

Chapter 71 - Valley fight

At this time, the three talents in Yuxueba just stood firm, and they were shocked to see the situation on the field.

“How is this possible?” Yuxueba said in horror.

In just a few seconds, 8 of them came and 4 of them were killed. At this time, the three of them were secretly looking for a chance to approach the night lone star of Lu Yang.

Lu Yang sneered, saying a spell in his mouth and raised his hand to hit a mage with a blast.

“336”

The mage died immediately!

“Quickly counteract spells, counteract him quickly.” Yuxueba shouted in horror to the only magician left.

“I can’t fight him, he’s casting too fast.” The mage shouted in horror.

Lu Yang sneered. Those who could counter him in his last life could count with one hand, but this one did not include the mage in front of him. He raised his hand to kill the last mage with a Pyroblast, and then he did not speak to Yuxue Bawang. Chance, another Pyroblast killed him on the ground.

At this point, there was only one last thief left in the venue. Ye Guxing saw that all the 7 people brought to him killed Lu Yang. He was so scared that his liver and gallbladder were cracked, for fear of being killed by Lu Yang and blasting his equipment.

His equipment is silver-level equipment purchased by Bloodthirsty Bully from other players at high prices. If it explodes, he cannot explain to Bloodthirsty Bullet.

However, it is impossible for a level 5 thief to escape in front of a level 10 mage.

A difference of 5 levels, the stealth of the thief in front of Lu Yang is the same as no stealth, Lu Yang can clearly see Ye Guxing bow and escape.

He flickered to Ye Guxing next to him, and said with a sneer, "Do you think you can run?"

"Resistant Fire Ring"

A fiery red ring suddenly popped up on Lu Yang's body, and flew Ye Guxing down, hitting the wall heavily to reveal his figure.

"You dare to kill me, I'm a bloodthirsty man." Ye Guxing stared at Lu Yang with a shy expression.

Before Death Night, Lone Star wanted to come up with the name of the Bloodlust Alliance, and Lu Yang sneered, saying, "What a Bloodlust Alliance is."

A ball of fire ignited in his hand, and a blast hit the night lone star.

"336"

"Our bloodthirsty league will not let you go." Ye Guxing had no time to make this unwilling scream and was killed by Lu Yang on the ground.

It took less than a minute from Lu Yang's sneak attack to the end of the battle. It can be seen how powerful Lu Yang is now.

He took a look at the equipment that eight lonely stars burst from, including two pieces of silver-level equipment and six pieces of bronze-level equipment.

"The bloodthirsty bully must be half-dead," Lu Yang thought.

These equipment are not a matter of money, but because there are too few people selling them. It takes a lot of time to get them out again.

Lu Yang put these gears in his backpack, and suddenly a sharp snoring sounded from behind him.

System prompt: You killed 3 black snakes and gained 6000 experience

Lu Yang looked back and saw that the three black snakes were chopped to the ground by the sword of Eternal Sword Guard. At this time, the blood of Eternal Sword Guard left 3000 points, which is equivalent to only 200. Just a little blood and killed three black snakes.

He had to admire the ability to return blood to Eternal Sword Guard, which increased his confidence a lot. In the last life, he just heard people say how strong Eternal Sword Guard is. Now that he saw it, he was really sure. Wei is really overbearing.

Lu Yang came to the three black snakes and looked at the exploded equipment. Among the many potions, a skill book was placed in front of Lu Yang.

He quickly picked up the skill book and looked carefully.

Blazing Bird

Type: Fire Spell

Cost: 45 mana

Cast time: 3 seconds

Distance: 30 yards

Description: Intermediate mage skill. The mage transforms magic into a huge flame bird and throws it at the enemy, inflicting 225 spell damage to a 3 yard diameter area around the target.

Lu Yang finally has the first formal range attack skill, regardless of the cast time of this skill is 3 seconds, but this skill also has a simplified spell, which can be simplified to instantaneous.

The second item is a snake venom sac. There is no explanation on this surface. In fact, it is used to increase the power of snake venom beads. There are records in the previous life.

The other items were some instant recovery potions. After Lu Yang put everything in his backpack, Lu Yang did not step out of the Serpent Valley, but returned the same way. It took him 6 hours to reach a crossroad on the level 20 map.

The north direction of the crossroads indicates Baiguang Town, but this time he is not going here. Lu Yang looked at the sign on the left, showing an island on the seaside. He turned and walked towards this place.

After 4 hours, Lu Yang came to this small island, this place is a level 25 map.

However, this island is quite special. There is only one fishing village on the island. Players have no way to get here through teleportation, only walking.

The reason why Lu Yang came to this island is that in a cave on this island, there is an artifact he dreamed of, a level 30 sub-legendary weapon, the magic fire staff.

In order to enrich the fun of “Second World” ~ [www.mtlnovel.com](http://www.mtlnovel.com) ~, a high-level epic weapon is added with a special effect called levelless restriction.

This type of special effects are only available for epic weapons, but it is not appropriate to classify them as epic and it is not enough to count them as legendary. To facilitate the distinction, players gave them a name called sub-legendary.

Although it is only the Asian legend, this kind of weapon is very rare in the game. In the last life, you can hit the Asian legend weapon, and no one will announce the location.

The reason Lu Yang knew that there was a small island on the seaside was because of internal financial internal conflicts in a studio in the past life, so he leaked the news.

He used to complete the challenge of the Joker Emperor to obtain the dream ring, and spent more than 10 hours to upgrade the sword of Eternal Sword and Guard, all for this sub-legendary magic fire staff.

Lu Yang took a short break in the fishing village, and after the fourth rebellion of Eternal Sword and Blade Guard, he regained the Eternal Sword and Blade Guard with the ring of dreams and ran out.

Through the rainforest on the southeast side of the island, an ancient ruin appeared in front of Lu Yang.

The majestic blue city wall has become dilapidated under the erosion of wind and rain. Green moss is spread on the wall. In the middle of the ancient city, there is a huge palace.

According to the official data of the game, in ancient times, this place was originally the king city of the humanoid Neil.

For unknown reasons, the Neil disappeared leaving only an empty city and a killed king.

## Chapter 72 - Neil Palace

Over a long period of time, these dead Neil tribe turned into soulless zombies and skeletons.

The lowest level is called Evil Zombies, level 25 ~ 27, and is shaped like a humanoid monster with red skin and a sword in their hands. They are all around the ruins.

Lu Yang came to the main entrance of the ruins, and two evil zombies were walking back and forth for no purpose.

Ghost Zombie

Level: 25

Qi and blood 3660/3660

Lu Yang aimed at one of them, raised his hand and hit him with a blast.

“732” (Critical Strike)

Two evil spirit zombies locked Lu Yang at the same time, and slowly walked towards the landing sun.

The slow moving speed of the monster is a major feature of this map. Although the monster level here is high, the moving speed is only a quarter of that of the ordinary monster.

The Pyroblast technique released by Lu Yang had a stiffening effect. The zombie attacked by him stopped dead in one place and died, while another evil zombie came to a position 20 yards away from Lu Yang.

Eternal Sword Guard rushed up and slashed on the body of the evil zombie.

“206”

The evil spirit zombie raised his sword and slashed at Eternal Sword Guard.

“-1”

Don't break defense! This is where the Eternal Sword Guard is the most powerful. Even the level 25 physics monsters are not broken against the Eternal Sword Guard.

Lu Yang released Pyroblast and killed the evil spirit zombie. After seeing that both monsters did not explode, he continued to walk towards the ruins.

There is a lot of space inside the ruins. Since Lu Yang was the first to come here to open up wasteland, there are many evil spirits and zombies inside.

If it was the case before, Lu Yang would need to carefully and slowly kill a strange one to get into the interior. Now with the Eternal Sword Guard and Blazing Bird, the way to fight monsters has become much easier.

He ordered the Eternal Sword Guard to run into the monsters, and after attracting forty or fifty zombies, Lu Yang uttered a spell, and a flaming firebird burning in his body appeared in his hands.

He pointed at the zombie swarm with his hand, and the firebird hissed and flew towards the target after flying up into the sky.

“412” “832” “417” “488” ...

