessing has reached the max level.'

'You obtained 01 status points.'

'Congratulations! The skill Water Blessing has reached the max level.'

'You obtained 01 status points.'

'Although those skills were useful and were leveling up at an astonishing speed

Leon still had to use several other spells. Thanks to it

part of the power he received from spirits also reached the max level.'

"It is kind of scary that I managed to make so many skills reach the max level..." Leon frowned. "I honestly thought several times that I wouldn't live long to reach that stage."

'Leon was pretty sure that leveling up skills would be much easier when he obtains Sekundez's power

but he always had to consider the chance of failure. If the worst comes to the worst

he wouldn't have any other choice but kill Sekundez and to do that. He would need a lot of power. Considering that Sekundez could control time and even survived those hordes of monsters and even can use freely the power of a skill that cost one trillion coins

it was clear that Leon was much weaker than her.'

'Even though Leon wanted to put all his worries aside

he couldn't help but wonder when he would face the last monster of the fourth stage. After counting the number of mithril statues

Leon concluded that two hundred and fifty years had passed the trial begun. Roughly

one hundred twenty years have passed since the first monster of the fourth stage appeared

and he still couldn't see the end in sight.'

'Congratulations! You have learned the skill: Death's Embrace.'

'Cost: 5000 mana'

'You obtained 01 status points.'

'Congratulations! You have learned the skill: Cold Fate.'

'Cost: 1000 mana'

'You obtained 01 status points.'

'Congratulations! You have learned the skill: Death Impact.'

'Cost: 1000 stamina'

'You obtained 01 status points.'

'Congratulations! You have learned the skill: Rose Thorn.'

'Cost: 500 mana and 500 stamina'

'You obtained 01 status points.'

'Congratulations! You have learned the skill: Lightning Blade.'

'Cost: 500 mana and 500 stamina'

'You obtained 01 status points.'

'The best thing Leon could do was to train

so he practiced his new spells after copying them from monsters he found in the past.'

"I just hope that I can learn Mindscape Transportation before..." Leon said but then suddenly stopped.'

'All of a sudden

dozens of zombies started to leave the ocean from all sides of the island. That surprised Leon a lot since they usually only appeared at the points close to Leon. Regardless

the increase in the number didn't surprise Leon. What did surprise him was the appearance of the zombies. Some of them had mithril parts like Crik and his underlings...'

"Just what the hell is going?" Leon frowned. "If they got attacked

why Ilyana didn't tell me that? No... perhaps they were attacked while I was on the first trial."

'In any case

the difficulty increased by a lot

Leon hoped that he would learn his new overpowered skill after a few decades

but at that rate

it wouldn't be weird if he only learns it in two hundred years.'

'Leon used Death's Embrace

a spell that instantly freezes everything nearby. Although the spell was powerful

it wasn't at a level where it could instantly freeze such powerful zombies. Leon also summoned his cold and explosive cores

but their effective range decreased greatly for some reason.'

'''It must be because of the zombies since they are sturdier

they can absorb a lot more damage

" Leon concluded.'

'Although it wasn't as nearly as effective as it was in the past

Leon still used Acid Sphere

Acid Arrow

and Acid Bullets over the horde of zombies that were quickly climbing the tower. It would be more effective to use Acid Rain

but Leon still wanted status points... since he couldn't obtain coins from zombies

if he doesn't get status points

he would genuinely be wasting time.'

'In the end

by using Fast Conjuration and Multi-Conjuration

Leon managed to slow down the zombies a little bit. Despite that

even though the skills were leveling up at an astonishing pace

eventually

the zombies would reach Leon

or at least their weight would knock down that tower.'

"Such annoying creatures... I guess it can't be helped

" Leon clicked his tongue. "This kind of skill would force me to use the Soul Eater's mana... but it is better than using skills that already are at the max level."

'Congratulations! You have learned the skill: Aqua Laser.'

'Cost: 1000 mana per second'

'You obtained 01 status points.'

'Congratulations! You have learned the skill: Fire Laser.'

'Cost: 1000 mana per second'

'You obtained 01 status points.'

'Congratulations! You have learned the skill: Thunder Laser.'

'Cost: 1500 mana per second'

'You obtained 01 status points.'

