

Weaponsmith 2241

Chapter 2241: Simply a miracle! (4)

Meng Wan'er's lips revealed a cold smile, feeling even more so that Huang Yueli would definitely lose her face this time round!

However, at this present moment, Huang Yueli who was standing in the middle of the array failed to notice Meng Wan'er's emotional changes.

It was to the point that even Ice Serpent Valley's ordinary disciples screaming weren't able to penetrate her ears.

All of her attention was placed onto this massive sized mechanism which she had completed in her past life, and she focused all her concentration she had in her mind, every single ounce of Profound Energy within her meridians were all operated together.

Now, the mechanism was totally activated and she could not allow any mishaps!

Ninth levelled mechanism had inexhaustible formidable power and even if a ninth stage realm strong exponent were to go head up against it, it would also end up in a narrow escape, what more for her who was in seventh stage realm!

It just required one slight error and she would die horribly!

But although the situation was tensed up, Huang Yueli's face remained calm and she was unhurried in every single instruction.

"Tianshu position, inject in seventy percent Profound Energy!"

"Tianxuan position, Tianquan position, Kaiyang position, listen to my countdown and inject your Profound Energy at the same time. Three, two, one, start! Excellent!"

"Tianshu position countdown five breaths, stop injecting Profound Energy."

"Next, you can inject ten pieces of Shattered Stars Jade in order starting from the bottom right damaged position, please get ready..."

"..."

Huang Yueli's sweet and melodious voice kept ringing in the vast snowy land.

Every single command was simple yet sonorous which clearly stated the specific operation which should be proceeded next.

Under her command, every single participating practitioner, although they were taut like a string, but weren't feeling terrified or puzzled.

Huang Yueli's voice and tone seemed to have magical powers, which allowed these people who were listening to her instructions for the first time believed, that as long as they trusted her fully and followed according to her requests, faithfully finishing whatever was to be done and they would be able to arrive at the final destination!

The truth was indeed as such.

Those who were within the array originally were able to detect the totality of the situation but for those bystanders who were outside the array, they were not able to see clearly that the originally obviously damaged mechanism, under the burning furnace, slowly started to congeal into shape as some inclining parts had all been restored onto the right track.

As time went by, the practitioners within the array who were assisting her started to have flawless coordination with her as the restoration speed became faster and faster.

The crowd outside the array were all dumbstruck by now.

Just two hours ago, other than the few outsiders from Blue Profound Sect, no one else believed that such a young lass like her was able to restore such a high levelled mechanism!

Even if it was just a passing thought, it still made one feel that it was just another fantasy story.

But at this very moment, the truth was already placed in front of their eyes.

A miracle had really happened!

Meng Hongye's expression was firstly startled, followed by turning into shock and her usually cold and aloof image could not be maintained as she rubbed her eyes several times, just to prove that she hadn't seen it wrongly.

Finally, her face flushed a joyous expression as she drew out a piece of nutsedge paper scroll as she opened it up and looked in detail against the sunlight.

"That's right, it's totally correct! Palace Lord Huang's completed design back then looked exactly like this, without any difference at all! Looks like she really can restore the mechanism!"

Chapter 2242: Simply a miracle! (5)

Meng Hongye's voice was quivering slightly as her joy was expressed within her speech.

This simply was because she really wanted to restore these mechanisms badly!

That year when she looked for Huang Yueli in her past life to set up the mechanism, she thought that the ninth levelled array was formidable hence she spared no means to move Ice Serpent Valley's thousands of years of savings, just to complete this defensive mechanism.

But she neglected one point. Once the ninth levelled mechanism was overly exhausted, it would end up damaged and restoring that wasn't something that an ordinary person could achieve.

Moreover, in the process of Huang Yueli's armament refining, she would always add in a lot of exclusive methods so even if it was an eighth ranked Armament Master, they would practically be unable to decipher the mystery in the mechanism design blueprint.

Hence when the mechanism was damaged, Meng Hongye also found quite a number of famous Armament Masters and even risked exposing the secret Ice Serpent Valley, heading over to Sky Emperor City to look for Armament Masters in the Armament Guild Headquarters, but in the end, none of them could satisfy her.

These Armament Masters seemed very incredible but on hearing that they were required to restore Grandmaster Huang's works, they immediately lost their confidence and most of them didn't even dared to try as they hurriedly rejected.

