

Weaponsmith 981

Chapter 981: Refine on the spot (3)

Those Armament Masters present were all stunned, not daring to believe in what they had just seen.

“Heavens, it’s really possible, it really only needed three steps! How is that possible? How did she do it?”

“This new method is simply unheard of! If I hadn’t seen it with my own eyes, I’d never believe it at all!”

“Three steps, it really only needed three steps! So what Bai Ruoli said was really true, the people who were wrong.... Are us! This.... what should we do now, I really have no face to see anyone!”

The Armament Masters looked at each other with their red faces, feeling extremely ashamed!

This was simply a hard slap across their faces! Earlier those Armament Masters who claimed that Huang Yueli’s answer was absolutely wrong could not accept this result! Even when Huang Yueli suggested that she could refine on the spot to verify her answer was correct, they had deemed her as an abnormality, ridiculing her with various words.

But how about now? The truth had proved itself that what Huang Yueli said was absolutely correct. When she said these Armament Masters “had not seen the worth”, it was absolutely correct!

Everyone was embarrassed but couldn’t bear to move their gazes away as all of them opened their eyes wide, staring at Huang Yueli without blinking, worried that they would miss a single action that she made!

This new method which they had never seen before was definitely high levelled and looking at the speed which Huang Yueli moved to remove the impurities, the effect was much, much higher than how they usually did by several times!

This unique method would not be shared by most people usually but now in order to prove herself, Huang Yueli actually displayed her skills on the spot. This once-in-a-lifetime opportunity made everyone held their breaths as they wanted to master this unique skill!

Even if they didn’t manage to learn it on the spot, at least they should gain some knowledge out of this right?

However, the truth made them hugely disappointed!

A bunch of Armament Masters opened their eyes so wide that it was almost popping out but only managed to see the vague traces of Huang Yueli’s fingers moving in mid-air....

“What the, what situation is this? Why am I unable to see clearly?”

“I didn’t managed to see clearly too! The speed of her hands are simply too fast! I’m totally unable to differentiate which hand gestures she used!”

“That’s right, it’s simply too fast! How could she possibly be so fast! I’ve already tried my hardest usually but the speed of my hand gestures could only hit less than one third of her speed! Moreover, she’s so precise and yet she’s not even making a single mistake!”

Armament Masters, in the process of displaying their hand gestures continually, must not make any mistake at all because in the hundreds of hands gestures, as long as one hand gesture was wrong, the entire refining process would be halted in the process! To the numerous Profound Weapons, as long as the refining process was halted, the final product would have an obvious blemish and it might even lead to exploding on the spot!

But now, within the armament furnace, the impurities in that large piece of Scarlet Thunder Steel were being removed at a speed which the naked eye could see, without any signs of slowing down!

This also meant that there wasn’t a single mistake in Huang Yueli’s hand gestures!

Under such a fast paced display, there was no mistake at all! Just based on the skill and control alone, it was something which the Armament Masters there could not hope to achieve!

It was barely time for a pot of tea to brew before the Scarlet Thunder Steel’s impurities were all drawn out, leaving purely a vermilion cinnabar coloured liquid in the armament furnace.

Furthermore, it was indeed only three steps!

The speed of this was much faster by several times than the usual five steps to remove impurities!

Chapter 982: Refine on the spot (4)

Even though this was mainly due to Huang Yueli’s experienced operation, but it was undeniable that this method of removing impurities had an absolute advantage itself!

But what was disappointing was none of the Armament Masters present were unable to see her method clearly.

The crowd started to enquire around mutually.

“Did you see clearly the method which Miss Bai displayed earlier?”

“I didn’t. How about you?”

“I didn’t too!”

“Don’t lie to me! You really didn’t see it clearly? This is not a time to be selfish, as long as you have seen one hand gesture clearly, just share with everyone. If we all shared what we saw, then perhaps we might even made up an entire set of method! At least we can ascertain it mutually!”

“Do you think I’m silly? Think I don’t understand this logic? But she’s simply too fast and I really didn’t see it clearly! Don’t tell me you’ve at least seen one hand gesture?”

“This....I.... I also.....”

The Armament Masters looked at one another in dismay and at one point of time, they started to suspect if there was something wrong with their intellect, to think.... none of them was able to see through Huang Yueli's method at all??

