

Weaponsmith 3331

Chapter 3331: Marvellous Illustration (5)

Grandmaster Han merely loosened up for a second, and his drawing was snatched away by someone. He felt extremely gloomy and depressed!

The other Grandmasters were holding on to him, and he couldn't struggle free momentarily. However, he shouted in dissatisfaction, "Old Xiao, you're too much! How can you play such dirty tricks! You already have the finished product in your hand, but you're still trying to snatch it from me! I... I'm really mistaken about you!"

Grandmaster Xiao and the others stood on Grandmaster Han's side and started to persuade him.

"I say, Old Xiao, doing that is indeed not kind!"

"You should already have finished researching those finished products that you have right? What's the use of you looking at these drawings?"

"Isn't that so? Pass your drawings to us! No matter how much you read, you won't be able to come out with anything new!"

Hearing them complaining that what he did was wrong, Grandmaster Xiao snorted loudly and even his beard flew up.

"Hmph, who said there's no use for me to read these? I'm telling you, only I can tell the mysterious principles out of these drawings! Young Master Li... he's amazing! These Spirit Armaments that he drew have more new improvements from the finished products that I got previously!"

When he said that, the other four Sky Gem Grandmasters were stunned.

A moment later, they came back to their senses and started to exclaim in surprise.

"What? Old Xiao, what did you just say??"

"New improvements? What new improvements?"

"How can that be? Could it be that the Spirit Armaments that are refined from these illustrations are even better than those samples of yours?"

One couldn't blame them for being so shocked. The four Grandmasters had specially visited Grandmaster Xiao at his home and seen that batch of Spirit Armaments that he had gotten from Huang Yueli.

Although Grandmaster Xiao was rather stingy and had only allowed them to appreciate it for a mere two hours, they sensed a lot from those few Spirit Armament's might and quality!

In those Sky Gem Grandmasters' opinion, modifying those standardized Spirit Armaments to this extent had already surpassed their imaginations.

Now, from Grandmaster Xiao's tone, there were breakthroughs for these Spirit Armaments in the illustrations?

"How... how could it be possible?"

Hearing their stunned cries, Grandmaster Xiao's expression finally turned better.

He lifted his chin and said with a glow on his face, "I said this long ago. Let me take a look... at this drawing first! I'm telling you, the Spirit Armaments that are refined based on the labels on this illustration should have the same power as those samples of him. But the number of materials used... is lesser by approximately 30% than ordinary standardized Spirit Armaments!"

"What? What did you say?? Grandmaster Xiao, you... are you sure??"

Hearing that, the first to exclaim loudly was Mu Mingjiang!

As the officer responsible for resources management, the problem related to costs was something that he was most sensitive about. Hence his reaction was much more than others.

"Grandmaster Xiao, this... this isn't a joke, right? These Spirit Armaments have so much power, but how could the consumption of materials be much lesser than before? Moreover, it has been reduced by so much! You... are you sure you didn't read it wrongly?"

Grandmaster Han and the others were extremely puzzled.

"Really reduced by 30%? How is that possible? If we want to raise the Spirit Armament's might, then logically speaking, the number of materials exhausted should increase! How can it become lesser?"

"Old Xiao, are you sure you didn't make a mistake? Quick, show it to me!"

Chapter 3332: Marvellous Illustration (6)

Grandmaster Han tried to fish in troubled water and snatch back the drawings.

But Grandmaster Xiao was already prepared for him. He immediately evaded to the side.

He held on to the drawings tightly, and swept disdainful glances at Mu Mingjiang and the others before saying, "I might be old, but I'm not an old muddle! How can I get this kind of thing wrong?"

He shook the stack of drawing in his hand. "I've already researched these standardized Spirit Armaments multiple times at home. Moreover, I've bought many materials, imitated Young Master Li's work, and underwent multiple attempts. Hence, I am very aware of how much materials these Spirit Armaments need to be refined! The illustration marks the number of materials to be 30% lesser than the standard illustrations! I will not get it wrong!"

After Grandmaster Xiao's strong emphasis, everyone showed astonished looks.

