

Weaponsmith 481

Chapter 481: Refining the Profound Lunar Spirit Mirror

After Huang Yueli had set up the array, she patted the dust off her hands and chased everyone out.

“Alright, don’t anyone of you dare to come disturb me, and don’t allow anyone or any magical beasts to barge in and break my momentum! I’m going to start now so wait for my good news!”

Once everyone had left the boundary of her vision, Huang Yueli touched the crux of the array and activated the array.

Surrounding array patterns lit up and a strong Qi Vitality Array came alive instantly.

She extracted an armament furnace from the Sky Phoenix Ring. This armament furnace was the one which Li Moying and herself obtained from Master Yun Tian’s cave.

This furnace was even able to refine a half gold relic, so refining a fourth level upper grade Profound Lunar Spirit Mirror was a piece of cake.

With this armament furnace and paired together with True Phoenix Fire and Amethyst Thunder Flame, the Profound Armament that was refined would definitely breakthrough the usual quality.

To Huang Yueli, there was only an unexpected regret.

That regret was, she had originally planned to advance to the second degree realm before she started refining this armament. Li Moying had already gathered all the items and magical beast cores she required so if she could have a minimum of seven days of seclusion, she would be able to break through the second degree realm successfully.

After her advancement, her level of refining armaments would naturally be higher and she would definitely level up the quality of the Profound Lunar Spirit Mirror by quite an amount.

But the unexpected thing was Li Moying’s injury. Refining the Profound Lunar Spirit Mirror was the imminent priority so there was no time left for her to break through.

It was exactly because of this that Huang Yueli had to be even more prudent and took extra care in the preparations before she started refining. Her mission was to ensure that the refinement process was smooth sailing!

She carefully placed the armament furnace in the middle of the array and activated all the amplifying arrays.

Following that, her left and right hands flicked and two dazzling fire flames shot out from both her hands and shot into the entry point at the bottom of the armament furnace.

These two flames, one amethyst and one gold, were the Amethyst Thunder Flame and True Phoenix Fire!

Once these two hetero-flames, that she had refined, had entered the armament furnace, it burst with the wing and melded together to become a bundle of raging flames which shone amethyst golden rays.

A short while later, the armament furnace started puffing green smoke.

Huang Yueli took the opportunity to do an incantation gesture and silently chanted "Open!"

The furnace lid opened and she skilfully placed all the materials by her feet one at a time into the furnace.

With these hetero-flames cooperating, the materials in the furnace started to melt and converge together.

Convergence was the first step to armament refining.

Different materials had different attributes which might contradict one another and there might be impurities within which would affect the final product.

Hence using the heat from the flames and the armament master's skilful control to combine the different materials together and to refine the impurities which were not required, was the basics but yet it was the most important step!

If this step was poorly executed, when the product reached the final stage, it would fail through lack of effort!

Sometimes, explosions might also occur.

Convergence of materials was the most arduous step and yet it required the most amount of patience and concentration level must be extremely high. The expectation of the armament master's Profound Energy was very great.

There were many armament masters whose cultivation levels were slightly lower but their skills were pretty good. However due to the lack of their Profound Energy, they were not able to support the long duration process so they were never able to refine the high level Profound Armaments.

Chapter 482: For Li Moying.....

In her past life, due to the Huang Yueli's high level of skills and innate gift, she was one of the talents in Soaring Heavens Continent, so she had never to worry about this.

But now, she was facing a severe challenge.

Based on her first degree realm's cultivation, if it was any other normal armament master, no matter what innate gift they had, there was no way to refine a second grade Profound Armament!

Moreover, the item she wanted to refine was a fourth level upper grade Profound Lunar Spirit Mirror and she had intended to add in modifications to make the Profound Armament to advance to the fifth level!

This was an unimaginable dream for most people!

Huang Yueli used the strong concentration that had been left over from her past life, mounts of experience that she had gained and a strong determination and willpower, she vowed that she would challenge this impossible task!

She gathered all her Profound Energy and put her best foot forward.

For Li Moying.... She must do it!

In the armament furnace, different materials were starting to melt. But it was still in regiments and were contradicting one another, refusing to mould together.

Huang Yueli's expression was solemn and she kept the incantation gestures going.