Huang Yueli raised both her hands and said, "I've already displayed the three steps to remove the impurities in the Scarlet Thunder Steel. Next I shall now demonstrate the next question....."

"Wait a minute, Miss Bai, no Master Bai! The three steps which you had demonstrated earlier, we didn't managed to see it clearly so could you please demonstrate it once again? Please, please! Your method is simply too outstanding but it's simply too fast! Please can you demonstrate just one more time!"

One of the Armament Master was simply too anxious as he couldn't help but cried out loudly.

The crowd turned around and took a look and immediately recognised who it was. This Armament Master had a third tier badge pinned on his chest and he looked very young, at most only twenty plus years old.

"It's Master Lin Yan, the youngest and most talented third tier Armament Master in our Sky Cloud City, his future is said to be boundless!"

"Whatever most talented and youngest Armament Master, can you even compare them with Miss Bai? Miss Bai is only fourteen this year!"

"Of course you can't compare with Miss Bai! But this Miss Bai is simply too abnormal, completely defying logic! Lin Yan is at least a normal talent!"

"That's true, I've long heard that Lin Yan's character is rash and unable to hold his footing and seeing this today, it seems to be true! He actually jumped right out and asked Miss Bai to re-demonstrate one more time? What's wrong with him? This kind of exclusive method of refining armaments, who would even reveal it easily? If it wasn't for today's special occasion, she probably won't even demonstrate publicly?"

The crowd was totally speechless, feeling that Lin Yan was going to get into big trouble! At least he would be shamed by Huang Yueli, losing all his face!

Those Armament Masters there, who wouldn't want to take another look? But everyone knew the rules of the society and could tell that she wasn't willing so who would be so moronic to go up and look for a scolding?

Huang Yueli's hand movements halted for a moment as she raised her head up.

"You want me to re-demonstrate one more time?"

Her tone was peaceful, not showing any emotions.

But the crowd had already injected their own guesses and were sweating for Lin Yan.

Unfortunately Lin Yan himself didn't noticed anything amiss and couldn't stop himself from continuing, "That's right Master Bai. Your method is something which I had never seen in my entire life! Even President Hu in our Armament Guild don't have such outstanding methods like yours! I beg you to teach me please! No matter what conditions you ask for, I agree to it all!"

Chapter 983: Cannot help but be convinced ! (1)

Cold sweat kept forming on the Armament Masters' foreheads who crowded around.

This Lin Yan was really a blockhead! President Hu was seated up in the VIP seating! How dare he actually say President Hu's methods weren't good enough? Had he even realised that he had unknowingly offended someone...

When Huang Yueli heard what he said, she however expressed slight interest as her gaze shifted from his youthful face to the badge pinned in front of his chest.

So young and he's already a third tier Armament Master.... his innate talent was really not bad....

Huang Yueli instantly made up some plans as she smiled, "This Master here, you seem to have some interest in my method and I'm very glad to have some interaction with everyone here so there's no need to ask for it! In fact, since I've already started up my furnace for refining, it is because I want to show everyone the way I refine armaments and have no intention of keeping it to myself! Moreover, I've already slowed down the variations of my hand gestures so are you telling me that you have not seen it clearly?"

"Ah? What?"

"Am I hearing things wrongly? How can there be such a thing?"

"That's weird, earlier I had thought it was very strange, what kind of route is she taking when she's opening the lid to refine Profound Armaments? It would result in an obvious drop in the temperature, lowering the overall success rate! I had thought it was some exclusive method, so.... she only wanted to show us the actual situation that was happening in the furnace?"

"But, this isn't.... isn't logical at all is it? Earlier her speed was so fast! Could she have even slowed down?? Then if she resumes her normal speed, what kind of speed will that be? Could she be exaggerating??"

"Exaggerating?? Is there a need for her to exaggerate? No matter what, her method of refining Armaments is shocking!"

Bursts of shocking peals could be heard from the Armament Masters' seating area as everyone could not believe their ears!

Huang Yueli's previous performance had exceeded everyone's imagination and in the end, she actually claimed that for the sake of demonstrating clearly, she had already slowed down her pace!

Furthermore, Lin Yan had made such a disgraceful request for her to re-demonstrate her method once again and she wasn't angry at all?

