

## Weaponsmith 2921

### Chapter 2921: Integrated Into One (1)

Huang Yueli ignored the surroundings and revealed a satisfied smile.

“Indeed the largest inn in Sacred Phoenix Continent. The superior room’s environment is indeed much better than the other inns! Moreover, the most important thing is that this room is spacious enough. It’s enough for me to go into closed door cultivation and refine Spirit Armaments...”

While she thought, she retrieved a variety of materials and magical beast cores which she had prepared earlier.

First, she used some simple methods to set an invisibility array around the walls.

This array was something that she decoded with her father when she sneaked into Snow Phoenix Palace previously. It should be an array that was exclusive in God Realm.

Although she didn’t know what level was it in God Realm, Snow Phoenix Palace was, after all, one of the bases left behind by the ancient God clans in the Lower Realm. So the arrays inside should not be some cheap stuff.

Huang Yueli set up the array based on her memories.

Then she took out the spirit armament furnace which she bought from the Sky Gem Glass Chamber earlier.

Taking a look at this black and heavy furnace, Huang Yueli frowned slightly. “Isn’t this furnace a little too coarsely manufactured? The array patterns engraved on the exterior are so crudely done. I wonder if it is actually of any use? Moreover, the left and the right sides aren’t even at all! How do they even have the cheek to say that this is a standard spirit armament furnace? It’s even worse than the Amethyst Gold Gem Cauldron that I brought from the Lower Realm!”

Actually, spirit armament furnaces were all handmade, so it was normal to have some slight unevenness.

But Huang Yueli was used to using fine quality goods. So towards these kinds of coarsely made products, she simply could not stand it at all.

The Amethyst Gold Gem Cauldron was the furnace that she used in Soaring Heavens Continent. It was something that she and Li Moying found together. Back then, the Amethyst Light Sword was sealed within and the sword spirit acknowledged Li Moying as its Master. As for the Amethyst Gold Gem Cauldron, it was taken by Huang Yueli.

The Amethyst Gold Gem Cauldron was one of Soaring Heavens Continent’s finest armament furnaces. Each complicated array pattern on the exterior helped greatly in refining.

Moreover, the amethyst gold rays that spread out on the furnace’s entire body had different patterns. All of those were exquisite.

Alas, the Amethyst Gold Gem Cauldron was manufactured using Lower Realm's materials. So when she brought it to God Realm, Huang Yueli felt that it was not solid enough to refine even higher grade Spirit Armaments.

The Sky Gem Glass Chamber's most inferior spirit armament furnace didn't have much functionality. But at least it was manufactured using God Realm's metal materials. It was able to take on the impact of the deviant flame and a large amount of Profound Energy!

"I must refine the weapons properly. After I earn enough money, I will change this ugly-looking thing!"

Huang Yueli grumbled softly and took out the books which she had purchased in the afternoon. Then she swiftly read through it.

Her speed of reading was so fast that describing it as reading ten sentences at one time wasn't even apt.

As she read, she mumbled to herself, "...oh, so it's like this... no wonder I couldn't find a solution... in this way, these fine details can be done in this way..."

Huang Yueli propped up her little cheeks and flipped through the books. It only took her less than four hours to finish reading that thick pile of books.

Raising her arms above her head, she stretched her arms.

"God Realm's Spirit Armament refining skills are indeed much deeper than ours in Soaring Heavens Continent.. No wonder the Spirit Armaments' power is much stronger than ordinary Profound Weapons! But if we were to use such complicated and profound skills to refine weapons, the requirement for the Armament Master's innate talent and endurance is much higher by several times! There aren't many with such innate talent in the Lower Realm. That's why only God Realm can nurture so many Spiritual Armament Masters!"

## **Chapter 2922: Integrated Into One (2)**

Combining all the comprehension that Huang Yueli had in the past with the contents that she read from the manual today, she roughly had a conclusion.

In Soaring Heavens Continent, the main element that determined the grade of the Profound Armament was based on the materials that were used to refine the Profound Armament.

An Armament Master's innate talent might be important, but the fire and metal attributed to Profound Energies were mainly used to smelt materials, control the flame's temperature and also help the Profound Armament to form its shape.

But refining Spirit Armaments was another thing.

The thing that decided the Spirit Armament's grade was not the materials, but the Spiritual Armament Master's innate talent, ability, and the control of one's Profound Energy.