## **587 Chapter 585**

'A few days ago

Leon had summoned the harvesters to see what kind of skills they had that he hadn't noticed before

and he found three that were particularly terrifying. Those were Aqua Laser

Fire Laser

and Thunder Laser. The last name was weird

but Leon didn't think too much about it. Even though they could

thanks to Soul Eater

they decided not to use those skills for whatever reason... maybe it was because magic wasn't their forte

but it didn't matter. Using Mind Control

Leon forced them to use those skills

and his mouth was left wide open when he saw the power behind it.'

'In essence

those spells could destroy almost everything. The high pressurized water created by Aqua Laser could cut everything even at level one. Leon saw the mithril parts of the zombies getting destroyed in a fraction of seconds. Fire Laser also had the power to melt everything instantly. Meanwhile

Thunder Laser had both aspects of the other skills

even though it was a bit less efficient.'

""Boy

oh boy... this is terrifying

" Leon said while he was using his new spells and seeing them destroying the horde of zombies like a hot knife could cut butter.'

'It didn't take long for Leon to feel the tower trembling. Aqua Laser finally pierced all the zombies along the way and now reached the soil of the island. That spell alone was causing an earthquake

so Leon controlled it a little more in order to hit the other zombies. Despite that

the tremor always returned after a few moments since the zombies didn't last even a full second.'

'Congratulations! The skill Aqua Laser has leveled up.'

'You obtained 01 status points.'

'Congratulations! The skill Fire Laser has leveled up.'

'You obtained 01 status points.'

'Congratulations! The skill Thunder Laser has leveled up.'

'You obtained 01 status points.'

'...'

"Mmm... I guess it will be better if return to the ground and attack the zombies from there

" Leon concluded after seeing that the zombies were constantly leaving the ocean instead of waiting for a minute. "That way

I won't end up knocking down the tower myself."

'This horde of zombies won't be only longer... it would be intenser as well. For the time being

Leon managed to destroy the zombies as soon as they left the ocean

but even he would have to sleep at some point

and he doubted that he would be able to sleep soundly like that.'

"Well

I guess I don't have much of choice here

" Leon rubbed his chin. "I have two options

summon more powerful monsters or spend even more the mana stored in my soul eaters."

'That was a tough call. Leon wanted to use that mana to level up Foresight and see the things that may happen in the future as much as possible. In any case

Leon had to make his decision as soon as possible

because if he chooses to summon more monsters

he would have to give them some time to level up.'

"Wait a minute... what if I turn those zombies into my zombies?" Leon rubbed his chin. "There is also a possibility that I can use Tame on them."

'Although that was a good plan

that had some problems. First

the zombies couldn't die. Even if Leon destroy their heads and hearts

their other parts could still move

so the only option was to obliterate them. Also

Tame only worked on creatures that had some degree of intelligence. So

that was a no.'

"I can't use Tame of Summon Zombie... so how about Mind Melding?" Leon asked himself. "If they have memories of the time

they were alive... maybe I can obtain their experiences and level up several skills."

'Leon knew that monsters didn't have previously memories

at least the monsters that spawned there were like that. However

there was a chance that the zombies were different. There was only one way to find out. Unfortunately

the zombies didn't have memories.'

"Annoying little monsters..." Leon clicked his tongue and increased the gravity of the island.'

'Congratulations! You have learned the skill: Chaotic Gravity.'

'Cost: 3000 mana per second'

'You obtained 01 status points.'

'Suddenly

even the tower started to sink over the island. Leon didn't hold back

so a lot of mana had been used thanks to that. Regardless

the zombies fell as well

and they started to crush each other thanks to it.'

'Congratulations! You have learned the skill: Summon Mechanical Warg.'

'Cost: 150000 mana'

'Cooldown time: 10 seconds'

'You obtained 01 status points.'