Spiritual Armament Master was an occupation that required great memory and those who could reach the Sky Gem Grandmaster's standard would definitely have wonderful memorization skills.

Since Grandmaster Xiao was so adamant about this, then there would be no mistake.

But... how was this achieved?

At this moment, the five Sky Gem Grandmasters who had been arguing for a long time suddenly recalled that Huang Yueli was right there. They quickly turned around to look for her.

Huang Yueli saw them arguing so intensely and didn't bother to stop them. Instead, she found a seat by the corner and sat down while sipping her tea and thinking about what kind of price she should ask.

Anyway, she had the answers to the questions that might be posed for the illustrations she drew. In that case, she should just allow these Grandmasters to slowly conduct their research. She wasn't worried at all!

Suddenly, the arguments stopped, and multiple gazes gathered on her.

Huang Yueli felt her hair raising on end and quickly turned to look at them. "What's the matter? Grandmasters, you're already done looking at the illustrations? Is there any problem with them?"

Before the Grandmasters could speak, Mu Mingjiang had already walked up to her. He asked in anticipation, "There's a problem! Moreover, it's a huge problem!"

Huang Yueli was slightly stunned. "There's a problem? What problem is it?"

She was rather confident of her deduction. Moreover, she had personally tested out these new refinement proposals. It would indeed ensure ordinary low rank Spiritual Armament Masters to refine sufficient Spirit Armaments within the standards, as long as they executed the operations based on the labels on the illustrations.

Mu Mingjiang said loudly, "Young Master Li, I heard Grandmaster Xiao saying that the materials you marked out on the illustrations are much lesser by 30%, as compared to the samples that you gave Grandmaster Xiao previously. Is that true?"

Huang Yueli immediately nodded in reply. "That's right, Grandmaster Xiao's eyes are indeed sharp!"

The types of materials that she used to modify the standardized Spirit Armaments were the same as before, but there was a certain amount of reduction in terms of quantity.

This adjustment belonged to the detailed modification and it was easily missed out if one did not study it carefully.

Under such pressing time, the Sky Gem Grandmasters could only take a hurried look at her Spirit Armament illustration. There was only time to roughly judge the refinement difficulty, and it was indeed rare for Grandmaster Xiao to discover this point.

Grandmaster Xiao immediately said proudly, "I was saying that the materials used had indeed been lessened. You guys insisted that I saw it wrongly! See, even Young Master Li says so himself!"

Hearing that, the other four Sky Gem Grandmasters looked at one another in dismay.

Chapter 3333: What Else Do You Have To Say? (1)

“This... this shouldn’t be? Can you really refine Spirit Armaments based on so little materials?”

“That’s right. Not to mention the increase of the power, even forming the mold of the Spirit Armament would be difficult...”

“I still don’t believe that it’s possible! Young Master Li, have you tried it out yourself?”

Everyone had the same doubt as they started at Huang Yueli, lively questioning her on this.

For a moment, Huang Yueli didn’t know whose question should she answer first.

She hesitated for a moment. It was this slight hesitation that made Mu Mingjiang’s suspicious rose to a new height!

Originally, he felt that Huang Yueli was too young and a little unreliable. Although Grandmaster Xiao kept praising her, he was still doubtful of her and had never been thoroughly assured.

Now, Huang Yueli’s illustration posed such a doubtful point. So Mu Mingjiang immediately felt that Huang Yueli was very suspicious.

He stood up and said loudly, “Young Master Li, the contents in your illustrations simply can’t convince anyone! To tell the truth, even these few Sky Gem Grandmasters don’t quite believe that you can refine such astonishing Spirit Armaments based on the labels on the drawings! How can you expect This Divine General to believe you?”

Huang Yueli frowned slightly, but she remained calm and collected.

“Divine General Mu, in this case, you have already deemed my illustrations as worthless?”

Mu Mingjiang wanted to nod his head but before he could say a word, Grandmaster Xiao jumped up.

He said furiously, “Divine General Mu, what do you mean by that? I have said many times that as long as Young Master Li says it’s possible, no matter how fascinating it is, he will definitely be able to do it! Previously you guys have all seen those standardized Spirit Armaments and in the past, all of you say that it’s impossible to have such things. What about now? What right do you have to doubt Young Master Li?”