After experiencing so many setbacks, Meng Hongye was about to give up.

This time round, on seeing this young lass from Blue Profound Sect, Meng Hongye originally didn't hold any high hopes.

Even if Huang Yueli was filled with confidence, as she was brimming with confidence, Meng Hongye only treated her as a youngster who was boasting!

But this time, she actually guessed wrongly. This young lass wasn't boasting, but... really had an overwhelming strong armament refining ability which no one heard of!

"This... this really is the blessings of the heavens bestowed upon our Ice Serpent Valley! The beast tide in the Northern Ice Fields is approaching and I was just worrying about how we are going to pass this year's beast tide! It's all good now, as long as we can restore those mechanisms, Ice Serpent Valley will be safe!"

Everyone's eyes widened, waiting to see the miracle appear.

Only Meng Wan'er, on seeing Huang Yueli exhibiting her skills, showed a twisted expression on her face.

She couldn't help but scream in her heart, Impossible! This can't be possible! What backing does Bai Ruoli have, to really be able to obtain Palace Lord Huang's legacy? She definitely is putting on a pretence? That's right, now everything is merely temporary and the restoration process of the mechanisms have not ended so who can guarantee that the final outcome will definitely be a success?

Meng Wan'er was silently cursing, hoping that Huang Yueli would be able to make a mistake in the remaining time.

The best thing would be to have an explosion which would disfigure her pretty face so in that way, she would no longer be able to snatch the man from her!

Alas, Meng Wan'er's curses were destined to fail.

Huang Yueli's control of the restoration process was perfectly done.

The deviant flame which she chose to use this time was the Rainbow Core Flame which Dai Boqi had passed down to her.

This kind of deviant flame, when used in pill refining, could raise the success rate of pills being refined whereas when it's used during armament refining, it would also have a similar effect, and its characteristic was of an extremely stable deviant flame.

Under her skilled operation, the Rainbow Core Flame smelted the entire ninth levelled mechanism once again.

Huang Yueli was extremely satisfied with the men whom Meng Hongye had sent to her as these people's coordination level was very high and towards every single command of hers, they did not discount anything and executed her instructions well, saving her quite an amount of energy.

Slowly, the restoration process entered the concluding part.

All of the materials had been fused perfectly with the mechanism.

Chapter 2243: Simply a miracle! (6)

Under one command, all the practitioners retracted their Profound Energies at the same time.

Simultaneously, Huang Yueli's fingers also kept moving with different actions swiftly, as one after another hand gestures were struck onto different parts of the mechanism.

The blazing deviant flame also slowly started to weaken.

Until the very end, it completely extinguished.

Huang Yueli took a deep breath as she lifted her hands and wiped the cold sweat off her forehead while showing a smile at the corners of her lips.

"Alright, it's completed! Valley Master Meng, you may now come over to inspect the finished product."

Saying that, she retreated quite a distance back as she sized up her piece of work from afar, as she felt satisfied with it.

At this moment, the mechanism which was exhibited in front of everyone was polished to perfection and every single part was lively and beautiful. The rot and rust which was coated on the exterior parts were now cleaned up.

The entire restored mechanism looked anew.

Meng Hongye couldn't help but widened her eyes in disbelief as she took a step upwards and went round the mechanism's surroundings, inspecting in detail every single part and the more she inspected, the more terrified she felt!

"You actually... actually really did it! This is a ninth levelled mechanism and moreover it was personally designed and refined by Palace Lord Huang personally! You actually have the ability to restore it! You're too incredible, This Valley Master has never seen an armament refining genius like you before!"

Huang Yueli's lips curled into a smile as she naturally didn't object to it.

The mechanism that she designed herself, when she restored it, naturally there wasn't much difficulty at all.

If it wasn't for the fact that her cultivation in martial arts still isn't high enough, she wouldn't need to find so many helpers because she herself could easily settle it.

Moreover, if she were to restore it alone, her speed would be much faster than now. She spent a total of over two hours this time because she needed to match each practitioner's Profound Energy's intensity hence she intentionally slowed down the pace to a snail pace.

Of course, on the surface, Huang Yueli still put on a humble attitude as she quickly said, "You've overpraised me, Valley Master Meng, you're indeed really overpraising me!"

