

Chapter 661 - Cardinals go out

Southern Europe looked hesitant and said, "Or forget it, it's too risky."

The sword killing **** said: "Try it once. If Lu Yang can **** his devil's heart, our brothers will never have to be so fierce as they are now. Everyone is more than 50 levels. This opportunity is the best."

Xue Fanchen, the second vice president, gritted his teeth and said, "Yes, Lu Yangxiang has a high degree of vision. When he goes out, he likes to play less and play more."

Southern Europe nodded and said, "Indeed, Lu Yang is too adventurous. This is his shortcoming. If we can take advantage of it, we may succeed."

The sword killer said: "There is absolutely no problem. The 3,000 people I sent out this time are all masters of level 50 and above. We have cultivated them at a large price. Loyalty is not a problem. In terms of equipment, I will find a studio to help. Level 50 gold equipment, gems are level 6, and Xia Feng Ruge leads the team, Lu Yang will die."

This is the strongest family that the sword can kill. Even if put in the guild of Liu Jie, these people can play the main force of the elite group. Among them, the team leader Xia Feng Ru Ge is the best in the high hand. This allows them to have Sufficient self-confidence.

"It's time to see when Lu Yang got into the trance." Xue Fanchen said.

"I'll ask." Sword Killer sent a message to Xia Feng Ruge and asked, "What's the situation now?"

Xia Fengruge is hiding in a low hill, and behind him are 3,000 elite players. He looked through the telescope and said: "The 700 men in Lu Yang have arrived and are killing people here at the border. Hey , We can only find a bunch of trumpet to find out. "

At the intersection of the three cities, there are not only the players of Tiewang City, but also the players of Beifeng City and Benliu City. All parties are afraid that Lu Yang does not follow the regular route to sneak in from here. Therefore, players are arranged here. Less strange, on the one hand can monitor the dynamics of all parties.

"What are the strengths of these 700 people?"

Xia Feng Ruge said: "It's okay, the level of the opponent who fights with him is too low, I don't know what the equipment is, but the cooperation is very good."

The sword killer said, "You can fight it."

Xia Feng Ruge smirked and said, "How can it not be defeated, boss, you are too unconfident in your elite troops. Just like this, I can completely wipe out this charge."

The sword killer was relieved, listening to the voice of confidence in his men, and confidence was raised, saying, "It's up to you."

Xia Feng Ru Ge shut down the intercom and continued to wait in place.

Lu Yang came out of the fortress and rode on the Red Flame Lion King, rushing towards the Saber-tooth Tiger Canyon, and the stealth thief behind him couldn't catch up.

Seeing Lu Yang disappear to the horizon, the thieves under the sword killing God couldn't help showing his body, and said, "Everyone put on the chasing horse."

"Will it be exposed."

The thief's demon heart looked left and right. They are now far away from the fortress, and they cannot be seen standing on the wall. Lu Yang, who ran far ahead, disappeared without a trace, and it was impossible to see them, he said: "Listen to me, all are on horses, chasing along the footprints of Lu Yang's team, chasing us has a greater responsibility."

The second world has a very high degree of simulation. Footprints will be left where the horse ran. Several thieves followed the orders of the magic heart and replaced the night blade to follow the footprints.

Han Sha watched Moxin run far in front of him, sneered, and said to Lu Yang: "Brother, 4 thieves are chasing you, there is only one thief behind me."

Lu Yang said: "It looks like this sword kills the gods and also knows a little tactics. You can't control so much. After 5 minutes, you go to the second and don't let him see anything. Others continue to follow the remaining 4 Spies. "

"Okay," Han Sha said.

The time for bitter love to leave the city is 5 minutes later, and the time is up. As soon as 5 minutes arrive, the bitter love will leave the team immediately.

200 meters away from the right side of the fortress, a stealthy thief is looking at the gate in the direction of nothing. His task is to monitor whether there are still people out of the fortress. If so, he must report immediately.

"This task is really boring," said the thief in a stealth state.

Han Sha is also in a stealth state. He is standing behind this thief. At level 60, he is holding a pair of dark gold black flying dragon knives. He looks at the thief in front of him and shakes his head. Han Zhong has educated them in a hidden state. , Can not make any sound, otherwise it is to find death, before he did not take it for granted, only to see the appearance of this thief he understood it, how correct this sentence.

"Raid"

Han Sha doubled his sword into the thief's neck.

"28688" (triple crit)

The thief's eyes were dark and fell to the ground!

Han Sha sneered, and after standing for 2 seconds, he went into stealth automatically, and sent a message to the bitter love half-life, saying, "Let's go out of the city, the secret whistle is resolved."

"Oh, I'm here, I hope the boss hasn't started fighting yet." The player who bitterly loved his half-life opponent shouted, "Brothers, rush out with me and kill the grandchildren of the three cities."

Ten thousand people stared out of the fortress with Landing Yang. Players who upgraded here were always attacked by the hostile guilds of the three cities. Everyone had died because of this tragic accident, and their equipment had been blown out by their opponents. The people in the three cities were full of anger.

Large forces sprang out of the city and rushed towards the Saber-toothed Tiger Plain.

Han Sha stood in place and looked at the body of the enemy thief. If the other party came to pick up the body, he would immediately kill the other party. In the state of soul, he could not see the people on the map.

A flash of light flashed, and the thief resurrected in situ, but did not wait for him to get up from the ground ~ www.mtlnovel.com ~ Han Sha jumped to his back and inserted it into his neck.

"28688" (triple crit)

Thieves die!

The thief player was extremely depressed. He knew what must have happened outside, but he didn't even have a chance to see it. The opponent's hand speed was too fast. He tried again and was killed by Lu Yang.

Han Sha looked at the body of the other person and said with a sneer, "I want you to detect the situation. I have been training for half a year."

A light flashed, the corpse disappeared in place, the thief player could not stand it, and was directly resurrected in the Iron King City. He sent a message to the magic heart and said, "Boss, I was killed."

Demon Heart was chasing behind Lu Yang. Hearing the news, he asked, "When will it happen?"

"10 minutes ago."

"Asshole," Moxin raged, gritted his teeth and asked, "How do you report in 10 minutes?"

Chapter 662 - Lu Yang appears

The thief said, "I also want to, I can't send messages or call in death. If I want to find you, unless I quit the game, I will automatically return to the main city when I come in again. I can't die once. You have to try it again and see if you can look at the situation outside the city. "

"What did you see?" Moxin asked.

The thief said awkwardly: "My opponent is too strong, and I was killed the moment I was resurrected."

“Waste.” Devil’s heart was extremely angry, and 10 minutes were delayed. No one knows what happened in the city. If Lu Yang sent a large army to support him in the back, it would be equivalent to killing the troops in front.

He said to a thief beside him: “You stay, monitor what’s going on, and report any problems to me immediately.”

“Okay.” The thief jumped out of the Nightsaber and hid in hiding.

Demon Heart still felt uneasy, and called Sword and Killed God to report: “Boss, the player we left to monitor outside the city was killed.”

The sword killer was anxiously waiting for the news. Hearing the words of the magic heart, he said, “How did you die?”

“I don’t know, the opponent’s strength is too strong, he did not see the outside situation three times after resurrecting, we are afraid that our actions were discovered by Lu Yang.” Moxin said.

“How is this possible?” Said the sword killer.

Moxin said: “I’m just guessing, there is too little news at hand.”

“Hurry back to detect me, what is going on.” The sword kills the **** to be angry, did the preparation work for so long, the personnel, the equipment, the weather, the geography, the human peace are on his side, but his men told him to act Discovered by Lu Yang, how could he not be furious.

The magic heart said in distress: “From the fortress, there are dozens of roads leading to the Saber-toothed Tiger Plain. It has taken more than 10 minutes. I will go back to detect it, I’m afraid it’s too late.”

The sword killing **** was said to be silent, pacing back and forth in the room.

Xue Fanchen and Southern Europe were informed of the news, and they were lost in thought.

“Otherwise, give up,” Southern Europe said carefully.

Xue Fanchen said: “Can’t give up, we have been preparing for this attack for so long, even if Lu Yang has a large army behind him, he runs so fast on the Red Flame Lion, at least half an hour ahead of the players behind Time, we were 3,000 to 800. How could we be killed in half an hour? “

The sword killer said: “Our people don’t have any signs, even if they are found, can he rely on us? Afraid of him, the plan remains the same.”

The sword killer said to Demon Heart: “Continue to follow Lu Yang and report on his direction at any time.”

“Yes,” Moxin said.

Han Yu stood next to Demon Heart, listening to the conversation between Demon Heart and Sword Killing God, and sent it to Lu Yang at the same time.

Lu Yang laughed and said, “This sword really kills gods.”

Mufeng asked, “Boss, what’s so funny.”

Lu Yang said: “The people who ambushed us were determined, that is, the sword kills the gods. This grandson sent 3,000 of the most elite men to prepare to ambush us.”

“The most elite? How elite?” Mufeng asked with a smile.

Does the elite army have Troyad’s Sword that hurts 3000? Is there a 60-level top-level Blood Elf Island Excellent Gold Part? Is there an excellent accessory for the Mystery Tower?

No matter how elite, nothing more than a group of frogs at the bottom of the well.

Lu Yang said, "No matter how savvy they are, when they meet, I ask you to defeat them head on without giving them any cushion."

"Yes." Mufeng said sharply.

In the first battle of the Holy Knights, he must make a name, so that everyone on the server knows his style and the Holy Knights.

Lu Yang contacted Hongye Feiwu and said, "Where are your seven hundred people?"

"The crossroads of Saber-toothed Tiger Plains," said Hongye Feiwu.

The northwest of the crossroad is Beifeng City, the southwest is Hannibal City, the northeast is Benliu City, and the southeast is Tiewang City.

Lu Yang asked, "How many enemies are there?"

Hongye Feiwu said: "Many people, now they are upset. Liu Jie, Li Xiuyu and Sword Killer have all sent a large number of people to participate in the battle. However, these people are currently garbage. A skill."
"

Lu Yang said, "Stabilize the situation, don't spread your forces. I'm taking 100 knights to your support."

"There are so few people, don't you bring more." Hongye Feiwu said in surprise.

Lu Yang said: "Enough, remember, don't die before I go, keep the current number of people, change into a square array after 40 minutes."

The holy sword is highly confidential within the Iron Brotherhood. Except for the legion leader and the holy sword holder, everyone else does not know.

“Okay.” Hongye Feiwu closed the intercom and conveyed Lu Yang’s order to the heads of the remaining six hundred people.

Discuss with 7 people and keep the existing attack method unchanged.

After 40 minutes.

Seven people began to shrink their troops, and 700 people gradually gathered, setting up a square battle array.

Xia Feng Ruge frowned and asked, “Strange, how did the staff shrink?”

He reported the information to the sword killer and said, “The enemy has a square array.”

The sword kills God because the magic heart loses the echo fortress information, and the magic heart dare not chase Lu Yang too close, it is equal to his intelligence of Lu Yang has been in a vacuum state, frowning even more heard the news of Xia Feng Ruge tight.

“What formation?”

“The square array seems to be a defensive formation.” Xia Feng Ruge said.

The matrix method has gradually spread to the various guilds of the server ~ www.mtlnovel.com ~ Unlike other online games, the number of virtual reality games is large, and the issue of multiplayer wars has been brought to the forum for discussion more than once. Each guild has gradually recognized Battle formation.

Lu Yang’s use of war formations against the enemy several times is the main direction of the research of the major guilds, while the square array has always been Lu Yang’s defensive formation.

Xue Fanchen asked curiously: “Is Lu Yang coming this time, are they meeting Lu Yang?”

The sword nodded and said, "It's very likely."

Xia Feng Ru Ge also agreed and nodded. Although he failed to monitor Lu Yang's every move, but from the time calculation, Lu Yang was indeed approaching.

"Boss, look over there, there is a strange group of hundreds of people coming over." A man pointed to the distance and said to Xia Feng Ruge.

Xia Fengrue used a telescope to look into the distance. Lu Yang's iconic flame sub-legend suit was riding on the Red Flame Lion King and was recognized by Xia Fengrue at a glance.

Chapter 663 - Excalibur Legion

"Lu Yang is here, and everyone is ready to fight." Xia Feng Ruge said excitedly.

The 3,000 people immediately formed a team and waited almost three hours here, and everyone was fed up.

When the sword killer heard Xia Feng Ruge's words, he asked, "Is Lu Yang here?"

"Here, he brought 100 Paladins, as described by Devil Heart. The one headed by him is definitely Lu Yang, and his equipment is too conspicuous." Xia Feng Ruge said.

The sword's inner blood was boiling with excitement, saying, "Brother, the future of the guild is up to you. I won't treat you with the demon heart."

Xia Fengru Ge is a contract player under his command, and works in his studio. He does not want Xia Fengru Ge to listen to him.

Xia Feng Ruge draws a long knife to the players behind him, and everyone gets on the horse and prepares to attack.

3,000 people rode on the war horses, followed the summer breeze like a song to shuttle through the hills, and flew towards the position where the red leaves were flying.

People such as Hongyefeiwu and Hanbing defended in the open battle. 700 people were placed in the plains like a fortress. There were hundreds of hostile guild players around. There was no way to face this battle.

“Meteorite Impact”

Hongye Feiwu pointed one finger forward, and the crimson meteorite struck 6 enemies that came over. After being crushed twice, the trumpet with more than 40 levels died.

Lu Yang led the team from a distance, and there were many players in the Iron Brotherhood around him assisting Hongye to fly them to fight.

This is the land on which they depend. Everyone is here to upgrade and fight monsters, and they are all playing games. No one wants their upgrade location to let the enemy **** away, they did not say a word.

“Boss is here.”

“I’m going, the big boss is here.”

...

Countless Jagged Brother Alliance players saw Lu Yang's burning robes and the Red Flame Lion King sitting underneath him in a frenzy. These two signs together add only one person to the entire server. Chairman, their boss-Lu Yang.

Hongye Feiwu and others heard the shouts of the players around them and looked back. Lu Yang had already reached a position less than 50 meters away from them.

"Boss, I'm here." Hongye Feiwu shouted.

Lu Yang rode the Red Flame Lion King to Hongye Feiwu, lifted the mount, and said, "Everyone is ready. An elite enemy sneaking into us is hiding nearby."

"Where?" Hongye Feiwu looked around.

Lu Yang looked to the only hill in the south and said, "It should be hidden there."

Hongye Feiwu looked at Lu Yang's finger, and opened her eyes sharply, saying, "Boss, the enemy has appeared."

A hilly entrance in the distance, countless players are riding war horses towards them.

Xia Fengruge shouted out loud: "Kill Lu Yang, grab the demon heart in his hand, and take revenge for the boss Liu Jie."

3,000 people shouted in unison: "Revenge for Liu Jie."

...

"Boss, Liu Jie's, what should I do?" Hongye Feiwu asked.

Lu Yang said: "Change the array, change the square to the front, and the 100 Paladins I brought are arrows, and everyone is ready to charge back."

"There are too many enemies than us. Boss you withdraw first, we will block you." Han Bing said.

Lu Yang said: "No one has allowed me to retreat and change immediately."

Temporary heads such as Hanbing and Hongyefeiwu immediately organized a team transformation, and the square array turned into a long arrow-like shape, with 100 Paladins forming the tip of the arrow.

Lu Yang stood in the middle of the tip and looked at the enemies who were about to rush to within 100 meters, and said aloud, "Holy Sword Knights, let me see your strength, I ordered the whole army to charge and defeat each other."

"Iron brothers, kill ~!" Lu Yang raised his staff and shouted.

"Kill ~!" All the players of the 100 Templar Knights and the seven hundred men's corps were mad by the call of Lu Yang.

Even the near-blooded Brother Alliance player heard Lu Yang's shouting and his eyes turned red, and he followed the team and rushed towards the enemy.

Xia Feng Ruge was charging with his troops and saw that Lu Yang dared to charge back with 800 people and showed a surprised expression.

"Lu Yang is this crazy?" Xia Feng Ruge asked.

Feng Yishui, the deputy head of the group, frowned. "Does he want to destroy our 3,000 with 800 people? This is incredible."