No matter how serious anything was, one hundred percent of the time, her heart always remained calm and patient.

She knew more than anyone else that the more rigorous a challenge was, the more she must remain calm and collected. In this way, she would be able to bring her potential to the highest level!

Time slowly passed by.

Outside the array, the sky had turned slightly dark and slightly brightened up again.

However Huang Yueli was unaffected by the changes happening outside.

She put in all her concentration into the materials in the armament furnace, not daring to let her mind wander.

Finally, a "pffft" sound gently echoed and the materials in the furnace suddenly bubbled, letting out a pungent smoke.

Huang Yueli gazed at the golden, purified liquid and her eyes reflected a smile.

Finally..... the convergence step was completed.

The next step was to add in the Profound Lunar Jade.

With a flick of her fingers, the greyish rock that Huang Yueli had dug out from the mountain wall was flung into the furnace.

The instance that rock fell into the molten liquid, something unexpected happened.

The originally unremarkable greyish rock suddenly slipped out of its original colour and slowly became lighter until it finally became crystal clear. Under the flames, it sparkled brightly as if it was the most beautifully cut gem on earth.

The Profound Lunar Jade blended into the molten liquid and melted in the fastest possible speed.

The liquid in the armament furnace also became a bluish green colour and it vaguely let out a gust of cold air. The flowing speed gradually became slower and slower, showing signs of being frozen!

Huang Yueli's expression became increasingly deep as she knew this was the crucial moment that the Profound Armament would form into its shape.

She took a deep breath and her hand movements became even more prudent!

.....

Outside the Array.

Mo Yi, Mo Er, Mo San, Luo Jiyun and Murong Ni took turns to guard the unconscious Li Moying. This was already the third morning.

Luo Jiyun looked at Li Moying who was lying in the tent and took a deep sigh.

“Sigh, why is Sister-in-law taking so long to refine the Profound Armament? Could there have been an accident? I really wish to go in and at a look at the situation!”

Mo Yi immediately replied, “Master Luo, you might not know about this but refining armaments are normally time and energy consuming. It is especially so for fourth level upper grade Profound Armaments such as the Profound Lunar Spirit Mirror. It will take at least seven days and now it has only been three days, so there’s still a long way to go!”

Chapter 483: Who is more important?

Luo Jiyun replied, “Really? I thought..... It would be ready in one or two days. If that’s the case, does that mean Sister-in-law is working laboriously without eating or resting?”

Mo Yi nodded, “That’s right. When Armament Masters start refining, they absolutely cannot stop, at most they would take some Abstinence Pills to satisfy their hunger. Such a high intensity job requires a huge amount of Profound Energy, so I’m worried if Third Miss can persevere.”

Luo Jiyun started to feel worried when he heard this.

“No wonder every piece of armament is sold at an outrageous price, it’s tough being an Armament Master! Sigh, I really cannot take a look? I’m really worried. What if Senior Brother doesn’t wake up and Sister-in-law can’t hang on, what shall we do?”

When Mo Yi heard what Luo Jiyun said, he immediately stopped him.

“You absolutely cannot disturb her! If there is any disturbance during the refining process, it is easy to get into trouble.”

Murong Ni had been eavesdropping on their conversation and when she heard this, she couldn’t stop herself from speaking out.

“Fifth Brother, did you really believe.... that Huang Yueli is able to refine the Profound Lunar Spirit Mirror?”

“This...”

To be honest, Luo Jiyun was skeptical.

Even Mo Yi also did not show his confidence that Hiang Yueli could make it, unlike previous times.

Murong Ni continued, "In my opinion, all of you have been deceived by Yueli! How could she be a fifth grade armament master? Just with that little bit of cultivation, you know it's just not possible!"

Luo Jiyun subconsciously rebuked her, "But Sister-in-law had already said that she could do it, so we should at least let her have a go at it?"

Murong Ni snorted disgruntledly, "Why must we let her try? Do you know how much time we have wasted? If it wasn't for the fact that she insisted on looking for the Profound Lunar Jade, we might have got out of the Dark Moon Forest and made contact with Brother's men! Now we've wasted so much time and she's not able to refine the Profound Lunar Spirit Mirror, it will definitely delay Senior Brother's condition!"