Even though Grandmaster Xiao felt that using only 70% of the original materials to refine Spirit Armaments indeed seemed a little ridiculous.

But ever since he was stunned by Huang Yueli’s armament refining skills, he developed an unconditional trust in her. He believed that Huang Yueli would not possibly blurt out something without thinking.

Huang Yueli originally was rather unhappy and had already planned to leave upon disagreement.

But she was touched by Grandmaster Xiao’s defensive words.

This top-notch Sky Gem Grandmaster was indeed amazing. He did not use his age or looks to judge someone else! It was really rare to find someone like him.

Huang Yueli smiled and said to him, “Grandmaster Xiao, don’t be angry. I’m just an inexperienced young man. So it’s only normal for Divine General Mu to doubt me.”

Saying that, she turned to Mu Mingjiang and said, "Divine General Mu, I can say responsibly that I've tested multiple times on these refinement methods on these illustrations. The success rates are extremely high. Moreover, the finished product's quality can undergo all the assessments. As for how you think it's impossible..."

Huang Yueli thought about it and said, "If you still feel that it's impossible, I can refine these three Spirit Armaments based on the labels on the illustrations here! I believe that after you've seen the refinement processes and finished products, you will no longer have any more doubts."

Mu Mingjiang was stunned. "You... you want to refine Spirit Armaments here?? And... and even allow us to see the process?"

He had already deemed Huang Yueli as a swindler, so he didn't expect her to raise this idea of verification!

Chapter 3334: What Else Do You Have To Say? (2)

"He is going to exhibit his refinement process and supply the finished product..."

"If it could be done, that would be the best evidence!"

"But to Spiritual Armament Masters who were arrogant by nature, they would normally be very mindful of others disturbing them while refining Spirit Armaments. However, he was willing to let others look at him?"

Huang Yueli seemed to have read his mind and said nonchalantly, "Some Spiritual Armament Masters' refining techniques indeed need to be kept confidential. But the techniques that I will be exhibiting today are already labeled clearly on the illustration. So it doesn't matter for you to look at it."

Hearing that, Mu Mingjiang became extremely troubled!

"Have I really misjudged this young Spiritual Armament Master? He's actually very powerful and he can withstand this harsh trial?"

"But..."

No matter how he thought, he just felt that it was impossible!

Since Huang Yueli had already raised this, Grandmaster Xiao immediately became excited. He quickly chirped, "Great, this is wonderful! Young Master Li, you're going to publicly exhibit your refinement! Hahaha, I've long wanted to see you refine armaments, but I'm too shy to mention it!"

Usually, in the Sky Gem Glass Chamber, those low rank Spiritual Armament Masters would have to exhibit their skills during the assessments before the examiners if they wanted to raise their ranks.

Also, some Sky Gem Grandmasters would set up some classes and exhibit their skills during the open public speech.

Other than that, Spiritual Armament Masters would usually be very secretive. It was an extremely disrespectful act for any outsider to ask and watch them refine armaments.

Hence, Grandmaster Xiao was very curious about Huang Yueli's armament refining techniques. But he refrained himself from mentioning such an overboard request.

Huang Yueli laughed and said, "That's nothing special. The main thing is to pay attention to some crucial parts, which I've already labeled out on the illustrations."

The other four Sky Gem Grandmasters were extremely excited as well. They weren't like Grandmaster Xiao, who had interacted with Huang Yueli for several days. Towards her armament refining techniques, their curiosity was brimming!

Grandmaster Han immediately said, "In this case, we will stay over for a few days in Divine General Mu's residence! Refining a Spirit Armament is not something that can be completed in a few hours!"

"That's right, we'll have to impose on Divine General Mu!"

"Not to mention a few days, even if it takes more than a week, it is extremely worth it to see these Spirit Armaments being refined!"

The Sky Gem Grandmasters discussed in whispers, and Mu Mingjiang suddenly understood what was going on.