Spirit Armament materials were just a retainer that was used to contain the Spiritual Armament Master's Profound Energy.

Using the Spiritual Armament Master's Profound Energy to construct into an energy field was the real reason why a Spirit Armament wielded so much power.

The energy field was being sealed by the Spiritual Armament Master with special materials and when it was stimulated by a practitioner's Profound Energy, it would release an astonishing amount of energy!

So, the method of refining a Spirit Armament and Profound Armament was totally different, and the might of the Spirit Armament was much stronger.

Of course, this didn't mean that the Spirit Armament's materials weren't important.

The stability of the energy field, the degree of difficulty to activate the energy field, and the ultimate power of the energy field were closely related to the superiority and inferiority of the Spirit Armament materials.

Even for a high ranking Sky Gem Grandmaster, if he didn't have suitable materials, it would be impossible to satisfactorily refine Spirit or Treasure Armaments.

Huang Yueli already had this guess in mind before she went to the Sky Gem Glass Chamber.

After she read the books that she purchased, her guess was more or less verified.

This kind of exclusive refining method for Spirit Armaments was doomed to be a tragedy for ordinary Lower Realm ascenders because all the refining methods that they had learned in the past could not be used at all!

But, to Huang Yueli, this was a good thing.

As one of the two God Realm's god grade geniuses, whose innate talent could be higher than hers? Her control towards Profound Energy was something that she was born with. No matter how ordinary people try to waste their energy working hard, it was impossible for them to reach her standard!

"Now that I've already understood the principle, next, I'm going to give it a try..."

Huang Yueli took out an illustrated book and flipped it open. Then she left it beside the spirit armament furnace.

"Ooh, this Disheartened Dagger's structure should be the simplest. I will start to refine from this!"

She raised her hand and struck out a hand gesture. Then a flame flew out from her palm and landed on the fire entrance underneath the spirit armament furnace.

The flame shrank a little and following that, it started to burn steadily.

The spirit armament furnace was lit almost instantly. The surroundings were enveloped by a ray of light and those roughly engraved array patterns on the furnace's exterior were instantly lit up.

Huang Yueli's expression was solemn as her eyes were focused. The hand gestures that she saw on the book earlier surfaced in her mind. One after another, she swiftly struck out those hand gestures.

The spirit armament furnace's temperature soared.

When refining Spirit Armaments, the impact of the flame would be even bigger than refining Profound Armaments. But luckily, Huang Yueli used the True Phoenix Fire which was a top rate powerful flame in God Realm. So it was most suitable for use in refining armaments.

Huang Yueli followed the instructions and smoothly pre-heated up the spirit armament furnace.

“It seems rather easy...” This thought flashed past Huang Yueli’s mind.

She didn’t know that to Spiritual Armament apprentices with ordinary innate talents, completing this step required them to practice at least more than a thousand times!

### **Chapter 2923: Integrated Into One (3)**

It was impossible for them to succeed on their first try, just like her!

Huang Yueli heaved a silent sigh of relief but she didn’t dare to slack off. Her concentration was still maintained in a taut state.

She threw the materials that were piled next to her into the spirit armament furnace in sequence.

The process of smelting materials was the same as Soaring Heavens Continent’s method, so it was a piece of cake for Huang Yueli.

Not too long after, all the materials had been fused.

Her expression abruptly turned grave as she stared at the melted materials in the spirit armament furnace without blinking.

“The next step is the most difficult part. This is also the biggest difference between refining Profound Armaments...”

After the spirit armament materials had been fused, she had to slowly decrease the furnace’s flame. During this process of decreasing the temperature, the materials in the furnace would slowly set into shape.

Huang Yueli had to draw out the energy field structure using her Profound Energy within the shortest amount of time she had, and encase the energy field into the materials. Moreover, to display the full force of the energy field, the materials must be molded into a certain shape.

That meant to say that Huang Yueli had to split up her concentration, work on the structure of the energy field while ensuring the exterior shape of the materials, and fuse the two perfectly...

This complicated process, to a Spiritual Armament Master’s Profound Energy, endurance, and soul trace, was a huge test.

As long as she was slightly careless, it would fail...

Huang Yueli perked her concentration and carefully controlled the release of her Profound Energy.