'Warg – Lv 01'

'Health: 7500 +'

'Mana: 6000 +'

'Stamina: 7000 +'

'Strength: 720 +'

'Dexterity: 650+'

'Speed: 600 +'

'Intelligence: 500+'

'Endurance: 800 +'

'Control: 400 +'

'Mentality: 700 +'

'Luck: 300 +'

'Recovery: 1200 +'

'Willpower: 800 +'

'Coins: 00'

'Status: 00'

'Skill List'

'Active Skills: Dark Bite Lv 200

Flamethrower Lv 250

Steel Claws Lv 150

Self-Repair Lv 150

Fire Creation Lv 150

Earth Creation Lv 250'

'Passive Skills: Fire Resistance Lv 200

Ice Resistance Lv 150

Wind Resistance Lv 200

Thunder Resistance Lv 100'

"The number of skills lacks a little bit

but maybe he will obtain more as it levels up

" Leon said to himself after summoning his new monster and nodding.'

'Putting cost in mana aside

Leon decided to learn that skill because that was the first summoned monster Leon found that could use self-repair . That kind of ability would help a lot in long battles

and the battles against the zombies would be one hell of a long battle.'

'Regardless

thanks to his Mana Eaters

Leon managed to create an army of mechanical wargs pretty fast. When the creatures jumped toward the island

dozens of zombies got crushed by their weight

but their vicious attacks were actually the thing that made them shine on the battlefield. Still

it would take a while for them to make good use of their self-repair skill. The number of zombies was too high

and they didn't have time to stop and use it.'

## 588 Chapter 586

'In the end

Leon had to stay awake for three weeks straight summoning mechanical wargs day and night because the creatures only managed to overpower the zombies after a while; they reached level four hundred and finally obtained some room to use self-repair. Leon exhausted and felt like hibernating for three weeks

but since it would be dangerous for many reasons

he only slept for a day.'

'When Leon woke up

the number of mechanical wargs decreased a little

but the battle against the zombies still was in their favor.'

"I can finally resume my training..." Leon said and then let out a long sigh. "Maybe it is time to take some time off and really hibernate for a month or two

but considering that dragons appear on the fifth stage of assimilation

I guess I don't have time for that."

'Although Ilyana was the one who gave him that information

Leon had no reason to doubt her. Regardless

dragons were leagues above other monsters

not only in terms of raw power. They were fast and sturdy as well

so Leon would

without a doubt

have a hard time with them if ten of them also spawn per minute.'

'Congratulations! You have learned the skill: Sonic Blade.'

'Cost: 500 mana and 500 stamina'

'You obtained 01 status points.'

'Congratulations! You have learned the skill: Spiral Attack.'

'Cost: 200 mana and 200 stamina per second'

'You obtained 01 status points.'

'Congratulations! You have learned the skill: Eagle Dive.'

'Cost: 300 mana and 300 stamina'

'You obtained 01 status points.'

'Congratulations! You have learned the skill: Burning Force.'

'Cost: 1000 mana'

'You obtained 01 status points.'

'Congratulations! You have learned the skill: Soaring Dragon.'

'Cost: 1000 mana and 1000 stamina'

'You obtained 01 status points.'

""Mmm... maybe I should create some mana liquid

" Leon said. "Although I won't be able to use their hearts

I can still use their blood to increase the efficacy of potions.""

'Leon didn't know if Sekundez's also experienced the sixth stage of assimilation

but it wouldn't make any sense for him to experience that in that dimension. It would be way too convenient. Perhaps not so convenient since he could still die for real in that place.'

"Well

in the worst-case scenario

I can always try to tame the dragons or turn them into my zombies

" Leon said. "So

I guess I'm relatively safe here."

'To avoid any unpleasant surprises

Leon decided to spend all the mana of the soul eaters. It would be great if he could cheat and use the mana he obtained from monsters by using Mana Sacrifice

but he couldn't. So

training Foresight as much as possible

learning new skills

and leveling up old ones would have to be done even more intensively.'

'Leon postponed until now the training of his immunity skill

but considering the nature of the dragons

he couldn't do that any longer. Leon saw dragons that could breathe fire and use earth magic. He also heard about a water dragon when he heard the incident that caused Makoto's son's death. So it was time for Leon to level up those skills. The problem was

zombies couldn't use elemental attacks... in the end

Leon would have to harm himself again..'

"This has to be some kind of sick joke..." Leon dropped his shoulders and then sighed.'

'Fortunately

even though Leon's wasn't as durable as the monsters he faced on the fourth stage of assimilation

he still had the same amount of health as most monsters. Perhaps even more. So training his spells against his own body wasn't less efficient.'

'Congratulations! The skill Lion's Pride has reached the max level.'

