

The Wife I Picked Up Is Too Chapter Chapter 925

“If you want to continue researching this kind of virus, the Capital Medical School is very suitable for you. The Seven Stars Continent is a very sealed environment. Once you enter there, it will be impossible for you to continue researching this topic. Moreover, the Seven Stars Continent Medical School is only very good at some difficult illnesses. As for a disease like Pi, the Capital Medical School is the best choice.” Feng Qing said these words very sincerely. In her eyes, the Seven Stars Continent Medical School and the Capital Medical School each had their own strengths. She couldn’t think highly of it just because it was in the Seven Stars Continent. Choosing a university was like finding a partner. She only chose the one that suited her the best.

However, after hearing Feng Qing’s words, although Xie Ruoyun’s face was expressionless, her eyes were filled with disdain and impatience. She couldn’t even listen to a word of Feng Qing’s words. In her heart, only the Seven Stars Continent Medical School was the highest school in the medical world, and she could only learn more and better knowledge there.

After rolling her eyes a few times, Xie Ruoyun said, “Young Madam, I heard that you’re a freshman at Capital University, right? I heard from Little Wu that you’re a specially recruited student who studies music?”

As soon as these words were out, the others in Laboratory Zero were stunned. They subconsciously raised their heads to look at Xie Ruoyun. Although Xie Ruoyun had no expression on her face when she said this, and her tone did not have the slightest hint of mockery, everyone could hear the other meaning in her words. Xie Ruoyun was obviously talking about Feng Qing. You’re just a music specially recruited student, yet you’re actually talking to me here. Are you worthy?

In the eyes of everyone, be it the so-called specially recruited music student or the sports student, students who went in through this method were basically people who did not study well. After all, they needed to pass their specializations to get into university. They did not have a solid cultural background or knowledge reserves.

Therefore, Xie Ruoyun's words were mocking Feng Qing for being uncultured. Her words also mean, what did a specially recruited student like you know? What right do you have to guide me?

Although Xie Ruoyun was naturally not Feng Qing's match in martial arts, she was still very confident in her cultural knowledge because she had been in contact with medicine since she was four years old. She might not have learned everything from ancient times to the present, but she had at least learned 'child's arts'. Wasn't Feng Qing showing off in front of an expert?

Xie Ruoyun was silently mocking Feng Qing, the First Madam of the Xie Corporation, it instantly attracted everyone's attention. The eyes of the people in the laboratory moved back and forth between Feng Qing and Xie Ruoyun. They all wanted to see how Feng Qing would react.

Feng Qing was naturally not a fool. Without waiting for Xie Ruoyun to finish speaking, she knew what she meant. Hence, her large beautiful eyes couldn't help but narrow. She still knew a little about Xie Ruoyun. She was called the Divine Doctor of the Sacred Island, the genius beauty of the Sacred Island. It was said that according to the international intelligence test, her IQ was as high as 230. At the age of 16, she started to publish medical papers on the world-renowned medical forum. Moreover, she maintained a high yield of ten articles every year and beat the students of the various famous universities in Xia country in the medical field. It was because she was very outstanding, better than most people that she had to squeeze her way through to the Seven Stars Continent to further her studies. Moreover, Xie Ruoyun had been researching the Pi virus for three years. Only by going to the Seven Stars Continent could her research on the Pi virus advance to the next level.

Seeing Feng Qing squint at her, Xie Ruoyun looked into her eyes without fear. In her opinion, Feng Qing's comments about the Pi virus just now were nothing more than a few more articles on the Internet. Just based on this, talking to her about the Pi virus made Xie Ruoyun feel amused.

The corners of Xie Ruoyun's mouth suddenly curled up, and she said with a smile, "Young Madam, you might not understand, but going to the Seven Stars Continent Medical School to further my studies is my only wish since I was young. If I can set foot in the Seven Stars Continent, I can learn the most advanced technology and cutting-edge knowledge. At that time, not only can I study the Pi virus, but I can also study those more mysterious and complicated viruses. To be honest, my plan to go to the Seven Stars Continent has failed because of the hostility between the Xie Corporation and the Xing family of the Seven Stars Continent. This makes me very depressed. I met Young Madam today because I want to beg you to negotiate with the head of the Xing family. At least, I don't want them to continue targeting our Xie Corporation. Of course, I'm not ordering Young Madam. If you think it's inappropriate, then pretend I didn't say anything."

With that, Xie Ruoyun took back her thesis manuscript from the chief. After tidying it up briefly, she handed the manuscript to Feng Qing.