Her attitude was no different from yesterday, still the same where she wasn't servile nor too overbearing.

But in other people's eyes, it was completely two different matters.

Yesterday, everyone didn't understand her real ability hence all of them felt that this young lady was simply too wild!

But now, everyone came to realise that she wasn't being too wild at all! She was simply overly humble!

Most Armament Masters with her kind of abilities had their eyes grown on top of their brows and never looked at anyone in the eye?

This Young Miss Bai, although she wasn't amiable and approachable, but it was really rare, simply too rare!

Different kinds of praise kept ringing and as Huang Yueli usually heard quite a lot, hence she simply didn't think much of it as she directly walked right next to Li Moying.

Li Moying stretched out his long and powerful arm as he held her jade-like little hand in his palm and gently pulled her over with a light tug into his arms as his fingers moved around her forehead which was dishevelled, gently combing her messy strands of hair going right next to her ear.

"Li'er, it's been hard on you. Do you want to take a break?"

Huang Yueli blinked her big eyes as she shook her head.

Just at this moment...

"Wait a minute, Master, wait a minute!" Meng Wan'er suddenly stood out and spoke out loudly, "Master, Wan'er has something which I don't get, everyone... have you forgotten some important matter?"

Meng Hongye jolted as she turned her head and took at her, "Wan'er, what are you trying to say?"

Chapter 2244: Jumped into the pit that she dug herself (1)

Meng Wan'er's penetrative sight turned towards Huang Yueli and her tone was filled with deep suspicions.

"Master, haven't you found it strange that this Bai Ruoli is still so young but she is able to restore a ninth levelled mechanism. This is something which an Armament Master who is seventh ranked and above could achieve! She is so young but not only her armament refining standard is so high, I can tell that even her martial arts cultivation isn't weak as well, at least in the sixth stage realm so how is it possible for her to have that much time to learn so many things? So I doubt that she totally hasn't restored the mechanism but made use of some trickery in order to obtain the Claret Crystal Bracelet, deceiving everyone!"

When Huang Yueli heard her discrediting words, she almost laughed out.

If Meng Wan'er knew that not only did she practice cultivation, refine armaments, moreover she was also a first rate pill refining genius, she wondered if the former would be so infuriated that she would throw up blood on the spot?

However, Huang Yueli had no intention to exhibit her ace in front of everyone in Ice Serpent Valley.

She merely replied indifferently, "Young Miss Meng's words are indeed meaningful. Earlier when I was restoring the mechanism, everyone was present watching, what kind of trickery could I resort to?"

When the others heard that, they all also started to speak out for Huang Yueli.

"That's right, Young Miss Meng, everyone's watching here. I, Old Xu, didn't even blink as I have been watching from the start till the end!"

"Isn't that so? Although I don't understand armament refining, but just based on this stance, there shouldn't be any problem right?"

Meng Wan'er gave a cold laugh as she interrupted the others, "Earlier I said that you can't just rely on the exterior, the exterior appearance of the mechanism has been refreshed but is that considered as being restored successfully? Why has no one thought about verifying if the mechanism is really usable? The defensive effectiveness, is it really the same as what Palace Lord Huang had left behind?"

"This....." When Meng Hongye heard that, she was stunned as well.

Logically speaking, it was common practice to test out the product when the mechanism was manufactured or restored.

But earlier when Huang Yueli was restoring the mechanism, the commotion that she caused was simply too huge hence everyone were captivated by her gorgeous skills and they subconsciously believed her immediately that she had indeed restored the mechanism. Moreover the restoration was done perfectly!

No one had actually thought about doing the verification of the finished product.

Thinking of this, Meng Hongye frowned and said, "What Wan'er said, indeed made some sense."

She turned towards Huang Yueli, "Young Miss Bai, I'd like to test out the restored mechanism, what do you think....."

Her tone was extremely polite, and even carried a hinge of carefulness.

As compared to when she first met Huang Yueli, that towering arrogant attitude, it was totally different!

This was because Huang Yueli's exhibition of her armament refining skills was simply too shocking and if anyone were to see that scene, they would all think that this young lady's future was limitless.

As a Master of a Valley, Meng Hongye naturally wasn't willing to offend this kind of genius.

Huang Yueli shot a non-smiling smile at Meng Wan'er, and that gaze seemed as though she was looking at an idiot!