'You obtained 01 status points.'

'Soon after Leon started his training

he received that notification. Although he was a bit surprised and satisfied

he was more surprised because it took a lot longer for him to level up that skill.'

"I guess the fact that I didn't face many dangerous enemies here is the cause of that

" Leon concluded. "Anyway

those extra statuses will help with the training."

'Now that Lion's Pride reached that level

Leon's status could become ten times higher as long as he fights alone. Although that was one hell of a power-up

Leon wasn't satisfied. The true power of that passive skill would only shine much later

and that was one of the many reasons Leon couldn't stop his training. It was because from now on. Every status point would become ten times more effective... as long as Leon trains and fights alone.'

"I finally obtained the power to keep one perfect replica active for almost one hundred seconds..." Leon showed a self-deprecating smile. "It is not bad

I guess

considering that could keep one active for three seconds years ago

but... oh

well. The grinding can't stop."

'Grinding already had become part of his being. It was like breathing so such thoughts didn't bother Leon anymore. Little by little by doing so he would obtain the power to do unbelievable things but no one had even done the only thing they wanted to do. So he had to keep moving forward until he has the power to do it...'

## 589 Chapter 587

'In the end

it took Leon thirty years for him to make all his elemental immunities reached the level max. After those thirty years

the zombies were still coming

but the mechanical wargs could stop their advance with ease.'

"I can finally focus on learning new skills again..." Leon said and then sighed.'

'Although Leon could have done both at the same time

Leon decided to focus as much as possible on just one task in order to focus on the other later. Unfortunately

Leon was already wondering about the elemental absorptions...

but as usual

a few skills to learn and level up were what he needed to focus himself again.'

'Congratulations! You have learned the skill: Infernal Torrent.'

'Cost: 1000 mana per second'

'You obtained 01 status points.'

'Congratulations! You have learned the skill: Final Embrace.'

'Cost: 4000 mana'

'You obtained 01 status points.'

'Congratulations! You have learned the skill: Gravity Gale.'

'Cost: 800 mana per second'

'You obtained 01 status points.'

'Congratulations! You have learned the skill: Geostigma.'

'Cost: 4000 mana'

'You obtained 01 status points.'

'Congratulations! You have learned the skill: Orochi's Fury.'

'Cost: 500 mana and 500 stamina'

'You obtained 01 status points.'

"Now that I mastered the elemental immunities

the best choice would be to learn the elemental absorptions because those skills would be a third layer of defense

" Leon muttered. "That being said

I have a feeling that dragons will let me learn that much faster than trying to do it on my own."

'It would be too easy if the requirements to learn elemental absorptions were the max level at the elemental immunities and a certain number in mentality. Although the upgraded version of certain skills can be learned by doing simple things

Leon doubted that it would be as easy to something so useful as the elemental absorption skills. At least that was his instincts were telling him. So far

they never failed Leon

so he decided to listen to them.'

"Well

if the worst-case happens

I doubt that even the dragons of the fifty stage can survive for long if I make them eat plasma or poison

" Leon shrugged. "Still

just to be safe

I guess I will level up some offensive skills to the max level before this horde of zombies come to an end."

'Although it was possible that Leon would find some poisonous dragons or even acid dragons

he doubted that he could find a plasma dragon... so that kind of skill would be useful against them if they show themselves to be stronger than expected.'

'Congratulations! You have learned the skill: Plasma Lance.'

'Cost: 5000 mana'

'You obtained 01 status points.'

'Before anything

Leon decided to learn Plasma Lance since that would be the easiest and perhaps one of the powerful weapons he could train alone. After that

he stopped from learning new skills and trained all the plasma related skills.  
Plasma Bullet

Plasma Arrow

Plasma Bomb

Plasma shield... since they all combined the strength of the basic elements

it took quite a while to level up all of them to the max level. It took Leon fifteen years...'

"Since I managed to learn all elemental immunities

perhaps I will find some dragons that have all of them

and the power behind it will decrease..." Leon rubbed his chin. "If that happens... I guess I will have to make do with my fists alone."

'Although Leon said that

he had no intention of training his physical skills to the limit for the time being. He was determined to level up them at the same pace as the other ones.'