In a split second, dozens of damage numbers rose up in the zombie group, this is the Blazing Bird of Fire Skill.

A total of only 3660 blood of the evil zombies was instantly destroyed, but a cloak with spores reduced hatred, and the evil zombies still aimed at the Eternal Sword Guard.

However, the damage of the evil zombies is too low. You can only hit 1 point of blood against the Eternal Sword Guard, and the attack range of the Evil Zombie is all melee. Except for the few zombies that surround the Eternal Sword Guard, other zombies are completely Can't hit Eternal Sword Guard.

Lu Yang released more than 20 burning birds in a row, killing all these dozens of zombies.

Because it is level 15 and above, Lu Yang gains an additional 150% of his experience. These dozens of zombies have increased his experience to level 10 and 10%.

In order to bring this Eternal Blade Sword Guard, Lu Yang wasted more than 20 hours running the map back and forth. Many people on the level list chased him up. He felt it would be a good upgrade here if he hit the staff of the magic fire. select.

"Boss, I'm offline." Xiao Liang sent a message.

It's been 20 hours in a row, Xiao Liang couldn't hold off the line to rest, Xia Yuwei and Lan Yu went offline 4 hours ago. Sun Yu also went offline when Luyang ran back to the seaside island. Already.

Lu Yang said, "Let's take a break. I'll go down for a while."

Xiao Liang replied, and went offline to rest, while Lu Yang continued to explore the ruins.

Two hours later, Lu Yang came to the center of the ruins and saw a giant palace.

System prompt: You found the Neil Palace

Lu Yang walked into the gate of the royal palace. The interior of the palace is composed of black marble, with a red carpet in the middle, and many circular pillars on both sides supporting it.

Although the interior space is very dark, because there are windows around, Lu Yang can clearly see the situation inside through the sun.

He took the Eternal Sword Guard for a while, and a skeleton wearing a yellow shabby cloak and a pure steel spear in his hand climbed up from a column.

Skeleton Lancer

Level: 28

Qi and blood: 4110/4110

According to the game records, the Bone Lancer was originally a Guard in the Neil Palace, and became like this after death.

Lu Yang ignited a flame in his hand, and a series of six blasts killed the pike lancer and continued to walk inside.

After passing through the guard hall, maid district, and garden, Lu Yang came to the royal district.

The royal family is divided into six sections. In front of Lu Yang is a promenade, on the left is the barracks of the Guard, and in the middle is the King's Hall.

The boss Lu Yang was looking for was in the King's Hall. Just as Lu Yang was about to run towards the King's Hall, a lot of sounds of skeletons running and players shouting came from the right side of the promenade.

Lu Yang frowned. He could come to this place at this level, except for himself.

He immediately walked towards the right side of the promenade. In his memory, there is a hounds room on the right side of the promenade, which contains dozens of bone hounds.

"Brothers, think of a way, I can't hold on."

“Boss, let’s die and go back. There is no way to fight here.”

“Hold on, let me think of a way.”

“Boss, what else do you want, who can come to level 30 maps like me like this?”

...

In the Hounds Hall ~ [www.mtlnovel.com](http://www.mtlnovel.com) ~ Multiple skeleton hounds are standing under the three pillars and barking. On the pillars, 5 players are holding the edges of the pillars.

Lu Yang walked into the hall and saw these five people. He couldn’t help but asked, “What are you doing?”

Seeing Lu Yang stunned for a moment, he shouted excitedly: “Brothers, run, these hunting dogs are very powerful, and you can’t resist them.”

Lu Yang was amused. I didn’t expect this person to be of good quality. In such a “dangerous” situation, he still knew to let himself escape.

“What’s your name and how did you come to this place?” Lu Yang asked.

He did not immediately rescue these people, because Lu Yang wanted to determine the identity of these people. If he was the enemy of his last life, he turned and left.

Seeing Lu Yang so calm and can’t help but show a surprised expression, he carefully looked at Lu Yang and said, “My name is Zhuo Ji Qing, a Paladin. The brothers around me are different. It’s called Mao Qiu, Ye Yue Ting Feng, Sword Knife, and Vulcan M16. Brothers must have a way to deal with these monsters if you are so leisurely. If you can save us a few, I will owe you turbid wine. “

The muddy wine is pouring ...

Lu Yang felt that this person's name was familiar. He remembered that in his last life, muddy wine pouring and Yeyue listened to the wind were a few well-known casual players. Later, he owed to the gods of the Twilight Union. among.

### Chapter 73 - Righteous Brother

The skills of several people are superb, and any one person can stand on their own, but because of the lack of humanity, several people have followed the killing alone.

However, the solitary killing of this man was stingy and of poor character. Eventually, the players could not stand it, and a large number of main forces left. After that, he was attacked by six unions. The union that failed to kill alone completely failed, and he quit the game.

People such as Zhuo Jiu Pour Duan and Ye Yue Ting Feng recovered their freedom. Other unions wanted to recruit them, but a few others did not join the union.

Lu Yang can be sure that these people are definitely affectionate people, not to mention whether they will be repaid in the future, just their character, it is worth Lu Yang's help.

"Let's just leave it alone, you can hold on for a few more seconds." Lu Yang issued an instruction to the Eternal Sword Sword Guard, and the Eternal Sword Sword Guard rushed to the Bone Hound immediately, launching a skill taunt.

More than 30 bone-hunting dogs looked at Eternal Sword Guard at the same time, and immediately came towards him.

Lu Yang chanted a word, and a big red bird transformed from a flame appeared on top of his head.

“Blazing Bird”

The firebird hissed and dived from the air to the bone hound.

“848” “826” “412” “476” ...

A large number of red injury figures emerged from the bone hound’s head.

The turbid wine pouring and Yeyue listen to the wind were all silly.

“Is this Fire Skill?”

“A curse?”

“Boss, we are not playing a game with him. Why is my attack power more than 40, but he played more than 400.” Vulcan M16 said.

“He doesn’t have any hate yet, have you found it?” Yeyue heard the wind.

This was also discovered by the turbid wine pour, saying, “Maybe some special equipment.”

The Bone Hound is also a 28th-level monster with 4110 points of blood and blood, and Lu Yang easily killed more than 30 Bone Hounds with 9 consecutive Flaming Birds.

Zhuoju pouring and others jumped off the pillar, and several people came to Lu Yang in front of them.

“Thank you, if we weren’t for you, we would be dead this time.” The turbid wine poured on behalf of Yeyue to listen to the wind and others.

“You’re welcome. Raise your hand.” Lu Yang said.

Zhuo Jiu said with a serious expression: "No, you have helped us a lot because of you, we have kept one baby. This kind of kindness, I will remember that, and I need something from our brothers. One. "

"Boss, you just told the baby." Mao Qiu said.

"Otherwise this thing will burst out, or it will be in the hands of this brother." Zhuo Jiu shrugged his shoulders and looked at Lu Yang. "Brother, I don't know what your name is yet."

"My name is Lu Yang." Lu Yang said.

"You're Lu Yang !?" A few people were stunned when they were stunned, and they looked at Lu Yang carefully.

Mao Qiu asked: "Is Lu Yang on that list first?"

Lu Yang knew that several of them would have this expression, and said, "It's like a fake replacement."

"No wonder," Yeyue heard the wind said, "I said who dares to come here to upgrade alone, it turned out to be the first master of the rankings."

It's a bit embarrassing to pour the muddy wine. I can't think that Bao En will be reported to the top master on the ranking list. They are only 5th grade.

Lu Yang also found the embarrassment of muddy wine pouring, patted his shoulder with a smile and said, "You're welcome, meeting is fate, and make friends."

Lu Yang took the initiative to add a friend to Zhuojiu.

According to the idea of muddy wine pouring, the masters have some arrogance. They are masters in other games, and they also have some strange tempers, but he didn't expect that Lu Yang was so unsophisticated. Suddenly, it made him real. Heart of friendship.

Zhuoju poured in his consent and then introduced Lu Yang to his friends. Lu Yang also added Ye Yue Ting Feng and Mao Qiu as friends.

“How did you come to this place?” Lu Yang asked curiously as he sat down and rested to recover his magic.

Mentioning this incident, people like Zhuo Jiu pouring and Yeyue Tingfeng all showed helpless smiles.

