

My Ex-Wife and Kids Came In Like A Wrecking Ball Chapter 633

Rosalie heard Lucius' question clearly and was stunned for a few seconds. Then, she raised her eyes to look at the people at the table.

Not surprisingly, because of Lucius' remarks, everyone looked over. They were all shocked and puzzled.

Looking back, Rosalie smiled gratefully at Lucius before speaking in a humble tone, "Dr. Rand, you're too polite. I just learned some techniques by chance. I'm honored that you're interested."

Lucius solemnly denied it. "I've seen your ability with my own eyes, and it's by no means a coincidence. You don't need to be humble, Dr. Jacobs."

Hearing this, Rosalie wanted to be polite, but Xander interrupted with a smile.

"Dr. Rand, Dr. Jacobs, let's wait until the end of the banquet for the casual chats. Now, let's talk about business."

Rosalie had no choice but to stop and nodded gratefully to Lucius.

Although the first meeting between them in the last free clinic was not pleasant, in the follow-up, Lucius still showed the qualities that an outstanding traditional medicine doctor should possess.

After the free clinic, the relationship between the two could be regarded as friendly.

Rosalie thought that there would be no chance to meet again in the future, but she did not expect to meet so soon.

Moreover, Lucius even took the initiative to speak up for her.

Seeing her graceful gaze, Lucius just gave her a friendly smile. He then turned his head and waited for Xander to speak.

For a while, the banquet was silent.

All eyes were on Xander and the two people beside him.

The people present are all well-known and famous doctors in Somerland. They were busy people involved in various medical matters but took the time to participate in this banquet. First of all, it was to honor the Lancer family, and secondly, this project was highly valued.

During this period, Xander only talked to a few of the doctors who were close friends, and most of the doctors knew little about the project.

Therefore, everyone was looking forward to the introduction by Xander.

Apart from the main introduction, the guests were also still curious about the two young people.

Even Lucius highly regarded this woman, and Xander was even more friendly toward them. It made them wonder about the origin of these two people.

Xander looked around, and after looking at everyone one by one, he spoke slowly.

“I’m sure everyone is clear about the purpose of this banquet. Everyone here is an extremely important partner of the Lancer Family from here onward. Let’s toast to each other first! “

As Xander finished speaking, everyone raised their glasses and toasted.

Xander emptied his glass, then continued, “Everyone who has practiced medicine for many years must have a steel scale in their hearts for the essentials of medicine. The so-called doctor is nothing more than the hope of saving the dying, helping the wounded, and giving people a life worth hoping for. That’s all. Since we’ve chosen to follow the path of practicing medicine, we won’t ask for anything in return! “

The doctors present looked at each other with firm eyes and agreed with solemn voices. “We won’t ask for anything in return! “

Xander’s face slightly hardened, and his voice was raised. “This project of the Lancer family is precisely to practice this essence! In this cooperation, the Lancer family is honored to have the crucial support of the doctors! The Lancer family won’t let you down. During the cooperation process, the Lancer family will open up our private collection of books to help everyone go further in the research of traditional medicine, so as to jointly unearth the medical treasures of Somerland and promote the research process of traditional medicine in the world! “

Everyone’s emotions were ruffled, and their faces remained solemn.

Hearing him announce that the Lancer family was going to open up the book collection made everyone even more excited!