"I wonder if I also should do some strength training..." Leon rubbed his chin. "My strength

dexterity

and speed will never be as high as the other status

but maybe I should increase those as well instead of just relying on buffs."

'Congratulations! You have learned the skill: Burning Moon.'

'Cost: 500 mana per second'

'You obtained 01 status points.'

'Congratulations! You have learned the skill: Ice Edge.'

'Cost: 700 mana'

'You obtained 01 status points.'

'Congratulations! You have learned the skill: Raging Blast.'

'Cost: 1000 mana'

'You obtained 01 status points.'

'Congratulations! You have learned the skill: Beastly Blow.'

'Cost: 800 stamina'

'You obtained 01 status points.'

'Congratulations! You have learned the skill: Ice Ward.'

'Cost: 500 stamina'

'You obtained 01 status points.'

'In the end

even though Leon allocated some status points to the attributes he ignored until now

after a while

he would always increase his intelligence and recovery again. To achieve his ultimate goal

he needed both of those alongside with mana and control... nothing else.'

"Although recovery is growing well

maybe it is time for me to create magic items that grant me effects like Mana Magnetism

" Leon muttered. "Even though there is a limit of how much I can obtain in this dimension using that skill

it should help me save some time."

'The mana stored in Soul Eaters was running out at an astonishing speed

so Leon was forced to worry about that again. Although most likely the dragons would be an excellent source of mana

Leon doubted that he could drain their mana using the soul eaters faster than they can try to destroy them.'

'In the end

Leon tried to create a mithril ring that had Mana Magnetism

but it didn't work...'

"The only real difference between Mana Magnetism and Zen is that one is an active skill while others is a passive one

" Leon said. "Is that why I can't seal a spirit that has the knowledge of that skill in anything?"

'Even though Leon has been sealing spirits inside items for literally centuries

he still didn't know all the limits of such spells. Regardless that hadn't been the first time Leon failed at something so that didn't bother him all that much.'

## 590 Chapter 588

"Let's see

let's see... today I have to learn the skills of those ancient trends

" Leon said after making a mark on another mithril statue. "I finally learned all the skills possible that monsters on the third stage have..."

'In the end

Leon didn't manage to keep up the pace. So

it couldn't be helped that he had to summon the monsters he faced in the past to see the skills they had. He was crazy enough to learn and use them to level up as much as possible

after all. Regardless

quite surprisingly

that monster had a skill Leon didn't expect to find.'

'Congratulations! You have learned the skill: Siphon of Life.'

'Cost: 1000 mana per second'

'Restore: 1000 health per second'

'You obtained 01 status points.'

"An area of effect healing skill..." Leon said

astonished. "So

I can finally heal monsters and people without touching them."

'Leon wondered why he never tried that before. Most likely  
it was because he rarely fought alongside others. In any case  
that kind of skill probably would be mortal for the undead... without wasting  
time

Leon decided to test it.'

'As expected

the range was limited since still was on a low-level

but the zombies started to tremble

and some part of their bodies started to disappear... even though those  
creatures didn't have clear valor in health

it took more than a few seconds for them to die.'

"When the skill levels up

the health restored increased by ten points

so I guess it is like the usual

" Leon nodded to himself. "At the max level

the skill will be ten times more efficient."

'The cost of mana was high

but since the range of the skill increased by one meter per level up

eventually

Leon would manage to damage several zombies at the same time. Although  
he had some summoned monsters

he could use that healing spell

Leon decided to use it on the zombies alone.'

"Considering that I can use Fast Conjunction even alongside healing spells

I don't really need it

and there is also Full-Recover

but... why are there so few healing spells?" Leon rubbed his chin.'

'Maybe it was because one could use a potion or even herbs to recover their health. Still

Leon couldn't help but frown while thinking about it. Full-Recover could heal most of the health of most individuals and even regenerate body parts

but the fact that so few monsters or even sentient being knew that kind of spell bothered Leon a lot. Regardless

even if it was weird

it wasn't a problem for Leon since he could use those skills.'

'Since the zombies didn't stop coming and Leon could recover mana faster than they could spend using Siphon of Life

he managed to reach the level max using that skill after a few months. Although the efficacy wasn't that amazing against zombies

Leon felt satisfied in having a healing skill that worked at a distance and could heal so many targets.'