Xia Feng Ruge looked at the Luyang troops that were getting closer and said, "No matter what, the army charged, the melee and the mage with the highest damage must first attack the opponent's vanguard with the first wave of attacks."

The players responsible for the first wave of attacks were Xia Fengru's 60th-level Berserker and Fire Mage with the highest attack power. Each Berserker's attack power is around 5000 points, and the mage's magic damage is around 4100 points.

There are only 500 people in this group, and each of them is wearing a level 60 epic gold equipment, which is the elite of Xia Fengru's elite, and at a distance of 30 meters, 100 Berserkers launch their charge skills at the same time, taking a while The phantom rushed towards the Paladin on the side of the landing sun.

The Paladins such as Mufeng and the Wasteland became fierce in their eyes, watching the other side charge, and lifted the holy sword in their hands to slash.

"Retribution Angel-Holy Flame Slash"

The holy sword is 10 cm longer than the other two-handed swords, which is the 10 cm, allowing Mu Feng to sweep the opponent first.

"20868" (Critical Strike)

The opponent's total health was only over 10,000 points, and he fell to the ground instantly and died.

"Holy Storm"

A golden light lit up in front of Mufeng, and the moment he cut the holy sword in his hand, his body spun, launching range attack skills.

"10868"

...

The members of the knights of the Yayoi formation collectively used the sacred storm. Except for a herd of wind that peaked at the sharpest point, only 2 people were captured, and each of the paladins in the staircase shape captured 5 people, up to 10,000 The injury hurt his head.

Xia Feng Ruge was standing in the line and directing the battle. He watched his most elite first assault players beheaded by the opponent's holy flame, and the second group of players were killed by the holy storm. His troops were torn by the opponent's front. Opened a sip.

"How is this possible? www.mtlnovel.com ~ How the other party's damage is so high." Xia Feng Ruge said incredibly.

Lu Yang looked at the distant Xia Feng Ru Ge's expression of horror, sneered, the staff waved, and the meteorite impacted one by one and fell in front of Mu Feng, pointing out the attack direction for him.

Mufeng and Wasteland attacked the front. After the death of the first batch of the most violent battles in the front, the thieves responsible for the sneak attack behind them were like live targets in the army attack and were killed by the Paladin.

Xia Fengruges's 3,000 assault troops were pierced by Lu Yang's 100 paladins, and the red leaves flying and the ice that followed the attack were all dumbfounded.

"What kind of weapon does the Boss' Guard have in his hand and how so aggressive?"

"The damage is too exaggerated. The opponent can't resist it."

...

The 700 men followed the arrows of the 100 Paladins, without any opportunity to participate in the attack, and could only be reduced to spectators

Chapter 664 - Red Mist Orc Warrior

A dark cloud drifted across the sky.

Lu Yang frowned. This was a forbidden spell, an authentic forbidden spell. He looked around but could not find the source of the attack. He sent a message to Hongye Feiwu and Han Bing and said, "Use the secondary forbidden spell to fight against them. , Kill those 3,000 people. "

"Yes."

Seven mages, such as Hongyefeiwu and Hanbing, immediately stood in place to release the secondary forbidden spell. There was a Paladin army in front, and 700 troops guarded on the left and right.

After 10 seconds.

"Meteor Fire Rain"

"Ice Storm"

...

Seven secondary injunctions were played in succession, and the formation of 3,000 players was completely disrupted. Because it is a plain area, Xia Fengru is not badly injured as a singer. Most of them avoided the attack of the secondary injunction. However, the attack The battlefield has been lost.

Lu Yang took the team to pierce the enemy formation easily, avoiding the attack range of the curse, and waiting for the attack in turn.

Lu Yang said: "After the square array changed to the front, the two sides were separated, and the Paladin reorganized the arrow."

Hongye Feiwu and Hanbing separated the square array from the middle, and the two teams backed 10 meters each. The Mufeng and the wasteland ran with 100 paladins in front of the rear array, and the reorganized frontal-shaped array moved towards the end of the summer wind. Rushed over.

The release of the curse in the sky is complete, and the opponent releases the doomsday meteor, which belongs to instant damage.

The 3,000 people of Xia Feng Ruge were killed by the 100 Paladin and five or six hundred people, and they were disrupted by the secondary injunction of Lu Yang's side. The team is being regrouped. Before they can be redeployed, Lu Yang has arrived with his troops. Before his battle.

This time Xia Feng Ru Ge's troops did not prepare for the offensive and could only defend in situ. At the same time, there was less impact from the Berserker in the array. No one could stand in front to resist the attack. Dish generally kills opponents.

The cloth armor and leather armor defensive powers in Xia Fengru's Song Formation are both less than 1,000 points. Even without punishing the angels, hitting them is just like without armor. Each knife is above 9,000 points of blood.

"Boss, we can't carry it." A player ran back to Xia Feng Ru Ge in horror and said.

Xia Fengru's anger was burning in his chest, and the anger was extremely extreme. Looking at the Paladin in front of Lu Yang, he could easily harvest his men with a strangely shaped sword. He couldn't understand how this group of Paladins hurt so high.

"Retreat, don't cause more losses." Said the deputy head.

Xia Feng Ruge gritted his teeth and said, "The whole army retreated and ran in the direction of Beifeng City."

The remaining 1,000 people, such as amnesty, immediately followed Xia Fengruge toward Beifeng City, where Wang Teng's chassis was, obviously, even if he failed, Xia Fengruge would marry Wang Teng.

“Boss, do we chase?” Mufeng asked.

Lu Yang sneered and said, “Chasing, wiped out all 3,000 people, and didn’t let them run away alone.”

“Yes.” Both Mufeng and the Wasteland chased after them with their troops.

Lu Yang replaced the Red Flame Lion King and rode on to follow the team. He didn’t need to take a shot. The 100 people alone were enough to kill all the defeated soldiers.

The players under Wang Teng are hiding in the distance to watch the show.

“Lu Yang’s guard is strong enough, 100 people killed 3,000 people.”

“Isn’t this group of people’s equipment too rubbish? Where did a bunch of robbers even Lu Yang want to rob?”

“That is, who doesn’t know that his devil’s heart is worth hundreds of millions of dollars. If he can grab it, it will be taken away. Is it possible for them to reach 3,000?”

“Deserve to be killed.”

“Well, well, why are these grandchildren running towards us?”

“This group of grandsons deliberately rushed to retreat, don’t be killed by mistake.”

...

Hundreds of Wang Teng’s men fell apart, leaving a huge gap.

Xia Feng Ruge ran with the team, and Lu Yang's team also rushed into the sphere of influence of Beifeng City.

Some players immediately reported to the top, and reported to Wang Teng here and there, Wang Teng got the news.

"Which **** is leading me, immediately send someone to stop me, don't let them run in the direction of the magic forest." Wang Teng cursed.

In the 60-level map magic forest northwest of the intersection, Wang Teng is taking 200 studio players to kill a blood-colored orc 10 meters tall.

He was holding an exaggerated long-handled Tomahawk, his body was blood red, he made a roar, and the red mist around his body was spinning at high speed.

Lu Yang led his team to chase forward, and suddenly found that there were a large number of players under Wang Teng's hands, and Wang Teng, who had been hiding behind him, began to converge towards him.

"Wang Teng wants to fight with us?" Hongye Feiwu asked.

Lu Yang looked forward, and Xia Feng Ruge was running away towards the entrance of the magic forest.

"No entry is allowed here." Dozens of players under Wang Teng stopped at the door, posing in an attacking posture.

"Get out of the way, I'm Wang Teng's guard, all get away from me." Xia Fengruge cursed loudly.

The first few players looked at each other and laughed and said, "Look for death, let's kill them within 20 yards."

The shooter threw a flare and landed 10 yards ahead.

“You bastards, I’m a member of Wang Teng’s Guards, let me go.” Xia Feng Ru Ge knew that he couldn’t run, and decided to frame Wang Teng before he died.

A player under Wang Teng cursed: “You are my boss’s guard, who am I, you are **** blind, we are the real guards.”

Xia Fengru was shocked and said incredibly, “you, you.”

“You die for me.” Three mage players aimed at Xia Feng Ru Ge at the same time and used the flame impact to kill Xia Feng Ru Ge in the same place.

The rest of the players fled and fled around the forest.

Lu Yang brought the Paladin to the entrance of the magic forest. The captain of Wang Teng arched his hand and said, “President Lu Yang, you see, these people are not our guild. I hope you will not be misled by others. tricked.”

Of course, Lu Yang knew that these people were not under Wang Teng. He was curious now why he would see Wang Teng’s guard captain here.

He knows this person ~ www.mtlnovel.com ~ Yue Litian said, “It is really rare, see Wang Teng’s Guard Captain here, what are you doing here?”

Yue Litian said haha, “I heard that there is a battle over here, but since it is the boss of the Brotherhood of the Iron Blood, we are not looking for this, it is boring.”

Lu Yang said, “Walk slowly.”

He looked at the back of Yue Litian and others, just when these dozens of people were about to go deep into the magic forest.

“Hello ~!”

The crazy roar made Lu Yang suddenly widen his eyes, and raised his finger to Yue Litian in front of him, saying, “Mufeng, wasteland, kill me, all the players in the Iron Brothers Alliance pay attention, rush into the forest and kill Everyone inside. “

This is the standard roar of the Red Mist Orc warrior, and he will not forget it even after the next life.

“Iron brothers, kill ~!” Mufeng and the wasteland held up their holy sword and rushed in with the troops, and the red leaves flying and the ice followed with 700 people.

Chapter 665 - Fierce Forest

Yue Litian, who just entered Molin, also knew the bad things, and turned back and shouted, “Defense, you can’t let them rush in to protect the boss.”

Lu Yang’s eyes flashed sharply. He could see from Yue Litian’s expression that they didn’t bring many people.

“Remnant Flame-Activated”

With a crimson ray of light, he appeared at a distance of 50 meters between Yue Litian and the twenty guards. When the flames burst, more than 20 people around him were injured at the same time.

“11602”

Just after landing, Lu Yang pressed his left hand on the ground.

“Flame Storm”

A black ripple appeared on the ground.

“boom”

A fiery storm with a diameter of 15 meters stunned Yue Litian and others.

“10826”

“Blazing Bird”

The crimson flaming bird passed through the bodies of Yue Litian and others, and more than 20 people were killed.

Lu Yang said: “Crush in with me, kill Wang Teng, and rob their blame.”

Mufeng and the Wasteland then led the team to a distance of 30 yards behind Lu Yang. The red leaves flying and the ice and others were farther away.

“The boss rushed in, we can’t fall behind the boss.” Hongye Feiwu shouted, holding up his staff.

The players in the Jagged Brothers League saw Lu Yang so brave, and his high morale had risen to the top, following the landing sun and rushing into the magic forest.

Along the way, Wang Teng’s men kept rushing out from both sides to block, Lu Yang used the Blazing Birds to kill one by one, and none of them could escape his range of attacks.

The range of the magic forest is very large, and the road is very forked. Lu Yang ran for two minutes following the sound and walked through a dense forest to a large open space.

A crimson-colored orc is wielding an axe and playing against more than 100 players. The leader of this group of players is Wang Teng.

Wang Teng saw Lu Yang's face full of anger and anger. This lord strangely encountered him by chance. He never thought that he would meet the lord of the Red Mist Warrior's notice here. The only person in charge of stopping Lu Yang on the road was the 100 people around him.

"Lu Yang, do you want to cause a total war." Wang Teng glared angrily at Yangyang.

Lu Yang looked at the Red Mist soldier who had blood left and said to Wang Teng: "Did I ever be afraid of you at the beginning of the war, Wang Teng, this Red Mist Soldier's notice is pending, and you will die."

"Remnant Flame-Flame Shadow"

Lu Yang turned into a red horn speed across the flat land and came to Wang Teng.

"The Sun Fist"

The golden flame covered Lu Yang's left hand, and he punched Wang Teng's abdomen.

"噔"

The golden air waves caused by the flames burst Wang Teng and all 10 mages in front of him to 30 meters away.

"30686" (Critical Strike)

“15126”

“15118”

...

Wang Teng was killed on the spot, and the remaining 10 mages were all killed. Wang Teng's guards all looked dumbfounded.

“He killed the boss and killed him.” If the deputy captain of the guard responded in the next life, he led someone towards the landing sun.

“We're playing monsters, what about the lord?” A small captain asked.

The Red Mist soldiers have less than 500,000 health. They have 20 melee attacks around him, and say that they can kill him in 10 seconds.

Red Mist Warrior has a high attack power, and the treatment pressure is very high. There must be 5 treatments to add blood to the Red Mist Warrior.

If the next life watched the Dire Brothers players who were rushing towards them dilemma, gritted their teeth and said, “Leave a cure and a soldier to resist, and the rest will stop me from the Dire Brothers, our big army will immediately arrive.”

“Kill ~!” More than 30 violent battles and thieves rushed towards the landing side, and more than 40 mage groups used the Blizzard skills to suppress.

“Boss said, hold on for 5 minutes, our players will be able to come.” Shouted if there is a future life.

“Kill Lu Yang first.” A small captain was violently fighting and launched his charge skills towards Landing Yang, followed by four soldiers launching charges towards Landing Yang.

Lu Yang didn't dare to entrust him. As long as one of this sequence of charges was not bounced off by the fire ring, his end would be no doubt.

“flicker”

Lu Yang's white light flashed 30 yards behind him, just as Mufeng and the Wasteland brought the Knight of the Holy Sword to his side.

“Kill them, kill the fight within 2 minutes,” Lu Yang said.

“Kill ~!” Mufeng rushed towards the opponent's violent battle with the holy sword, approaching the enemy's chest with a sword that was extremely fast.

“16828” (Critical Strike)

The opponent player was incredibly watching him die in blood, and he was equipped with a 60-level 40-player epic, but he did not resist the sword of his opponent.

Mufeng took out the holy sword and saw three thieves rushing over, flashing gold light in his hand, and swept across.

“Holy Storm”

“9088”

“9018”

“18088” (Critical Strike)

All three thieves were spiked.

If the next life came to Mufeng and the damage was so high, he rushed towards Mufeng with a long knife. Just halfway through, the wasteland was stabbed and killed, and a sword was cut to the neck of any future life.

If the next life responds extremely quickly, the iron plate bridge is bent backwards, his knees slide down from the wasteland sword, rubbing the blade, he clearly sees the color of the sword.

“Shenghui?” If someone came up and looked back at the wasteland, he said in horror: “The weapon in your hand is legendary?”

The wasteland smiled proudly and said, “You’ll know if you try it out, and see if you can escape my sword.”

The long sword was wrapped in golden flames, and the wasteland rushed to the face of any winning streak, and one sword was cut off.

“Holy Flame Slash”

This sword is split diagonally. If there is a future life that you want to avoid, you only have to retreat. If he retreats, the wasteland will continuously attack.

If someone in the future knows he can’t retreat, but he does n’t dare to pick up the holy sword. He cuts the sword in the wasteland to try to parry this attack. Got him. “

The Ice Demon was behind him, and said to the two mages around him: “Use magic with me, this paladin is seconds.”

The three men chanted a spell at the same time. In the free mode of the mage, a series of low-level magic such as fireball and ice arrows were disclosed by the players, and the three can achieve instant spells.

“Ice Arrow”

“Ice Arrow”

“Ice Arrow”

The three ice magicians instantly completed the magic ~ www.mtlnovel.com ~ with one finger pointing at the wasteland, three blue ice-cold ice arrows shot towards him behind.

“Despicable.” The wasteland did not dare to take a hard step, rolled over to avoid the spell, just stood up, and if there was one in the next life, take a step back to launch the charge skills.

“噫”

If a future life hits the wasteland, a dizzy symbol appears on the wasteland’s head.

“Flame Slash”

The long sword was cut off with red flames. When the wasteland awakened, the long sword had reached his neck. If it was hit, it would have tripled the critical strike. The wasteland’s blood was only over 15,000 Unable to carry it, he raised his left arm to block in anxiety.

“8068” (Critical Strike)

The wasteland has only half of the blood left. When he saw that he was unfavorable in his teaching, the angry wasteland roared, holding his long sword in his left hand, and stabbed it with his sword in his right hand.

If the next life did not expect the wasteland to respond so quickly, he was stabbed in the abdomen with a sword.