The energy field was slowly drafted out. At the same time, the materials that were in the cooling process were being pulled into a curvy arc by her.

She was at her last step, to encase the energy field into the dagger’s interior...

“BOOM—!!”

A loud explosion rang beside Huang Yueli’s ears!

The spirit armament furnace’s flame exploded and a fiery flame shot right through the roof!

“Oh no!” Huang Yeuli’s expression changed and she hurriedly retracted the True Phoenix Fire.

Luckily her reaction was swift and she had struck out timely. Although the roof of the guest room was scorched by the raging fire, it didn’t burn through it and hence, it didn’t lead to a fire.

But...

Huang Yueli shifted her glance towards the half-molded long sword in the spirit armament furnace. She gloomily discovered that the Spirit Armament that she was still refining had already turned into a bundle of ash.

This time’s refinement ended in failure!

She sat down on the chair and lifted her hand to wipe off the sweat on her forehead.

It was impossible to say that she wasn’t feeling frustrated after failing the refinement of a Spirit Armament.

She had already deduced the process several times in her mind before she started refining, and after she was certain that every single detail had no problem, then she started the process. Moreover, her Profound Energy and soul trace were extremely strong. Every single hand gesture that she struck out was extremely accurate, and the plan was executed well.

According to this trend, she should have successfully refined the Disheartened Dagger...

But now, she failed. It meant that there was a problem with her deduction! This had turned her plans around!

“What’s going on? Why did this happen? What on earth had gone wrong?” Huang Yueli frowned, and her mind swiftly raced past all the possibilities.

In the process of refining Spirit Armaments, the energy field that she drew shouldn’t be a problem. The most difficult points that the manuals had indicated to take special note of, were easily overcome by her powerful control.

Molding the materials into shape was a simple matter. Anyone with slight metal attributed innate talent would be able to do it well..

#### **Chapter 2924: Integrated Into One (4)**

So, the biggest problem should still be related to the encasement of the energy field into the Spirit Armament materials...

Huang Yueli flipped through the books and tapped her hand on the table as she was engrossed in her thoughts, trying hard to find out the crux of the problem.

After a while, she muttered to herself, “Could it be that during the fusing process, the sequence of the amount of Profound Energy that I added wasn’t correct? Indeed, before the explosion happened, I had already sensed the repulsion of the energy field from the Spirit Armament. But because I don’t have any experience and assumed that it was normal... Looks like I need to decrease my speed and use my soul trace to check on the Spirit Armament’s situation first before injecting my Profound Energy based on the situation...”

Huang Yueli pondered over this for a moment more and finally decided that she had to act according to the situation. Too many situations could happen during the refinement of Spirit Armaments. No matter how much sufficient preparation she had made, it would be difficult for her to handle it.

Having thought through this, Huang Yueli perked herself up again. “It’s indeed not simple to refine Spirit Armaments! Luckily I bought two sets of materials each so I still have another chance to try. This time, I cannot make the same mistake again!”

Huang Yueli walked to the furnace and checked on it. This furnace might look run-down, but the quality was not that bad after all. At least it was solid enough.

That small explosion did not make the furnace explode. In fact, there wasn’t even any scratch on the furnace at all.

Huang Yueli wiped the spirit armament slightly and lit up the fire again.

The smelting process was much faster than before and it only took less than an hour before she entered the drawing of the energy field.

This time, Huang Yueli didn’t dare to slack off. She adjusted all the Profound Energy in her body, and her concentration was also fully unleashed. She tried all her means to feel the Spirit Armament’s refining process, as well as all the series of changes.

Following the Spirit Armament materials giving off a sizzling sound, Huang Yueli’s senses seemed to have entered another world.

In this subjective world, the Profound Energy in the energy field seemed to have turned into rays of glaring light that floated past her eyes. She didn’t need to put in much effort to see it clearly.

Huang Yueli subconsciously controlled the energy field and slowly fused it with the materials.

Every thread and every ounce were encased perfectly without a single flaw...

The Spirit Armament slowly set into shape, and Huang Yueli started to relax.

It seemed that she had found the correct direction this time around!

Huang Yueli hadn’t seen any other Spiritual Masters refine Spirit Armaments, so she didn’t realize that something was wrong with the refining method that she had come out with.