“Since Valley Master Meng has already said this, then let’s test out the mechanism. Earlier I had indeed overlooked this. This is the perfect moment so that I can make use of this chance to teach you the proper usage and maintenance of the mechanism, in case you guys spoil the mechanism in just a few years’ time.”

Her attitude was natural and unrestrained, perfectly composed.

Chapter 2245: Jumped into the pit that she dug herself (2)

Meng Wan’er thought she had caught a hold on her but from her attitude, her heart was drumming slightly.

Surely not right? This Bai Ruoli.... she agreed to testing the mechanism so easily, could she really have restored the mechanism?

Meng Wan’er instinctively felt that something was amiss and immediately made a wise decision.

She retreated several steps behind continuously, hiding behind Meng Hongye and the guards by her side, attempting to use the guard’s tall statues to conceal her existence, even better if it could make everyone forget about her.

Alas, in front of Huang Yueli, it was practically impossible for her to have created a ruckus then trying to hide.

Huang Yueli looked left and right when she suddenly raised her voice loudly, “Young Miss Meng? Young Miss Meng Wan’er? Can I trouble you to come out!”

Meng Wan’er wanted badly to pretend that she didn’t exist but since Huang Yueli had already pointed her out, the surrounding people all started to look at her and immediately, her position was sold out.

Meng Wan’er could only brace herself to stand out and on the surface, she still bore an arrogant attitude.

“Young Miss Bai, what can I do for you? Could it be that you’ve regretted it and aren’t willing to test the mechanism?”

Huang Yueli gave a faint smile, “How could that be? I’m not like someone, saying out something then turning around to feign ignorance...”

“What do you mean?” Meng Wan’er’s expression turned slightly ugly.

Huang Yueli still maintained her tender and agreeable smile, “Ha ha, Young Miss Meng, why is your temper so bad? I don’t mean anything, just that since you seemed to be the first to raise this out, saying that the mechanism that I restored might not operate properly, so we should first test it, isn’t that so?”

“That’s right, I was the one who raised that! But it’s normal practice to check on the finished product and I’m just doing so for Ice Serpent Valley’s benefit, what are you trying to do? If you don’t feel any guilt, why must you call on me, targeting me?”

Meng Wan’er looked at Huang Yueli with a guarded look as the words she said were more and more sinister than the previous sentence.

Every single sentence was digging a pit for Huang Yueli.

After being said like that, it seemed as though Huang Yueli had really done some guilty stuff when she was restoring the mechanism, hence she kept targeting the person who posed her doubts.

This was an evident reflection of making a false countercharge and when Li Moying heard that, his expression turned extremely gloomy whereas Liu Buyan and the others were also feeling anguished but they were trying their best to curb it.

On the contrary, Huang Yueli seemed as though she wasn't angry at all as the smile on her face became even more radiant.

"Oh my, Young Miss Meng, what are you saying? You've really misunderstood me!"

Seeing her matchless quiet and nice smile, Cang Po Jun and the others hearts' thumped as all of them had the same thinking in mind: That was it, Grandmaster Huang was really angry! This Meng Wan'er or whosoever had offended the female devil several times but still didn't feel remorseful, she's a goner this time round!

Huang Yueli had a beautiful smile in front of outsiders other than Li Moying and that was definitely going to push the other party into the pit!

But no one would be so nosy to go remind Meng Wan'er about this.

Anyway, they're already long seen this eccentric lady extremely unpleasant to the eye!

Huang Yueli walked towards Meng Wan'er with a face filled with smiles as she politely said, "Young Miss Meng, it's like this. Your doubts are perfectly logical and it's only natural to check on the finished product for transactions! My thinking is since you're the first to state out your doubts, then later when it's time to check on the finished product, you shall be the one to personally check on it! After you've personally tested these mechanisms, if you discover any parts which you're not satisfied with, you're welcome to list it out!"

Chapter 2246: Jumped into the pit that she dug herself (3)

Meng Wan'er originally thought that Huang would try ways and means to renege on it or tried to think of ways to deal with herself.

She had not imagined that Huang Yueli's attitude was so nice. Not only did she not quarrel with her, she even initiated the suggestion for her to inspect personally! This... was this wretched lass silly or what? She actually dared to do something so stupid?