Lin Yan could tell that she was friendly and spoke without any qualms.

“Master Bai, have you really slowed down your pace earlier? But from how I see it, the speed of your hands is still very fast! We weren’t able to see clearly what you did when you were refining nor how you were able to not make any mistake at all while displaying it out one by one?”

Huang Yueli replied, “Since you have not seen clearly, how about this, I shall re-demonstrate again the process on how I draw out the impurities and this time, I will slow down my pace even more.....”

Saying this, she seemed to recall something as she turned back and took a look before correcting herself, “Opps, no no, I totally forgot, we are now at the Armament Master certification assessment! Not the Armament Master’s Interaction Meet! If we were to discuss these now, it would seriously affect the progress of the certification assessment! There are still so many Armament apprentices waiting for the practical assessment! Forget about it, let’s wait for another day and end here first to stop wasting everyone’s time.....”

Saying that, she started to keep her armament furnace.

The minute those Armament Masters heard that she was going to re-demonstrate once again and even slow down her pace, they were filled with anticipation as they opened their eyes wide, prepared to take a careful look this time round!

In the end, they had just gotten excited when Huang Yueli actually said to change to another day!

The Armament Masters were extremely disappointed!

Under Huang Yueli’s virtuosic performance, everyone’s attention were all gathered on her method of refining Profound Armaments.

Chapter 984: Cannot help but be convinced ! (2)

Everyone had long forgotten the reason why they were here today!

If it wasn’t for Huang Yueli’s reminder, no one would have recalled why they were here for or that today was the day of the Armament Master certification assessment!

This originally was one of the more important activities for the Armament Guild otherwise both the President and Vice-President would not attend at the same time. But because of Huang Yueli’s interference, everyone had totally forgotten about what they were supposed to do!

Although now the Armament Masters came to realise this, but none of them cared about the Armament Master’s assessment!

What’s the point in looking at these immature and inexperienced armament apprentices?? Was it even comparable to Huang Yueli displaying her exclusive method?? Such a rare opportunity, when would be the next time they were able to experience it? The certification assessment was a yearly affair so surely there was nothing wrong with deferring it slightly!

It wasn’t just one or two who had this sort of thinking. With Lin Dan as a head start, everyone could tell that Huang Yueli was rather easy going and started to make their earnest requests.

“Master Bai, please ignore that certification assessment! Based on your ability, surely you don’t need to worry that you will not be able to obtain the Armament Master’s badge?”

“Isn’t that so! We should directly credit Master Bai with a fourth tier... no, fifth tier badge!”

“Master Bai, please do us some good and re-demonstrate your method again! That doesn’t need too much time anyway! As for the certification assessment, we can talk about that later on. If not, we can always delay till tomorrow to continue with the assessment!”

“That’s right, I support that with both my hands and feet raised up! Tomorrow we can continue with the assessment, no big deal about it!”

Huang Yueli looked like she was put in a difficult position, “This... everyone please don’t be so anxious. It’s not like I’d renege on it! Next time I’ll definitely find an opportunity to demonstrate for everyone! But today is indeed very important. The Armament Guild’s President and our academy’s Principal are all present so I cannot just make the decision on my own...”

“Miss Bai, please don’t have so much misgivings. Since everyone would like to see the method of your demonstration, then please do so once again! In fact, even I was not able to see your method clearly earlier as your speed is really exceptionally extraordinary! I would also like to see it once again!”

President Hu was laughing out loud as he got down from the VIP seating area and came all the way to Huang Yueli.

Huang Yueli actually had some impression of President Hu. He had assumed responsibility as President of the Armament Guild’s branch in Sky Cloud City for twenty over years and Huang Yueli had once met him in her previous life. Her impression of him wasn’t too bad at all.

Although this old man’s technique was not worth mentioning as compared to Huang Yueli but his character was magnanimous and was never jealous of those who were better than him and he also protected the capable ones and under his care, he had nurtured several young and talented Armament Masters, sending them to Soaring Heavens Continent’s Armament Guild Headquarters. He was one of the ministers who had contributed outstanding service to the Armament Guild.

On seeing that he came over personally, Huang Yueli smiled as she replied, “Since President Hu has agreed, then I shall not reject any further!”

