

Rebirth of Wild Fire - Chapter 14

Chapter 14 - Mage's Free Mode

Two-Handed Sword (Silver)

Physical Attack 10-15

Strength +2

Physical damage increased by 6

Requires level 5

The best weapons used by soldiers can be sold at auction houses for a lot of money.

Apprentice's Cloak (Bronze)

Magic damage 0-1

Intelligence +1

Don't look at this equipment is bronze, but until the copy of the fifteenth level, the mage's cloak is only this one, and the cloak-type equipment explosion rate is very low. After wearing the cloak, Lu Yang's magical damage increased and his appearance became handsome.

Looking at his attributes, Lu Yang's attributes changed greatly after being equipped with a series of mage equipment.

Name: Lu Yang

Occupation: Mage

Level 4

Stamina: 7

Strength: 5

Intelligence: 75

Dexterity: 7

Constitution: 10

Life: 140

Magic: 750

Physical Damage: 9-13

Spell Damage: 110

Defense: 8

Chance of Physical Crit: 0

Chance of Magic Critical Strike: 2.6%

Spell recovery speed: 11 points / 5 seconds

Among all the 5 level bosses outside Xinshoucun, Lu Yang is capable of killing not only the bison leader nor the wolf king. Being able to kill these two bosses is entirely by luck. Luyang 's real capable boss is dusk. Queen bee in the swamp.

Passing through the misty forest, you enter the Dusk Swamp, which is full of fifth-level wild bees.

Among the many level 5 monsters, the bumblebee 's attack power is not the highest, but it is the most annoying. The bumblebee 's attack comes with poison. After poisoning, it loses 20 points of blood every second. There is such a high output at this level for players It's a headache.

However, all this disappeared after a video of a fire method published in the last life.

Because "Second World" mimics reality settings, the bumblebee has a particularly large weakness-wings.

As long as it is attacked by fire, the wings of the bumblebee will be ignited, and they will be damaged three times in a row. The wings of the bumblebee will be burned and burned out, thus falling to the ground where the player cannot attack.

As soon as the Raiders came out, countless players rushed, but it was very difficult to do this. First, you must hit the wings of the bee accurately.

In the automatic mode, the mage cannot control the specific attack position of the spell. To do this, the mage's attack mode must be changed.

There are two game modes in "Second World", one is the automatic mode, the other is the free mode, both modes have advantages and disadvantages, but in the later period to become a master, you must use the free mode.

What is the free mode? Take the mage's fireball as an example. Normally, a mage needs a set of syllables, a set of gestures, and a method of actively mobilizing magical energy in the body. If the automatic mode is used, the mage does not need to use his mouth. There is no need to make gestures with your hands to learn this syllable, and you do n't need to learn how to move the energy. The system will automatically help the player complete it, but again, the system will release this spell by default for 3 seconds.

If it is a free mode, some high-end wizards have learned the advanced magic words and magic gestures and energy transfer methods in the game. They can issue this set of syllables and make corresponding gestures and mobilize the energy in the body to release fireball. In the end, the speed of release depends on the speed at which the player can read the magic word and the ability to understand the magic word.

The reason why Lu Yang was called a violent fire emperor in his last life was because Lu Yang knew how to simplify the spell and release a fireball. It takes 3 seconds for others, and he only needs less than 0.5 seconds.

In this way, Lu Yang no longer needs to pile up haste and hits, discarding these two Lu Yang and stacking all attributes on top of the crit, once Luyang's crit chance reached 83%, almost every attack All must be explosive.

However, this is not enough. In free mode, every magic released by the mage is controlled by the mage himself. That is, if the mage does not aim, it will be crooked. Therefore, not every player can play in free mode. In addition to learning high-level magical words that are extremely difficult to learn, you also need to have strong fighting consciousness and predictive ability. Otherwise, even if the magical words are learned, fireball will not hit you.

Now, Lu Yang has unlocked the free mode again, and the momentum belonging to his violent emperor has emerged from Lu Yang again.

Find a wild bee, Lu Yang uttered a high-level magic word in his mouth and quickly made a cast action with both hands. In just 0.5 seconds, a fireball appeared in Lu Yang's hand and flew towards the flying bee. .

“Beep”.

Fireball hit the wings of the bumblebee exactly, and a flame of flame burned on the wings of the bumblebee.

The bee was attacked and rushed towards the landing sun.

However, before the wild bee flew two steps forward, another fireball hit the wings of the wild bee. The bee was attacked twice in a row and was very angry. He was about to quickly chase the landing sun and hit another fireball. After hitting the bumblebee's wings, he attacked three times in a row. The bumblebee's wings were directly burned into flying ash by Lu Yang's fireball. The bumblebee also fell to the ground.

Waiting for the bumblebee to continue crawling towards the landing sun, another fireball hit, killing the bumblebee in place.

When there is enough blue and enough magical damage, Lu Yang can explain to the world what a mobile turret is.

Sweeping all the way into the bee territory ~ www.mtlnovel.com ~ Lu Yang found the area where the bee queen was active based on his memory.

Hiding behind a clump of reeds, Lu Yang looked for the position of the wild queen bee in the swamp. After a while, a huge buzz came from far and near. Lu Yang looked in the direction of the sound and saw a black and yellow It is a circle larger than other wild bees, and the half-height wild bees flew from a distance. It is the wild bee queen.

Lu Yang looked behind him. When he came just now, all the bees on the road were killed by Lu Yang. It has not been refreshed yet. After ensuring that the back road is worry-free, Lu Yang aimed at the bee queen and began to chant.

After 0.7 seconds, a flame hit the wings of the bee queen.

“-137”

The bumblebee just turned around, and a second flame hit the bumblebee's wings.

“-139”

The bee queen just flew less than three meters forward, and a third flame hit the wings of the bee queen.

“-272”

The accident hit a crit. The bee queen lost his wings and landed on the ground. He could only chase Lu Yang by a few short slender legs.

On the ground, the speed of the bee queen is 30% of the normal moving speed. Lu Yang only needs to release the fireball while running backward to drag the bee queen to death.

Of course, the Queen Bee is not so easy to kill. After 1 minute, the wings of the Queen Bee will grow out again. Lu Yang wants to kill the Queen Bee and must control his blue.
