

The Wife I Picked Up Is Too Chapter Chapter 842

Chapter 842: Black Peony

Just as he was feeling good in his heart, the white mouse that had been injected with the poison suddenly became agitated. The white mouse actually broke free from Xie Ba's hand with an unknown strength. This kind of white mouse was not an ordinary white mouse, but a huge white mouse. It was half the size of a basketball. The white mouse landed on the operating table and pounced on Feng Qing.

All of this happened too quickly, so fast that Xie Ba did not have time to react at all. Looking at the white mouse that was baring its fangs and brandishing its claws as it pounced on Feng Qing's face, Xie Ba exclaimed in his heart. He had wanted to scare Feng Qing, but he had never thought that he would really hurt Feng Qing. If Feng Qing was really bitten by this white mouse with the special poison strain, he would be in big trouble.

At the moment of danger, Feng Qing's hair stood on end uncontrollably. At this moment, a figure blocked in front of Feng Qing at lightning speed and punched out, sending the huge white mouse flying.

With the crisis resolved, everyone heaved a sigh of relief. However, coincidentally, the white mouse that was sent flying by Little Wu actually knocked over a transparent glass box containing scorpions, centipedes, and various other creatures. Instantly, all sorts of terrifying and sinister creatures fell to the ground. Not to mention ordinary people, even Xie Ba, who did experiments every day, felt his hair stand on end.

Xie Si raised his eyebrows. "Not good, these are all experimental subjects infected with special poison. We can't let them escape from here. Otherwise, once they bite the people on the Sacred Island, the consequences will be unimaginable!"

At the same time, Little Wu turned around and picked up the person behind her. “Young Madam, I’ll bring you away from...”

Halfway through her sentence, Little Wu’s voice stopped abruptly because she realized that the person in her arms wasn’t Feng Qing but Xie Shihao, who looked like he deserved a beating. Little Wu was stunned. She clearly remembered that Feng Qing was standing behind her just now. Why did it become Xie Shihao?

Xie Shihao looked at Little Wu and smiled awkwardly. “Um... If it’s convenient for you, can you carry me out?”

Little Wu : “...”

Ignoring Xie Shihao, Little Wu turned to look elsewhere. She was searching for Feng Qing’s figure, but she realized that Feng Qing was standing not far away. Moreover, dozens of poisonous scorpions and snakes had already crawled towards Feng Qing. In Little Wu’s eyes, Feng Qing was like a blooming flower that was crazily attracting bees.

Feng Qing frowned as she looked at the experimental creatures surrounding her. She really only had a few bags of powder to disperse the poisonous bugs and snakes, but Xie Si’s words just now made her change her mind. Not only could she not use those powder, but she also had to use the powder that could attract these poisonous creatures. She would gather them all together first and then catch them all in one fell swoop, in case these poisonous creatures went out to harm people on the island.

At the thought of this, Feng Qing flipped her wrist and a few black bottles appeared in her palm. This time, she threw the small bottle towards the snakes, insects, rats, and ants. The strength of her wrist was very strong. The black bottles hit the ground and instantly shattered. At the same time, a white powder exploded. As the white powder spread, it attracted more and more poisonous creatures to approach her.

Everyone present was an expert, so their eyes were naturally not bad. Xie Si and Xie Ba also recognized the small black bottle that Feng Qing had thrown out just now because the word 'Qingyi' was engraved on it. Feng Qing actually carried a poison developed by Mr. Qingyi of A Dark Organization on her. Moreover, they had seen this poison on the international black market before. A bottle could sell for tens of millions on the black market, and it was even priceless. Moreover, this poison had a very pleasant name—Black Peony.

Xie Ba and Xie Si saw very clearly that in just a breath's time, Feng Qing had thrown out more than twenty bottles of Black Peony. In other words, in just a few seconds, Feng Qing had burned two to three hundred million...

"Ring!" There was an accident in the laboratory, and the automatic alarm system was activated. Soon, a group of people rushed into the laboratory, but when they walked in, they saw Feng Qing clapping her hands and walking out of the circle drawn by the white powder. On the ground covered in the white powder, there was a round pit that was almost half a finger deep.

"What happened here just now? Why did you ring the alarm?" Xie San walked out of the crowd. He still didn't understand what was going on.

“Uh... Third Brother, it’s me...” Xie Ba came back to his senses and lowered his head to apologize to Xie San.
