

## The Wife I Picked Up Is Too Chapter Chapter 757

Chapter 757: Troublemaker Hacker Army

At the same time, Xu Mingqian's voice sounded from the phone. "That person is right. The network of the Xie Corporation's financial center is being attacked by several hackers."

Feng Qing came back to her senses and said, "Do you know who these hackers are?"

On the other end of the phone, Xu Mingqian was leaning against the head of the bed, his hands typing non-stop on the keyboard. "To be precise, the other party is a hacker organization called the Troublemaker Hacker Army."

Feng Qing raised her eyebrows. "Troublemaker Hacker Army?"

Xu Mingqian nodded. "That's right, it's them. About a week ago, the Troublemaker Hacker Army released words on the Internet that they wanted to hack into the network system of the Xie Corporation's financial center and obtain some core secrets of the Xie Corporation."

Feng Qing was not surprised when she heard this. Ever since computers started to become popular, there were all sorts of hackers domestically and abroad who wanted to hack into the Xie Corporation's computer system. When Old Master Xie was in charge of the Xie Corporation, he had been cheated by hackers many times. It was only after Xie Jiuhan took control that the matter of the Xie Corporation being hacked gradually disappeared. Later on, the number of people who hacked into the Xie Corporation's network decreased because the difficulty was too high.

Xu Mingqian said, "Actually, I didn't expect that the Troublemaker Hacker Army would really succeed this time. I'm tracking them now. They've already successfully hacked all the computers on the 38th floor of the Xie Corporation's financial center. Moreover, there's a steady stream of hackers joining the invasion army. From the looks of it, they have the intention of hacking deeper."

The corners of Feng Qing's mouth curled up as she listened to Xu Mingqian's words. She had heard of the Troublemaker Hacker Army before. It seemed to be a hacker organization from the Seven Stars Continent.

According to the intelligence, the Troublemaker Hacker Army was once the strongest hacker organization in the Seven Stars Continent and also the strongest hacker organization in the world. Later on, for some reason, they lost their leader and became a group of headless flies. However, recently, this hacker organization seemed to have gathered again and attacked the Xie Corporation's network.

Feng Qing's ears twitched as she realized that someone was approaching her. Hence, she turned around and saw Liu Yan holding his phone in one hand. "The matter of the Xie Corporation's financial center being attacked by hackers has just become a trending topic. Look."

Before Feng Qing could speak, the elevator door opened and Xie Jiuhan walked out of the elevator with a dark expression. His entire body exuded a cold aura. The people on the 38th floor looked at Xie Jiuhan, who was like an ice mountain, in confusion. This man was actually here again...

The man's expression was cold. Compared to before, his face was covered in a layer of frost and a serious aura. He and Feng Qing only looked at each other and already understood each other's intentions. He gave Feng Qing a reassuring look, everything was under his control.

Xie Jiuhan walked into an empty workstation and restarted the computer. Then, he connected a hard drive to the computer. Then, his ten slender fingers started to dance on the keyboard.

At this moment, Xu Mingqian's voice sounded from the other end of the phone. "The Troublemaker Hacker Army has successfully hacked into all the computers on the 38th floor of the Xie Corporation. Although the process is very smooth and unstoppable, in my opinion, there's not much point in them doing this. After all, the Xie Corporation has yet to counterattack."

As Feng Qing listened to Xu Mingqian's words, she watched Xie Jiuhan skillfully type on the keyboard. She suddenly remembered that Xu Mingqian had once said that even he could not crack the Tian Sha's Shield on the phone.

Feng Qing asked, "Brother Mingqian, when I asked you to help me modify my phone last time, you said that the Tian Sha's Shield on my phone couldn't be cracked, right?"

Xu Mingqian nodded. "That's right. That's the Tian Sha's Shield. It's the strongest and most perfect defense system in the world. Don't worry, your phone is protected by the Tian Sha's Shield. It will definitely not be hacked by anyone unless the King of Hackers, Tian Sha, comes personally."

As the two of them spoke, all the employees in the office on the 38th floor gathered behind Xie Jiuhan to watch. Everyone was curious about what this iceberg-like man was doing. Xie Jiuhan did not have the time to pay attention to the crowd. His eyes were fixed on the screen, and he was extremely focused. However, he still looked elegant.

Suddenly, a red code appeared on the computer screen. Everyone in the Xie Corporation's Internet Security Center carried their laptops over. One of the people who looked like a supervisor said, "Ninth Master, have you already started chasing them?"