“Don’t mention it, let me show you this equipment first.” Zhuo Jiu Qing poured a golden book to Lu Yang.

Book of Light

Level: 10

Position: Jewelry

Defense: 20-20

Strength: +10

Stamina: +10

Constitution: +10

Intelligence: +10

Description: The Holy Light empowers those who believe in him by bringing this Book of Light to you, and you will get unexpected results.

“Book of Holy Light.” Lu Yang almost stood up in surprise and said, “You got this thing at this level?”

“Do you know it?” Zhuo Jiu poured and others looked at Lu Yang.

Lu Yang knew more than that this book of holy light was quite famous in his last life, and was the top item of god-level equipment after the heart of the demon god.

“You must keep this thing well, and don’t let anyone other than me know this piece of equipment, let alone sell him.” Lu Yang said to Duzhuo seriously.

Several people were a little surprised at what Lu Yang said so solemnly.

“Master, is this equipment good?” Zhuo Jiu Qing asked, he originally felt that the attributes of this jewelry were good, but listening to Lu Yang, he felt that this equipment must have special effects.

Yeyue Tingfeng and Mao Qiu also looked at Lu Yang.

Lu Yang said: “The strength of this piece of equipment lies in the last description.”

“The Holy Light gives people who believe in him a powerful power. Take this book of Holy Light on you, and you will get unexpected results.” Mao Qiu read it again, scratching his head and asking, “This is not a sentence Ordinary description? “

Lu Yang shook his head and said, “You haven’t been to the library ~ [www.mtnovel.com](http://www.mtnovel.com) ~ There is a library in this game, which details the function of this book. Any paladin who wears this book can do Gain +2 to Immolate Skill Level. “

“What.” Turbid wine stood up in excitement and said, “He can bring my sacrifice skill level to level 2?”

Immolation is a holy knight’s mob skill. The damage is very low at only 10 points per second, and he still has spell damage. There is no damage that can be done without the bonus of spell damage.

However, it is different after the upgrade. Players want to increase the skill level only by joining the Academy of Magic. It is a level 30 thing to enter the Academy of Magic. In other words, the player's skill level is level 1 before level 30. Yes, if you can improve level 2 at level 10, just thinking about it can guess how great your improvement is.

Lu Yang nodded and said, "Yes, your luck is very good."

"Boss, upgrade your skills by 2 levels. After that, will your sacrifice be higher than our damage?" Mao Qiu said.

Zhuoju Qingfeng gratefully looked at Lu Yang and said, "Brother, I can now confirm that you are really a person who can truly associate. If you change to see that we have such good equipment, let alone explain it, it will be taken away. . "

Yeyue Qingfeng and Mao Qiu's expressions of looking at Lu Yang also became very sincere.

## Chapter 74 - King's Hall

"Skill level +2, such a good attribute can sell at least tens of thousands on the black market." Yeyue heard the wind said.

Lu Yang also knows this, but he was born again. If he wants to make money, there is a way. There is no need to rely on this. Besides, there are people who have a lot of turbid wine in it, and the brothers who are famous for their lives. A morale-savvy person, so he never touched the idea of grabbing.

Lu Yang said: "Your brothers are not interesting enough. I never thought of it."

Zhuoju pouring and Yeyue listening to the wind all showed shame.

“Brother, it’s the one of us who wants to be crooked, don’t mind.” Zhuo Jiu said with pity.

Lu Yang didn’t really blame them. Think about it from the ground. If Lu Yang were them, he would also worry about this situation. After all, artificial swords stabbed me for fish.

“You two go back to the city first. The strange level here is too high.” Lu Yang said.

“Okay, that master, let’s go first,” said Zhuoji Qingfeng.

Lu Yang nodded, bid farewell to them, left the Hounds Hall, and walked down the promenade to the door of the King’s Hall.

Looking inside, the grounds of the King’s Hall are made of cyan square stones with a red carpet in the middle.

At this time, the hall’s front hall was densely packed with bone-heavy heavy hammer soldiers holding blood-red long-handed meteor hammers, at least more than 200 in number.

The 15% stun effect of these heavy hammer soldiers is very difficult. The 50-level anti-war battles with gold-level equipment all over their lives came here with trumpet, and they were besieged by the heavy hammer soldiers.

Although the heavy hammer could not kill him, he was caught in an infinite stun situation, and he managed to escape by relying on the trumpet to attract hatred.

In the middle of these skeletal hammermen, there are also five or six blood red skeletons with long handles and double forks.

Bone Elves (Elite)

Level: 30

Qi and blood: 90000/90000

The reason why the skeleton's skin is red is because this strange fire resistance is very high, there are more than 400, it is very difficult for Lu Yang to kill.

In addition, the fire damage is also included in the attack of the bone elves, and the eternal sword guardian resistance is not high. If three or more bone elves attack the eternal sword guard simultaneously, plus the stun effect of the bone hammer, Sin knife guard is likely to be killed.

Lu Yang scratched his head a little. He didn't expect that there were so many strange creatures in the land reclamation. If killed one by one, Lu Yang could kill the past, but there are hundreds of strange monsters. And once accidentally attracted strangers, attracting one or two hundred, Lu Yang could only escape.

As Lu Yang tried to find a way, a familiar voice came from behind him.

"Master, wait for us."

Lu Yang looked back, and the turbid wine poured in with fur \*\*\*\* and others ran over.

"Why haven't you left yet?" Lu Yang asked.

Zhuo Jiu said, "Master, what we just did is too shameful. We want to come over and see what can help you."

Lu Yanggang was about to speak, and Zhuo Jiu Qingfeng continued: "Master, if you take us as brothers, don't be polite."

Mao Qiu said, "Master, we are sincere."

Lu Yang saw that these people did have sincerity, and said, "I really need something to help you, but it may be dead."

"It doesn't matter, I let the Vulcan M16 return to the city with the Book of Light. Without this burden, we will be the same if we die or fly back," said the murky wine freely.

This book is the reason why people who chose to drink muddy wine did not choose to return to the city from the beginning. After all, it was special equipment that took a lot of effort to obtain. The attributes were so good, they were not willing to return it to the system.

Lu Yang was happy, and he didn't expect this muddy wine to be dumped. He said, "Well then, come with me and I will tell you how to do it."

He brought the four of them to the gate with muddy wine, pointed to the skeleton in the front hall of the king's hall, and said, "Did you see those strange?"

The turbid wine poured and others nodded.

"I'm going to enter this hall, but there are too many strangers at the door. It's a waste of time for me to kill them. I want you to help me lead them away." Lu Yang said.

"No problem," said Zhuoji Qingfeng, "you tell us what we need to do."

Lu Yang said, "In a while, you two people will come out and pull the monsters in the middle and right side of the hall to the left. I will run to the pool on the right side of the hall while you are pulling the monsters."

"Master, it's too dangerous, eh, I'm not talking about us but I'm talking about you," said Zhuoji Qingping.

There are hundreds of monsters in the main hall. Even if the turbid wine pours them and attracts them all, when Lu Yang runs past, there may be a shift in hatred. Moreover, there is no way to guarantee that they can do all the blame Pulled away.

“Look at our cooperation. If you can, you can succeed in one time.” Lu Yang said.

He has confidence in his body, plus a cloak with spores to reduce hatred. It is very feasible. Besides, even if he fails, he can get away with flashing.

The turbid wine poured inside and said, “Then the three of us went in together, and I pulled the fur ball to the right. The fur ball is a hunter. If you scatter it, you can get a lot. If I sacrifice along the way, I should be able to Hold the hate. “

Lu Yang thought about it. If this is the case, they can pull the hate, but then they will certainly die. More than 200 monsters who have been pulled by the hate rush forward together, and it is easy to form a circle of encirclement ~ [www. mtlnovel.com](http://www.mtlnovel.com) ~ They basically have no chance to escape.

“Thank you, I will compensate you for a piece of silver equipment later.” Lu Yang said.

“Don’t, brothers aren’t for the equipment to help you.” Zhuo Jiu said sincerely.

“Yes, don’t be kind to us, brothers,” Mao Qiu said.

“Well, I was wrong.” Lu Yang said.