'Congratulations! You have learned the skill: Cataclysm.'

'Cost: 1000 mana per second'

'You obtained 01 status points.'

'Congratulations! You have learned the skill: Magma Wave.'

'Cost: 1000 mana per second'

'You obtained 01 status points.'

'Congratulations! You have learned the skill: Landslide.'

'Cost: 500 mana per second'

'You obtained 01 status points.'

'Congratulations! You have learned the skill: Air Bolt.'

'Cost: 500 mana per second'

'You obtained 01 status points.'

'Although Leon just learned a few spells

he was already looking at the next group because it was a weird choice of magic projectiles. Still

since the latest ones he learned were all area of effect spells

Leon would have to contain his curiosity for the time being.'

"It is quite weird that monsters can have so many types of area of effect spells while I took my sweet time to learn them..." Leon frowned while he saw the skill list of a dark harpy. "I guess their status isn't the only thing that grows when the monsters reach other stages of the assimilation..."

'It was a pain to analyze those little facts

but in the end

Leon had to because nothing was happening

and he didn't learn the impressive skill. If he just skips those moments by deleting them

he would eventually forget what those skills could do

after all. Regardless

after a few months

Leon finally summoned an ancient lich and then learned its best skills that Leon himself didn't have.'

'Congratulations! You have learned the skill: Bone Bullet.'

'Cost: 50 mana'

'You obtained 01 status points.'

'Congratulations! You have learned the skill: Bone Punch.'

'Cost: 100 mana'

'You obtained 01 status points.'

'Congratulations! You have learned the skill: Bone Arrow.'

'Cost: 150 mana'

'You obtained 01 status points.'

'Congratulations! You have learned the skill: Bone Lance.'

'Cost: 200 mana'

'You obtained 01 status points.'

'Congratulations! You have learned the skill: Hex of Bones.'

'Cost: 2000 mana'

'You obtained 01 status points.'

"Phew... I don't really have to use my bones; after all

" Leon forced a smile.'

'Even though it was a bit gross to create bones out of nothing and use them to attack

it still was a very efficient way to cause damage since an elemental resistance to counter that kind of attack didn't exist.'

'Much to Leon's surprise

those spells were also quite effective against the zombies... Most likely

even though they didn't have a status like ordinary monsters

the zombies still had the sturdiness they obtained in life. Even though the cost of those new spells wasn't low

Leon managed to decrease the work of his mechanical wargs. That leads to fewer deaths in the mechanical wargs. Thus

Leon didn't have to summon new ones while he was practicing his spells.'

## 591 Chapter 589

'Before Leon could notice

fifty years have passed since the fourth wave of zombies started. He didn't know if Sekundez saw so many species dying before her or if that was just a representation of something else. All Leon know was the fact that he was sick of killing zombies and not obtaining any coins.'

'Congratulations! You have learned the skill: Spiral Flare.'

'Cost: 1000 mana'

'You obtained 01 status points.'

'Congratulations! You have learned the skill: Azure Heavens.'

'Cost: 5000 mana'

'You obtained 01 status points.'

'Congratulations! You have learned the skill: Bloody Rose.'

'Cost: 500 health and 500 mana'

'You obtained 01 status points.'

'Congratulations! You have learned the skill: Predator Instinct.'

'You obtained 01 status points.'

'Congratulations! You have learned the skill: Inferno.'

'Cost: 10000 mana'

'You obtained 01 status points.'

"It has been quite a while since I learned a passive skill... I did right in summoning one werewolf again

" Leon said.'

'It was getting kind of hard to summon all those monsters who weren't under his control

and copying their memories while they were trying to attack Leon was another downside. Regardless

just by having Predator Instinct

Leon could tell the location and feel how strong the nearby monsters were. It was weird to know that without using Appraisal

but the skill could make Leon comfortable or slightly uncomfortable if a beast was weak or slightly troublesome.'

"I should have met more people... If I had met all kinds of people

I would be able to summon a copy of them here and learn all kinds of things that could grant me some insight of how to learn conceptual magic

" Leon said

after a long sigh. "Yet

here I am learning in numerous offensive spells and grinding because I did it too much in the past."

