

The Yun Family's Ninth Child is an Imp! Chapter 1357

The Savage golden-backed poison spider was preparing to have a good meal when a ball of yarn popped out of nowhere. The eyes above its head revealed a cold and gloomy light. It ate the ball of yarn first.

Thus, the savage golden-backed poison spider shot out a bunch of poisonous sticky silk towards the ball of yarn.

What it didn't expect was that after the ball of yarn grabbed the sticky silk with its small claws, it began to wrap the ball of yarn, while wrapping it, it said, "TSK TSK, the quality of the sticky silk of this high-level demon beast is really good. When I go back, I'll throw away the original six-piece sweater set and knit a new one."

The savage golden back poison spider was dumbfounded. What was it talking about? What did its sticky silk have to do with the six-piece sweater set?

Moreover, its sticky silk was extremely poisonous. Why was the ball of yarn unharmed even when it was pulled with its claws?

The wild gold-backed poisonous spider quickly sensed that something was wrong. The sticky silk was continuously being extracted by the ball of thread. The sticky silk in the poison silk sac was almost completely extracted by the ball of thread. It decided to crawl over and eat the ball of thread.

The wild gold-backed poisonous spider had just taken a few steps forward when several small purple needles shot towards its eyes. The wild gold-backed poisonous spider hurriedly tried to dodge.

Yun chujia curled her lips and started to release the pigs. Several piglets with spiritual power rushed towards the wild gold-backed poisonous spider.

The wild gold-backed poisonous spider was scared silly!

A group of piglets?

Just as it was in a daze, one of the piglets with spiritual power bit down on its eyes above its head. The wild gold-backed poisonous spider screamed in pain.

Its biggest attack weapon was the poisonous silk. However, the poisonous silk was constantly extracted by the ball of yarn and its body was attacked by the piglets with spiritual power. It quickly bit off the poisonous silk with its teeth and turned around to run.

Damn it, where did this group of monsters come from? It could not defeat them, so it was more important to save its life. It was better to run first.

Mao Qiu saw that the savage golden back poison spider was about to run, so it immediately became anxious. "Master, quickly stop this ugly monster. I want its sticky thread."

Yun chujia had no choice but to keep releasing the spiritual energy little pigs. She directed the spiritual energy little pigs to form a pig wall, blocking the way of the savage golden back poison spider.

The wild gold-backed poison spider was about to cry. I was about to F * cking run away, but you guys still refused to let me go. You guys are really bullying the spider! Since that's the case, I'll fight it out with you guys!

The wild gold-backed poison spider shot out poisonous threads to attack the little piglets of spiritual power. Mao Mao Qiu immediately jumped up and excitedly extracted the poisonous threads. He even kept saying, "Come! Come! You shoot more poisonous threads. This baby loves it!"

Fifteen minutes later, the wild gold-backed poisonous spider died. It was unknown whether it was bitten to death by the spiritual power piglet or angered to death by the ball of yarn.

When Bai Mantou saw that the wild gold-backed poisonous spider had died so easily, he could not believe his eyes. He was so angry that he jumped around the room.

How was this possible?

Why was that ball of yarn not afraid of the poisonous threads?

Bai mantou gritted his teeth. Stupid girl, I don't believe that you are so lucky every time. HMPH, let's see what you will do next! You are now in the most dangerous forest of the Great Wilderness Mystic Realm. You will definitely die without a complete corpse!

Yun chujju was saved by the ball of yarn from the poisonous thread. She found that this was a dense forest with thick fallen leaves on the ground.

Yun Chujju recalled the poison ivy forest she had encountered before and did not jump onto the ground directly. Instead, she threw a few stones onto the fallen leaves. There was nothing unusual, so Yun Chujju jumped onto the ground.

Yun chujju chose a direction and carefully walked forward.

After walking for a while, Yun chujju smelled a strange fragrance and was delighted. Could it be that there was a high-grade spirit herb? However, she also knew that there were demon beasts guarding the high-grade spirit herb nearby, so she carefully went over.

After fifteen minutes, Yun chujju found the source of the strange fragrance. It was actually a large colorful mushroom..