President Hu had seen her from afar at the VIP seating and already felt that she was exceptionally beautiful and had outstanding etiquette. Although her features looked young and inexperienced, but she was already displaying a graceful demeanour!

Now that he observed her from up close, he felt more so that she had an indescribable presence. Just standing there alone made her shine as all the others had all turned dull in the background!

President Hu fiddled with his heart as he gave a knowing smile.

As though he suddenly understood something, like why that aloof and remote, yet exceptionally outstanding and talented Young Sect Master Li of Celestial Light Sect would pamper this young lady with so much love, even abandoning the Sect Master’s daughter, insisting on getting engaged with her!

Chapter 985: Cannot help but be convinced ! (3)

With this outstanding lady in front of him, no matter how many rich young Misses with good backgrounds appeared, they probably had all turned into commonplace women!

Furthermore, she had such shocking talent in armament refining! And was said to have equally outstanding talent in cultivation....

President Hu set his mind to cajole Huang Yueli because this kind of talent wasn't simply found anywhere!

He smiled as he said, "Miss Bai please be assured that I am not one who uses my authority to oppress others. If you really don't want to reveal your exclusive method and not willing to demonstrate here, then you can absolutely reject this. After all, the exchange of the art of armament refining must come from a willing party."

Huang Yueli smiled slightly as she said, "President Hu, don't worry. I wasn't prepared to hide my skills and since everyone had so much interest, it is also my honour so might as well allow me to impart my method to everyone!"

What she said wasn't a lie. In actual fact, before she even started to demonstrate publicly, she had already made preparations that her skills would be secretly learnt by some so she intentionally opened the furnace lid and slowed down her pace with the intention of demonstrating once clearly.

In this way, not only could it cajole the Armament Masters present, it would also win her some reputation in the Armament Guild.

Anyway, no matter if it was the skill of removing the impurities in the Scarlet Thunder Steel or the elven hand gestures of fusing the metal attributes, this was merely a commonly used low levelled skill often used by first or second tier Armament Masters. To her, it was just an extremely, extremely low-end technique only and there wasn't any need to hide this from everyone!

Giving up a small price like this could win the entire Sky Cloud City's Armament Guild's favour was a worthwhile deal. In future she would definitely have more needs which required the aid of the Armament Guild.

In President Hu's ears, this news made him feel both delighted and excited as the evaluation he gave towards Huang Yueli had increased by a huge notch!

Many Armament Masters valued their own methods of refining armaments as everyone valued the broom as their own. Even among Masters, sometimes they might not even give up everything they know to their disciples! After all, everyone depended on their own skill for a living. The sort of matter whereby the Master had learnt the skill, the disciple would probably had starved to death, happened frequently!

But now, a talented Armament Master like Huang Yueli actually appeared!

Not only was her talent shocking and her age young, she was even so generous and selfless! This character... was simply nothing to pick on! How in heavens could there be such a perfect young girl! He had really picked up a treasure this round!

President Hu was so happy that he could not stop smiling ear to ear, “Good, good, then we’ll have to trouble Miss Bai! Rest assured that I won’t let you waste your effort! According to the Armament Guild’s regulations, those who leave behind an exclusive Profound Armament method or prescription will be able to obtain ten thousand of contribution points as a reward! I have recorded this down under your name!”

“Wa, ten thousand contribution points! I’m a second tier Armament Master now and have been around in the guild for many years but have not been able to gain ten thousand contribution points yet!”

“Isn’t that so? Bai Ruoli have not even gotten the Armament Master’s badge and had already gained so much contribution points!”

“I feel that it’s too little! Master Bai is so selfless and so generous so giving twenty thousand contribution points is just about right!”

The Armament Masters were exclaiming out one by one but no one raised any objections.

Even though some were mentally imbalanced but did not dare to voice out. Everyone else were waiting for Huang Yueli to re-demonstrate so if they were to voice their objections, wouldn’t that caused public outrage!

President Hu sent people to get another large piece of Scarlet Thunder Steel from the storage and passed it over to Huang Yueli.

Huang Yueli’s fingers moved and lit up her deviant flame once again.

Chapter 986: Cannot help but be convinced (4)

Whoever knew that her finger had just moved slightly when she heard a bustle of movement.