It was her first time refining Spirit Armaments, so the reason for her failure was not because there was something wrong with her plan. But the reason was that God Realm’s Spiritual Armament Master’s energy field fusion method could not be written down on the books. Instead, it was all passed down verbally from the Master to disciple.

Huang Yueli didn't have a Master, and no one told her the method, so it was reasonable for her to fail.

If it was anyone else, that person would definitely have thought of a way to find a Master.

But Huang Yueli didn't think of this at all. She insisted on using her heaven-defying innate talent and power of comprehension to think of a solution.

But her method was different from the standard method used in God Realm.

Moreover, as she refined one after another piece of Spirit Armament, her method was slowly formed, and the disparity between it and the standard method was becoming further and further...

### **Chapter 2925: One Month Later (1)**

One month later.

An intense battle was happening on the barren lands in between the Soul Connection Ocean and Serene Rain Town.

A huge Fissure Plume Blonde Condor swooped down from the sky fiercely. Its power wings flapped, and bursts of powerful wind attack waves caused the trees in the surroundings to be uprooted!

"Young Master Moying, be careful!!!" Li Tian Yi and Li Tian Er cried out in horror.

The Fissure Plume Blonde Condor was a high tiered spirit beast. Moreover, it had metal and wind dual attributes so its speed was extremely fast with a high level of attack power. In God Realm, even practitioners in Heart Profound Realm end-phase were not willing to provoke it, what more for their group. The one with the highest cultivation among them was Li Moying, who was in Heart Profound Realm early-phase.

The guards were several hundred meters away from the Blonde Condor and they were made to retreat by its power, being thrown back by the wind.

Facing the Fissure Plume Blonde Condor, it was imaginable to think how much pressure Li Moying was under right now!

Li Tian Yi and the others turned cold from shock. They wanted to dash forward to save him, but none of them could resist the wind and couldn't move at all.

They could only watch the Fissure Plume Blonde Condor give a loud shrill and swooped down towards Li Moying's head.

"Young Master Moying!!!"

Li Tian Yi and Li Tian Er cried out in alarm as they shut their eyes, not daring to see what was about to happen.

They were under the Clan Leader's orders to risk everything they had to protect the only god grade genius in their clan. Even if all of them had to die, they could not allow Li Moying to lose his life here!

If something were to happen to him here, they... they would not be able to pay the consequences, even if they had to die ten thousand times!

After a round of horrifying explosive shouts, the Fissure Plume Blonde Condor's roar became even sharper like a sharp blade that passed through everyone's ears. In an instant, everyone lost their hearing.

The guards' complexion turned pale and they covered their ears. But all they could hear were buzzing sounds. They felt light-headed and dizzy, trying their best to stop themselves from throwing up.

After some time later, they finally recovered a bit of consciousness.

Li Tian Yi opened his eyes and looked at the center of the storm. He only took a look and cried out in astonishment, "Young Master Moying, this... this is..."

Li Tian Er also looked in the direction of his gaze.

On one look, he found that the mighty Fissure Plume Blonde Condor had already sprawled on the ground. Its eye-catching wings drooped by its side and the surface on the ground was covered in red. Blood kept spilling out from the side.

From the looks of this, it seemed that it had already died from its serious injury.

The body resembled a small hill. Even if it laid limp on the ground, it was still four to five meters tall.

But the Fissure Plume Blonde Condor's head was facing upwards. Its eyes widened like full moons, as though it couldn't believe that it was so easily defeated by a god clan practitioner with such weak cultivation!

"Heavens! The Fissure Plume Blonde Condor is dead! It actually died in this way!"

"Could it be that Young Master Moying had killed it? But... but how is this possible? The last time I came out on experience learning with Elder Qing and met with a Fissure Plume Blonde Condor. But we spent a great deal of effort to kill it!"

"But other than Young Master Moying, who else is here??"

"This is simply a miracle... Young Master is too strong..."

Li Tian Yi and Li Tian Er looked at the Fissure Plume Blonde Condor's corpse in astonishment, and their hearts were filled with worship for Li Moying.

As for Li Moying, he stood next to the condor with a placid and calm look on his face.

Chapter 2926: One Month Later (2)

As though the person who killed a high tiered spirit beast wasn't him at all.

Hearing the guards gasping in surprise, he swept a glance at the Blonde Condor's dead body and instructed, "Settle the corpse!"