“8078”

If there is a frightened pumping sword back in the next life, watching his remaining blood volume stunned, he doubled the crit damage generated by the flame chopping, which is actually equivalent to the opposite flat chopped blood volume, which makes him unable to calm down.

“Do you really have legendary weapons?” Asked the next life.

The wasteland flashed sideways with the magic of the three ice monsters and said to the next life coldly, “It’s okay to tell you, yes, I have the legendary holy sword, and it is the holy sword of level 60. You can go to death. . “

If the next life is stimulated by the wasteland, because he saw it just before the war, all the Paladins around Lu Yang are holding the same long sword as the enemy in front of them.

“It’s impossible. How could you have 100 legendary weapons. Isn’t this kind of thing rare?”

If there is a panic in the future to avoid the attack of the wasteland, if someone is really a legendary weapon, it proves that the Brotherhood of Iron Blood has the ability to produce the holy sword. Then, what else do other guilds play, once the Brotherhood of Iron Blood is made more With the holy sword, Lu Yang can unify the entire server with these holy sword knights.

“This is absolutely impossible, your weapon must be fake.” If there is a future life shouted.

The wasteland sneered, seeing the chance, and swept across the chest of a future life, saying, “Sorry, this is really the Holy Sword, you can die.”

If the next life is Wang Teng's most important deputy captain of the Guards team, who is far superior to ordinary players, but died under Lu Yang's guards, this will greatly reduce the popularity of Bingmon and others.

"Brothers hold on, I'm here." Hongye Feiwu shouted.

The chasing behind them finally caught up, 800 people participated in the attack, dozens of Wang Teng's men could not resist, and were quickly killed and cleaned.

Responsible for resisting the Red Mist soldier's anti-war and treatment saw that the situation was unfavorable. The two men resisted the monster while running the Red Mist soldier towards Beifeng City.

Lu Yang saw the two men moving, and the red light went straight out in front of the priest.

"Remnant Flame-Activated"

The red light burst, Lu Yang appeared in front of the priest, looking at the other person's frightened face, he pointed his left hand at the other person's head.

"Flame Shock"

A firelight burst on the priest's head.

"20082"

The priest is dead!

No anti-strange soldiers added blood, and the three swords were killed by the Red Mist soldiers.

“Hello ~!” No one can challenge the dignity of our Red Mist soldiers.

Lu Yang looked back at the Red Mist soldier and said, “I can, the Master is out of the army and kill him.”

90 mages such as Hongyefeiwu and Hanbing quickly walked to the front of the Red Mist Soldiers to launch skills within 30 yards.

“Ice Arrow”

“Pyroblast”

...

Countless magic hits the Red Mist Warrior, but each hit only has about 1000 blood, showing the Red Mist Warrior’s superb defense and magic resistance.

“Boss, can’t touch him, who can fight it.” Hongye Feiwu said.

Lu Yang raised his hand and sprinkled the sound of the magic sound, reducing the magic resistance of the Red Mist soldier by 30%, and said, “Hansha, you open the mist to resist, hold on for 30 seconds.”

“Yes.”

A transparent wave appeared in front of Lu Yang, Han Sha immediately jumped in front of the Red Mist soldier, his right hand appeared black light.

“Black Mist”

The Red Mist soldier was preparing to rush to the mage team, was blocked, raised his tomahawk and cut it down.

“Cleave”

Hongye Feiwu and others watched the battle axe smash into Han Sha and took a deep breath. It is conceivable that if they are cut, they will die. However, the battle axe penetrates the black mist, causing an inexplicable shift and hitting Han Sha.

“Pretty”

Hongyefeiwu shouted loudly.

Lu Yang also showed a smile. This is Han Sha’s special attack, which can cause a 40% chance of shifting no matter what skills are used in melee. The black mist will not work unless the opponent is magic immune or in the state of weapons.

Han Sha not only relied on the black mist to avoid attacks, but also constantly dodged.

The Red Mist warrior has no hatred, only chases the current target. He did not hit 30 consecutive Han Sha swords, but his own blood was consumed by Hongye Feiwu and others. The last one was cut and he did not hit Han Sha. His huge body slowly fell down and hit the ground heavily.

System prompt: Congratulations to Luyang team for killing Red Mist Warrior

With a flash of white light, Lu Yang appeared in front of the Red Mist soldiers, picked up a crimson notice, and said excitedly: “It really exploded and the whole army retreated.”

The crowd nodded immediately.

“Where are you going?” Qu Han’s voice came from a distance.

Lu Yang looked up to the right, and countless players rushed towards this side under the leadership of Qu Han. It seems that everyone’s level is 40 and the equipment is gold.

“No, it’s Qu Han’s Third Army.” Hongye Feiwu said.

Lu Yang said: “Qu Han, you remember, sooner or later I will let you regret helping Liu Jie. Today I will not be accompanied, and the whole army will retreat.”

Qu Han’s face was cold, his eyes looked at Lu Yang with cold air, and he said, “I’ll wait for that day.”

Lu Yang finally took a look at Qu Han and waved his team to run, but before he ran far, Qu Han’s men appeared on the left and right sides and in front.

“Kill, stop them.” The allure demon took the silver snake sword to direct countless players to emerge from the dense forest to stop Lu Yang.

“No, we are surrounded,” Han Bing said.

Lu Yang said: “This Qu Han is really dared. If he does not immediately grab the Red Mist Warrior’s notice, he will send people on both sides to cover it, and it is clear that he wants to leave my demon heart.”

“He dares,” Mu Feng said angrily.

Lu Yang was really angry ~ www.mtnovel.com ~ Looking back, the killed Liu Jie and Ruoyou have been resurrected by Qu Han.

“Qu Han, you did a beautiful job this time. I can’t think you can think so well in this situation. If you can get the heart of the demon god, I must ask Jie Shao for your credit.” Wang Tengha laughed He patted Qu Han’s shoulder.

Qu Hangong thanked him.

Lu Yang looked at Wang Teng as he approached him. He put away the magic wand in his hand and looked at Wang Teng and said, "You are really a perfect match. No wonder I can't recruit Qu Han. You give the waste full support for him."

Qu Han pointed to the landing and scolded, "What are you talking about?"

Wang Teng waved his hand and said unthinkingly: "It doesn't matter, let him talk casually, are we still afraid of his relationship? Now he is a dying man, and the devil's heart can't be kept, I let him casually say."

If the next life says: "Boss, and their weapons, all 100 Paladins may have legendary level 60 weapons in their hands."

Chapter 667 - Bitter half-life support

Wang Teng frowned and looked at the next life, and said, "Are you sure?"

If there is a future life, said: "A flat knife hit me more than 8,000."

"What? How is this possible?" Wang Teng looked at the holy sword in the hands of the Paladins in front of Lu Yang in disbelief.

Lu Yang said: "Why not, let me tell you clearly, all the 100 people around me are holding legendary weapons, Troyad holy sword."

Qu Han said: "Don't listen to his nonsense, no matter what he is, now that we have a large number of people, kill him first and get the heart of the devil."

Lu Yang sneered and said, "Are you sure you can leave my demon heart, Qu Han?"

Qu Han said: "I sent 10,000 people over, and the entire magic forest was surrounded by my people. Lu Yang, where else can you run?"

Lu Yang spread his arms and said, "Why should I run?"

Wang Teng frowned and asked, "What do you mean?"

Lu Yang slammed a finger in his left hand and said, "I love bitterness for half my life, kill me."

With half a lifetime of bitter love, 10,000 people jumped out of the woods on the side. Everyone in the densely packed army was glittering with gold.

"Iron brothers, kill ~!" Bitterly holding up the holy sword for a long time, roared and led the team to kill Wang Teng in the past.

"No, we are in an ambush." Wang Teng said in horror.

Qu Han frowned, looked around carefully, and said, "It's not an ambush. It's just Lu Yang's reinforcements. The maximum number is 10,000. It's not much different from ours. We fight him and we must leave Lu Yang."

Wang Teng said: "You come to command, I listen to you."

If the next life said to Qu Han, "These knights have high attack but low defense, as long as people can stop them."

Qu Han said: "It's easy to do. The whole army killed me. Second, Lu Yang grabbed the heart of the devil. Whoever got it first, the boss rewarded him with 10 million credit points."

Man-made fortune and death for food. Qu Han 's Third Army was originally a sharp-knife army that he had carefully cultivated. He heard Qu Han 's words even more crazy, and he was not afraid of the Iron Brotherhood and bitter love for half his life. Passed.

Mufeng shouted, "The Holy Knights, ready to attack."

100 Holy Knights lined up, shouting in unison to meet Qu Han's troops.

Hongyefeiwu and Hanbing immediately used spell support, and the two sides instantly joined together.

Mufeng slashed a Paladin with a slam in a slash, and was subsequently attacked by three Berserkers with less than half of his blood.

"Invincible"

The holy aura appeared above Mufeng's head. Within 10 seconds, Mufeng was invincible, as was the rest of the paladins. 100 people wore invincible auras on top of their heads. If there were more people, they would kill them in the next life. Suddenly helpless.

"Holy Storm"

100 Paladins launched their skills at the same time, and with more than 10,000 damage, they instantly killed hundreds of Wang Teng's men.

"Can still play like this." Wang Teng and others were stunned.

The Paladin's attack power is not as good as the violent battle. It has always been recognized during the service period. Because the Templar transfer certificate is too rare, no one sums it up to the rank of ordinary Paladin.

Originally everyone thought that the Paladin could only slowly kill his opponents by adding skills and blood. Now seeing Lu Yang equip the Paladin with top-level weapons and use invincible methods to deal damage, leaving them wondering how to solve it for a while.

Qu Han shouted, "Hold on. Invincible only has 10 seconds. After 10 seconds, they will be dead. The priest will resurrect the dead."

Wang Teng's panicked troops calmed down instantly.

Lu Yang lamented that Qu Han knew all the skills of everyone clearly and could make tactical analysis immediately at the critical moment. He was a rare war master who cast Liu Jie as Liu Jie's luck.

"Hongye, first use the skills to kill the troops in front of half-life, and let him bring people to us." Lu Yang said.

There are more than 1,000 enemies in front of bitter love for half his life, and he is desperately rushing forward with his troops.

Hongye Feiwu reacted, pointing at the place where bitter love half-life said, "All the mage attacked there, ranged the attack, and made a 30-yard path for the bitter love half-forces."

Hundreds of magics fell in front of the half-life of bitter love. He suddenly felt light around him, and the enemies in front of him died a lot. He shouted, "The elite team rushed with me to protect the boss."

More than 200 level 60 players rushed forward with half-life bitter love, and Qu Han was unwilling to be interrupted by him. A dozen thieves drove the magic-free skills to stop in front of half-life bitter love.

"Holy Storm"

The bitter love half-turned, and the magic attack was invalid, but the physical attack hit the six thieves in front of it.

“8918”

“19862” (Critical Strike)

...

The bitter love of up to 9,000 attacks is half-life, to deal with leather thieves with less than 1,000 armor, easily kill them for 6 seconds.

“Boss, what weapon do you have?” A level 60 brother league player asked.

I watched the player around me bitterly for half of my life, knowing that his name is Ying Yanglang, the captain of his special unit, and said, “Brother, your luck is here. I have a 60-level legendary weapon. This thing is still with the boss. You are doing well today. I will fight with the boss to get you one. “

Ying Yanglang will be a RMB warrior. He joined the Brotherhood of Iron Blood because the atmosphere of this guild is good. I did not expect to encounter such a good thing, and said excitedly, “Thank you, boss, brothers, kill.”

More than 200 people fell into madness. As the bitter love broke through the obstacle for half his life, he did not immediately come to Lu Yang, but instead took the army to fight back, trying to open a larger gap.

Hongye Feiwu shouted, “Come on.”

I love half a life and said, “Red leaf, let your people stand up first. I will open a bigger gap and pass immediately, otherwise more than 1,000 people will block my large army. I will take these few people to death. “

Hongye was right when she thought about it, and immediately cooperated with the half-life attack, which opened a larger gap. A large number of players in the Iron Brotherhood rushed to Lu Yang. At this time, the Paladins were dead and wounded, but none of them dropped items.

“Are we resurrected ~ www.mtlnovel.com ~ Boss?” Mu Feng sent a message to Lu Yang, and each Holy Knight had a soul stone tied to him, one more life than others.

Lu Yang typed and said, “Don’t rise again for a while, wait for my order.”

There was a mantra in his mouth, the clouds gradually gathered in the sky, and the raging flame elves loomed in the sky.

“No, Lu Yang wants to put a curse.” Wang Teng said.

Qu Han said: “Don’t be afraid, ours is also releasing magic.”

There are 10 magicians under his command, who are hiding behind the crowd and secretly using spells.

After 30 seconds, Lu Yang pointed forward with his hand.

“The flames burn out”

The huge white skull is centered on Lu Yang. Within 2000 yards, a severe heat surges, and players under Qu Han lose a lot of blood and die.

Chapter 668 - Killer Guard

Someone who was bitterly loving and Hongyefeiwu were about to breathe a sigh of relief, and several voices appeared in the distance.

“Space-Time Cutting”

“Ice Storm”

“Meteor Fire Rain”

...

Various secondary forbidden spells fell from the sky on the Iron Brotherhood, causing a lot of injuries.

“Treatment is adding blood.”

“It can’t be added, and several secondary forbidden spells are overlapped. Find a place to hide.”

...

Wang Teng watched the Iron Brother Brothers side suffer more than half of their injuries and injuries under the attack of his curse force. He breathed a sigh of relief and said, “Good job.”

Qu Han looked at Lu Yang with a sneer and said, “In the past, Lu Yang relied on nothing but his banned troop. Now we have such a troop. I must leave Lu Yang today.”

“The idea is good. Unfortunately, you don’t have that strength.” Han Sha appeared behind Qu Han, and two daggers pierced his neck at the same time.

“26128” (backstab + triple crit)

Qu Han died!

Wang Teng was startled by Han Sha’s voice. Just turning back, Han Yu’s dagger cut Wang Teng’s neck.

“No, Lu Yang’s assassination guard is also here.” If the next life shouted in horror, the voice had just fallen, and Han Meng drew a stroke, wiping his neck.

The players around Wang Teng and Qu Han stepped forward to attack, but they were easily avoided by Han Sha and Han Meng, and continued to stab and kill with their backhands.

Lu Yang looked at 12 people such as Han Sha in the distance. Every time he killed an enemy, his body was perfect and impeccable, and he smiled with satisfaction.

He couldn’t understand the ability of Qu Han to keep him here. If it was 10,000 to 10,000, the strength of the two sides was quite equal. Perhaps he had a chance, but this time, Lu Yang brought out his most powerful army.

Assassination forces and holy sword forces can be used at one hundred, especially this kind of war, it can play a decisive role.

All three commanders were dead, and Qu Han’s Third Army quickly defeated. Within half an hour, less than 3,000 people in the Third Army had collapsed and fled.

Lu Yang stopped his bitter love for half a life and said, “Retreat, we return to Hannibal.”

“Well, don’t fight?” Said bitterly love half business was never done.

Lu Yang said: “I’m worried that Li Xiuyu and the Sword Slayer will send someone to support me and go back to the city first.”

He nodded bitterly for a long time, and issued an order saying, “All the brothers who died alive after the resurrection were withdrawn from Hannibal.”

The remaining troops of less than 6,000 were immediately divided into various groups to search around, and after returning to their own gang, they chose to return to the city.

Ten minutes later, Li Xiuyu's 30,000 troops had just arrived on the battlefield, and he shook his head while watching the messy battlefield, saying, "The whole army retreated."

The Sword Slayer brought 5,000 people in a hurry, and when he saw the lingering language, he asked, "It's over here."

芊芊 Si language said helplessly: "After the fight, go back, Lu Yang has fled."

"Well," said the sword killer, dejected, "retreat, leave."

Han Sha showed her figure behind a big tree, watched the two teams leaving, sneered, and returned to the main city using the city roll to report the situation to Lu Yang.

Copy doorway.

Lu Yang is discussing this with Xia Yuwei, the White Lion and other legions.

"I know that the sword kills God and aligns with them." Said bitterly half-angrily.

Zhuoshu frowned and said, "Boss, the current situation is very bad for us. Is there any way to break it?"