The people with muddy wine dumplings and fur \*\*\*\* walked in with satisfaction. Among them, the strange knives were pulled by the strange monster in the middle, and the muddy wine dumplings and fur \*\*\*\* were pulled by the right monster.

After a few people made their plans, the mad knife ran in first to pull the monster in the middle position, and then the muddy wine and wool ball ran in first.

The fur ball is in free mode. After entering the door, the bow and arrow in the hand are tilted upward 60 ° and the scattering arrows are thrown.

The attack range was only 40 yards of scattered arrows hitting more than 60 yards before falling. It was in the middle of the front hall of the few skeleton heavy hammer soldiers.

“Ka ~ Ka ~”

The skeletal heavy hammer bit his upper and lower jaws, raised his hands and rushed towards the hair ball, and the skeletal heavy hammer was also attracted.

The fur ball was released several times in a row, and after attracting the monsters, it ran to the left.

“It’s my turn.” The turbid wine poured into the position where the fur ball had just stood, pressing down with both hands, and the light was within 10 yards of his feet.

## Chapter 75 - Skeleton Elves

The heavy hammer soldiers who were chasing them were attacked by the Holy Light, and immediately aimed at the turbid wine and poured them. The skeleton elves were also brought over. They moved the fastest and ran ahead.

Taking advantage of this gap, Lu Yang ran into the hall with the Eternal Blade Sword Guard rubbing these skeleton heavy hammer soldiers.

Some skeleton heavy hammer soldiers were not attracted by the hairballs. When they saw Lu Yang rushing in, they immediately ran over to the landing Yang with a shooting star hammer.

Lu Yang glanced at the number, probably more than 20, including a skeleton elf.

This number was still within his tolerance range, and he hurried to continue with the Eternal Sword Guard towards the pool.

This pool is a circular fountain pool, which is located in a concave corner in the middle of the right side of the King's Hall. The fountain is sandwiched between the concave characters, so that there is just a gap inside the concave shape for players to avoid.

Lu Yang did his best to run, but he did not run as fast as the Skeleton Elves. The elite Skeleton Elves quickly caught up with the Eternal Sword Guard following Lu Yang. He lifted up his two forks and suddenly moved towards the Eternal Sword Guard. The back was plugged in, and when the two forks fell down, there were two bright flares.

“284”

This is the signature skill of Skeleton Elves, and players can learn this skill later, with a fire element attack.

Eternal Sword Guard turned back and attacked the bone elf, and cut it with a stab.

“64”

Skeleton Elves have a total of 90,000 blood. If Lu Yang continues to run to the concave pool like this and let the skeleton elves attack the Eternal Sword Guard, the Evil Sword Guard will definitely not be able to withstand the attack of the Skeleton Elves.

In addition, more than 20 skeleton heavy hammer soldiers are also approaching. Once trapped by the skeleton heavy hammer soldiers, with a 15% chance of stun, the Eternal Sword Guard will be killed soon.

Facing this situation, Lu Yang gritted his teeth, replaced the cloak of spores, and released the burning skill at the bone elves.

Originally, Lu Yang's magic damage was 242, and burning also had 20 magic damage. If you hit a normal monster, you can deal more than 260 damage, but on the body of the skeleton elves, it actually printed the word "immunity".

Lu Yang knew that this would happen. He didn't care. He released five consecutive burns and added 150 fire damage. Lu Yang released a Pyroblast according to the skull of the skeleton.

"142" (Critical)

Normally, 1000 damage should be dealt, but only 142 points were hit on the skull of the bone elves. Obviously, the flames of the bone elves had at least 400 points.

Although the damage is much less, it is higher than the damage caused by the Eternal Sword Guard. After the skeleton elves were backed up and stiff, they ran towards the landing sun immediately.

The distance between them was about 20 yards, and the skeleton elves could run in front of him in less than 5 seconds.

Seeing this situation, Lu Yang did not immediately run to the pool, but led the skeleton elves toward the hall, and ordered the Eternal Sword Guard to run towards the pool with the bone hammer.

Lu Yang thought that if he ran away with the Bone Elf now, because the Bone Elf is fast, he would still come to the Eternal Sword Guard before the Bone Hammer.

The damage caused by the skeleton elves was too high, and Lu Yang was not sure to kill him before the death of the eternal crime sword guard, so he can only find a way to make the bone hammer soldiers come to the eternal sword sword guard first.

Use the Skeleton Hammer as a shield, so that the Skeleton Elf is blocked outside and cannot fight the Eternal Sword Guard.

However, it is very difficult to achieve this. The screen is full of blame. As long as Lu Yang runs a little, it will lead to the surrounding blame. He was sent into the encirclement.

Lu Yang has only one chance to flash, that is, it can be used when jumping into the corner of the pool. Once it is used at other times, it will fall into a mortal situation. Therefore, this time, Lu Yang considered his body, position and all states. Take it out.

With the bone elves behind him, he ran 10 yards deep into the hall. At the extreme distance from the bone elves in front, Lu Yang stopped abruptly, then ran to the left, and was about to lead to the opposite strange distance. On, Lu Yang stopped again.

At this time, the Evil Sword Guard was still running towards the pool with the skeletal hammer, the skeletal hammer was too slow. For the first time, Lu Yang hoped that these stupid hammers could go faster.

He glanced back at the skeleton elf. At this time, he had reached the position 3 yards in front of Lu Yang. Lu Yang could clearly see the golden flames pulsating in the pupil of his skull.

At this point, Lu Yang had been unavoidable. As long as the skeleton elves came to the front, the bone elves could kill Lu Yang by a normal attack.

2 yards

1 yard

Lu Yang watched the skeletal elves come in front of him. Just as the skeletal elves were about to lift the double forks, Lu Yang took out the iron hand [Lei] from his backpack and threw them according to the skeletal elves.

Goblin Hand [Thunder] can paralyze the target for 6 seconds, halving the effect of elite monsters \*. At the same time, the hand [Thunder] has little effect on targets above level 30, which includes level 30. Therefore, the skeleton The elf was paralyzed for less than a second.

However, in less than a second, Lu Yang suddenly rolled over and drilled from the side of the bone elf.

The skeleton elf woke up instantly and found that the target had disappeared. After looking around, he could not find it. Looking back, he saw Lu Yang ~ [www.mtnovel.com](http://www.mtnovel.com) ~ and immediately chased after the landing.

However, at this time Lu Yang had run away 3 yards away, and the Eternal Sword Guard had reached the position of the circular pool and the concave-shaped wall. It happened that at most only 3 stranges could hit the Eternal Sword Guard at the same time.

Lu Yang ran two steps quickly, and when he saw that the distance was enough, he immediately started flashing skills. The bone elf just chased in front of Lu Yang and raised the flamed double fork into the white light suddenly.

“MISS”

Behind the pool, white light suddenly appeared, and Lu Yang jumped into this corner smoothly.

The skeleton elves found that they did not hit the target, and rushed towards Landing Yang, but this time the skeleton elves could not approach Lu Yang, because in front of him, more than 20 skeleton heavy hammer soldiers blocked his way.

Lu Yang sighed against the wall and finally succeeded. He opened the intercom and murmured to the muddy wine, “How are you, a few people died.”

“Zhuo Jiu said,” One is not dead, but alive. “

Lu Yang lamented that he was indeed a master of his last life, and indeed he had his own efforts.

“If you are not in a hurry, just wait here, and I will take you to upgrade in an hour.” Lu Yang said.

There is no strange outside the promenade, there is no problem hiding the muddy wine pouring there.

“Okay, then we’ll wait for you here,” said Duo Jiu Qing Qing.

## Chapter 76 - Awakening of new skills

Lu Yang shut down the intercom, calmed down his breath, raised his head and looked at the skeletal hammermen who were attacking the Eternal Sword Guard and the skeletal elves walking back and forth.

The Bone Hammer soldier hit the Eternal Sword Guard unbreakable, with only 1 point of damage. The damage from the three heavy hammer soldiers was not as fast as the Eternal Sword Guard returning blood, and the Eternal Sword Guard could carry it without any problems.

