

The Wife I Picked Up Is Too Chapter Chapter 843

Chapter 843: Xie Ruoyun

He had also realized that the situation just now was too dangerous. If not for the fact that Feng Qing had so many bottles of Black Peony on her, the consequences would have been unimaginable. Not to mention what would happen if these poisonous creatures escaped, just hurting Feng Qing would mean that he and Xie Si would lose their lives.

After hearing Xie Ba's report, Xie San wished he could twist Xie Ba's head off. He scolded angrily, "Bastard! I asked you and Xie Si to be Young Madam's guides because I wanted you to bring Young Madam to eat and play. You idiot actually brought Young Madam to such a place and almost caused trouble!"

The more he spoke, the angrier he became. Xie San couldn't take it anymore. He raised his arm and slapped Xie Ba's face a few times. After slapping him, he still wasn't satisfied. He raised his leg and kicked Xie Ba a few times. Xie Ba only stood there with his head lowered and was beaten. He didn't even dare to dodge.

After dealing with Xie Ba, Xie San turned to look at Feng Qing and said in shame, "Young Madam, I'm sorry. I didn't arrange it well and made you suffer a shock."

Just as Xie San was lecturing Xie Ba, Feng Qing walked to the operating table and flipped through the experimental notes on it. Then, she picked up a pen and wrote a few lines on it. She was not a fool and had long seen that Xie Ba and Xie Si had something against her, especially Xie Si. Although he was silent, his evaluation of herself might not be as good as Xie Ba.

Just as Feng Qing was about to say something, a woman's scream suddenly came from outside the laboratory. The owner of this voice was Xie Yuhuan. Everyone could hear very clearly that Xie Yuhuan was shouting in fear, accompanied by the sound of crazy stomping.

"Scorpion, scorpion!" Xie Yuhuan shouted loudly. Hearing that there were still poisonous creatures outside, Xie Ba, who had just been beaten up, immediately leaned towards Feng Qing. It wasn't that he wanted to protect Feng Qing, but he wanted to be under Feng Qing's protection.

Hearing that there was another poison creature, Xie San brought his men and rushed out of the laboratory. However, when they saw the scorpion that was confronting Xie Yuhuan, they couldn't help but heave a sigh of relief. This was because it wasn't the scorpion that had escaped from the laboratory, but a scorpion that lived normally in the natural environment outside. At that time, they could capture it and keep it for future experiments.

When Xie San ordered them to capture the scorpion, Xie Yuhuan was so scared that her soul left her body. Her legs went weak and she sat on the ground. Seeing her like this, Xie San was helpless. He got someone to carry Xie Yuhuan back to her place to rest on a stretcher.

After Xie Yuhuan left, the entire corridor instantly fell silent. The other laboratory door at the side was opened from the inside and Xie Ruoyun walked out. She was shocked when she saw the huge scene outside. She quickly found out what had happened from others and immediately smiled bitterly. It turned out that the poison that Feng Qing had destroyed just now was the result of her experiments for nearly three months. She had wanted to rely on these poison to make an academic conclusion and then rely on this academic thesis to apply to the Seven Stars Medical School in the Seven Stars Continent to continue her studies. However, in just a few minutes, all the experimental questions had turned into ashes, completely ruining her plans.

Xie Ruoyun walked to the operating table and checked if anything else was missing, especially the thick experimental notebook. It was filled with her research conclusions and results. At present, she was studying an extremely special virus, 'Pi'. This virus was discovered in the Seven Stars Continent. After preliminary analysis, this virus was very ancient, about a million years ago. Most importantly, this virus actually mutated not long after it was unearthed. This also meant that this virus, which could only be infectious among animals, already had the ability to infect people. So far, no one in the Seven Stars Continent or anywhere else in the world could crack this virus and successfully make the corresponding antibodies.

However, just as Xie Ruoyun was checking if the experimental notes were damaged, she arrived at the place that Feng Qing had changed. She was stunned for a moment before she realized that the experimental analysis method that had troubled her for a long time had actually been solved after it was changed. Looking at the completely solved analysis method, Xie Ruoyun was stunned. She had studied this experiment for a long time, but she had never found a perfect analysis method to express the virus sequence of the 'Pi' virus. But now, someone has actually helped her complete it!

Xie Ruoyun picked up her phone and frantically found a phone number. "Master, I, no, it's that Pi virus... The complete analysis is out."

On the other end of the phone, a strange voice sounded. "A complete analysis? How did you suddenly solve it?"