The four neighbors surrounding Hannibal City, Beifeng City, Benliu City, Iron King City, and Lakeside City are all enemies of the Brotherhood of the Iron Blood. The four fortresses of Hannibal City may be attacked at any time.

Lu Yang said: "At present, all parties will not take the initiative to attack. Ma Lizhe has not defeated the twilight old man and the hegemon. Liu Jie reorganized in the elves and the lakeside city. He used a plan to kill the front. A buffer period of time. "

"If the lakeside city doesn't come to hit us, then our pressure will be much less."

Tu Feng said, "Now our main problem is still in the Blood Demon Temple. Be sure to get the Level 60 Dark Gold suit for these 100,000 people in a short period of time. With the parts of Blood Elf Island and the Mysterious Tower jewelry, their strength Enough to protect all our strongholds. "

Xia Yuwei said: "Now there is a lack of good anti-war and anti-riding, only Xiao Liang and muddy wine can resist, others can not."

Lu Yang said: "I can add another person now. I just grabbed a Red Mist Warrior notice from Wang Teng. Please discuss with whom."

"Red Mist Warrior?" Xia Yuwei asked in surprise.

Lu Yang nodded and told what had just happened.

"If it wasn't for this certificate, I wouldn't talk to Wang Teng, it would be too precious." Lu Yang said.

"Boss, you're rich, this thing is too valuable." Xia Yuwei said.

Lu Yang laughed.

"Good for anyone." White Lion Shen thought, this strategic-level equipment can only be given to the most trusted person, if given to a traitor, turn around and jump to Lu Yang to use Bloody Bloodthirsty, 2 seconds Inland Yang must die.

Another thing is that not everyone loves to play defense. White Tiger, White Wolf and Xia Yuwei are staunch supporters of violent warfare.

Everyone thought for a while and couldn't find the right one.

"Come on." Zhang Zibo suddenly raised his hand.

Lu Yang was surprised and asked, "Are you sure? Once you choose Ironwall, you can't change it in a lifetime."

Ironwall skills reduce player damage by half, but physical output damage is also reduced by half.

Xia Yuwei said: "Why do you want to choose a defense war, don't you like to play violent wars?"

Zhang Zibo smiled at Xia Yuwei and said, "I like Red Mist soldiers."

He didn't say anything. In fact, he found that his technique was too bad. It was a burden in the team. Just copying it proved that ~ www.mtlnovel.com ~ no one else died, only he was killed by the lord.

He didn't want to be a burden for Xia Yuwei, but hoped to help Xia Yuwei. Before, there was no good way. Now that he has the Red Mist Warrior Notice, he is willing to be a defensive war, always standing in front of Xia Yuwei and resisting all injuries for him.

Zhang Zibo handed Troyade's holy sword to Lu Yang and said, "I don't need the holy sword, and I will become a full-time defense."

Lu Yang knew Zhang Zibo's thoughts and asked, "Are you sure you want to?"

"I think so." Zhang Zibo said with a smile.

"Well, then I will give you the notice." Lu Yang handed the notice to Zhang Zibo and said, "Xiao Liang will send you to another job, and Xiao Liang will tell you the specific play."

"Um." Zhang Zibo took out the back to the city roll, followed Xiao Liang flew back to St. Gall and transferred to another job.

Lu Yang sighed inwardly, this is also a seed of infatuation. For a love that will never be possible, even his favorite profession has been abandoned.

Chapter 669 - Return to Blood Elf Island

Lu Yang said: "Now Hongye flew 700 of them out of the copy, and also changed their equipment. We are rushing here, and we will regroup in a while. Xiao Liang, Zhuoji, and Zhang Zibo will lead a team."

The White Lion asked, "What if the other teams can't play?"

Lu Yang said: "Today is Friday. By tomorrow night, we will be able to get at least two more coagulation sets. Although each set lacks 2 pieces, it is matched with excellent gold parts, which is not much different from a full set of dark gold equipment Count Xiao Liang's body and hand it over to other teams, and let Xiao Liang play with the original equipment, so that he can gather 3 more teams. "

These three teams can play 9 copies together, and there are 9 more incomplete coagulation sets. By next week, there will be 45 incomplete coagulation sets. If you change the equipment, you can get 600 in a week. Multiple teams hit the Blood Demon Temple.

Xia Yuwei and others understood Lu Yang's meaning and nodded.

"This method works." Xia Yuwei said.

Lu Yang said: "If it were fast, all 700 of them would be able to make copies tonight and see how fast we are."

Mufeng and the wasteland are driving here with 100 holy knights. After 3 hours, all the people such as Hongyefeiwu and Mufeng are here.

Lu Yang divided the team, he, Zhuo Jiu Qing and Xia Yuwei each took three teams into the copy, each of the three teams with 30 Paladins.

With the first copy experience, it was much easier for the three teams to fight. The first time it took nearly 3 hours to fight the Blood Demon Temple, the second time only took 2 hours, and the third time was two. hour.

Hongye Feiwu and others did not participate in the fight and rested at the door. When Lu Yang came out, they replaced Lu Yang and others' equipment and entered a copy of the fight.

Lu Yang let the Hongye Feiwu open and Han Bing and other teams direct the live broadcast. He played with the three teams, including Zhuojiu and Xia Yuwei, to make copies.

After one night, the three teams successfully opened the copy three times, and after they came out, handed the equipment to Lu Yang and others.

At this time, there are no longer hundreds of people standing at the gate of the copy of the Blood Demon Temple, but more than 20,000 people. These are players who have risen to level 60 and received the equipment.

Originally, they thought that the equipment they sent to the team channel for half a lifetime and the White Lion was good enough, but they did not expect that the equipment produced in the Blood Demon Temple was better.

Lu Yang ordered, all members ran to the copy here, watching the strategy given by Lu Yang to learn how to play.

During the day, none of the players who participated in yesterday's copy, including Lu Yang, slept, and taught these people how to play the copy.

The copy is different from the lord in the field. There may still be a chance for a mistake. The lord in the copy may blame the whole group once.

20,000 people hit from day to night and Sunday night, and only 50 teams hit the empress, contributing 53 Soul Immortal Sets, Moon Soul Sets, and Hematitis Sets.

The Paladin who put on the soul immortal suit reached 27,000 HP and attacked 9300 points; the priest with the Moon Soul kit reached 25,000 HP and 6300 spell healing; the Mage with the Hematitis kit had 24,000 HP , Spell damage more than 6300 points.

Lu Yang told Xia Yuwei and other legion chiefs: “You stay here and continue to lead the team to make copies. I take all the Templar knights with the holy sword to the Blood Elf Island.”

The White Lion said in surprise: “Enough equipment?”

Lu Yang said: “It should be enough, wait, see if I give you a real top 60 equipment, let you feel what is invincible.”

The top equipment of Blood Elf Island is that any player dreams of. Once equipped, few people can fight it.

The White Lion said, “Am I going too?”

Lu Yang picked white lions, bitter love for half a life, muddy wine pouring, Zhang Zibo and Xiao Liang, as well as Mu Yu, Yeyue listening to the wind, and so on, and then picked out Hongye Feiwu and Hanbing from the mage team. Together with Nanfeng Zhiyi, Black Knight, and Ding Dong Cat, a total of 200 people ran towards Blood Elf Island.

After 2 hours.

Lu Yang came to the Blood Elf Island, he came to the superior Elven Village, and found the village chief, Moons.

“Master Morns, my team has sufficient strength, and I can now help you solve the problems on Elven Island.” Lu Yang said.

Morns glanced at Lu Yang’s team, and his original disdainful expression became surprised, saying, “It took only a short time to think of this, your team strength has improved so much.”

Lu Yang said: "Thanks to your drawings, I can improve so fast."

Morns shook his head and said, "It has nothing to do with me. It is your strength. I respect those who are capable. You have received my recognition. I am willing to accept your help. I hope you can help me rescue the queen."

Morns stretched out his arm, opened a teleportation enchantment, and stepped in.

Lu Yang said, "Mu Feng brought me with a second group of 50 Paladins, and the rest entered the copy together."

The wasteland and the first group of knight captains stayed in place with 100 Paladins, Ding Dong cats and white lions and others followed the landing sun into the teleportation enchantment.

The light flashed.

Lu Yang led his team and appeared on Blood Elf Island.

Morns was standing on the square of Blood Elf Island, arguing with the Blood Elf Guard.

"Damn, you have been expelled from the bleeding Elf Island by the queen, and you dare to return without permission, don't you die, Morns?" The Captain of the Blood Elf said arrogantly.

"No, I was not expelled by the queen. The queen was deceived. The villain around him blinded her. I want to see the queen. You can't stop me." Morns said excitedly.

"You don't have this qualification. The queen has been very safe under our protection ~
www.mtlnovel.com ~ Is the villain you said to be us?" The Captain of the Blood Elf Guard retorted.

"I'm not going to argue with you, I'm going to meet the Queen." Moines turned angrily and walked towards the garden.

The Blood Elf Guard did not dare to stop the Blood Elf Elder, but could only step back in front of him.

The captain of the guard stood behind Mons with a sinister gaze and slashed into the back of Mons with a knife.

Mons fell to the ground, turned around and looked at the captain in disbelief, and said, "How dare you kill me?"

"You asked for it." The captain of the guard put away the long knife and said, "don't care about him, let's keep on patrolling and let him live here for himself."

System prompt: Moines is in extreme pain

The name of the Captain of the Blood Elf was originally yellow, but now it is red.

Lu Yang said: "Xiao Liang and Zhang Zibo went against the monster, and everyone was ready to export."

Chapter 670 - Mobs 1 wave

These monsters are ordinary blood elf monsters. Before killing them countless times, Xiao Liang rushed up with his shield and roared to six monsters. Zhang Zibo resisted the other six monsters, and the two were under no pressure.

"The properties that this clotting set improves are too high. It used to be a strange resistance, but now it's a wave of resistance." Said bitter love for a long time.

A coagulation sleeve and a mysterious tower accessory increase defense power by 8124 points, self defense power by 300 points, Blue Feather Earth Guardian by 1000 points, muddy blessing by 100 points, and potions by 500 additional defense power. 10024 points defense.

Health equipment is added with 35840 points, its own attributes are 3200 points, and ancient beast statues are increased by 23000 points for a total of 62040 points.

The equipment of Zhang Zibo and Xiao Liang was basically the same. The two stood there like two steel plates and left to attack.

The Blood Elf Guardian has damaged 20,000 points. Now he is slashed on Xiao Liang. After being blocked by the Iron Wall skill, he has only 5,000 points of damage on Xiao Liang.

“Frustrated Roar”

“Thunder Stomp”

“Weak Body Arrow”

...

Six consecutive damage reduction skills were hit on the Blood Elf Guardian. Their attack on Xiao Liang was less than 3,000 points, and the attack interval was extended by nearly doubled for 3 seconds.

“No difficulty,” Xiao Liang said.

Zhang Zibo watched the red mist around him spinning at a high speed, and said, “No wonder the boss said that the Red Mist soldiers stood up for one army each. This skill is too overbearing.”

Lu Yang said: “The long-range profession uses group skills. After seconds of these guards, the Holy Knight does not need to output, just look at it.”

40 long-range occupations use skills at the same time, the mage's magic damage is above 6000 points, 40 people use it together, counting the skill damage and 30% chance of critical strike, can deal about 500,000 damage per second.

The total blood volume of the blood elf guards was 6 million points. Just a little more than 10 seconds, 12 blood elf guards were killed on the ground.

The White Lion scratched his head in astonishment and said, "We've improved so much?"

Lu Yang stepped forward to pick up the drawings and said, "No need to be surprised. This is what we deserve. Go ahead and target the first lord."

Morns woke up, healed himself with spell skills, walked to Lu Yang and said, "Young man, thank you for saving me."

Lu Yang said with a smile: "What should I do, how about it, and still need treatment?"

Morns shook his head and said, "No need, I believe my body can support me until I see the Queen."

Lu Yang said, "To be honest, I'm not optimistic about your meeting, and may deepen the queen's misunderstanding of you."

Morns said with struggle, "I can't wait any longer. The blood elves need the queen to lead us to strength. The entire community cannot be divided into two parts. If the queen is willing to change, I am willing to bring my group back to blood. Fairy Island. "

Lu Yang said, "Are you sure you can see the queen, it seems that there are many enemies along the way, we may not be able to fight each of them."

"It doesn't matter who I am," Morns said. "The first enemy is Frostwolf Warlord Duyes. He has a two-headed demon wolf that has lived for thousands of years."

“Do you mean we have to face two bosses?” The White Lion asked.

Morns nodded and said, “That’s exactly what Duis’s wolf is of the ice system. His own attack method is to teleport the player into his realm, where he will fight against the player.”

“How many people can be teleported,” Lu Yang asked.

“Half the number,” Morns said.

“Love this lord is easy, but he took the initiative to separate.”

Morns said angrily: “Ignorance, do you know that Morns must be killed at the same time as his wolf? Otherwise, as long as one is alive and lasts for 30 seconds, the other will be resurrected, millennium Life, the souls of the demon wolf and Mornes have merged. “

“Also bring this.” Said bitter love for a long time.

Only this change makes the copy extremely difficult. Random transmission is already speechless. Attacks on the outside and inside must kill the lord at the same time. This is almost impossible to complete.

Lu Yang led the team to kill monsters all the way and listened to Moines explaining the first lord’s information. Soon, he took the team to the middle of a huge square.

A five-meter-tall, silver-haired two-headed demon wolf with bared teeth monitoring the hard work caught in the square, the fierce light in the four eyes was daunting.

On the side of the two-headed devil wolf, a middle-aged blood elf in a robe is sitting on a stone bench and reading a book. He has a handsome face of the elf family.

Frostwolf General Duis (Lord)

Level: 60

Qi and blood: 100000000/100000000

Silver Frost Wolf Wolf (Lord)

“One hundred million points of blood, which is more than the blood of the ultimate lord queen of the Blood Demon Temple. It’s too difficult.” Said bitterly for a long time, surprised.

“It’s still 100 million points of blood for the two blame, how can it make people fight.” White Lion and Zhuoji and others were also scared by the blood of the two lords.

“Fortunately, the boss got a full set of blood demon temple equipment here, otherwise this copy will not be able to play at all.” Nanfeng said intentionally.

Lu Yang said: “This is the hardest copy of excellence, but although it is difficult to blame, but you haven’t thought about it, what the outbreak looks like.”

Everyone’s eyes widened.

“The blood volume is three times that of the Blood Demon Temple. I don’t require high. The equipment attributes can be increased by 30%.” The Knight in Black said.

In that case, the mage’s magic damage can be increased by 1800 points, and the total magic damage is nearly 8000 points. With any Pyroblast, a critical strike can be a level 60 player.

“Boss, how do you fight?” Bitter Ai asked half a lifetime.

“Let me think about it,” Lu Yang said.

The strategy of playing the copy has turned around in his head for several days. He played the copy in the previous life very clearly, so he just made an excuse for customs clearance.

“Let’s try it first ~ www.mtlnovel.com ~ The ghost knows who this telegram will be teleported to in the future. In case any treatment is transmitted, it will be destroyed immediately.”

Everyone: “...”

“Probably not.” Bitter love laughed twice.

Lu Yang lost laughter, of course not. This copy tests equipment hardware, not luck. When transmitting, the first time is to transmit the player with the highest defense and the highest healing, and the output is random. The second time is to send another Half of them teleported in.

“Xiao Liang was anti-human, Zhang Zibo was anti-wolf, his back was against the crowd, and the paladin divided the Paladin into two groups. Nanfeng Zhiyi and Hei Yan each brought a team of mages to open the monster.” Lu Yang said.

Xiao Liang and Zhang Zibo simultaneously jumped to their respective monsters, pulling the monsters and turning their backs towards the crowd.

“Ignorant humans, you dare to attack the blood elves, I want you to taste the taste of death.” Duis roared, his body instantly grew into an 8-meter-tall giant, and 5-meter-long was extracted from the space. Sword cut to Xiao Liang.

Chapter 671 - Frostwolf General (Lord Level)

“Howling.” The two-headed demon wolf shouted and attacked Zhang Zibo with a whirlwind of ice.