'In the end

Leon was certain of just one thing

that Ilyana was plotting something. Considering the things she could do

she could have easily created a copy of her

or at least a copy of her mind to help Leon train. But she didn't... perhaps she considered the fact that Leon would feel suspicious of it and decided to refrain from doing so. There was even a chance that she knew that not even a copy of her would be allowed during Sekundez's trial. Either way

it didn't matter.'

"Ah! Begone useless thoughts!" Leon shouted. "I don't have time for conspiracy theories..."

'In the end

conceptual magic would only help Leon during training since he was someone just good at destroying things. Although he learned one thing or another that could help outside the battles

that wasn't by far his specialty.'

'Regardless

even though Leon had been thinking for decades of how to apply mana and make new rules for at the least space he could influence

he didn't obtain any result. In the end

he couldn't stop trying

but those failures at least helped Leon to focus on what he was really good at

and that was learning new offensive spells.'

'Congratulations! You have learned the skill: Thunder Torrent.'

'Cost: 1000 mana per second'

'You obtained 01 status points.'

'Congratulations! You have learned the skill: Frost Blast.'

'Cost: 1000 mana'

'You obtained 01 status points.'

'Congratulations! You have learned the skill: Death Flare.'

'Cost: 1500 mana'

'You obtained 01 status points.'

'Congratulations! You have learned the skill: Lullaby.'

'Cost: 500 mana per second'

'You obtained 01 status points.'

'Congratulations! You have learned the skill: Chains of Mana.'

'Cost: 1000 mana'

'You obtained 01 status points.'

'In the end

even though that was good for his sanity

Leon's notion of time started to deviate since he wasn't learning anything particularly powerful or interesting. Since most of his memories were composed of the moments

he learned new skills and leveled up them; decades became as long as weeks. Leon could tell that

and he knew it wasn't something one hundred percent good

but it was necessary because he was enduring that hellish environment to obtain the power to protect his friends and perhaps get rid of his enemies once and for all.'

'In the end

just to confirm that he was progressing as expected

Leon tried to copy several actions that Ilyana did in the past. As he had expected

only by using Transmute and creating a copy of his knowledge about a certain skill

Leon could make a tome

but also as expected

for that to work

his skills had to be at the max level.'

'Leon also discovered how Ilyana could monitor several places at the same time without being there. He just had to create any object made of mithril and then seal spirits that had the knowledge of Telepathy

and Sharp Eyes or Clairvoyance

and then Leon would be able to see everything that is happening in the place that object is. That being said

a magic item that had such skills needed mana

and since it consumed itself to work non-stop

it couldn't last long. Most likely

to conserve her mana

Ilyana created magic items that had Telepathy and some other skill that increases hearing.'

"Although that kind of thing doesn't grant any skill

it is a good way to test my creativity

" Leon nodded to himself

satisfied. "Well

I guess I do need some skills that enhance my hearing."

'Congratulations! You have learned the skill: Sharp Ears.'

'Cost: 100 mana per second'

'You obtained 01 status points.'

'In the end

Leon learned that skill quite fast

and now that he thought about it

he could probably learn the improved version of that skill and even Sharp Eyes... most likely

Clairvoyance was the last tier of Sharp Eyes  
and Leon missed the skill in between them. However  
those wouldn't be all that useful in that dimension.'

## 592 Chapter 590

'Although that was indeed the case  
in the end  
ninety-nine percent of the skills Leon learned  
he learned for the status points. So  
there wasn't a good reason to stop doing that. Besides  
even though Leon had a massive stock of mana fruits  
he was kind of bored of the taste since he was eating it day in and day out.  
Learning a skill that would enhance his sense of taste would be quite  
interesting in that scenario.'

'Congratulations! You have learned the skill: Enhanced Taste.'

'Cost: 50 mana per second'

'You obtained 01 status points.'

'Congratulations! You have learned the skill: Enhanced Hearing.'

'Cost: 150 mana per second'

'You obtained 01 status points.'

'Congratulations! You have learned the skill: Enhanced Vision.'

'Cost: 150 mana per second'

'You obtained 01 status points.'

'''Well

well... this isn't half-bad

" Leon said while he was testing Enhanced Taste. "I guess the name of the skill would be misleading if it were called Sharp Tongue..."