Luo Jiyun was convinced by her words and showed signs of worries.

"Sigh, it's not entirely wrong to say this but since Sister-in-law had already started refining, to say it is a failure..... Isn't it too early? What's more, even if it was a failure, we should have a look at the end result first. Don't tell me we should just give up halfway?"

Murong Ni disapprovingly replied, "You still want to wait for more than seven days? By the time she comes out, it may be too late for Senior Brother! We should stop wasting time! Make use of the opportunity now and send Senior Brother back to the Sect. Stop making consecutive mistakes!"

Luo Jiyun felt that her words made some sense but he was still indecisive.

"But Sister-in-law is still inside the array refining the profound armament? How about her?"

"What else can we do? Of course we should go inform her about this and stop the refining process."

"How can we do that? Didn't you hear what Brother Mo Yi said? If armament masters are disrupted while they are refining, there is a high possibility that they will enter into a state of Qi Deviation!"

"Well.... There's no other way. Since we are all in the fifth degree realm, with our combined strength, I'm sure we are able to transport Senior Brother out safely. If we don't leave together, there is no guarantee that we can ensure his safety. If Yueli insists on staying to refine the armament and can't leave, then we can only leave her here alone."

"What? How can we do that?" Luo Jiyun frowned.

The sides of Murong Ni's lips curled upwards and revealed a sly smile.

"Why not? Do we have any other ideas now? Tell me who is more important now, Senior Brother or Yue Li?"

Chapter 484: A dilemmatic proposition

In actual fact, when Murong Ni heard what Mo Yi said earlier, she already knew that Yue Li could not be disturbed in her current state.

So the idea that she came out with had two routes, both of it were major disadvantages to Huang Yueli.

If they were to remind Huang Yueli to stop refining, even if the Profound Lunar Spirit Mirror was originally a success, it would end up failing because of the disruption and there was a huge possibility of incurring a serious internal injury or even enter the state of Qi Deviation.

If they don't inform her and left without a word, as a first degree realm practitioner, she would be equivalent to a fat sheep waiting to run into a pack of wolves in the Dark Moon Forest. There was no way she could leave this place alive.

No matter which method they chose would be life-threatening situation.

If it was normal times, no one would leave Huang Yueli on her own.

But now that Li Moying was seriously injured, everyone was uptight and absent-minded. Including the fact that they had waited for three days, so they were feeling restless and worried that Li Moying's condition might worsen due to the delay.

It was only under the current circumstances that Murong Ni had dared to voice out her opinions. She accurately guessed their mentality and knew that nothing was more important than Li Moying's health at this point of time.

Weighing the pros and cons, the possibility of leaving Huang Yueli behind was much higher.

As expected, everyone fell into a short span of silence after they heard Murong Ni's suggestions.

The smile on Murong Ni became more obvious and she was sneering in her heart, "Yue Li, just because Senior Brother stood up for you, did you feel complacent? Now everyone will abandon you because of Senior Brother, this is what you deserve!"

However, Mo Yi shook his head after a while.

"No. Myself, Mo Er and Mo San will not abandon Third Miss and leave without her. If the both of you cannot wait, you may leave first. But since you're not able to guarantee Master's safety, we will not allow you to bring away our Master."

Murong Ni's smile froze as she had never expected to hear such an answer.

She immediately turned anxious, "Brother Mo Yi, how can you do this? Aren't you worried about Senior Brother's condition? Are you going to allow Yue Li, that lass to do as she wish? If Senior Brother's cultivation really reversed, leaving him injured for the rest of his life, what are you going to do about it?"

Mo Yi replied, "The situation you are describing is possible...."

"Then why are you not hurrying to leave with us?" Murong Ni hurriedly cut into his words.

Mo Yi shook his head and calmly replied, "But I'm very sure that Master can throw away his life just to ensure that Third Miss do not get injured. If he finds out the truth later that we ignored Third Miss's safety and left without permission, he will definitely not let us off. As servants, we cannot defy our Master's orders, so we seek Miss Murong's understanding."

Mo Yi's words were neither obsequious nor supercilious.

Although he said to ask Murong Ni for her “understanding”, in actual fact he had already given the answer, which was they would definitely not leave.