Those Armament Masters seated in the far end had all stood up and ran over, surrounding the stage.

At this moment, they had all forgotten their “valuable identity” which they were so proud of, only thinking of watching closely, not omitting a single step!

“What the, who stepped on me earlier? Don’t you understand the meaning of first come first serve? How dare you play low?”

“Give way, give way, why is your head so big? My vision have all been blocked by you!”

“Those in the first row, squat down, squat down, I say! Don’t affect others from viewing Master Bai’s demonstration!”

The crowd were all fighting to get the position for the best view and a few of them almost started to quarrel. Later on under the guidance of Master Hu, they all managed to find a position as all of them kept their eyes peeled and affixed on Huang Yueli in anticipation to see her moves.

Huang Yueli suddenly coughed slightly as she said, “This time, I will slow down my pace to the minimum and if you still can’t see clearly, I can’t do anything about it! Because if I slow down any further, the materials in the armament furnace would have overstayed its duration and the quality would have a

serious impact! So in future if you really want to learn this three steps method of removing impurities, then the speed of your hand gestures would have to be equally this fast!”

Saying that, the Amethyst Thunder Flame flew out from her fingertips.

Huang Yueli kept to the routine of lighting up the deviant flame and after the furnace was heated up, she put in the Scarlet Thunder Steel into the furnace.

This round, her speed had decreased once again and moreover, her explanation was much more detailed.

“Will everyone look carefully now. When you are placing the Scarlet Thunder Steel, you must take note of the furnace’s temperature. As I used a deviant flame to heat up the furnace, so even if I opened the lid, it would still maintain an amount of temperature but if you’re refining it on your own and if you were using an ordinary flame, then you must remember to never open the lid.....”

As Huang Yueli was explaining, she proficiently displayed her hand gestures.

Even though she had intentionally slowed down, but there were not many who could keep up with her pace. There were even some who took out their note scrolls and writing brushes as they speedily recorded down the information.

Li Moying was seated in the VIP seat and his gaze was totally affixed onto Huang Yueli.

Her slender fingers waved around in mid-air, perfecting drawing out graceful angles as though she was dancing.

Li Moying used his hand to prop up his chin as his lips curled upwards and thought in his heart that his little fox was simply too beautiful. Especially when she was revealing her overbearing look now, there was an indescribable charm which made people fell for her uncontrollably.

Seeing so many Armament Masters crowding around her holding her as though she was a star, Li Moying felt honoured but at the same time, he felt that it was something natural.

He always knew that his little fox was incredible! No one was comparable to her! Whereas he... had absolute confidence in her always!

Among the Armament Masters who crowded around, President Hu was seated nearest to Huang Yueli.

His insight exceeded others by several times and during Huang Yueli’s previous demonstration, he had already understood most of the hand gestures and developed his own understanding towards this set of method.

So this time his concentration wasn’t on the method of armament refining. More than that, it was to observe Huang Yueli.

The more President Hu observed, the more he felt that this elegant and pure young lass was simply unfathomable!

Under the situation where there were so many Armament Masters looking at her, she wasn’t affected one bit!

Chapter 987: Cannot help but be convinced (5)

Most Armament Masters all liked to hide alone in the Armament Refining room.

By doing that, they would not reveal the exclusive method which they used to refine armaments. Another reason was because the process of refining was easily disturbed by outsiders as it only needs a little movement to distract the Armament Master's attention, thereby causing the armament refining to fail.

But now, Huang Yueli was surrounded by many Armament Masters while refining the Profound Armament and furthermore, each pair of eyes were fixated on her every single move. Not forgetting there were so many other ordinary students around who opened their eyes wide, hoping to catch a glimpse of what made her so extraordinary!

It was thinkable how tremendous the pressure was standing on Huang Yueli's position, who was now the focus of attention!

Even President Hu himself didn't dare to guarantee that under the same circumstances, he would be able to maintain his usual steady and collected self.

But Huang Yueli just stood there, totally calm from the start.

Every single hand gesture she made was precise and her speed wasn't too fast nor too slow. It allowed everyone to see it clearly but yet not affecting the entire refining process.

Not only that, during her demonstration, she multitasked and patiently explained each step without a single bit of frenetic!