The success rates of refining Spirit Armaments were very low. Ordinary low rank Spiritual Armaments who refined low grade Spirit Armaments would succeed once or twice in every ten times. Moreover, every single time they refined, it would take a few hours.

Accumulating these factors, it would take several days before they saw three finished products!

Moreover, Huang Yueli was going to refine it openly. If she fails in her refining, she could find an excuse to say that the others were disrupting her!

In this way, wouldn't she be able to get past this once again?

"Is he planning to go ahead with this idea?"

Mu Mingjiang was feeling doubtful when he heard Huang Yueli laughing.

"Grandmasters, don't worry. It doesn't take much effort to refine three low grade Spirit Armaments! It will be completed before dinner time! But I didn't bring enough armament refining materials this time, so I'll have to trouble Divine General to supply me with those materials."

She spoke in an easy-going tone, but everyone was stunned by what she said!

Chapter 3335: What Else Do You Have To Say? (3)

"Finish refining three Spirit Armaments before dinner time!"

"Are we hearing things??"

If these words came from a Sky Gem Grandmaster, refining a low grade Spirit Armament at this speed was doable. But this young lad was just a low rank Spirit Armament Master. Based on his ability, standard, as well as intensity of his soul trace, how could he possibly refine at that speed?

Moreover, how could he guarantee that he would definitely be able to succeed in each refinement?

Mu Mingjiang's face muscles were already twitching!

This brat didn't try to drag the time, and that was totally out of his expectations.

But his boasting skills were getting more ridiculous by the minute. Wasn't he afraid of overdoing it?

Mu Mingjiang waved his hand and instructed the guards in the corridor. "Go to the warehouse and retrieve the best Spirit Armament furnace. Prepare 10 sets of the materials on these three illustrations and deliver it over as well!"

Saying that, he turned and looked at Huang Yueli. "Young Master Li, 10 sets should be sufficient, right? Or do you need more?"

Huang Yueli originally wanted to say that one set was enough. However, she thought over it again and felt that she should just leave it at 10 sets. If there were unutilized ones, she could bring them back!

Thinking of this, she nodded. "10 sets are sufficient. Many thanks, Divine General!"

Mu Mingjiang said disapprovingly, "These materials are just a petty sum of money. This Divine General doesn't care about these items! But no matter how rich the allied armies are, we will only give the materials to people who are the real deal. I hope Young Master Li understands..."

Huang Yueli merely chuckled and did not bother to make any further explanation.

Whether she was the real deal or not, it would be revealed shortly after!

By then, she would definitely knock a huge sum off Mu Mingjiang!

The allied armies soldiers meticulously executed the order at a fast pace.

It didn't even take a quarter of an hour before a troop of soldiers ran in from the door. They carried four big boxes and placed them in the corner of the room.

Huang Yueli walked over to check and discovered a faint bluish Spirit Armament furnace in the first box. Even from a distance away, she could sense the obvious Profound Qi fluctuation.

"This Spirit Armament furnace is not bad!"

Huang Yueli thought silently and looked at the other three boxes.

The other three boxes carried the materials for each kind of standardized Spirit Armament. Each type had 10 sets, and that was why it piled into three boxes.

Huang Yueli briefly checked the inside and discovered that these materials were all top quality stuff, which was much better than those ordinary materials which were being sold in the shop! These were indeed materials that were purchased by the allied armies.

Huang Yueli bent down and took the Spirit Armament furnace out from the first box. Then she placed it in the center of the room.

“Divine General, Grandmasters, since the materials have been delivered, then I shall not waste any more time. I’ll proceed to refine it immediately! But during the process of refining, the surrounding temperature will be slightly higher. Moreover, it will be slightly more dangerous, so everyone should stay a little further away from the furnace.”

The things that Huang Yueli instructed were common knowledge to any Spirit Armament Master.

Hence Grandmaster Xiao and the others didn’t bother to listen to those instructions.

Their focuses were on her previous sentence.

“He was going to start refining immediately!”

“This Li Yuehuang, doesn’t he need any time to prepare? It seemed as if refining this number of Spirit Armaments are just at his fingertips, and it is just an easy task...”