"Yes, Young Master!"

Actually, Li Tian Yi and the others had already started to work on it before he instructed.

Every single part of the high tiered Spirit Beast like the Fissure Plume Blonde Condor was precious. A piece of tail feather or a bottle of blood was all high tiered materials that were hard to come by. It could be used for refining armaments or medicinal pills.

The guards started to work on it while Li Moying lowered his head. Looking at the weapon in his hand, he frowned slightly.

The long sword in his hand had already broken into two when he fought against the Fissure Plume Blonde Condor earlier!

As the only god grade genius in the clan, Cloudy Qilin clan wasn't stingy to him at all. The long sword in his hand was a genuine mid grade Treasure Armament.

This was something that the Elders were allowed to use in ancient god clans. It was difficult for ordinary forces' Dao Profound Realm practitioners to get one, not to mention Heart Profound Realm practitioners. As for the other people, even if they sold everything they had, they wouldn't be able to afford a single piece of standard grade Treasure Armament at all.

Luckily, he had this invincible weapon with him today, which enabled him to kill the Fissure Plume Blonde Condor successfully.

Seeing Li Moying go into a trance, Li Tian Yi thought that he was feeling the heartache to damage the Treasure Armament So he quickly advised, "Young Master Moying, it's just a mid grade Treasure Armament. It might be valuable but to a large clan like us, the Cloudy Qilin clan, it's not worth mentioning at all! Instead, you are Cloudy Qilin clan's greatest fortune. Damaging one Treasure Armament is nothing, as long as it can save your life. Even if it takes one hundred or one thousand pieces, it's all worth it!"

What Li Tian Yi said was not exaggerated at all.

Li Moying represented Cloudy Qilin clan's fortune for the next few thousand years. If he was hurt, even slightly, it would make the entire clan uptight.

However, Li Moying's frown didn't ease when he heard this.

He remained silent for a moment and suddenly sighed. "I didn't expect this. Although God Realm's Treasure Armament power is very big, it was damaged so quickly. Back then when I was in the Lower Realm, I used my long sword for several decades and nothing happened to it at all..."

Li Moying wasn't feeling the heartache for some mid grade Treasure Armament. But when he saw the broken sword in his hands, he suddenly recalled the past. The Profound Weapon that Huang Yueli refined for him.

In his past life, he had always used the ninth tiered Profound Weapon that was refined by Huang Yueli. But it broke during the process of his split soul.

In this lifetime, Huang Yueli gifted him with the Amethyst Light Sword and it had also broken into half during the heavenly tribulation.

It seemed like a prediction, as though each time the weapons she gave him broke, it would mean that they would be separated...

In the past, when they split up, he would keep the weapon that she gave him by his side. It seemed as though his Li'er was still accompanying him and fighting alongside him.

But now, what he could use was the weapon that the clan had assigned to him.

So what if the power was strong or the weapon grade was high?

Only his Li'er understood him the best. She knew what weapon was most suitable for him, and how it would be able to display his full power to the max!

Li Tian Yi didn't know what Li Moying was thinking about. Seeing him go into a trance, he could only come out with some gibberish advice.

"Young Master, if you feel that the clan's weapons aren't suitable, you can ask the clan's Sky Gem Grandmasters to refine one for you. The Fissure Plume Blonde Condor's tail feather and spine are very important Treasure Armament materials. It's just nice, we can bring this back!"

### **Chapter 2927: One Month Later (3)**

Speaking of this, no matter which Sky Gem Grandmaster it was, they had respectable and esteemed statuses. Moreover, all of them were haughty so it was more than climbing to heaven to ask them to refine a Treasure Armament.

Even if it was the Elders from the Cloudy Qjlin clan, they might not do it. It would depend on how close they were.

But if it was Li Moying, not only would the Sky Gem Grandmasters not reject, they would fight to refine for him instead.

After all, a god grade genius could possibly become a Life Profound Realm peerless exponent.

By then, the Sky Gem Grandmaster who refined the 'Treasure Armament for him would be able to boast about it!

It was the utmost glory to a Dao Profound Realm top exponent to use the Treasure Armament that a Sky Gem Grandmaster had refined!

When Li Moying heard that, he shook his head slightly and didn't say anything at all.

No matter which Sky Gem Grandmaster it was, that person couldn't be

compared with his Li'er. But where did she go to?