Even if the mechanism she restored was really done perfectly without any problem, but as long as she did something during inspection, she would be able to create a bit of a problem by saying that she hadn't restored the mechanism to the ideal state!

So when ordinary people inspected the finished product, both sides would generally find a middleman whom they could trust.

Whereas Huang Yueli actually dared to find Meng Wan'er who had been on loggerheads with her!

Meng Wan'er really felt that Huang Yueli's mind wasn't very good! Otherwise, she must have been too overconfident!

But such a good chance was already delivered in front of her so she naturally wouldn't miss this opportunity!

Meng Wan'er smiled and immediately agreed to it, "Alright, since you trust me so much, then I'll be the one to check on the finished product! Master, what do you think about this?"

Meng Hongye however hesitated for a moment, "This... it's not impossible for you to do it but your cultivation is only at sixth stage realm whereas this mechanism is ninth levelled so logically speaking, it could resist a ninth stage realm practitioner's attack do it's still more suitable for the Valley's Elders who are in ninth stage realm fifth level and above to inspect the finished product?"

Meng Hongye's proposal was naturally more reasonable.

However, how would Meng Wan'er be agreeable to give up such a good opportunity hence she was insistent while persuading, "Let me check on it first and if there's no issues, then let's ask the Elders over. If it can't even pass my round, then there's no need to alarm Elders, letting them make a wasted trip."

When Meng Hongye heard that, it seemed logical as well hence she nodded her head.

"Alright then, go ahead and test on it!"

Meng Wan'er nodded her head as she took quick steps over to the direction of the mechanism, walking over.

By now, the sparkling mechanism and array which were under the sunlight earlier had all turned back into a transparent state, merging into one with the surrounding snowy land.

Meng Wan'er stood still in front and everyone's gaze gathered onto her.

In reality, everyone present all wanted to know how much of the original power had the mechanism that Huang Yueli had restored?

Having garnered so much attention from everyone, Meng Wan'er momentarily didn't know what she should do or where she should start from in order to make Huang Yueli become a laughing stock!

Just at this moment, she heard footsteps coming from her back.

Turning back to take a look, she saw Huang Yueli walking towards her.

Meng Wan'er frowned as she looked at her and asked defensively, "Why are you here? I... I haven't even started inspecting yet!"

Huang Yueli's attitude was rather good as she smiled and said, "Young Miss Meng, I saw that you seem indecisive and hadn't done anything hence I'm worried if you're inexperienced and couldn't find the weak points of the mechanism so I'm here to help you out."

Meng Wan'er gave her a stare, "No, no need! I will find a way myself, I don't need your help!"

Huang Yueli took a step back and was apparently feeling rather aggrieved, "This... but the outer region of the defensive mechanism is set up with an invisible array and for practitioners who are below eighth stage realm, they can't even see the shape of the mechanism clearly so when doing a test, it's really inconvenient!"

"What does it have to...." Meng Wan'er spoke halfway when she suddenly changed her words, "Alright then, help me to do away with the invisible array and make the mechanism appear!"

Chapter 2247: Jumped into the pit that she dug herself (4)

Meng Wan'er originally didn't want Huang Yueli to butt in but she turned her thinking around because she really couldn't see the position of where the mechanism was hidden in the snowy lands.

Later on if she were to take action and hit onto empty space, then she would become the laughing stock for everyone present!

Hence she could only compromise.

Huang Yueli nodded her head as she coordinated perfectly by making multiple hand signs before her.

Suddenly, ten over array patterns appeared over the ordinary looking vast snow land in mid-air and emitted bursts of bright lights.

After the lights diminished, the mechanism which was concealed by the array was revealed in front of everyone's eyes once again.

It was still the same as when it was refined earlier, a twenty to thirty meter tall mechanism which looked majestic and spectacular, totally out of the ordinary.

Once Meng Wan'er had locked on her target, she didn't wait for Huang Yueli to show any reaction as she immediately leapt upwards and jumped into the sky!

At the same time, her body was like an agile snake, using a strange angle as it kept wriggling and curling around softly, then suddenly her body instantly straightened up.

Borrowing this explosive power, she gave a soft cry as an extremely pure Profound Energy radiated out from her body, as she unleashed her attack towards the lofty and towering defensive mechanism!

"Whoa, incredible! Indeed Valley Master's direct disciple! Junior Sister Wan'er has already mastered her Efficacious Serpent skill till the third level already, her innate talent is indeed excellent!"