Just as everyone was in a daze, Huang Yueli had already casually waved her hand and struck a flame at the furnace’s fire entrance.

Chapter 3336: What Else Do You Have To Say? (4)

The flame she struck out were mixed with tones of blue and purple .

It wasn’t the True Phoenix Fire, but the Amethyst Thunder Flame that she had accidentally acquired when she was in the Lower Realm.

After she arrived in God Realm, Huang Yueli realized that the True Phoenix Fire was extremely rare, even in God Realm and it would attract other people’s coveting.

Today, there were five Sky Gem Grandmasters in the crowd who were all experts whereas Ming Mujiang was a Dao Profound Realm top exponent who was knowledgeable. So she didn’t want to cause any accidents.

As expected, although the Amethyst Thunder Flame was also a deviant flame, it wasn’t a rare treasure in the eyes of the Sky Gem Grandmasters.

The Grandmasters didn’t take another look at the deviant flame. Instead, their gazes were fixed on Huang Yueli’s pair of slender hands.

The flame lighting pose that Huang Yueli had just struck out was the same as the standard movements in God Realm.

But her speed was even faster than usual, and this inevitably increased the deviant flame’s intensity by a lot.

One would know when an expert made their moves!

Just based on the action of lighting the fire, the Grandmasters had a whole new level of respect for Huang Yueli. In a second, all five of them nodded silently as they realized that this young Spiritual Armament Master before them was definitely not an ordinary top exponent!

Huang Yueli didn't notice their thinking. The moment she started to refine armaments, she would devote herself fully to the process. So the outside variables would practically not affect her at all.

The furnace's temperature rose rapidly. It only took ten breaths or so to reach the required temperature.

Huang Yueli struck out a hand gesture with her right hand and with a "bang", the furnace lid flew into the sky.

She used the other hand to lead the prepared materials and added them one after another into the furnace.

The Grandmasters stared closely at her actions of refining the materials and for a moment, they went into a trance!

It was because Huang Yueli's skill of adding the materials was very proficient. Not only was her speed very fast, but it was also very rhythmic. It was so smooth that the instant the previous material had just been kneaded thoroughly, the following material was added in immediately after. There was no pause in between, and there was no waste of time at all!

This kind of control was extraordinary. Without years of practice, it wasn't easy to get to this standard.

Actually, the few Grandmasters did not know that when Huang Yueli refined in private, she added all the materials at one go into the furnace and refined it together.

But as she was exhibiting the illustration's content and following the drawing's labeling process, she had to ensure that it was something that most ordinary Spiritual Armament Masters could do. So the difficult technique of refining all at one go could not be written. Huang Yueli was also intentionally avoiding this as well.

She had to follow the steps in the illustration rigorously so that she could make them believe that this illustration was simple and practical. It wasn't something that only high rank Spiritual Masters could complete.

The refining process went smoothly and it only took less than a quarter of an hour for the fused materials to gradually show their simple shape.

Those Grandmasters expressed their shock at Huang Yueli's speed of refining the materials.

However, the expression on Huang Yueli's face started to turn serious!

Because following this would be the most important step of the entire refinement process!

She had to use Profound Energy to draw out the Spirit Armament's energy field and nest it perfectly with the materials which were gradually starting to mold into shape. This was to ensure that it could display the greatest might!

It was the most crucial step.

This was also the difference between her Spirit Armaments and ordinary standardized Spirit Armaments!

Chapter 3337: What Else Do You Have To Say? (5)

The five Grandmasters naturally knew about this. So at this moment, they held their breaths and stared at Huang Yueli without blinking. They were deeply afraid that she might miss any fine movements.

Huang Yueli's expression was very focused, but there were no signs of pause or hesitation in her hand movements.

One after another hand gestures were struck out continuously.

Under her skilled control, the energy field which was composed of her Profound Energy slowly formed into shape. Following the change in the furnace's temperature, it strictly fused with the materials.

All five Grandmasters' eyes widened as shock filled their faces.

Huang Yueli's actions were simply too beautiful. It resembled flowing water and the rhythm was exceptionally great. It wasn't too hurried or too slow, calm and unruffled. If they didn't know that she was refining armaments, they might think that it was a kind of dance.