Lan Yu and Ye Yue Ting Feng and other 10 treatments together added blood to the two defenses. The giant’s damage attacked 10,000 points each time, and the two-headed demon wolf attacked 10,000 points without any difficulty.

Nanfeng Zhiyi and Hei Yan each took their mage team to attack the target, while White Lion and Mi Ai rushed to the two lords in close combat.

Lu Yang saw that everyone was ready, and said, "The Paladin is punishing angels."

More than 50 Templar knights did not hesitate to execute Lu Yang's orders, including the white lion and bitter love for half their lives. At one time, more than 50 sacred lights appeared on their great swords.

Lu Yang said to the Ding Dong cat around him, "It's time for you to perform. Let your pets put their skills."

"Okay." The Ding Dong cat tossed in his left hand, and a blue half-carved and half-element creature flew into the air, screaming sharply.

System Tip: Stormwing uses Skill Storm

The White Lion was hitting the Frostwolf with an attack speed of one second, and a spinning cyan hurricane surrounded his hands. The White Lion felt a light arm.

System prompt: Increase your attack speed by 30%

Heiyan is using his free-mode mantra to release magic, and a spinning cyan hurricane surrounds his magic. Heiyan's energy transfer speed has increased a lot in an instant.

System Tip: Increase your magic release speed by 30%

White Lion, Hei Yan, and others couldn't help looking at Lu Yang, and looked at the wings of the storm that were circling in the sky.

"3 hits in 2 seconds, I haven't played so fast in my life." White Lion said.

Han Fei said: "Look at Hei Yan, that kid is a machine gun."

The White Lion looked sideways, and Hei Yan was using Pyroblast to attack the demon wolf at a casting speed of 3 rounds per second. The big fireball between him and the devil wolf almost formed a line.

"This is the case for mages. Look at Nanfeng Zhiyi and the boss' side," said Zhuo Jiuling.

Nanfeng's deliberate thunder knife and Lu Yang's Pyroblast and the entire mage team turned into machine guns.

The health of Duis and Devil Wolf dropped rapidly, and within 10 seconds, each of the two lords was killed by 8 million.

"Damn, I can't reflect my strength here, human, let's go to another space to fight." Duis flashed in his hands.

Five treatments including Lu Yang, Xiao Liang, Yeyue Tingfeng, and 10 Paladins and more than 30 mages appeared in the black space.

System prompt: You entered the cursed space of life

Yeyue listened to the wind and found that a pain symbol appeared on her head, losing 3,000 blood per second.

"I'm bleeding, the treatment will help add blood," shouted the knight in black.

"I'm also bleeding."

"It's all falling."

...

Lu Yang said: "Everyone gathers together, Yeyue listens to the wind and uses the healing ring group to add blood. One Paladin is responsible for Xiao Liang, the Paladin opens the seal of life, and the other priests are responsible for melee treatment. blue."

The Seal of Life is the basic attack skill of the Paladin. Each attack recovers an additional 855 points of blood. In a storm state, it cuts three times in 2 seconds, and the speed of blood loss is very slow.

The black knight brought the mage to the location designated by Lu Yang, this is the middle area suitable for everyone.

Yeyue Tingfeng stood in the middle and used the healing ring to add blood to everyone within 30 yards, recovering more than 6000 health per second, and adding it once every 3 seconds is fine.

Hei Yan outside the Luyang Contact Space asked: "Report blood volume every 10 seconds."

"Yes."

The progress of the internal and external attacks must be the same. If the gap is too large, it is equivalent to a hit.

Ten seconds later, Hei Yan said, "The demon wolf has 80 million blood points left."

"I have 87 million points left," Lu Yang said.

There are nearly 40 Paladins on the devil wolf side, and the output gap is too big.

20 seconds.

Light appeared in Duis's hands, and the light appeared on the three magicians and was transmitted outside.

“嘭”

Three wizards landed in the Paladin group around the demon wolf.

“5000”

“5000”

“5000”

Three consecutive 5,000 spell damages made Hei Yan and others startled. Healing quickly used the area to add blood to make up their lives.

“What buff did you bring out, and why did you blow up the people around you?” The White Lion asked.

The mage shook his head and said, “We only have a buff that loses 3000 points of blood per second. There is no other. It should be the skill of the lord.”

The other two mages nodded.

The White Lion contacted Lu Yang, without waiting to speak, and he and the other two Paladins were teleported to the cursed space of life and landed in the mage group.

“5000”

“5000”

“5000”

“How come there is so much blood.” Yeyue listened to the wind quickly speeded up the release of skills and brushed everyone’s life back.

The White Lion said: “I was about to say that the blame’s skills, whether teleported or teleported in, will cause 5000 damage to players within 10 yards.”

Yeyue listened to the wind and said, “Fortunately, we are well equipped, otherwise we will destroy this skill.”

Three consecutive damages of 15,000 points. There is no Blood Demon Temple suit. Unless you use a gem top, the health is definitely not enough. If the gem is a blood gem, the output is not enough.

Lu Yang said: “So, according to the official regulations, you must first open the Blood Demon Temple, and you must be fully equipped to fight the Blood Elven Island.”

Hei Yan said, “Boss, there are 73 million points of blood left.”

Lu Yang looked at his side. He still had 80 million points of blood. The gap was still acceptable. After transmitting a few paladins, he was balanced. Health, don’t let the players be seconds. “

Heiyan nodded.

At the end of 20 seconds, the black knight and two other mages were teleported out, and Han Yu and the two paladins were teleported in.

Lu Yang looked at Duis’s blood volume and felt it was time to go to the second stage, saying: “Han Yu is still responsible for playing Xiao Liang and let him trigger damage.”

“Okay.” Han Yu hit Xiao Liang’s back with Level 1 bow and arrows and Level 1 continuous archery skills.

“1”

“1”

“1”

...

A series of minus one point of blood angered Xiao Liang's head, and the red mist spun up at a rate of twice per second.

“5000”

“5000”

“5000”

...

Duis's blood volume dropped rapidly ~ www.mtlnovel.com ~ The hatred was concentrated on Xiao Liang's body, when his blood volume dropped to 75 million points.

“Damn, I want you to **** power.” Duyce fist in the left hand and punched Xiao Liang's shield with a burning temperature.

“嘭”

Xiao Liang was knocked to the ground and his blood volume dropped 20,000 points.

System Tip: You cannot use physical attacks for 5 seconds.

Xiao Liang used the badge to lift it, but found that it could not be lifted.

Lu Yang said: "Xiao Liang shouted at him, Han Yu fired fast, can I hold you to see you?"

Chapter 672 - Immortal Belt

Han Yu's hand speed reached the fastest, and even archery fired on Xiao Liang's side armor at 7 per second.

"Hello ~!"

Xiao Liang roared and increased an additional 1000 defenses, forcing Duis to continue to beat him.

Generally speaking, when Duis defeats the defense, it is the most dangerous time. Because defense cannot be exported, other people can easily make hatred excessive. Once Duis looks at other people, it is tantamount to annihilation.

Xiao Liang roared, forcing Duis to hit him, plus the damage of his own Red Mist Cyclone. When the time of 5 seconds arrived, the hatred was still firmly on Xiao Liang.

Lu Yang said, "It's beautiful."

Hei Yan said: "Outer lord has 68 million blood left."

Lu Yang said: "I still have 73 million here, the difference is getting closer and closer, and it is easy to hit."

It's 20 seconds.

Lu Yang's light flickered, and he was teleported outside when the space changed.

"Who is still in the space?" Lu Yang asked.

Hei Yan said, "I."

"It's time for us to change places. You are scattered on the other side. Don't get everyone together. The lord will randomly release the Frost Arrow Rain group at the next stage. The more people gather, the higher the damage."

"Okay." Hei Yan immediately ordered players in the space to spread their positions.

Lu Yang looked at the double-headed demon wolf, with 66 million points of blood left. Zhang Zibo, who resisted the output, superimposed 10 layers of cold wind buff.

Every time the devil wolf attacks with Ice Whirlwind, it will add a 500 damage damage effect to the target. This effect can be infinitely stacked.

"The turbid wine is ready to take over Zhang Zibo's resistance, and everyone stops for 2 seconds, and the turbid wine is on it." Lu Yang said.

Zhuoju quickly ran to Zhang Zibo, using his hatred skills to take his place.

"Dedication"

The golden flame is centered on him, and the ground lights up within 30 yards in diameter. The muddy wine has the book of light. The dedication skill level is +2. He is now 60. The dedication released is actually 9 skills. Instantly Attract hatred.

Lu Yang said: "The muddy wine can resist one more time. You have magic immune skills and can dispel the ice effect."

Muddy wine nodded.

"Woohoo ~!" The blood of the two-headed devil wolf dropped to 65 million points, and the sky roared loudly. Both heads looked at the French profession at the same time, and opened their mouths to spray five-colored energy. Each legal profession was sprayed. No one was spared.

System prompt: Reduce your release speed by 100%

The magical energy in Lu Yang's body became extremely slow, and it was very laborious to mobilize.

"My damage has increased by 100%, but hatred has also increased by 100%." The Knight in Black said.

Lu Yang said: "Stop output of all high hatred and wait for the end of skills."

All the mages in the regiment only Lu Yang wore a spore cape. The others used mysterious tower parts in order to increase the blood volume.

The double-headed demon wolf spitting skill is specifically targeted at all legal systems, especially to increase damage and increase hatred. An accidental legal system hatred will exceed melee. Once this is clear, the demon wolf is out of anti-riding, which is almost equivalent to Yu Ming group.

Hei Yan said, "Duisi has 67 million points left in his blood."

Lu Yang said: "Continue to export, I have only 3 million more points than you."

Hei Yan said: "Duis has been releasing arrow rain in the copy, and the output will be slower."

Those who are teleported will not be teleported within one minute. Lu Yang and Hei Yan can communicate the internal and external lord's play smoothly.

White lions, bitter lovers, black knights, Nanfeng Zhiyi, and other guild executives are in this conversation group. They can speak alone, and several others can hear it.

Lu Yang said the skills outside the copy to Hei Yan. After 2 minutes, the storm effect disappeared. At this time, Duis had 50 million points of blood left, and the demon wolf had 51 million points left.

At this time, everyone in the team knew the lord's skills and knew how to crack them, making it easier to fight.

After 8 minutes, Duyth had 500,000 points left, and the demon wolf had 800,000 points left.

Lu Yang was teleported into the space and said: "The internal output slowed down, and the outer wizards Hei Yan, the Black Knight and Nanfeng deliberately attacked, and every 100,000 blood reports."

"Yes."

100,000 blood was destroyed in just a few seconds.

"700,000," Hei Yan shouted.

Lu Yang said: "450,000."

"600000."

Lu Yang said: "400,000."

“500000.”

Lu Yang said: “370,000.”

...

The blood on both sides is getting closer and closer. When Duyth’s blood is left at 100,000 points, the blood of the devil wolf is also fixed to 100,000 points.

Lu Yang said, “Release the fight, it’s over.”

“Kill him.” Attacked both on and off the court.

The devil wolf was first killed on the ground.

The system prompts: The wolf resurrects after 30 seconds.

Everyone was nervous.

Lu Yang said: “Duisi has less than 20,000 blood and killed him.”

“Damn humans, taste the power of arrow rain.” Duis released frost arrow rain toward the crowd.

The mages were habitually scattered.

Lu Yang saw that the ultimate purpose of Jianyu was himself, and continued to use magic when facing the arrow rain. When the arrow rain came to him, white light appeared on his body.

“flicker”

Lu Yang appeared in the 30 yard area ahead.

“Yan Ying-Lie Yang Quan”

A red light appeared behind Duis, and Lu Yang broke out and punched Duis in the leg.

“8006” (Critical Strike)

Duyce stopped still and put his arms over his chest and said, “I’m going to lose to humans.”

The system prompts: Duis was killed by you.

“boom”

Duis fell to the ground, and Lu Yang and others were teleported back to the Blood Elf Square.

The body of the devil wolf and the body of Duis lay side by side.

“Huh, it’s finally over.” The white lion was relieved.

“It was not so tense to fight with Liu Jie. I was scared to death. I thought it was a failure.” Kuai said for a long time.

Just when Duis left the last tens of thousands of blood, everyone stared at the resurrection time of the demon wolf, watching the elapse of one second and one second, the last 10 seconds were almost over, and everyone’s heart was hanging Now, once it fails, it will certainly die.

The mage and priest are no longer blue, and the paladin is no longer punishing angels.

Lu Yang is also very worried ~ www.mtlnovel.com ~ Fortunately, in the end, he succeeded and did not avoid the arrow rain, otherwise he may fail.

“It can prove that our strength is strong enough, come on, let me see what baby burst out.” Lu Yang said.

The crowd was all around Lu Yang.

Lu Yang clicked to pick up the equipment, and 6 pieces of equipment appeared in Lu Yang’s hands. He shared the equipment pictures to the team channel.

Belt of the Immortal

Attribute: None

The 6 pieces are all belts of the Immortal.

“Strange, it has no attributes,” the White Lion asked curiously.

Lu Yang looked at Morns who came over.

“My friends, you are really great. You defeated General Duyes, the Blood Elf Island. This is beyond my imagination.” Morns said excitedly with open arms.

Lu Yang asked with a belt: "What about this?"

Morns said: "He needs me to point, tell me, friend, what kind of profession do you want to make this belt."

Lu Yang's eyes lit up and he said, "First turn 2 of them into shield battles and 1 into anti-riding."

"Sorry, there are no shield battles and anti-riding, but only output classes such as mage, violent battle, punishment knight, and thieves." Morns said.

Lu Yang said: "Then become 6 pieces of equipment to punish the knight."

"no problem."

Belt of the Immortal Thunder (Excellent Gold)

Level: 60

Defense: 202-228

Magic resistance: 200—228

Strength: +160

Constitution: +280

Stamina: +110

Intelligence: +150

Increased qi and blood: 3500 points

Additional physical attack: +223

Additional physical defense: +182 points

Additional physical penetration: +346 points

Additional Spell Resistance: +155

Suit 1/8

2 piece set: full skill level +1

4 piece set: 500 additional physical attacks

6-piece set: 500 additional physical defense points

8-piece set: 1000 magic points for all lines

Lu Yang saw that this attribute was beyond excitement. This is the equipment. With it, his Guards Corps is invincible.

“Boss, please send us a quick look at what attributes.” Suffering half-life, Lu Yang asked anxiously when he saw Lu Yang’s expression.

“This is it.” Lu Yang sent the equipment attributes to the team channel.

The bitter numbness of the whole body was instantly agitated.

“This equipment, this equipment ...” bitter love for half a lifetime did not know what to say.

Zhang Zibo compared his coagulation belt and said, “The equipment’s defense and magic resistance are 30% higher than the defense.”

“The attack power is 30% higher than the Immortal Soul,” the White Lion said.

Xiao Liang said: “The constitution is as much as the anti-war increase. It is estimated that 8 sets can add more than 30,000 blood.”

“If the other 7 pieces of equipment can also have this attribute, then the total defense of this set of equipment is more than 4,800, the magic resistance is more than 4,500, and the attack power is more than 3,400.”

“My God, this set is created by combining the advantages of all sets such as blood clotting, blood mist and immortal soul.” Sun Yu said.

“If you equip these equipment with defensive gems and magic resistance gems, this defense and magic resistance, except for players who have Divine Swords, others will not be able to move at all. This is simply a group of medieval heavy soldiers.” Zhou Tianming Said.

Even if the soldier wearing the Blood Mist suit holds the Beheader, the attack power is only about 7000. If the Mine Thunder Set is equipped with 17 defensive gems, it will increase 2000 defense power. The Blood Mist Warrior holding the Beheader will fight the Holy Mine Knight, almost no blood.

Lu Yang said: “As long as 100 people have such equipment, they can penetrate the enemy’s legion on the battlefield, kill their boss directly, and collapse their team.”

In the last life, there was such a legion. In the battle of millions of people, these hundreds of immortal paladins shone like meteors, penetrated the enemy's attacking 100,000 troops, and eliminated the enemy's commander-in-chief.

In the future battlefield, it is not the number of players who can decide whether to win or lose, but the number of players with the highest level of equipment.

Take the present as an example, most players now have a level between 30 and 40, and a few players have reached level 50, but not many can wear a level 50 gold.