At this moment, Li Tian Er, who was injured during the battle with the Fissure Plume Blonde Condor earlier, had already treated his wounds and walked over again.

"Young Master, you you're not injured, are you?" Li Tian Er asked.

Li Moying shook his head.

The two guards exchange a glance and Li Tian Yi stepped forward. He asked cautiously, "Then. Young Master, what should we do next? Should we continue heading into the barren lands? There are very few people here and no one knows what we will meet with if we venture further. But we've already met with the Fissure Plume Blonde Condor here. If we go in further, we might meet with stronger Spirit Beasts..

Li Tian Yi stopped speaking at this point.

But his meaning was already very clear.

After all, Li Moying was still in Heart Profound Realm. Although he killed the Fissure Plume Blonde Condor, he had to pay a price for it. Even his mid grade Treasure Armament was destroyed.

If they were to meet with even more powerful Spirit Beasts, the result would be dire.

Hearing this, Li Moying's gaze congealed slightly and he turned silent. After a while, he finally opened his mouth, "The deadline of two months is almost up. We'll set off to Sacred Phoenix Continent tomorrow and meet up with the others!

Li Tian Yi and Li Tian Er heaved a sigh of relief. "Yes, Young Master!"

They were extremely worried that Li Moying would insist on doing it his way, to continue searching for her in the barren lands.

If he really died or suffered a serious injury there, they wouldn't be able to answer for it.

But unfortunately, Li Moying's character was overbearing. If he decided on

something, no one could change his mind!

Now, he had finally decided to go back.

Li Moying swept a faint glance at them and knew what they were thinking of.

But he didn't bother to explain.

He was willing to give up searching and head to Sacred Phoenix Continent because he had roughly confirmed that Huang Yueli didn't go into the barren lands.

Otherwise, just based on their meticulous search, they would be able to find some clues of her appearance. However, there was nothing at all.

Adding on the fact that his little fox had always been cautious. As long as she found the barren land to be extremely dangerous, she would realize that she had gone in the wrong direction and wouldn't possibly continue to venture in. In this way, there was only one possibility.

His Li'er did not take this barren lands path at all. Instead, she had entered Serene Rain Town.

But no matter what the reason was, as long as Huang Yueli did not die in the barren lands, then she would definitely appear in the Sacred Phoenix Continent.

#### **Chapter 2928: One Month Later (4)**

Sacred Phoenix Continent, Flame Square City.

In Double Prosperity's superior room, Huang Yueli's eyes were tightly shut as she was fully focused on refining Spirit Armaments.

The current her looked rather disheveled. Her clothes were crumpled and her face was smeared with dust and ash.

Ever since she started to research on the refining method for Spirit Armaments in the superior room, she didn't step out nor take a shower.

In reality, her thoughts were totally on armament refining and she had no time to bother about the other matters.

A loud "boom" was heard, followed by a fiery tongue sticking out of the spirit

armament furnace. The bright light shone and gradually extinguished.

“It’s done, it’s done! This Moon Frost Hook Sword is finally refined successfully! This is one of the most complicated kinds that I’ve refined among the low grade Spirit Armaments. Luckily I have enough patience..”

Huang Yueli looked at that unique and sharp weapon in the furnace as her heart leaped with joy.

During this closed door cultivation, she had successfully refined several low grade Spirit Armaments, which were extremely popular weapons in God Realm.

Among them, the most simple few kinds were equivalent to testing her endurance and control towards Profound Energy. Initially, she hadn’t grasped the knack and failed during the first time, succeeding only on the second time. Towards this, Huang Yueli felt a little frustrated over this.

“Refining Spirit Armaments is much more difficult than what I had imagined! Luckily I bought two sets of ingredients in advance. Otherwise, it would be a waste of my effort if I didn’t manage to refine anything at all!”

Huang Yueli was grumbling silently in her mind. But she didn’t expect that her success rate already was very shocking!

If the news of this leaked out, she would be worshipped by all the Spiritual Armament Masters.

At this point, all the Spirit Armament materials that Huang Yueli bought from the Sky Gem Glass Chamber were all used up.

She had nothing else to do, so she could only extinguish the True Phoenix Fire in the spirit armament furnace. Stretching herself, she stood up.

