

The Yun Family's Ninth Child is an Imp! Chapter 1237

Yun chujiu counted with her fingers. She had been trapped here for ten days. Although she did not have to worry about food and drink, it was not a problem to continue like this. She had to think of a way. However, she had used all the methods she could think of. Even cursing the Tian Dao was useless. How could she get out? Yun chujiu finally decided to dig a hole! She felt that since she had nothing to do, she might be able to get out of the underground! Therefore, the guy took the pickaxe and began to dig. After digging a few feet deep, a layer of soil began to appear below, but there were still no signs of life inside. Yun chujiu could not help but complain, "Damn it!" Was this the time when Hun Dun had yet to open? There was no sun or moon, and the sky was so close to the earth. Most importantly, there was not a single living thing. Could it be that I had traveled to the era of Wonton? "Haha!" The guy clapped his hands. "Haha, then wouldn't I become Pangu? "Let me think about it. How did the legend say that Pangu created the world? "Whatever, I'll try to see if the kitchen knife can separate the sky and the Earth!" Yun chujiu held the kitchen knife and cut the edge of the egg. After a few cuts, the edge of the egg really began to rise slowly. Yun chujiu was delighted. There was a door! Hence, this fellow brandished the large kitchen knife and slashed at the egg. The surrounding of the egg gradually rose up. Yun chujiu felt a sense of accomplishment, but it was useless. It was just that the space was a little more spacious., yun chujiu tried to get the little black bird to come out, but the little black bird was still unable to withstand the pressure from the outside. Xiao Heiniaos could not withstand the pressure. Yun chujiu continued to dig the pit. This fellow thought to himself, "Everyone says that the Earth is round, but this Tianyuan continent might also be round. As long as I keep digging, I will definitely be able to dig through it.". After digging for ten days, Yun Chujiu did not find anything, let alone where it led to! Just when this fellow was feeling a little discouraged, the black bead flew out from between Yun Chujiu's brows and floated in the air. A vortex formed around the black bead, and the gas inside the egg began to rush into the black bead. Yun Chujiu was stunned for a moment before she could not help but shout, "Glass ball! If you suck all the air into your body, how am I supposed to breathe? If I die, who will provide you with the power of lightning? You Idiot, why aren't you stopping? !" The black bead completely ignored her and continued to suck the air into her body. Yun chujiu was so angry that she went to grab the black bead. However, the black bead was very agile and Yun Chujiu couldn't grab it at all. Yun chujiu was so angry that she cursed loudly, "Glass ball! You Bastard! You Idiot! All you did was eat and eat all day. You Didn't do a single good thing! Now you want to cut off my path of survival. If I catch you, I will definitely teach you a lesson! "Just you wait! "If I can get out of here, I will throw you into the Spirit Beast House of the Tian Yuan Academy and suffocate you to death!" The black bead trembled. No one knew if it was out of anger or fear, but it continued to absorb the gas. Yun chujiu soon discovered a problem. Although the black bead had been absorbing the gas., however, she did not feel any difficulty in breathing. Could it be that the black bead had only absorbed a portion of the gas in the air? In order to experiment, Yun Chujiu released Xiao Heiniaos. Although Xiao Heiniaos still felt uncomfortable, it felt much better than before. Only then did Yun chujiu confirm that the black bead must be absorbing something in the air. Since it would not have any negative effects on her, it could absorb it if it wanted to.