Some of the Armament Masters who crowded around couldn't hold themselves back and raised some questions and yet she was able to answer it one by one.

Moreover, no matter what questions they raised, she had never been stuck in a scenario whereby she answered incorrectly or was stumped by any question!

Thinking about this again, many low tiered Armament Masters, when they were refining Armament, if there were any slight noises nearby, it would lead to an immediate explosion! Just comparing this alone meant that not only did Huang Yueli had exceptional skills, it also showed that her psychological state of heart was also top rated!

Just how old was this young lass to be able to hold such a fort!

How would President Hu ever know that this situation, to Huang Yueli, was really chicken feet only.

In her previous life, she was often invited by Soaring Heavens Continent's Armament Guild Headquarters to conduct lectures for the other Armament Masters.

At that time, the audience she dealt with were mostly seventh or eighth tiered Armament Grandmasters. In front of them, she was able to remain calm and composed while conducting her

lecture so towards those Armament Masters who were third tier and below was no pressure to her at all.

Not long after, Huang Yueli had once again completed the process of drawing out the impurities.

“Alright, now the impurities in the Scarlet Thunder Steel have all been completely drawn out so this part of demonstration is not completed. Master Tang, don’t forget to add in my marks for me!” She was grinning as she said that.

Tang Jinhua had already gone into a daze and didn’t expect Huang Yueli to suddenly talk to him as he suddenly went into a blank, “Huh? Add marks? what marks?”

“It’s my theory assessment paper! Now I’ve already proven that my own answer is correct right!”

“Ughh, right, the theory paper!” Tang Jinhua wiped the sweat off his forehead as he finally recalled what happened and hurriedly cried out, “Master Bai, your standard doesn’t need us to say anything more. Earlier the few of us had shallow knowledge and experience and had made a wrong judgement so please don’t take it to heart!”

He finally could tell that Huang Yueli was still so young but yet had outstanding armament refining methods. Just from looking her calm and leisure way while refining armaments, don’t say just first tier Armament Master, she probably had the standard of second or even third tier standard!

And the Master who taught her the skills of armament refining was definitely an Armament Grandmaster who was much stronger than President Hu and probably was someone of status from Soaring Heavens Continents!

Huang Yueli’s background was so strong and he couldn’t afford to offend her!

Actually, Tang Jinhua self-professed that his attitude towards Huang Yueli wasn’t that bad at all.

Chapter 988: Cannot help but be convinced (6)

!

But.....

Previously when Huang Yueli was at the Profound Weapon Chambers to choose her Profound Armaments, Tang Jinhua had saw the outstanding innate talent in refining armaments in her and had suggested to take her in as his disciple! Huang Yueli was not willing and he repeatedly advised her, wanting to be her Master.

Recalling that now simply made Tang Jinhua ashamed and unable to show his face!

Just based on Huang Yueli’s current expert skills that she had showed, did she even need him to teach her? What could he teach her? No wonder Huang Yueli had refused to accept him as her Master previously!

She already had an incomparably strong Master whereas he was just a fourth tier Armament Master, totally not on the same level.....

Just thinking about that was enough to make Tang Jinhua felt that he had totally lost face! He was also terrified that Huang Yueli would be laughing at him behind his back, that he had over-estimated himself!

But his worries were unnecessary.

Huang Yueli didn't think too much and just laughed instead, "Master Tang, you're too modest! I have yet to even obtain a first tier Armament Master's badge so how could I be called a Master? Since the misunderstanding had been cleared up, just make up for my points will do."

Saying that, Huang Yueli adjusted the flame a little higher and said, "Following this, let's move on to the next question....."

"Wait a minute, Master Bai, can you please re-demonstrate once more!"

"Right, I haven't been able to copy everything down earlier and was just focused on watching your demonstration! Your hand gestures are simply too accurate, just how much time did you spend on mastering it?"

"I didn't managed to see the third last hand gesture clearly!"

The minute they heard that she was going to jump to the next question, the Armament Masters below the stage started bellowing, as though not resigned to fate that this demonstration had just ended like that!

Seeing Huang Yueli refine armaments was simply a kind of enjoyment. When others refined Profound Armaments, they sweated profusely and looked battered and exhausted. But she seemed to be painting, sketching in light shades unhurriedly causing those present to go into a daze which also made them lose focus on those important parts.

