

The Yun Family's Ninth Child is an Imp! Chapter 1198

Yin Sulian gritted her teeth in anger, but she also knew that Deputy Dean Xiao and Deputy Dean Yin were not on good terms. When my fourth grandfather becomes the dean, all of you will not have a good ending! Deputy Dean Xiao continued, "Although the illusion just now was not included in your assessment results, I am extremely disappointed in your performance! Not only did you not have the ability to respond to danger, but you were also timid and cowardly. You framed your classmates, and there were even some who were prepared to sacrifice their classmates to save their own lives. This kind of character is really despicable! "You all should take care of yourselves. Even if such a character gains power for a moment, you will be punished sooner or later!" After saying that, deputy dean Xiao flicked his sleeves and left. The rest of the teachers shook their heads and left as well. The qualifications of this batch of students were indeed much worse than the previous ones. The students were all dumbstruck. Although some of them didn't think much of it, most of them still felt ashamed. When they thought of their previous performance, they couldn't help but feel ashamed and self-reproach. Yun chujiu couldn't be bothered with them. She found a corner and sat down, continuing to meditate and cultivate. After coming out of the trial tower, Yun Chujiu's desire to become stronger became even stronger. In her previous life, she had implicated qiqi, but in this life.., she had to become stronger. If Qiqi also transmigrated, then she would be able to protect Qiqi. A day later, the spaceship finally arrived at Crimson Cloud Valley. Crimson Cloud Valley was named after the unique crimson cloud grass. From Afar, it looked like a brilliant cloud. Crimson Cloud Valley had been isolated by the Tian Yuan Academy's array formation into a large area. The demon beasts inside were all below level 19, so after these students entered, their lives were basically not in danger. Deputy Dean Xiao said, "Your mission this time is to obtain the Demonic Beasts' inner cores and spirit herbs. The demonic beasts and spirit herbs of different levels have different points, and the students ranked last in the 50th place will be eliminated. "The duration of this competition is half a month. After half a month, you will return the same way you came. If you exceed the time limit and do not return, your result will be zero. "In addition, the talisman seal inside the scarlet cloud valley is ineffective, so don't take any chances. You think that with the talisman seal, you can take advantage of it. Also, flying is forbidden inside. Do you understand?" Everyone nodded in agreement. Only then did deputy dean Xiao Open a gap in the formation and let everyone in. Everyone walked in in groups of three or five. Only the Huang class members followed closely behind Yun Chujiu. Yun Chujiu felt that although this showed her cohesiveness, it was also very easy for them to develop a sense of dependence, hence, she said, "According to the group, the trial will be carried out. We will gather here the day before the trial ends. Everyone pay attention to your safety and take action on your own!" Although everyone felt a little uncertain about leaving Yun Chujiu, they could only scatter according to the group. Yun chujiu naturally followed Feng Ming's tenth group. The members of the tenth group instantly felt confident. Damn, they were really lucky to be in the same group as the class monitor. This way, they would definitely not be eliminated! They did not feel that there was anything wrong with relying on a little girl from the second level of the Spirit sect. Although this Crimson Cloud Valley was only a part of the encirclement, it was still very big. In the beginning, they could still meet other students, but soon, the group dispersed. The deeper they went, the more demonic beasts they encountered. Every time a demonic beast came, Yun Chujiu would hide to the side and then chew on

the Spirit Fruit to watch the group fight. The people from the tenth group were about to cry! They originally thought that following the class monitor was a good thing, but now it seemed that it was useless. Other than asking them to cook for her and help her guard up, the class monitor only occasionally cheered for them. So it turned out that they were raising an ancestor?