Murong Ni had not expect Mo Yi to be so insistent. Her satisfactory plans were going to be overturned and she started to be anxious.

She turned her head and looked at the position of Huang Yueli’s Spirit Gathering Array and a sinister expression flashed past her eyes.

She suddenly stood up and walked towards the Spirit Gathering Array.

“Junior Sister, what’s wrong? Why are you walking over there for? Luo Jiyun found it weird and questioned her.

Chapter 485: Obviously wanted Huang Yueli dead

Murong Ni made up an excuse instantly, “I have a need to answer the call of nature.”

“Oh.....” Luo Jiyun nodded and putting aside this question, turned to the opposite direction.

Murong Ni was the only female around so if she needed to answer the call of nature, naturally she would walk further away. These few men had to avoid doing anything that might arouse suspicion so they resolved not to turn their heads around.

Murong Ni waited for everyone to turn around before she sped up and slid over to the front of Huang Yueli’s Spirit Gathering Array.

She raised her fingers and held up her whip, summoned her Profound Skill and threw out her whip heavily in the direction of the array.

A huge “Boom” shook the entire ground.

The men finally realized something was wrong and when they took a look, all of them turned pale with fright.

“Junior Sister, what are you doing? Come back quickly! You cannot go and disturb Sister-in-law!”

“Miss Murong, what were you intending to do? Quickly leave that place!”

Not only did Murong Ni not hear them, she used one hundred percent of her Profound Energy and continued attacking the array.

This round, she thought that since her intentions were already discovered by everyone, she might as well not bother hiding and started to shout while she was continuing her attacks.

“Yue Li, come out now! Stop wasting time inside, we are going to descend the mountain! Just give up since you’re not able to refine the Profound Lunar Spirit Mirror! Come out, quickly come out now!”

Her voice had a penetrative effect which echoed around the surroundings of the mountain path.

When the few men heard this, their faces had turned exceptionally unsightly.

With Murong Ni's attack and vociferation, unless Huang Yueli was dead, otherwise she would definitely be disturbed. Refining armaments was not for fun but an extremely dangerous task.

What she was doing was obviously because she wanted Huang Yueli dead!

The others used their fastest speed and hurried over, in an attempt to drag Murong Ni away.

When Murong Ni saw this, her attack speed increased several notches and continued to shout, "Yue Li quickly come out. Stop wasting everyone's time since you're not able to refine it. Senior Brother is going to die because of you!"

How would she not know that she would cause Huang Yueli's attention to be diverted and meet with a mishap.

But that was exactly the end result of what she had hoped for. She wanted so badly for Huang Yueli to enter into the state of Qi Deviation and suffer from internal injuries then cough out blood! If it wasn't for this end result, how could she make Huang Yueli pay for the humiliation of making her kowtow one hundred times?

She dared to humiliate her like this, dying one hundred times wouldn't be enough to pay for it!

Even though this might make the refinement process a failure, Murong Ni had never even considered this as she had already determined that Huang Yueli was not able to refine the Profound Lunar Spirit Mirror. Whether she broke her momentum or not, it should not affect Li Moying at all.

The men were extremely anxious but since they were a distance from the array, rushing over would require a bit more time.

Mo Yi's expression looked extremely terrible.

If it wasn't for the fact that he did not stop Murong Ni and got Huang Yueli injured again, when Li Moying awakes, how furious would he get?

Just as everyone were in extreme anxiety, something unexpected happened.

Following a "buzz buzz" sound, the Spirit Gathering Array was actually released.

Murong Ni had not stopped her attacks as she clearly understood that a fourth level array was not easily damaged. So her main aim was never to break the array but merely to disrupt Huang Yueli's refining process.

So she had never thought that the array would suddenly disappear.

She fell short of defence and because she used too much power, she was unable to stop herself. In an instance, she fell directly into the boundary of the array, flat on her face onto the ground.

Chapter 486: Underhanded methods again

The next moment, Huang Yueli's skirt hem appeared right before her eyes.

Murong Ni dazedly raised her head and look upwards following the direction of Huang Yueli's skirt. In the end, before she could see anything, she felt something cooling on her face.