The bystanders were totally dazed.

That was why when Huang Yueli suddenly struck out a hand gesture to open the furnace lid, all of them were still in a trance with dazed expressions.

"Alright, this dagger has been refined successfully. Grandmasters, do you want to check on it yourselves?"

Huang Yueli wiped off some sweat on her forehead and patted off the dust on her hands before she spoke.

However, no one replied to her question. It was as though no one had heard what she said.

She turned around and realized that the six of them had lifeless looks in their eyes. She frowned and said, "Grandmaster Xiao? Divine General Mu? Grandmasters? Did you see me refining the Spirit Armament earlier?"

She suddenly felt a little worried because she didn't know why the six of them were showing this kind of expression!

Were they distracted earlier? That was why they didn't see my method of refining the Spirit Armament?

Then haven't I worked in vain?

Grandmaster Xiao came back to his senses and hurriedly said, "I saw it! I saw it! Young Master Li, your armament refining standard is unbelievable! No wonder you can refine such powerful Spirit Armaments. You're indeed... amazing!"

Huang Yueli felt that Grandmaster Xiao was a little too exaggerated in praising her so passionately. So her face flushed a shade of pink.

“Grandmaster Xiao, you’ve overpraised me. There’s nothing special about my method and it’s almost the same as the standard skills. Ordinary Spiritual Armament Masters can also grasp it as long as they learn seriously.”

In Huang Yueli’s opinion, her armament refining skills might be outstanding, but the most important thing was understanding the technical content. She developed exclusive understanding of the construction of energy field and how to adjust her Profound Energy to construct it accordingly to the different Spirit Armaments’ shapes and materials’ characteristics.

Now that she had already designed it and drawn it out, other people would only need to follow the contents of the illustration to produce this.

Huang Yueli felt there shouldn’t be any difficulty in this at all.

But Grandmaster Xiao instantly shook his head and said, “Ordinary Spiritual Armament Masters couldn’t possibly have the same skills as yours! The hand gestures you struck are so fast yet accurate! There is no mistake at all! To tell the truth, even I find it hard to do this. No wonder your armament refining success rate is so high! I don’t think I’ve seen you failing at refining before, right?”

While the two of them were speaking, the remaining people also came back to their senses.

Mu Mingjiang was surprised. “You... you refined the dagger in such a short time?? How is this possible?”

Chapter 3338: What Else Do You Have To Say? (6)

Huang Yueli pursed her lips, not saying a word.

Now that the truth was right before their eyes, she did not need to make any unnecessary explanations.

Mu Mingjiang walked to the Spirit Armament furnace and propped his head over to take a look.

At this moment, the black smoke produced while burning had basically dissipated. He could clearly see a compact and exquisite silver dagger lying on the bottom of the furnace.

Mu Mingjiang stretched his hand and picked up the dagger.

Holding the dagger in his palm, he could distinctly feel a sharp coldness emitting from the weapon. It was as though he wasn’t holding a dagger, but a burst of sharp killing intent!

Mu Mingjiang was astonished. He rotated his wrist to wave the dagger in mid-air.

The blade drew out a dazzling silver glint in the air, which looked very sharp.

As an experienced high leveled practitioner, Mu Mingjiang had his judgment towards various weapons’ merits and drawbacks.

He immediately sensed the specialness in this dagger. He didn’t know if it was because the materials used were much lesser, but it seemed much lighter than ordinary standardized daggers. Moreover, the grasping point fitted the palm perfectly. The minute he held the dagger, it felt like it had become a part of him.

Mu Mingjiang looked at the dagger repeatedly.

He didn't even need to test it out at the assessment mechanism, and he could tell from experience that this was a terrific weapon!

If he had not witnessed it personally, he could never believe that this magical weapon was refined by a young, low rank Spiritual Armament Master.

Moreover, it only took her less than two hours from the moment she lit the furnace to completion!

"This... this dagger..."

He opened his mouth wanting to say something but couldn't think of anything to express.