In the event of a big war, when the war between the two sides is stalemate, as long as there are 1,000 such paladins in Lu Yang, he can make a final decision and penetrate the enemy's army to achieve a decisive victory.

The main reason why the Ten Thousand Hegemony Expansion belongs to the studio is here. Only the top studios can get through such top-level copies.

"Boss, send the equipment to Yu Wei and see them." Zhang Zibo said.

Lu Yang sent the equipment to the army commanders such as Xia Yuwei and Jiang Ze.

A copy of the Blood Demon Temple.

Xia Yuwei, Jiang Ze, and other army leaders were leading the team to kill the lord. As it happened, Xia Yuwei killed Analuo, the blood demon's son, and got a blood mist belt.

"Yes, luck is very good today." Xia Yuwei's words just fell, and she saw Lu Yin's belt of the immortal underworld (excellent gold) from Lu Yang.

Seeing the properties of the equipment, Xia Yuwei said excitedly: "Boss, is this the suit of Blood Elf Island?"

Lu Yang said, "That's right."

"I want a set." Xia Yuwei said proudly.

Lu Yang said: "Rest assured that each legion leader will have a set of immortal. In addition, each of your legions will have 150 places. Choose some good subordinates, and I will give each of them a set of immortal equipment. "

"Thank you, Boss." Xia Yuwei shut down the phone excitedly and shouted, "Boss got a more advanced suit over there, Boss said, good performance, he will send them a set of top-level suits. Give me an effort to move forward. "

The same words were also shouted in the mouths of Jiang Ze, Mao Qiu, and others, and the morale of each team was raised to the highest level.

The white lion and muddy wine were moved by the scene of heavy infantry determined by Lu Yang to determine the victory or defeat of the battlefield.

Morns said, "My friends, can you move on? The queen is waiting for me."

Lu Yang said, "Let 's go on. These pieces of equipment will be placed with me first, and one set will be sent to you."

"Yes."

Continue along the square towards the front, and arrive on a circular passage like a highway.

The passage is about 30 meters wide, hovering up, and the mob guarding the passage is the mob guard.

Xiao Liang and Zhang Zibo rushed forward to pull the monsters, and the crowd output, and they reached a 50-meter-diameter disc 12 times in a row.

In the middle of the disc, there is an old female elf wearing a blood elf robe.

“Moines, how did you get here?” The old female elf’s face was cold and disgusted.

Morns said: “Ivea, I’m going to meet the queen, I hope you can get away.”

The old female elf shook her blood-red robe and said angrily, “This is impossible. You should go to the dungeon to confess what you have done. I do n’t care how you got here, immediately turn around and go back, otherwise don’t blame me for not showing mercy . “

Morns reluctantly retreated to Lu Yang.

System prompt: Blood Elf Mage enters combat status

Blood Elf Magister Ivia (Lord)

Level: 60

Qi and blood: 200000000/200000000

“It’s another 200 million lives ~ www.mtlnovel.com ~ said bitterly for half a life.

Lu Yang looked at Morns and asked, “What skills does he have?”

Morns said: “Ivea has a lot of skills, all of which are spell control skills and high damage skills. Be careful, as long as you are hit by his stored power magic, you will definitely die.”

The White Lion asked, “Isn’t it 30,000 blood?”

Morns shook his head and said, "Her charge-charged magic damage is 99,000, and no one can resist his charge-charged attack."

Everyone: "..."

"99,000 damage, this is too much." Xiao Liang said.

Lu Yang said, "Hit once and try it out. No more."

Chapter 674 - Archmage Ivis

This woman is very difficult to fight. He has many full-screen skills and power-saving skills, each of which requires the player to evade.

He separated the positions of the crowds and formed a circle around Ivis during the big disc week. The three members, Black Flame, Black Knight, and Nanfeng Zhiyi, were in charge of leading the mage group, White Lion, Half Love and Han Fei Responsible for the Paladin group, blue feather and night moon listening to wind and other treatments mixed in long-range and melee teams, each group of 15 people.

"Xiao Liang resists blame, opens up." Lu Yang said.

"Look at me." Xiao Liang rushed to the front of Ivis with his shield on his face, and the heavy shield patted him fiercely.

"Damn man, how dare you hit my face." Ivis was furious, and his body instantly turned into a giant female elf 10 meters high.

“My mother stepped on you.” Ivis stepped on Xiao Liang.

Facing the woman’s huge feet, Xiao Liang silently picked up his shield to resist.

“11000”

“Fortunately, the damage is not high.” Xiao Liang said.

Lu Yang said, “Ding-dong cats are going to storm.”

“Yes.” Ding Dong Cat let Stormwing fly into the air to release the group acceleration skills.

“The Paladin punished the angel and hit his head from a distance.” Lu Yang said.

This time, the start was good. Lu Yang just thought about whether to remind Xiao Liang to take a photo of his face. In the original storyline, Ivis is a very beautiful old woman. If anyone dares to call her ugly, or hit her Face, he would fall into rage and fight with people like a vixen.

The white lion and bitter love half-life did not know how to export. Seeing that Ivis had grown so large, they rushed to Ivis’s feet to attack.

“Holy Flame Slash”

The White Lion cut off with a sword.

“20068” (Critical Strike)

Fifty Paladins attacked at the same time, and Ivis’s blood dropped rapidly, and he showed a painful expression.

“I’m going to burn you all with fire.” Ivis gasped in flames.

System prompt: Ivis releases ring of fire

There are more than 50 hot wheels in the map, starting at the player’s normal moving speed and following a fixed track.

The white lion’s eyes watched a Hot Wheel running towards the melee and shouted, “The melee is coming back soon, the Hot Wheel is coming.”

More than 50 melees dispersed quickly, avoiding the first Hot Wheels and waiting to run back to the Lord, more than a dozen Hot Wheels flew over.

No one knows how much the Fire Wheel hurts. For fear of being hit, it will kill in seconds and scatter to avoid it.

“Remote output is up to you, we can’t fight it here,” shouted bitterly for half a life.

Heiyan avoided a hot wheel and said, “I’m almost the same. You only have 20 wheels. I have more than 30.”

The bitter love turned around for a long time, and more than 40 long-distance scatter runs chased by more than 30 hot wheels, much worse than them.

“Well, **** flame, this is not the end, it’s just started,” Ivis said proudly.

Lu Yang said: “The original long-range and melee see how I hide from the firewheel.”

Everyone looked at Lu Yang.

The hot wheel is actually very easy to hide. There is a form of body called a half body position. The hot wheel looks exaggerated in flames. In fact, it will only receive damage if it touches the wheel.

A hot wheel spun across the air in the direction of the landing sun.

Lu Yang walked two steps forward, easily avoiding the fire wheel while rubbing the flames, and raised his hand with a blast to hit Ivis's head.

"9086" (Critical)

"It didn't matter if we weren't hit by the ring, then we're not afraid." The Dark Knight said.

It turned out that they always thought that even if the flames were hit, it was very difficult to hide. If they didn't need to avoid the flames, they just avoided the hot wheels themselves, and they were a lot easier.

For a while, the Fire Wheel no longer caused damage to the long range, and Hei Yan and Nan Feng Zhiyi, etc. easily dodged and avoided, using short spell skills to attack Ivis.

The White Lion said: "Separate melees and fight with two legs apart. I took a person to the other leg. People dispersed and it would be much easier to hide."

He bitterly nodded his head for a while, watching the white lion take away a third of the melee, the field opened, and it became easier for them to escape.

Ivis saw that the ring of fire did not harm them, and an angry look appeared on his face, saying: "This spell is really waste, I want you to taste a powerful one."

A huge attraction appeared in front of Lu Yang, and he was caught at the foot of Ivis at the moment when he was out of control.

Hei Yan asked, "What skills are this and how did we catch us all?"

Lu Yang looked over his side, and all of them were caught on two feet.

“The great Lord of time and space ...” Ivis said with a chuckle.

Lu Yang said: “Not good, this is a charged attack that hurts 99,000, everyone runs.”

“I’m dizzy.” Suffering for half a life, he ran towards the outside, but found that a strong wind made him unable to run fast.

“Boss, my movement speed is only 50% of normal.” Shouted bitterly for half a life.

Lu Yang said: “The wizard flashes, the shooter jumps, and the enemies can’t run without the halo.”

Heiyanbaiguang jumped to 30 yards away, Xiao Liang ran away using jumping skills, and Zhuojiu used the magic-free halo top to Xiao Liang’s position. For a time, the whole group fled with escape skills.

“What about the priest?” Lan Yu asked.

10 priests did not have escape skills and had not run 10 meters under Ivis’s feet.

Lu Yang said: “The soul stone is ready for resurrection, you can’t run out.”

“Explosion of Time and Space”

Ivis slammed the ground with both hands, and a lilac aperture centered on him wanted to spread around. All targets within 30 yards were instantly affected by the aperture.

The melee paladins did not evade, all with the magical aura on their heads were not harmed, and the priests such as Blue Feather and Yeyue Tingfeng all fell to the ground with 99,000 injuries.

“Human, taste me terribly.” Ives said proudly.

Lu Yang said, “Xiao Liang went back to pick up the blame, and the priest group was resurrected.”

Xiao Liang launched an onslaught skill at Ivis and used Redmist Bloodthirsty to draw Ivis’ hatred to himself.

Lan Yu is resurrected with the other priests.

“You have too many people, how can more people bully and less, my children, come out.” Ivis made a move with his right hand.

20 water elements appear out of thin air.

Deepwater Element (Elite)

Level: 60

Qi and blood: 5000000/5000000

“How to fight it ~ www.mtlnovel.com ~ So many water elements came out at once.” Zhang Zibo said dumbly.

Lu Yang said, “Han Ying controlled nine.”

Han Ying pointed with one hand, the nine-headed dragon immediately spit out control skills.

“Nightmare”

“Shock”

“Water prison”

...

Lu Yang had 5 control potions in his hand, throwing 5 of them out, and controlling 5 of them were water elements, leaving only 6 remaining.

“Zhang Zibo is responsible for holding these six water elements, and is responsible for attacking and killing them from a long range. Be sure to kill these six water elements first. If Ivis uses the full screen skills, these six water elements can take advantage of us. Lu Yang said.

Chapter 675 - Full screen skills

Zhang Zibo launched an onslaught skill at a water element, roared, and forced the remaining 5 to run in front of Zhang Zibo to attack him.

Han Yu used continuous archery to hit Zhang Zibo’s back and launched 5 consecutive **** bloodthirsty. Zhang Zibo attracted strange hatred.

Hei Yan and 30 other mages immediately aimed at the water element output.

Each of the water elements has 5 million HP. Killing 6 is equal to hitting 30 million HP, which is very difficult.

Twenty seconds later, Hei Yan and others killed three, and three were full of blood.

“Damn humans, you made me feel pain, try my trick.” Ivis pointed his right hand at the sky.

A flash of white light on Lu Yang was transmitted to an aperture of 10 yards in front of Ivis, and the remaining 99 people were also transmitted to the aperture at the same time.

“Frozen Ring”

Ivis’s fiercely stomped foot, an aura of ice spread from his feet to the surroundings, and Lu Yang and others who had just appeared in the aperture were all frozen in place.

“Oh, the flames of the end, obey my call.” Ives uttered a curse in a mocking expression.

“Can’t move, boss, what to do.” Shouted bitter love for half a life.

Lu Yang said: “The priest dispelled the ice, and Sun Yu opened the elf, and all ran to the side.”

The priests such as Lan Yu and Ye Yue Ting Feng are in a state of confusion. They have no soul stone, and if they die again, they cannot be resurrected.

“disperse”

Lan Yu and Yeyue Tingfeng emit pure white light, and use the range to dispel the ice under everyone’s feet within 50 yards.

Sun Yu shouted: “Wind Elf.”

At the foot of the whole group, a skill was added to increase the movement speed by 250%, and quickly ran towards the boundary of the circular platform.

“Finally, I came out.” The white lion leaned on the corner and wiped the cold sweat on his forehead. He took it just now, and he was really scared because he was in the middle position.

“5068”

An ice arrow hit his chest, and the white lion looked up to the side. Three blood-filled water elements were running towards him, one of whom had just finished using the long-range skills.

The priest Yeyue Tingfeng and other priests were far away from the White Lion and could not give him treatment. He said anxiously, “The White Lion is holding on. I’m too far away from you to pass.”

Everyone looked to the side, only to find that the water element had been attacking at this time.

“It’s okay. Fortunately, there are only three. If there are six, I can’t avoid it.” The white lion avoided the other two ice arrows by using his physical method.

“Flame Aura”

A fierce flame spread from under Ivis’s feet to the surroundings, through their aperture, and stopped within 5 meters of the border where Lu Yang and others were located.

Everyone breathed a sigh of relief.

Lu Yang saw the flames dissipate and said: “Xiao Liang picked up the monster, the mage continued to draw water elements, and killed Ivis in melee.”

People who did not know how annoying the water element was immediately increased the casting speed and killed all the other water elements with all their strength.

Ivis’ blood volume dropped by 50 million points at this time, her face became more and more angry, her right hand pressed down, and a ripple swept across everyone in the audience.

“Silent Aura”

Hei Yan found that the magic in his body could not be transferred, and said to Lu Yang, “The mage team was silent.”

The White Lion said, “Melee is silent.”

Lu Yang was about to speak, and Ivis raised his right hand again, exuding the icy light in his hand.

“Group Blizzard”

More than 10 clouds gathered on the heads of Lu Yang and others.

“Run, escape the blizzard, don’t let this skill hit.” Lu Yang said.

The crowd fled immediately, but they ran and the clouds chased behind. The diameter of the field was only 50 meters. 100 people escaped without a rule, which is equivalent to not going out of the snowstorm.

The crowd became more flustered for a while.

Lu Yang didn’t mess up, he observed it carefully and said, “Hei Yan, Black Knight, Nanfeng knowing ...”

He clicked on the names of 10 mages in a row, and said, “Ten of you run towards the entrance, and when there is a snowstorm, you automatically use the ice barrier.”

The group blizzard still has the main goal, and the cloud will follow this person. Ivis targets a total of 10 people. As long as these 10 people run out of the crowd, naturally the snowstorm will not kill the player.

“5068”

A blizzard had already settled on Hei Yan's head. After being attacked, he slowed down by 70%. Fortunately, Sun Yu accelerated 250% of his movements, and he ran quickly towards the door.

Black Knight and Nanfeng Zhiyi also ran over.

Yeyue listened to the wind and four other priests added blood to them. When they got closer and closer and overlapped within 30 yards, there was a problem.

"5086"

"5088"

"How did Blizzard's attack speed up, I lost 2 blood per second." Hei Yan asked curiously.

Yeyue listened to the wind and said, "It's because your positions are overlapping. You can just run here. Using the ice barrier, you will not affect other people."

Their treatment pressure is too great to add.

Hei Yan turned his head and looked at him, and just happened to look at the knight in black. Both men used the ice barrier to freeze themselves in place.

Frostwall lasts 30 seconds, and within 30 seconds they will not take any damage.

The group blizzard lasted only 30 seconds. When the time came, 10 people ran back to their positions and continued to attack.

Ivis used multiple skills in a row without killing anyone in the regiment, and his blood volume dropped rapidly. Just two minutes later, his blood volume was only 130 million points.

“It’s a hard-to-play lord.” Said bitterly, looking at her attack speed for 1 second, depressed, for half of her life.

Zhuo Jiu said intently, “Be content, if it wasn’t for the boss’s command, we would have been killed 4 times.”

Love bitterly nodded.

Lu Yang said: “The mage team must hit the head, the crit is the main.”

The 40 mages are all elites of the last generation. After Lu Yang’s command and training, their strengths have gone to the next level. Everyone can use the free mode, and every Pyroblast hits Ivis’ head.

Even more powerful, he can hit Ivis’ eyes like Lu Yang ~ www.mtlnovel.com ~ If he hits, it is easy to hit three times the critical strike.

“Damn, look at my skill.” Ivis’s health dropped to 100 million points, and he began to use all his attack skills.

“Ice Arrow”

100 Frostbolts flew out of his hand to hit every player.

“4078”

Hits are reduced by 50%.