Our Ice Serpent Valley's valley subduing Efficacious Serpent skill pays particular attention to using softness to conquer strength, coupling both strength and gentleness. From Junior Sister Wan'er's move, one can tell that she had obtained Valley Master's legacy. Using only sixth stage realm's ability to come out with this strike, it's already comparable to seventh stage realm first level's practitioner!"

"Junior Sister Wan'er is indeed a female god with a combination of both beauty and ability!"

Meng Wan'er was intent on showing off her own ability in order to attract Li Moying's attention hence when she made a move, she specially used her most skilled Efficacious Serpent skill.

This kind of cultivation method, before she struck out, used the motion of curling one's body like a snake, in order to compress the Profound Energy within one's body.

Immediately following that, they would suddenly extend their bodies to spike out the Profound Energy within!

In such a way, restraining in advance before releasing later resulted in doubling the amount of Profound Energy and during the instant they made their move, their might would be extremely powerful!

If same levelled practitioners were caught off guard, they would definitely be in a disastrous situation or might even have to fight in a battle where it was beyond their current level!

Although Meng Wan'er was slightly love-struck, her innate talent was indeed not bad as powerful Ice attributed Profound Energy which carried a bitter cold wind was unleashed towards the mechanism.

A loud "Bam" was heard!

Profound Energy crashed against the defensive mechanism giving off a dull sound but the entire mechanism didn't even sway, like a lofty mountain which stood firmly and erectly at its original position.

When the surrounding people saw that, no one felt surprised at all.

After all, this was a ninth levelled defensive mechanism and if it could not even block a strike from an equivalent seventh stage realm practitioner, then wouldn't that be too roughly manufactured!

Meng Wan'er immediately realised that things weren't going too well after this one strike.

The mechanism which this wretched lass had restored indeed had rather good quality and at the very least, for a sixth stage realm practitioner like her, she wasn't able to find any flaws at all.

Thinking of this, Meng Wan'er's heart was even more anxious as she couldn't help but attack a few more times.

"Bam bam bam bam bam—!!"

Continuous full thuds were heard ringing from the snowy grounds resembling the rhythm of a beating drum.

One could tell that Meng Wan'er had already displayed her own Profound Energy to the limit.

But she was still unable to impact these mechanisms.

Chapter 2248: Jumped into the pit that she dug herself (5)

This scene was captured by everyone and they couldn't help nodding their heads.

"It's really good! Not bad at all! Young Miss Bai indeed is a natural armament refining genius!"

"Looks like these mechanisms' defensive power are really not bad! Young Miss Bai really has great skills."

"But Junior Sister Wan'er is only in the sixth stage realm so she probably can't test out any real defensive power, looks like it's time to change someone."

Meng Hongye had similar thinking in mind and after watching for a moment more, she raised her voice as she called out, “Wan’er, you can come back now! Your task is already completed. Later get your Martial Uncle to come over and continue with the testing!”

When Meng Wan’er heard that, her heart grew anxious.

If she were to return like this, then this episode which she created, not only let that little slut make a fool out of herself, instead it even reflected the other party’s armament refining ability!

She was simply picking up the rock to smash her own feet!

How was she able to endure this kind of matter?

Hence, not only did she listen to Meng Hongye’s words to stop her attacks, on the contrary, she even hastened her attack frequency as one strike after another kept raining up, down, left and right on different positions of the mechanism, as there wasn’t a fixed routine pattern of attacks!

“Bam bam bam bam bam bam bam—”

The impact of Profound Energy crashing against the mechanism sounded louder and louder, making one feel extremely frustrated.

Meng Hongye had not imagined that her own disciple was actually not following what she had instructed and thought it was because Meng Wan’er didn’t hear what she said hence she raised her volume out of no choice.

“Wan’er, it’s enough! Come back right now!”

Meng Wan’er’s actions on her hands took a pause and she secretly clenched her teeth, her heart was wrenching with thousands of unwillingness!

Just at this moment, Huang Yueli’s voice suddenly rang beside her ears, “Young Miss Meng, may I ask if you’re done testing? Are there any parts which you are dissatisfied with the mechanism which I have restored?”

“I...” Meng Wan’er turned her head back and took a look to discover that Huang Yueli had suddenly appeared behind her back.