Lu Yang put his heart down and chanted a spell in his mouth. First, he released 5 burns to an elite monster bone elf that had a head higher than the other monsters, and then quickly uttered the Pyroblast spell in his mouth, from the top of his staff. One after another huge fireballs flew towards the skeleton elves.

The skeleton elf walked back and forth because he couldn't hit Lu Yang. He was moving fast, and in a small range of movements, he walked faster.

However, he could no longer aim at Lu Yang, and the first Pyroblast hit the head of the skeleton elves precisely, and the bone elves struck were stiff.

After 0.5 seconds, when the skeleton elves reacted and they were about to leave, the second Pyroblast came again, and they stiffened the Skeleton Elite again.

In this way, Lu Yang continued to attack the bone elves, and once the magic cost exceeded 600 points, he immediately used the magic potion.

After persisting for 10 minutes, the blood of the skeleton elves dropped to 0 o'clock.

A golden light detached from the bone elves, and the bone elves turned into a pile of red bones and fell to the ground. At the same time, a golden skill book and a piece of silver equipment fell to the ground.

Lu Yang's eyes suddenly widened, and after seeing no other monsters brushed around the bone elf, he ordered the Eternal Sword Guard to release the group's taunting skills, so that more than 20 skeleton heavy hammer soldiers deepened their hatred against him. Around the skeleton elves, picked up the skill books and equipment on the ground.

"wake"

Description: The magician releases his potential, accelerates the magic recovery speed, recovers 2000 mana in 6 seconds, and cools down for 2 minutes.

This is a skill book for arcane department, but wizards of any department can learn, but if you want to upgrade this skill, you need to choose to enter the arcane magic school.

The game stipulates that unless a special mission is triggered, the player can only specialize in one Magic Academy. Therefore, this skill Lu Yang can only learn level 1; however, at this stage, this skill can also restore Lu Yang's magic to full scale. .

The most worrying thing about Lu Yang is that Lan is not enough. With this skill, his output will become much easier. He immediately learned this skill.

Skull Helmet (Silver)

Level: 30

Type: Plate

Defense: 16-23

Strength: +8

Constitution: +8

Physical Damage: +24

Set (1/8)

This is a raging battle suit series, and other items include skull rings and other equipment. If you make a set, it will have a violent effect and is a very good piece of equipment.

Lu Yang put the skull helmet in his backpack, and after the cooldown of the flashing skill was over, he walked towards the middle of the king's hall, and in front of him, there was a skeleton elven.

As before, he pulled the skeletal elbow to the pool, killed it with the help of the skeletal hammer, and exploded a silver armor for the Paladin.

At this point, there were no more skeleton elves in front of Lu Yang, and what remained in front of them were the skeleton heavy hammer soldiers and the evil corpse kings surrounding the skeleton tyrant.

Ghost King (Sub-elite)

Level: 30

Qi and blood: 40000/40000

Lu Yang first killed 3 bone hammers in front of him, just these three monsters can be blocked in front of the Eternal Sword Guard, and then Lu Yang jumped out of the encirclement with a flash and picked up the silver-level armor dropped by the skeleton elves. Later, came to the vicinity of the evil corpse king.

He counted, and there were more than 30 evil kings.

The shape of the corpse king is a red zombie with iron chains trapped on his body, which is higher than normal humans, and bites people with his mouth when attacking.

Although their appearance is similar to that of the evil zombies outside the palace, their movement speed and attack speed are very fast, and their attack power is very high and their defense power is very high.

However, they have a disadvantage and are not resistant to fire!

This is the common feature of all undead monsters. It is for this reason that Lu Yang was confident in killing more than 30 corpse kings. He raised his hand and hit him with a Pyroblast.

“Hello ~”

The corpse king roared and chased after Chaoyangyang. Due to the close distance between the corpse kings, his roar attracted more than 30 other corpse kings.

The Corpse King is moving fast and has the charge ability. After the first Corpse King attacked by Lu Yang approaches 30 yards, he launches the charge ability toward Landing Yang.

Once the corpse king hits him, the corpse king’s attack power of more than 700 can kill Lu Yang in seconds.

However, Lu Yang had long waited for the corpse king’s move. When he hit the corpse king, he ran back. At this time, he had run to a distance of 30 yards from the pool.

The moment the Corpse King was about to hit him, Lu Yang left a wall of fire in place, and a white light jumped into the corner behind the pool.

The corpse’s charge failed, but was injured by the fire wall under his feet and continued to run towards the landing sun.

The other corpse kings also ran over with this corpse king, and reached the position 30 yards from Luyang again, but the corpse kings could not launch the charge because of the blocking of the pool and the skeleton heavy hammer soldiers ~ [www.mtlnovel.com](http://www.mtlnovel.com) ~ Can only run back and forth behind the bone hammer.

After a while, when more than 30 corpse kings all gathered together, the corpse king nearest to the skeletal hammermen could not even walk back and forth, but could only be blocked there and unable to move.

The two parties were obviously only a short distance away, but they could not be reached. Lu Yang looked at the corpse king who was roaring at him constantly, raising his hands to release the wall of fire on the ground.

After a sea of fire formed on the ground, all the corpse kings began to drop blood continuously.

Lu Yang did not stop after releasing the fire wall. The Blazing Birds dived one by one from the air and smashed into the corpse king's community. Within 10 minutes, the corpse king was all killed.

System prompt: You have gained 1340 experience points (among which, you have 670 experience in killing monsters)

...

After a system prompt, Lu Yang's experience value increased by more than 40,000. On the ground, there were more than ten pieces of equipment. There were whiteboards and bronzes. Unfortunately, there were no silver-level ones.

The evil corpse king is a pseudo-elite, and it is an accident to be able to explode. When Lu Yang came here last life, he did not even give the potion to kill the evil corpse king. This is the first time he was killed. .

After Lu Yang jumped out of the pool and picked up his equipment, he turned back and killed the three skeleton hammermen behind him.

At this point, there was no mob from the king's hall from the pool to the throne, and about 60 yards from the front to the left and right were cleaned up by Lu Yang.

## Chapter 77 - Skeleton Tyrant

In front of him, there was only one standing tyrant.

Lu Yang looked at the health of the Eternal Sword Guard had recovered to full blood, and he strode to a position 30 yards from the tyrant of the bones.

Skeleton Tyrant (Lord Level)

Level: 30

Qi and blood: 450,000 / 450000

At this point, the tyrannical tyrant was standing in front of the throne. He was about twice as tall as a human, and was shaped like a silver-gray skull with two horns on his head and a golden-red cloak.

The tyrannical tyrant had no armor on his chest, revealing his fleshless bone frame, flesh and blood on his left leg, and his right leg covered with countless small skulls.

The belt around the waist is also a huge skull. The most distinctive feature is the weapon of the tyrannical tyrant. His weapon is a long-handled warhammer, but the hammer head is not made of metal, but it is glued with countless skulls. put them together.

This weapon allows the Skeleton Tyrant to use his signature skill, Demon Soul.

The damage attached to the Demon Soul is a soul attack. At the same time as the normal attack, it also has a soul attack of 3000 points. The attack range is close range, and the range is 10 \* 10.

The first player here in the last life to open up wasteland is the 20-level elite group from the studio that later became inward. There are 200 people in the group. The equipment of each person is silver, and the best is dark gold.

Before killing monsters all the way, they thought that the strangeness of this map was very simple. When they saw the bone tyrants, they thought they were as good as the previous bone elves. More than 20 soldiers did not listen to the command and rushed together habitually.

The 20th level of silver-level equipment's anti-war blood is around 2000 points. They thought they could easily resist the boss, and they rushed to ridicule with ridicule. As a result, the tyrannical tyrant raised his hand to cut a demon soul. Killed with a hammer.

The director of the studio did not look at the skeleton king at the beginning. When he saw the soldiers rushing over, he did not stop immediately. As a result, the priest habitually followed up the treatment and the output rushed habitually.

As a result, after the first Demon Soul of the Skeleton Tyrant killed more than 20 defenses, everyone else was stupid, but at this time their attack had already hit the Skeleton Tyrant.

The bone tyrant rushed into the crowd immediately, killing more than 80 people in succession by four demon souls.

The director of this studio was also very powerful. When he saw his men being slaughtered without panic, he immediately let the main force of the guild fight against the boss, heal the blood, and output the station.