'Putting such worries aside

Leon could tell that the mana fruits became a lot tastier. Enhanced Smell had a lot of potential since after eating the fifth mana fruit

Leon wasn't getting bored of the sweetness.'

'Regardless

Leon also practiced Enhanced Hearing and Enhanced Vision; with both

he could hear the sound of the waves far away from him

and he also could see in detail even grains of sand.'

"I wish I had learned those skills when I was on Miebos..." Leon dropped his shoulders and then sighed. "Life would have been much easier with them."

'Leon couldn't wait to eat some meat while keeping that skill active

he actually could just summon some meat using Mind Summoning

but that would be weird. Leon wanted to eat something fresher. In any case

since a lot of time has passed since he saw her

Leon couldn't remember all of the incredible things Ilyana could do.'

'Leon already could create tomes

monitor spaces far away from him

use Telepathy

read minds... the only thing he could recall was her teleporting him around. But to do that

Leon would need the power of the spirit of darkness. Since that was something that would only be possible in the far future

Leon resumed his training since he could keep his new skills active while he learns some other spells.'

'Congratulations! You have learned the skill: Torment.'

'Cost: 1000 mana'

'You obtained 01 status points.'

'Congratulations! You have learned the skill: Solar Burst.'

'Cost: 2000 mana'

'You obtained 01 status points.'

'Congratulations! You have learned the skill: Death Barrage.'

'Cost: 500 stamina per second'

'You obtained 01 status points.'

'Congratulations! You have learned the skill: Infernal Ray.'

'Cost: 500 mana per second'

'You obtained 01 status points.'

'Congratulations! You have learned the skill: Magma Hail.'

'Cost: 800 mana per second'

'You obtained 01 status points.'

""What scary names..." Leon frowned. "Still

the names are quite fitting

considering that all those skills can do is cause destruction.""

'Although those skills weren't that effective against zombies

Leon still practiced them eagerly because skills like Torment and Magma Hail also influenced skills like Fire Transformation

Wind Transformation

and Earth Transformation. Death Barrage was just a quick succession of punches but still could help Leon level up Martial Arts faster... even though it was quite scary getting near zombies and punching their heads.'

"I guess it would be safer to use a replica and give the knowledge of those skills..." Leon rubbed his chin. "Still

what will happen if my replicas get bitten? What will happen if I assimilate the knowledge of a replica bitten by a zombie?"

'Although Leon wanted to take some risks in order to grow stronger faster

risking himself against the possible virus was another thing. Dying after being defeated by a power monster was acceptable. Dying by a zombie virus wasn't.'

'Not even Mana Eyes could grant Leon the power if those zombies had some kind of disease

so Leon barely attacked them physically. Maybe he was thinking too much about it because he saw many zombie movies in the past

but since Leon had a lot of free time

that was only obvious.'

"Eighty years have passed since the fourth horde of zombies started... there is a big chance that this horde will last for more forty-five years

" Leon nodded to himself. "Although that is a pretty long time

maybe I should focus on learning something different from offensive spells... I can't rely too much on my defenses to deal with the dragons

after all."

'As long as Leon has mana

he wouldn't instantly die. Still

not dying wasn't enough. Just defending wasn't enough

so Leon started to work on the next level of some defensive skills.'

'Congratulations! You have learned the skill: Reflect Shield.'

'You obtained 01 status points.'

'Congratulations! You have learned the skill: Reflect Armor.'

'You obtained 01 status points.'

'In the end

it took him thirty years of training to learn just two spells

but Leon was more than satisfied with the result. Just like Mana Shield and Mana Armor

Reflect Shield and Reflect Armor protected Leon from all types of attacks

but they also could reflect those attacks and the mana he used also increased the damage the attacker would receive.'

"Hehehe

now we are talking

" Leon smirked.'

'As expected

the cost of mana used was higher

but considering its wonderful effects

it was more than worth the hassle. Leon understood that when he saw the zombies crawling over his Reflect Armor and get destroyed in pieces. Although they didn't die instantly

they eventually would die since they were zombies and didn't think or do anything aside from attacking.'

'Although Leon hesitated a little bit

he decided to level up both skills to the max level before anything. What exactly took him fifteen years

and as expected

after one hundred and twenty-five years

the zombies stopped coming... and the dragons appeared.'