“I haven’t been outdoors for such a long time. I feel that I’m about to turn moldy. I think it’s time to go out for a walk”

She took a bath and redid her disguise, then walked out of the room.

When she came downstairs, she was stopped by the innkeeper.

This guest, you’ve stayed at our inn for an entire time. Are you intending to

continue staying here? Or will you be checking out? Our shop is currently having some financial difficulties so we'd like to ask you to settle the bill for this month's stay.."

Huang Yueli's smile instantly disappeared when she heard that.

What? What did you say? One month had passed! Time passed this quickly!

Huang Yueli's eyes widened.

The innkeeper nodded and said, "Isn't that so?"

Huang Yueli jumped up. "Oh no, one month has already passed! Luckily I came out of my closed door cultivation on time, otherwise, I'd miss Grandmaster Xiao's lecture!"

She saw the sky was still bright and discovered that it was still morning. So she immediately started to run out and sped towards the Sky Gem Glass Chamber.

"Wait, guest, the payment for your room

The innkeeper wanted to stop her but her cultivation was much higher than his, so she disappeared without a trace within a few seconds. Only the innkeeper was left standing there with a terrible look on his face.

What's going on with this person? When he came, he wasn't even willing to pay the deposit. I gave him some leeway on account that he is a Spirit Armament apprentice. But he stayed for an entire month and didn't even step out at all. Now he's even run away! Surely he's not here to con me, right?

### **Chapter 2929: Free Show (1)**

Huang Yueli ran very quickly and arrived at the Sky' Gem Glass Chamber shortly after.

Today, there were a lot of people in the reception hall. Practically everyone had pinned the Spiritual Armament Masters badge on their chests.

The beautiful Spiritual Armament Master that she met one month ago was also in the crowd. She wore an elaborate long robe and her make-up was delicate.

She gave off a haughty aura and one could tell that she had an extraordinary

background.

Many Spiritual Armament Masters crowded, wanting to strike up a conversation with her. But she kept showing that cold look on her face, totally ignoring everyone.

There were so many Spiritual Armament Masters around so an apprentice like Huang Yueli was very insignificant. No one even noticed her at all.

She was happy with the peace and walked in by herself.

But she looked around everywhere and didn't see the legendary Grandmaster Xiao, "he was supposed to give the lecture today.

She was just about to ask someone when she suddenly heard a rather familiar voice from behind. "There're so many attendees here today! It's almost time for the lecture so we have to grab hold of time quickly. Grandmaster Bai is having a chat with Grandmaster Xiao, so theyd be coming out very soon!"

Huang Yueli recognized the voice. Wasn't that person the same Spiritual Armament Master who admitted her the last time?

She turned her head around and indeed saw that young Spiritual Armament Master talking to someone.

She turned her head back and coincidentally met with that person, recognized her at one glance.

"You.. aren't you that person from that time... what's your name again? Right, you're called Li Yuehuang right? Your name is really strange!" His impression of Huang Yueli was very deep because this Lower Realm ascender was just too strange. He had never seen anyone with so much self-confidence before.

Alas, no matter how confident she was, a Spirit Armament wasn't that easy to be refined!

The admission officer said, "Why? It's just been a month and you've come to the Sky Gem Glass Chamber again? Have you finished using those materials that you purchased the other time?"

Huang Yueli nodded. "I've indeed finished using it all..."

“I knew it!” Hearing her say those words, the admission officer slapped his thigh and interrupted her. “Do you know how difficult it is to refine Spirit Armaments now? I’m sure you know how difficult it is to finish reading those manuals now! Young man, it’s better not to be too ambitious! Just treat the money that you spent on purchasing those materials as throwing it into the drain and learn a lesson from it! You’d better take part in the apprentice assessments and not daydream!”

Huang Yueli was speechless, and she wanted to explain for herself.

Other than coming to attend Grandmaster Xiao’s lecture today, she also wanted to submit her Spirit Armament and apply to become an official Spiritual Armament Master.

But before she could say a word, that Spiritual Armament Master jumped up.

“Ah, Grandmaster Xiao and Grandmaster Bai are out!!! ‘me lecture’s about to start! I have to hurry over. You can go into the Books Depository to take a look on your own. I don’t have time to entertain you today!”

Huang Yueli lifted her head and saw two elderly men slowly walking along the rear courtyard’s corridor from a distance away.