Lu Yang said: “The priest uses the group to add blood to ensure that everyone’s blood volume is more than 90%.”

The blood volume of each person in the regiment is at least 25,000 points. As long as the attack is made without errors, it will not die.

The priests such as Lan Yu and Ye Yue Ting Feng are masters. In this case, they can easily resist the pressure and add blood to the whole group.

After 30 seconds, none died.

Chapter 676 - Immortal Wraith Helm

“Taste my trick.” Ives left-pointed his finger to the sky, and a thick cloud covered the entire circular platform.

Lu Yang said: “Everyone scattered their positions and kept a distance of 10 meters. He should release the lightning skills and be careful to be hit by the arc correlation of the lightning skills.”

Lightning attacks have two characteristics, the first is paralysis, and the second is a lightning strike on a target. If the other target is within 2 meters, a jumping arc will occur, causing the same damage to the second target.

This is the blame of the lord. No one knows how far his jumping arc can be. Long-range and melee have avoided each other according to Lu Yang’s requirements.

After 5 seconds.

“Thunderous”

100 thunderbolts split from the sky.

“15088”

Lightning struck the player, the jumping blue arc scattered around, and stopped at a distance of 5 meters.

“Hit 1.5 times longer than normal.” White Lion breathed a sigh of relief.

Lu Yang said: “Continue to attack, we are not far from victory.”

There are still 90 million health points left, which makes everyone see the hope of playing in the past. Ivis has not released other skills in the next period of time. Until 70 million health, Ivis Only then release the next skill.

“You are really making me so angry, I want to make you feel scared.” Ivis flashed a black light in his hand.

Lu Yang opened his eyes and said, “Everyone is ready to use the badge to relieve fear.”

The black light is a unique symbol of phobia. Lu Yang’s voice just fell, and Ivis’s hand was shining.

“Group Fear”

Lu Yang’s eyes were dark, and he immediately used the badge to relieve his fear. When he woke up, he found that he had just taken a step forward.

The same is true of others, and no one ran out two steps away.

Lu Yang said with satisfaction: “Yes, keep attacking.”

Ivis did not expect that his skill would be so easily resolved, and continued to use the group of ice arrows to attack.

When 50 million blood points remain, Ivis said angrily, "Your foul creatures, you should be with livestock."

A nine-color light emerged from his hand, and Lu Yang became a sheep, as did everyone else.

No one can use the skills in the state of sheep changing, and can not use the badge to disarm. All people can only output as a sheep.

Ivis said proudly: "Let you **** new skills, the shocking raging elves ..."

Lu Yang said: "All the people run to the side, he has to release his skills."

The crowd immediately ran to the boundary of the disk channel. In the state of changing sheep, their movement speed was only 30% of normal. Fortunately, Sun Yu's wind elf state did not disappear, and soon they ran to the boundary position.

"Shockwave"

A round golden light appeared at Ivis's feet, rushing around, without hitting anyone, only the ripples of the shock wave scratched Lu Yang and others.

Change the sheep state.

Lu Yang said: "Continue to attack, and finally killed him with 50 million health."

"Kill!" The White Lion roared back to Ivis's feet and continued to attack.

Ives was attacked again by everyone, and his blood volume dropped rapidly. When the last blood amount was only 10 million points, Ives snarled angrily.

“Since you want to kill me, I won’t show mercy again, let you **** final skill, black hole.”

A huge black hole appeared above Ivis’ head, covering the entire circular platform.

“5058”

Everyone’s health began to plummet.

Lu Yang said: “Pay attention to blood for treatment. Everyone attacked with all their strength. At the end of the 10 million blood, we have to win.”

Everyone attacked with all their strength, and the treatment was desperately adding blood. However, at this time, the treatment and the output of blue were almost exhausted.

The priest’s magic was the first to run out, and the Paladin immediately following the attack was no longer blue, and the mage was no longer blue. The only one who had blue was only Lu Yang.

Lu Yang said as he attacked: “The Paladin launched an invincible attack, we must kill him first.”

Ivis’s health dropped to 5 million points. He used the group’s Frostbolt, and Xiao Liang was the first one who couldn’t bear it and fell to the ground.

Lu Yang has the most blood, and he still insists that the entire Paladin regiment starts invincible desperate attacks.

4000000

3000000

2 million

...

10000

The invincibility of the Paladin disappeared, and all Paladins died in the next Frostbolt.

Lu Yang had 20,000 blood left, and he raised his hand to hit Pyramid's eyes.

"18980"

Ivis looked at Lu Yang in disbelief and said, clutching his chest, "I'm going to lose to you, these unknown soldiers."

System prompt: You killed Ivis

Lu Yang made a strong fist and said, "I won."

He used a goblin pacemaker to rescue Blue Feather. The first thing that Blue Feather resurrected was to look at the lord and found that Ivis was killed and jumped up excitedly, saying: "Awesome, we fight Won."

Lu Yang said, "I'm fine, save people."

Lan Yu nodded, and rescued Yeyue Tingfeng and other treatments using the resurrection technique. Each of the ten treatments saved people, and within a short time, all 100 people were resurrected.

The white lion and bitter love half-life ran to Lu Yang with excitement. The white lion said, "Boss, your command is great."

Lu Yang also did not expect to be able to fight past. His command this time did not use any of the skills of the previous life, which was exactly what skills the lord released, what skills he gave instructions for, and he was able to fight past, which surprised him.

Originally he was a little worried that such a fast copy of the customs can still respond to the lord in a timely manner every time. Will it be recognized by the system as knowing the play in advance or a strategy, so he wants to let the lord kill once Unexpectedly, this group of people was so powerful that they could see the move under his command and killed the great wizard Ivis.

Lu Yang said: "Let's see what equipment is dropped."

He clicked on Ivis's body and got 6 helmets shining silver.

Immortal Helm

Attribute: None

Lu Yang looked at Morns. At this moment, Morns was looking at Ivis's shrinking body with an unbelievable look.

"Master, can you help us lift the ban on these 6 pieces of equipment." Lu Yang asked.

Morns looked at Lu Yang and exclaimed: "No problem, you are too good, even Ivis can be defeated. He is the great wizard of Blood Elf Island."

Lu Yang shrugged his shoulders and said, "Trouble becomes a helmet for punishing the knight."

Moines took 6 helmets of the immortal, the light flashed, he returned the helmet to Lu Yang.

Immortal Infernal Helm (Excellent Gold)

Level: 60

Defense: 202-228

Magic resistance: 200—228

Strength: +160

Constitution: +280

Stamina: +110

Intelligence: +150

Additional physical attack: +223 points

Additional physical defense: +182 points

Additional physical penetration: +346 points

Additional Spell Resistance: +155

Suit 1/8

2 piece set: full skill level +1

4 piece set: 500 additional physical attacks

6-piece set: 500 additional physical defense points

8-piece set: 1000 magic points for all lines

Chapter 677 - Pompela

Lu Yang shared the attribute to everyone.

“Sure enough, the belt is a property, great.” Said the White Lion.

Lu Yang said, “Restore, let’s go and lay down a lord.”

“Okay.” The crowd began to recover.

Lu Yang said to Morns: “Master, who is the next lord and what skills?”

“It’s Pompeii,” said Moines. “He is the chief pharmacist of our Island of Blood Elves and a witch.”

“Master of Pharmacy?” Bitter Love asked with a frown, “It won’t be poison.”

Morns nodded and said, “Yes, he is best at attacking with toxins, and his toxins will form a poisonous area when they land.”

Everyone: “...”

The most annoying thing in the copy is not those monsters with high output. Generally, the monsters with particularly high output are easy to hit. As long as the equipment level is reached, they can resist it. The most headache is this poisoning.

This kind of lord has many skills and flexible play, which is the most people do not want to encounter.

Lu Yang said, "Can you tell me what skills you have?"

Morns thought for a while and said, "He will use toxins that reduce defenses and toxins that cause continuous blood loss. Both of these toxins cannot be dispelled. He will also summon General Sea Lion and mana shields. Skill, it's troublesome. "

"Can you elaborate more," the White Lion asked.

Morns shook his head and said, "I only know so much. This person is weird. I don't like to talk to anyone except the Queen."

Lu Yang saw that the people had recovered, and said, "Just a dozen will know, keep moving."

"Yes."

The crowd jumped up and followed Lu Yang to continue advancing, through the circular platform, and reached the top of a hill.

Here, everyone's eyes could not help but light up. Unlike the mountain, the scenery here is extremely beautiful. All kinds of exquisite high-level buildings, the ground is made of fine marble, all on both sides of the road It is beautiful flowers and plants, as if in the realm of the gods.

"From here we came to the superior elves area controlled by the queen. Be careful, the elves are very strong here."

More than 20 elven patrolmen came from a distance.

Lu Yang said, "Try it out, Xiao Liang, Zhuo Jiu, and Zhang Zibo pull the monster together."

"Ok."

The three rushed forward, Xiao Liang pulled 8 monsters, Zhang Zibo and Zhuo Jiu each pulled 6 monsters.

Blood Elf Patrol (Elite)

Level: 60

Qi and blood: 8000000/8000000

"It doesn't look like a lot of blood," Xiao Liang said.

"Lightning ball." After a patrolman recovered his sanity, he drew a lightning ball on his right hand and landed on Xiao Liang.

"3056"

"3048"

...

Xiao Liang's blood volume dropped quickly, he quickly exited outside the lightning ball, which resisted the attack, saying: "Be careful of the lightning ball, that thing keeps bleeding, 3000 points per second."

Zhang Zibo and Zhuo Jiu just avoided the lightning ball.

Lu Yang said: "The mage used group attacks to destroy them."

More than 30 mages used mass attacks, and soon 20 patrolmen died.

Lu Yang led the team to continue, killing more than 100 groups of patrols all the way to an altar-like platform.

An elderly female elf was constantly adding potions to a boiling cauldron.

Poison Belle (Lord)

Level: 60

Qi and blood: 220000000/220000000

The witch had a face armor on half of his face, and his arms were not red from the Snow Elves, but dark gray.

"Can we bypass the altar and not fight him?" Asked bitter love for a long time.

Beside the altar, there is a small path to walk over.

White Lion said, "You can try it, but I don't think it will work."

"Try it," bitter Ai said proudly for a long time, he felt happy for the way he had come up with.

As soon as the words fell, Moens went straight to the altar and came to Pompela, stunned for half a lifetime.

"Is this old boy stupid?" Said bitter love for a long time.

Everyone laughed.

Lu Yang said: "Don't try to be a coincidence. Let's go together. Set up the team and play the team the way I've just played."

The bitter love walked forward for a long time, came to Morns, looked over at the other side.

Morns looked at Pompeii in pain, and said, "How come you are like this, what are you doing?"

Pompela didn't look up, and continued to do the work in his hand. He said lightly, "Oh, it's Morns. Why did you come here? Oh, I see. You're here to find the queen."

Morns said, "Tell me Pompela that you used to be the most beautiful girl in our blood elf family. What made you what you are now."

Pompela said indifferently: "What matters is not important, what is important is that I am serving the queen, and the woman is me, and I give her most important work to me. I cannot live up to the queen's expectations. What's the point, can it raise my lover? "

Morns said silently, "I'm sorry, I didn't really notice that your lover was besieged by humans."

Pompeila's face showed anger. He turned his head and looked at Lu Yang and others, staring angrily at Moens, saying, "Damn Moens, you dare to collude with human beings against the queen. I will kill you .
"

"I never thought it would be bad for the queen," Morns said. "I really came to persuade her. Please let me pass."

"Go to death, the traitor of the blood elves." A flash of lightning struck Pompela's hands on Morns.

System prompt: Morns is in a coma, and the battle can begin

Lu Yang said: "Sure enough, this is a plot. Come on Xiao Liang, you are the first hate, Zhang Zibo is responsible for the second hate, and the third hate of the muddy wine. Once you are poisoned, immediately retreat and let the second hate resist him . "

The three nodded.

"Look at me." Xiao Liang, carrying a shield, aimed at Pompeii to launch his charge skills.

"Humans, I want to kill all of you. You killed my lover. I want revenge ~ www.mtlnovel.com ~ Pompela's body quickly swells into a 10-meter-tall elf giant.

"Corrosive Armor"

Pompeii sprinkled a handful of highly toxic powder and sprayed it on Xiao Liang's body.

System prompt: your armor is reduced to 0

"Fuck." Xiao Liang rolled back in place, avoiding Pompelella's following staff, and said, "My armor has been reduced to zero."

Zhang Zibo resisted the shield and blocked Pompey's attack.

Lu Yang sprayed two poisons and said, "Ding-dong cats drove storms.

Paladins such as the White Lion and the bitter half-life rushed forward to attack, and others such as Heiyan and Nanfeng Zhiyi attacked from a distance.

"12286" (Critical Strike)

“This lord blame the French resistance is not high.” Hei Yan said.

Chapter 678 - Poisonous water

Pompeii’s blood volume dropped rapidly, and just over a minute later, more than 30 million of his blood was killed.

“Taste my poison.” Pompela pointed his finger at Zhang Zibo, a green powder covering his body.

“10128”

“10128”

Zhang Zibo rolled over quickly, dodging Pompela’s attack, and shouted, “Give me blood, this poison is too fierce.”

The muddy wine poured over the top of the shield.

Both Lan Yu and Yeyue Tingfeng fully treated Zhang Zibo for 10 seconds before saving Zhang Zibo back.

“This toxin is too fierce.” Zhang Zibo said in fear.

Pompela said, “What is it, try my poisonous soup.”

She put her hand in the boiling pot, grabbed a dark green venom and threw it around the altar.

Lu Yang watched a piece of poison hit him, and he quickly avoided it.

The poison did not disappear immediately after landing, but kept expanding and turned into a circular toxic water circle with a diameter of 5 meters.

The dark green poisonous water was constantly tossing and bubbling on the ground, and a large amount of poisonous mist was emerging.

Lu Yang looked around. Everyone was fussed by poisonous water, and it was quite good from a long distance. The melee was particularly unlucky.

Lu Yang said, "Zhuo Jiu took the lord to the side for 10 meters."

"Okay." Zhuoshu also found the problem and gradually moved to the side.

Lu Yang said: "Long-range dodge skills and continue to attack."

"It's not difficult to dodge," said the knight in black.

The crowd continued to attack.

Pompeii saw that the poisonous water had no effect, and poured muddy wine with a finger in his left hand.

"Air blast"

The muddy wine was dumped and fell to the ground, and a dizzy symbol appeared on his head.

Pompeii was in a state of no hatred, looking at the white lion and others behind him.

“Red Mist Bloodthirsty”

Xiao Liang roared to take over the place of the muddy wine, Pompelia’s gaze was forced back.

“No one can stop my revenge.” Pompela struck Xiao Liang’s shield with a wand.

“15628”

“The attack is so high?” Xiao Liang said.

Lu Yang said: “Treatment plus blood, don’t let Xiao Liang fall.”

All 10 priests focused their eyes on Xiao Liang, and it took 5 seconds for Pompelia to change his attack mode.

“Your attack made me feel pain. It’s been a long time since I felt it.” Pompela raised her hands above her head.

“Vine entwined”

Thick grass appeared at the feet of everyone, binding the players.

“3000”

“3000”

...

Lan Yu used the group to disperse, but found no use, saying: "This skill cannot be dispelled."

Lu Yang's white light flickered, and he jumped out of the water grass and said, "Mage uses flash, Paladin uses blessing of freedom, 6 priest groups add blood, and 4 priests are responsible for Xiao Liang."

Xiao Liang could not use the escape skills. He only had one jump. If he jumped out, the hatred of the lord's monster would become Zhang Zibo. Without knowing the follow-up skills of the lord, he could not do so.

Pompeila wielding the wand in his hand, coupled with the damage from the waterweeds, can kill Xiao Liang's 20,000 blood every second.

Xiao Liang had a total of 60,000 points and could only resist 3 times. The crowd watched his blood volume rise and fall, as if there was a danger of death at any time.

Xiao Liang was also startled. He could only do his best to resist the attack of the lord. After 30 seconds, the entangled plants disappeared.

"Damn humans, you should taste the pain of death." Pompeila did not kill Xiao Liang, and his right hand was angry.

A black space portal appeared on his side.

"Hello ~!"

A loud roar came from the portal.