When President Hu saw the current situation, he coughed lightly, "Alright, she had already demonstrated twice! How many more times are you all expecting? Surely you cannot expect her to demonstrate eight or ten times right? It's obviously your own fault for not paying attention! Alright, we shall stop this here right now!"

Noticing that some of them were still un-resigned, Huang Yueli laughed as she said, "The next demonstration is something that you have never seen before. That is the eleven types of hand gestures for fusion of metals! Following this, I will also add in the White Moon Iron into the armament furnace and simultaneously complete both drawing out the impurities and fusion process so everyone please look carefully! If you didn't see it clearly the first time, I will not re-demonstrate a second time.... So I hope when everyone is watching, please remain completely silent!"

This was something which was of interest to the Armament Masters too.

Hearing that, the Armament Masters stopped protesting and flew around Huang Yueli's side as they crowded around her, every single one of them showing their nimbleness.

What kind of joke was that. Earlier they already didn't see clearly so if they were not able to see clearly once again, then they would have made a huge loss!

Huang Yueli's right hand wove and threw a large piece of White Moon Iron into the armament furnace.

Following that, the furnace chamber kept sprouting white smoke and her gestures changed, starting to demonstrate.

Armament Masters were all concentrated as complete silence filled the entire place.

President Hu saw this and couldn't help but sigh with emotion within his heart.

All of these Armament Masters were usually proud and arrogant and sometimes even his words weren't all that useful. In the end, just one sentence from Huang Yueli made everyone shut their mouths right up, not even daring to breathe loudly!

Chapter 989: Li Xue'er who's filled with hatred and envy (1)

This probably.... was the strong's exclusive power to rally supporters!

After Huang Yueli had demonstrated all the eleven hand gestures, she didn't forget to remind them.

"After everyone goes back, you can try to familiarise yourself through practice. But I must remind you all that these four new types of fusion hand gestures will require the minimum intensity of a sixth tier Armament Master's mental power before you can use it! Otherwise it might result in dire consequences. Light consequence would result in the explosion of the armament furnace and if the Armament Master's tier is too low, it might result in backlash causing internal injury."

When she said this, many Armament Master's faces revealed a look of disapproval.

Because the words that Huang Yueli had said.... was simply too outrageous!

She herself was only fourteen years old and hadn't she just used these few hand gestures? They hadn't seen her feeling uncomfortable or any inadaptability? She probably exaggerated just a little too much!

No one believed that Huang Yueli had the mental power of a sixth tier Armament Master!

When Huang Yueli saw their disapproving looks, she didn't make any further explanations. She had already reminded them to her extreme benevolence and utmost duty so if anyone didn't believe her words and insisted on stepping up the path to doom, then she couldn't stop them at all.

She kept her Amethyst Thunder Flame, patted the dust off her hands and turned to look at President Hu.

"President Hu, I've already demonstrated these two questions and for the next few questions, if you have any objections, do you still need me to demonstrate?"

President Hu hurriedly replied, "None at all! Miss Bai, your foresight is indeed extraordinary and I admit that we cannot match up so this theory test, we'll pass you with full marks!"

Huang Yueli blinked, "Is that alright? I had skipped out on several steps in my last question! I should only get as ninety five points!"

"How would that do? One hundred points, it must be one hundred points!"

“Master Bai has such high standard in armament refining, she should directly pass the certification assessment!”

“That’s right, full marks is well awarded and all of us pass this unanimously!”

These arrogant Armament Masters had completely become Huang Yueli’s fanboys and this was the first time the Armament Guild’s inner department had agreed unanimously on the same thing!

Actually there were several few people who wanted Huang Yueli to continue demonstrating some other armament refining skills but President Hu thought that the day was no longer young so he stood out to stop this.

“Alright, the interaction of armament refining skills can wait till some time later. Today is the day of Armament Masters certification and let’s not delay the actual thing any further! Now, will all those apprentices who had passed the first round of assessment please get up on stage as we will immediately proceed with the second round of practical assessment! Will Master Tang please continue to preside over the assessment and announce the method of the assessment.....”

President Hu returned to the VIP seating area and gave up the space to Master Tang.