Anti-riding is equipped with dark gold equipment. The method of adding blood is whole blood. The blood volume is more than 5,000. Although the boss can kill more than 3,000 blood each time he attacks, but under the blood of more than 20 treatments, he still barely resists. Live strange.

However, the skeletal tyrant has more than just the ability of the devil to cut. When he loses 20% of his blood, he launches the second big move-the feast of blood.

Blood Feast, with an attack range of 30 yards, deals 5000 soul damage to players within 30 yards.

The first feast of blood, anti-riding!

The second feast of blood, the guild's elite group is completely destroyed!

At this time, the studio only found that the tyrannical tyrant was hard to beat. However, after half a year of wasteland, the player level reached 50, and the boss had not been beaten yet.

Because there is a feast of blood, how many people come is the same.

Later, until one day, Bloodthirsty Bully flaunted the attributes of the Eternal Sword Guard that he got to level 7 on the Internet.

The reason why the 7th Level Eternal Sword Guard will change into a samurai wearing black armor with no clear face is because the full level Eternal Sword Guard will evolve into a ghost-type creature, completely immune to the damage of the soul system.

The studio then found a way to get through the boss and let the Eternal Sword Guard fight against the boss, but they still paid a heavy price in the face of the feast of blood.

Until the last one mage and one priest remained, the mage used the flicker many times to avoid the feast of blood, which killed the tyrannical tyrant.

Lu Yang didn't know this method at first, but after the studio got angry, the players who were ousted from the studio were angry and published the video of their tyrannical tyrants opening up.

At that time, Lu Yang watched this video for a long time in order to learn the flicker hiding technique. Although he was reborn once, the content of this video was the clearest that Lu Yang remembered. Therefore, he was so confident.

"Human? Actually, humans will break into here." Skeletal tyrant found Lu Yang.

The 2-man tall tyrant suddenly lifted the skull hammer in his hand and launched a charge against Lu Yang with a phantom.

Lu Yang's white light lit up and flickered to the throne, easily avoiding the blow from the tyrant tyrant.

The trick just now is the signature skill of the Skeleton Tyrant. The charge increases the sword cut, and the two can be combined to make a 4x attack.

The bone tyrant has more than 700 attack power, and 4 times the attack can cut out more than 2800 damage. Although the Eternal Sword Guard has 600 defensive power, this sword can destroy more than half of the blood of the Eternal Sword Guard.

For the sake of safety, Lu Yang replaced the sword of Eternal Sword Guard with a flash to fight the boss's first sword.

After avoiding the skills, he immediately ordered the Eternal Sword Guard to launch the charge ability, hit the body of the bone tyrant, and simultaneously launched the skill Epee.

"84"

"264"

The Skeleton Tyrant was about to launch a second charge on Lu Yang—Intercept, and was suddenly attacked by Eternal Sword Guard. He immediately transferred his hatred to Eternal Sword Guard.

"Devil Soul"

A word of MISS floated from the head of Eternal Sword Guard, followed by a word of "194".

The former's MISS is a hint that it is not effective against soul attacks ~ [www.mtlnovel.com](http://www.mtlnovel.com) ~ The latter's 194 is the physical damage of the skeleton tyrant.

Lu Yang sneered, this injury was almost useless to Eternal Sword Guard, he chanted a spell in his mouth, and used skills to burn the boss.

“267”

A flaming symbol was added to the head of the Skeletal Tyrant, and the Skeletal Tyrant without flame resistance was fully damaged.

Although the damage is high, the skeletal tyrant still locked the target on the Eternal Sword Guard, and the demon souls were shot one by one.

Within ten yards of the Eternal Sword Guard, countless miserable white ghosts flew up and down, but unfortunately could not cause harm.

After waiting for the Eternal Sword and Blade to stabilize the hatred of the skeletal tyrant, Lu Yang released 4 burnings in succession, increasing the effect of fire damage by 150 points. Then, Lu Yang erected a fire wall under the boss's feet.

“481”

The 2nd level of fire wall bases 84 points of damage, plus 5 layers of burning and 247 points of his own magical damage, easily dealing 481 points of fire damage per second.

Lu Yang's mouth continued to cast spells, followed by a huge fireball from the front of his staff. Pyroblast hit the skull tyrant's head one by one at a rate of 0.5 seconds per round.

“1082” (Critical Strike)

“1082” (Critical Strike)

“1082” (Critical Strike)

...

## Chapter 78 - Feast of Blood

Lu Yang can play more than 2600 damage data every second.

The skeleton tyrant began to drop blood quickly, but no matter how Lu Yang exported, under the hatred of the spore's cloak, the skeleton tyrant did not watch Lu Yang focused on the sword of eternal crime.

Bone Tyrant's attack frequency is not high, each time with a demon soul slash, so that he must charge for 1 second before attacking.

Demon Soul does no harm to Eternal Sword Guard, and the bone tyrant's damage to Eternal Sword Guard is only about 200 points.

Ten seconds later, Lu Yang destroyed more than 26,000 qi and blood of the skeletal tyrant, but the qi and blood of the Eternal Sword Guard dropped to about 1000 points.

Lu Yang had long anticipated this scene, he replaced the healing ring to his body, and a white icon appeared in the skill bar instantly.

Lu Yang, who was wounded by 247, had 10 consecutive instant cures to fill up the blood of Eternal Sword Guard, and then Lu Yang continued to output.

If anyone can see Lu Yang challenging the boss, he will be stunned and surprised by Lu Yang's actions, because this is something they will never dare to imagine.

Kill the boss alone!

What kind of courage and self-confidence is needed, but in the last life, this kind of thing can often be seen, because, if you want to prove that you are a high play, first of all you have to make your boss classics public on the Internet Fight, so that everyone can agree.

Otherwise, even if you kill 10,000 people in the wild, players still think you are just a mean sneak attacker.

Numerous players have challenged the limit for this glory, and Lu Yang is one of them. In his last life, he not only killed a boss, but now he challenges again, and finally ignites the blood in his body.

This is not a tragic trumpet in the novice village, but challenge the boss boss at level 10 at level 10, when you really need to reflect the overall strength of a high game, as long as you are a little careless, you will be killed if you are rubbed to the side by the damage of the boss on the spot.

“Damn man, I want you to taste the taste of death.” Lu Yang’s blood was killed by 20% by Lu Yang, and the angry skeleton tyrant suddenly raised his skull hammer in his hand.

The blood red water gushed out of each skull head in the skull hammer. The streamlined shape and color flowing in the air was so charming, but when the blood red river left the skull hammer 5 yards After the distance.

The blood-red river instantly spread into tens of thousands of blood-red ghosts! It turned out that this was not a river at all, but a compressed red undead.

The undead did not immediately rush to Lu Yang, but flew into the air. The feast of blood does not attack with hatred, and all blows are random.

When he ascends to the highest sky, he will instantly fall towards a certain 30-yard area.

Lu Yang's evasion time is only 0.5 seconds. He cannot evade in advance by flashing. If he evades in advance, the Blood Banquet will change direction immediately. If he evades late and immediately receives 5,000 points of damage, there is no doubt that he will die.

Lu Yang stared nervously at the Scarlet Undead in the sky. Although the attack targets were random, there were only 2 targets in the audience, one was the Eternal Sword Guard and the other was his own. The Scarlet Undead must have half hit him.

"The feast of blood." The bone tyrant's arm suddenly dropped, and at the moment when it fell, Lu Yang's body flashed white with an interval of less than 0.01 seconds. The \*\*\*\* undead slammed into his original standing position.

MISS

Lu Yang successfully escaped the first feast of blood. He could not help but clenched his fists. Although he did not challenge the boss for five years, his five-year mercenary career made him more conscious of physical fitness. At this time, he , More confident than ever.

After the \*\*\*\* undead attack ended, he flew back to the bone tyrant's hammer. The moment the thousands of red undead entered the weapon, the bone tyrant held up his double hammer and smashed down suddenly.

"Devil Soul"

Unfortunately, soul damage has no effect on Eternal Sword Guard. Eternal Sword Guard takes only 202 damage.