"噫"

"噫"

The portal shook violently. Just as everyone looked at the portal, a green giant jumped out of the portal and rushed towards melee.

Demon Sea Lion (boss)

Level: 60

Qi and blood: 18000000/18000000

“And the boss?” Said the White Lion.

Lu Yang said: “Zhang Zibo picked up the monster and resisted him.”

Zhang Zibo turned his head in front of the demon sea lion, and a sword was cut on his body. Han Fei used continuous archery to help Zhang Zibo trigger 3 consecutive red mist slashes.

“5000”

“5000”

“5000”

The hatred of the demon sea lion was pulled back to Zhang Zibo.

Lu Yang said: “Kill the sea lion, you can’t let him summon two.”

Melee and long-range collectives ran towards the location of the Sea Lion.

Pompeii gave a contemptuous smile and said, "It's so easy to kill my pet, poison."

She reached into the boiling pot again, and a bolus of medicine condensed in the palm of his hand, pushing her left hand forward.

The poison ball turned into a green solution poison arrow and flew around.

A piece of poison fell at Zhang Zibo's feet.

"10188"

"I'm dizzy." Zhang Zibo hurriedly evaded, and even stepped back 5 levels before stopping.

Fortunately, Han Fei has been using continuous archery to trigger Zhang Zibo's Red Mist Whirlwind. Otherwise, just Zhang Zibo's avoidance was enough to make the hatred out of control, which would be equivalent to destroying the regiment.

Lu Yang was startled. When he played the copy, he was most afraid of being hit by unexpected skills. Fortunately, Zhang Zibo and Han Fei responded quickly.

Heiyan avoided a piece of poisonous water and said, "Boss, why didn't the last poisonous water dissipate."

Lu Yang said: "It may be that this poisonous water has always existed, and everyone speeds up the output. At this speed, Pompera puts poisonous water two more times, and we can only stand together."

The poisonous water released by Pompeila will not disappear unless the whole regiment is destroyed, otherwise it will always exist. The diameter of the altar is only 50 meters, and Pompeii can cover it by releasing the poison 5 times.

This level tests both the player's equipment and the player's reaction. It is a very difficult level.

Fortunately, no one has died yet ~ www.mtlnovel.com ~ It is easy to fight, Lu Yang can only say that the group of people in front of him are all masters.

Generally speaking, as long as the defense is slightly wrong or there are some accidents, the first ones to die are these melee occupations. As long as the lord subsequently attacks and casually inflicts more than 50,000 blood damage, the White Lions have no chance to open the invincible. Will be spiked. ,

However, none of the 50 paladins of the white lion and bitter love died for all of their 50 paladins. Everyone saw Zhang Zibo had a problem, and the white lion holy flames chasing before them fell on the sea lion, and the cricket was at the last 1 cm. Stopped the attack.

Zhang Zibo pulled the sea lion back and said, "Export it, I'll hold the hatred."

The White Lion and others started to attack. Only 18 million **** sea lions were quickly killed. The crowd turned their heads and continued to attack Pompeii.

All Pompela's attacks have been used. When used again, Lu Yang's command was much easier, and the command took the team several times to escape the key time of Pompela.

Five minutes later, Pompela had only 10 million points left.

Chapter 679 - 4 lords

Lu Yang said, "Everyone be careful, the last stage."

Overlord monsters will have one of the strongest skills in the last stage, often this skill will play a role in reversing the war situation.

“Poison Mist”

Pompeii lifted up the boiling vat and turned the venom into a mist of fog covering the altar.

The four previous poisonous fogs have left all of Lu Yang with no room to hide, and everyone can only stand on a place less than 30 cm wide to output.

The poisonous mist drifted and everyone was hit by the poisonous mist.

“8088”

Lu Yang said: “In areas with a large number of treatment tubes, stand alone, don’t take care of those with less blood.”

Normally, the best way to play this level is for everyone to orderly stand in 2 groups, a remote group for melee, and when the lord attacks the poisonous water, everyone gradually approaches the same place.

At the end of the 10 million blood, everyone’s stand will stand together. In this way, the treatment group will brush the blood and will not let anyone die.

For the first time, Lu Yang did not dare to let everyone stand like this. As a result, more than 20 mages and more than 10 paladins were in a separate state.

The invincibility of the Paladin had been used, and the ice barriers of the mage had also been used, and they died after insisting for three seconds.

Lu Yang took the team and others to the full output, and when the whole regiment was about to destroy the regiment, only 2 people were killed.

“Did I just die like this, I don’t want to be reconciled.” Pompela fell to the ground weakly.

System prompt: Congratulations to player Lu Yang for killing Pomella

Lu Yang said to those who returned, "Resurrect the dead."

"Yes." The crowd was rescued immediately, and soon all the 100 members of the regiment were resurrected.

I ran to Lu Yang for half of my life and asked, "Boss, what kind of equipment came out this time."

Lu Yang said with a smile: "It's the armor of the immortal. Please help Monns to identify it."

Morns stumbled over Pompela's body and said, "Great, none of our witches can beat you."

The light flashed in the hands of Mornes, and the armor showed a silver light.

Immortal's Infernal Battleplate (Excellent Gold)

Level: 60

Defense: 398—462

Magic resistance: 390—460

Suit 1/8

2 piece set: full skill level +1

4 piece set: 500 additional physical attacks

6-piece set: 500 additional physical defense points

8-piece set: 1000 magic points for all lines

“The attributes of clothes are twice as high as those of helmets. It seems that we were wrong in the original calculations,” said bitter love for a long time.

Lu Yang said: “Three things, continue.”

Everyone nodded.

Passing through the altar, he killed the blood elven patrol and came to a palace.

The palace is made of exquisite white marble and the carpet is blue, leading from the palace door to the innermost throne.

Morns said excitedly, "There is the Queen's throne. Finally, I have come to the Queen's palace. Her Royal Highness, are you there?"

Directly in front of the Queen's throne, four black lights flashed, and four blood elves with black lights appeared all over their bodies.

Four Councils · Magister Andrei (Lord)

Four Councils · Assassin Dilcar (Lord)

Four Councils Berserker Garcia (Lord)

Four councils · Holy Priest Landnor (Lord)

Morns went to the four with anger on his face and pointed at them and cursed, "It's your four **** who are misleading the queen, tell me where the queen is."

Magister Andre, wearing a black cloak, arrogantly disdainful of Morns, said, "You don't have this qualification."

"You, asshole." Morns was furious, but there was nothing he could do.

Saint Priest Randno said in a cold female voice, "Go back to Morns. For your part, you have served the queen. We can forgive you and stay in the village quietly to prevent the invasion of foreign enemies."

"No, I won't give up. I've come here. I want to see the queen." Morns said.

Berserker Garcia snorted: "Tell him what to do and kill him. He brought the aliens, **** it."

A black light appeared in Andre's hand, pointing at Moines.

"Death Beam"

Morns was hit in the heart and fell to the ground.

The system prompts: Morns is dying and must be rescued within 10 minutes. The countdown to the battle begins.

"It also has a countdown, this slap, 4 lords." Hei Yan said dumbly.

Four Councils · Magister Andrei (Lord)

Level: 60

Qi and blood: 60000000/60000000

"Each of them is 60 million blood, and the four together add up to 240 million blood." Said bitter love for a long time.

Lu Yang said: "I'll assign anti-strange, Xiao Liang fights violent wars, muddy wine pours against thieves, Zhang Zibo resists pastor, I will fight against that wizard."

The output of the violent battle is only Xiao Liang's high defense can resist, the thief has stealth skills, only the contribution of muddy wine can fight him out, the priest is relatively simple to let Zhang Zibo this new defense fight, the most difficult is the magic teacher Only Lu Yang can resist.

Everyone nodded.

Han Fei said: "Fortunately, these four monsters don't have much blood, and it is easy to kill one."

Lu Yang said: "Open strange."

He raised his hand to hit Andre's head with a blast, and turned to run to the left of the hall.

"2500" (Critical Strike)

"Human, let me see your power and see what ability you have to come here." Andrei turned into a 5-meter-tall giant and ran towards the landing sun.

Xiao Liang and the other three blame each other. After the hatred stabilized, the White Lion and others locked their targets on the violent battle.

"2500"

"5000" (Critical Strike)

...

"Why are our injuries so low?" White Lion asked the angel of punishment in surprise.

"The same goes for our mage." Hei Yan said.

"Look at it, four people lost blood together, we hit one equal to four people, and each person's blood was evenly distributed." Nanfeng said intently ~ www.mtlnovel.com ~ This is hard to fight. "Han Fei said.

"The power of the Holy Light." The Holy Light emerged from the hands of Holy Priest Randno, and instantaneous Holy Light added blood to the fury.

“30000”

“Battling,” said the White Lion.

Lu Yang said: “Han Fei went to help Zhang Zibo. You two should discuss the skills to interrupt. Don’t let Rev. Sheng use big blood-adding skills.”

Han Fei nodded and came to Zhang Zibo and said, “You are the first to interrupt, and I am the second.”

“The power of the Holy Light.” Rev. Holy read the spell, Zhang Zibo’s shield slammed on his face, interrupting the ability to add blood.

Lu Yang escaped Andre’s Pyroblast and said, “Yes.”

Andrea growled angrily: “Human, your enemy is me, and you dare to despise me, and the soul is extracted.”

Chapter 680 - Three seconds of shock

Lu Yang raised an eyebrow.

“Fire Shadow-Activated”

A reddish ray of light appeared in front of Andre with his left hand full of flames, and punched Andre’s chest.

“The Sun Fist”

Andre’s skills were forcibly interrupted, and he flew backwards a distance of 5 meters.

“Meteorite Impact”

A huge meteorite fell on Andre’s body, causing huge damage every second as he moved backwards.

“Destroy the Sky”

A crimson flame fell in the sky, hitting Andre’s head.

“2500” (Critical Strike)

Andre was snarled in anger by Lu Yang’s unrelenting beating.

“Dark energy, I need your protection”

A cloud of black energy wrapped Andre.

The system prompts: Andre takes 75% less magic damage and heals 75% less healing for 30 seconds.

Lu Yang pointed at Andre with his left hand.

“Spell Steal”

Black energy was transferred to Lu Yang.

“Damn, this is my magic, you dare to steal him.” Andre’s staff pointed at Lu Yang, and a black energy bomb fired quickly.

Lu Yang doesn’t evade, he hard-wired this skill.

“5000”

Lan Yu’s healing technique landed on Lu Yang, and his health was restored to full value.

Lu Yang made a good gesture to Lan Yu, using Pyroblast and Andre to attack.

Andre is easy to carry, the difficulty is where the Berserker, Garcia’s high attack power makes Xiao Liang difficult to resist.

“10628”

“20822” (Critical Strike)

“10625”

...

Five priests are responsible for adding blood to Xiao Liang. His blood volume is constantly rising and falling, and there is a possibility of death at any time.

“The first time I met a lord monster that would crit.” Yeyue said frowning at the wind.

“Thunder Shock”

Garcia lost 5 million points in his health and stepped on the ground with his right foot.

“15068”

The white lion and others around him were attacked by 15,000 damage at the same time.

Immediately used the two treatments to add blood. The priest Saint was about to chant a spell, and Han Fei kicked off.

Assassin Dilcar burst into smoke and disappeared.

“Dedication”

A sacred flame appeared within 10 meters of the turbid wine pouring down, kicking Dilkar.

“Damn.” Dilkal could only continue to attack the muddy wine pouring.

“Dark Punishment”

Andre suddenly released a spell, and 100 Shadow Arrows hit everyone at the same time.

“15000”

“15000”

...

Everyone lost 15,000 blood.

"I'm out of blood." Xiao Liang was just hit once, and was suddenly attacked by the Shadow Arrow. He immediately turned on the shield wall, increasing his health by an additional 40%, barely blocking the attack from the violent battle.

"+10000"

Yeyue Tingfeng's three consecutive powerful treatments increased Xiao Liang's blood volume to full value.

"Flame Storm"

Andrei spelled it out again, aiming at the position where Yeyue listened to the wind.

"8000"

Night Moon heard a blaze of fire within a radius of 10 yards around the wind. Fortunately, he was the only one within 10 yards.

"3000"

"3000"

Yeyue just heard that the wind just woke up, with only 6,000 blood points left, and found that the heat left by the flames had been hurting him, so Xiao Liang hurriedly ran outside.

"Thunder Shock"

Berserker Garcia stepped on the ground.

"15068"

Xiao Liang's health dropped again, and another priest increased his blood by 10,000 points.

"Lethal Strike"

Garcia chopped an axe on Xiao Liang's shield.

"36286"

Xiao Liang has 22 points left in his blood.

"I'm dying."

Zhuojiu poured his right hand against the thief, and his left hand pointed Xiao Liang.

"Holy Healing"

A holy light appeared on Xiao Liang.

"+35628"

Xiao Liang saw that his blood was recovered, and turned his head to glance at the muddy wine with thanks.

Yeyue heard the wind just ran out of the flames and said, "Don't worry, I'm alive, I'll give you blood."

Lu Yang thought the group was over. He couldn't think of the speed of muddy wine at such a critical moment. He said, "Lan Yu can help Yeyue listen to the wind. I can do it alone."

Lan Yu knew Lu Yang's strength and turned to Yeyue to listen to the wind and add blood. With one more treatment, Xiao Liang's blood volume finally stabilized.

After 30 seconds, Andrei no longer uses range skills and continues to attack Lu Yang.

"Dark Arrow"

The black magic arrow went straight to Lu Yang's body. The lord released the skills very quickly, the ballistic time was only 0.8 seconds, and the damage was 20,000 points.

Lu Yang's blood is not much, he can only resist three times, and the fourth time will undoubtedly die, he can only evade, and he evades for less than 0.5 seconds, such a speed makes Lu Yang can only predict.

Fortunately, though, he knew the secret. Before each time Andre released the magic arrow, his left hand had a starting position, which could be captured in less than 0.5 seconds, as long as the dodge was completed at the moment the starting position was started. , You can avoid skills.

Lu Yang avoided more than 50 magic arrows in a row, and the health of the four councils dropped to 40 million points.

"Dark energy, I need your protection." Andry uses magic resistance.

Lu Yang was about to hold on. He stole the magic immediately and was relieved when standing in place. Lan Yu kept paying attention to Landing Yang and saw that he was so desperate that he was very worried about Lu Yang's body.

Lu Yang saw Lan Yu's eyes, smiled at her, and said, "I'm fine. Be careful with Andre's range magic."

After Andrey roared, pointed at Xiao Liang's left hand, and a black ripple appeared under his feet.

"Flame Storm"

Lu Yang fiercely opened his eyes and shouted, "Invincible in close combat, Xiao Liang stepped back, and he tried his best to keep Xiao Liang."

This is the most helpless team destroying skill. If Andre and Berserker Garcia attack Xiao Liang together, Bacheng will kill Xiao Liang.

At the moment when a crimson flame rose at Xiao Liang's feet, Garcia's sword bleed red blood.

"Lethal Strike"

"38628"

"15000"

Xiao Liang's 60,000 HP instantly left just over 6,000 points.

"3000"

In the 2 seconds that Xiao Liang was stunned, the flames under his feet caused him a high amount of damage. Just when Yeyue listened to the wind and other people madly added blood, and Garcia continued to attack, he had not used the assassin of range attack skills. Dilcar took countless flying knives from his backpack and spun them out.

"Blade Whirlwind"

100 people, including Lu Yang, were also injured by flying knives.

"15000"

Xiao Liang has exactly 1 point left.

"I am dead, find someone to replace me." Xiao Liang shouted in horror.

All the priests such as Yeyue Tingfeng and Lan Fei are counting the time at this time ~
www.mtlnovel.com ~ No one can add blood to him, just when Berserker Garcia is about to fall on Xiao Liang.

"11008"

A pure white cure fell on Xiao Liang's head.

Xiao Liang is no longer familiar with this white skill, and it is Lu Yang's cure.

"The boss is pretty." Xiao Liang shouted.

"10068"

Garcia cut it off with no slam, and Xiao Liang's blood remained, but at this time the skills of Yeyue Listening to the Wind and others were released and added to Xiao Liang at the same time.

"10028"

"11169"

...

Xiao Liang is full of blood.