Huang Yueli kept her Armament furnace and stood on one side.

The other Armament Masters realised that she really wasn’t planning on continuing with the demonstration and each and every one of them returned dejectedly back to their own seats.

But their attention was still fixed on Huang Yueli.

Because in the next round of practical assessment, Huang Yueli was still going to continue to take part in it. During the assessment, she would refine a complete piece of Profound Armament on the spot!

Everyone had a feeling that this should be something worth seeing.

The students who had passed the theory assessment all proceeded up on stage and lined up into one straight line according to the marks which they had attained.

Huang Yueli, of course, stood at the front of the line.

Following right behind her was a pale faced Li Xue’er.

Li Xue’er was originally standing beside Tang Jinhua waiting to see Huang Yueli being chased out of the main door of the Profound Weapon Chambers!

In the end, the scenario which she had imagined did not happened at all.

Chapter 990: Li Xue’er who’s filled with hatred and envy (2)

Not only had Huang Yueli not been embarrassed, she really used only three steps to remove all the impurities from the Scarlet Thunder Steel and her speed was much faster than any ordinary Armament Masters by several times!

For a moment there, Li Xue'er had thought that her brain wasn't functioning too well and had developed hallucination!

How could that wretched lass possibly refine armaments? How could such a ridiculous thing happen?? She had never once heard that Huang Yueli had formally become an apprentice to a master to learn armament refining skills!

Moreover, not only was she able to refine armaments, those with eyes could tell that Huang Yueli's armament refining standard had clearly surpassed ordinary first and second tier Armament Masters!

Just as Li Xue'er was in a daze, a shocking matter occurred!

Those Armament Masters who usually held their noses up high in the air actually surrounded the stage just to see Huang Yueli's demonstrations.

Everyone's overly agitated and overly imperative while Li Xue'er was still in a daze so she was pushed to one side by those people and fell heavily onto the ground, even twisting her ankle!

Li Xue'er was in so much pain that her face contorted but at this moment, no one noticed her at all.

Even Tang Jinhua who treated her the best usually had not given her one loo, or even realised that his own disciple was missing!

All he thought of was to learn those new skills from Huang Yueli's demonstrations!

Li Xue'er was both in pain and infuriated that she almost spat out a mouthful of blood!

This originally was her most glamorous and conspicuous day and everyone should be pamper her Li Xue'er!

But now, all her glamour had been snatched by Huang Yueli! Whereas she became an invisible person whom no one gave a damn about!

What made her filled with both hatred and envy was that Huang Yueli actually had such a strong standard of armament refining. Not only had she subdued those low levelled Armament Masters, even her own Master Tang Jinhua treated Huang Yueli with respect and courtesy, even greeting her as "Master Bai"!

That wretched lass was actually a Master?? What Master! She obviously wasn't even a first tier Armament Master!

However, no matter how jealous Li Xue'er was, it did not affect Haung Yueli one bit. Everyone surrounded her and even President Hu came over personally to encourage her. These scenes played on and on in front of Li Xue'er and she clenched her fists hard, her nails pressing into her palms but yet she could not suppress the jealousy and hatred within her heart!

If it wasn't for the fact that Li Xue'er had still remembered that today was the Armament Master's certification assessment, she probably could not take this pressure any further and would have left the Profound Weapon Chambers in fury.

With great difficulty after a long time, Huang Yueli's demonstration had finally all came to an end.

Tang Jinhua finally announced the start of the Armament Master certification assessment.

Li Xue'er used all her might to calm herself down, to remain stable... the Armament Master certification was only held once a year and if she had ran off because of the anger that Huang Yueli caused or if she didn't managed herself well, then it would be her loss.....

So she had to endure!

But the minute she walked to the contender's seating area and saw Huang Yueli seated on the seat above her, jealousy once again filled her heart as it started to soar.

"Bai Ruoli, you've really hidden yourself well! How come I don't know about you learning armament refining at all? Usually you acted so well was just to trick me intentionally! She is simply a scheming wretched lass!"

Huang Yueli heard what she said and turned around, throwing her an indifferent glance, "Li Xue'er, your jealous look really look terrible! Whether I have hidden myself well or not, it seems to have nothing to do with you at all, so just be concerned about yourself!"