One of them was Grandmaster Bai, whom she had met previously. The other looked rather scholarly. From the looks of this, he should be the legendary top rated Sky Gem Grandmaster, Grandmaster Xiao.

The admission officer immediately rushed over.

Seeing him leave, Huang Yueli called out to him hurriedly. “Wait, this senior, I’m also here to attend Grandmaster Xiao’s lecture. I don’t know where the lecture hall is, bring me along!”

The admission officer’s footsteps took a halt, and he frowned.. “What did you say? You are here to attend the lecture too? You’re not even a Spiritual Armament Master, so can you even understand the lecture?”

**Chapter 2930: Free Show (2)**

Huang Yueli knew that he didn't believe in her ability so she didn't bother to spend too much effort to explain. She only said, "Grandmaster Xiao is so famous. I'm sure I will be able to learn a lot of things from listening to his lecture."

The admission officer cast a glance at her as his eyes reflected unconcealable contempt.

"I say, can you know where you stand? Those who can attend Grandmaster

Xiao's lecture are all genuine Spiritual Armament Masters bearing the Sky Gem Glass Chambers badges! The contents in Grandmaster Xiao's lecture are extremely profound and you apprentices will not be able to understand it. Moreover speaking, there are so many apprentices in the entire Flame Square

City. If everyone were to attend it, there wouldn't be enough seats at all. Flame Square City's branch President had already passed down the instructions that only Spiritual Armament Masters will be able to enter the venue. You can stop dreaming about this and go back earlier!"

The admission office bore a haughty look on his face. But he wasn't picking on

Huang Yueli. It was a kind of arrogance that came naturally from a Spiritual Armament Master!

A Spiritual Armament apprentice required a very high innate talent and there might only be one or two in every ten thousand people. Because when ordinary practitioners saw Spiritual Armament apprentices, they felt that these people were extremely incredible.

But it was an extremely difficult task to be promoted to a genuine Spiritual Armament Master from an apprentice.

In every one hundred apprentices, there would only be four or five people who could obtain the Spiritual Armament Master's badge, which was even less than

10% of the passing rate.

Hence, to a Spiritual Armament Master, they wouldn't bother about an entry-level apprentice at all.

Huang Yueli knew this clearly so she wasn't very upset over this.

She thought for a moment and opened her mouth to ask, "Then now, if I were to...." take part in the Spiritual Armament Master's assessment, would that be

alright?

However, before she could finish her sentence, she heard a familiar voice coming from afar. "Eh? Aren't you that day's... you're called Li Yuehuang, am I right?"

Huang Yueli and the Spiritual Armament Master beside her turned around in astonishment and saw Grandmaster Bai walking towards them.

She had a favorable impression of Grandmaster Bai and when she saw that he recognized her, she immediately cupped her fists and bowed, "Grandmaster Bai."

When he saw her, he nodded his head satisfactorily. But instantly thought of something and frowned. Then he asked in a displeased voice, "Why? Why have you come to the Sky Gem Glass Chamber again? Didn't you say that you won't be staying long in Flame Square City that day?"

"Ughh, this..."

Huang Yueli was stunned and immediately recalled that she had once used this excuse to reject Grandmaster Bai's request to take her as his disciple.

Her eyeballs rolled and she said, "Grandmaster Bai, originally I was about to leave. But I heard that Grandmaster Xiao is going to conduct a lecture here today. So I intentionally stayed behind to attend this lecture. But it seems that I've made a wasted trip. I didn't expect an apprentice like me to not have the right to attend the lecture..."

Grandmaster Bai's brows rose when he heard that.

To tell the truth, he lamented silently for a long time after Huang Yueli left that day!

An armament refining genius with such outstanding innate talent and power of comprehension was so hard to come across! Alas, she wasn't willing to stay in Flame Square City to learn armament refining skills!

Now that he met her once again, it was simply a joyful surprise!

This young man knew to come to listen to Grandmaster Xiao's lecture. This meant that he had developed an interest in armament refining skills!

Since she had the interest, it was very good because she might change her mind to acknowledge him as her Master!

Thinking of this, Grandmaster Bai felt that he should give her a helping hand and also let her know the advantage of having a Master.

"Since you're here, it's alright to come to attend the lecture. Anyway, it's just one extra seat. We have enough seats for you..."