Thinking of her exasperated look earlier which Huang Yueli had seen, Meng Wan’er was so infuriated that she gritted her teeth.

She thought about it for a moment when suddenly a light bulb lit up as she thought of a specious way of speaking.

“I still can’t verify if this mechanism of yours has a problem or not! After all, this mechanism is going to be used for long term, against beast tides and rampaging snowstorms and I’ve just attacked for merely not more than a quarter of an hour. That’s just basic that we can’t find any problem in such a short amount of time! Who can guarantee that if the attack continues for a slightly longer time, no problems will occur?”

Huang Yueli wasn't angry when she heard that as she still had the look of a good temper on her as she nodded her head.

"What Young Miss Meng said is true too!"

She paused for a moment and said, "I'm naturally grateful to Young Miss Meng for being willing to help me test the mechanism's endurance level. But you're not an Armament Master so you probably wouldn't be able to find the exact crux so it's better for me to state it clearly to you!"

She used her finger and pointed to the front as she gestured, "Look at these mechanisms. Every single part is actually uniquely refined and is an entity hence it's not easily damaged. But the various parts in between are passing through the gears hence those are secured through fusion of materials. These parts here are the weakest parts of the mechanism. However, this mechanism's structure will normally be more stable in the centre area, whereas the surroundings would be damaged more easily. So when you're doing the testing, you can attempt to attack the surrounding boundaries, and not aim at the centre position wasting your Profound Energy."

Huang Yueli carried a smile as she explained the entire mechanism's design and structure in a simple and clear manner.

When Meng Wan'er heard those words, she was stunned instead.

Chapter 2249: Jumped into the pit that she dug herself (6)

Was this wretched lass silly or what? She actually told her the mechanism's weak point to her?

This, was she worried that she didn't have a way to damage the mechanism?

Meng Wan'er frowned as she pondered over it when suddenly, her eyes lit up and was enlightened!

So it was like this, she was just thinking that no one would be so silly to dig a pit for herself!

Looked like this wretched lass's restoration of the mechanism, the thinner portion should be the centre position whereas the boundaries around the surroundings were more solid but this wretched lass had intentionally turned it around!

If she were to believe this wretched lass's words, later when she attacked the surrounding boundaries, she would probably not be able to cause any damage to the mechanism at all.

Even the so-called weaker loophole was indestructible! In this way, it would further prove that the wretched lass's mechanism quality was outstanding!

When Meng Wan'er thought of this, she suddenly felt rather fortunate.

Luckily her thoughts raced fast enough and was able to react in time to foil this wretched lass's schemes. Otherwise wouldn't she really be tricked by her?

Meng Wan'er's lips curled into a cold smile as she turned towards Huang Yueli, "Alright, I know already. Thank you Young Miss Bai for your pointers."

As though he didn't see the ridicule in her eyes, Huang Yueli gave a breezing smile, "It's good that you understand. If you still want to continue testing, please go ahead."

Meng Wan'er nodded her head as she took a step forward and leapt up into the skies once again!

She exhibited the Efficacious Serpent skill third stage once again as powerful Profound Energy was unleashed, striking towards the mechanism!

This time round, she practically used one hundred percent of her power hence this gust of Profound Energy was much stronger by an entire fold than her previous attacks!

This imposing stance was rampaging as she gained the upper hand by a show of strength!

It immediately attracted bursts of shrills from everyone present.

Meng Wan'er exhausted her energy but the target of attack was not towards the weakest part of the four surroundings' boundaries but rather— right smack in the centre part of the mechanism!

Everyone's eyes widened when they saw this.

Whereas Huang Yueli couldn't help but screamed out, "No—! Young Miss Meng, I've already told you earlier not to attack the centre position?"

Meng Wan'er's body was still suspended in mid-air and hadn't landed onto the ground when she heard Huang Yueli's shocked screaming and she felt even more delighted in her heart.

Haha, this wretched lass, she finally showed her fox tail eh?

So terrified, wasn't she trying her best to conceal the weak part, but had been seen through by a single action of hers?

Following this, she would then see how this wretched lass made a fool out of herself!

Just as Meng Wan'er's lips contained a smile while believing that success was within her grasp, suddenly the spectators there started screaming volts of screeches.

Meng Hongye's expression changed abruptly, "Wan'er, be careful, quickly evade!"

