

The Wife I Picked Up Is Too Chapter Chapter 996

All the projects that Xie Jiuhan had invested in had made a profit. This also made him a god in the financial world. After he became an adult, his looks were even more outstanding and he captured a group of rich ladies in the Capital.

After knowing that Xie Jiuhan was the Mechanical God, many people were still searching for information about the controllable nuclear fusion pulse superconductor. They also made estimates and evaluations of Xia country's military and the entire international situation. They didn't know anything else, but ever since this news was exposed, the various military stocks had risen greatly. At the same time, Xie Jiuhan's appearance, identity, and his past experience had become the endpoint of Xia country's netizens.

"No wonder our Ninth Master's photos and personal information have rarely been found on the Internet all these years. It turns out that it's all controlled by the relevant departments of the country. Even when those media reporters queued up to Ninth Master's photos, they were only photos of his back."

"It turns out that only the country has the right to publish the high-definition photo of the Xie Corporation's president. This is because our Ninth Master's identity is equivalent to a state secret. It's not something those media outlets dare to publish."

"This time, the official media personally exposed Ninth Master's identity. The photos and information about him won't be deleted again, right? I heard from some old employees that they once secretly saved a few photos of Ninth Master's back and took them on their phones, but those photos will be taken from their phones without anyone knowing. I've decided to print out Ninth Master's photos and hang them at the head of the bed later so that I can lick them every day."

“He’s handsome, rich, and a big shot of the Xia Academy of Science who has contributed to the country. To be able to marry Ninth Master, she probably saved the solar system in her previous life.”

“Did you guys see that? With Ninth Master’s identity exposed, all the shares of the various companies under the Xie Corporation are starting to rise. With such an awesome boss as the president, the Xie Corporation is saved this time!”

Xie Jiuhan developed the first controllable nuclear fusion pulse superconductor in Xia country and became the number one person in Xia country’s weapons research and development technology. At the same time, he exposed his identity as an academician of the Xia Academy of Science. This caused the Xie Corporation’s shares to be revived. All the major investment companies in the world had a 180-degree change in attitude. They went from negative to positive. A large amount of money surged into the stock market, and the shares of the Xie Corporation’s various companies went all the way.

In the office on the seventh floor of the Xie Corporation’s financial center, every time Sun Bin refreshed the stock market page, the Xie Corporation’s stock increase would double. Everyone saw a stock trend map that was rising at a right angle. They had never seen such a scene in their lives.

Liu Yan exclaimed, “How did it rise so quickly? It’s as if they knew it in advance.”

Sun Bin said, “Yes, according to common sense, even if Ninth Master’s identity is exposed, the stock market won’t react so quickly. There should be a process. This is caused by the time difference, and now, the Xie Corporation’s shares seem to have shot into the sky like a rocket. It indeed breaks common sense.”

Liu Yan guessed, "Could it be that Ninth Master knew about this in advance, so he sent people to wait and buy a lot of shares?"

At this moment, Meng Kexin said, "I just checked the situation of the Xie Corporation's stock trading. From the moment Ninth Master's identity was exposed until now, the Xie Corporation's shares have been bought hundreds of millions of times, and this number and frequency can only be the actions of ordinary stockholders. Although each of them didn't buy much on average, countless stockholders bought the shares of a company at the same time after Xia country opened the stock market. In less than twenty minutes, there were more than a hundred million transactions. Half an hour later, there were tens of millions of transactions. The collective actions of Xia country's stockholders pulled the Xie Corporation's shares back from the brink of death."

Professor Sun Bin also nodded excitedly. From time to time, he would let out all sorts of praises. He had been in the financial world for so many years, but this was the first time he had seen such a situation. There was once someone who said that in order to let the country stop the financial crisis steadily, the citizens of Country L took out the gold in their hands and handed it over to the national vault for free.

Everyone knew about Country L's unity, but their Xia country's people were mocked as being in a state of disunity. However, now that more than a billion people in Xia country had seen hope in Xie Jiuhuan, everyone had invested a sum. In the eyes of the capitalists, the funds every stockholder bought were not enough. However, they had overlooked a fact. If a few hundred million people were to add up, it would form a super capital force. Which capital force could resist the people?

The interns from Capital University were also constantly scrolling through their phones or computers. The resurrection of the Xie Corporation and the exposure of Xie Jiuhuan's identity made them excited. No one was in the mood to work anymore.