Her hands reached out and touched her face, and found it full of blood. She finally realised that when she fell, she had hurt her nose and it caused a nose bleed which smeared all over her face.

Murong Ni embarrassedly climbed up. Using her strength to wipe her nose, she smeared the blood onto other parts of her face causing it to look even messier than before, and slightly comical.

Huang Yueli couldn't stop herself from laughing out, "Murong Ni, what are you doing? Did you find that I was too bored with refining armaments so you're here to put up a skit for me to watch?"

"You.... What are you saying?" Murong Ni flew into a rage, her eyes staring hard at Huang Yueli and started cursing, "You vixen, how dare you use underhanded methods to scheme against me! You're utterly shameless and evil!"

Huang Yueli retracted her smiles and coldly said, "Please get yourself right, who was the one using underhanded methods? I want to question Miss Murong, when I was refining the armament, who attacked my Spirit Gathering Array and who was screaming and shouting outside? What does that imply?"

"I...I thought that since you were not coming out, I wanted to urge you....." Murong Ni's thoughts were squashed and her stance weakened but she quickly found an adequate reason.

"Oh? Urge me?"

"That's right!" Murong Ni raised her head and acted righteously, "Can't you see what kind of condition Senior Brother is in right now? Can he continue waiting for countless days? Can you or can't you refine the Profound Lunar Spirit Mirror? Quickly tell us the truth. If this drags on, how will you account for if Senior Brother's injuries worsen further?"

Huang Yueli's gaze became even colder.

"You are urging me? Do you know how much time is needed for an Armament Master to refine armaments? And that the refining process cannot be disturbed?"

As Huang Yueli was speaking, her gaze brushed past her and it remained affixed on the four men standing behind.

Those who felt her gaze brush past started to look down sheepishly in guilt.

Mo Yi replied, "Third Miss, I had reminded Miss Murong but we had never expected her to use the excuse of answering a nature's call to get past us and ran over secretly. It's my fault that this happened. Third Miss, I shall await your punishment."

Huang Yueli's side of her lips curled and she moved her gaze back to Murong Ni.

"So, you knew that it would cause me to enter the state of Qi Deviation and you still did it on purpose?"

Murong Ni looked at her calm composure and felt like punching her. She had wanted so badly to say, "That's right, I did it on purpose!"

But Murong Ni still had some brains. She knew this was not the time to admit her wrongdoings so she shook her head with all her might.

“Of course not, why would I do that on purpose? I was just anxious.....who asked you to waste so much time and yet still not refine even a bit of the Profound Lunar Spirit Mirror?”

Huang Yueli sniggered but did not say a word.

Murong Ni then realised that something was not right.

“Yue....Yueli, you.... You’re not affected at all? Shouldn’t.... shouldn’t you be.....”

She had yet to finish her sentence but everyone understood what she meant.

Murong Ni had forcefully launched an attack on Huang Yueli’s array, causing her to halt her refining process and release the array.

In such a way, Huang Yueli would definitely suffer serious backlash effects. Even if she didn’t enter the state of Qi Deviation, she should have at least suffered some kind of internal injury.

Chapter 487: Never met someone so brain-dead before

Especially the armament that she had just refined was way above what her cultivation level could refine.

According to logic, she would not only have obtained an injury, and it should have been a serious injury!

Murong Ni was insistent on this belief in this so she struck out without holding back!

However, the situation now was way past her expectations.

Huang Yueli stood silently in the array, a tall, large armament furnace sparkled with faint amethyst and gold rays behind her. Just one glance and you can tell it’s something extraordinary.

As for herself, although her face was slightly stained with dust, her slightly damp hair was stuck on her face and she showed hints of fatigue, but she didn’t look one who had sustained injuries.

Murong Ni scrutinised her from head to toe and after some time, she still couldn’t see where Huang Yueli had sustained injuries.

When Mo Yi and the rest saw her, they quickly walked closer and inquired in a concerned tone, “Third Miss, are you alright? If you have any internal injury or anywhere that you feel unwell, you must tell us! I have prepared some pills which are meant for treating internal injuries...”

Huang Yueli shook her head and replied, “No worries, I’m not injured at all. It’s just that I was stuck inside for three days so I’m famished. Can you find me something to eat?”

Hearing that, Mo Er immediately ran to start the fire to cook up a feast.