Previously he did not trust Huang Yueli, and his attitude was extremely obvious. But now, having a complete change in attitude in such a short time... his face as a Divine General could not take it!

Just as Mu Mingjiang was hesitating, the other five Sky Gem Grandmasters could no longer wait!

They saw Mu Mingjiang holding the dagger and assumed that they would be able to get it very quickly!

After all, they were the ones who had to appraise a Spirit Armament.

Whoever knew that the moment this allied armies' Divine General picked up the dagger, he refused to let it go. "What on earth is he doing?"

Grandmaster Xiao waited for a while but on seeing that there was no response, he finally couldn't help and urged, "Divine General Mu, this dagger's tier, might, and quality needs to be accessed further. To save time, it's better to leave this dagger with us first!"

Mu Mingjiang was stunned and instantly said, "Oh, right! It's This Divine General's folly! Will all five Grandmasters please access it!"

The five of them crowded around and stretched out to snatch this dagger.

But Grandmaster Xiao was already prepared. He stood the closest to Mu Mingjiang and successfully snatched the dagger from him.

He placed the dagger before his eyes and caressed it while clicking his tongue in admiration.

"Tsk tsk, this dagger might be using the same materials as before, but the exterior had been revised! Look at this handle now! It's even more fitting to the palm. The useless piece over here was removed. No wonder it uses much lesser materials!"

"Look at the position of the sharp edge. This shape is still the same but it's much lighter than before. However, Young Master Li had increased the energy field here during the refinement..."

Chapter 3339: What Else Do You Have To Say? (7)

"In this way, it can replace the flaw of this part being easily broken."

“And this place here! An array pattern is engraved at this place. Such a tiny position had also been made use of. The concept is just ingenious!”

“And here too...”

Grandmaster Xiao flipped the dagger around and every single time he took a look, he would find something new. The color of admiration in his eyes intensified!

But the others around him weren't that happy.

“And here, and here! Are you done or not?? We are not laymen who don't know anything. Don't we know how to use our eyes to see so many merits that this dagger has?”

“That's right! There's no point in just looking at the shape of the handle. I must touch it to know if it's good or bad, isn't it?”

“Move aside, quickly move aside! You've already looked at it for such a long time. Are you done looking at it or not?”

The four Sky Gem Grandmasters complained. But when they saw Grandmaster Xiao refusing to budge shamelessly, they exchanged a look and joined hands. Two of them held on to Grandmaster Xiao while the other two suddenly made their moves to snatch away the dagger.

Grandmaster Xiao didn't expect these four comrades who usually looked like gentlemen actually made a move on him because of a Spirit Armament today!

He didn't manage to react in time and the dagger was snatched away from him.

“Hey, hey, hey, you... you guys! How can you do this! I saw the illustration of the dagger earlier first so shouldn't I be the one to look at the finished product first as well? Can't you just wait for Young Master Li to refine the next finished product?” Grandmaster Xiao contended.

When Grandmaster Han heard him talking about the matter of the drawing, he held his anger and stared at the former coldly.

“How dare you even mention that! Hadn't Young Master Li already sold you a set of Spirit Armament previously? Weren't there 20 kinds of these standardized Spirit Armaments? Yet you're still here to snatch it from us?? Old Xiao, one can't be so greedy!”

Grandmaster Xiao advised earnestly.

Grandmaster Xiao's face instantly turned red. “You... what do you guys know? Didn't I say this earlier? The Spirit Armaments that Young Master Li had given us previously use the same materials as ordinary standardized Spirit Armaments. But the differences after reducing the number of materials are still very great! Without a doubt, I definitely need to take a good look at it!”

Grandmaster Han didn't bother about his appeal and used his body to block Grandmaster Xiao's outstretched hand.

“Anyway, you're out! You can only be the last to look at it!”

“Hey, how can you do that? I was the one who introduced Young Master Li to you guys!! Without me, where are you guys going to find those Spirit Armaments, or even look at it closely?”

Mu Mingjiang felt a headache coming when he looked at the five Grandmasters who were squabbling.

He passed the dagger to the Sky Gem Grandmasters hoping that they would quickly bring it for assessment, and come out with a confirmed result.

