

The Wife I Picked Up Is Too Chapter Chapter 928

Hearing Feng Qing's indifferent words, Xie Ruoyun looked at the thesis manuscript in her hand and was completely dumbfounded on the spot. At this moment, the laboratory chief reached out and took the manuscript from Xie Ruoyun. Feng Qing's words just now made his heart skip a beat.

The chief quickly flipped through the thesis in his hand. His research on the Pi virus was not thorough, but in his eyes, Xie Ruoyun's thesis was still very good. When he flipped to the last page, the chief couldn't help but ask, "Young Madam, you just said that you solved the formula for the Pi virus sequence in the laboratory yesterday?"

Feng Qing nodded. "That's right. It's in the record book of the laboratory where the accident happened yesterday."

Without waiting for Feng Qing to finish, a laboratory staff with a fast reaction walked out. They were all impatient to see the formula Feng Qing had written. In the blink of an eye, only the chief, Xie Ruoyun, and Feng Qing were left in the entire laboratory. Looking at the door, the chief was also stirred. He also wanted to go over and take a look immediately.

However, before the chief supervisor could speak, he saw the first laboratory personnel who went out walk back. Feng Qing and the other two were stunned. The chief supervisor asked, "Huh? You finished reading so quickly?"

The laboratory personnel looked at Feng Qing and asked, "Young Madam, are you sure that the analysis formula for the Pi virus is on the record on the experiment table? But there's no analysis formula or process for the Pi virus in the record."

Before he could finish his sentence, another laboratory personnel gently pulled the corner of the laboratory personnel's clothes at the door and even gave that person a look that said, "Shut up." Although their movements were very small, Feng Qing and the other two could still see it clearly. The two laboratory personnel asked, but their tone and attitude could be seen that they did not believe that Feng Qing could analyze the formula for the Pi virus at all. Moreover, they had indeed not found the relevant analysis process in the notebook, so they had no way of confirming that Feng Qing had written it. If Feng Qing really did not write it, then wouldn't they be slapping Feng Qing's face if they exposed this in public?

Very quickly, the laboratory personnel who had followed them out just now ran back. However, everyone was silent, looking like they had never gone out at all. They didn't believe that Feng Qing had the ability to analyze the Pi virus, and Feng Qing didn't have any reaction to their performance, much less want to explain anything. These people could misunderstand as much as they wanted. At the moment, she didn't want to expose that she was Mr. Qingyi of A Dark Organization. If she continued to talk about this virus, it would easily expose her identity, and this wasn't what she wanted to see.

At the thought of this, Feng Qing turned to look at the chief in charge of the laboratory and said, "I hope you guys can hurry up with the research on the PG18 virus. If you find any problems or need me to solve them, you can contact me first. I won't disturb your work."

The chief hurriedly nodded. "Yes, yes. Young Madam, don't worry. We will definitely work overtime to study the PG18 virus. I will also allocate the resources of the entire Sacred Island experimental base and focus all my strength on researching as soon as possible. I will also inform Young Madam immediately if there are any new discoveries."

Originally, the chief wanted to send Feng Qing off personally, but Feng Qing rejected him. It was only when the laboratory door closed that everyone in the laboratory slowly heaved a sigh of relief. All sorts of discussions started.

“Hey, do you think Young Madam is telling the truth? If it’s true, why didn’t we see anything when we went there?”

“I suspect that Young Madam is lying. She just came to the laboratory yesterday and has been here for less than half an hour. Even if she knows a lot about the Pi virus, how could she analyze the formula of the Pi virus in such a short time?”

“Shh, don’t talk nonsense. Be careful not to spread it to Young Madam’s ears. However, I agree with your opinion very much. Xie Ruoyun studied the analysis for an entire year but couldn’t figure it out. She only solved the answer yesterday.”

“Do whatever you want. We can’t go and look at the surveillance video in the laboratory yesterday because of this, right?”

“That’s right, that’s right. If the surveillance cameras show that Young Madam is really lying, then the ones who will be embarrassed in the end will be us. After all, no one dares to question Young Madam.”