Murong Ni stared blankly at her and said unbelievably, “You’re alright, you’re not injured.... How can that be? This could not be happening.....”

Huang Yueli threw her a glance with an expression cold like ice, "Why? Do you feel that it's a pity that I'm not injured? You still dare to say it's unintentional, do you think I'm an idiot?"

Murong Ni was agitated by her and couldn't hold back further.

"What? So what if I was intentional? I think you did that on purpose too, right? No wonder you did not sustain any injuries, because you were not even refining any armaments. The furnace was just a decoy! You're obviously wasting time with the intention to drag us down! So, did I guessed correctly?"

Huang Yueli gave her a glance like she was looking at an imbecile, "Why do I need to put up appearances in the array? And for an entire three days? What advantages would I gain?"

Murong Ni chuckled, "Aren't you very clear about this? It must be because you promised the heavens and earth but once you entered the array, you realised that fourth level upper grade armaments are not easily refined as your level is too far off! So you thought of hiding inside to continue pretending. After eight to ten days then you'd pretend to fail because you don't have enough power. In this way, you will be less embarrassed!"

"But, have you thought of it, although you have not lost so much face, but as the days drag on, what will become of Senior Brother? Luckily I woke up to this face and exposed your scheme! Otherwise... Senior Brother is going to die because of you!"

Huang Yueli stared at her not making any sound.

She had seen brainless people, but never had she met someone as brain-dead as this.

She could even thought of this verdict?

And she was pretty shameless to try and discredit Huang Yueli, and yet at the same time bring credit to herself.

It was obviously Murong Ni plotting against Huang Yueli, but when the words came out from her mouth, it sounded as though she had recorded a merit and did a big favour for everyone.

Huang Yueli's silence made Murong Ni think that she was correct, thus her guilty silence.

"What? I've got it isn't it? Fifth Brother and the rest have been deceived by you! Your armament furnace looks like it is a high quality product. But it has been ruined by a swindler like you, who is fishing for fame and compliments!"

Chapter 488: A good dog doesn't block the road!

Huang Yueli revealed a smile which didn't look like a smile, "I know, you want me to fail so badly but unfortunately I have to apologize that I have disappointed you. I have yet to fail refining any armaments under my care!"

Murong Ni sneered and blurted out without thinking, "Still trying to exaggerate? Fourth level upper grade Profound Weapon, can you possibly refine it? This I gotta... see.....ouch!"

Before she could finish her words, Huang Yueli had pushed her aside.

Murong Ni was caught off guard and nearly fell on her face. She staggered several steps back and managed to force herself to stand steadily.

“What are you doing?”

“A good dog doesn’t block the road!”

Huang Yueli spare any glances at her and her lips curled upwards, but the words she soiled out were infuriating.

“You little....”

Murong Ni was about to fly into a rage when she say Huang Yueli’s expression froze as she made an incantation gesture towards the armament furnace!

A “Poof” sounded and the amethyst gold furnace’s lid started to puff out green smoke. At the same time, it was vibrating gently.

Murong Ni just realised that all the while when they were talking, the armament furnace was still refining the Profound Armament!

She had seen their Sect’s Armament Masters refining weapons and knew that when they were refining weapons, they must concentrate fully without a single bit of distraction. If they conversed with anyone or even a slight glance might end up with an explosion.

However, all the while that Huang Yueli conversed with her, her vision had not even drifted to the armament furnace, and the result was.... It had not exploded? And it looked like the refining process was pretty successful.....

In actual fact, what Murong Ni didn’t know was that when refining Profound Armaments, concentration was most required in the moulding and shaping process. Once the Profound Armament had gained its shape, as long as the deviant flames was strong enough, all they needed was sufficient time for the waiting process.

Those Armament Masters who were extremely careful and didn’t even dare to make any sound when they had entered the moulding stage was because they didn’t have the ability to use refined powerful deviant flames. They could only use normal flame armament so that would be extremely dangerous.

At this point of time, Huang Yueli put all her attention on the Profound Weapon in the furnace, ignoring Murong Ni.

The Profound Weapon had long been moulded into its shape but the flame towards the ending part was extremely important. The exact time to open the furnace was decided by the degree of the calcination, and was the crucial step of refining armaments.