Lu Yang saw that there was still more than 1,600 points in the blood of Eternal Sword Guard, and he looked at his magic value, and there were more than 400 points.

He used 10 healing spells on Eternal Sword Guard to use up his magic, and then used his skills to awaken.

Like the hurricane-like blue magic energy, Lu Yang surrounded him. His mana value quickly rose to more than 1900, and Lu Yang output again.

Soon, the bone tyrant was again killed by Lu Yang by 20% of his blood, and he only had 60% of his blood.

“Humans, give away your soul.” The skeletal tyrant raised his weapon again, and the tens of thousands of red undead in the skull hammer poured out again.

With the first experience, Lu Yang was much more guilty. While the undead had just sprayed out, he continued to use Pyroblast on the skeletal tyrant. When the red undead flew to heaven, Lu Yang stopped.

“The feast of blood.” The bone tyrant pointed at Lu Yang with a weapon.

Thousands of dead spirits flew in front of Lu Yang at a speed that was indistinguishable to the naked eye. At that instant, Lu Yang’s body was surging white light and appeared on the throne.

MISS

Lu Yang successfully escaped the feast of blood again. After coming out of the flash, Lu Yang found that the burning buff on the bone tyrant’s head had disappeared, and he immediately added 5 layers of burning.

At this point his blue was running out, and he immediately took the magic recovery potion (medium bottle) from his backpack and drank it, and the magic value quickly increased to 1500.

...

After 2 minutes, Lu Yang successfully avoided the third blood feast of the Skeleton Tyrant, and Lu Yang beat his blood to only 30%.

At this time, Lu Yang stopped outputting, and quickly added blood to the Eternal Sword Guard with only 800 blood left ~ [www.mtlnovel.com](http://www.mtlnovel.com) ~ and then awakened again.

When the bone tyrant's health is less than 30%, it is the most difficult stage for the boss. At this stage, the boss will enter a violent state, attack speed will increase by 100%, damage will increase by 30%, spell release speed will increase by 100%, The frequency is increased by 100%.

At that time, the union could not fight because it entered this stage. The boss continuously released the feast of blood, how many people died and how many people came.

System Prompt: Skeleton Tyrant Enters Rage

The gray-and-white skeleton tyrant suddenly turned red, and the skull hammer, which had been waving only once every 1.5 seconds, suddenly became a wave every 0.75 seconds.

"254"

"239"

"241"

...

Fortunately, Lu Yang has watched the video, otherwise, if Lu Yang is not blue at this time or if the blood is not added in time, the sword of Yongsin will die, and Lu Yang will surely die.

However, even so, the hard work of the Eternal Sword and Blade Guard resisted, and Lu Yang had no time to add blood, let alone output.

Seeing this, Lu Yang ran down the throne, while running, added blood to the Eternal Sword Guard to the side 30 yards away from the Eternal Sword Guard, and put down an active dummy.

This activity dummy is a special object made by Lu Yang using goblin engineering. He only has one skill, mocking.

## Chapter 79 - Single kill boss

After placing the dummy, Lu Yang ran back to the throne and ordered the active dummy to release the taunting skills.

The taunt would immediately raise the target's hatred to him, and the skeleton tyrant was provoked and dropped the Eternal Sword Guard towards the active dummy.

Lu Yang ordered the Eternal Sword Guard to stay in place and not attack behind the skeleton tyrant. Taking this opportunity, he first filled the blood of the Eternal Sword Guard with healing, and then quickly attacked with Pyroblast.

The Skeletal Tyrant runs very fast in the moving state, but even so, Lu Yang was able to hit the head of the Skeletal Tyrant with a precise hit for each Pyroblast to maximize the output.

The skeletal tyrant came to the dummy in front of him, and hit it with a hammer. The bronze dummy made of blood had only 300 points of blood and was instantly crushed.

Because the mobile dummy was put down by Lu Yang, the skeleton tyrant turned and aimed at Lu Yang.

Just before the skeleton tyrant was about to launch a second charge ability-interception, Lu Yang issued a command to the Eternal Sword Guard-mocking.

If 0.1 seconds later, the Skeletal Tyrant will launch Lu Yang's interception skills, and at the same time, Lu Yang will be killed at the same time, but in this 0.1 second, Lu Yang successfully attracted the Evil Sword Guard to the Skeletal Tyrant's hatred.

The Skeleton Tyrant turned and ran towards the Eternal Sword Guard, but it ran back a distance of 30 yards. The Skeleton Tyrant was hit by Lu Yang for several Pyroblasts.

At this point, 28% of the blood of the tyrant's blood was left.

At this time, it was Lu Yang's most tense time. With the attack speed and attack power after the skeleton tyrant went mad, the Eternal Sword Guard could only withstand 18 seconds.

The active dummy can only be released once in 2 minutes, and can no longer be used for the time being. He only wants one way to keep the Eternal Sword and Blade Guard against it, and that is to output it quickly to fight for the life of the skeleton tyrant to reach 25%.

Skeletal Tyrant's health drops below 30%, and a blood feast is released for every 5% of health.

Now there is still 3% of blood loss. Lu Yang can only grab time with the bone tyrant to see if it is the bone tyrant who killed the Eternal Sword Guard first or Lu Yang beat his blood first. To 25%.

28%

27%

26%

...

Lu Yang desperately output, on the other side, the skeleton tyrant waved the skull hammer wildly, and the blood of the Eternal Sword Guard fell quickly.

1300

1100

900

600

...

Just when the blood of Eternal Sword Guard had only 300 points left, as long as there were two more times, or the skeleton tyrant hit a critical strike, when Eternal Sword Guard would be killed, Lu Yang hit another Pyroblast. On the head of a skeletal tyrant.

“1092” (Critical Strike)

The skull hammer that the tyrant tyrant lifted high, but this time the skull hammer did not fall but stopped in the air, the countless skulls on it opened their teeth at the same time, and the blood red undead sprang up again.

Lu Yang breathed a sigh of relief. He managed to hit the bone tyrant’s blood volume to 25%. Taking advantage of the gap before the blood feast formed, Lu Yang rushed to add blood to the Eternal Sword Guard with healing.

Just when Lu Yang was about to fill the blood of the Eternal Sword Guard, the feast of blood suddenly fell.

Lu Yang jumped to Eternal Sword Guard with a flash of light instantly, successfully avoiding the feast of blood, and just landed. Lu Yang modified the attack mode and changed the team attack to an overall attack. A spell was in his mouth, a golden red The energy circle gushed out of him.

“Resistant Fire Ring”

In the overall attack mode, Lu Yang's skills can also cause damage to Eternal Sword Guard. Level 7 Eternal Sword Guard was hit by Lu Yang with a 2 level fire resistance ring, and instantly retreated 13 yards to the side.

When the skeleton tyrant's skull recovered the red undead, he smashed into the Eternal Sword Guard immediately. As a result, the Eternal Sword Guard was smashed by Lu Yang, and his demon slash did not come out.

Because the hatred of the skeletal tyrant is always on the Eternal Sword Guard, he did not attack Lu Yang but immediately chased towards the Eternal Sword Guard.

Do n't think that anyone can do the operation of blinking and resisting the fire ring. If Lu Yang blinks early, he will be killed by the blood feast that is chased after. If he blinks late, he will also be killed by the blood feast. .

Even if it flashes in time, if he releases the resistance ring of fire for 0.5 seconds later, although he can crash the Eternal Sword Guard to let him avoid the devil cut of the bone tyrant, but the devil cut of the 10 yard range attack once falls. However, Lu Yang could not hide, but died.

If you want to achieve this level of Lu Yang, only real high-end fire can do it, it is completely impossible for ordinary people.

Lu Yang changed back to the team attack mode, took a bottle of magic recovery potion (medium bottle) from his backpack, drank it, and continued to use Pyroblast output at the back of the bone tyrant.

The skeleton tyrant ran for 4 seconds before coming to the side of the Eternal Sword Guard. During this 4 seconds, Lu Yang hit the 8 blasts of the skeleton tyrant and hit more than 8000 damage.

After waiting another 5 seconds, the taunting skill CD of Eternal Sword Guard ended, and Lu Yang ordered the Eternal Sword Guard to run to the throne while releasing the taunting skill.