Meng Wan'er was still indulged in delightful feelings and totally couldn't react in time as she looked towards Meng Hongye in a daze.

The next moment, she suddenly sensed a wave of tremendous energy attacking from her back, as it hit her right smack against her lower waist!

This burst of Profound Energy surged up violently in an extremely powerful stance with shocking swift speed!

Meng Wan'er totally could not evade in time as she crashed heavily into mid-air!

In an instance, she felt that her entire body's meridians and bones seemed to have been crushed completely, as an intense pain flushed right into every single meridian.

Meng Wan'er threw up blood in mid-air as she crashed heavily onto the snowy ground.

Meng Hongye's gaze flashed as she pounced towards her own disciple in an attempt to save her.

However, she was still too late.

Meng Wan'er directly descended onto a solid piece of ice block.

Chapter 2250: Jumped into the pit that she dug herself (7)

A resounding "Bang" reverberated.

After that was a crackling series of bones shattering sound.

Just from this miserable sound alone, it made everyone's hearts chill.

Meng Hongye immediately ran over as she checked on Meng Wan'er's injury and on this one look, it made her extremely anxious.

"Heavens! Wan'er, Wan'er, quickly wake up!"

Everyone in Ice Serpent Valley crowded over and all of their expressions sank.

"The injury on Junior Sister Wan'er is simply too serious, more than half of the bones in her body have shattered!"

"Heavens, how did it turn out like this? Such a serious injury, even if her bones could be joined back in future, it would also affect her future cultivation!"

"What exactly happened earlier? I didn't have any chance to react at all! Wasn't Junior Sister Wan'er testing that mechanism? Why did it suddenly..."

Everyone was trying to recall the scenario earlier as their hearts were filled with puzzlement.

Just at this moment, Huang Yueli who had a terrified expression on her face squeezed into the crowd.

"Young Miss Meng, Young Miss Meng, you... what's the matter with you? Heavens, why did it become like this???"

Huang Yueli exaggeratedly covered her mouth as her eyes opened up wide, "blankly" staring at Meng Wan'er who was lying limply on the ground, as though she didn't dare to believe that Meng Wan would fall so miserably.

Earlier when Meng Wan'er fell onto the ground, there were some people who suspected that it was Huang Yueli who resorted to some trickery earlier but on seeing her performance right now, most of them all started to get puzzled.

Seeing Huang Yueli's pure and innocent small face, they simply couldn't tell that she was such a black-bellied person.

"Young Miss Bai, this... what exactly is going on? Why was Wan'er sent flying when she was testing the array, and even suffered such a heavy injury?" Meng Hongye's brows creased as she suppressed the anger in her and started interrogating.

Huang Yueli put on a blank expression, "This... this should be because... because she was rebounded by the mechanism that I've restored?"

"Rebounded?" Everyone was puzzled, "Isn't this a defensive mechanism? Why would it rebound? Defensive mechanism shouldn't have any attack characteristics ah?"

Hearing these questions, Huang Yueli gave a slight cough as she explained with a prim and proper expression, "This is something that everyone doesn't know about. Actually that year when Palace Lord Huang set up the defensive array, it was only of elementary standard and later on she researched extensively into this and discovered that if she added some materials into the defensive mechanism, it will have a certain percentage of rebounding the attacks from the outside world!"

"What? This can be done in such a way??"

"A defensive mechanism with rebound function... heavens, just how incredible is that?"

"Young Miss Bai, is what you're saying true?"

The crowd's face was astonished as they crowded around Huang Yueli and started questioning.

Huang Yueli nodded her head and said, "That's right, after increasing the rebound attack effect, the entire defensive mechanism would materialise both attack and defence together and become even more powerful and indestructible! Palace Lord Huang had recorded this new structure blueprint into the notebook and I've also researched thoroughly on it. This time, as the quality of Valley Master Meng's materials are very good, so I was thinking that I can also remodel the mechanism as well so in future if you meet with danger, it will prevent troubles before it happens."

Huang Yueli's words instantly gained a round of praises from everyone in Ice Serpent Valley.

"Young Miss Bai, you're simply incredible! You actually are able to understand the blueprint model which Palace Lord Huang had remodelled!"

"That's right, moreover you actually thought on our behalf, to actually help us remodel and upgrade the mechanism!"