The speed of her Incantation Gestures were very fast, one after another and soon it all added up together.

Following that, she struck out the final Incantation Gesture and lightly said, “Keep!”

Two deviant flames flew out from the bottom of the armament furnace and landed into her palms.

Luo Jiyun's eyes were fixated on the flames and he shouted out in shock, "That... that ... Is that the legendary deviant flame? How did sister-in-law get the deviant flame? And there's two of them?"

Mo Yi quickly tugged at him, "Shh! Keep quiet! You can't make any noises at this moment!"

Luo Jiyun quickly covered his mouth.

Huang Yueli recovered back the deviant flames and lightly shouted, "Open!"

The furnace cover raised up and let out all the miscellaneous smoke that had piled up within. Momentarily the sky was filled with smoke clouds.

Coincidentally, the smoke happened to be blown towards Murong Ni's direction.

She had originally stood by the side when she was dazed by Huang Yueli's skilled and graceful movements like a dance. In the end, a cloud of thick smoke came charging towards her face when the furnace lid opened.

Murong's entire face was puffed with smoke.

"Ow ow ow.... What is this? It's so hot, so hot!! Why can't I see anything? Help, help!"

Chapter 489: Fifth grade mid ranked

Murong Ni wailed like ghosts and howled like wolves as she was sprayed by that thick smoke, her face was heated and she had a huge shock.

Huang Yueli coldly sneered, "What's there to scream about? It's just a cloud of smoke. Who asked you to come so near, and of all places, you had to stand at where the ventilator was? If I hadn't kept the deviant flames in advance, you'd have been burnt to a crisp!"

Murong Ni was filled with hatred but she couldn't say anything against it.

Subconsciously she felt that Huang Yueli had intentionally controlled the direction of the smoke towards her, but she didn't have any evidence.

Huang Yueli was a genuine Armament Master so when she said the position where Murong Ni was standing was wrong, Murong Ni simply had no way to fight back.

Luckily, this puff of smoke was exactly as what Huang Yueli said, and it wasn't too hot, only making her face turn red with heat and some skin had begun to peel, but she wasn't disfigured.

Some thick smoke smog her eyes and was extremely pungent, causing Murong Ni's eyes to turn red and kept tearing. That sight was extremely pitiful.

However Huang Yueli didn't bother to look at her, and continued walking towards the side of the armament furnace. Carefully, she retrieved a palm-sized mirror.

This mirror reflected a faint indigo colour and looked eerie.

However Mo Yi became excited once he saw this mirror.

“This... this is really the Profound Lunar Spirit Mirror! I’ve seen the blueprint of the Profound Lunar Spirit Mirror and it reflects this special indigo colour, so it cannot be wrong!”

Saying that he carefully inquired Huang Yueli, “Third Miss, may I borrow and take a look?”

Huang Yueli replied smilingly, “Why? You don’t trust me?”

Mo Yi shook his head, “No. It’s just... this Profound Lunar Spirit Mirror, it seems a little different from the one that I’ve seen previously.....”

Huang Yueli’s lips curled and she generously passed the Profound Lunar Spirit Mirror to Mo Yi.

When Mo Yi took the Profound Armament, he instantly felt a chilling sensation and almost didn’t hold on to it. But a joyous expression flashed past his face because this chilling feeling was one of the special attributes of the Profound Lunar Spirit Mirror.

He took the Profound Armament in his hands and checked it carefully.

Mo Yi noticed that the Profound Lunar Spirit Mirror that Huang Yueli had refined was slightly different from the blueprint that he had seen. The pattern carvings on the mirror was a lot more complicated than the blueprint and the shape of the mirror was different as well.

But from the colour and feeling, it was definitely the Profound Lunar Spirit Mirror.

Huang Yueli saw the questions that were troubling Mo Yi so she explained, “The Profound Lunar Spirit Mirror that I had refined is indeed different from the blueprint that Li Moying gave me. Perhaps you have already noticed, this Profound Lunar Spirit Mirror is a fifth grade mid quality Profound Armament!”

“Fifth grade mid rank!” Mo Yi’s hands shivered and almost dropped the mirror that he was holding.

This was too thrilling!