The bone tyrant's taunting skills immediately chased after him. This ran a dozen times and doubled the output speed of the bone tyrant.

Lu Yang took the opportunity to continuously release the healing technique to fill the blood of Eternal Sword Guard, and at the same time, the distance between Lu Yang and Eternal Sword Guard was extended to 30 yards.

After continuing to output for 10 seconds, the bone tyrant's health decreased to 20%, and he released the feast of blood again.

Within a few minutes ~ [www.mtlnovel.com](http://www.mtlnovel.com) ~ Lu Yang was also tired from wandering around the ghost gate many times using his personal skills, but he knew that victory was in sight.

Faced with another falling blood feast, he immediately avoided, and at this point his active dummy CD ended.

Lu Yang immediately dropped the dummy and used the method of mocking the dummy to kill the boss's health to 15%.

Immediately afterwards, using the method of resisting the fire ring again, Lu Yang hit the boss's health to 10%.

At this point, the bone tyrant has only 45,000 points left. Lu Yang can kill the bone tyrant as long as there are more than 40 Pyroblasts.

The bone tyrant raised his staff again, preparing to release the feast of blood, but this time, a sneer appeared at the corner of Lu Yang's mouth. Instead of hiding, he stood in place.

Suddenly there was an obscure but ancient spell in his mouth.

A raging flame of energy burst forth from Lu Yang's body, and Lu Yang pointed the arsoner's staff to the skeletal tyrant.

"Lord of Fire, accept the faith of your humblest servant, and ask you to give me the power to burn all fire."

Meteor falls!

A huge meteorite suddenly fell from the sky, and the moment the skeleton tyrant's skull hammer was about to release the red undead, he smashed heavily on the skull tyrant's head.

"4028" (Critical Strike)

Chapter 80 - Magic Fire Staff (Asian Legend)

A stun symbol appears on the skull of the Bone Tyrant for 5 seconds.

Even lord-level monsters will still be stunned in the face of pseudo-forbidden attacks, but the stun time is reduced by half.

However, this is already very strong. Lu Yang is equal to interrupting the boss's skills.

The skeleton tyrant wants to release the feast of blood again and can only wait for the end of the dizziness. In this way, Lu Yang can freely output for 8 seconds.

At this point, the skeleton tyrant only had more than 40,000 points of blood, and Lu Yang released an Pyroblast almost every 0.4 seconds at an unprecedented speed, hitting the skull tyrant's head with precision, every attack can hit more than 1,000 points of critical damage.

Five seconds later, the skeletal tyrant wakes up. At this time, the skeletal tyrant has 28000 health points.

The skeleton tyrant re-raised the skull hammer in his hand to release the feast of blood again. In 3 seconds, Lu Yang played another 7 blasts. Then he was almost beaten by the feast of blood when he was almost a minute. Blinks dodging.

At this point, the skeleton tyrant had 21,000 points of blood and 2800 points of blood.

The final blood of less than 1% is whether the skeletal tyrant first killed the Eternal Sword Guard and then an assault killed Lu Yang, or Lu Yang first killed the skeletal tyrant, depending on the last 18 seconds.

Lu Yang couldn't make the slightest mistake, not even one scale of the Pyroblast spell. Once he was wrong, he would die.

At this time, it is also the time to see the psychological quality of a player. A player with a poor psychological quality will make mistakes because of nervousness, even if the exercise skills are usually better.

However, Lu Yang can't, 5 years of life and death outside the country, every day in the jungle with the enemy to use their death to hone their will.

Lu Yang's heart is already as strong as steel, and he is not affected by a bit of pressure at all. All his energy is devoted to the boss. Each scale of Pyroblast is like a part of his body. Stagnation.

18000

12000

10000

In addition, the skeleton tyrant is still crazy output, and hit the crit twice in a row.

In less than 5 seconds, the health of Eternal Sword Guard had 1200 points left. At this time, once the tyrannical tyrant hit another crit, Lu Yang would die.

Lu Yang also did not expect that the tyrannical tyrant would be so lucky to have a crit at this last time.

He didn't panic, didn't even go to see how much blood and blood the Eternal Sword Guard had left, and focused on the output of the tyrannical tyrant.

8000

800

At this moment, the skeletal tyrant suddenly killed the Eternal Sword Guard with a stab, and then the skeletal tyrant suddenly raised his head to look at Lu Yang, raised the skull hammer in his hand, and rushed towards the landing sun with a phantom.

The distance of 30 yards only takes 0.5 seconds. Just at this moment, the moment the skeleton tyrant is about to hit Lu Yang, the last blast in Lu Yang's mouth is completed.

“噫”

The bone tyrant hit Lu Yang.

Lu Yang's eyes went into a vertigo state immediately. Then, Lu Yang did not fall to the ground, but survived.

He looked at the bone tyrant in front of him. The bone tyrant, who had turned into a red skull, fell to his knees on the ground, his body glowing with golden light.

System prompt: You killed the Skeleton Tyrant

You have gained 32,847 experience points (among which, there are 12,917 experience in cross-level fighting)

Lu Yang took a sigh of relief and sat on the throne all of a sudden. He couldn't help but sigh. He was really dangerous just now. His blue left at 30 o'clock. Either Pyroblast or Blink was released. Used One and the other were unavailable, and when he used Pyroblast, the boss had already rushed over. He couldn't aim, but only by feeling, he was considered a fight.

Fortunately, he won the fight. Although he was lucky to win, he succeeded in killing the boss boss tyrant at level 30 at level 10.

At this point, the bone tyrant was dead, and after the golden light flew out of him, the bone tyrant turned into a pile of bones and fell to the ground. At the same time, a dazzling red staff fell to the ground. .

“The magic fire staff.” Lu Yang flew in front of the magic fire staff and picked it up.

Magic Fire Staff (Asian Legend)

Level: 30

Physical damage: 15-62

Constitution: +22

Intelligence: +57

Spell Damage: +102

Description: God loves the world. He will always give people the greatest help. If you admire him, respect him, and give him your most pious faith, you will receive his care.

This seemingly useless description actually means no level restriction, but players don't know.

In the last life, when the infighting studio hit this weapon, the average level of members was more than 50, and they had no problem wearing this weapon.

They hit the skeletal tyrant at this level just to vent their anger, and after seeing it, the attributes were completely inferior to the level 50 equipment and they were thrown in the union warehouse. No one took the weapon seriously.

The reason why it can be found is that a long time later, when a Gaowan in the studio equipped his apprentice, he made a mistake and gave the magic staff in the guild warehouse to the other party.

This apprentice is a complete "game little white". He has never been exposed to games before. He has almost no knowledge of the game. He wanted to wear it immediately after getting the equipment, but he couldn't equip it.

She immediately found the master "complaining ~ [www.mtlnovel.com](http://www.mtlnovel.com) ~ that the master was deceiving, and the system suggested that wearing this piece of equipment requires 200 intelligence, and his intelligence is only 80 points or more.

Fortunately, the apprentice's master is a high-play in the studio. He heard the apprentice's words and found the problem. The reason why the system fails to equip the equipment is not insufficient level, but insufficient intelligence.

He immediately borrowed a 10-level gold-level suit from the studio's warehouse, and bought a lot of intellectual gems to raise the female apprentice's intelligence to 200 points. He tried the equipment again, and actually gave the magic fire staff to the equipment at level 10. On.

At this point, the mysterious properties of the magic fire staff have been discovered by players. This studio discovered the secret of the magic fire staff when it was opened for one year. At that time, it was just when gamers entered a large number of outbreaks. There were hundreds of them every day Tens of millions of players enter the game.

This studio relied on such a magic fire staff to earn a fortune, but it is precisely because of this magic fire staff that the studio had conflicts in the distribution of benefits, eventually causing internal conflict, and the secret was exposed.

As the so-called artifact came out and there were no brothers, Lu Yang saw this kind of thing a lot in the last life. He put the magic fire staff in his backpack. At this time, his intelligence was only 158, and the intelligence needed to equip him was 42. .

However, Lu Yang is not worried, and it is easy to gain intelligence, and low-level gems will burst in Level 5 copies.

A low-level gem adds 6 intelligence. He only needs to find a way to get 7 gems.