In the end, these few old men who added up to a few thousand years old seemed to have forgotten what was their purpose in today’s trip!

“Is the Spirit Armament that this young Spiritual Armament Master refined that amazing that these five Sky Gem Grandmasters were so surprised? Did they even need to scramble to look at it?”

Although Mu Mingjiang also admitted that this dagger was pretty good, it was still a low grade Spirit Armament after all!

He couldn’t understand that to the Grandmasters, the value in the dagger was not its might but the refinement train of thoughts and new method in Huang Yueli’s refinement process.

These were something that they had not seen before. Only a real genius could think of this!

Chapter 3340: What Else Do You Have To Say? (8)

Mu Mingjiang looked at Huang Yueli, his bafflement evident in his gaze.

Huang Yueli sensed his gaze. After she thought about it, she walked up and tried to persuade those few Grandmasters.

“Grandmaster Xiao, and... uhhh, Seniors. There are plenty of chances for you to carefully research this dagger in the future if you’re interested! After I sell the illustration to the allied armies, there will be plenty of such standardized Spirit Armaments that you can’t even count!”

Hearing that, the few Grandmasters finally calmed down a little.

Thinking about it, that was true as well. The dagger might be a rare thing right now, but in the future, after the allied armies soldiers whose cultivations were in Dream Profound Realm and above were allocated to one, they could look as much as they wanted.

“That’s not right. This dagger is refined by Young Master Li, you! It will definitely be different from those that ordinary Spiritual Armament Masters refine!” Grandmaster Yuan suddenly said.

With that, those Grandmasters who had already let go of the daggers suddenly responded.

“Right, what Old Yuan said is logical!”

“A Spirit Armament’s quality is related closely to the Spiritual Armament Master’s standard! It wouldn’t be as good if it was refined by another person!”

“Alright, alright. Since this dagger will be a common thing in the streets, then pass this to me first!”

“Scram! Do you think we are all fools?”

Hearing the five Grandmasters starting to squabble again, Huang Yueli felt rather helpless.

She thought about it and said, “Grandmasters, think about it. The crux of refining Spirit Armaments depends on the illustration and the actual refinement process! You’ve already seen me personally exhibiting the refinement. Coordinating with these illustrations, what else do you not understand? You can go back and refine one on your own. Perhaps you might even refine it better than mine! My cultivation is limited and I have insufficient Profound Energy. So that’s why I can only refine low grade Spirit Armaments!”

Hearing that, the Grandmasters had a slight inclination to do so.

Indeed, they usually researched finished Spirit Armaments so that they could deduce various operations that the person used while refining the armament.

Now, Huang Yueli had already exhibited the process to them. So the dagger itself wasn’t that important anymore.

Seeing their expressions loosening up, Huang Yueli hurriedly said, “Moreover, I’ve already promised Divine General Mu that I will refine all three Spirit Armaments before nighttime today. May I trouble all of you to assess the dagger quickly? Otherwise, if Divine General Mu thinks I’m trying to deceive him and wants to punish me, it will be terrible!”

“What? On what basis can he punish you??” Hearing that, Grandmaster Han jumped up instantly.

“That’s right. A genius Spiritual Armament Master like Young Master Li is the hope and future of the entire Sky Gem Glass Chamber. By doing that, he is going against all the Spiritual Armament Masters!”

“Young Master Li is so talented. You will never cheat him of such little money!!”

The Sky Gem Grandmasters were thoroughly convinced by Huang Yueli’s armament refining standard and had completely leaned towards her side.

Hearing Huang Yueli’s words, the few of them spoke out indignantly and stared at Mu Mingjiang fiercely!

Mu Mingjiang felt aggrieved and almost spat out a mouthful of blood!

Although he did have some issues with Huang Yueli previously, he finally realized that he had been thinking too much. Huang Yueli was a genuine genius Spiritual Armament Master! He thought, “How would I ever dare to think that Li Yuehuang is deceiving me?”

In the end, the Sky Gem Grandmasters looked at him as if he had already sentenced Huang Yueli to prison!

“This Divine General does not have such intention...” He hurriedly explained.