The armament that Huang Yueli had refined was a fifth grade mid rank Profound Armament?

But he was also considered as a practitioner who had mounts of experience. Even though they didn’t have any tools to ascertain the product, but towards the Profound Armament’s grade that he was holding in his hands, he roughly could gauge.

From the exterior looks of this Profound Lunar Spirit Mirror, it was indeed worth much more than a normal fourth grade upper level Profound Armament.

But the fact that Huang Yueli could refine a fourth grade upper level Profound Lunar Spirit Mirror successfully was already a shocking fact.

And now, she told him that she had improvised on the blueprint and the end-product that she had refined was of a higher grade by two small levels than the original?

Was he really not dreaming?

Chapter 490: Let’s calculate the debts clearly!

Huang Yueli saw Mo Yi's face filled with astonishment so she said, "Try putting this on for Li Moying. We'll know its effect once he tries it on."

When Mo Yi heard what she said, he hurriedly explained, "Third Miss, I'm not doubting your ability, but..."

Huang Yueli stopped him, "No need to explain, quickly let Li Moying try this on."

Mo Yi nodded and hastily ran back into the tent.

Huang Yueli had originally intended to follow him in. It will be best if she could see Li Moying waking up personally but as she was about to take one step ahead, a low groan was heard from nearby.

She turned towards the sound and found Murong Ni sitting on the ground rubbing her eyes. Her face was filled with soot and she stared at Huang Yueli with an indescribable enmity.

When Huang Yueli looked towards her direction, Murong Ni gritted her teeth and said menacingly, "Yue Li! Today's matter....I won't let it go so easily! You dared to humiliate me, I will never let you off!"

Huang Yueli stopped in her tracks and she smiled lightly.

"What a coincidence, I have no intention to let you off too! If you hadn't reminded me I would have forgotten about it! You intentionally disrupted me when I was refining armament, with the evil intent to cause me to die. Did you think that the fall that you had was enough to let you off?"

Huang Yueli's smiled sweetly, and she looked pure and cute but in Murong Ni's eyes, she felt it was terrifying.

She involuntarily nudged herself backwards on the ground, "You... what are you intending to do? I'm warning you! My father is Senior Brother's benefactor, everyone in the Sect will help me. If you hurt me, even Senior Brother will not let you off...."

Huang Yueli replied, "I know, I know, I'm sick and tired of hearing these words. Next time when you're threatening others, can you please change some new lines?"

"You..."

Murong Ni saw that she wasn't affected and knew instantly that something is amiss. She quickly stood up with the intention to escape.

She knew now that she could not afford to offend Huang Yueli and prepared to endure with this anger for now. After all, she was a reputable Sect Master's daughter and surrounding her were plenty of the Sect's disciples so whenever Senior Brother wasn't around, she would have plenty of chances to take revenge.

For now... it's best to swallow her angry.

Murong Ni felt the way she had escaped was very uncomfortable but as the situation was out of her grasp, she had no choice.

Who knew, she had just ran a few steps when her head banged against a solid wall, causing a concussion to her brain and she was seeing stars spinning.

“Ow.... So painful!”

She held her forehead and lifted her head to take a look but she realised that there was no obstacle in her way.

Murong Ni finally reacted and became aware that she was still within Huang Yueli’s array, and it was Huang Yueli who had re-activated the array to lock her up.

Behind her, Huang Yueli started to speak calmly.

“Trying to escape? Isn’t it it too early for it? Let’s calculate the debts clearly first! Since the beginning when we first entered the Dark Moon Forest, you kept using underhanded methods to scheme against me. Subsequently, you lured the Scarlet Eyed Blood Bats and almost caused everyone to die. Next was to push me down the cliff and now, you attempted to disrupt my refining of armament.... I’m the type who dislike to owe debts, and I hate people who owe me anything.... Tell me, how should I get even with you?”

Murong Ni felt a chill down her spine.

“Don’t come over... what do you want to do? Don’t forget, I’m a fourth degree realm practitioner and you’re just at the first degree realm! I have with me plenty of protection aces from my daddy. If you dare to do anything to me..... you will come to no good end too.....”

“Ace? You won’t have any chance to use it!” Huang Yueli coldly taunted.
